**Syrupus senne compositus**. A syrup made by digesting 46 parts each of s. and rhubarb and 12 of cardamom in 473 of boiling water for 24 hours, evaporating to one half, and adding 393 parts of sugar. [B. 119 (a, 38).]—**Syrupus senne cum manna** (seu *mannatus*). A preparation made by mixing equal parts of syrup of s. and syrup of manna [Ger. Ph.]; or by dissolving 225 parts of manna in 175 of hot water, straining, and adding 600 of syrup of s. [Belg. Ph.]. The other ph's direct the infusion of 30 parts of s. leaves with boiling water (hot water and 30 parts of alcohol [Hung. Ph.], including 45 parts of manna (50 [Dan. Ph.]), or else adding from 25 to 40 of manna to each 100 of infusion, and dissolving in the product an equal amount or somewhat more of sugar. The infusion is aromatized with a little fruit of star anise [Austr. Ph., Roum. Ph., Hung. Ph.] (the Hung. Ph. ordering the addition of an equal amount of sodium carbonate), fennel-seed [Russ. Ph., Swed. Ph., Swiss Ph.], or fennel-seed and ginger [Dan. Ph., Norw. Ph.]. [B. 95, 119 (a, 38).]—**Syrupus senne rosaceus** [Gr. Ph.]. A syrup made by infusing 4 parts of s. leaves and 2 of pale-rose petals in 48 of boiling water, digesting for half an hour, and adding twice its weight of sugar to the colature. [B. 95, 119 (a, 38).]—**Tinctura senne** (*aromatica*, seu *composita*). Fr., *teinture de séné*. A preparation made by macerating for 2 days  $\frac{1}{2}$  oz. of s. leaves, 2 of raisins without the seeds, and  $\frac{1}{2}$  oz. each of caraway-seeds and coriander-seeds with alcohol enough to make 20 fl. oz. of filtered tincture, and percolating [Br. Ph.]; or by macerating s. leaves with 5 times as much 60-per-cent. alcohol for 10 days [Fr. Cod.] (2 days [Belg. Ph.]); or by digesting for a week with 5 times as much dilute alcohol [Swiss Ph.]. The older ph's had a tincture (*elixir salutis*) of 369 parts of s. leaves, 46 of caraway, 15 of cardamom, and 3,790 of alcohol; or of 120 each of s. leaves and black currants, 11 of caraway, 4 of cardamom, and 910 of alcohol. [B. 95, 119 (a, 38).]—**Tinnevely s.** Lat., *s. indica* [Br. Ph.], *s. Tinnevely* [Austr. Ph.]. Fr., *séné de tinnevely* [Fr. Cod.]. Sp., *sen de Tinnevely* [Sp. Ph.]. Indian s.; a very superior drug produced by the same species (*Cassia angustifolia*) as Arabian s., but from the plant as cultivated in India. It consists of the leaflets without admixture or adulteration, and has a fragrant, tea-like odor and but slight taste. The leaflets, which are from 1 to 2 in. long and of a fine yellowish-green color, are not so stiff as those of Alexandrian s. According to Groves, it contains one third less cathartic acid than Alexandrian s. [a, 35].—**Tripoli s.** Lat., *folia senne tripolitane*. Ger., *tripolitane Senneblätter*, *Sennesblätter von Tripoli*. An inferior s. consisting of the much-broken-up leaflets of *Cassia ethiopica*, probably collected at Fezzan and not in Sennar and Nubia, as has been generally supposed (whence the name *Nubian s.*). [a, 35].—**Vinum senne**. A preparation made by digesting 120 parts of s. leaves and 7 each of coriander and fennel in 900 of Spanish wine for three days, adding 90 of raisins without the seeds, macerating for twenty-four hours, and expressing. [B. 119 (a, 38).]—**Wild s.** See *American s.*, *Aleppo s.*, and *False s.* (4th def.).

**SENNACROL**, n. Se'n'a'k-ro'l. A bitter principle found in senna, soluble in ether. [B. 5 (a, 38).]

**SENNAPICRIN**, n. Se'n'a-p'ik'r'i'n. An insoluble bitter principle found in senna. [B. 5 (a, 38).]

**SENNE** (Ger.), n. Ze'n'a'ne. See SENNA.—**S's bälge**, **S'sbälglein**, **S'schoten**, **S'shülsen**. See SENNA pods.

**SENNEBLÄTER** (Ger.), n. pl. Ze'n'a'ne's-blät-te'r. See SENNA (2d and 3d defs).—**Blasens**, **Deutsche S.** See *Bladder-senna*.—**S'latwerge**. See *Confectio SENNE*.

**SENNIN**, n. Se'n'a'i'n. Of Rau, a body forming acicular crystals, consisting of sulphur with a trace of bitter organic matter; obtained by precipitating an aqueous decoction of senna with lead subacetate, filtering the solution and precipitating with hydrogen sulphide, drying, digesting in ether, and evaporating. [*Proc. of the Am. Pharm. Assoc.*, xvi, p. 280 (a, 50).]

**SENS** (Fr.), n. Sa'n's. See SENSE.—**S. génital**. Of Raciboiski, the activity displayed by Nature in the development of Graafian vesicles at the time of puberty. [A, 15].—**S. matériel**. See *Nutritive SENSES*.

**SENSATION**, n. Se'n's-a'shu'n. Gr., *αἴσθησις*. Lat., *sensus*, *sensatio* (from *sentire*, to feel). Fr., *S.*, *Empfindung*. An impression produced on the higher cerebral centres by external objects through the medium of the organs of sense. [K.]—**Correlative s.** The general excitement of the cerebrum by a s. propagated along a single sensory nerve. [K, 35].—**Cutaneous s.** Ger., *Hautsinn*. A sense-impression produced through the medium of the skin. [a, 48].—**Eccentric s.** The conception of locality. [K, 35].—**External s.** A s. transmitted from one of the peripheral organs of sense. [K.] Cf. *Internal s.*—**General s.** See *Subjective s.*—**Girdle s.** Fr., *douleurs en ceinture*. Ger., *Gürtelgefühl*, *Reifengefühl*. A painful s. like that produced by a cord or bandage tightened about the trunk or limbs; a common symptom in spinal disease. [D, 35]. Cf. *Girdle ANESTHESIA*.—**Internal s.** A subjective s.; one not produced through the agency of the external organs of sense; such as hunger and thirst, the desire to sleep, etc. [K.]—**Objective s.** An external s. due to the agency of some object of sense. [K.]—**Radiated s.**, **Secondary s.** Of Müller, the excitation of one s. by another, or the extension, in disense, of a morbid s. to parts not actually affected. [a, 34].—**S. transference**. Recognition of objects that are usually only distinguished by visual or auditory s. by means of tactile s.; clairvoyance. [a, 34].—**Special s.** See *Special SENSES*.—**Subjective s.** 1. A s. which originates within the cerebrum. [K.] 2. See *Internal s.*—**Tactile s.** An impression produced through the medium of the sense of touch. [a, 48].

**SENSE**, n. Se'n's. Gr., *αἴσθησις*. Lat., *sensus*. Fr., *sens*. Ger., *Sinn*. A faculty by which an impression is gained of the existence and qualities of external objects. [K.]—**Chnisiometric s.** The faculty of apprehending the amount or extent of movements. [A, 322 (a, 48).]—**Color s.** Ger., *Farbensinn*. The perception of colors;

1. A small ivory or bone wedge-shaped instrument used for separating vascular tissues in order to prevent the hæmorrhage conse-

SEPTICEMIE (Fr.), n. Se<sup>2</sup>pte-sa-me. See SEPTICÆMIA.—S. aiguë à forme gangréneuse. See GANGRÈNE gazeuse foudroyante.—S. atténuée. A mild, slow form of septicæmia, supposed to be due to a specific micro-organism (*Streptococcus*). [A.]

15.]—**S. décaduale**. Of Guénot, s. due to infection by the inner surface of the uterus.—**S. foudroyante**, **S. vraie**. See **Fulminant SEPTICÆMIA**.

**SEPTICINE**, n. **Se<sup>2</sup>pt<sup>1</sup>i<sup>s</sup>-en. Fr., *s.* Ger., *Septicin*. 1. Animal quinoidine; a fluorescent ptomaine analogous to quinine, and having all its optical and chemical properties, found in the liver and other viscera and tissues of man and certain lower animals. [B, 93 (a, 14).] 2. Of Hager, a mixture of amylamine and hexylamine obtained from putrid material. [B.]**

**SEPTICOPYÆMIA** (Lat.), n. f. **Se<sup>2</sup>pt(sapt)<sup>1</sup>i<sup>2</sup>k-o(o<sup>3</sup>)-pi(pu<sup>6</sup>)-em(a<sup>2</sup>e<sup>2</sup>m)-i<sup>2</sup>-a<sup>3</sup>**. From *σηπτικός*, putrid, *πύον*, pus, and *αἷμα*, blood. Ger., *Septicopyæmie*. 1. Septic pyæmia. 2. A combination of septicæmia and pyæmia. [B.]—**S. metastatica**. A form characterized by putrid deposits in the lungs, etc., as the result of supuration and putrescence of venous thrombi. [A, 57.]

**SEPTIFEROUS, SEPTIGEROUS**, adj. **Se<sup>2</sup>pt-i<sup>2</sup>f(e<sup>2</sup>r-u<sup>3</sup>s)-i<sup>2</sup>g(e<sup>2</sup>r-u<sup>3</sup>s)**. Lat., *septifer* (from *septum*, a fence, and *ferre* or *genere*, to bear). Fr., *septifère*. Bearing dissepiments. [a, 35.]

**SEPTIKÆMIE** (Ger.), n. **Ze<sup>2</sup>pt-e-kam-e'**. Septicæmia.

**SEPTILE**, adj. **Se<sup>2</sup>pt<sup>1</sup>i<sup>2</sup>**. Lat., *septilis* (from *septum*, a fence). Fr., *s.* Belonging to or attached to dissepiments. [a, 35.]

**SEPTIMANA** (Lat.), n. f. **Se<sup>2</sup>pt-i<sup>2</sup>-man(ma<sup>2</sup>n)-a<sup>3</sup>**. From *septem*, seven. Of Morgagni, see *Septan FEVER*.

**SEPTIMESTRIS** (Lat.), n. **Se<sup>2</sup>pt-i<sup>2</sup>-me<sup>2</sup>st<sup>1</sup>-ri<sup>2</sup>s**. From *septem*, seven, and *mensis*, a month. Of seven months; of a fœtus, born after seven months' gestation. [A, 322, 325 (a, 48).]

**SEPTINE**, n. **Se<sup>2</sup>pt<sup>1</sup>-en**. See **SEPSINE**.

**SEPTIVALENT**, adj. **Se<sup>2</sup>pt-i<sup>2</sup>v-a<sup>3</sup>-l<sup>2</sup>nt**. From *septem*, seven, and *valere*, to have power. Ger., *siebenwerthig*. Having an atomicity of seven. [B.]

**SEPTOCHÆMIA** (Lat.), n. f. **Se<sup>2</sup>pt-o(o<sup>3</sup>)-ke<sup>2</sup>m(ch<sup>2</sup>am)-i(e)-a<sup>3</sup>**. From *σηπτός*, corrupted, and *χæmia*, alchemy. Fr., *septochemie*. Septic activity or action. [L, 50 (a, 14).]

**SEPTODIARRHŒA** (Lat.), n. f. **Se<sup>2</sup>pt<sup>1</sup>-o(o<sup>3</sup>)-di(di<sup>2</sup>)-a<sup>2</sup>r(a<sup>3</sup>)-re(ro<sup>2</sup>e<sup>2</sup>)-a<sup>3</sup>**. From *σηπτός*, corrupted, and *διάρροια*, diarrhœa. Fr., *septodiarrhée*. Septic diarrhœa. [L, 50 (a, 14).]

**SEPTODYSENTERIA** (Lat.), n. f. **Se<sup>2</sup>pt<sup>1</sup>-o(o<sup>3</sup>)-di<sup>2</sup>z(du<sup>2</sup>s)-e<sup>2</sup>nt-e(e<sup>2</sup>g)-ri<sup>2</sup>-a<sup>3</sup>**. From *σηπτός*, corrupted, and *δυσεντερία*, dysentery. Fr., *septodysentérie*. Septic dysentery. [L, 50 (a, 14).]

**SEPTOMETER**, n. **Se<sup>2</sup>pt-o<sup>2</sup>m(e<sup>2</sup>t-u<sup>3</sup>r)**. From *σηπτός*, corrupted (1st def.), or *septum*, a fence (2d def.), and *μέτρον*, a measure. Fr., *septomètre*. 1. Of R. A. Smith, an instrument for determining the quantity of organic putrescible matter present in air. [L, 41, 49 (a, 14).] 2. See **SEPTOMETER**.

**SEPTON**, n. **Se<sup>2</sup>p<sup>1</sup>-t<sup>1</sup>n**. From *σῆπεν*, to make rotten. Of S. I. Mitchell, a hypothetical substance, of the nature of a ferment, supposed to cause a contagious disease. [a, 34.]

**SEPTOPYRA** (Lat.), n. f. **Se<sup>2</sup>pt-o<sup>2</sup>p<sup>1</sup>i<sup>2</sup>(ru<sup>2</sup>r)-a<sup>3</sup>**. From *σηπτός*, corrupted, and *πῦρ*, fire. Fr., *septopyre*. See **PUTRID FEVER**.

**SEPTULATE**, adj. **Se<sup>2</sup>pt-u<sup>2</sup>-al**. Lat., *septulatus* (from *sæptulum*, a small fence). Divided by transverse or false dissepiments. [a, 35.]

**SEPTULUM, SEPTUM** (Lat.), n's n. **Se<sup>2</sup>pt(sapt)<sup>1</sup>-u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m)**. See **SEPTULUM** and **SEPTUM**.

**SEPTUPLET**, n. **Se<sup>2</sup>p<sup>1</sup>-tu<sup>2</sup>-ple<sup>2</sup>t**. One of seven children born as the result of a single gestation. ["Rev. méd. franç. et étrang.," 1, 1877, p. 235 (a, 34).]

**SEQUELA** (Lat.), n. f. **Se<sup>2</sup>k-wel(wal)-a<sup>3</sup>**. From *sequi*, to follow. Fr., *séquelle*, suite. Ger., *Folgekrankheit*, *Nachkrankheit*, *Folgeerscheinung*. A morbid affection or abnormality resulting from a preceding disease or injury. [a, 48.]

**SEQUESTRATION**, n. **Se-kwe<sup>2</sup>st-ra<sup>2</sup>shu<sup>2</sup>n**. Lat., *sequestratio* (from *sequestrare*, to surrender). Fr., *séquestration*. Ger., *S.* 1. The formation of a sequestrum. 2. Seclusion of lunatics or of persons affected with contagious or infectious disease. [A, 385 (a, 48).]

**SEQUESTROTOMY**, n. **Se-kwe<sup>2</sup>st-ro<sup>2</sup>t-om-i<sup>2</sup>**. From *sequestrum* (q. v.), and *τέμνω*, to cut. Ger., *Sequestrotomie*. The operation of removing a sequestrum. [E.]

**SEQUESTRUM** (Lat.), n. **Se-kwe<sup>2</sup>st<sup>1</sup>-ru<sup>2</sup>m(ru<sup>2</sup>m)**. From *sequestrare*, to surrender. Ger., *Sequester*, *Knochensequester*. A portion of bone separated from the healthy bone in consequence of being necrosed, but not dislodged from its position. [E (a, 48).]

**SERALBUMIN**, n. **Se<sup>2</sup>r-a<sup>2</sup>l-bu<sup>2</sup>m<sup>2</sup>i<sup>2</sup>n**. See **SERUM ALBUMIN**.

**SERAPINUM** (Lat.), n. n. **Se<sup>2</sup>r-a<sup>2</sup>p(a<sup>2</sup>p)-in(en)-u<sup>2</sup>m(u<sup>2</sup>m)**. Ger., *Serapin*. In the middle ages, saganapum. [a, 35.]

**SERAPINUS** (Lat.), n. m. **Se<sup>2</sup>r-a<sup>2</sup>p(a<sup>2</sup>p)-in(en)-u<sup>2</sup>s(u<sup>2</sup>s)**. Of the alchemists, gum arabic. [A, 325.]

**SÉREUX** (Fr.), adj. **Sa-ru<sup>2</sup>**. See **SEROUS**.

**SERICEOUS**, adj. **Se<sup>2</sup>r-i<sup>2</sup>shu<sup>2</sup>s**. Lat., *sericeus* (from *sericum*, silk). Fr., *soyeux*. Covered with close-pressed, soft, fine hairs; silky to the touch. [a, 35.]

**SERICOPS**, n. **Se<sup>2</sup>r-i<sup>2</sup>so<sup>2</sup>ps**. Fr., *sericeps*. From *sericum*, silk, and *ψαλψα* (q. v.). Of Poulet, (1) a contrivance invented by him, consisting of a sort of bag, the open end of which is to be applied to the frontal head and laced, to serve for making traction; (2) a device, for like use, made mostly of flexible steel. [A, 15; Poulet, "Arch. de toxicol.," 1875, p. 468; "Lyon méd.," Dec. 25, 1881.]

**SERICIACUM**, n. Of the alchemists, arsenic. [A, 325.]

**SERICIC ACID**, n. **Se<sup>2</sup>r-i<sup>2</sup>s<sup>1</sup>ik**. Fr., *acide sérifique*. 1. A yellowish, uncrystallizable, deliquescent substance,  $C_{30}H_{46}N_8O_{14}$ , obtained from silk, soluble in ether and in alcohol. [B, 2.] 2. See **MYRISTIC ACID**.

**SERICIN**, n. **Se<sup>2</sup>r-i<sup>2</sup>s<sup>1</sup>i<sup>2</sup>n**. Fr., *séricine*, *gélatine de la soie*. Ger., *Seidenfibrin*. 1. Silk-substance, silk-gelatin; a yellowish body,  $C_{15}H_{25}N_5O_8$ , obtained by boiling raw silk a long time with water. [B, 4, 93 (a, 14, 38).] 2. See **SERIN** (2d def.).

**SERICOGRAPHIS** (Lat.), n. f. **Se<sup>2</sup>r(sar)-i<sup>2</sup>k-o<sup>2</sup>g<sup>1</sup>(ra<sup>2</sup>f)(ra<sup>2</sup>f)-i<sup>2</sup>s**. Gen., *-graphi<sup>2</sup>dos (-idis)*. From *σηρικός*, silk, and *γραφία*, a design. A genus of the *Acanthaceæ*. [a, 35.]—**S. mohitii**. A Brazilian and Central American herb. The leaves are stimulant, and in Mexico are considered antidysenteric. They yield a dark-blue coloring matter which resembles litmus in its reactions. [B, 42, 121 (a, 35); J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]

**SERICTERIA** (Lat.), n. n. pl. **Se<sup>2</sup>r(sar)-i<sup>2</sup>kt-e(e<sup>2</sup>g)-ri<sup>2</sup>-a<sup>3</sup>**. From *σηρικός*, silk. Fr., *séricières*. See **Spinning GLANDS**.

**SERICUM** (Lat.), n. n. **Se<sup>2</sup>r(sar)-i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m)**. From *σηρικός*, silken. The cocoon of the silkworm (*Bombyx mori*); silk. [a, 35.]—**S. adhasivum**, **S. anglicum**. See **Court-PLASTER**.—**S. crudum**. See **S.**

**SERIES** (Lat.), n. f. **Ser(se<sup>2</sup>r)-i<sup>2</sup>-ez(-as)**. From *serere*, to join together. Fr., *série*, *Reihe* (1st def.). 1. An orderly line of things more or less similar. [a, 48.] 2. In botanical classification, of Gray, a subkingdom; of some authors, a principal division of an order or other large group. [a, 35.]

**SERIN**, n. **Ser-i<sup>2</sup>n**. Fr., *sérine*. Ger., *S.* 1. See **SERUM ALBUMIN**. 2. Amidoglycerol; a sweetish substance,  $C_3H_7NO_3 = C_2H_5(OH)(NH_2)CO.OH$ , derived from silk by boiling with dilute sulphuric acid. According to Baumann, it has no relation with cystine. [B, 3 (a, 38); B, 4.]

**SERINGOS**, n. A form of purulent dysentery endemic in Caf-fraria. [L, 41 (a, 14).]

**SERINGUE** (Fr.), n. **Se<sup>2</sup>-ra<sup>2</sup>n<sup>2</sup>g**. See **SYRINGE**.—**S. prlapique**. See **Ricord's SYRINGE**.

**SERIS** (Lat.), n. f. **Serise<sup>2</sup>r<sup>1</sup>i<sup>2</sup>s**. Gen., *ser'idos (-idis)*, *ser'eos (-is)*. Gr., *σέρης*. Of the ancients, the genus *Cichorium*.

**SERICISSION**, n. **Ser-i<sup>2</sup>-si<sup>2</sup>z<sup>1</sup>zhu<sup>2</sup>n**. From *sericum*, silk, and *scindere*, to cut. Fr., *séricission*. The cutting through of tissues with silk thread. [a, 40.]

**SERISSA** (Lat.), n. f. **Se<sup>2</sup>r-i<sup>2</sup>s<sup>1</sup>sa<sup>2</sup>**. Fr., *sérissée*. A genus of the *Rubiaceæ*. [a, 35.]—**S. foetida**. The only species; cultivated in China, Japan, and India. The astrigent root is used in diarrhœa and dysentery, and externally in ophthalmia and ulcers. [a, 35.]

**SERJANIA** (Lat.), n. f. **Se<sup>2</sup>r-zha<sup>2</sup>n<sup>2</sup>i<sup>2</sup>a<sup>3</sup>**. Fr., *serjanie*. Ger., *Serjanie*. A genus of sapindaceous shrubs. All species are narcotic. [a, 35.]—**S. lethalis**. Ger., *tödliche Serjanie*. Brazilian fish-poison plant; a species containing a resinous, bitter, narcotic juice used as a fish poison. It is said to be one of the plants from the flowers of which a certain wasp collects an acrid narcotic honey which produces, even in small quantity, raving madness and sometimes death. [a, 35.]—**S. mexicana**. Ger., *mexikanische Serjanie*. Sp., *guameacal* [Mex. Ph.]. A diuretic Mexican species used in gout and chronic syphilis. [a, 35.]—**S. noxia**. A poisonous Brazilian species, having the properties of *S. lethalis*. [a, 35.]—**S. triterinata**. Fr., *serjanie triterinée*, *liane à persil*. A species found in the West Indies and neighboring regions of South America. The leaves and young branches are used as a fish poison, and medicinally like sarsaparilla in syphilis, etc. [a, 35.]

**SERMAIZE** (Fr.), n. **Se<sup>2</sup>r-me<sup>2</sup>z**. A place in the department of the Marne, France, where there is a chalybeate spring. [L, 49, 57 (a, 14).]

**SERNEUS** (Ger.), n. **Ze<sup>2</sup>r-nois**. A place in the canton of the Grisons, Switzerland, where there is a sulphurous and alkaline spring. [L, 49, 57 (a, 14).]

**SEROALBUMINURIA** (Lat.), n. f. **Ser(se<sup>2</sup>r)-o(o<sup>3</sup>)-a<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-m<sup>2</sup>i<sup>2</sup>n-u<sup>2</sup>r(ur)<sup>2</sup>-i<sup>2</sup>a<sup>3</sup>**. See under **ALBUMINURIA**.

**SEROCELOMA** (Lat.), n. m. **Ser(se<sup>2</sup>r)-o(o<sup>3</sup>)-sel(ko<sup>2</sup>el)-om-a<sup>3</sup>**. From *serum*, serum, and *κύτος*, hollow. Ger., *Serocölom*, *Interamionhöhle*. The space between the fœtus and the amnion. [L.]

**SEROCYSTIC**, adj. **Ser-o-si<sup>2</sup>st<sup>1</sup>i<sup>2</sup>k**. From *serum* (q. v.), and *κύστις*, a cyst. Composed of or containing cysts filled with serum. [a, 40.]

**SÉROFIBRINE** (Fr.), n. **Sa-ro-feb-ren**. See **PLASMIN**.

**SERO-FIBRINOUS**, adj. **Ser-o-fib<sup>1</sup>-ri<sup>2</sup>n-u<sup>3</sup>s**. Partaking of the nature of both serum and fibrin. [D.]

**SERO-GELATINOUS**, adj. **Ser-o-jel<sup>1</sup>-a<sup>2</sup>t<sup>1</sup>i<sup>2</sup>n-u<sup>3</sup>s**. Partaking of the nature of both serum and gelatin. [D.]

**SERO-LACTESCENT**, adj. **Ser-o-la<sup>2</sup>kt-e<sup>2</sup>s<sup>1</sup>nt**. Fr., *sérolactescent*. Having the characters of serum and of milk (said of the secretion of Montgomery's glands). [A, 41.]

**SEROLIN**, n. **Ser-o<sup>2</sup>l-i<sup>2</sup>n**. Lat., *serolina*. Fr., *séroline*. Ger., *Serolin*. A compound contained in blood in the proportion of 2 parts in 100,000. It occurs in agglomerations of micro-crystalline needles or pearly scales, very sparingly soluble in cold alcohol, more freely in boiling alcohol, and in ether; it is neutral, fusible at 36° C., and non-saponifiable. According to Goble, it is a mixture of albumin and fatty matters; according to Flint, it is identical with stercorin. [B, 8, 93 (a, 14).]

**SERO-MUCOUS**, adj. **Ser-o-mu<sup>2</sup>k<sup>1</sup>-u<sup>3</sup>s**. Partaking of the nature of both serum and mucus. [D.]

**SEROPHTHISIS** (Lat.), n. f. **Se<sup>2</sup>r-o<sup>2</sup>t(o<sup>2</sup>th)<sup>1</sup>i<sup>2</sup>si<sup>2</sup>s**. Gen., *-phthis'is*. For deriv., see **SARIS** and **PTHRISIS**. A great diminution of the quantity of serum in the blood. [a, 34.]—**S. pernicioso** **endemic**. Of Wernich, beriberi. [a, 34.]

**SEROPNEUMOTHORAX** (Lat.), n. m. **Ser(se<sup>2</sup>r)-o(o<sup>3</sup>)-nu<sup>2</sup>(pm<sup>2</sup>)<sup>2</sup>mo<sup>2</sup>co<sup>2</sup>-tho<sup>2</sup>r-a<sup>2</sup>x(a<sup>2</sup>x)**. Gen., *-ac'is (-ac'is)*. From *serum* (q. v.), *πνεύμα*, the lung, and *θώραξ*, the thorax. Pleurisy with serous effusion complicated with pneumothorax. [A, 326 (a, 40).]

**SERO-PURULENT**, adj. Ser-o-pu<sup>r</sup>-u<sup>2</sup>-l<sup>nt</sup>. Partaking of the nature of both serum and pus. [D.]

**SERO-PUS**, n. Ser<sup>o</sup>-pu<sup>s</sup>. A fluid which consists of both serum and pus. [D.]

**SEROSA** (Lat.), n. f. Ser<sup>o</sup>-os<sup>a</sup>. From *serum*, serum. A serous membrane. [L.]

**SERO-SEROUS**, adj. Ser-o-ser<sup>u</sup>s. Pertaining to two or more serous membranes jointly (see *S.-s. suture*).

**SEROSITIS** (Lat.), n. f. Ser(se<sup>r</sup>)-o<sup>s</sup>(os)-i(e)<sup>t</sup>i<sup>s</sup>. Gen., -i<sup>t</sup>idos (-idis). From *serum*, serum. Inflammation of a serous membrane. [B.]—**Multiple s.** Simultaneous inflammatory effusion into several serous sacs. [C. Bozzolo, "Ctbl. f. kl. Med.," Mar. 14, 1885.]

**SÉRO-SUBLIMÉ** (Fr.), n. Sa-ro-su<sup>b</sup>-le-ma. A compound of corrosive sublimate with albumin, soluble in serum; is used in antiseptic dressings. [Lister, "Sem. méd.," Oct. 9, 1883, p. 418 (a, 18).] Cf. *MERCURY albuminate*.

**SERO-SYNOVIAL**, adj. Ser<sup>o</sup>-si<sup>n</sup>-ov<sup>i</sup>-l<sup>l</sup>. Partaking of the nature of both serum and synovia. [a, 48.]

**SEROTINA** (Lat.), n. f. Ser<sup>r</sup>(sar)-o<sup>t</sup>(ot)/i<sup>n</sup>-a<sup>a</sup>. Fr., *sérotine*. See *DECIDUA s.*

**SEROTINOUS**, adj. Ser<sup>r</sup>-o<sup>t</sup>/i<sup>n</sup>-u<sup>s</sup>. Lat., *serotinus*. Fr., *tardef*. Ger., *spätzeitig*, *verspätet*. Produced late in the season in comparison with some other allied plant or plant-organ; of an anther, coming to maturity later than the pistil. [a, 35.]

**SEROUS**, adj. Ser<sup>u</sup>s. Fr., *séveux*. Ger., *serös*. Consisting of, containing, resembling, or producing (see *S. MEMBRANE*) serum; thin, watery.

**SERPENS** (Lat.), adj. Su<sup>r</sup>rp(se<sup>r</sup>rp)/en<sup>z</sup>(ans). Gen., -pent<sup>i</sup>s. From *serpere*, to creep. See *CREeping*; as a n., (a) a serpent; (b) see *HERPES* (1st def.).—**Radix serpentum**. The root of *Ophiorrhiza mungos*. [a, 35.]

**SERPENTARIA** (Fr.), n. Ser<sup>r</sup>-pa<sup>n</sup>-a<sup>a</sup>. See *ARISTOLOCHIA serpentaria*, *ARUM maculatum*, and *DRACUNCULUS vulgaris*.—**Alcoolé de s.** See *Tinctura serpentaria*.—**Infusion de s. de Virginie**. See *INFUSUM SERPENTARIAE*.—**Poudre de s. de Virginie** [Fr. Cod.]. The dried and powdered root of *Aristolochia serpentaria* sifted through a No. 120 silk sieve. [B, 95 (a, 38).]—**S. de Virginie**. The *Aristolochia serpentaria*; of the Fr. Cod., its rhizome. [a, 35.]—**Teinture de s. de Virginie**. See *Tinctura SERPENTARIAE*.

**SERPENTARIA** (Lat.), n. f. Su<sup>r</sup>rp(se<sup>r</sup>)-pe<sup>n</sup>-a<sup>a</sup>/ri<sup>2</sup>-a<sup>a</sup>. From *serpens*, a serpent. Fr., *aristoloche serpentinaire, serpentinaire de Virginie (souche)* [Fr. Cod.]. Sp., *S. de Virginia (rizoma)* [Sp. Ph.]. 1. The *Aristolochia s.* 2. The rhizome of *Aristolochia s.*, and, according to the U. S. and Br. Ph.'s, of *Aristolochia reticulata*. [B, 95 (a, 38).] 3. Of Rafinesque and others, a section of the genus *Aristolochia*. The *Serpentariae* are: of Endlicher, a class of the *Acromphibrya* containing the *Aristolochiae* and *Nepenthes*; of Eichler, an order (cohort) of the *Monochlamydeae* including the *Aristolochiae*. [a, 35.]—**Cerussa serpentariae**. See *LEAD acetate*.—**Essentia serpentariae virginiana**. See *Tinctura serpentariae*.—**Extractum serpentariae fluidum** [U. S. Ph.]. A preparation made by moistening 100 grammes of s. in No. 60 powder with 30 of a mixture of 3 parts of alcohol with 1 part of water, exhausting in a percolator with more of the menstruum, reserving 90 c. c. of percolate, evaporating the rest to a soft extract, and bringing the mixture of the two up to 100 c. c. with the menstruum. [B, 95 (a, 38).]—**Infusum serpentariae** [Br. Ph.] (*virginiana*). A preparation made by infusing 1 part of s. in No. 20 powder in 40 parts of boiling water for half an hour and straining. [B, 95, 119 (a, 38).]—**Radix (seu Rhizoma) serpentariae**. See *S. (2d def.)*.—**S. brasiliensis**. See *CHIOCOCOA anguifuga*.—**Serpentaria radix (seu rhizoma)**. See *S. (2d def.)*.—**S. indica**. See *OPHIORRHIZA mungos*.—**S. major**. See *DRACUNCULUS vulgaris*.—**S. mas**. See *POLYGONUM bistorta*.—**S. minor**. An old name for the *Arum maculatum*. [a, 35.]—**S. rubra, S. vulgaris**. See *POLYGONUM bistorta*.—**Tinctura serpentariae (virginiana)**. A preparation made by macerating 10 parts of s. in No. 40 powder for one day with 10 of alcohol of sp. gr. 0.928, and treating in a percolator with enough more alcohol to make 100 parts of filtered tincture [U. S. Ph.]; or by macerating 2½ oz. of s. in No. 40 powder for two days with 15 fl. oz. of alcohol, and treating in a percolator, adding alcohol enough to make 20 fl. oz. of expressed and filtered tincture [Br. Ph.]. [B, 95 (a, 38).]

**SERPENTARIN**, n. Su<sup>r</sup>-pe<sup>n</sup>-a<sup>a</sup>/r<sup>i</sup>-i<sup>n</sup>. See *ARISTOLOCHIN*.

**SERPES** (Lat.), n. m. Su<sup>r</sup>rp(se<sup>r</sup>rp)/ez(as). Gen., -et<sup>i</sup>s. Herpes. [G.]

**SERPIGINOUS**, adj. Su<sup>r</sup>rp-i<sup>z</sup>/i<sup>n</sup>-u<sup>s</sup>. Lat., *serpiginus* (from *serpere*, to creep). Fr., *serpigneux*. Spreading gradually from point to point of a surface (said of ulceration). [a, 48.]

**SERPIGO** (Lat.), n. f. Su<sup>r</sup>rp(se<sup>r</sup>rp)-i(e)<sup>go</sup>. Gen., -ig<sup>i</sup>nis. From *serpere*, to creep. 1. A creeping skin eruption; herpes (1st def.). 2. Of Fuchs, scabies crustosa. [G. 5.]—**S. diffusa**. Scabies crustosa. [G.]—**S. faciei**. Scabies (or eczema) of the face, with thick crusts. [G. 5.]—**S. volatica**. See *HERPES* (1st def.).

**SERPILLUM** (Lat.), n. n. Su<sup>r</sup>rp(se<sup>r</sup>rp)-i<sup>2</sup>/lu<sup>m</sup>(lu<sup>m</sup>). See *SERPYPILLUM*.

**SERPOLET** [Fr. Cod.] (Fr.), n. Ser<sup>r</sup>-po-la. The *Thymus serpyllum*. [a, 35.]—**Alcoolat de s.** See *Spiritus SERPYLLI*.—**Hydrolat de s.** [Fr. Cod., 1832]. See *Aqua SERPYLLI*.—**Oléole de s.** See *Oil of SERPYLLUM*.

**SERPYPILLUM** (Lat.), n. n. Su<sup>r</sup>rp(se<sup>r</sup>rp)-i<sup>2</sup>/lu<sup>m</sup>(lu<sup>m</sup>). 1. The *Thymus s.* 2. Of Persoon, a section of the genus *Thymus*. [a, 35.] 3. Of the Austr. Ph., see *Herba serpylli*.—**Ætheroleum serpylli**. See *Oil of s.*—**Aqua serpylli**. Fr., *eau (ou hydrolat) de serpolet*. A preparation made by dissolving 3 parts of oil of wild thyme in 27 of alcohol and shaking up with 9,970 of water.

[B, 95 (a, 38).]—**Aqua serpylli composita**. See *Aqua benedicta composita*.—**Essentia serpylli**. See *Oil of s.*—**Herba serpylli**. Fr., *serpolet*. Sp., *serpol*. Wild thyme; the flowering leafy branches of *Thymus s.* [a, 35.]—**Oil of s.**, **Oleum serpylli (ætherium)**. A colorless or yellowish oil, of peculiar odor and aromatic taste, distilled from the herb (dried flowering herb [Gr. Ph.]) of *Thymus s.* [B, 95 (a, 38).]—**S. minus**. The *Thymus s.* [a, 35.]—**S. romanum**. The *Thymus vulgaris*. [a, 35.]—**S. silvestris, S. vulgaris**. The *Thymus s.* [a, 35.]—**Spiritus serpylli**. A preparation made by macerating 15 parts of the herb of *Thymus s.* with 45 each of alcohol of sp. gr. 0.832 and water (60 of alcohol of sp. gr. 0.900 and from 90 to 120 of water [Gr. Ph.]) and distilling 60 parts [Ger. Ph., Gr. Ph., Swiss Ph.]; or by dissolving 1 part of oil of *Thymus s.* in 99 parts of 80-per-cent. alcohol [Belg. Ph.] (in a mixture of 24 parts of 90-per-cent. alcohol with 72 of 70-per-cent. alcohol [Russ. Ph.]). [B, 95, 119 (a, 38).]

**SERRA** (Lat.), n. f. Ser<sup>r</sup>-ra<sup>a</sup>. See *SAW*.—**S. versatilis**. See *TREPHINE*.

**SERRATE, SERRATED**, adj's. Ser<sup>r</sup>-at, -at-e<sup>d</sup>. Lat., *serratus* (from *serra*, a saw). Fr., *serré, dentelé*. Ger., *gesägt, sägezählig, gezähnt*. Indented like a saw. [a, 27.]

**SERRATILE** (Fr.), adj. Ser<sup>r</sup>-ra<sup>a</sup>-tel. Saw-like (said of a pulse that seems to strike the finger at several distinct points). [L, 41 (a, 14, 48).]

**SERRATULA** (Lat.), n. f. Ser<sup>r</sup>-ra<sup>a</sup>t(rat<sup>t</sup>)/u<sup>2</sup>(u<sup>4</sup>)-a<sup>a</sup>. Fr., *ser-ratte* (4th def.), *serrature* (4th def.). Ger., *Scharfe* (4th def.). 1. The *Stachys betonica* and formerly the *S. tinctoria*. 2. Of Don, the genus *Haplotaenia*. 3. Of Rumphius, the genus *Picria*. 4. Of Linnaeus, sawwort; a genus of the *Serratuleae*, which are a tribe of the *Carduineae*. [a, 35.]—**S. tinctoria**. Fr., *serrature (des teinturiers)*. Ger., *färbende Scharfe*. Dyers' savory, common sawwort; a European plant. The herb and root were formerly used externally as detensives and vulneraries. The herbage yields a yellow dye. [a, 35.]

**SERRATURES**, n. Ser<sup>r</sup>-at<sup>t</sup>-u<sup>r</sup>z. Lat., *serraturæ* (from *serrare*, to saw). Ger., *Sägenzähne, Sägen*. See *DENTELURES*.

**SERRATUS** (Lat.), adj. Ser<sup>r</sup>-rat(rat<sup>t</sup>)/u<sup>2</sup>(u<sup>4</sup>)-s. See *SERRATE*; as a n. m., a muscle having a digitated margin. [L.]—**S. anticus (major)**. See *S. magnus*.—**S. anticus minor, S. der Brust** (Ger.). See *PECTORALIS minor*.—**S. internus**. See *INFRAcostalis*.—**S. magnus, S. major**. Fr., *grand dentelé*. Ger., *grosser Sägenmuskel*. A broad, flat muscle which arises by nine or ten fleshy digitations from the external surfaces of the upper eight or nine ribs (two usually from the second rib), and is inserted into the whole of the base and inferior angle of the scapula. [L, 31, 142, 332.]—**S. posticus inferior**. Fr., *petit dentelé postérieur et inférieur*. Ger., *unterer hinterer Sägenmuskel*. A broad, flat muscle which arises from the posterior layer of the lumbar fascia on a level with the last dorsal and two upper lumbar vertebrae, and is inserted by four digitations into the lower margins of the four lower ribs. [L, 31, 142, 332.]—**S. posticus superior**. Fr., *cervico-dorso-costal, petit dentelé postérieur et supérieur*. Ger., *oberer hinterer Sägenmuskel*. A flat muscle which arises by a thin aponeurosis from the spinous processes of the last cervical and two or three upper dorsal vertebrae, and is inserted by four digitations into the outer surfaces of the second, third, fourth, and fifth ribs, slightly external to their angles. [L, 31, 142, 332.]

**SERRE-COU** (Fr.), n. Ser<sup>r</sup>-ku. Of Chabert, a sort of collar for compressing the jugular vein. [E.]

**SERRE-FINE** (Fr.), n. Ser<sup>r</sup>-fen. A small spring forceps invented by Vidal for catching bleeding vessels and controlling hæmorrhage during operations; also used for closing a wound temporarily. [E.]

VIDAL'S SERRE-FINE.

**SERRE-NEUD** (Fr.), n. Ser<sup>r</sup>-nu<sup>d</sup>. A noose-tightener; an instrument for gradually tightening a ligature; used for cutting through a pedicle or other like part slowly and bloodlessly, also as a temporary constrictor of such a part in the course of an operation. [E. Spillmann (A, 328).]

LANGENBECK'S SERRE-FINE.

**SERRE-PÉDICULE** (Fr.), n. Ser<sup>r</sup>-pa-de-ku<sup>1</sup>. A pedicle-constrictor, usually in the form of a clamp. [a, 40.]

**SERRIAL** (Fr.), n. Ser<sup>r</sup>-re-a<sup>1</sup>. See *HYO-mandibular BONE*.

**SERRULATE**, adj. Ser<sup>r</sup>-u<sup>2</sup>-at. Lat., *serrulatus* (from *serrula*, a small saw). Fr., *serrulé*. Ger., *feingedgt*. Minutely serrate. [a, 35.]

**SERTULA** (Lat.), n. f. Su<sup>r</sup>t(se<sup>r</sup>rt)/u<sup>2</sup>(u<sup>4</sup>)-a<sup>a</sup>. Fr., *sertule*. See *MELIOTUS officinalis*.

**SERUM** (Lat.), n. n. Se(se<sup>3</sup>)/ru<sup>m</sup>(ru<sup>m</sup>). Fr., *sérum*. Ger., *S.*, *Aderrasser*. The watery portion of an organic fluid (ordinarily of the blood).—**Artificial s.** Water containing albumin, salts, etc., to imitate the s. of the blood; used as an intravenous or intraperitoneal injection, also in preparing microscopical specimens. That of B. W. Richardson consists of 1 oz. of white of egg, 1 drachm of common salt, 1 scruple of sodium phosphate, 1 oz. of clarified animal fat, 2 oz. of glycerin, and water enough to make a pint. ["Asclepiad," Jan., 1885, p. 8.]—**Blood s.** The fluid which separates from the blood after coagulation; defibrinated blood-plasma, consisting, according to Marcat, of 90 parts of water, 7.60 of albuminoids, 0.60 of potassium and sodium chlorides, 0.40 of mucro-extractive matters, 0.65 of sodium carbonate, 0.35 of potassium sulphate, and 0.40 of earthy phosphates. [A, 338.]—**Iodized s.** Ger., *Jodserum*. S. treated with potassium iodide; used in bacteriological research. [a, 40.]—**Milk s.** See *WHEY*.—**S. cells**. Ger., *seröse (oder serumhaltige) Fettzellen*. Fat cells containing s. in

place of part or all of the fat which was originally in the cell. [J. 31; "Arch. f. mikr. Anat." 1871, p. 67 (J).]—**S. cerebro-spinalis**. See **Cerebro-spinal fluid**.—**S. eiweiiss** (Ger.). See **S. albumin**.—**S. globulin**. See **PARAGLOBULIN**.—**S. lacteum**, **S. lactis**. See **WHEY**.—**S. masche** (Ger.). The fibrin network formed during coagulation of the blood. [K. 13.]—**S. sanguinis**. See **Blood s.**

**SERUMRIA** (Lat.), n. f. **Seser**-ru<sup>m</sup>(ru<sup>m</sup>)-u<sup>2</sup>(u)<sup>1</sup>-a<sup>3</sup>. From **serum** (q. v.), and **urine**. Fr., **sérurie**. Albuminuria (under the idea that it is not merely albumin, but blood serum as a whole, that passes off with the urine). [A. 15.]

**SERVICE-TREE**, n. Su<sup>2</sup>rv<sup>1</sup>ts-tre. The *Pyrus domestica*.

**SESAME**, n. Se<sup>2</sup>s'a<sup>m</sup>-e. The *Sesamum orientale* and *Sesamum indicum*. [a. 35.]—**S. oil**. See **Oil of SESAMUM**.

**SESAMOID**, **SESAMOIDAL**, adj's. Se<sup>2</sup>s'a<sup>m</sup>-oid, se<sup>2</sup>s'a<sup>m</sup>-oi'd'l. Gr., **σάμαειδής** (from **σάσμον**, sesame, and **είδος**, resemblance). Lat., **sesamoides**. Fr., **sésamoïde**, **sésamoidien**. Ger., **sesamartig**. Resembling or having the shape of a seed of sesame. [C.] See **S. BONES**.

**SESAMUM** (Lat.), n. n. Se<sup>2</sup>s(sas)'a<sup>m</sup>(a<sup>m</sup>)-u<sup>3</sup>m(u<sup>4</sup>m). Gr., **σάσμον**. Fr., **sésame**. Ger., **Sesam**. A genus of herbs typical of a tribe (**Sesameae** [Fr., **sésamées**; Ger., **Sesameen**]) of the **Pedaliaceae**. [a. 35.]—**Oil of s.** Lat., **oleum sesami**. Fr., **huile de sésame**, **sésame**. Ger., **Sesamöl**. Sesame (or gingili, or teel, or benné) oil; a yellowish fixed oil, bland, inodorous, and of slight nut-like taste, obtained by expression from the seeds of *S. indicum* [U. S. Ph.] and *S. orientale*. It resembles olive-oil and is used like it. [a. 35.]—**S. indicum**. An herb indigenous to the East Indies; cultivated as a source of oil of s. The leaves are used as a demulcent and for emollient cataplasms. The seeds are used as food; in India they are considered emmenagogue. [a. 35.]—**S. oleiferum**, **S. orientale**. Fr., **digitale orientale**. A species by some identified with *S. indicum*, and having the same properties. [a. 35.]—**S. vulgare**. See **CAMELINA sativa**.

**SESBANIA** (Lat.), n. f. Se<sup>2</sup>s-ba<sup>n</sup>'i<sup>2</sup>-a<sup>3</sup>. Fr., **sesbanie**. Ger., **Sesbanie**. A genus of the **Leguminosae**. [a. 35.]—**S. egyptiaca**, **S. arboreascens**. Sesban; a shrub or small tree growing in Africa, southern Asia, and northern Australia. The seeds are used in Egypt for hæmorrhoids and dysentery. In India the leaves are used in constipation and in mania, the bark and seed as an emmenagogue, and the root in snake-bites. [a. 35.]—**S. grandiflora**. See **AGATI grandiflora**.—**S. picta**. See **CORONILLA picta**.

**SESEL** (Lat.), n. n. Se<sup>2</sup>s'e<sup>2</sup>-li<sup>2</sup>i<sup>2</sup>. Gen., -el'eos. Gr., **σίσελι**. Fr., **séseli**. Ger., **Sesel**. A genus of the **Seselinæ** (Fr., **sésélinées**), which are a tribe of the **Umbelliferae**. [a. 35.]—**Fructus** (seu **Semen**) **seseleos**. Ger., **Seselsamen**. The fruits of **Laserpitium siber**. [a. 35.]—**S. chilosicoidium**. See *S. macedonicum*.—**S. hippomarathrum**. Horse-fennel; a species common in southern and central Europe, identified with one of the two plants called by Dioscorides **ἵππομαράθρον**. [a. 35.]—**S. libanotis**. Fr., **persil de montagne blanc**. Mountain spignel; found throughout Europe and Asia. The spindle-shaped aromatic root is identified by some with the **ῥοσσεύωνος** of Dioscorides. [a. 35.]—**S. macedonicum**. Fr., **persil de Macédoine** (ou **des rochers**). Macedonian parsley, the **πετρούρωνος** of Dioscorides; a native of Greece and northern Africa. The aromatic fruits, **semen petroselinæ macedonicæ**, are diuretic and carminative. The roots and leaves are used as a vulnerary, and the latter as an insecticide. [a. 35.]—**S. massiliense**. See **LASERPITIUM siber**.—**S. tortuosum**. Fr., **séseli ou fenouil** **tortueux**, **séseli officinal** (ou **de Marseille**). Ger., **gedröhrt Sesel**. Hartwort of Marseilles, the **σίσελι μασσαλιωτικόν** of Dioscorides; an aromatic species growing in southern Europe. The fruits, **semen seseleos massiliensis**, **semen curvi caballini**, are used as a carminative, stonachic, and emmenagogue, and were once considered an antidote to *Cicuta virosa*. [a. 35.]

**SESQUIARGENTIC**, adj. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-a<sup>3</sup>r-jen'ti<sup>2</sup>k. Lat., **sesquiargenticus**. Fr., **sesquiargentique**. Containing three atoms of silver to two molecules of an acid radicle.

**SESQUIBASIC**, adj. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-bas'i<sup>2</sup>k. Of salts, formed from a tribasic acid by the replacement of three atoms of hydrogen by two of a basic element or radicle. [B.]

**SESQUIBROMIDE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-brom'i<sup>2</sup>d'id. Fr., **sesquibromure**. See under **SESQUICHLORIDE**.

**SESQUICARBONAS** (Lat.), n. m. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-ka<sup>3</sup>rb-on'a<sup>3</sup>s(a<sup>3</sup>s). Gen., -a<sup>3</sup>ta. See **SESQUICARBONATE**.—**S. ammoniacus** (Netherl. Ph.). **Ammonium sesquicarbonat** (see under **AMMONIUM carbonate**).—**S. ammoniacus pyrominialis**. See **AMMONIUM carbonicum pyroaleum**.—**Solutio sesquicarbonatis ammoniac** (Netherl. Ph.). See **Liquor AMMONII carbonici**.—**Solutio sesquicarbonatis ammoniac pyrominialis** (Netherl. Ph.). See **Liquor AMMONII carbonici pyroaleum**.

**SESQUICARBONATE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-ka<sup>3</sup>rb-o<sup>3</sup>n-at. A carbonate containing one and a half times as much of the carbonic-acid radicle as the normal carbonate. [B.]

**SESQUICHLORIDE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-klor-i<sup>2</sup>d'id. A compound consisting of an element or radicle united directly with chlorine in the proportion of one atom and a half of the latter to a certain definite quantity of the former assumed as the unit of comparison. Analogous compounds of bromine, hydroxyl, oxygen, and sulphur are called respectively the **sesquibromide**, **sesquihydroxide**, **sesquioxide**, and **sesquisulphide**. The terms s., etc., however, are often used where **trichloride**, etc., would be more proper. [B.]

**SESQUHYDRATE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-hid'rát. 1. A sesquihydrate. 2. A crystallized salt containing three molecules of water of crystallization in two molecules of the salt. [B.]

**SESQUHYDROXIDE**, **SESQUIOXIDE**, n's. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-hid-ro<sup>2</sup>x'i<sup>2</sup>d'id. Fr., **sesquioxyle**. See under **SESQUICHLORIDE**.

**SESQUIPLUMBIC**, adj. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-plu<sup>3</sup>mb'i<sup>2</sup>k. Of a compound, containing lead and a bivalent radicle in the proportion of three atoms of the former to two molecules of the latter. [B. 2.]

**SESQUISALT**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-sa<sup>3</sup>lt. Fr., **sesquisel**. A salt in which, according to the old system of nomenclature, two equivalents of a base are combined with three equivalents of an acid; or which, according to modern views, contains one and a half times as much of the radicle as a protosalt. [B.]

**SESQUISULPHATE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-su<sup>3</sup>lf'at. Fr., **sesquisulfate**. A sulphate containing three molecules of the sulphuric-acid radicle combined with two atoms or molecules of a basic radicle; a sulphate formed from the sesquioxide. The term is often used for **trisulphate**. [B.]

**SESQUISULPHIDE**, n. Se<sup>2</sup>s'kw<sup>1</sup>i<sup>2</sup>-su<sup>3</sup>lf'i<sup>2</sup>d'id. See under **SESQUICHLORIDE**. [B.]

**SESSEA** (Lat.), n. f. Se<sup>2</sup>s'se<sup>2</sup>-a<sup>3</sup>. Fr., **sessée**. A genus of solanaceous shrubs or small trees. [a. 35.]—**S. dependens**, **S. stipulata**. Fr., **sessée pendante**, **sessée à stipules**. Peruvian species used as emollients and anodynes. [a. 35.]

**SESSILE**, adj. Se<sup>2</sup>s'i<sup>2</sup>l. Lat., **sessilis** (from **sedere**, to sit). Fr., **s.** Ger., **sitzend**, **stiellos**. Of an animal or a part, attached directly to a basis of support, without a peduncle; of a plant-organ, inserted directly upon the axis, without a stalk. [B.]

**SESTERTIOXIDE**, n. Se<sup>2</sup>s-tu<sup>2</sup>r'shi<sup>2</sup>-o<sup>2</sup>x'i<sup>2</sup>d'id. An oxide in which the number of oxygen atoms is to the number of molecules of the element or radicle with which it is combined as 5 is to 2. ["Nature," Oct. 1, 1885, p. 530 (B).]

**SETA** (Lat.), n. f. Set(sat)'a<sup>3</sup>. Fr., **soie**. Ger., **Borste**. 1. A bristle (e. g., a stiff hair or a straight, slender prickly). 2. The stalk of the capsule in mosses and liverwort. [a. 35.] 3. A bristle-like or hair-like organism. [a. 48.]—**S. equina**. See **FILARIA papillosa**.—**S. palustris**. See **GORDIUS aquaticus**.

**SETACEO-SERRATE**, adj. Set-as'w<sup>2</sup>-e<sup>2</sup>-o-se<sup>2</sup>r'at. From **seta**, a bristle, and **serra**, a saw. With serratures ending in bristle-shaped points. [a. 35.]

**SETACEOUS**, adj. Set-a'shu<sup>3</sup>s. Lat., **setaceus** (from **seta**, a bristle). Fr., **setacé**, **seteux** (2d def.). Ger., **borstenartig** (1st def.), **borstenförmig** (1st def.), **borstig** (2d def.). 1. Bristle-shaped. 2. Setose; composed of or covered with bristles. [a. 35.]

**SETACEUM** (Lat.), n. n. Set(sat)-as(a<sup>3</sup>k)'e<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). See **SETON**.

**SETARIA** (Lat.), n. f. Set(sat)-ar(a<sup>3</sup>r)'i<sup>2</sup>-a<sup>3</sup>. Fr., **sétaire**. Ger., **Borstenhirse**. Bristly fox-tail grass; a genus of the **Panicæe**. The *Setariae* of Dumortier are a subtribe of **Panicæe**.—**S. italica**. Bengal grass, Chinese corn, Italian millet, the **panicum** of the ancient Romans, the **ἄλμος** of the Greeks; originally of the East Indies. The grain is used for food. [a. 35.]

**SETIFEROUS**, **SETIGEROUS**, adj's. Set-i<sup>2</sup>f'e<sup>2</sup>r-u<sup>3</sup>s, -i<sup>2</sup>j'-e<sup>2</sup>r-u<sup>3</sup>s. Lat., **setiferus** (from **seta**, a bristle, and **ferre**, to bear). Bearing (usually at the apex) a bristle or bristles (setæ). [a. 35.]

**SETON**, n. Setn. From **seta**, a bristle. Fr., **seton**. Ger., **Haarsel**, **Ablussriemen**. 1. A sinus established by piercing a fold of the skin with a knife-like needle threaded with a strip of muslin, lamp-wick, or other material, which is left in place so as to produce suppuration and act as a derivative. 2. The strip so used. [E.]—**Galvanic s.** A platinum wire inserted like a s. and connected with a galvanic battery so as to be made red-hot. [a. 34.]

**SETOSE**, adj. Set'os. Lat., **setosus**. See **SETACEOUS** (2d def.).

**SETOSO-HISPIDUS** (Lat.), adj. Set(sat)-os'w<sup>2</sup>-o(o<sup>3</sup>)-hi<sup>2</sup>sp'i<sup>2</sup>d-u<sup>3</sup>s(u<sup>4</sup>s). From **seta**, a bristle, and **hispidus**, prickly. Ger., **stiefborstig**. Beset with very inflexible straight prickles. [a. 35.]

**SETULA** (Lat.), n. f. Set(sat)'u<sup>3</sup>(u<sup>4</sup>)-a<sup>3</sup>. Dim. of **seta**, a bristle. Ger., **Börstchen** (1st def.). 1. A small bristle. 2. The stipe of certain **Fungi**. [a. 35.]

**SETULOSE**, adj. Set'u<sup>3</sup>l-os. Lat., **setulosus**. Ger., **kleinborstig** (2d def.). 1. Like a little bristle. 2. Minutely setose, covered with small bristles. [a. 35.]

**SETWALL**, n. Set'wa<sup>3</sup>l. An old name for valerian. [a. 35.]

**SEUCHE** (Ger.), n. Zoich<sup>2</sup>e<sup>2</sup>. A pestilence; an epidemic. [D.]—**Frettchens'**. An epidemic disease in ferrets the symptoms and bacteria of which resemble those of chicken cholera. [a. 40.]—**Klaueus'**. Hoof disease in sheep or cattle. [a. 40.]—**Küstens'**. See **RADENYGE**. [L. 30.]—**Magens'**. Of the veterinarians, dysentery. [L. 135 (a. 39).]—**Maulklaueus'**, **Maulund Klaueus'**. See **Foot-and-mouth disease**.—**Schlabbbers'**. See **ACTINOMYCOSIS**.—**Schweines'**, **Schweins'**. See **Hog cholera** and **Swine fever**.—**Schnaft**. See **CONTAGIUS**.—**S'nustoff**. See **CONTAGIUM**.

**SEVADILLA** (Lat.), n. f. Sa-va<sup>3</sup>d-i<sup>2</sup>l'a<sup>3</sup>. Fr., **sévadille**. See **CEVADILLA**.

**SEVATIO** (Lat.), n. f. Se(sa)-va(wa<sup>3</sup>)'shi<sup>2</sup>(i<sup>2</sup>)-o. Gen., -o'nis. From **sevim**, suet. See **LIPOMATOSIS**.

**SEVE** (Fr.), n. Se<sup>2</sup>v. See **SAP**.

**SEVEN** (Ger.), n. Zaf'e<sup>2</sup>n. See **SAVIN**.—**S'ül**. See **Oil of SAVIN**.

**SEVEN-BARKS**, n. Se<sup>2</sup>v'n'ba<sup>3</sup>rks. See **HYDRANGÆA arborescens**.

**SEVUM** (Lat.), n. n. Se(sa)'vu<sup>3</sup>m(wu<sup>4</sup>m). Fr., **suif de mouton** (1st def.). 1. Of the U. S. Ph., mutton suet, the fat taken from the inside of the abdomen of *Ovis aries* and purified by being melted, strained, and cooled. The s. of various other ph's was sometimes used, sometimes lard. [B. 95, 119 (a. 38).] 2. See **CULANUS SEVUM**.—**S. bovinum**, **S. bovinum**, **S. bubulum**. See **SEBUM bovinum**.—**S. cervinum**. See **SEBUM cervinum**.—**S. ceti**. See **CEWAXUM**.—**S. ovillum**, **S. preparatum**, **S. vervecinum**. See **S.** (1st def.).

**SEWAGE**, n.  $Su^2e^j$ . Refuse matter, including faeces, urine, etc., carried off from habitations by means of sewers. [a, 48.]

**SEWER**, n.  $Su^2u^r$ . Fr., *égout*. Ger., *Siel*, *Abzugskanal*. A canal for carrying off waste water and sewage. [a, 48.]

**SEWERAGE**, n.  $Su^2u^r-e^j$ . 1. The process of collecting and carrying off sewage. 2. Sewers collectively. [a, 48.]

**SEX**, n.  $Se^2x$ . Gr., *gênos*. Lat., *sexus*, *secus* (from *securus*, to cut). Fr., *sexe*. Ger., *Geschlecht*. The state of possessing the structural and functional peculiarities that constitute an individual either a male or a female.—**Doubtful s.** See HERMAPHRODITISM.

**SEX-BASIC**, adj.  $Se^2x-bas^{i2}k$ . Combining with six molecules of a univalent base; saturating a sexual base. [B.]

**SEXDECYL**, n.  $Se^2x-de^2s^{i2}l$ . See CETYL.

**SEXIFEROUS**, adj.  $Se^2x-i^2f^e^2r-u^2s$ . Lat., *sexiferus* (from *sexus*, sex, and *ferre*, to bear). Fr., *sexifère*. Provided with sexual organs. [L, 180 (a, 43).]

**SEXPLUMBIC**, adj.  $Se^2x-plu^2mb^{i2}k$ . Containing six atoms of lead in the molecule. [B, 2.]

**SEXTAN**, adj.  $Se^2x-t^n$ . From *sex*, six. Recurring at intervals of five days. [a, 48.]

**SEXTUPLET**, n.  $Se^2x-tu^2-ple^2t$ . One of six children born as the result of a single gestation. [a, 34.]

**SEXUAL**, adj.  $Se^2x-u^2-l$ . From *sexus*, sex. Fr., *sexuel*, *sexué*. Ger., *geschlechtlich*. Pertaining to sex.

**SEXUALEMPENDING** (Ger.), n.  $Ze^2x-u-a^2l^e^2m-fi^2nd-u^2n^2$ . Sexual instinct.—**Conträre s.** Perverted sexual instinct, leading the individual to lust after persons of his or her own sex.

**SEXUALLY**, adv.  $Se^2x-u^2-l^i^2$ . 1. With regard to sex. 2. By the sexual mode (of generation).

**SEXUS** (Lat.), n. m.  $Se^2x-u^2s(u^2s)$ . Gen., *sex'us*. See *SEX*.

**SEXVALENT**, adj.  $Se^2x-val^2-e^2nt$ . Ger., *sechswertig*. Having an atomicity of six (i. e., being capable of replacing six atoms of hydrogen in a molecule). [a, 38.]

**SHADDOCK**, n.  $Sha^2d-u^2k$ . See *CITRUS decumana*.

**SHAFT**, n.  $Sha^2ft$ . A.-S., *scæft*. Lat., *scapus*. Fr., *flèche*. Ger., *Schaft*. A stem, stalk, or scape; of a long bone, its elongated central portion; of a cillum, its free portion, continuous with the proximal bulb; of a hair, see *HAIR-s*. [J; a, 48.]

**SHAGGY**, adj.  $Sha^2g^{i2}$ . See *VILLOUS*.

**SHAKES**, n. *Shaks*. See *AGUE*.

**SHALLOT**, n.  $Sha^2l-o^2t$ . 1. The *Allium ascalonicum*. 2. The *Panicum frumentaceum*. [a, 35.]

**SHAMPOOING**, n.  $Sha^2m-pu^{i2}n^2$ . 1. A Hindu practice of rubbing the surface of the body with liniments or other liquids during a bath, at the same time flexing the joints and kneading the muscles. 2. Washing and rubbing the head thoroughly with soap or other substances which produce a lather. [a, 40.]

**SHAMROCK**, n.  $Sha^2m-ro^2k$ . The *Trifolium repens*; according to some authors, the *Oxalis acetosella*. [a, 35.]

**SHANK**, n.  $Sha^2n^2k$ . The leg from the knee to the ankle; in ornithology, the tarsus. [L, 221.]

**SHANNONDALE SPRINGS**, n.  $Sha^2n-u^2n-dal$ . A place in Jefferson County, West Virginia, where there are mineral springs.

**SHARK**, n.  $Sha^2rk$ . Gr., *καρχαρίας* (from *καρχαρος*, sharp-pointed). Fr., *squal*. Ger., *Hai*. Any member of a large group of elasmobranchiate (mostly carnivorous) fishes, including the genera *Carcharias*, *Carcharodon*, *Cestracion*, etc. [a, 48.]

**SHARON SPRINGS**, n.  $Sha^2r-u^2n$ . A place in Schoharie County, New York, where there are sulphurous and chalybeate springs. [Anderson (a, 14).]

**SHASTA SODA SPRINGS**, n.  $Sha^2st-a^2 sod-a^2$ . A place in Siskiyou County, California, where there are springs containing iron and sodium carbonates. [Anderson (a, 14).]

**SHEARING**, n.  $Sher^{i2}n^2$ . See *HEAD-MOLD SHOT*.

**SHEARS**, n. *Sherz*. A large pair of scissors.—**Bandage s.** Strong s. for cutting plaster-of-Paris dressings. [E.]

**SHEATH**, n. *Sheth*. Gr., *ἐλκτρον*. Lat., *vagina*. Fr., *gaine*. Ger., *Scheide*. 1. An enveloping structure, a case or covering. 2. In botany, see *VAGINA* (3d def.) and *BUNDLE s.*—**Axis-cylinder s.** See *Huxley's LAYER*.—**Capillary s.** See *Circumvascular s.*—**Celular s.** See *EPINEURIUM*.—**Circumvascular s.** A wide lymphatic tube completely surrounding the smallest blood-vessels of bone, of the central nervous system, of the retina, and of the liver. [a, 34.]—**Cortical s.** Of Nögel, the whole of the primary blastodermis. [a, 35.]—**Dental s.** Ger., *Zahnscheide*. Of Neumann, the s.-like structure (supposed to be an elastic limiting layer) lining the dental canals and thus containing the dental fibres. [J, 32, 35.]—**Dural s.** See *DURA*.—**Elastic s. of the axis-cylinder.** See *Mauthner's s.*—**Fibril s.** Ger., *Fibrillen-Häutchen* (oder *Scheide*). 1. Of Key and Retzius, a kind of s. for the individual nerve-fibres of a nerve funiculus, formed outside the primitive s. of the nerve-fibril by the longitudinal connective-tissue fibrils of the endoneurium. [Arch. f. mikr. Anat., 1873, p. 308 (J).] 2. A supposed membrane inclosing the muscle columns and appearing as a sharp, clear line around Cohnheim's areas. [Dönnitz, Arch. f. Anat. und Phys., 1870, p. 436 (J).]—**Henle's root-s. (of the hair).** See *Henle's LAYER*.—**Henle's s.** 1. See *Henle's LAYER*. 2. Of Ranvier (1878), the connective-tissue envelope of the finest fasciculi of medullated nerve-fibres. This s. consists of a single lamella of perineurium covered on both surfaces by endothelium. It may inclose but a single nerve-fibre, in which case there is a space (lymph space) between it and the neurilemma of the nerve-

fibre. [J, 10, 30, 31].—**Huxley's s.** See *Huxley's LAYER*.—**Lamellar s.** See *PERINEURIUM*.—**Leaf s.** See *VAGINA* (3d def.).—**Mauthner's s.** The hyaline s. surrounding the axis-cylinder and separating it from the myeline. [J, 26, 31].—**Medullary s.** Fr., *gaine médullaire* (ou *de myéline*). Ger., *Markcylinder*, *Markscheide*, *Myelinscheide* (1st def.), *Markmantel* (2d def.). 1. A sheath of myeline inclosing the axis-cylinder in medullated nerve-fibres. This in turn is inclosed by the neurilemma, in peripheral nerves at least. At the nodes of Ranvier the medullary s. is wholly or in some cases but partly absent, and in some cases it seems to be partly divided into other shorter segments by the oblique markings or incisures of Schmidt. Under some circumstances also the medullary s. appears to be pervaded with a fine network. [J, 10, 30, 32; "Quart. Jour. of Micr. Sci.," 1860, p. 65 (J).] 2. The primary bundles of wood (xylem) that project into the medulla (pith) from the cambium-ring. [a, 35].—**Myeline s.** See *NEURILEMMA* (1st def.) and *Medullary s.* (1st def.).—**Myelonal s.** See *SPINAL DURA*.—**Nerve s.** See *PERINEURIUM*.—**Neumann's s.** See *Dental s.*—**Nucleus s.** Ger., *Kernscheide*. In the roots of many monocotyledons, a deposit of cells (observed on cross-section as a colored ring) surrounding the central ligneous portion. [a, 35].—**Perivascular (lymph-) s.** See *Circumvascular s.*—**Pial s.** See *PIA*.—**Pleural s.** See *BUNDLE s.*—**Primitive s.** See *NEURILEMMA* (1st def.).—**Root-s.** See the major list.—**Schwann's s.** See *NEURILEMMA* (1st def.).—**S. of a muscle.** Ger., *Muskelscheide*. The layer of fascia or aponeurosis covering a muscle. [L].—**S. of Henle.** See *Henle's LAYER*.—**S. of the flexor tendons.** Transverse and oblique fibrous bands which bind the tendons of the flexores digitorum profundus and sublimis to the palmar surfaces of the first and second phalanges. [L].—**S. of the optic nerve.** Ger., *Schnervenscheide*. The structures covering the optic nerve, the tunica nervi optici externa and tunica nervi optici interna, and the intervening process of the arachnoides. [L].—**Structureless s.** See *NEURILEMMA* (1st def.) and *SARCOLEMMA*.—**Structureless s. of the axis-cylinder.** See *Mauthner's s.*—**Synovial s.** Lat., *vagina tendinis*. Ger., *Schnenscheide*. A synovial membrane which lines the cavity in which a tendon glides when it is wound down against a bone. [C].—**Tangential s.** The cellulose-fibrous s. inclosing the primitive carotids. [L, 88 (a, 34).]

**SHEATHED**, adj. *Sheth'ed*. See *VAGINATE*.

**SHEEP-POX**, n. *Shep-po'x*. Lat., *variola ovina*. Fr., *clavelée*. Ger., *Schafblattern*, *Schafpocken*. 1. An epizootic and probably contagious disease of sheep, closely resembling variola in man. 2. Variella. [Cf. MURR, MURRAIN, and ROT.]

**SHEET**, n. *Shet*. A.-S., *scæat*, *scæta*, *scyta*. Fr., *drap*. Ger., *Bettuch*. An oblong piece of linen or cotton, forming part of bed-clothes, usually next the sleeper. [a, 48.]—**Draw-s.** A folded s. placed under a patient so that it may be withdrawn without disturbing the bed or lifting the patient. [a, 34.]

**SHELDON SPRINGS**, n. *Shel'd'n*. A place in Franklin County, Vermont, where there are springs containing sodium and iron carbonates. [a, 14.]

**SHELL**, n. *Shel*. Gr., *κόγχη*, *κόγχος*. Lat., *testa*, *concha*. Fr., *conque*. Ger., *Schale*. A hard covering, such as that of an egg, of a tortoise, of a nut, etc. [a, 48.]—**Hearing s's.** Small concave plates, of metal, glass, or India-rubber, formerly used in deafness, being placed above the edge of the cartilage of the ear to catch the sound-waves. [F, 32.]

**SHELLAC**, n. *Shel'a-k'*. See *SHELL-LAC*.

**SHELTER ISLAND**, n. *Shel'tl-u^2r-l'nd*. A climatic and seathing resort in Suffolk County, New York. [a, 14.]

**SHENANDOAH ALUM SPRINGS**, n. *Shen-a^2n-do^2a^2 a^2l-u^2m*. A place in Shenandoah County, Virginia, where there are chalybeate, aluminous, and sulphurous springs. [a, 14.]

**SHEPHERD'S PURSE**, n. *Shep'u^2rd-z-pu^2rs*. 1. The genus *Thlaspi*; especially *Thlaspi (Capsella) bursa pastoris*. [a, 35.]

**SHERRY**, n. *Sherr'i^2*. See *UNDER WINE*.

**SHIELD**, n. *Sheld*. Gr., *πλάτη*. Lat., *pelta*. Fr., *gaine*, *bouclier*. Ger., *Schild*. 1. A piece of armor defending the body; hence, any protective apparatus or structure. [a, 48.] 2. Of a faradaic battery, the tube inserted in the core of the central coil, which regulates the intensity of the action. [B.] 3. See *APOTHECIUM* (1st def.).—**Antithermic s.** Of H. P. C. Wilson, an instrument made of some non-conducting material to protect the tissues during the application of a cautery. [a, 34.]—**Nipple s.** Fr., *chapeau protecteur du mamelon*, *bout de sein*. Ger., *Warzenhütchen*. A protective covering for the nipple either fitting it, and having small openings at the tip, for use during suckling, or made large and rigid, so as to protect a sore nipple from pressure in the intervals of nursing. [a, 34.]—**Sim's s.** A copper or steel instrument used for steadying wire sutures and as the guide to the proper point at which these should be twisted. It consists of a long shaft having a broad cleft extremity. [A, 21 (a, 34).]—**Supra-orbital s.** A plate or plates of bone at the upper edge of the orbits of certain birds, causing a marked projection of the eyebrows. [L, 221.]

**SHIKIMENE**, n. *Shi^2k-i^2m-en*. A poisonous substance,  $C_{10}H_{16}$ , found in the ethereal oil obtained from the leaves of *Illicium religiosum* (Jap., *shikimi*) or its fruit, probably identical with safrene. [B, 3 (a, 38).]

**SHIKIMINIC ACID**, n. *Shi^2k-i^2m-i^2n-i^2k*. A monobasic acid,  $C_7H_9O_6$ , found in *Illicium religiosum* and *Illicium anisatum*. [B, 3 (a, 38).]

**SHIKIMOL**, n. *Shi^2k-i^2m-o^2l*. See *SAFROL*.

**SHIMA-MUSHI** (Jap.). n. The "Island insect disease," manifested by fever and other constitutional phenomena supposed to be caused by the bite of an insect. ["Edinb. Med. and Surg. Jour.," xxiv, p. 128 (a, 34).]

**SHIN**, n. *Shi^2n*. The portion of the leg over the tibia. [L.]

**SHINGLES**, n. Shi<sup>2</sup>n<sup>2</sup>g'iz. From *cingulum*, a girdle. A popular term for zoster.

**SHIRKHIH** (Pers.), n. 1. See *ATRAPHAXIS spinosa*. 2. S. manna; a substance imported, in the form of irregular roundish, whitish tears, from Afghanistan and Turkestan into India, where it is eaten as a sweetmeat. It is an exudation from *Cotoneaster nummularia* and from *Atraphaxis spinosa*. [a, 35.]

**SHITTIM-WOOD**, n. Shi<sup>2</sup>t'i<sup>2</sup>m-wu'd'. Of the Scriptures, probably the wood of a species of *Acacia*; according to some, that of *Acacia nilotica*. [B. 185, 275 (a, 35).]

**SHIVER**, n. Shi<sup>2</sup>v'u<sup>2</sup>r. Gr., *μῖνος*. Lat., *rigor*. Fr., *frisson*. Ger., *Schauer*. Trembling of short duration due to cold or to emotion or to reflex action, especially when of very brief duration. [D.]

**SHOCCO SPRINGS**, n. Sho<sup>2</sup>k'o. A place in Warren County, North Carolina, where there are saline sulphur springs. [A, 363.]

**SHOCK**, n. Sho<sup>2</sup>k. Gr., *σύνκρουσις*. Lat., *collisus*. Fr., *choc*. Ger., *Schock* (1st def.), *Erschütterung* (1st def.), *Stoss* (2d def.).

1. A sudden depression of the vital functions, especially of the circulation, due to the nervous exhaustion following an injury or a sudden overwhelming emotion, and resulting either in immediate death or in prolonged prostration. [E.] 2. See *Electric s.*—**Discharging s.** Ger., *Entladungsschlag*. An electric s. produced by a discharge.—**Electric s.** The physiological effect caused by an electric discharge or by the closing or opening of a circuit in which the organism is included. [a, 49.]—**Epigastric s.** S. caused by a blow on the epigastrium. [a, 34.]—**Erethismic s.** Of Brunton, s. with symptoms of excitement. [D.]—**Fœtal s.** The sensation of movement of the fœtus perceived by the hand or ear applied with moderate pressure over the gravid uterus. [a, 34.]—**Nervous s.** See *S.* (1st def.).—**Railway s.** The impression made on the body or the mind, or on both, by a railway accident. [N. Y. Med. Jour., Nov. 2, 1889, p. 494 (a, 34).]—**Return s.** See *Choc en retour*.—**Sexual s.** S. caused by rape or coitus. [a, 34.]—**Traumatic s.** S. due to an injury. [a, 34.]—**Torpid s.** Of L. Brunton, s. in which the symptoms of depression predominate. [D.]

**SHOE**, n. Shu. Gr., *σάνδαλον*, *σάνδαλον*. Lat., *sandalinum*. Fr., *soulier*. Ger., *Schuh*. An outer covering for the foot. [a, 48.]—**Club-foot s.** A s. from the sole of which one or more braces run upward to be attached to the leg, for the correction of the deformity.

**SHOREA** (Lat.), n. f. Sho<sup>2</sup>r'e-a<sup>2</sup>. From *Shore*, a governor-general of India. Fr., *shoree*. A genus of tropical Asiatic trees, of the *Dipterocarpaceæ*. [a, 35.]—**Lard s.** Hog's-lard tree; a Burmese tree that produces an oil of the consistence of lard. [O. Stroud, "Brit. and Colon. Drugs," May 22, 1886, p. 349.]—**S. robusta**. The salt-tree of India. It yields an aromatic dammar, which is applied to chilblains and ulcers, used medicinally like pine-resin, and burnt as incense in the Hindu temples. The seeds yield an oil. [a, 35.]

**SHORT-CIRCUIT**, v. tr. Sho<sup>2</sup>rt-su<sup>2</sup>rk'it. To impose upon an electrical current such a path as to impede its flow through the original circuit and thereby cause the current to encounter an abnormally small resistance. [a, 49.]

**SHORTENING**, n. Sho<sup>2</sup>rt'i<sup>2</sup>n'g. Fr., *raccourcissement*. Ger., *Verkürzung*. The act or process of making or the state of being short. [a, 48.]—**S. of the cervix uteri**. See *EFFACEMENT DU COL DE L'UTÉRUS*.—**S. of the round ligaments**. See *ADVANCEMENT OF THE ROUND LIGAMENTS*.

**SHORTSIGHT, SHORTSIGHTEDNESS**, n's. Sho<sup>2</sup>rt'sit, -sit'e<sup>2</sup>d-ne's. See *MYOPIA*.

**SHOT**, n. Sho<sup>2</sup>t. 1. A bullet or pellet used as a missile in shooting. Split and perforated s. are employed in clamping sutures, and bags of s. for exerting compression by their weight. 2. The act or process of shooting over or overlapping. [a, 48.]—**Head-mold s.** Fr., *chevauchement des os crâniens*. Ger., *Uebereinanderschieben der Schädelknochenränder*, *Nachtverschiebung*. The overlapping of the cranial bones of the fœtus during the passage of the head through the pelvis in parturition, whereby the size of the head is slightly diminished and its shape made to conform somewhat to that of the parturient canal.

**SHOULDER**, v. tr. Sho<sup>2</sup>ld'u<sup>2</sup>r. Of a silver-wire suture, to bend it at a right angle at each point of emergence, so as to make the superficial portion of the loop rectangular, and again at the point where it is to be twisted. [A, 21.]

**SHOULDER**, n. Sho<sup>2</sup>ld'u<sup>2</sup>r. Gr., *ὀμπλάση*. Lat., *scapula*. Fr., *épaule*. Ger., *Schulter*. The prominence of the articulation of the cephalic limb with the trunk, constituted chiefly by the clavicle, the scapula, and the head of the humerus; also any similar prominence.

**SHOW**, n. Sho. A colloquial term for the first discharge of blood in menstruation or in labor. [a, 34.]

**SHRIVELED**, adj. Shi<sup>2</sup>r'v'ld. See *CORRUGATED AND RUGOSE*.

**SHRUB**, n. Shru<sup>2</sup>b. Lat., *frutex*. Fr., *arbrisseau*. Ger., *Strauch*. A woody plant less than 30 feet in height, freely branching from or near the ground. [a, 35.]

**SHRUBBY**, n. Shru<sup>2</sup>b'y<sup>2</sup>. Like a shrub, fruticose. [a, 35.]

**SIAGON** (Lat.), n. f. Si<sup>2</sup>si<sup>2</sup>'n<sup>2</sup>g(a<sup>2</sup>g)-o<sup>2</sup>n(on). Gen., -ag'onos (-ia). Gr., *σιάγων*. See *Superior MAXILLA*.

**SIAGONATRITIS** (Lat.), n. f. Si<sup>2</sup>si<sup>2</sup>'n<sup>2</sup>g(a<sup>2</sup>g)-o<sup>2</sup>n-a<sup>2</sup>nt(a<sup>2</sup>nt)-rit'is(-it'is). From *σιάγων*, the jaw-bone, and *αἷτρον*, a cave. Inflammation within the maxillary antrum. [E.]

**SIAGONAGRA** (Lat.), n. f. Si<sup>2</sup>si<sup>2</sup>'n<sup>2</sup>g(a<sup>2</sup>g)-o<sup>2</sup>n-ag(a<sup>2</sup>g)-ra<sup>2</sup>. From *σιάγων*, the jaw-bone, and *ἀγρα*, a seizure. Gout of the maxilla. [L, 50 (a, 34).]

**SIALADEN** (Lat.), n. m. and f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>n(an). Gen., -ad'e<sup>2</sup>nos (-ia). From *σίαλον*, saliva, and *ἀδών*, a gland. A salivary gland. [L, 50 (a, 14).]

**SIALADENITIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>n-i(-e)-ti's. Gen., -it'idos (-idis). Fr., *sialadénite*. Inflammation of a salivary gland. [L, 41, 50 (a, 14).]

**SIALADENONCUS** (Lat.), n. m. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>n-o<sup>2</sup>n'k'u's(u's). From *σίαλον*, saliva, and *δών*, a gland, and *δύκος*, a tumor. Fr., *sialadénonc*. Swelling of a salivary gland. [L, 50.]

**SIALAGOGUE**, adj. Si<sup>2</sup>a<sup>2</sup>l'a<sup>2</sup>g-o<sup>2</sup>g. Lat., *sialagogus* (from *σίαλον*, saliva, and *ἀγω*, to lead). Fr., *sialagogue*. Ger., *speichelausleerend*, *speicheltreibend*. Augmenting the secretion of saliva; as a n. (Ger., *Speichelmittel*), a substance so acting.

**SIALALGOSIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-a<sup>2</sup>l(a<sup>2</sup>l)-je<sup>2</sup>(lo<sup>2</sup>e)-o's'i's. Gen., -os'eos (-ia). From *σίαλον*, saliva, and *ἀλλοίωσις*, alteration. Ger., *Speichelverderbniss*. Alteration of the saliva. [L, 50 (a, 34).]

**SIALAPORIA** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-a<sup>2</sup>p(a<sup>2</sup>p)-o<sup>2</sup>r(or)'i<sup>2</sup>a<sup>2</sup>. From *σίαλον*, saliva, and *ἀπορία*, non-acquisition. Fr., *sialaporie*. Deficiency of saliva. [L, 50 (a, 14).]

**SIALIN**, n. Si<sup>2</sup>a<sup>2</sup>l-i<sup>2</sup>n. Lat., *sialina*. Fr., *sialine*. See *PTYALIN*.

**SIALISMUS** (Lat.), n. m. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-i<sup>2</sup>z(i'z)'mu's(mu's). Gr., *σιαλισμός*. See *SALIVATION*.

**SIALOCINETIC**, adj. Si<sup>2</sup>a<sup>2</sup>l-o<sup>2</sup>si<sup>2</sup>n-e<sup>2</sup>t'i<sup>2</sup>k. From *σίαλον*, saliva, and *κίνησις*, to set in motion. See *SIALOGOGUE*.

**SIALODES** (Lat.), adj. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>d'e<sup>2</sup>z(as). Gr., *σιαλῶδης* (from *σίαλον*, saliva, and *εἶδος*, resemblance). Fr., *sialéux*. Ger., *speichelartig*. Resembling saliva. [L, 50 (a, 14).]

**SIALODUCHITIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>(o<sup>2</sup>)-du<sup>2</sup>ch(do<sup>2</sup>ch<sup>2</sup>)-i(-e)'ti's. Gen., -it'idos (-idis). Inflammation of a salivary duct. [a, 34.]

**SIALOLITH**, n. Si<sup>2</sup>a<sup>2</sup>l'o<sup>2</sup>li<sup>2</sup>th. From *σίαλον*, saliva, and *λίθος*, a stone. Fr., *sialolith*. See *SALIVARY CALCULUS*.

**SIALOLITHIASIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>(o<sup>2</sup>)-li<sup>2</sup>th-i<sup>2</sup>a(-a<sup>2</sup>)'si's. Gen., -as'eos (-ia). From *σίαλον*, saliva, and *λίθιασις*, lithiasis. Fr., *sialolithie*. The formation of salivary calculus. [L, 50 (a, 14).]

**SIALONCUS** (Lat.), n. m. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>n'k'u's(u's). From *σίαλον*, saliva, and *δύκος*, a tumor. Fr., *sialoncie*. A swelling or obstruction of a salivary duct. [L, 50 (a, 14).]

**SIALORRHOEA** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>r-re'(ro<sup>2</sup>e<sup>2</sup>)'a<sup>2</sup>. From *σίαλον*, saliva, and *ῥοία*, a flowing. Fr., *sialorrhoeé*. Ger., *Speichelfluss*, *Sialorrhoe*. See *SALIVATION*.

**SIALOSCHESIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o's'ke<sup>2</sup>(ch<sup>2</sup>e<sup>2</sup>)'si's. Gen., -es'eos (-osch'esia). From *σίαλον*, saliva, and *σχέσις*, to check. Fr., *sialoschèse*. Retention of saliva. [L, 50 (a, 14).]

**SIALOSTENOSIS** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>(o<sup>2</sup>)-ste<sup>2</sup>n-o's'i's. Gen., -os'eos (-ia). From *σίαλον*, saliva, and *στενωσις*, stenosis. Fr., *sialosténose*. Stenosis of a salivary duct. [L, 50 (a, 14).]

**SIALOSYRIX** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>(o<sup>2</sup>)-si<sup>2</sup>ri(su<sup>2</sup>ri<sup>2</sup>)'i<sup>2</sup>n'x. Gen., -in'gos (-in'gia). From *σίαλον*, saliva, and *σyrinx*, a tube. Fr., *sialosyringue*. 1. A salivary fistula. 2. A syringe for the salivary ducts. 3. A cannula used for draining salivary fistulae. [L, 50 (a, 14).]

**SIALOZEMIA** (Lat.), n. f. Si<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>l)-o<sup>2</sup>(o<sup>2</sup>)-zem(zam)'i<sup>2</sup>a<sup>2</sup>. From *σίαλον*, saliva, and *ζημία*, a loss. Fr., *sialozémie*. Loss of saliva. [L, 50 (a, 14).]

**SIBARE**, n. Si<sup>2</sup>b-a<sup>2</sup>(a<sup>2</sup>)'re(a). An old name for a severe form of encephalitis. [A, 325.]

**SIBBENS**, n. Si<sup>2</sup>b'e<sup>2</sup>nz. Lat., *morulus*. Ger., *Bärschwamm*. A name for certain affections, probably including both framboesia and syphilis, regarded formerly as an endemic disease peculiar to Scotland. They consisted of inflammation and ulceration of the fauces, tubercular and ulcerative affections of the skin, and certain fungous, raspberry-like growths. Gleichrist, who first described the disease, regarded it as a form of syphilis; Adams, Hunter, Mathias, and J. M. Good as an independent disease; and Swediaur as a cross between scabies and syphilis. [Milton (G.).] Cf. *Button SCURVY*.

**SIBILANT**, adj. Si<sup>2</sup>b'i<sup>2</sup>l'nt. Lat., *sibilans* (from *sibilare*, to hiss). Fr., s. Ger., *zischend*. Hissing. [L, 343.]

**SIBILISMUS** (Lat.), n. m. Si<sup>2</sup>b(seh)-i<sup>2</sup>l-i<sup>2</sup>z(i'z)'mu's(mu's). 1. See *SIBILIS* (1st def.). 2. Hissing phonation. [L, 50 (a, 14).]—**S. aurium**. See *TINITUS aurium*.

**SIBILUS** (Lat.), n. m. Si<sup>2</sup>b(seh)-i<sup>2</sup>l-u's(u's). Ger., *Gezisch*. 1. A hissing sound; especially a sibilant râle and tinnitus aurium. [D; F.] 2. The uvula. [L.]

**SIBIRI**, n. A febrile bark of Guiana. [a, 35.]

**SICCANT, SICCATIVE**, adj's. Si<sup>2</sup>k'ant, -a<sup>2</sup>t'i<sup>2</sup>v. Lat., *siccant*, *siccantus* (from *siccare*, to dry). Fr., *siccatif*. Ger., *aus-trocknend*. See *DESSICANT*.

**SICCHASIA** (Lat.), n. f. Si<sup>2</sup>k-kaz(ch<sup>2</sup>a's)'i<sup>2</sup>a<sup>2</sup>. Gr., *σικχασία*. Fr., *sicchasié*. See *NAUSEA* (2d def.).

**SICCITY**, n. Si<sup>2</sup>k'si<sup>2</sup>t'i<sup>2</sup>. Lat., *siccitas*. Fr., *siccité*. Dryness.

**SICCUS** (Lat.), adj. Si<sup>2</sup>k'ku's(ku's). Dry.

**SICHEL** (Ger.), n. Zech'e<sup>2</sup>el. See *FALX* and *FALX cerebri*.—*Grosshirns*. See *FALX cerebri*.—*Kleinhirns*. See *FALX cerebelli*.—*S'beln*. See *Interparietal bone* and *GENU VARIUM*.

**SICK**, adj. Si<sup>2</sup>k. A. S., *sēoc*. Gr., *νόσος*. Lat., *aveat* (1st def.), *agrotus* (1st def.). Fr., *malade* (1st def.). Ger., *krank* (1st def.). 1. Affected with disease. 2. In Great Britain, affected with nausea. 3. Poisonous (as in the expression, s. cheese).

**SICKLINESS**, n. Si<sup>2</sup>k'li<sup>2</sup>n'e's. Gr., *ἀσθενία*, *ἀσθένεια*. Lat., *infirmitas*. Fr., *état malade* (1st def.). Ger., *Krankheit* (1st def.). 1. A condition of weakness and predisposition to contract

disease upon slight cause. 2. Insalubrity of climate or locality. [D, 20.]

**SICKLY**, adj.  $\text{Si}^2\text{k}'\text{li}^2$ . Gr.,  $\acute{\alpha}\sigma\theta\epsilon\nu\acute{\iota}\varsigma$ . Lat., *infirmus*. Fr., *maladif*. Ger., *kränklich*. 1. Weak, and predisposed to disease. 2. Insalubrious. [D.]

**SICKNESS**, n.  $\text{Si}^2\text{k}'\text{ne}^2\text{s}$ . Gr.,  $\nu\acute{o}\sigma\omicron\varsigma$ . Lat., *ægritudo*. Fr., *maladie*, *mal*. Ger., *Krankheit*, *Siechthum*. 1. A deviation from a state of health, especially in the form of an acute disease. 2. In Great Britain, nausea.—**African horse-s.** A fatal disease affecting horses, mules, asses, and zebras during the hot period in southern Africa; supposed to be malarial. [a, 40.]—**African sleeping s.** See *Sleeping dropsy*.—**Bleeding s.** See *Hæmophilæ*.—**Fallings s.** Lat., *morbus caducus*. Fr., *mal caduc*. Ger., *Fallsucht*. See *Epilepsy*.—**Fly s.** A disease occurring in Australia in which there are nausea, vomiting, and slight fever. [a, 34.]—**Gall-s.** [Irvine]. In the Netherlands, remittent fever. [D, 1.]—**Green s.** See *Chlorosis*.—**Hungarian s.** See *Remittent fever*.—**Malva sweating s.** A very fatal disease prevalent in India, marked by rigors, fever, dilated pupils, burning in the epigastrium, thirst, fetid evacuations, vomiting, perspiration, and sometimes ischuria. There is great prostration, and death may occur in a few hours. Occasionally there are remissions and recovery. [Chevers, "Med. Times and Gaz.," Aug. 25, 1883, p. 208 (D).]—**Milk s.** Fr., *maladie lactée* (ou de lait). A form of animal poisoning, prevalent in southern and southwestern North America, produced by drinking diseased milk or eating the flesh of diseased cattle. The symptoms have been variously described by different authors. Gastritis and enteritis appear in its early stages, and at a later period it resembles typhus fever. It may be fatal or recovery may be tardy and imperfect. [D, 47.]—**Miners' s.** See *ANHYLOSTOMIASIS*.—**Monthly s.** See *Menstruation*.—**Mornings s.** Lat., *nausea gravidarum*. Fr., *vomissements* (ou *nausées*) de la grossesse. The morning nausea of pregnant women.—**Mountain s.** Lat., *orionosis*. Fr., *mal des montagnes*. Ger., *Bergkrankheit*. A sensation like nausea which attends respiration in the rarefied atmosphere of great altitudes, caused by the abnormally low atmospheric pressure on the outer surface of the body. Its principal features are extreme muscular exhaustion, palpitation of the heart, throbbing of the arteries, and dyspnea. [D, 66.]—**Painted s.** See *MAL DEL PINTO*.—**Seas'.** See the major list.—**S. of the house.** In Great Britain, a disease of the same type as typhus or relapsing fever, prevalent in densely populated districts and due to neglect of hygiene. [D, 52.]—**Sleeping s.** See *Sleeping dropsy*.—**Sweating s.** Lat., *sudor anglicus*, *morbus sudatorius*. Fr., *sueite militaire*. An epidemic disease which prevailed notably during the early part of the sixteenth century. [G.]—**Theatre s.** Fr., *mal de théâtre*. Of Paul, malaise, usually occurring in women after their dining rapidly and reaching a crowded theatre in a heated condition, with dyspnea and oppression followed by a slow and weak pulse and syncope. [a, 34.]

**SICOPIRIN**, n.  $\text{Si}^2\text{k}'\text{o}^2\text{p}'\text{i}^2\text{r}'\text{i}^2\text{n}$ . A glucoside,  $\text{C}_{14}\text{H}_{12}\text{O}_8$ , found in the root-bark of *Bouditchia major*. [B, 270 (a, 38).]

**SICUA** (Lat.), n. f.  $\text{Si}^2\text{k}'\text{u}^2(\text{u}^4)\text{-a}^2$ . Gr.,  $\sigma\iota\kappa\upsilon\alpha$ . See *CUCURBIT*.

**SICYEDON** (Lat.), adv.  $\text{Si}^2\text{s}(\text{si}^2\text{k})\text{-i}^2(\text{u}^4)\text{-ed}(\text{ad})\text{'o}^2\text{n}$ . Gr.,  $\sigma\iota\kappa\upsilon\eta\delta\acute{\omicron}\nu$ . After the manner of a gourd, i. e., with smooth surfaces (said of the way in which a bone breaks). [A, 311, 322.]

**SICYOS** (Lat.), n. m.  $\text{Si}^2\text{s}(\text{si}^2\text{k})\text{'i}^2(\text{u}^4)\text{-o}^2\text{s}$ . From  $\sigma\iota\kappa\upsilon\omicron\varsigma$  or  $\sigma\iota\kappa\upsilon\omicron\varsigma$ , a cucumber. Fr., *sicote*. A genus of cucurbitaceous herbs. The *Sicyoides* of a tribe of the *Cremospermeæ*. [a, 35.]—**S. angulatus**. One-seeded star-cucumber; a climbing vine of North America. The root and seeds are diuretic. [a, 35.]

**SIDA** (Lat.), n. f.  $\text{Si}^2(\text{si}^2\text{d})\text{'a}^2$ . Fr., s. Indian mallow; a genus of the *Sidææ* (Fr., *sidées*), which are: Of Sprengel and others, a division (tribe) of the *Malvaceæ*; of Bentham and Hooker, a subtribe of the *Malvææ*. [a, 35.]—**S. abutilifolia**, **S. abutilon**. See *ABUTILON*.—**S. acuta**. Fr., *s. lancéolée*. An Indian shrub. Its root is stomachic and febrifuge. The leaves, warmed and smeared with gingely-oil, are used to promote suppuration, and their juice is prescribed for pains in the chest and as an antisynteretic. [a, 35.]—**S. alnifolia**. Fr., *s. à feuilles d'aulne*. An undershrub growing in tropical Asia. The mucilaginous leaves are used medicinally in Cochinchina. The seeds are said to be aperient and diuretic. [a, 35.]—**S. althæifolia**. A Jamaican undershrub. Its flowers and young shoots are emollient. [a, 35.]—**S. carpinifolia**. Fr., *s. à feuilles de charme*, *herbe à paniers*. A species growing in the Mascarene and Canary Islands and in Brazil. The leaves are emollient and mucilaginous, and the intensely bitter root is febrifuge. [a, 35.]—**S. cordifolia**. Fr., *s. à feuilles en cœur*. A mucilaginous and emollient species found in Africa and the East Indies. The seeds are considered aphrodisiac, and are used in colic and gonorrhœa. The lower part of the stem is used as a diuretic and demulcent. [a, 35.]—**S. gigantea**. A species including individuals ranked under *Abutilon gignæum*. It grows in southern Mexico and the northern part of South America. [B, 43, 60.]—**S. graveolens**. A mucilaginous species with a strong, unpleasant odor, growing in the East Indies and Indian Isles; used as an emollient. [a, 35.]—**S. hirta**. Fr., *s. velue*. An East Indian species. The seeds are aperient and diuretic. [a, 35.]—**S. mauritiana**. Fr., *s. de Maurice*. A species the juice of which is used for gonorrhœa and an infusion of the root in fevers. [a, 35.]—**S. napæa**. A fibre-yielding species found in Virginia and Pennsylvania. The root is mucilaginous and emollient, and the leaves, which are eaten as greens, are considered diuretic and laxative. The plant is said to grow in Siberia also and the root to be used there in dementia. [a, 35.]—**S. retusa**. An East Indian mucilaginous species. The root is used in rheumatism. [a, 35.]—**S. rhombifolia**. Fr., *s. rhomboïdale*, *guimauve des Indes*, *fausse guimauve*. A species indigenous to Bengal and growing wild also in the West Indies and North and South America. The leaves and root are mucilaginous and emollient, and the seeds aperient and diuretic. [a, 35.]

**SIDE** (Lat.), n. f.  $\text{Si}^2(\text{sed})\text{'e}(\text{a})$ . Gen., *sid'es*. Gr.,  $\sigma\iota\delta\eta$ . The fruit of *Punica granatum*. [B, 78 (a, 14).]

**SIDERATIO** (Lat.), n. f.  $\text{Si}^2\text{d}(\text{sed})\text{-e}^2\text{r}\text{'a}(\text{a}^2)\text{'shi}^2(\text{ti}^2)\text{'o}$ . Gen., *-on'is*. From *siderari*, to be blasted by a constellation. Fr., *sideration*. Sideration; of Pliny and the older writers, a sudden attack due to the influence of the weather (e. g., insolation, and certain fevers); of Largus and others, encephalitis, apoplexy, asphyxia, catalepsy, etc. [E; G; L, 41, 40, 50 (a, 14).]—**S. ossis**. See *SPINA VENTOSA* (1st def.).

**SIDERITES** (Lat.), n. m.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'it}(\text{et})\text{'ez}(\text{as})$ . Gen., *-it'u* (*-it'æ*). Gr.,  $\sigma\iota\delta\eta\rho\iota\tau\eta\varsigma$ . Fr., *siderite*. See *MAGNET*.

**SIDERITIS** (Lat.), n. f.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'i}(\text{e})\text{'ti}^2\text{a}$ . Gen., *-it'idōs* (*-idīs*). Gr.,  $\sigma\iota\delta\eta\rho\iota\tau\eta\varsigma$  (1st def.). Fr., *crapaudine* (3d def.). Ger., *Gliedkraut* (3d def.). 1. Of the ancients, an undetermined species of *S.* (3d def.), or, according to some, the *Lycopus europæus*. 2. In old pharmacy, *S. scordioides* and *Stachys recta*. 3. Ironwort, a genus of labiate plants. The *Sideritææ* are a subtribe of the *Melitidææ*. [a, 35.]—**S. hirsuta**. See *S. scordioides*.—**S. montana**. Fr., *crapaudine des montagnes*, *faux marrube*. Mountain ironwort, a European species. The tops are stimulant and tonic. [a, 35.]—**S. procumbens**, **S. scordioides**. Ger., *gezähntes Gliedkraut*, *Berufkraut*, *Feldandorn*, *Beschreikraut*, *Zeichenkraut*. A plant of southern Europe. Its herb was formerly official. [a, 35.]

**SIDEROCRENE** (Lat.), n. f.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'o}(\text{o}^2)\text{'kren}(\text{kran})\text{'e}(\text{a})$ . Gen., *-cren'æ*. From  $\sigma\iota\delta\eta\rho\omicron\varsigma$ , iron, and  $\kappa\rho\eta\nu\alpha$ , a fountain. Of Vetter, a chalybeate spring. [L, 50 (a, 14).]

**SIDERODENDRON** (Lat.), n. n.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'o}(\text{o}^2)\text{'de}^2\text{nd}'\text{ro}^2\text{n}$ . From  $\sigma\iota\delta\eta\rho\omicron\varsigma$ , iron, and  $\delta\epsilon\nu\delta\rho\omicron\nu$ , a tree. Fr., *siderodendron*. Ger., *Eisenzette*. A genus of the *Rubiaceæ* including the American species of *Loza*. [a, 35.]—**S. ferreum**, **S. triflorum**. Fr., *s. à trois fleurs*, *bois de fer*. West Indian iron-tree. The bark is diuretic and stomachic. [a, 35.]

**SIDERODROMOPHOBIA** (Lat.), n. f.  $\text{Si}^2\text{d}'\text{e}^2\text{r}(\text{ar})\text{'o}(\text{o}^2)\text{'drom}(\text{dro}^2\text{m})\text{'o}(\text{o}^2)\text{'fob}(\text{fo}^2\text{b})\text{'i}^2\text{-a}^2$ . From  $\sigma\iota\delta\eta\rho\omicron\varsigma$ , steel,  $\delta\rho\omicron\mu\omicron\varsigma$ , a course, and  $\phi\omicron\beta\omicron\varsigma$ , panic, fear. Ger., *Siderodromophobie*. Of Rigger, morbid dread of railway traveling. [A, 326 (a, 21).]

**SIDEROISIS** (Lat.), n. f.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'os}'\text{i}^2\text{s}$ . Gen., *-os'eos* (*-is*). From  $\sigma\iota\delta\eta\rho\omicron\varsigma$ , iron. Fr., *siderosis*. 1. A form of chronic interstitial pneumonia occurring among iron-workers and due to inhalation of the dust of iron oxide. 2. Of Quincke, a pathological condition in which an excess of iron is present in the system and is deposited in certain organs; said to occur in diabetes. [D, 5; a, 32.]

**SIDEROXYLON** (Lat.), n. n.  $\text{Si}^2\text{d-e}^2\text{r}(\text{ar})\text{'o}^2\text{x}'\text{i}^2\text{l}(\text{u}^4)\text{'o}^2\text{n}$ . From  $\sigma\iota\delta\eta\rho\omicron\varsigma$ , iron, and  $\xi\upsilon\lambda\omicron\nu$ , wood. Fr., *bois de fer*. Ger., *Eisenholzbaum*. Ironwood; a genus of sapotaceous trees or shrubs. [a, 35.]—**S. dulcificum**. Miraculous berry; a species growing in western tropical Africa. The fruits have an intensely sweet and very persistent flavor, counteracting the acidity of any food or drink. [a, 35.]—**S. inerme**. Fr., *bois de lettres*, *bois de fer de Cayenne*. An Ethiopian and Guiana species. The bark is antisyphilitic and antiscorbutic. [a, 35.]—**S. toxiferum**. Fr., *sideroxylon vénéneux*. A species having a poisonous juice said to be used as an arrow-poison by the Hottentots. [a, 35.]

**SIEB** (Ger.), n. Zeb. 1. A sieve. [a, 21.] Cf. *COLATORIUM* and *CRIBRUM*. 2. See *ETHMOID BONE*.

**SIEBBEIN** (Ger.), n. Zeb'bin. See *Ethmoid bone*.

**SIEBENSCHLÄFER** (Ger.), n. Zeb'e'n-schlaf-e'r. See *BEDGAR*.

**SIEBFÖRMIG** (Ger.), adj. Zeb'fu'r'm-i'g. See *ETHMOID*, *CRIBROSE*, and *CRIBRIFORM*.

**SIEBHAUT** (Ger.), n. Zeb'ha'ut. See *DECIDUA*.—**S. des Eies**. See *CHORION spongiosum*.

**SIEBPLATE** (Ger.), n. Zeb'pla'te-te. See *LAMINA cribrosa*, *Cribiform plate of the ethmoid bone*, and *SUBSTANTIA perforata lateralis*.—**Mittlere S.** See *Middle turbinate bone*.—**Vordere S.** See *Anterior perforated space*.

**SIECH** (Ger.), adj. Zech. See *SICK*.—**S'haus**, **S'enhaus**. See *HOSPITAL*.

**SIECHTHUM** (Ger.), n. Zech'tum. 1. A chronic disease. [a, 14.] 2. See *MARASMUS præmaturus*.—**Malarias'**. See *MALARIAL CACHEXIA*.

**SIEF** (Ar.), n. See *COLLYRIUM*.—**S. album** (Lat.). See *PULVIS CERUSSÆ compositus*.—**S. album cum opio** (Lat.). Fr., *poudre de céruse opiacée*. A powder of 4 parts of pulvis cerussæ compositus and 1½ or 5½ of opium. [B, 119 (a, 38).]

**SIEGE** (Fr.), n. Se-e'zh. 1. A chair, a seat. 2. See *BREECH*.

**SIEGEL** (Ger.), n. Zeg'e'l. See *SIGILLUM*.

**SIEGESBECKIA** (Lat.), n. f. Zeg-e's-be'k'i'z-a. From *Siegesbeck*, a Russian botanist. Fr., *s. siegesbèque*. Ger., *Siegesbeckie*. A genus of the *Helianthoidææ*. The *Siegesbeckiææ* are a division of the *Ecliptææ*. [a, 35.]—**S. droseroides**, **S. Jorullensis**. A tropical American species growing on the mountain of Jorullo, Mexico. It has the bitter, balsamic properties of *S. orientalis* (in which it is included by Bentham and Hooker). [a, 35.]—**S. orientalis**. Fr., *s. d'Orient*, *herbe divine*, *guérit-vite*, *herbe de flac* (in the Mauritius). A bitter, balsamic species widely dispersed in the tropics of the Old World and identified with *S. droseroides*. In the Marquesas the leaves are used for whitening the skin. Externally their juice acts as a stimulant and antiparasitic, and has been recommended in ringworm. In the East the herb is used as an emetic and in lithiasis, dysuria, leucorrhœa, ague, and rheumatism. It produces salivation if applied to the gums. [a, 35.]

**SIEGON** (Lat.), n. m.  $\text{Si}^2(\text{si}^2)\text{'eg}(\text{ag})\text{'o}^2\text{n}(\text{on})$ . Gen., *-on'os* (*-is*). See *Superior MAXILLA*.

**SIEGWURZ** (Ger.), n. Zeg'vurt. See *GLADIOLUS* (2d def.).

**SIEL** (Ger.), n. Zel. See *SEWER*.

**SIELISMUS** (Lat.), n. m.  $\text{Si}^2(\text{si}^2)\text{'e}^2\text{l-i}^2\text{z}(\text{i}^2\text{s})\text{'mu}^2\text{s}(\text{mu}^4\text{s})$ . From  $\sigma\iota\epsilon\lambda\acute{\iota}\varsigma\epsilon\upsilon\alpha$ , to slaver. See *PTYALISM*.

**SIELON** (Lat.), n. n. Si(s<sup>i</sup>l<sup>i</sup>e<sup>2</sup>l<sup>i</sup>-o<sup>2</sup>n. Gr., *σιελον*. See SALIVA.

**SIFFLAGE** (Fr.), n. Sef-fla<sup>2</sup>zh. See CORNAGE.

**SIFFLEMENT** (Fr.), n. Sef-fl<sup>i</sup>-ma<sup>2</sup>n<sup>2</sup>. A whistling sound. [L. 41 (a, 14).]—**S. modulé**, **S. musical**. See BRUIT de soufflé *ordinaire et intermittent*.

**SIFFLET** (Fr.), n. Sef-fla. Of the veterinarians, an artificial fistula in the tail of a broken-winded horse, supposed to facilitate respiration. [A. 301 (a, 34).]

**SIGAULTIAN**, adj. Se-go<sup>2</sup>ti<sup>2</sup>-n. Named from, or investigated, or performed by J. R. Sigault, a French obstetrician (as in the expression *S. operation* [see *PUBLIC SYMPHYSEOTOMY*]).

**SIGH**, n. Si. Lat., *suspirium*, *gemitus*. Fr., *soupir*. Ger., *Seufzer*. A long, deep inspiration followed by a quick, full expiration and usually accompanied by a characterized non-vocal sound caused by the rush of air through the nose or mouth. [J.]

**SIGHING**, adj. Si<sup>i</sup>l<sup>i</sup>n<sup>2</sup>. Lat., *suspiriosus*. Fr., *soupirant*. Accompanied or characterized by sighs. See *S. RESPIRATION*.

**SIGHING**, n. Gr., *μυγμός, μυγμός, μυχθισμός*. Lat., *mychmus*, *mychthismus*, *uspiratio*. Fr., *soupirs*. Ger., *Seufzen*. Spurious breathing, respiration accompanied by sighs. [J.]

**SIGHT**, n. St. Gr., *ὄψ*. Lat., *visus*, *visio*. Fr., *vue*, *vision*. Ger., *Sehen*, *Gesichtskraft*, *Schermägen*. The power or faculty of seeing or of perceiving by means of the eye. [F.] Cf. Vision and VISUS.—**Day s.** See HEMERALOPIA (1st def.).—**Depraved s.** See PAROPIA.—**Long s.** See HYPERMETROPIA.—**Moose s.** See MYOPIA.—**Night s.** See NYCTALOPIA.—**Short s.** See MYOPIA.—**Skew s.** See DYSOPIA *lateralis*.—**Weak s.** See ASTHENOPIA.

**SIGIA** (Lat.), n. f. Si<sup>i</sup>l<sup>i</sup>(si<sup>2</sup>g<sup>i</sup>l<sup>i</sup>g<sup>i</sup>l<sup>i</sup>-a<sup>2</sup>. Gr., *συγία*. Liquid storax. [a, 35.]

**SIGILLATE**, adj. Si<sup>i</sup>l<sup>i</sup>(si<sup>2</sup>l<sup>i</sup>l<sup>i</sup>-at. Lat., *sigillatus* (from *sigilla*, a seal). Fr., *sigillé*. Ger., *gesiegeit*. Marked or stamped as if with a seal. [a, 35.]

**SIGMATISM**, n. Si<sup>i</sup>g<sup>i</sup>ma<sup>2</sup>-t<sup>i</sup>z-m. Lat., *sigmatismus* (from *σίγμα*, the letter Σ). Defective pronunciation of the s or z sound.

**SIGMOID**, adj. Si<sup>i</sup>g<sup>i</sup>m<sup>i</sup>d. Lat., *sigmoideus* (from *σίγμα*, the letter Σ, and *εἶδος*, resemblance). Fr., *sigmoïde*. Ger., *s-förmig*, *schwammhalsförmig*, *sigmoïdförmig*. Curved like the letter S.

**SIGMOIDOSTOMY**, n. Si<sup>i</sup>g<sup>i</sup>m<sup>i</sup>d-o<sup>2</sup>st<sup>i</sup>om<sup>i</sup>-i<sup>2</sup>. From *σίγμα*, the letter Σ, *εἶδος*, resemblance, and *στόμα*, an aperture. Of Reeves, enterostomy of the sigmoid flexure. [a, 34.]

**SIGN**, n. Sin. Gr., *σημεῖον*. Lat., *signum*. Fr., *signe*. Ger., *Zeichen*. An indication, a symptom, especially one elicited by physical examination.—**Baccell<sup>i</sup>'s s.** See APHONE PECTORILOQUY (2d def.).—**Grancher's s.** A raised pitch of the expiratory murmur, indicating pulmonary consolidation. [a, 34.]—**Halfpenny s.** A s. elicited by auscultatory percussion, said to indicate pleuritic effusion. "The patient is seated, and is auscultated in the dorsal region." An assistant places a son on the thorax, in different parts according to directions, and percusses. The ear of the auscultator listens at the opposed corresponding parts. The healthy side is first examined; then the side with pleurisy, where the note is much higher. A clear metallic sound indicates pleuritic effusion; when this sound is absent there is no effusion. ["Brit. Med. Jour.," Apr. 3, 1886, p. 661.]—**Hegar's s. of pregnancy.** A boggy, compressible feeling of the lower uterine segment that projects over the cervix, observed by bi-manual uterine examination, the uterus being jug-shaped; observed as early as the fourth week. [E. H. Grandin (a, 34).]—**Jorissen's s.** An unchanged pulse-rate in decided changes of position of a pregnant woman; indicative of her condition. [a, 34.]—**Physical s's.** S's elicited by means of physical examination.—**Romberg's s.** Swaying; inability to stand erect with the feet close together and the eyes closed; a s. of tabes dorsalis. [a, 18.]—**Skoda's s.** A tympanic percussion note in the subclavicular region, shading insensibly into a flat note in the lower mammary and axillary regions; indicative of pleural effusion. [a, 34.]—**Stethoscopic s.** A s. perceived by the use of the stethoscope; in a wider sense, any s. furnished by auscultation. [a, 18.]—**Westphal's s.** Absence of the knee-jerk. [a, 18.]

**SIGNATURA** (Lat.), n. f. Si<sup>i</sup>g<sup>i</sup>-na<sup>2</sup>(na<sup>2</sup>t<sup>i</sup>-u<sup>2</sup>(n<sup>i</sup>)ra<sup>2</sup>. 1. See SIGNATURE. 2. In a prescription, the directions to the patient, showing how the medicine is to be taken. [B.]

**SIGNATURE**, n. Si<sup>i</sup>g<sup>i</sup>na<sup>2</sup>-t<sup>i</sup>u<sup>2</sup>r. Lat., *signatura* (from *signare*, to mark). A characteristic mark.—**Doctrine of s's.** An old superstitious doctrine that the medicinal properties of plants were indicated by their form, color, etc. *q. v.*—The carrot was used in leucoderma from the color of its root, the *Pulsatilla officinalis* in lung troubles from the spots on the leaves, and saley as an aphrodisiac from the shape of the tubers. [a, 35.]

**SIGNE** (Fr.), n. Sen-y<sup>i</sup>. See STON.—**S. du cordeau.** A means of ascertaining the existence of lateral deviation of the sternum (twisting of the thorax), introduced by Pitres as a diagnostic test of copious pleural effusions. A straight line is drawn from the middle of the lower end of the sternum to the middle of the symphysis pubis, and another from the middle of the top of the sternum to the point first mentioned; if the two lines are not coincident, the deformity is present. [Queyrat, "Rev. de méd.," Jan., 1885, p. 23.]

**SIGNUM** (Lat.), n. n. Si<sup>i</sup>g<sup>i</sup>na<sup>2</sup>-m<sup>i</sup>nu<sup>m</sup>-m. See MARK and STON.—**Signa hypomnestica.** Signs or indications of disease as shown in the patient's history. [L. 50 (a, 14).]

**SIGUATERA** (Sp.), n. Se-gwa<sup>2</sup>-ta<sup>2</sup>ra<sup>2</sup>. A disease of the tropics, often fatal, produced by eating certain kinds of fish; characterized by abdominal pain, nausea, vomiting, diarrhoea, coldness of the body, depression of the pulse, and cramps, also by sudden muscular prostration, an alternately pale and flushed countenance, contracted pupils, swollen and blue lips, and paralysis. [D, 33.]

**SIKIMIN**, n. Si<sup>i</sup>k<sup>i</sup>m<sup>i</sup>-in. See SHIKIMENE.

**SILACH**, n. See BLEPHAROPACHYNSIS.

**SILAUS** (Lat.), n. m. Si<sup>i</sup>l<sup>i</sup>a<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). 1. Of the ancients, an umbelliferous plant, perhaps the *Apium graveolens*. 2. A genus of the *Scutellaria*. [a, 35.]—**S. pratensis**. Fr., *brise-pierre*, *perce-pierre*, *puccédanum des Allemands* (ou des Anglais), *silave*, *saxifrage des prés* (ou des anciens). Ger., *Wiesensilau*, *Roskimmell*, *falsche Bärwurz*. The meadow- (or pepper-) saxifrage of Europe. The root and fruits have an acid aromatic odor. They and the herb are diuretic, and were formerly official. [a, 35.]

**SILBENSTOLPERN** (Ger.), n. Zi<sup>i</sup>l<sup>i</sup>b<sup>i</sup>-en<sup>i</sup>-stolp<sup>i</sup>-ern. A variety of aphasia in which letters and syllables are confounded. [A, 319 (a, 34).]

**SILBER** (Ger.), n. Zi<sup>i</sup>l<sup>i</sup>b<sup>i</sup>-e<sup>2</sup>r. See SILVER.—**Fließendes S.** See MERCURY (1st def.).—**Knalls'.** See SILVER fulminate.—**Musivs'.** See MOSAIC SILVER.—**Neus'.** See ARGENTAN.—**Quecks'.** See MERCURY.—**Raffinirtes S.** Refined silver. [B.]—**Rhodans'.** See SILVER thiocyanate.—**S'glättessig.** Ger. *Liquor PLUMBI subacetatis*.—**S'harnstoff.** A compound of silver and urea. [B.]—**S'infaret.** See ARGYRIA.—**S'salpeter.** See SILVER nitrate.—**Wassers'.** See MERCURY (1st def.).—**Wasserstoffs'fulminat.** See SILVER and hydrogen fulminate.

**SILENAL**, adj. Sil-e<sup>2</sup>n<sup>i</sup>l. Lat., *silenalis*. Pertaining to the *Silenales*, which are Lindley's s. alliance (Lat., *nizus silenalis*), an alliance (1833) of the *Syncarpae* consisting of the *Portulacaceae*, *Sileneae*, *Alsineae*, *Tamaricaceae*, and *Illecebreae*, or (1847) an alliance of hypogynous exogens comprising the *Caryophyllaceae*, *Illecebreaceae*, *Portulacaceae*, and *Polygonaceae*. [a, 35.]

**SILENE** (Lat.), n. f. Sil(sil-en(an)<sup>2</sup>e(a). From *Σελήνη*, the companion of Bacchus. Fr., *siléné*, *silène*. Ger., *Leimkraut*. Campan, a genus of caryophyllaceous herbs. The *Sileneae*, or *silenads*, are the *Caryophyllae* (in part). The *Sileneae* are: (Of Bartling, a family of the *Caryophyllitae*; of Benth and Hooker, a tribe of the *Caryophyllae*. [a, 35].)—**S. armeria**. Fr., *silène à bouquets*. Linewort. Lobel's (or garden) catch-fly; a European species, sometimes used as a cordial. [a, 35].)—**S. baccifera**. See CUCULBACEAE *baccifer*.—**S. inflata**. Fr., *bec d'oiseau*, *carnillet*, *foquet*, *pétrole*, *pisse-lat*. Ger., *wildes Seifenkraut*, *Taubenkröpf*, *weisser Behen*, *Widerstoss*, *Gliedweich*, *Sandkohl*, *Knarre*, *Schamwollstein*. Ben. bladder-catch-fly (or campon), cow-bell (or -cracker, or -rattle), spatling (or frothy) poppy; a common herb of Europe, North America, etc. The root, *radix behen nostralis*, was formerly used like that of *Centaurea behen*. The herb is used in erysipelas. [a, 35].)—**S. macrosolen**. A species used in Abyssinia as a tunicide. [a, 35].)—**S. otites**. Fr., *behén à mouche*. Ger., *spatelblättriges* (oder *Acker*) *Leimkraut*, *Ohrlöffelkraut*, *Ackertaubenkröpf*, *Kukubalkraut*. Spanish campon; a bitter, astringent herb of central Europe, formerly official as *herba visagis* (seu *viscaginis*, seu *cucubali*, seu *otitis*). It was used in otalgia and in rabies. [a, 35].)—**S. virginica**. Fr., *silène de Virginie*. Ger., *virginisches Leimkraut*. Wild (or fire-) pink, fly-bane, catch-fly of North America; an herb regarded by the Indians as poisonous, growing from Pennsylvania to Georgia. The root is used as an anthelmintic. [a, 35.]

**SILER** (Lat.), n. n. Sil(sil)<sup>2</sup>e<sup>2</sup>r(e<sup>2</sup>r). Gen., *sil'eris*. Fr., *s. Ger.*, *Roskimmell* (1st def.). 1. A genus of the *Sileridae* (a tribe of the *Apiaceae*), of the *Silerinae* (a suborder of the *Umbelliferae*), and of the *Silerineae* (a tribe of the *Umbelliferae*). 2. The *Laserpitium s.* [a, 35.]

**SILEX** (Lat.), n. m. Sil(sil)<sup>2</sup>e<sup>2</sup>x. Gen., *sil'icia*. See SILICA.—**Liquor siliceus** (seu *silleum*). Fr., *liqueur de silex*. Ger., *Kieselwässigkeit*. The gelatinous liquid produced by the exposure of potassium metasilicate to moist air. [a, 3.] Cf. *Silicæ de potasse dissous*.—**S. contritus**. Pulverized s.; a form of silica (preferably quartz), finely powdered for use in pharmaceutical operations. It is used in operations where a purely mechanical action is desired, for which silica is fitted by its hardness and its insolubility in most chemical reagents. [B, 5.]

**SILICA** (Lat.), n. f. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>k-a<sup>2</sup>. From *siler*, a flint. Fr., *silicône*. Ger., *Kiesel*. Silicon dioxide, SiO<sub>2</sub>. In the crystalline form it constitutes quartz and tridymite. In the amorphous form it constitutes opal and enters into the structure of flint, agate, and chalcedony. It is found in the stalks of many cereals and of the bamboo, and in the scales of diatoms. Among animals, it occurs in the orders of sponges and *Radiolaria*, and has also been found in feathers. It is very hard, transparent, colorless when pure, and has a sp. gr. of from 2.3 to 2.6. Amorphous s. may be obtained artificially as a light white powder which may by fusion be converted into glass. It is insoluble in water and in most acids, but readily dissolves in hydrofluoric acid and in alkalis. [B, 3.]

**SILICADE** (Fr.), n. Sel-ek-a<sup>2</sup>d. A medicinal preparation having liquid silicic acid as the excipient. [B, 93 (a, 14).]

**SILICAS** (Lat.), n. m. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>k-a<sup>2</sup>s(a<sup>2</sup>s). Gen., *-at'is*. See SILICATE.—**S. potassicus aqua solutus**. See SILICATE de POTASSE *dissous*.

**SILICATE**, n. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>k-at. Lat., *silicas*. Fr., *s. Ger.*, *Silicat*, *Kieselsaures Salz*. A salt of silicic acid. [B.]—**S. aluminico-sodique** (Fr.). See AZURITE.

**SILICATUS** (Lat.), adj. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>k-at(a<sup>2</sup>i<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s). Combined with or containing silicon. [B.]

**SILICEOUS**, adj. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>shu<sup>2</sup>s. Lat., *siliceus*. Flinty, containing silica. [B.]

**SILICHLOROFORM**, n. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>sh-lor'o<sup>2</sup>-fo<sup>2</sup>rm. See SILICO-CHLOROFORM.

**SILICIC**, adj. Si<sup>i</sup>l<sup>i</sup>(i<sup>2</sup>sh-i<sup>2</sup>k. Fr., *silicique*. Ger., *Kieselsauer*. Containing silicon. [B.]—**Liquid s. acid**. A liquid form of s. acid, produced by the action of hydrochloric acid on a solution of sodium silicate and the subsequent removal of the sodium chloride and the excess of acid by dialysis. [B, 6.]—**S. acid**. Fr., *acide silicique*. Ger., *Kieselsäure*. An acid containing silicon; as ordi-

narly used, *orthosilicic acid*,  $\text{H}_4\text{SiO}_4 = \text{SiO}_2 \cdot 2\text{H}_2\text{O}$ , a tetrabasic acid known only in aqueous solution, and prepared by dialyzing a solution of an alkaline silicate which has been treated with hydrochloric acid; a limpid colorless and tasteless liquid, which on standing coagulates to a transparent gelatinous mass. Other *s.* acids are the *metasilicic*, *parasilicic*, *disilicic*, and *trisilicic acids*. All the *s.* acids may be regarded as derived from the combination of silica with water, metasilicic, orthosilicic, and parasilicic acids being formed by the union of silica with one, two, and three molecules of water respectively, while the disilicic acids are formed by the union of two molecules of silica with one or more molecules of water, and the trisilicic acids by the union of three molecules of silica with two or more molecules of water. [B. 3.]—**S. anhydride**. See **SILICA**.—**Soluble s. acid**. See *Liquid s. acid*.

**SILICIDE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{s-i}^{24}\text{d}(\text{id})$ . A direct compound of silicon with another element. [B.]

**SILICIUM** (Lat.), *n. m.*  $\text{Si}^{21}/\text{i}^{23}\text{s}(\text{i}^{23}\text{k})/\text{i}^{24}\text{-u}^{\text{m}}(\text{u}^{\text{4m}})$ . See **SILICON**.

**SILICIURET**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{s}(\text{i}^{23}\text{k})/\text{i}^{24}\text{-u}^{\text{m}}\text{-e}^{\text{2t}}$ . Lat., *siliciuretum*. Fr., *siliciure*. See **SILICIDE**.

**SILICLE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k}^{\text{1}}$ . Lat., *silicula* (dim. of *siliqua*, a pod). Fr., *silicule*. Ger., *Schötchen*. A short silicle, one about as broad as it is long or even broader. [a, 35.]

**SILICOACETIC ACID**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-a}^{\text{2s}}\text{et}(\text{e}^{\text{2t}})/\text{i}^{23}\text{k}$ . Fr., *acide silico-acétique*. A weak acid,  $\text{CH}_3-\text{SiO}-\text{OH}$ . [B. 3.]

**SILICOBENZOIC ACID**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-be}^{\text{2nz-o}^{\text{2k}}}/\text{i}^{23}\text{k}$ . Fr., *acide silicobenzöique*. The acid  $\text{C}_6\text{H}_5\text{SiO.OH}$ . [B. 3 (a, 38).]

**SILICOBROMOFORM**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-brom}^{\text{o}}\text{-fo}^{\text{2rm}}$ . A hypothetical substance,  $\text{SiHBr}_3$ , probably formed by the action of hydrobromic acid on silicon heated above red heat. [B. 93 (a, 14).]

**SILICOCHLOROFORM**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-klor}^{\text{o}}\text{-fo}^{\text{2rm}}$ . A colorless, mobile, highly inflammable liquid,  $\text{SiHCl}_3$ , fuming on exposure to air, and emitting a strong odor. It has the constitution of chloroform in which silicon replaces the carbon. [B.]

**SILICOFORMIC**, *adj.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-fo}^{\text{2rm}}/\text{i}^{23}\text{k}$ . Formic with silicon replacing carbon. [B.]—**S. anhydride**. An unstable solid,  $\text{Si}_2\text{H}_2\text{O}_2$ . [B. 3.]

**SILICOHEPTANE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-he}^{\text{2pt}}/\text{an}$ . Ger., *Silicoheptan*. A colorless liquid,  $\text{Si}(\text{C}_2\text{H}_5)_3\text{H}$ , having the odor of petroleum. [B. 4.]

**SILICOHEPTYL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-he}^{\text{2pt}}/\text{i}^{23}\text{k}$ . Ger., *S.* A univalent radicle,  $\text{Si}(\text{C}_2\text{H}_5)_3$ . [B. 3.]—**S. alcohol**, **S. hydrate**. An oily liquid,  $\text{Si}(\text{C}_2\text{H}_5)_3\text{O.H}$ . Chemically, it is tertiary heptyl alcohol in which an atom of silicon replaces one of the carbon atoms. [B. 3.]—**S. hydride**. See **SILICOHEPTANE**.—**S. oxide**. Triethylsilicylether. [B.]

**SILICOIODOFORM**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-i}^{\text{2d}}\text{-o}^{\text{2d}}\text{-fo}^{\text{2rm}}$ . A colorless, highly refracting liquid,  $\text{SiH}_3\text{I}$ . [B. 3.]

**SILICOL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o}^{\text{2l}}$ . Ger., *S.* A derivative of silicon analogous to a carbinol; an alcohol of a silicon or silicon-carbon radicle. [B. 4.]

**SILICOMETHANE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-me}^{\text{2th}}/\text{an}$ . See **SILICON hydride**.

**SILICON**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o}^{\text{2n}}$ . Fr., *silicium*. Ger., *Silicium*. A non-metallic element discovered by Berzelius in 1810. It occurs in great abundance under the form of silica and silicates. *Amorphous s.* is a dark-brown powder soluble in an aqueous solution of hydrofluoric acid and readily igniting when heated in air. *Crystalline s.* forms dark, iron-gray, lustrous octahedral or tetrahedral crystals, oxidizing only with difficulty when heated in air or oxygen, and not dissolved by any acids except a mixture of nitric and hydrofluoric acids. In its compounds *s.* bears a strong resemblance to carbon, and appears to be the starting point of a series of compounds quite analogous in structure to the organic compounds. It unites directly with other elements, forming silicides, and with oxygen, forming silica. Compounded with both oxygen and hydrogen, it gives rise to the various silicic acids and silicates. In composition *s.* acts as a tetrad radicle. Symbol, Si; atomic weight, 28. [B. 3.]—**S. bromide**. See *S. tribromide*, *S. tetrabromide*, and *S. chlorobromide*.—**S. chlorhydrosulphide**. A colorless fuming liquid,  $\text{Si}(\text{C}_2\text{H}_5)_2\text{S}$  ( $\text{OC}_2\text{H}_5$ ), boiling at  $96^\circ\text{C}$ . [B. 3.]—**S. chloride**. See *S. tetrachloride*, *S. trichloride*, and *SILICOCHLOROFORM*.—**S. chlorobromide**. A colorless liquid,  $\text{SiCl}_2\text{Br}$ . [B. 3.]—**S. diethyl**. A bivalent radicle,  $\text{Si}(\text{C}_2\text{H}_5)_2$ . [B. 4.]—**S. diethyketone**. A thick liquid,  $\text{Si}(\text{C}_2\text{H}_5)_2$ . [B. 4.]—**S. dioxide**. See **SILICA**.—**S. disulphide**. A body,  $\text{SiS}_2$ , forming silky crystals. [B. 3.]—**S. hexethyl**. An oily liquid,  $\text{Si}(\text{C}_2\text{H}_5)_6$ . [B. 3.]—**S. hydride**. A colorless inflammable gas,  $\text{SiH}_4$ . [B. 3.]—**S. iodide**. See *S. triiodide*, *S. tetraiodide*, and *SILICOIDOFORM*.—**S. methyl**. See *S. tetramethyl*.—**S. nitride**. A white amorphous powder produced by the action of ammonia on *s. tetrachloride*. [B. 3.]—**S. oxide**. See **SILICA**.—**S. oxychloride**. A compound of *s.* with oxygen and chlorine. A number of such compounds are known. [B. 3.]—**S. paratolyl**. A transparent crystalline substance,  $\text{Si}(\text{C}_6\text{H}_4)_4$ . [B. 3 (a, 38).]—**S. tetrabenzyl**, **S. tetrabenzylmethane**. A crystalline substance,  $\text{Si}(\text{CH}_2\text{C}_6\text{H}_5)_4$ . [B. 3 (a, 38).]—**S. tetrabromide**. A colorless liquid,  $\text{SiBr}_4$ . [B. 3.]—**S. tetracetate**. See **ACETOORTHOSILICIC ANHYDRIDE**.—**S. tetrachloride**. A colorless fuming liquid,  $\text{SiCl}_4$ . [B. 3.]—**S. tetrafluoride**. A colorless pungent gas,  $\text{SiF}_4$ , fuming on contact with air and liquefying under extreme cold or strong pressure. It decomposes on solution in water, forming silicofluoric acid. [B. 3.]—**S. tetrahydride**. See *S. hydride*.—**S. triiodide**. A substance, *S.I.*, forming colorless octahedral crystals. [B. 3.]—**S. tetramethyl**. A colorless liquid,  $\text{Si}(\text{CH}_3)_4$ . [B. 4.]—**S. tetraphenyl**, **S. tetraphenylmethane**. A crystalline substance,  $\text{Si}(\text{C}_6\text{H}_5)_4$ . [B. 3 (a, 38).]—**S. tetrethyl**. A liquid,  $\text{Si}(\text{C}_2\text{H}_5)_4$ . [B. 3.]—**S. tribromide**. A substance,  $\text{Si}_2\text{Br}_6$ , forming colorless crystals. [B. 3.]—**S. trichloride**. A colorless, fuming, inflammable liquid,  $\text{Si}_2\text{Cl}_6$ . [B.]—**S. triiodide**. A body,  $\text{Si}_2\text{I}_6$ , forming colorless, prismatic or rhomboedral crystals which fume on exposure to the air. [B. 3.]

**SILICONETHYL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o}^{\text{2n}}\text{-e}^{\text{2th}}/\text{i}^{23}\text{k}$ . See **ETHYLSILICON**.—**S. oxyhydrate**. See **SILICOPROPIONIC ACID**.

**SILICONONANE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-no}^{\text{2n}}/\text{an}$ . See **SILICONtetraethyl**.

**SILICONONYL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-no}^{\text{2n}}/\text{i}^{23}\text{k}$ . A radicle,  $\text{SiC}_6\text{H}_{13}$ , which may be regarded as formed from nonyl by the replacement of one of the carbon atoms by silicon. Its compounds are derived directly from siliconotetethyl by displacement of a hydrogen atom of the latter by some other univalent radicle. [B.]—**S. alcohol**. A liquid,  $\text{SiC}_6\text{H}_{13}\text{O.H} = \text{Si}(\text{C}_6\text{H}_5)_3-\text{CH}_2-\text{CH}_2-\text{OH}$ , of camphoraceous odor. [B. 4.]

**SILICONTRIETHYL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o}^{\text{2n}}\text{-tri-e}^{\text{2th}}/\text{i}^{23}\text{k}$ . See **SILICOHEPTYL**.—**S. hydrate**. See **SILICOHEPTYL alcohol**.—**S. hydride**. See **SILICOHEPTANE**.

**SILICO-OXALIC ACID**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-o}^{\text{2x-a}^{\text{2l}}}/\text{i}^{23}\text{k}$ . Fr., *acide silico-oxalique*. A white solid,  $\text{Si}_2\text{O}_4\text{H}_4$ . [B. 3.]

**SILICOPROPIONIC ACID**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-o-prop-i}^{\text{2o}}\text{-o}^{\text{2n}}/\text{i}^{23}\text{k}$ . An acid,  $\text{SiC}_3\text{H}_7\text{O}_2 = \text{CH}_3-\text{CH}_2-\text{S.O}$ . [B. 4.]

**SILICOSIS** (Lat.), *n. f.*  $\text{Si}^{21}/\text{i}^{23}\text{k-os}^{\text{1}}/\text{i}^{23}\text{s}$ . Gen., *-os'eos*. From *sillex*, flint. See **CHALCOSIS**.

**SILICULE**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{k-u}^{\text{2l}}$ . Lat., *silicula*. Fr., *s.* See **SILICLE**.

**SILICULOSE**, *adj.*  $\text{Si}^{21}/\text{i}^{23}\text{k-u}^{\text{2l}}\text{-os}$ . Lat., *siliculosus* (from *silicula*, a little pod). Fr., *siliculeux*. Ger., *schötchentragend* (1st def.). 1. Of plants, bearing silicles. 2. Of fruits, having the character of a silicle. [a, 35.]

**SILICYL**, *n.*  $\text{Si}^{21}/\text{i}^{23}\text{-si}^{\text{2l}}$ . Ger., *S.* A radicle containing silicon combined directly with a trivalent radicle. [B. 4.]

**SILIGO** (Lat.), *n. f.*  $\text{Si}^{21}/\text{i}^{23}\text{-ie}^{\text{1}}/\text{go}$ . Gen., *-ig'inis*. The genus *Triticum*. [a, 35].—**Flores siliginis**. The so-called flowers, or rather anthers, of *Triticum hibernum*; used in Hungary as an abortifacient, and said to act as a styptic in uterine hemorrhage. [<sup>1</sup> Proc. of the Am. Pharm. Assoc., xxix (a, 14).]

**SILIQUEA** (Lat.), *n. f.*  $\text{Si}^{21}/\text{i}^{23}\text{-kwa}^{\text{2s}}$ . See **SILIQUE**.—**Emplastrum siliquarum**. Sp., *emplasto de algarrobas* [Sp. Ph.]. A plaster made by melting together 6 parts of yellow wax and 4 each of colophony and Burgundy pitch, straining, adding 12 parts of extractum ceratoniae, 2 of honey, 4 of red-lead plaster, and  $\frac{1}{2}$  part of iron carbonate, expelling the moisture, and cooling. [B. 95 (a, 38).]—**S. arbor**, **S. dulcis**. See **CERATONIA s.**—**S. olivæ**, **S. olivæ externa**. Nerve-fibres surrounding the olivary body. [L.]—**S. olivæ interna**. The corpus dentatum olivæ.—**S. vulgarior**. See **CERATONIA s.**

**SILICUASTRUUM** (Lat.), *n. n.*  $\text{Si}^{21}/\text{i}^{23}\text{-kwa}^{\text{2st}}(\text{kwa}^{\text{2st}})/\text{ru}^{\text{2m}}(\text{ru}^{\text{4m}})$ . 1. Of Fuchs, the *Capsicum annuum*. 2. Of the ancients, probably the *Lepidium latifolium*; also of Pliny, the *Capsicum annuum*. 3. Of Tournefort, the genus *Cercis*. [a, 35.]—**S. cordatum**. See *Cercis canadensis*.—**S. orbiculatum**. See *CERCIS s.*

**SILIQUE**, *n.*  $\text{Si}^{21}/\text{ek}^{\text{1}}$ . Lat., *siliqua*. Fr., *s. Ger.*, *Schote*. A pod; the fruit of a cruciferous plant, especially when it is much longer than it is broad; a slender two-valved capsule divided usually into two cells by the formation, between two opposite parietal placentae, of a spurious dissepiment, which often persists after the valves have fallen away. [a, 95.]

**SILIQUEUSE**, *adj.*  $\text{Si}^{21}/\text{i}^{23}\text{-kwos}$ . Lat., *siliquosus* (from *siliqua*, a husk). Fr., *siliqueux*. Ger., *schotenartig* (1st def.), *schotentragend* (2d def.). 1. Of fruits, having the character of a silique (especially as distinguished from a silicle). 2. Of plants, bearing siliques (especially when not silicles). [a, 35.]

**SILK**, *n.*  $\text{Si}^{21}\text{k}$ . Gr., *σπικόν* Lat., *sericum*. Fr., *soie*. Ger., *Seide*. A fine filament produced by the larvæ of *Bombyx mori* and other moths; also a fabric or thread made of such filaments. [a, 48].—**Aseptic s.** Thread *s.* made aseptic by boiling and subsequent immersion in some antiseptic fluid. [a, 34].—**Carbolized s.** Fr., *soie phéniquée*. *S.* saturated with a carbolized solution. [a, 34].—**Epispastic s.** *S.* saturated with some vesicating agent. [a, 34].—**Saddler's s.** A heavy *s.* used by saddlers; employed in certain surgical operations. [a, 34].—**Lister's s. protective**. A preparation made by impregnating *s. cloth* with a mixture of carbolic acid and resin. [B. 95 (a, 38).]

**SILK-WORM**, *n.*  $\text{Si}^{21}\text{k}^{\text{1}}/\text{wu}^{\text{2rm}}$ . See *BOMBYX mori*.—**S. w. gut**. Fr., *crin de Florence*. Ger., *Seidenwurmdarm*. The thin, fine, thread-like material drawn out from a *s. w.* killed when ready to spin its cocoon. [a, 34.]

**SILLON** (Fr.), *n.* *Sel-yo*<sup>2n</sup>. See **FISSURE**, **FURROW**, **GROOVE**, and **SULCUS**.—**Grand s. circonferentiel (du cervelet)**. See **Peduncular SULCUS**.—**Grand s. du lobe fronto-pariétale**. See **Callosal marginal FISSURE**.—**Grand s. horizontal**. See **Peduncular SULCUS**.—**Grand s. supérieur**. An inconstant fissure of the brain, one that is not always well marked. [J. 55 (K).]—S. ventral. See *Ventral fissure*.—S. vitellin. See *Vitelline furrow*.

**SILLONNEMENT** (Fr.). n. Sel-yo<sup>2</sup>n-ma<sup>2</sup>n<sup>2</sup>. The beginning of segmentation. [A. 385 (a, 48).]

**SILLYBUM** (Lat.). n. n. Si<sup>2</sup>l<sup>2</sup>i<sup>2</sup>l<sup>2</sup>(lu<sup>2</sup>)-bu<sup>2</sup>m(bu<sup>2</sup>m). A preferable form of *silybum* (q. v.).

**SILPHIUM** (Lat.). n. n. Si<sup>2</sup>l<sup>2</sup>i<sup>2</sup>f<sup>2</sup>(i<sup>2</sup>a<sup>2</sup>m<sup>2</sup>(u<sup>2</sup>m). Gr., σιλφίον (1st def.). Fr., *silphie*, *silphion*, s. 1. Of the ancients, an undetermined plant, perhaps *Thapsia glauca* or some allied species, producing a gum resin (also called s.) resembling galbanum and known as *cyreniacum* and *laser cyreniacum*. 2. Rosin-weed; a genus of the Compositae. The *Silphieae* are: Of Cassini, a subdivision of the *Corvaceae*; of Reichenbach, a division of the *Calendularieae*. [a. 35.]—S. *lacinatum*. Polar (or compass-, or rosin-, or turpentine-) plant; found in the western United States. It exudes an oleous resin that is used as a chewing-gum. [a. 35.]—S. *medicum*. (Gr. σιλφίον ἡλικίον. Of Dioscorides, see *ASAFETIDA*).—S. *terbinthaceum*. Fr., s. à feuilles en cœur, rhubarbe de la Louisiane. Prairie burdock, rhubarb of Louisiana; growing in the western and southern United States. It exudes a purgative resin, and the root is used like rhubarb. [a. 35.]

**SILPHOLOGY**, n. Si<sup>2</sup>l<sup>2</sup>i<sup>2</sup>f<sup>2</sup>(o<sup>2</sup>l<sup>2</sup>)i<sup>2</sup>. From σιλφίον, an insect, and λόγος, understanding. The morphology, etc., of larvae. [a. 48.]

**SILURIAN SPRING**, n. Si<sup>2</sup>l<sup>2</sup>i<sup>2</sup>-u<sup>2</sup>r<sup>2</sup>i<sup>2</sup>-p<sup>2</sup>-a<sup>2</sup>n. A mineral spring in Waukesha County, Wisconsin. [A. 363 (a, 21).]

**SILVAPLANA**, n. A place in the canton of the Grisons, Switzerland, where there is a sulphurous and chalybeate spring. [L. 57 (a, 14).]

**SILVATICUS** (Lat.), adj. Si<sup>2</sup>l<sup>2</sup>-va<sup>2</sup>t<sup>2</sup>(wa<sup>2</sup>t<sup>2</sup>)(i<sup>2</sup>l<sup>2</sup>-u<sup>2</sup>a<sup>2</sup>s). From *silva*, a wood. 1. Overgrown with wood (said of a region). 2. Growing in forests (said of plants). [a. 35.]

**SILVER**, n. Si<sup>2</sup>l<sup>2</sup>e<sup>2</sup>-u<sup>2</sup>r. Gr., ἀργυρος. Lat., *argentum*. Fr., *argent*. Ger., *Silber*. A metal occurring in nature both uncombined and in combination, in the latter case usually as a sulphide. It is soft, lustrous white, very tenacious, malleable, and ductile, melting at 1040° C. It is the best conductor of heat and electricity known. Although usually forming coherent solid masses, it may be obtained as a fine dark powder (*molecular s.*); and it is also found in the crystalline form. In compounds it acts as a univalent radicle. Sp. gr. 10.424 to 10.575; atomic weight, 107.66; symbol, Ag (from *argentum*). [B. 3.]—*Ammoniated s. chromate*. A substance, Ag<sub>2</sub>CrO<sub>4</sub> + NH<sub>3</sub>, made up of yellow crystals. [B. 3.]—*Ammoniated s. oxide*. Berthollet's fulminating s., a compound of uncertain composition, formed by the action of ammonia on s. oxide. It occurs either as a black powder or as black crystals of metallic aspect, violently explosive on the slightest disturbance. [B. 3.]—*Antimonial s.* See *S. antimonide*.—*Berthollet's fulminating s.* See *Ammoniated s. oxide*.—*Black s. oxide*. Argentic oxide obtained by precipitation and dried till it is black. [B. 159.]—*Black sulphureted s.* An old name for argenticite. [B. 159.]—*Brown s. oxide*. Freshly precipitated s. oxide which is still moist and brownish. [B. 159.]—*China s.*, *Chinese s.* See *ARGENTAN*.—*Crystals of s.* Vitriol of s. (see under *s. nitrate*). [B.]

—*Diluted nitrate of s.* See *ARGENTI nitras dilutus*.—*Fulminating s.* See *s. fulminate*.—*Fused s. nitrate*. Lat., *argenti nitras fusus* [U. S. Ph.], *nitras argenticus fusus*. Fr., *nitrate* (ou *azotate*) d'argent fondu. S. nitrate melted and cast into sticks. —*German s.* See *ARGENTAN*.—*Horn s.* S. chloride, native or obtained in a horny mass by fusion. [B. 3.]—*Magistry of s.* See *Magisterium argenti*.—*Mitigated s. nitrate*. See *ARGENTI nitras dilutus*.—*Molded nitrate of s.* See *ARGENTI nitras fusus*.—*Molecular s.* Metallic s. obtained as a fine dark-colored powder. [B. 3.]—*Mosaic s.* Lat., *argentum musivum*. Ger., *Musivsilber*. A compound of mercury, tin, and bismuth, used to imitate silver work. [A. 304.]—*Nickel s.* See *ARGENTAN*.—*Nitrated s.*, *Nitrate of s.*, *Nitric s.* See *s. nitrate*.—*Peru s.* See *ARGENTAN*.—*Purified s.* Lat., *argentum purification* (seu *purissimum*). See *ARGENT pur.*—*Salt of s.* Vitriol of s. (see under *s. nitrate*).—*S. acetamide*. The compound C<sub>2</sub>H<sub>3</sub>Ag.NO<sub>2</sub>. [B. 2.]—*S. acetate*. A body, C<sub>2</sub>H<sub>3</sub>AgO<sub>2</sub>, forming crystals which blacken on exposure to sunlight. [B. 3.]—*S. acetylde*. A compound, C<sub>2</sub>Ag + H<sub>2</sub>O, of s. and acetylene, forming a white or yellowish explosive powder. [B. 3.]—*S. aconitate*. The compound Ag<sub>2</sub>C<sub>2</sub>H<sub>3</sub>O<sub>6</sub>. [B. 2.]—*S. acrylate*. A body, C<sub>2</sub>H<sub>3</sub>AgO<sub>2</sub>, occurring as acicular or prismatic crystals. [B. 3.]—*S. adipate*. The salt C<sub>17</sub>H<sub>35</sub>AgO<sub>2</sub>. [B. 2.]—*S. allylide*. A substance, C<sub>3</sub>H<sub>3</sub>Ag, occurring as a white precipitate made up of microscopic acicular crystals, turning reddish yellow and afterward green with time, and exploding when heated to about 150° C. [B. 3.]—*S. alum*. See *ALUMINIUM* and *s. sulphate*.—*S. amalgam*. A compound of s. with mercury. It occurs native as a crystalline mineral, and may also be prepared artificially. Its composition is subject to considerable variations. [B. 3.]—*S. amidosulphonate*. A substance, NH<sub>2</sub>SO<sub>2</sub>OAg, forming hard, long, prismatic crystals, blackening on exposure to light. [E. Berglund, "Proc. of the Am. Pharm. Assoc.," 1879, p. 331 (B).]—*S. ammoniochloride*. A crystalline body, 2AgCl.NH<sub>3</sub>. [B. 3.]—*S. ammonionitrate*. A compound of s. nitrate with ammonia. Two are known: one forming prismatic crystals, AgNO<sub>2</sub>.2NH<sub>3</sub>; the other a white substance, AgNO<sub>3</sub>.3NH<sub>3</sub>. [B. 3.]—*S. and gold cyanide*. See *s. auricyanide*.—*S. and gold telluride*. Gratic tellurium; an ore of tellurium, AgAuTe<sub>2</sub>. [B. 3.]—*S. and hydrogen fulminate*. Hydric-argentic fulminate, a powder, ClAg—(NO<sub>2</sub>).CN = HAgC<sub>2</sub>N<sub>3</sub>O<sub>2</sub>. [B. 4.]—*S. and hydrogen sulphate*. Acid s. sulphate. [B. 3.]—*S. and potassium cyanide*. Lat., *argento-kalium cyanatum*. A substance, KAg(CN)<sub>2</sub>, or K<sub>2</sub>Ag<sub>2</sub>(C<sub>2</sub>N<sub>2</sub>)<sub>2</sub>, forming colorless tabular crystals soluble in water. Used in electroplating. [B.]—*S. and potassium fulminate*. Ger., *Kalium-silberfulminat*. A highly explosive crystalline body, (CN)<sub>2</sub>Ag.K—Ag.CN = KAgC<sub>2</sub>N<sub>3</sub>O<sub>2</sub>. [B. 4.]—*S. and sodium hyposulphite* (or *thiosulphate*). A crystalline substance, AgNaS<sub>2</sub>O<sub>3</sub>, of sweetish taste, soluble in water. [B. 3.]—*S. arachidate*. The compound AgC<sub>20</sub>H<sub>39</sub>O<sub>2</sub>. [B. 3.]—*S. arsenate*. A dark-brownish substance, Ag<sub>3</sub>AsO<sub>4</sub>. Dihydric s. arsenate, AgH<sub>2</sub>AsO<sub>4</sub>, is also known. [B. 2, 3.]—*S. arsenide*. A white, brittle, very hard, crystalline metallic button of the sp. gr. 8.51, obtained when s. arsenate is gently fused with potassium cyanide. ["Proc. of the Am. Pharm. Assoc.," xxxvii, p. 366 (a, 50).]—*S. arsenite*. A yellow powder, Ag<sub>2</sub>AsO<sub>3</sub>. Other s. arsenites are known: One, Ag<sub>2</sub>As<sub>2</sub>O<sub>5</sub>, is a yellow substance, and another, Ag<sub>2</sub>As<sub>2</sub>O<sub>6</sub>, is a white body; both turn black on exposure to the light. [B. 2.]—*S. arsenmethyrate*. A substance, Ag<sub>2</sub>AsCH<sub>3</sub>O<sub>2</sub>, of pearly lustre. [B. 3.]—*S. auricyanide*. A curdy mass, AgAu(CN)<sub>2</sub>. [B. 4.]—*S. aurothiocyanate*. Ger., *thiocyanaurures Goldoxydul-Silberoxyd*. A white precipitate, AuSCN. AgSCN, insoluble in water, soluble in ammonia, and blackening slowly when exposed to light. [B. 244 (a, 27).]—*S. bichromate*. See *s. dichromate*.—*S. bromate*. A white precipitate, AgBrO<sub>3</sub>, obtained by treating s. nitrate with potassium bromate. [B. 270 (a, 38).]—*S. bromide*. A substance, AgBr, occurring native, and also obtained by precipitating a soluble s. salt with hydrobromic acid; when thus obtained, it is a curdy, white substance, discoloring on exposure to light, and on fusion forming a coherent yellow mass. [B. 3.]—*S. caecodylate*. A substance, Ag<sub>2</sub>(CH<sub>2</sub>)<sub>2</sub>O<sub>2</sub>Ag. An acid s. caecodylate, Ag<sub>2</sub>(CH<sub>2</sub>)<sub>2</sub>O<sub>2</sub>Ag<sub>2</sub>Asi<sub>2</sub>(H<sub>2</sub>)<sub>2</sub>O<sub>2</sub>H, is also known. [B. 2; a. 38.]—*S. carbonate*. A light-yellow powder, Ag<sub>2</sub>CO<sub>3</sub>. [B. 3.]—*S. chlorate*. A body, AgClO<sub>3</sub>, forming white prismatic crystals. [B. 3.]—*S. chloride*. A substance, AgCl, occurring native in the crystalline state and also prepared artificially as a curdy, white mass or a powder which on fusion solidifies into a colorless, transparent, horny mass (horn s.). It is practically insoluble in water and darkens on exposure to light. [B.] See also *s. ammoniochloride* and *s. subchloride*.—*S. chlorite*. A crystalline powder, AgClO<sub>2</sub>. [B. 3.]—*S. chromate*. A red crystalline pigment, Ag<sub>2</sub>CrO<sub>4</sub>. [B. 3.]—*S. citrate*. A salt of s. and citric acid. *Normal s. citrate*, C<sub>6</sub>H<sub>5</sub>O<sub>7</sub>.Ag<sub>3</sub>, is a white powder, amorphous when first precipitated, but afterward becoming crystalline. *Argentous s. citrate*, 2C<sub>6</sub>H<sub>5</sub>O<sub>7</sub>.Ag<sub>2</sub> + H<sub>2</sub>O, is a brown powder. *Monacid s. citrate*, C<sub>6</sub>H<sub>5</sub>O<sub>7</sub>.Ag<sub>2</sub>, forms tabular crystals. [B. 3.]—*S. croconate*. An orange-red powder, C<sub>2</sub>Ag<sub>2</sub>O<sub>3</sub>. [B. 3.]—*S. cyanide*. A white, tasteless, and odorless powder, AgCN, which turns brown gradually when exposed to the light. [B. 5 (a, 38).]—*S. cyanurate*. The compound (C<sub>3</sub>N<sub>3</sub>)<sub>2</sub>OAg<sub>2</sub>. [B.]—*S. cyanuret*. See *s. cyanide*.—*S. dichromate*. A scarlet crystalline substance, Ag<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>. [B. 3.]—*S. dioxide*. See under *s. oxide*.—*S. dipropargyl s.*, *dipropynyl s.* A white amorphous substance, C<sub>4</sub>H<sub>3</sub>Ag<sub>2</sub> + 2H<sub>2</sub>O. [B. 3.]—*S. dithionate*. A crystalline salt, Ag<sub>2</sub>S<sub>2</sub>O<sub>8</sub>, not changing in the air. [B. 158 (a, 38).]—*S. ferricyanide*. A rust-brown powder, Ag<sub>2</sub>Fe(C<sub>2</sub>N<sub>3</sub>)<sub>2</sub>. [B.]—*S. ferrocyanide*. A white powder, Ag<sub>2</sub>Fe(C<sub>2</sub>N<sub>3</sub>)<sub>2</sub>. [B.]—*S. fluoride*. A highly deliquescent compound forming colorless pyramidal crystals, AgF + H<sub>2</sub>O, or transparent prismatic crystals, AgF + 2H<sub>2</sub>O. [B. 3.]—*S. foil*. Lat., *argentum foliatum* (Ger. Ph.). Ger., *Blattsilber*. Metallic s. in the form of thin leaves; used for coating pills. —*S. formate*. A white crystalline body, AgO.CHO. [B. 4.]—*S. fulminate*. Ger., *Knallsilber*. A highly explosive body, CAg<sub>2</sub>(NO<sub>2</sub>)<sub>2</sub>. CN = AgC<sub>2</sub>N<sub>3</sub>O<sub>2</sub>, forming white acicular crystals. [B. 4.]—*S. hypochlorite*. An unstable substance, AgClO. [B. 3.]—*S. hyposul-*

**phite.** See *S. thiosulphate*.—**S. hypovanadate.** A black crystalline powder,  $\text{Ag}_2\text{VO}_3$ . [B. 3.]—**S. iodate.** The compound  $\text{AgIO}_3$ . [B. 270 (a. 38).]—**S. iodide.** Lat., *argenti iodidum* [U. S. Ph.]. A substance,  $\text{AgI}$ , found native as a mineral, and also obtainable artificially both in prismatic crystals and as an amorphous yellow powder. It fuses to a soft yellow mass. [B. 3.]—**S. isocyanide.** See *S. cyanide*.—**S. isovalerate.** See *S. valerianate*.—**S. leaf.** See *S. foil*.—**S. marcasite.** See Bismuth.—**S. meconate.** 1. *Normals meconate*,  $\text{C}_7\text{H}_7\text{AgO}_7$ , a snow-white body. 2. *Basic s. meconate*,  $\text{C}_7\text{H}_7\text{AgO}_7$ , a yellow substance. [B. 3.]—**S. metaperiodate.** The compound  $\text{AgIO}_4$ . [B. 159 (a. 38).]—**S. metaphosphates.** Compounds of the structure ( $\text{AgPO}_3$ ), occurring as gelatinous white precipitates. [B. 270 (a. 38).]—**S. metavanadate.** A yellow substance,  $\text{AgVO}_3$ . [B. 3.]—**S. monoxide.** See under *S. oxide*.—**S. nitrate.** Lat., *argenti nitratis* [U. S. Ph., Br. Ph.], *argentum nitricum* [Ger. Ph.], *nitratis argenticus* [Fr. Cod.]. A substance,  $\text{AgNO}_3$ , formed by the action of dilute nitric acid on metallic s. When deposited from its solution in nitric acid, it forms transparent rhombic crystals, crystallized s. nitrate, vitriol of s., the *argenti nitrus* (q. v.) of the U. S. Ph. It fuses at  $198^\circ\text{C}$ , and solidifies into a white, compact, crystalline mass, fused or molded s. nitrate, the *argenti nitrus* (q. v.) of the Br. Ph. It is soluble in less than half its weight of water, has a caustic metallic taste, and exerts a caustic action on organic substance by coagulating their albumin. [B. 3.]—**S. nitrite.** A substance,  $\text{AgNO}_2$ , forming either a white crystalline powder or acicular or prismatic crystals. [B. 3.]—**S. nitroacetoneitrile.** See *S. fulminate*.—**S. opianate.** A substance, ( $\text{C}_{10}\text{H}_7\text{O}_5$ ) $\text{Ag}_2 + \text{H}_2\text{O}$ , occurring as short prismatic crystals which turn yellow easily. [B. 3 (a. 38).]—**S. oxalate.** A white amorphous mass,  $\text{Ag}_2\text{C}_2\text{O}_4$ , which explodes on heating. [B. 3 (a. 38); B. 4.]—**S. oxalurate.**  $\text{C}_7\text{H}_7\text{AgN}_3\text{O}_8$ , forming silky crystals. [B. 4.]—**S. oxide.** Lat., *argenti oxidum* [U. S. Ph.]. There are three s. oxides: (1) *argentic oxide*, s. *hemioxide*, or s. *monoxide*, usually called simply s. oxide,  $\text{Ag}_2\text{O}$ , a dark-brownish or bluish-black powder, almost insoluble in water; (2) s. *dioxide* or s. *peroxide*,  $\text{Ag}_2\text{O}_2$ , obtainable as a black crystalline powder or as an amorphous substance; and (3) *argentic oxide* or s. *tetrantoxide*,  $\text{Ag}_4\text{O}$ , a black powder capable of taking on a metallic lustre. [B. 3.]—**S. paracyanide.** A substance,  $\text{Ag}_2(\text{C}_2\text{N}_2)$ , obtained as a white mass of metallic appearance on heating s. cyanide for a long time. [B. 3.]—**S. periodate.** The compound  $\text{AgIO}_4(\text{Ag}_2\text{O})_2$ . [B. 159 (a. 38).]—**S. permanganate.** A crystalline substance,  $\text{AgMnO}_4$ . [B. 3.]—**S. peroxide.** See under *S. oxide*.—**S. phosphate.** A yellow substance,  $\text{Ag}_3\text{PO}_4$ . This is the *normal s. phosphate* or s. *orthophosphate*. *Monohydric s. phosphate*, or *acid s. phosphate*,  $\text{AgH}_2\text{PO}_4$ , is a white crystalline substance. *S. pyrophosphate*,  $\text{Ag}_2\text{P}_2\text{O}_7$ , is also a white substance. A *dihydric pyrophosphate*,  $\text{Ag}_2\text{H}_2\text{P}_2\text{O}_7$ , is known as a crystalline substance. [B. 3.]—**S. phosphide.** A substance of variable composition, obtained as a dark gray mass by adding phosphorus to molten s., or by fusing argentic phosphate with charcoal. [B. 159 (a. 38).]—**S. photochloride.** S. chloride which has been turned dark by exposure to light. [L.]—**S. platinochloride.** A flesh-colored mass,  $\text{AgPtCl}_4$ . [B. 3.]—**S. platinonitrite.** A substance,  $\text{Ag}_2\text{Pt}(\text{NO}_2)_4$ , forming yellow prismatic crystals. [B. 3.]—**S. protoxide.** S. monoxide. [B. 3.]—**S. purpate.** 1. *Normal s. purpate*,  $\text{C}_8\text{H}_7\text{N}_5\text{O}_7\text{Ag}_2$ , a brownish powder. 2. *Acid s. purpate*,  $\text{C}_8\text{H}_7\text{N}_5\text{O}_7\text{Ag} + 1\frac{1}{2}\text{H}_2\text{O}$ , is a purplish powder. [B. 3.]—**S. pyrophosphate.** See under *S. phosphate*.—**S. pyrotartrate.** A substance,  $\text{C}_8\text{H}_7\text{O}_7\text{Ag}_2$ , occurring as a shiny precipitate and crystallizing from ammonia as needles. [B. 3 (a. 38).]—**S. pyrovanadate.** A yellow powder,  $\text{AgVO}_7$ . [B. 3.]—**S. quinate.** A substance,  $\text{C}_8\text{H}_{11}\text{O}_8\text{Ag}$ , occurring as warty crystals which turn black on exposure to the light. [B. 3 (a. 38).]—**S. rhodizionate.** A purple salt,  $\text{C}_8\text{H}_7\text{AgO}_8$ . [B. 3.]—**S. salicylate.** A substance,  $\text{AgC}_7\text{H}_5\text{O}_3$ , occurring as shining, transparent, acicular crystals. [B. 3 (a. 38).]—**S. subchloride.** A black powder to which the different formulae  $\text{Ag}_2\text{Cl}$ ,  $\text{AgCl}_2$ , and  $\text{Ag}_3\text{Cl}_3$  have been assigned. It is formed by the action of hydrochloric acid on s. tetratoxide. [B. 3.]—**S. sulphantimonate.** See *S. thioantimonate*.—**S. sulpharsenate.** See *S. thioarsenate*.—**S. sulphate.** A body,  $\text{Ag}_2\text{SO}_4$ , forming rhombic crystals soluble with difficulty in water. *Acid s. sulphate*, or *hydrosulphate*,  $\text{AgHSO}_4$ , forms yellow prismatic crystals. [B. 3.]—**S. sulphide.** A substance,  $\text{Ag}_2\text{S}$ , of a color varying from yellow to brownish-black, occurring native and also obtainable artificially. [B. 3.]—**S. sulphite.** The compound  $\text{Ag}_2\text{SO}_3$ . [B. 3.]—**S. sulphocyanate.** See *S. thiocyanate*.—**S. telluride.** White tellurium; an ore of tellurium,  $\text{Ag}_2\text{Te}$ . [B. 3.]—**S. tetratoxide.** See under *S. oxide*.—**S. thioantimonate.** The salt  $\text{Ag}_3\text{SbS}_4$ . [B. 3.]—**S. thioarsenate.** A compound of s. sulphur and arsenic which is brown when first formed, but changes to black on drying. [B. 2.]—**S. thioarsenite.** Several s. thioarsenites are known: one, a black substance,  $\text{Ag}_4\text{As}_2\text{S}_5$ ; another, a yellow substance,  $6\text{Ag}_2\text{S} \cdot \text{As}_2\text{S}_5$ . [B. 2.]—**S. thiocyanate.** A substance,  $\text{AgSCN}$ , forming a white cheesy precipitate. [B. 3.]—**S. thiosulphate.** A white powder,  $\text{Ag}_2\text{S}_2\text{O}_3$ , of sweetish taste. [B. 3.]—**S. tree.** S. amalgam obtained in branching arborescent crystals by pouring mercury into a solution of s. nitrate. [B. 3.]—**S. trimetaphosphate.** A crystalline substance,  $\text{Ag}_3\text{O}_{10}\text{H}_2\text{P}_3 = \text{P}_3\text{O}_8(\text{AgO})_3 + \text{H}_2\text{O}$ . [B. 159 (a. 38).]—**S. valerianate.** A substance,  $\text{Ag}(\text{O.C}_6\text{H}_7\text{O})$ , occurring as laminar crystals. [B. 4.]—**S. vanadate.** Ordinary s. vanadate, or s. *orthovanadate*, is a dark orange-red substance,  $\text{Ag}_3\text{VO}_4$ . [B. 3.] See also *S. metavanadate* and *S. pyrovanadate*.—**S. weed.** The genus *Argyrea* and the *Potentilla anserina*. [a. 35.]—**Solution of ammonio-nitrate of s.**—**Solution of nitrate of s.** [Lond. Ph. (1836).] See *Liquor argenti nitratis*.—**Standard s.** An alloy of s. and copper, containing a proportion of s. fixed by law—92.5 per cent. in England, 90 per cent. in France, Germany, and Austria, for coin s. [B. 158, 159 (a. 38).]—**Test solution of ammonio-nitrate of s.** A solution formed by dropping ammonia water into the test solution of s. nitrate until the precipitate is almost dissolved again, and filtering [U. S. Ph.]; or by mixing

1 part of crystallized s. nitrate and 2 parts of ammonia water with water enough to make 40 [Br. Ph.]. [B. 81 (a. 38).]—**Test solution of nitrate of s.** [U. S. Ph.]. A solution of s. nitrate in 20 parts of water. [B. 81 (a. 38).]—**Test solution of sulphate of s.** [U. S. Ph.]. A solution of s. sulphate in 250 parts of water. [B. 81 (a. 38).] Cf. *Sulphas argenti liquidus*.—**Vitriol of s.** 1. See under *S. nitrate*. 2. See *S. sulphate*.—**Volumetric solution of nitrate of s.** [U. S. Ph., Br. Ph.]. Lat., *liquor argenti nitratis volumetricus* [Ger. Ph.]. A solution of 16.97 grammes of dry crystallized s. nitrate or pure fused s. nitrate in water enough to make 1 litre. [B. 81 (a. 38).]

**SILVER**, v. tr.  $\text{Si}^2\text{lv}^{\text{u}^6}\text{r}$ . Fr., *argenter*. Ger., *versilbern*. To cover with a thin layer of silver or of mercury and tin. [B. 3.]

**SILVER SPRING**, n.  $\text{Si}^2\text{lv}^{\text{u}^6}\text{r}$ . A place in Marion County, Florida, where there is a mineral spring. [A. 383 (a. 21).]

**SILVESTRIS** (Lat.), adj.  $\text{Si}^2\text{lv}^{\text{e}^8}\text{s}(\text{w}^{\text{e}^2}\text{s})/\text{tri}^2\text{s}$ . From *silva*, a wood. Written also *sylvestris*. Lit., of or belonging to a wood, growing in woods; hence growing or running wild (applied to certain skin diseases to indicate the erratic or rapidly spreading character of the eruption).

**SILYBUM** (Lat.), n. n.  $\text{Si}^2\text{lv}^{\text{u}^6}\text{b}(\text{u}^6\text{b})-\text{u}^2\text{m}(\text{u}^4\text{m})$ . Preferably written *silybium*. From  $\sigma\iota\lambda\lambda\upsilon\beta\omicron\varsigma$ , a kind of thistle. Fr., *silybe*. Ger., *Mariendistel*. A genus of the *Compositae*. The *Silybeae* are a division of the *Carduineae*. [a. 35.]—**S. maculatum**, *S. marianum*. Fr., *chardon-Marie*, *épine blanche*, *lait de Sainte-Marie*, *chardon argenté* (ou *Notre-Dame*). Ger., *Marien-* (oder *Frauen-*, oder *Silber-*) *Distel*. Blessed (or holy, or milk-, or Our Lady's) thistle, the  $\sigma\iota\lambda\lambda\upsilon\beta\omicron\varsigma$  of Dioscorides; an herb indigenous to southern Europe, northern Africa, and western Asia. The root, leaves, and fruits, *radix*, *herba*, et *semen cardui* (*Marie*, seu *mariani*, seu *maculati*, seu *lactei*, seu *vulgaris*), were formerly used as tonics and sudorifics. The oily, mucilaginous fruit has been recommended in hemorrhages and in amenorrhœa. [a. 35.]

**SIMABA** (Lat.), n. f.  $\text{Si}^2\text{m}^{\text{a}^3}\text{b}(\text{a}^3)/\text{ba}^3$ . Fr., s. A tropical genus of the *Simarubaceae*. [a. 35.]—**S. cedron**. Fr., *cédrón*. A tree of Central America. The seed (*Lat.*, *semen simabae* (seu *cedronis*); Fr., *cédrón* [Fr. Cod.]; Ger., *Cedronsamen*), which contains cedrin, is used in snake-bites, rabies, and intermittent fever. [a. 35.]—**S. ferruginea**, *S. floribunda*, *S. guianensis*, *S. suaveolens*. Four species (the third indigenous to Guiana, the others to Brazil) the root and bark of which contain quassin and are tonic, stomachic, and febrifuge. [a. 35.]

**SIMAROUBA** (Fr.), n.  $\text{Si}^2\text{m}^{\text{a}^3}\text{r}-\text{ub}^{\text{a}^3}$ . 1. See *SIMARUBA*. 2. Of the Fr. Cod., see *SIMARUBA guianensis*.—**Poudre de s.** [Fr. Cod.]. A preparation made by drying cortex *simarubae* at  $40^\circ\text{C}$ , powdering, and sifting through a No. 140 silk sieve. [B. 95 (a. 38).]—**S. (écorce de la racine)** [Fr. Cod.]. See *Cortex SIMARUBAE*.—**Tisane de s.** [Fr. Cod.]. A preparation made by macerating 5 parts of cortex *simarubae* with 1,000 of water and straining. [B. 95, 119 (a. 38).]

**SIMARUBA** (Lat.), n. f.  $\text{Si}^2\text{m}^{\text{a}^3}\text{r}-\text{u}^2\text{b}(\text{ub})/\text{a}^3$ . Fr., s., *simaroube*. Ger., *Simarube*. 1. Bitter-wood; a genus of the *Simarubaceae*, which are: Of Richard, an order of polyptaloid dicotyledons; of Baillon, the series *Quassieae* of the *Rutaceae*; of Benthham and Hooker, an order of the *Geraniales* including the *Simarubae* and the *Picramnieae*. 2. Of the U. S. Ph., 1870, s.-bark. [a. 35.]—**Cortex radialis simarubae verae**. See *S.-bark*.—**Cortex simarubae**. Fr., *simaruba*, (*écorce de la racine*) [Fr. Cod.]. Sp. s. (*corteza de la raíz* [Sp. Ph.]). 1. The bark of *S. amara*, imported from Jamaica [Fr. Cod.], of *S. officinalis*, imported from Guiana (Belg. Ph., Gr. Ph., Sp. Ph.), or of both [Pruss. Ph., Nederl. Ph.]. 2. See *S.-bark*. [B. 95 (a. 38).]—**Infusum simarubae**. See *Tisane de SIMARUBA*.—**S. amara**. 1. Bitter damson; of Aublet, *S. guianensis*. 2. Of Hayne, a Jamaica forest tree identified by most botanists with *S. guianensis*. [a. 35.]—**S.-bark**. Lat., *cortex (quassia) simarubae*, *cortex radialis simarubae verae*, s. [U. S. Ph., 1870]. Fr., *écorce de simarouba*. Ger., *S.-rinde*, *Ruhrrinde*. The bark of *S. guianensis* and *S. amara* (2d def.). It was formerly in repute as an antisyphilitic, but is now regarded as a simple bitter only. [a. 35.]—**S. cortex** (Belg. Ph., Nederl. Ph.), *Simarubae cortex* [Br. Ph.]. See *Cortex simarubae*.—**S. guianensis**, *S. vera*. Fr., *bois amer* (ou *cayan*), *simarouba* [Fr. Cod.]. Ger., *ächte Simarube*. A Guiana tree yielding s.-bark. Its wood, *lignum simarubae verae*, is very bitter, though it is said to be without tonic properties. [a. 35.]—**S. versicolor**. Ger., *schillernde* (oder *verschiedenfarbige*) *Simarube*. A tree growing in Brazil. The bark (Lat., *cortex paraiba*) and leaves are used externally for snake-bites, syphilitic rashes, and phtheiriases, and internally as an anthelmintic. The bark is also used like s.-bark. [a. 35.]

**SIMILAR**, adj.  $\text{Si}^2\text{m}^{\text{u}^1}\text{p}^1\text{a}^3\text{r}$ . Gr.,  $\delta\iota\mu\omicron\varsigma$ . Lat., *similis*. Fr., *similaire*. Ger., *gleichartig*. 1. Of two or more parts, alike in form or structure. 2. Of a single organ or part, presenting the same appearance over its entire surface, or homogeneous as to its internal structure. [a. 35.]

**SIMMON'S SPRINGS**, n.  $\text{Si}^2\text{m}^{\text{u}^1}\text{m}^{\text{u}^2}\text{z}$ . A place in Colusa County, California, where there are hot sulphurous springs. [Anderson (a. 14).]

**SIMONEA** (Lat.), n. f.  $\text{Si}^2\text{m}^{\text{u}^1}\text{m}^{\text{u}^2}\text{e}^2\text{a}^3$ . A genus of acarids.—**S. folliculorum**. See *DEMODEX folliculorum*.

**SIMPLE**, adj.  $\text{Si}^2\text{m}^{\text{u}^1}\text{p}^1\text{l}$ . Lat., *simplex*. Fr., s. Ger., *einfach*. 1. Consisting of but one piece, series, etc.; uncomplicated (see *S. FRACTURE*). 2. Defective in intellect. 3. As a n., in the pl., s's, medicinal plants. [a. 35.]

**SIMULATION**, n.  $\text{Si}^2\text{m}^{\text{u}^1}\text{a}^3/\text{shu}^2\text{n}$ . Lat., *simulatio* (from *simulare*, to simulate). Fr., s. Ger., *Vorgeben*, *S.* 1. Malingering. [a. 48.] 2. See *MIMICRY*.

**SÍMULO** (Sp.), n. *Sem*-ul-o. The fruit of a Peruvian species of *Capparis*, usually (but erroneously, according to Baillon) identified with *Capparis coriacea*; used in Peru in epilepsy, hysteria, etc.

["N. Y. Med. Jour.," June 27, 1885, p. 736; B, 121 (a, 35).] Cf. MELO-CHARA.

**SINA** (Lat.), n. f. Sin(sen)/a<sup>2</sup>. See CINA.

**SINALBIN**, n. Si<sup>2</sup>n-a<sup>2</sup>l/bi<sup>2</sup>n. A substance, C<sub>30</sub>H<sub>44</sub>N<sub>2</sub>S<sub>2</sub>O<sub>6</sub>, found in white mustard-seed, occurring as small nearly acicular crystals. [B, 3 (a, 38).]

**SINAMINE**, n. Si<sup>2</sup>n/a<sup>2</sup>m-en. See ALLYLcyanamide.

**SINAPELEUM** (Lat.), n. n. Si<sup>2</sup>n-a<sup>2</sup>p(a<sup>2</sup>p)-e<sup>2</sup>l-e(a<sup>2</sup>e<sup>2</sup>)-u<sup>2</sup>m-(u<sup>2</sup>m). From *sinapis*, mustard, and *elaion*, oil. See MUSTARD-oil.

**SINAPIC ACID**, n. Si<sup>2</sup>n-a<sup>2</sup>p/i<sup>2</sup>k. Fr., *acide sinapique*. Ger., *Sinapinsäure*. A monobasic acid, C<sub>11</sub>H<sub>12</sub>O<sub>6</sub>, obtained by the action of caustic potassa or of baryta water on sinapine, and forming yellowish transparent crystals, which melt at 192° C.; probably butylene-gallie acid, C<sub>7</sub>H<sub>6</sub>C<sub>4</sub>H<sub>5</sub>(OH)<sub>3</sub>O<sub>2</sub>. [B.]

**SINAPINE**, n. Si<sup>2</sup>n/a<sup>2</sup>p-en. Fr., s. Ger., *Sinapin*. A very deliquescent alkaloid, C<sub>14</sub>H<sub>23</sub>NO<sub>5</sub>, obtained from white mustard-seed. [B, 3 (a, 38).]

**SINAPIS** (Lat.), n. f. Si<sup>2</sup>n-a<sup>2</sup>p(i<sup>2</sup>s). Gen., -ap/eos(-ap/i)s. From *sinapis*, mustard. Fr., *moutarde*, *sénévé*. Ger., *Senf*. 1. A genus of cruciferous plants (the mustards) included by Bentham and Hooker in *Brassica*. The *Sinapiceae* are a section of the *Brassicaceae*. 2. Flour of mustard; of the Br. Ph. black and white mustard seeds powdered and mixed. [a, 35.]—**ETHEROLEUM** s. See MUSTARD-oil (1st def.).—**CATAPLASMA** s. Fr., *sinapisme*. Ger., *Senfteig*. Sp., *cataplasma de mostaza* [Sp. Ph.]. A plaster made by triturating together a mixture of 2½ oz. of mustard powder with 2 to 3 fl. oz. of lukewarm water and a mixture of 2½ oz. of flaxseed meal with 6 to 8 fl. oz. of boiling water [Br. Ph.]; or by mixing 1 part of black mustard powder with an equal amount [Ger. Ph., Dan. Ph.] (the necessary amount [Sp. Ph.], 1 part [Finn. Ph., Swed. Ph.]) of cold water, or with the necessary amount of tepid [Fr. Cod.] lukewarm [Russ. Ph.] water. The Gr. Ph. directs the addition of 1 part of rye meal and the necessary amount of vinegar. [B, 95, 119 (a, 38).]—**CHARTA cum pulvere** s. [Fr. Cod.]. **Charta s.** [U. S. Ph., Br. Ph., Belg. Ph.]. Fr., *sinapismes en feuilles* [Fr. Cod.]. Sp., *papel sinápico* [Sp. Ph.]. A plaster containing mustard deprived of its oil, made by extracting the mustard in No. 60 powder by percolation with benzene, drying the residue and spreading upon stiff, well-sized paper by means of an 8- to 10-per-cent. solution of gutta percha in chloroform, so that each square inch of paper receives about 6 grains of mustard [U. S. Ph.]; or by stirring mustard powder into an 8- to 10-per-cent. solution of gutta percha in chloroform, and laying cartridge-paper on the mixture so as to make a thin layer on one side of the paper [Br. Ph.]. The Fr. Cod. orders a solution of 4 or 5 parts of caoutchouc in 100 of a mixture of carbon disulphide and petroleum benzene with which to fix the mustard on paper. The Sp. Ph. orders the use of a solution of caoutchouc, the Belg. Ph. a solution of gutta percha in carbon disulphide only. [B, 95 (a, 38).]—**ESSENTIA** s. [Belg. Ph.]. See MUSTARD-oil (1st def.).—**FARINA** s. See S. (2d def.).—**FARINA s. alba** [Belg. Ph.]. White mustard-seed dried at a gentle heat and reduced to a medium fine powder. [B, 95 (a, 38).]—**FARINA s. nigra** [Belg. Ph.]. Black mustard-seed prepared like *farina s. alba*. [B, 95 (a, 38).]—**LINIMENTUM s. compositum**. A liniment of 2 parts of alcoholic extract of mezereum, 6 of camphor, 15 of castor-oil, 3 of mustard-oil, and

SINAPIS ALBA. [A, 327.]

alcohol enough to make 100 parts [U. S. Ph.]; or of 40 grains of ethereal extract of mezereum, 120 of camphor, 5 fluidrachms of castor-oil, 1 fluidrachm of mustard-oil, and 4 fl. oz. of alcohol [Br. Ph.]. [B, 5, 95 (a, 38).]—**OLEUM aetherium sinapeos nigrae**, **OLEUM s. aetherium**, **oleum volatile**. See MUSTARD-oil (1st def.).—**PULVIS** s. See Powder of MUSTARD.—**SEMINA sinapeos** (sem s.). See S. nigra (2d def.).—**SEMINA s. alba** (2d def.).—**SEMINA s. nigra**. See S. nigra (2d def.).—**SEMINA s. pulveratum**. Fr., *poudre de moutarde noire* [Fr. Cod.]. Black mustard dried at about 40° C., powdered or ground, and sifted through a No. 25 sieve [Fr. Cod.] (a 30-mesh sieve [Russ. Ph.], a 100-mesh sieve [Swed. Ph.]). [B, 95 (a, 38).]—**SEMINA s. nigrae**, **Sinapeos semen**. See S. nigra (2d def.).—**S. alba**. Fr., *moutarde blanche* [Fr. Cod.], *sénévé blanc* (ou anglais), *semence de moutarde blanche* (2d def.). Ger., *weisser* (oder *gelber*, oder *en-*

*glischer*) *Senf* (oder *Senfsamen* [2d def.]). 1. White (or salad) mustard (plant), charlock; a species indigenous probably to the more southern parts of Europe and to western Asia. The yellowish seeds, larger than black-mustard seeds and having a testa which contains a mucilaginous substance, have a composition like that of black mustard, but in place of sinigrin contain sinalbin, which in presence of water is acted on by the myrosin (in which they are richer than black mustard-seed) and splits up into acrinyl sulphocyanate, sinapine sulphate, and sugar. Hence white mustard yields no volatile oil. It is, however, a powerful rubefacient, and is usually employed in the form of the flower mixed with that of black mustard. 2. Of the U. S. Ph., the seed of *S. alba* (1st def.). [a, 35.]—**S. arvensis**. Fr., *moutarde sauvage* (ou *des champs*), *jottes*, *navette des sévins*, *rosse*, *russe*, *sauve*, *sendre*. Ger., *Ackersenf*, *Feldsenf*, *falscher Hederich*. Corn (or wild) mustard, charlock, field (or wild) kale, kedlock, kerlock; a European weed naturalized in the United States. The large black seeds, formerly official as *semen rapistris arvorum*, are pungent and diuretic. [a, 35.]—**S. glauca**. A species cultivated in the East Indies for the rubefacient oil derived from the seeds, which are used like black mustard-seed. The leaves are eaten. [a, 35.]—**S. juncea**. See *BRASSICA juncea*.—**S. nigra**. Fr., *moutarde noire* [Fr. Cod.], *semence de moutarde* [Fr. Cod.] (2d def.). Ger., *Senfkohl* (1st def.), *schwarzer Senf* (oder *Senfsamen* [2d def.]). Sp., *mostaza* [Mex. Ph.] (2d def.). 1. Black (or brown, or red) mustard (plant), the *váru* of Theophrastus and *sinapis* of Dioscorides; an herb growing spontaneously over a large part of the Old World and naturalized now in both North and South America. It bears numerous smooth, erect pods containing spherical or slightly oval, minutely pitted, blackish-brown or reddish-brown, pungent seeds. These seeds, the *s. nigra* of the U. S. Ph., or black mustard, contain cellulose, sulphur, nitrogen, albuminoids, etc., and over 20 per cent. of a greenish-yellow fixed oil consisting of the glycerin compounds of stearic, oleic, and erucic acids. They also yield by distillation with water mustard-oil (2d def.), which does not, however, pre-exist in the seeds, but is developed by the action of water on two peculiar compounds, sinigrin and myrosin, the latter, an albuminoid ferment, splitting up the sinigrin into the essential oil, a potassium salt, and sugar. Black mustard is chiefly used as a rubefacient in sinapisms. The flour is often used as an emetic, especially in narcotic poisoning. The volatile oil is also a powerful rubefacient. It has been used internally in colic, but in overdoses is a dangerous poison. 2. Of the U. S. Ph. black (or brown, or red) mustard (seed), the seeds of *S. nigra*. [a, 35.]—**S. nigra semina**, **S. (semina)**. See *S. nigra* (2d def.).—**SPIRITUS** s. Ger., *Senfspiritus*. Sp., *alcohol de mostaza* [Sp. Ph.]. A clear, colorless solution of 2 parts of mustard-oil in 98 of alcohol of sp. gr. 0.832 [Ger. Ph., Finn. Ph., Swed. Ph., Swiss Ph.] (80-per-cent. alcohol [Belg. Ph.]), or in 48 [Russ. Ph.] (100 [Aust. Ph., Hung. Ph., Roum. Ph., Sp. Ph.]) of 90-per-cent. alcohol. [a, 38.]

**SINAPISCOPI**, n. Si<sup>2</sup>n-a<sup>2</sup>p-i<sup>2</sup>s/ko<sup>2</sup>p-i<sup>2</sup>. From *sinapis* (q. v.), and *scopiv*, to examine. A test of sensory disturbances by applying mustard; analogous to metalloscopy. [A, 319 (a, 34).]

**SINAPISM**, n. Si<sup>2</sup>n-a<sup>2</sup>p-i<sup>2</sup>zm. Gr., *sinapiakós* (from *sinapis*, mustard). Lat., *sinapismus*. See CATAPLASMA SINAPIS.

**SINAPISME** [Fr. Cod.] (Fr.). Sen-a<sup>2</sup>p-es-m'. See CATAPLASMA SINAPIS.—**S. animé**. A plaster of 15 parts of mustard with 15 of yeast, 5 of pepper, and enough vinegar; or with 3½ of black pepper, 30 each of yeast and horseradish, and enough strong vinegar; or with 15 each of rue and common salt, 30 of bruised onions, 7 each of yeast and black soap, and enough vinegar; or of 115 of mustard, 48 of yeast, 4 of sal ammoniac, 14 of rue, and enough vinegar. [B, 119 (a, 38).]—**S. cantharidé**. See *Cantharidal CATAPLASM*.—**S's en feuilles**. See *Charta SINAPIS*.

**SINAPOLEIC ACID**, n. Si<sup>2</sup>n-a<sup>2</sup>p-o-le/i<sup>2</sup>k. An acid, C<sub>22</sub>H<sub>32</sub>O<sub>6</sub>, occurring in small quantities in the fixed oil of mustard. [B, 5.]

**SINAPOLINE**, n. Si<sup>2</sup>n-a<sup>2</sup>p/o<sup>2</sup>l-en. A substance, C<sub>20</sub>H<sub>30</sub>O<sub>6</sub> = C<sub>7</sub>H<sub>12</sub>N<sub>2</sub>O, occurring as colorless laminar crystals having a soap-like lustre. [B, 3, 93 (a, 14, 38).]

**SINKALIN**, n. Si<sup>2</sup>n<sup>2</sup>k-a<sup>2</sup>l-en. Ger., *Sinkalin*. See CHOLINE.

**SINICUT**, n. Si<sup>2</sup>n/si<sup>2</sup>p-u<sup>2</sup>t. From *semi*, half, and *caput*, the head. Fr., s. Ger., *Vorderkopf*. The portion of the head anterior to its elevated portion or vertex. [L.]

**SINDON** (Lat.), n. f. Si<sup>2</sup>nd/o<sup>2</sup>n(on). Gen., -sind'onos (-is). A small round pledget to be introduced into the cranial opening made by a trephine. [A, 301 (a, 34).]

**SINEW**, n. Si<sup>2</sup>n/u<sup>2</sup>. See TENDON.

**SINGULTUS** (Lat.), n. m. Si<sup>2</sup>n<sup>2</sup>gu<sup>2</sup>lt(gu<sup>2</sup>lt)/u<sup>2</sup>s(u<sup>2</sup>s). Gen., -gul'tus. 1. A sob; sobbing or gasping. [D.] 2. Hicough. In medicine the word is nearly always restricted to this use. [D.]

**SINIGRIN**, n. Si<sup>2</sup>n/i<sup>2</sup>g-ri<sup>2</sup>n. Potassium myronate. [B.]

**SINISTRAD**, adv. Si<sup>2</sup>n/i<sup>2</sup>st ra<sup>2</sup>d. From *sinister*, left. In the direction of or toward the left side or aspect. [L, 141.]

**SINISTRAL**, adj. Si<sup>2</sup>n/i<sup>2</sup>st-r'l. Lat., *sinister*. 1. On the left side. 2. Left-handed (said of the direction of the spiral in certain shells). [B, 28 (a, 27).]

**SINISTRIN**, n. Si<sup>2</sup>n/i<sup>2</sup>st-rin. Ger., *Sinistrin*. A substance, C<sub>6</sub>H<sub>10</sub>O<sub>3</sub>, obtained from *Urginea seilla*; resembling dextrin except that it is levorotary. [B, 3 (a, 38).]

**SINISTROSE**, adj. Si<sup>2</sup>n/i<sup>2</sup>st-tro<sup>2</sup>s. Lat., *sinistrorsus* (from *sinister*, left, and *vertere*, to turn). Fr., s. Turned toward the left hand (said of the twining of a stem or of the overlapping of leaves in aestivation). [a, 35.]

**SINKALIN** (Ger.), n. Zi<sup>2</sup>n<sup>2</sup>k-a<sup>2</sup>l-en'. See CHOLINE.

**SINN** (Ger.), n. Zi<sup>2</sup>n. See SENSE.—**Drucks'**. See Pressure SENSE.—**Muskels'**. See Muscular SENSE.—**Orts'**. See SENSE of locality.—**Schwachs'**. See DÉMENCE simple.—**S'sechecher**. See Epidermiat'ae.—**S'blatt** [Remak]. The epiblast.—**S'seepithel**.

See NEURO-EPITHELIUM.—*S'esepithellen*. See *Sensory CELLS*.—*S'esorgane*. Organs of special sense. [L, 31].—*S'esreiz*. A sense stimulant. [A, 521].—*S'estäuschung*. See HALLUCINATION.

**SINNAMINE**, n.  $\text{Si}^{\text{n}}\text{a}^{\text{m}}\text{-en}$ . Ger., *Sinnamin*. The compound  $\text{C}_2\text{H}_6(\text{C}_2\text{H}_5)_2\text{H}_3$ . [B, 4.]

**SINNLICH** (Ger.), adj.  $\text{Zi}^{\text{n}}\text{a}^{\text{m}}\text{ch}^{\text{2}}$ . Pertaining to the senses; sensual. [a, 14.]

**SINTOC**, **SINTUK**, n's.  $\text{Si}^{\text{n}}\text{a}^{\text{m}}\text{2k}$ ,  $\text{-tu}^{\text{2k}}$ . Fr., *sintoque*. Ger., *Sintok*. In Java and Amboyna, the *Cinnamomum* s. [a, 35.]

**SINUATE**, adj.  $\text{Si}^{\text{n}}\text{u}^{\text{2}}\text{-at}$ . Lat., *sinuatus* (from *sinuare*, to curve). Fr., *sinué*. Ger., *buchtig*. Of the margins of leaves and other flattened organs, winding in and out, decidedly wavy. [a, 35.]

**SINUOUS**, adj.  $\text{Si}^{\text{n}}\text{u}^{\text{2}}\text{-u}^{\text{s}}$ . Lat., *sinuosus* (from *sinus* [q. v.]). Fr., *sinueux*. Ger., *grobwüchsig* (2d def.), *vollwüchsig* (2d def.). 1. Following a winding course. 2. Having deep (or many) sinuses. 3. Sinuate. [a, 35.]

**SINUS** (Lat.), n. m.  $\text{Sin}(\text{si}^{\text{n}}\text{u}^{\text{s}}/\text{u}^{\text{s}}\text{t})$ . Gen., *sin/us*. Gr., *κόλπος*. Fr., s., *clavier* (4th def.). Ger., *Höhle*, *Bucht*, *Hohlgeschwür* (4th def.). 1. A cavity having a relatively narrow opening or entrance. 2. A large venous canal into which several smaller veins empty, especially such a venous channel formed by the dura of the brain. 3. The bosom. 4. A long narrow pathological canal communicating with an abscess or a diseased tract. [E.] 5. A recess in the margin of a plant organ, especially when such margin is highly wavy. [a, 35.].—**Aortic s.** See *S's of Valsalva*.—**Air s'es**. Air-containing cavities within bones, especially those communicating with the nasal passages. [L.]—**Basilar s.** See *Transverse s.*—**Cavernous s.** Fr., *gouttière caverneuse*. Ger., *Zellblutleiter*. A large s. extending from the sphenoidal fissure to the apex of the petrous portion of the temporal bone, communicating behind with the inferior and superior petrosal s'es, and receiving the ophthalmic vein in front. [L, 31, 342, 332].—**Circular s.** A venous s. surrounding the pituitary body, communicating on each side with the cavernous s. [L, 142, 172].—**Circular s. of the placenta**. Fr., s. *coronaire du placenta*. Ger., *ringförmiger S. der Placenta*. A plexus of veins in the maternal portion of the placenta in communication with utero-placental s'es.—**Clinoid s.** See *Circular s.*—**Confluence of the s'es**. See *TORCULAR HEROPHILI*.—**Coronary s. of the heart**. A vein in the transverse groove between the left auricle and ventricle of the heart on its posterior aspect: by some regarded as a dilatation of the great cardiac vein or a s. into which it opens. [L, 31, 332].—**Cranial s'es**. Ger., *Blutleiter der harten Hirnhaut*. Venous channels between the folds of the dura, lined with a continuation of the tunica interna of the veins. [L.]—**Ethmoidal s'es**. See *ETHMOIDAL CELLS*.—**Frontal s.** Ger., *Stirnhöhle*. An irregular cavity in the frontal bone, underlying the prominence at the root of the nose and over the superior orbital margin, extending upward and outward between the two tables of the bone, separated from its fellow of the opposite side by a thin septum, and communicating with the nose by the infundibulum. [F.]—**Galactophorous s.** See *AMPULLA DUCTUS LACTIFERI*.—**Genital s.** See *CLEFT of the vulva*.—**Genito-urinary s.** See *UROGENITAL S.*—**Great s. of the aorta**. Fr., *grand s. aortique*. A dilatation generally found on the right side of the ascending portion of the aorta. [C.]—**Inferior intercavernous s.** The lower of the two veins sometimes replacing the single s. intercavernous anterior. [L.]—**Inferior longitudinal s.** Ger., *unterer Sichelblutleiter*. A venous s. which extends along the posterior half of the lower border of the falx cerebri and terminates in the straight s. near the anterior margin of the tentorium. [C.]—**Inferior petrosal s.** Lat., s. *petrosus inferior*. Ger., *unterer Felsenblutleiter*. A large venous s. arising from the cavernous s., running along the lower margin of the petrous portion of the temporal bone, and joining with the lateral s. to form the internal jugular vein. [L.]—**Intercavernous s'es**. The anterior and posterior halves of the circular s.—**Internal s.** See *STRAIGHT s.*—**Kreisförmiger S.** (Ger.). See *Circular s.*—**Lacrimal s.** Lat., s. *lacrimalis*. A small pouch formed by a fold of skin at the inner angle of the eye in the deer and some other quadrupeds. It can be opened or shut at will, has no connection with the lacrymal passages, and contains a gland which secretes a viscid substance resembling the cerumen of the ear. [A, 251 (B), 7.]—**Lactaeal s.** See *AMPULLA DUCTUS LACTIFERI*.—**Lateral s.** Ger., *Hinterhauptblutleiter*. A venous s. which begins at the torcular Herophili and runs horizontally on the inner surface of the occipital bone to the base of the petrous portion of the temporal bone, where it unites with the inferior petrosal s. to form the internal jugular vein. [L.]—**Lymph s'es**. Small spaces scattered throughout the parenchyma of a lymphatic gland, between the pulp of the gland and the trabeculae or dilatactions of the lymphatic vessels. [C.]—**Marginal s.** A variety of the occipital s. opening into the transverse s. [L.]—**Marginal s. of the placenta**. See *Circular s. of the placenta*. [L.]—**Mastoid s'es**. See *Mastoid CELLS*.—**Maxillary s.** See *MAXILLARY ANTRUM*.—**Occipital s.** Ger., *Hinterhauptblutleiter*. A small venous s. in the attached margin of the falx cerebri opening into the torcular Herophili. [L, 31.] See *Lateral s.*—**Petitis s. aortiques** (Fr.). See *S'es of Valsalva*.—**Petro-squamous s.** A venous s. running along the petro-squamous suture and opening into the transverse s.; believed to be a relic of a foetal communication with the internal jugular vein. [L, 332].—**Pharyngo-laryngeal s.** See *Fossa laryngopharyngea*.—**Pilo-nidal s.** See *FOVEOLA COCCYGEA*.—**Placental s'es**. See *UTERO-PLACENTAL S'es*.—**Posterior basilar s.** See *Occipital s.*—**Posterior ethmoidal s'es**. See *Posterior ETHMOIDAL CELLS*.—**Posterior occipital s.** See *Occipital s.*—**Prostatic s.** See *UTERUS MASULINUS*.—**Pulmonary s.** See *S. pulmonalis*.—**Pyramidal s. of the larynx**. See *Fossa laryngopharyngea*.—**Rands der Placenta** (Ger.). See *Circular s. of the placenta*.—**Rhomboidal s.** **Rhomboid s.** 1. A dilatation in the sacral region of the central canal of the spinal cord of birds. [L.] 2. See *FOURTH VENTRICLE*.—**Ridley's s.** See *Circular s.*—**Ring-**

**förmiger S.** (oder **Rings**) **der Placenta** (Ger.). See *Circular s. of the placenta*.—**S. acusticus internus**. See *Internal auditory CANAL*.—**S. ad radicem linguae** [Morgagni]. See *FORAMEN CAECUM of the tongue*.—**S. alae parvae**. See *SPHENO-PARIETAL s.*—**S. amplus ureteris**. The pelvis of the kidney. [L, 349.]—**S. ampullaceus**. See *AMPULLA OSSEA*.—**S. anterior**. See S. of the kidney and hilum of the kidney.—S. reuniens. See MEATUS VENOSUS.—S. rhomboidalis. See Fourth ventricle.—S. rhomboidalis lumbalis. The expansion of the central canal of the spinal cord near the lumbar enlargement. [I, 17 (K).]—S. rhomboideus. See Fourth ventricle.—S. Ridleyi. See Circular s.—S. septi (lucidi). See Fifth ventricle.—S. sagittalis inferior (seu minor). See Inferior longitudinal s.—S. sagittalis superior. See Superior longitudinal s.—S. secundus. See Superior petrosal s.—S. semiovalis. See RECESSUS HEMIELLIPTICUS.—S. septimus. Of Guidi, the superior longitudinal s. [I, 3 (K).]—S. sigmoides. See Lateral s.—S. speculi. See Fifth ventricle.—S. sphenoparietalis. See Sphenoparietal s.—S. squamopetrosus. See Petrosquamosus s.—S. subarachnoidalis. See Subarachnoid space.—S. sulciformis. See Fossula sulciformis.—S. sulciformis Morgagni. See ADITUS ad aqueductum Sylvii.—S. tarsi. See S. pedis.—S. tentorii. See Straight s.—S. tentorii lateralis (seu posterior). See Lateral s.—S. tentorii medius (seu posterior). See Straight s.—S. terminalis. Ger., *Randvene, Grenzgefäß*. A vein that encircles the vascular area of the blastoderm and empties either by one trunk, the anterior vitelline vein, into the left vitelline vein or by two trunks into both vitelline veins. [A, 8.]—S. tertius. See Third ventricle.—S. torculariens (Fr.). S'es which open into the torcular Herophili. [L.]—S. transversus. See Transverse s.—S. transversus pericardii. An opening connecting the prolongation of the pericardium which covers the pulmonary artery and aorta with that covering the auricles. [L. 31, 332.]—S. triangularis. See Superior longitudinal s.—S. tentorii lateralis. See Superior petrosal s.—S. tentorii medius. See Straight s.—S. triangularis. See Superior longitudinal s.—S. tuberculi (ossis metacarp). A depression upon the external surface of a metacarpal bone just above its distal articular surface. [L. 31.]—S. tympani. See Sulcus tympani.—S. urino-genitalis. S. urogenitalis. See Uro-genital s.—S. uterinus (Fr.). See Uterine s'es.—S. Valsalva. See S'es of Valsalva.—S. vena coronaria (magna propria). See Coronary s. of the heart.—S. vena jugularis. See S. of the jugular vein.—S. vena portae. See S. of the portal vein.—S. venarum cavarum. Ger., *Hohlvenen*. The right auricle of the heart. [L.]—S. venosi durae matris. See Cranial s'es.—S. venosus. See Venous s.—S. venosus anterior. See Vena mediana medullae spinalis anterior.—S. venosus cordis. See ATRIUM (4th def.).—S. venosus corneae. See CANAL of Schlemm.—S. venosus Hovii. A ring-like anastomosis of the vena vorticosa. [L. 332.]—S. venosus iridis. See CANAL of Schlemm.—S. vesicae urinariae. See RECESSUS vesicae urinariae.—Sphenoidal s'es. Air s'es which occupy the body of the sphenoid bone and connect with the nasal cavity. [L.]—Sphenoparietal s. 1. A vein uniting the cavernous s. and a meningeal vein. 2. The portion of the cavernous s. below the ensiform process. [L. 31, 332.]—Straight s. Lat., *s. tentorii*. Ger., *gerader Bluteiter*. A s. which is continuous with the inferior longitudinal s. and, running along the junction of the falx cerebri and tentorium, is continuous with the lateral s. [C.]—Superior longitudinal s. Lat., *s. falciformis superior* (seu triangularis). Fr., *s. médian supérieur*. A triangular canal which runs along the upper edge of the falx cerebri, beginning in front at the crista galli and terminating at the torcular Herophili. It is received into a median groove in the frontal, parietal, and occipital bones. [I, 15.]—Superior petrosal s. Ger., *oberer Felsenbluteiter*. A venous canal running in a groove in the petrous portion of the temporal bone, extending from the posterior part of the cavernous s. to the laterals, on the mastoid portion of the temporal bone. [C.]—Terminal s. 1. See S. terminalis. 2. Of Todd, s-like spaces near the hilum of a lymph gland. [L. 57 (a, 50).]—Transverse s. Ger., *Querbluteiter*. 1. A s. uniting the inferior petrosal s'es. 2. A venous network in the dura over the basilar process of the occipital bone. It opens into the inferior petrosal s'es and the anterior spinal veins. [C.]—Urino-genital s., Urogenital s. 1. The canal or duct into which, in the embryo, the Wolffian ducts and bladder empty and which opens into the cloaca. 2. In comparative anatomy, the common receptacle of the genital and urinary ducts. [L.]—Uterine s'es. The veins of the uterus when in a

state of dilatation due to enlargement of the organ, as in pregnancy.—Utero-placental s'es. Slanting venous channels which issue from the placenta at its uterine surface by piercing the decidua serotina, and serve to convey the maternal blood from the intervillous lacunae back into the uterine veins. [A, 5.]—Valvular s'es. See S'es of Valsalva.—Venous s. A s. conveying venous blood. [L.] See also MEATUS VENOSUS.—Vertebral s'es. Veins within the bodies of the vertebrae. [L.]

SINZIG (Ger.), n. Zi<sup>nts</sup>ig. A place in the Rhine Province, Prussia, where there is a ferruginous spring. [a, 14.]

SIPANEA (Lat.), n. f. Si<sup>2</sup>p-an(a<sup>2</sup>n)/e<sup>2</sup>a<sup>2</sup>. Fr., *sipanée*. A genus of the Rubiaceae. [L, 35.]—S. pratensis. Fr., *sipanée des prés*. An astringent herb of tropical America. [a, 35.]

SIPARUNA (Lat.), n. f. Si<sup>2</sup>p(sep)-a<sup>2</sup>r-un'a<sup>2</sup>. Fr., *s. a*. A genus of the Monimiaceae, consisting of tropical American plants which secrete an oily substance of a citron-like odor. [a, 35.]—S. alternifolia. An aromatic vulnary species growing in Brazil. [a, 14.]—S. thea. A vulnary species growing in Brazil, where the leaves are used as tea. [a, 35.]

SIPERINE, n. Si<sup>2</sup>p'er-en. See SEPIRINE.

SIPHILIS (Lat.), n. f. Si<sup>2</sup>p/i<sup>2</sup>l-i<sup>2</sup>s. Gen., -i<sup>2</sup>/i<sup>2</sup>dis. See SYPHILIS.

SIPHITA (Lat.), n. f. Si<sup>2</sup>p/i<sup>2</sup>t-a<sup>2</sup>. Somnambulism. [L, 50 (a, 14).]—S. prava. Of Paracelsus, chorea.—S. stricta. See SOMNAMBULISM.

SIPHO (Lat.), n. m. Si<sup>2</sup>(sef)/o. Gen., -on/i<sup>2</sup>s (-is). Gr., σίφων. See SYRINGE and SIPHON.

SIPHON (Lat.), n. m. Si<sup>2</sup>(sef)/o<sup>2</sup>n(on). Gen., -on/i<sup>2</sup>s (-is). Gr., σίφων. 1. A bent tube by means of which a continuous flow of liquid can be maintained so long as the outlet of the s. is below the level of the surface of the body of liquid from which the stream is drawn, although part of the s. rises above that surface. [a, 48.] 2. In molluscs, a tube, usually retractile, through which water is inhaled and exhaled. [L, 147.]—S. de Faucher (Fr.). See Stomach-pump.

SIPHONOMA (Lat.), n. n. Si<sup>2</sup>(sef)/o<sup>2</sup>n(on)-om/a<sup>2</sup>. Written also *siphonoma*. Gen., -om/at<sup>2</sup>s (-atis). From σίφων, a tube. Fr., *tumeur tubuleuse*. Ger., *Siphonom*. Of Henle, a soft fibroid tumor composed of small parallel or crossed tubes having a diameter varying from 0.007 to 0.07 mm. Probably heteradenia. [A, 301 (a, 34).]

SIPHOPHEROTH, n. Of the Talmudists, a leaden tube containing a rod of wood armed with lint. The instrument was introduced into the vagina in cases of hæmorrhage, and if the lint became saturated with blood the urine rather than vaginal origin of the bleeding was indicated. ('Nouv. arch. d'obstét. et de gyn.' Mar., 1888; "Répertoire," p. 124 (a, 34).)

SIPHUNCULUS (Lat.), n. m. Si<sup>2</sup>(sef)/u<sup>2</sup>n<sup>2</sup>k(u<sup>2</sup>n<sup>2</sup>k)/u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From σίφων, a tube. See SYRINGE.

SIRADAN (Fr.), n. Ser-a<sup>2</sup>-da<sup>2</sup>n<sup>2</sup>. A place in the department of the Hautes-Pyrénées, France, where there is a sulphurous spring. [L, 49, 57 (a, 14).]

SIRENIA (Lat.), n. n. pl. Si<sup>2</sup>r(ser)-en(an)/i<sup>2</sup>a<sup>2</sup>. From σιρήνη, a siren. An aquatic order of the Mammalia, comprising the dugongs and manatees. [B, 28 (a, 27).]

SIRENOMELUS (Lat.), n. n. Si<sup>2</sup>r(ser)-e<sup>2</sup>n(an)-o<sup>2</sup>m'e<sup>2</sup>l-u<sup>2</sup>s(u<sup>2</sup>s). From σιρήνη, a siren, and μέλος, a limb. Fr., *sirénomèle*. Of G. St.-Hilaire, a monster having a single rudimentary lower limb, tapering to a footless stump or a tail-like point. [L, 41, 44 (a, 14).]

SIRIASIS (Lat.), n. f. Si<sup>2</sup>r(ser)-i<sup>2</sup>(i<sup>2</sup>)/a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s. Gen., -as/eos (-is). From σιρήνη, to be hot. Fr., *siriase, coup-de-soleil*. See INSOLATION (2d def.).

SIRLOIN, n. Su<sup>2</sup>r/loin. Fr., *aloyau*. Ger., *Rückenstück*. In animals, especially cattle, the muscular mass on either side of the vertebral column between the pelvis and the ribs. [L.]

SIRO (Lat.), n. m. Si<sup>2</sup>r(ser)/o. Gen., -on/i<sup>2</sup>s. Fr., *ciron*. 1. An old term for an animal parasite of man or of the lower animals; also for certain nematoid parasitic worms, for *Sarcoptes scabiei*, etc. 2. An accumulation of sebum in the sebaceous follicles of the skin (see COMEDO). [G.]

SIROCROCIS (Lat.), n. f. Si<sup>2</sup>r(ser)-o<sup>2</sup>k/ro<sup>2</sup>s(ro<sup>2</sup>k)-i<sup>2</sup>s. Gen., -croci/i<sup>2</sup>s. A genus of filamentous *Algae*. [B, 38 (a, 14).]—S. stibica, S. tartarica. An alga found in aqueous solutions of tartar emetic and in solutions of tartaric acid or the tartrates. [B, 98.]

SIRONABAD (Ger.), n. Zer-on'a<sup>2</sup>-ba<sup>2</sup>d. A place in Hesse, Germany, where there is a sulphurous spring. [L, 30, 40 (a, 14).]

SIROP (Fr.), n. Se-ro. See SYRUP and SYRUPS; in the pl., s's, of the Fr. Cod., see SYRUP (2d def.).—S. acétique, S. acéto-ligne. See SYRUPS ACIDI ACETICI.—S. amygdalin. A preparation of several old formulæ closely resembling the syrupus amygdalæ of the U. S. Ph. [B, 119 (a, 38).]—S. anodin. See SYRUPS ANODYNI.—S. antiscorbutique. See SYRUPS ARMORACIÆ COMPOSITUS.—S. antiscorbutique de Portul. See SYRUPS ANTISCORBUTICI.—S. antiphlogistique de Sauvages. A syrup made by macerating for two days 1,500 parts of sarsaparilla, 1,000 each of sassafras, guaiac, and china-root, and 500 of yellow china in 90,000 of water, boiling, and evaporating to one third, expressing, repeating the process twice by adding the same quantity of water to the residue, mixing the three liquids, adding 5,000 parts of molasses, boiling till thick, straining, evaporating, immersing in the product a bag containing 42 parts of anise and 250 of borage-flowers, and expressing its contents when the syrup has cooled. [B, 119 (a, 38).]—S. apéritif. See S. des cinq racines.—S. apéritif acétoex. An old preparation practically identical with the syrupus foeniculi compositus of the Belg. Ph., with vinegar substituted for the acetic acid. [B, 119 (a, 38).]—S. apéritif composé. See SYRUPS APERIENTIS COMPOSITUS and SYRUPS APERIENTIS Pechii.—

**S. aromatique.** See *Syrupus ARTEMISIAE compositus*.—**S. balsamique.** See *Syrupus toluianus*.—**S. balsamique composé.** A syrup made by boiling 6 parts each of Florentine iris, licorice, and galbanum, and 3 each of mastic, oilbalm, benzoin, and storax in enough white wine to make 108 parts, and adding 216 of sugar and 3 of tincture of balsam of Peru. [B, 119 (a, 38).]—**S. cyanique.** A mixture of hydrocyanic acid and syrup containing from 26 to 48 milligrammes of anhydrous acid to 30 grammes of syrup. [B, 119 (a, 38).]—**S. de Cuisinier.** See *Syrupus Sarsaparillae compositus*.—**S. de Desessarts.** See *Syrupus IPECACUANHAE compositus*.—**S. de Fernel.** A preparation made by expressing a mixture of 3 parts each of comfrey and red rose and 1 part each of *Pimpinella saxifraga*, *Betonica officinalis*, colt's-foot, plantain, *Polygonum aviculare*, and *Scabiosa arvensis*, adding to the evaporated juice twice its weight of sugar, and boiling. [B, 119 (a, 38).]—**S. dépuratif.** See *Syrupus Sarsaparillae compositus*.—**S. des chantres.** See *S. d'ERYSIMUM composé*.—**S. de Stevens.** A syrup made by boiling 393 parts each of sarsaparilla and guaiac with 4,730 of water for an hour, expressing, boiling the residue with 4,730 of water for two hours, adding 31 each of red-rose petals, gum arabic, and senna-leaves and 15 of ginger, straining, and adding 1,035 parts each of clarified honey and sugar. [B, 119 (a, 38).]—**S. de suc d'herbes.** See *S. laxatif d'Amussat*.—**S. diurétique.** See *Syrupus de quinque RADICIBUS*.—**S. émétique d'Ange Sala.** A syrup made by macerating 30 parts of powdered glass of antimony, 7 each of cinnamon, zedoary, and angelica-seeds, 15 of red saunders, and 2 of Oriental saffron with 600 of vinegar of rose, for twenty-four hours, straining, filtering, and adding 600 of white sugar. [B, 119 (a, 38).]—**S. émétique vineux.** See *Syrupus emeticus*.—**S. émulsif.** See *S. amygdalin*.—**S. expectorant.** A syrup made by exhausting by maceration 120 parts of ipecac, 240 of cinchona, and 5 of opium with 5,040 of water, adding 6,480 of sugar, and evaporating to the proper consistence. [B, 119 (a, 38).]—**S. Gilbert.** A preparation consisting of 1 part of red mercury iodide and 34 parts of potassium iodide dissolved in 60 of water and mixed with 1,530 by volume (about 2,000 by weight) of syrup. A tablespoonful of this mixture contains about  $\frac{1}{2}$  grain of the red mercury iodide. [B, 5.]—**S. laxatif d'Amussat.** A preparation made by bruising 100 grammes each of rasped guaiacum wood, chicory-root, burdock-root, waterdock-root, patience-root (a name applied to several species of *Rumex*), fumitory tops, and tops of *Viola tricolor arvensis* (*pensée sauvage*), and 500 grammes of senna-leaves, infusing for twelve hours with 5 kilogrammes of boiling water, straining, making a second infusion with 3 kilogrammes of water, straining with expression, filtering the colatures through paper, and making with 3 kilogrammes each of honey and sugar a syrup, which is also to be filtered through paper and should be of the density of 31° Baumé. [Lyon méd., June 4, 1882, p. 167.]—**S. mercuriel.** See *Syrupus HYDRARGYRI*.—**S. pectoral.** A syrup made by infusing 4 handfuls of Mexican goosefoot, 2 each of hedge mustard and nettle, and 1 handful of colt's-foot in 360 grammes of boiling water and 180 of the juice of winter rape, and adding 720 of sugar. [B, 119 (a, 38).]—**S. pectoral de Chréten.** See *Syrupus pectoralis comitis Christiani*.—**S. scélotyrbique de Forest.** A syrup made by boiling 6 parts each of the juice of cress and of brook-lime and 3 each of the juice of fumitory and of hops with 16 of sugar and adding 2 of water of cress. [B, 119 (a, 38).]—**S. simple.** See *Syrupus*.—**S. sudorifique.** 1. Of the Fr. Cod., see *Syrupus Sarsaparillae compositus*. 2. A preparation made by boiling 250 grammes each of sarsaparilla, guaiac, soapwort, sassafras, and china-root, and adding 6,000 of syrup. [B, 119 (a, 38).]—**S. thébaïque.** See *Syrupus opiatu*.—**S. tonique d'Eaton.** See *Syrupus FERRI phosphorici cum chinino et strychnino*.—**S. vitriolique.** See *Syrupus ACIDI SULPHURICI*.

**SIRSEN** (Ar.), n. See PHENITIS.

**SIRUP**, n.  $Si^2r'u^2p$ . See SYRUP.

**SIRUPUS** (Lat.), n. m.  $Si^2r'u^2p(u^4p)-u^2s(u^4s)$ . See SYRUPUS.

**SISON** (Lat.), n. m.  $Sis(sis)^2(o^n)(on)$ . Gr.,  $\sigma\acute{\iota}\sigma\omega\nu$  (2d def.). Gen.,  $-on/os$  (a). Fr., *perce-pierre*. Ger., *Steinperlestein*, S. (1st def.). 1. A genus of the Umbelliferae hardly differing from *Carum*. 2. Of Dioscorides, *S. amomum*. [a, 35.]—**S. ammi.** See *HELOSICIADIUM lateriflorum*.—**S. amomum.** Fr., *s. amome*, (*faux*) *amome*, *per-sil de rochers*. Ger., *gewürzhaftes S.* Hedge honewort, stoneparsley, the  $\sigma\acute{\iota}\sigma\omega\nu$  of Dioscorides; an herb of southern and middle Europe, with mildly aromatic leaves, and a root which tastes like celery. The aromatic fruits (*semen amomi vulgaris* [seu *sisonis amomi*]; Fr., *amome faux*) are excitant and carminative, and were formerly used as a diuretic. [a, 35.]

**SISTRUM** (Lat.), n. n.  $Si^2st(sect)^2(ru^4m)(ru^4m)$ . Gr.,  $\sigma\acute{\iota}\sigma\tau\rho\upsilon\nu$ . Fr., *sistre*. See ACUS (4th def.) and AMUSSUS.

**SISYMBRIUM** (Lat.), n. n.  $Si^2s(sis)^2(u^4m)(u^4m)$  ( $br^2i^2-u^4m(u^4m)$ ). Gr.,  $\sigma\acute{\iota}\sigma\upsilon\mu\beta\rho\iota\upsilon\nu$ . Fr., *sismyre* (2d def.), *cresson* (2d def.). Ger., *Rauke* (2d def.). 1. An old name for various wild mints. 2. A genus of the *Sisymbreae* (De Candolle), *Sisymbrideae* (Lindley), or *Sisymbrieae* (Richard), which are a tribe of the *Cruciferae* comprising *Hesperia*, *Erysimum*, etc. 3. See *S. sophia*.—**S. alliarica.** Fr., *herbe des aulx*, *Julienne-alliaire*. Ger., *Knoblauchsauke*, *Knoblauchkraut*, *Büchelkraut*, *Germfelfkraut*. Garlic-mustard (or -wort), (stinking) hedge mustard; a European species. The herb, which when bruised emits a strong odor of garlic, and was formerly official as *herba alliarica* (seu *alliastris*, seu *erysimi alliaricae*), was used as an anthelmintic, diuretic, and depurative. The seed, *semen alliaricae*, etc., is diuretic, diaphoretic, and expectorant. The root yields a volatile oil analogous to mustard-oil. [a, 35.]—**S. irio.** Fr., *cresson irio*. A European species. The leaves are pectoral and antiscorbutic, but are rarely used. [a, 35.]—**S. iris.** A plant the oily seeds of which, imported from Persia, are considered stimulant and restorative. [Proc. of the Am. Pharm. Assoc., xxvi, p. 163 (a, 50).]—**S. officinale.** Fr., *herbe aux chantes*, *moutarde des haies*, *velar*, *tortelle*. Ger., *gebräuchliche Rauke*, *wilder Senf*, *Wegsenf*, *gelbes Eisenkraut*, *Hederich*. Bark-cress, scrambling rocket, hedge

mustard; a weed growing in Europe, northern Africa, western Asia, and North America. The herb, formerly official as *herba erysimi* (seu *irionis*, seu *rapistri*, seu *rhaphanistri*, seu *sinapis agrestis*, seu *verbena faeminae*), has, when fresh, a somewhat ammoniacal odor, and was considered diuretic and expectorant. Its juice and the seed, *semen erysimi*, etc., are still used in coughs, sore throat, etc. [a, 35.]—**S. polycerastrum.** Fr., *cresson à stiques nombreuses*. The  $\epsilon\pi\alpha\upsilon\sigma\tau\epsilon\upsilon\sigma$  of Dioscorides; a diuretic European species formerly used in cystitis. [a, 35.]—**S. sophia.** Fr., *cresson sophia*, *moutarde de chien*, *sogesse des chirurgiens*, *thalictroton*. Ger., *feinblättrige Rauke*, *Sophienkraut*, *grosses Besenkraut*, *Wurm-kraut*, *Wellkraut*. Flaxweed, flaxweed; found throughout Europe and along the St. Lawrence River. The pungent herb and seeds, *herba et semen sophia*, were formerly official. The herb was used as an aperient, diaphoretic, diuretic, and antisyphilitic, and externally and internally in wounds, indolent ulcers, etc., and the seed as an anthelmintic and antilithic. [a, 35.]—**Syrupus sisymbril.** See *Syrupus ERYSIMI*.

**SISYRINCHIUM** (Lat.), n. n.  $Si^2s-i^2(u^6)-ri^2n^2k(ri^2n^2ch^2)/i^2-u^4m(u^4m)$ . Gr.,  $\sigma\acute{\iota}\sigma\upsilon\rho\iota\chi\acute{\iota}\omega\nu$  (1st def.). Fr., *s.* 1. Of Theophrastus, a kind of iris. [A, 311 (a, 48).] 2. Pig-root, rush-lily, satin-flower; a genus of the *Sisyrinchieae*, which are a tribe of the *Irideae*. [a, 35.]—**S. galaxoides.** A Brazilian species with a mildly purgative root. [a, 35.]

**SITE**, n. Sit. Lat., *situs*. See SITUATION.—**Placental s.** Fr., *point placentaire*. Ger., *Placentaritus*. The area of the inner surface of the uterine wall to which the placenta is attached.

**SITI**, n. The Fijian name for *Grewia prunifolia*; used to produce abortion. [Glasgow Med. Jour., Jan., 1889, p. 1 (a, 34).]

**SITIOLOGY**, n.  $Si^2t-i^2-o^2(u^4)-o^2-j^2$ . Lat., *sitiologia* (from *sitio*, food, and *lógos*, understanding). Fr., *sitiologie*. See DIETETICS.

**SITIOPHOBIA** (Lat.), n. f.  $Si^2t(sect)-i(i^2)-o(o^3)-fob(fo^2b)/i^2-a^2$ . From *sitio*, food, and  $\phi\acute{o}\beta\omicron\varsigma$ , fear. Fr., *sitiophobie*. Ger., *Sitiophobie*. Dread of or repugnance to taking food (as in certain forms of insanity). [D.]

**SITKA**, n.  $Si^2t/ka^2$ . A place in Alaska near which there are two thermal springs. [A, 363 (a, 21).]

**SITOMANIA** (Lat.), n. f.  $Si^2t(sect)-o(o^3)-man(ma^2n)/i^2-a^2$ . From *sitio*, food, and *mania*, madness. Ger., *Nahrungsscheu* (2d def.). 1. A morbid or insane aversion or refusal to partake of food. [Chipley, "Am. Jour. of Insan.," 1859, p. 1 (a, 34).] 2. A periodical mania in which there is bulimia. [Adams, "Lancet," Jan. 23, 1892, p. 225 (a, 34).]

**SITOPHOBIA** (Lat.), n. f.  $Si^2t(sect)-o(o^3)-fob(fo^2b)/i^2-a^2$ . See SITIOPHOBIA.

**SITUATION**, n.  $Si^2t-u^2-a^2-shu^2n$ . Gr.,  $\theta\acute{\epsilon}\sigma\iota\varsigma$ . Lat., *situs*. Fr., *s.* Ger., *Stelle*. Locality. See remarks under POSITION.

**SITUS** (Lat.), n.  $Si^2t(u^4t)/u^4s(u^4s)$ . See SITUATION and POSITION.—**S. alienus.** An abnormal position of a part or organ. [a, 34.]—**S. capitis obliquus et iniquus.** Of Roederer, any other position of the foetal head, at the time of its engagement in the pelvis, than the *s. capitis rectus et æquus* (q. v.). [A, 24.]—**S. capitis rectus et æquus.** Of Roederer, that position of the foetal head in which, as taught by Levret, it was supposed to engage at the superior strait of the pelvis with the sagittal suture coinciding with the conjugate diameter. [A, 24.]—**S. fetus.** See POSITION of the *fœtus*.—**S. in dentes.** Of Moschion, a face presentation. [A, 24.]—**S. inversus (viscerum).** See TRANSPPOSITION of the viscera.—**S. perversus.** See *S. alienus*.—**S. transversus viscerum.** See TRANSPPOSITION of the viscera.

**SITZ** (Ger.), n.  $Zi^2ts$ . A seat; the nates.—**Haupts der Empfindung.** See SENSORIUM.

**SITZBECKEN** (Ger.), n.  $Zi^2ts/be^2k-e^2n$ . Fr., *bassin de la position assise*. Of Schröder, that variety of the rhahtic pelvis in which, owing to the child's failure to stand erect at the usual age, the pressure of the thigh bones is not brought to bear upon the pelvis, which consequently becomes contracted antero-posteriorly and enlarged transversely. [A, 15.]

**SITZBEIN** (Ger.), n.  $Zi^2ts/bin$ . See ISCHIUM.

**SITZBEINAST** (Ger.), n.  $Zi^2ts/bin-a^2st$ . A ramus of the ischium.—**Absteigender S.** See DESCENDING RAMUS of the ischium.—**Aufsteigender S.** See ASCENDING RAMUS of the ischium.

**SIUM** (Lat.), n. n.  $Si(sis)^2(u^4m)(u^4m)$ . Gr.,  $\sigma\acute{\iota}\omega\nu$  (1st def.). Fr., *berle* (2d def.). Ger., *Merk* (2d def.), *Berle* (2d def.). 1. Of the ancients, the *S. latifolium*. 2. Water-parsnip; a genus of the Umbelliferae. 3. Of Fuchs, the *Veronica beccabunga*. [a, 35.]—**Herba sil.** The herb of *Berula angustifolia*. [a, 35.]—**S. angustifolium.** See *BERULA angustifolia*.—**S. apium.** See *APIUM graveolens*.—**S. carvi.** See *CARUM carvi*.—**S. graveolens.** See *APIUM graveolens*.—**S. latifolium.** Fr., *berle à larges feuilles*, *ache d'eau*. Ger., *breitblättriger Merk*, *Wassermark*, *Wasserpastinak*, *Brannenpeterlein*, *Wassereppig*, *Berle*. Broad-leaved water-parsnip, probably the  $\sigma\acute{\iota}\omega\nu$  of Dioscorides; an acid, strong-smelling aquatic species growing throughout Europe and in the United States, especially in the valleys of the Pacific slope. The root and herb, formerly official as *radix et herba sii palustris* (seu *pastinaca aquatica*), are diuretic and cathartic. The root is highly poisonous, mania and even death having followed its use. Its active principle is apparently a resinous substance. [a, 35.]—**S. ninsil.** Fr., *berte de la Chine*, *ninzin*. The *ninsi* of Japan and China. Its root, formerly official as *radix ninsi* (seu *ninsi*, seu *ninsi*, seu *ninsing*, seu *ninzin*, seu *ninzini*), is used as an excitant, like that of *Pimpinella sisarum*, of which it is probably only a variety. [a, 35.]—**S. nodiflorum.** 1. See *BERULA angustifolia*. 2. An old name for *Helosciadium nodiflorum*. [a, 35.]—**S. palustre.** See *S. latifolium*.—**S. sisarum.** See *PIMPINELLA sisarum*.—**S. vulgare.** See *ÆGOPODIUM podagrario* and *NASTURTIUM officinale*.

**SIZY**, adj.  $Siz^2i^2$ . Viscous; glutinous. [a, 48.]

**SKAGG'S HOT SPRINGS**, n. Ska<sup>2</sup>gz. A place in Sonoma County, California, where there are hot alkaline, saline, and gaseous springs. [Anderson (a, 14).]

**SKALPELL** (Ger.), n. Ska<sup>2</sup>lp-e'l'. See SCALPEL. For various words (especially German words) in *Sk-* not here given, see the corresponding forms in *Se-*.

**SKARLIEVO**, n. See SCHERLIEVO.

**SKATOL**, n. Ska<sup>2</sup>t'o'l. Ger., *skatol*. Ger., *S*. A substance, C<sub>8</sub>H<sub>8</sub>N, found in the feces, and also obtained as a product of the putrefaction of cerebral, muscular, and pancreatic tissue and from the wood of *Celtis reticulosa*. It occurs in brilliant white tabular crystals, of a pungent, putrid odor. [B, 3, 108 (a, 14, 38).]—**S'-carbonic acid**, **S'-carboxylic acid**. Ger., *S'-carbonsäure*. A monobasic substance, C<sub>10</sub>H<sub>8</sub>NO<sub>2</sub>, found in putrefying albumin or fibrin, and occurring as colorless tabular crystals, melting at 164° C., and decomposing when heated further. [B, 3, 108, 270 (a, 14, 38).]—**S'-schwefelsäure**. See SKATOXYLSULPHURIC ACID.

**SKATOXYL**, n. Ska<sup>2</sup>t-o'z'i'l. Ger., *S*. The radicle C<sub>8</sub>H<sub>8</sub>NO; an oxidation product of skatol, found in large amount in the urine of patients affected with diseases of the large intestine. [B, 108 (a, 14); Filati (a, 50).]—**S'-sulphuric acid**. A substance, C<sub>8</sub>H<sub>8</sub>N.SO<sub>4</sub>H, obtained from the urine after the ingestion of skatol and occurring in the urine of diabetics. [B, 108 (a, 14).]

**SKATE**, n. Skat. See RAY.—**S. oil**. See RAY OIL.

**SKEIN**, n. Skan. Ger., *Knäuel*. See SPIREM.

**SKELET** (Ger.), n. Ske<sup>2</sup>l-e't'. See SKELETON.

**SKELETIZATION**, n. Ske<sup>2</sup>l-e't-i'z-a'shu'n. Fr., *squelettisation*. Reduction to the state of skeleton by the disappearance of the soft parts (as in the fetus in extra-uterine gestation).

**SKELETOGRAPHY, SKELETOLOGY**, n's. Ske<sup>2</sup>l-e't-o'g'r-fa'i'z-i', -o'l'o'j-i'. From σκελετόν, a skeleton, and γράφειν, to write, or λόγος, understanding. Fr., *squelettologie*. The anatomy, etc., of the skeleton. [a, 48.]

**SKELETON**, n. Ske<sup>2</sup>l-e't-i'n. Gr., σκελετόν (from σκέλλαν, to dry up). Lat., *sceletus*. Fr., *squelette*. Ger., *Skelett*, *Skelet*, *S*. A hard portion of the body designed for the support or protection of the soft parts. See also ENDOSKELETON and EXOSKELETON.—**Axial s.** The vertebral column, skull, sternum, and ribs, in contradistinction to the appendicular parts. [C, 3; L, 153.]—**Branchial s.** Ger., *Kiemenskelett*. The osseous or cartilaginous support of branchiae. [L.]—**Cartilaginous s.** Ger., *Knorpelskelett*. The embryonic cartilaginous precursor of the entire s. except the vault of the cranium, the bones of the face, and the inner plate of the pterygoid process of the sphenoid bone. [A, 70.]—**Cranio-vertebral s.** That portion of the s. that includes the cranium and the vertebrae.—**Dermal s.** Ger., *Hautskelett*. See EXOSKELETON.

**SKELETONIZE**, v. tr. Ske<sup>2</sup>l-e't-i'n-iz. To remove all of the tissues of an animal except the skeleton. [L, 221.]

**SKELETT** (Ger.), n. Ske<sup>2</sup>l-e't'. See SKELETON.—**Achsens'**. See ACIAL SKELETON.—**Gesichtss'**. See GESICHTSSCHÄDEL.—**Hauts'**. See EXOSKELETON.—**Kiemens'**. See BRANCHIAL SKELETON.—**Knorpels'**. See CARTILAGINOUS SKELETON.—**Kopfs'**. See SKULL.

**SKERLIEVO, SKÉRLEJEVO**, n's. See SCHERLIEVO.

**SKIASCOPY**, n. Ski<sup>2</sup>-a'sk'op-i'. From σκιά, a shadow, and σκοπεῖν, to examine. Fr., *skiascopie*. Ger., *Skioskopie*. A method of determining the refraction by observing the movement of light and shadow across the pupillary area. [B.] See KERATOSCOPY.

**SKIN**, n. Ski<sup>2</sup>n. A.-S., *scinn*. Gr., δέρμα. Lat., *pellis*, *cutis*. Fr., *peau*, *cuir*. Ger., *Haut*. It., *pelle*, *cute*, *cuojo*. Sp., *piel*, *cutis*, *curo*. The external covering of the body in man and in most of the lower animals. It consists of three layers: the epidermis, corium, and subcutaneous connective tissue. [G.]—**Bronzed s.** See ADDISON'S DISEASE.—**Flah s.** 1. See ICHTHYOSIS. 2. A form of malignant variola observed in Brazil and occasionally in Europe. [G.]—**Glossy s.** Lat., *leiodermia neuritica*. Fr., *peau lisse*. Ger., *Glanzhaut*. A cutaneous disease of neuropathic origin, usually affecting the extremities and more especially the fingers, the skin of which becomes smooth, glossy, and pinkish or reddish, with atrophy, alopecia, and loss of the natural lines or furrows. Sometimes the surface is fissured or excoriated. According to Auspitz, it is a form of the neurotic dermatoses. [G.]—**Goldbeaters' s.** Ger., *Goldschlägerhäutchen*. A very thin and tenacious sheet prepared from the peritoneal coat of the cæcum of the ox; laid between the sheets of gold in the process of gold-beating, and occasionally used in surgery as a dressing. [a, 48.]—**Goose s.** See CRISTUS ANSERINA.—**Piebald s.** Any s. disease characterized by persistent spots of coloration or discoloration.—**Re-entering s.** A mucous membrane. [L, 13.]—**Scale s.** See ICHTHYOSIS.—**Scarfs'**. See EPIDERMIS (1st def.) and CUTICLE.—**S-bound**. Affected with sclerema neonatorum.—**True s.** See CORIUM (1st def.).

**SKINK** (Ger.), n. Ski<sup>2</sup>n'2k. See SCINERS.

**SKODAIC**, adj. Skod a'i'2k. Investigated by or named from J. Skoda, a Vienna physician. [a, 48.]

**SKODISME** (Fr.), n. Skod-es-m'. Supplementary sonorousness on percussion.

**SKOPZEN** (Ger.), n. pl. Skop'tso'zn. A Russian religious sect whose members practice mutilation of their sexual organs. [a, 14.]

**SKORBUT** (Ger.), n. Sko'r'bu't'. See SCURVY.

**SKOTOM** (Ger.), n. Skot-om'. See SCOTOMA.—**Flimmers'**. See AMAUROSIS PARTIALIS FUGAX and SCINTILLATING SCOTOMA.

**SKULL**, n. Sku<sup>2</sup>l. See CRANIUM.—**Natiform s.** A s. so deformed by the presence of osteophytes or otherwise as to give it a natiform appearance. ["Med. Times and Gaz.," Mar. 22, 1884, p. 403 (D).]

**SKUNK**, n. Sku<sup>2</sup>n'2k. See MEPHITIS PUTORIUS.

**SLASHED**, adj. Sla<sup>2</sup>shd. See LACINATE.

**SLEAVERING**, n. Sla<sup>2</sup>v'u'r-i'n'2. See DROOLING.

**SLEEP**, n. Slep. A.-S., *slæp*. Gr., ύπνος. Lat., *somnus*. Fr., *sommeil*. Ger., *Schlaf*. 1. The natural condition of restful unconsciousness into which the system falls normally with more or less regularity daily. [a, 48.] 2. Of Linneus, the changes of position occurring in the foliar organs of plants at nightfall. [a, 35.] See S. MOVEMENTS.—**Hypnotic s.**, **Magnetic s.**, **Mesmeric s.** S. produced by hypnotism. [a, 34.]—**S. drunkenheit**. Ger., *Schlaftrunkenheit*. A nervous disorder in which acts of violence are committed when the patient is suddenly awakened from s.; by Hammond thought analogous to miryachit. [Hammond, "N. Y. Med. Jour.," Feb. 24, 1884, p. 192 (D).]

**SLEEPING**, n. Slep'i'n'2. Of a limb, see ORDOMITION.

**SLEEVE**, n. Slev. Gr., χερσί. Lat., *manica*. Fr., *manche*. Ger., *Aermel*. The part of a garment that covers the arm. [a, 48.]—**Hippocrates's s.** A flannel or linen strainer in the form of a s.

**SLEMSYGE**, n. See RADESVEGE.

**SLIDE**, n. Slid. Fr., *porte-objet*. Ger., *Objektträger*. In microscopy, a slip of glass or other material upon which the object to be examined is mounted. [B.]

**SLING**, n. Sli'n'2. Lat., *mitella*, *mitrium*. Fr., *écharpe*. Ger., *Schlinge*. 1. A bandage suspended in a loop from the neck or shoulder to support the hand and forearm. [E.] 2. See ANSA.—**Cru-ral s.** Ger., *Hirschenkel-schlinge*. See ANSA OF REIL.—**Sheet-s.** A rolled sheet passed behind the neck and under the bent knees and flexed thighs, and tied so as to facilitate forceps delivery. ["N. Y. Med. Jour.," Apr. 5, 1890, p. 380 (a, 34).]—**S. carrier**. See PORTELACS.—**S. of the lenticular nucleus**. A tract of nerve-fibres which pass beneath the optic thalamus to enter the lenticular nucleus. [I, 15 (K).]

**SLIPPERWORT**, n. Sli'p'u'r-wu'r't. See CALCICOLARIA.

**SLIT**, n. Sli't. A cleft or fissure.—**Genito-urinary s.**, **Urinogenital s.**, **Uro-genital s.** See URO-GENITAL OPENING.

**SLOANEA** (Lat.), n. f. Slo'n'e'a-2. From Sir H. Sloane, an English physician. Fr., *quapulier*, *sloanée*. A genus of the *Sloanea*, which are a tribe of the *Tiliaceæ*. [a, 35.]—**S. dentata**. A West Indian and South American species. The mucilaginous astringent inner bark is used in diarrhoea and dysentery. [a, 35.]

**SLOE**, n. Slo. The *Prunus spinosa* or its fruit. [a, 35.]

**SLOUGH**, n. Slu'2f. See ESCHAR.

**SLOUGH**, v. intr. Slu'2f. To become detached in consequence of gangrene; to die and be cast off (said of a part).

**SLOUGHING**, adj. Slu'2f'i'n'2. Gangrenous, spreading by gangrene; as a n., the death and separation of a part.

**SLOWS**, n. Sloz. See MILK SICKNESS.

**SMALA D'AÏN TOUTA**, n. A place in Algiers where there are saline and sulphurous springs. [L, 49 (a, 14).]

**SMALLACHE, SMALLAGE**, n's. Sma'l'ach, -e'j. The *Apium graveolens*. [a, 35.]

**SMALL-POX**, n. Sma'l'po'2x. Lat., *variola*. Fr., *petite vérole*, *variole*. Ger., *Blattern*, *Pocken*, *Menschenpocken*. It., *vajuolo*. Sp., *viruelas*. An infectious, contagious, acute febrile disease chiefly characterized by a pustular exanthem upon the skin. In most cases the eruption begins about the fourth day of the fever in the form of papules that turn first into vesicles and then into pustules, attended with phlegmonous inflammation, which are succeeded by crusts and finally by more or less marked cicatrices or pits (variola pustulosa). In other cases the exanthem does not become pustular, but is characterized by intense erythematous congestion and hæmorrhages (variola maligna). [G.]—**Abortive s.-p.** S.-p. in which there are comparatively few pustules, the general eruption scarcely passing beyond the stage of vesicles. [D, 1.]—**Bastard s.-p.** See VARICELLA (1st def.).—**Black s.-p.**, **Blood s.-p.**, **Bloody s.-p.** See VARICELLA hæmorrhagica and VARICELLA maligna.—**Choleric s.-p.** Of Avicenna, measles. [B, 117.]—**Coherent s.-p.** See VARICELLA cohærens.—**Confluent s.-p.** See VARICELLA confluens.—**Corymbosæ s.-p.** See VARICELLA corymbosa.—**Crystalline s.-p.** 1. See VARICELLA. 2. See VARICELLA lymphatica and cf. VARICELLA verrucosa.—**Discrete s.-p.**, **Distinct s.-p.** See VARICELLA discreta.—**False s.-p.** See VARICELLA.—**Gangrenous s.-p.** S.-p. in which the vesicles fill with an ichorous matter, and gangrene of the skin occurs. [D, 1.]—**Hæmorrhagic s.-p.** See VARICELLA hæmorrhagica.—**Horn s.-p.** See VARICELLA cornea.—**Ichorous s.-p.** See VARICELLA.—**Inoculated s.-p.** S.-p. resulting from intentional inoculation. [D, 1.]—**Lymphatic s.-p.** See VARICELLA lentiformis and VARICELLA lymphatica.—**Malignant s.-p.** See VARICELLA maligna.—**Modified s.-p.** See VARIOLOID.—**Natural s.-p.** S.-p. occurring casually (not from intentional inoculation) in an unvaccinated person.—**Ovine s.-p.** See SHEEP-POX.—**Pearl s.-p.** See VARICELLA lymphatica.—**Petechial s.-p.** See VARICELLA petechialis.—**Scorbatic s.-p.** See VARICELLA hæmorrhagica.—**Semi-confluent s.-p.** See VARICELLA semiconfluens.—**Serous s.-p.** See VARICELLA and VARICELLA lymphatica.—**Spurious s.-p.** See VARICELLA and Abortive s.-p.—**Varielloid s.-p.** See Abortive s.-p.—**Verrucosæ s.-p.** See VARICELLA verrucosa.

**SMARAGDUS** (Lat.), n. m. Sma'r'gma'd'u's-a'g'a'2g'd'u'2s-a'd'u's. Gr., σμαράγδος. Ger., *Smaragd*. Syn.: lapis s. The emerald or beryl. [a, 35.]

**SMECTIC**, adj. Sme'kt'i'2k. Gr., σμηκτικός (from σμάν, to cleanse). Lat., *smeeticus*. Fr., *smeectique*. See DETERGENT.

**SMEGMA** (Lat.), n. n. Sme'g'ma'2g'ma'2. Gen., *sme'g'matos* (-atis). Gr., σμήγμα (from σμάν, to wipe). 1. Soap, grease, an unguent. 2. The secretion of the sebaceous glands; sebum. [G.]—

**S. articulare.** See SYNOVIA.—**S. cutaneum.** See *Cutaneous SEBUM*.—**S. embryonum.** See *VERNIX caseosa*.—**S. praputiale, S. praputii.** A yellowish-white, fatty matter, of a peculiar odor, which accumulates under the foreskin in the male and about the region of the clitoris and the labia minora in the female, being the secretion of the sebaceous glands of the parts.

**SMEGMATORRHŒA (Lat.), n. f.** *Sme'g'(smag)-ma²t'(ma²t)-o'r-re'(ro²'e²)-a².* From *σμήγμα*, smegma, and *πόα*, a flowing. See SEBORRHEA.

**SMELL, n.** *Sme'l.* Gr., *ὀσμή, ὀσμή, ὀσφρασία, ὀσφρησις.* Lat., *odor.* Fr., *odeur.* Ger., *Geruch.* 1. The perception of odor on the impingement of certain volatile particles upon the olfactory mucous membrane. [K.] 2. Odor. [L.]

**SMILACIN, n.** *Smi'la's-i'n.* Ger., *S.* A bitter glucoside,  $C_{40}H_{70}O_{18}$ , or  $C_{18}H_{30}O_8$ , or  $C_{15}H_{26}O_6$ , found in sarsaparilla-root. It froths in solution like saponin, with which by some it is identified. [B, 8, 10, 270 (a, 38).]

**SMILACINA (Lat.), n. f.** *Smil(smel)-a²s(a³k)-in(en)-a³.* Solomon's-seal, a genus of the *Polygonaceæ*. [a, 35].—**S. racemosa.** Clustered Solomon's-seal; a North American species. The berries are used as a nerve. [a, 35.]

**SMILAL, adj.** *Smi'l.* Lat., *smilalis.* Pertaining to the *Smilales*, Lindley's s. alliance (Lat., *nizus smilalis*) of the *Imperfectæ*, consisting of the *Dioscoreæ*, *Smilacæ*, and *Roxburghiaceæ*. [a, 35.]

**SMILASPERIC ACID, n.** *Smi'l-a²s-pe'r'i²k.* Of Garden, hemidesmic acid. [B, 5 (a, 38).]

**SMILAX (Lat.), n. f.** *Smil(smel)-a²x(a²x).* Gen., *smil'acos (-acis).* Gr., *σμίλαξ* (a poisonous plant identified by some with the yew). Fr., *salsepareille.* Ger., *S., Stechwinde.* Sarsaparilla, green brier; a genus of liliaceous plants constituting with two other genera (*Heterosmilax* and *Rhipogonum*) the *Smilacæ* (Fr., *smilacées*; Ger., *Smilacæen*), a tribe or series of the *Liliacæ*. The *Smilacæ* (an order of monocotyledons), the *Smilacineæ* (an order of the *Endogeneæ*), and the *Smilacineæ* (a tribe of the *Asparagineæ*) include genera now referred to the *Liliacæ*. [a, 35.] Cf. *SARSAPARILLA* and its subheadings.—**Chinese s.** See *S. china*.—**Decoctum smilacis sarsaparillæ.** See *Decoctum SARSAPARILLÆ*.—**S. Alpini.** Ger., *Alpin's Stechwinde.* An undershrub growing in Egypt and Greece. The roots are used like sarsaparilla, especially in syphilis. [a, 35].—**S. anceps.** A species the root of which is used medicinally in the Mauritius. [a, 35].—**S. aspera.** Fr., *salsepareille rude* (ou *dyre*, ou *d'Europe*), *gramen de montagne*, *gros gramé*, *liseron épineux* (ou *rude*), *liset piquant.* Ger., *gemeine* (oder *scharfe*, oder *rauh*) *Stechwinde.* Prickly ivy; found in southern Europe, the Orient, and Egypt; the *σμίλαξ τραχεία* of the ancient Greeks, who used the leaves and fruits as an antidote. The roots are sometimes used in place of sarsaparilla, but are probably inactive. [a, 35].—**S. china.** Fr., *salsepareille de Chine*, *esquine*, *sqaine*, *racine de Chine.* Ger., *China-Stechwinde.* A shrub indigenous to eastern Asia, where its rhizome, the china-root of commerce, is considered antirrhematic, antisyphilitic, aphrodisiac, and demulcent. [Proc. of the Am. Pharm. Assoc., xxix, p. 122 (a, 50); a, 35].—**S. glabra.** A species growing in India and southern China. Its large tuberous rhizome, used for sores and in syphilis, can not be distinguished from china-root. [Roxburgh (a, 35).]—**S. glauca.** Fr., *salsepareille glauque.* Ger., *segrüne* (oder *blaugraue*) *Stechwinde.* False sarsaparilla; growing from Long Island to Georgia, and westward to Kentucky. A Brazilian species of the same name, and probably identical, furnishes a root used in gout and chronic skin eruptions and as an antisyphilitic. It was formerly exported to Europe. [a, 35].—**S. glycyphylla.** Fr., *salsepareille à feuilles de réglisse.* Sarsaparilla of Australia, Botany Bay (or sweet) tea-plant; an evergreen the leaves of which contain glycyphyllin and are used for tea. The root is used medicinally. [a, 35].—**S. hortensis.** See *PHASEOLUS vulgaris*.—**S. lanceafolia.** An Indian and Chinese species. Its rhizome, resembling china-root, is used like that of *S. glabra* and in India for rheumatism. [a, 35].—**S. lanceolata.** Bamboo brier; a vine of North America, often confounded with *S. pseudo-china*. Its rhizome is used as an antisyphilitic. [a, 35].—**S. macabucha.** Fr., *salsepareille macabucha.* A species growing in the Philippine Islands, where it is used as a stimulant and anthelmintic, and its juice in dysentery. [a, 35].—**S. medica.** Ger., *medizinische Stechwinde.* Sp., *zarzaparrilla* [Mex. Ph.]. A species found on the eastern slopes of the Mexican Andes, yielding in part, if not wholly, the Mexican sarsaparilla. [a, 35].—**S. officinalis.** Fr., *salsepareille.* Ger., *gebräuchliche* (oder *officinelle*) *Stechwinde.* A plant indigenous to tropical South America and cultivated in Jamaica. It yields the sarsaparilla of the U. S. Ph. [a, 35].—**S. papyracea.** A species found from Guiana to Brazil, regarded as the source of Pará sarsaparilla. [a, 35].—**S. perfoliata.** A species found in India and Cochinchina. The root is used like sarsaparilla. [a, 35].—**S. pseudo-china.** Ger., *falsche China-Stechwinde.* A species indigenous to the United States and the West Indies. Its root, *radix chinæ occidentalis* (seu *chinæ americanæ* (seu *spuriæ*)), has been much used as sarsaparilla, and in Mexico is reputed diaphoretic and antisyphilitic. [a, 25, 50.] Cf. *S. lanceolata*.—**S. rotundifolia.** The common green brier of North America. Its root is recognized in the Mex. Ph. as diaphoretic and depurative, under the name *raíz de china de México*, but, according to Maisch, this reference is erroneous. [a, 35].—**S. sarsaparilla.** Ger., *Sassaparillstechwinde.* A name for various tuberous-rooted species, especially *S. pseudo-china*, *S. lanceolata*, and *S. Walteri*. The *S. sarsaparilla* of Linnæus, formerly regarded as the source of the true medicinal sarsaparilla, is of doubtful origin, and is not now recognized as growing in the United States. The *S. sarsaparilla* of Pursh is *S. glauca*. [a, 35].—**S. syphilitica.** Fr., *salsepareille caraque.* A species growing on the Casiquiare River, said to be a source of true sarsaparilla. [a, 35].—**S. tannoides.** Fr., *salsepareille tannôide.* A black-berried climber growing from New Jersey to Illinois and in the southern United States. The tuberous root-stock is used as a diaphoretic, diuretic,

and alterative, and probably constitutes part of American, or false, china-root. [a, 35].—**S. Walteri.** A species found from Virginia to Florida. Its root is used like those of *S. lanceolata* and *S. pseudo-china*. [a, 35.]

**SMILE (Lat.), n. f.** *Smil(smel)'e(a).* Gen., *smil'es.* Gr., *σμίλη.* See BISTOURY and SCALPEL.

**SMIRIS (Lat.), n. f.** *Smir(smi²r)'i²s.* Gen., *smir'idōs (-idis).* Gr., *σμίρις.* Ger., *Smirgel.* Emery; formerly used in medicine. [a, 35.]

**SMOOTH, adj.** *Smuth².* Not rough to the touch; also, not pubescent. [a, 35.]

**SMUT, n.** *Smu²t.* Any one of various species of the *Ustilaginææ*, especially *Ustilago segetum*. [a, 35.]

**SMYRIS (Lat.), n. f.** *Smir(smu²r)'i²s.* Gen., *smyr'idōs (-idis).* Gr., *σμίρις.* See SMIRIS.

**SMYRNA, n.** *Smu²rn'a².* Gr., *σμύρνα.* Myrrh. [a, 35.]

**SMYRNIUM (Lat.), n. n.** *Smu²rn(smu²rn)'i²-u²m(u²m).* Gr., *σμυρνίον*, from *σμύρνα*, myrrh (1st def.). Fr., *s., maceon* (2d def.). Ger., *Myrrhenkraut* (2d def.). 1. Of Dioscorides, the *S. perfoliatum*. 2. A genus of umbelliferous herbs. The *Smyrniæ* (Fr., *smyrniées*) of Koch (essentially the *Smyrniæ* of Lindley) are a tribe of the *Umbelliferae*. The *Smyrniæ* (Fr., *smyrniées*) are: Of Sprengel, an order of the *Umbelliferae*; of Bentham and Hooker, a subtribe of the *Ammineæ*. [a, 35].—**Radix smyrni.** The root of *S. olusatrum*, also of *Archangelica officinalis*. [a, 35].—**S. hortense.** See *IMPERATORIA ostruthium*.—**S. olusatrum.** Fr., *maceon à feuilles ternées*, *arche large*, *gros persil de Macédoine.* Ger., *gemeines Myrrhenkraut*, *Maceon.* (Common) alexanders, black-pot-herb, horse-parsely, the *ὑποσίλινον* of Dioscorides; found in middle and southern Europe, northern Africa, and western Asia. It was formerly cultivated for its aromatic and edible leafstalks. The laxative and diuretic root (formerly used as an alterative) and the aromatic fruits (used like caraway) were official as *radix et semen smyrni.* [a, 35].—**S. perfoliatum.** The *σμύρνιον* of Dioscorides; a South American species. The aromatic root, leaves, and fruits were formerly used medicinally. [a, 35.]

**SNAIL, n.** *Snal.* Fr., *limacon.* Ger., *Schnecke.* Any one of various gasteropodous molluscs, especially an individual of the genus *Helix*. S's are used as food and medicinally. [B; a, 48].—**Garden s.** See *HELIX hortensis*.—**S. shell.** Lat., *testa cochlea.* Fr., *coquille de limacon.* The shell of the s.; formerly official as a source of calcium carbonate. [B, 119.]

**SNAKEROOT, n.** *Snak'ru²t.* Any one of various plants (or their roots) the roots of which have been used in cases of snake-bite or have some real or fancied resemblance to snakes. [a, 48].—**Black s.** The *Cimicifuga racemosa* or its root, also *Sanicula marilandica* or its root. [a, 35].—**Brazilian s.** The *Chiococca angustifolia* and *Casearia ulmifolia*. [a, 35].—**Button-s.** 1. The *Liatris scariosa*, *Liatris spicata*, and other species of *Liatris*; also the *Eryngium aquaticum*. [a, 35].—**Canada s.** The *Asarum canadense*. [a, 35].—**East Indian s.** The *Ophiorrhiza mungos* or its root. [a, 35].—**Heart-s.** The *Asarum canadense* or *Asarum virginianum*. [a, 35].—**Indian s.** See *East Indian s.*—**Red River s.** See *Texas s.*—**Samson's s.** See *PSORALEA glandulosa*.—**Seneca s.** See *POLYGLA senega* and *SENEGA* (2d def.).—**Texas s.** The rhizome of *Aristolochia reticulata*. [a, 35].—**Virginia s.** The *Aristolochia serpentaria* or its rhizome. [a, 35].—**White s.** See *EUPATORIUM aromaticum*.

**SLAKEWEED, n.** *Snak'wed.* The *Polygonum bistorta*, *Cicutula maculata*, or *Mercurialis perennis*. [a, 35.]

**SLAKEWOOD, n.** *Snak'wud.* The genus *Colubrina*; in the East Indies, the *Strychnos colubrina* and *Strychnos muricata*; in Jamaica, the *Brosimum alicastrum* and *Cecropia peltata*; in the Bahamas, the *Colubrina ferruginosa*; also the wood of any of these plants. [a, 35.]

**SNAPDRAGON, n.** *Sna²p'dra²g-u²n.* The *Antirrhinum majus* and other species of *Antirrhinum*; also *Linaria vulgaris*, *Digitalis purpurea*, *Aquilegia vulgaris*, *Fumaria officinalis*, and *Ruellia tuberosa*. [a, 35.]

**SNARE, n.** *Sna²r.* Gr., *σπάρος.* Lat., *laqueus.* Fr., *lacs, nœud coulant.* Ger., *Schnur, Schlingenschnürer.* An instrument for re-

moving morbid growths by encircling them in a loop and tightening or drawing upon the loop. Cf. *ÉCRASEUR*.

**SNEEZEWORD**, n. Snez'wúrt. The *Achillea ptarmica*; in America, the genus *Helenium*. [a, 35.]

**SNEEZING**, n. Snez'ín². Gr., σπράγος. Lat., sternutatio. Fr., éternuement. Ger., Niesen. A sudden, almost explosive expiration, resembling coughing, but, from closure of the anterior pillars of the fauces, aided by the soft palate, the blast of air is mostly driven through the nose. [J.]—**Ear s.** S. due to reflex irritation of the sensory nerves of the nasal mucous membrane transmitted from the nerves of the external auditory canal or middle ear, caused by irritation of the latter. [F.]

**SNIFFLES**, n. Sníflz. See **SNUFFLES**.

**SNORING**, n. Snór'ín². Gr., ῥέγκος, ῥέγγος, ῥογμός, ῥόγγος. Lat., rhonchus, stertor. Fr., ronflement. Ger., Schnarchen. The sound produced, especially in sleep, by breathing through the nose and mouth at the same time. It is produced by a vibration or flapping of the velum pendulum palati between the two currents of air, the sound being intensified by vibrations in the columns of air. [J, 17.]

**SNOWDROP**, n. Sno'dróp. The genus *Galanthus*, especially *Galanthus nivalis*; also a white variety of *Fritillaria meleagris*.

**SNUFF**, n. Snúff. Fr., rapé. Ger., Schnupftaback. 1. Pulverized tobacco. 2. Any medicinal powder to be inhaled into the nose. [a, 48.]—**Anatomist's s.-box.** See *FOVEOLA radialis*.—**Cephalic s.** See *PULVIS ASARI COMPOSITUS*.

**SNUFFLES**, n. Snúflz. See *CORYZA* and *CORYZA syphilitica*.

**SOAP**, n. Sop. Gr., σάπων. Lat., sapo. Fr., savon. Ger., Seife. It., sapone. Sp., jabón. 1. A substance prepared by the action of a caustic alkali or a metallic salt on animal or vegetable fats and oils, and consisting essentially of a compound of a metal with one or more fatty acids or with acids of the oleic-acid group. This chemical action, known as *saponification*, is essentially a double decomposition by which the metal of the caustic alkali or metallic salt combines with the acid radicle present in the fat operated on, while the glyceryl which forms the other component of the fat combines with hydrogen and oxygen to form glycerin: e. g.,

[B.] 2. Of the U. S. Ph., see SAPO (2d def.).—**Alicante s.** See SAPO (2d def.).—**Almond-oil s.** See *AMYGDALIN s.*—**Ammoniacal s.** See *LINIMENTUM AMMONIÆ*.—**Amygdalin s.** A s. formed by the action of caustic soda on almond-oil. [B.] See SAPO medicatus.—**Animal-oil s.** S. made from tallow by the action of caustic soda. [B.] See also SAPO animalis and SAPO vulgaris.—**Antimonial s.** See SAPO antimonii.—**Arsenical s.** Ger., Arsenikseife. A s.-like mass either prepared by mixing 1 part of camphor, 10 parts of arsenic trioxide, 10 of common s., 1½ part of burnt lime, and 20 parts (or a sufficient amount) of water; or made up of 50 parts of arsenic trioxide and 25 of potassium carbonate dissolved in 50 of boiling water, and this solution mixed with 5 of camphor, 10 of burnt lime, 50 of common soap, and enough water. [B, 270.]—**Balsam of s.** See *LINIMENTUM SAPONATO-CAMPHORATUM* and *TINCTURA SAPONIS*.—**Beef's-marrow s.** Sp., jabon animal [Sp. Ph.]. S. made from beef marrow by the action of caustic soda. [B.]—**Black s.** See SAPO viridis.—**Bolled s.** Grain s. (so called because it is separated from the excess of alkali and glycerin by boiling). [B, 5.]—**Butter s.** See SAPO butyraceus.—**Calcium s.** Fr., savon calcaire. See *LINIMENTUM CALCIS* (under CALX).

—**Camphorated s. liniment** [U. S. Ph., 1850]. See *LINIMENTUM SAPONATO-CAMPHORATUM*.—**Camphorated tincture of s.** [U. S. Ph., 1850]. See *LINIMENTUM SAPONIS*.—**Castile s.** Fr., savon de Castille. Ger., spanische Seife, Olseife. S. made from olive-oil. [B.] See SAPO (2d def.) and cf. *Olive-oil s.*—**Cocoonut-oil s.** Marine s., s. made from cocoanut oil; quite soluble in salt water, and hence used on shipboard. [B, 3.]—**Compound pills of s.** See *PILULÆ OPII*.—**Compound s. cerate.** See *CERATUM SAPONIS COMPOSITUM*.—**Curd s.** 1. S. which in the process of its manufacture separates from the mixture of alkali and glycerin on the addition of salt. [B, 3.] 2. See SAPO animalis.—**German soft s.** See SAPO viridis.—**Glassmakers' s.** Fr., savon des verriers. Ger., Glasmacher-Seife. Pyrolusite, or native manganese dioxide (so called because used in the preparation of colorless glass). [B, 3.]—**Glass s.** See *Silicate s.*—**Grain s.** Ger., Kornseife. S. which has reached that stage in the process of its manufacture in which it is separated from the alkali and glycerin, but has not yet been purified. [B, 5.]—**Green s.** See SAPO viridis.—**Hard s.** Lat., sapo durus. Fr., savon dur. Ger., harte Seife. Soda soap. [B.] See SAPO (2d def.).—**Insoluble s.** S. prepared from fats by saponification with the oxide of a heavy metal (e. g., lead s.). [B.]—**Jalap s.** See SAPO jalapinus.—**Lead s.** S. made by saponifying a fat with lead oxide (litharge). The emplastrum plumbi is so made. [B.]—**Marbled s.** Fr., savon marbré. S. permeated by colored streaks, due to the presence of an iron s. (a compound of iron with the fatty acid which is insoluble in water. [B, 5.] Cf. *Mottled s.*—**Marine s.** See *Cocoonut-oil s.*—**Marrow s.** See *Beef's-marrow s.*—**Marseilles s.** See *Olive-oil s.*—**Medicinal s.** See SAPO medicatus.—**Mottled s.** Fr., savon marbré. S. made by the gradual addition of soda-lye to a mixture of fats, the mottling being produced by the separation of crystalline sodium stearates and palmitates, alternating with the deposition of amorphous sodium oleate. [B, 3.] Cf. *Marbled s.*—**Olive-oil s.** Ger., Ölseife. S. made from olive-oil and other oils by the action of caustic soda. [B, 3.]—**Palm (oil) s.** S. prepared from palm oil, either crude or bleached. [B, 3.]—**Petroleum s.** A s. made by heating gently till dissolved 5 parts of petroleum, 4 of white wax, 5 of alcohol, and 10 of soda soap; used for itch. [Emery, "Nouv. rem." Jan. 8, 1890, p. 2 (a, 50).]—**Potash s.** Lat., sapo kalinus. Fr., savon à base de potasse. Ger., Kaliseife. See *Soft s.*—**Pumice-stone s.** A s. made by stirring pumice-stone into cocoanut oil s. before it becomes stiff. [B, 270 (a, 386).]—**Resin s.** A s. made by heating with an alkali the resin left behind by the distillation of turpentine. [B, 3.]—**Rosin s.** S. made from tallow to which rosin and a small quan-

tity of palm-oil have been added. [B, 5.]—**Silicate s.** Glass s., made by adding a solution of sodium silicate to ordinary s. during its manufacture. [B, 3.]—**S. balls.** Balls made up of starch and soap with a little water. [B, 5.]—**S.-bark.** 1. See *QUILLARIA* (2d def.). 2. The bark of *Fitchocobium bigenium*. [a, 35.]—**S. bulb.** A large bulb from a liliaceous Californian plant (*Chlorogalum pomeridianum*), used in place of soap. It is mucilaginous and froths in water, but contains neither alkali nor oil. [a, 35.]—**S. cerate.** See *EMPLASTRUM SAPONIS*.—**S. cerate plaster.** See *EMPLASTRUM SAPONIS* and *EMPLASTRUM SAPONIS fuscum*.—**S. liniment.** See *LINIMENTUM SAPONIS*.—**S.-nut.** 1. The fruit of *Mimosa abstersens*. 2. Soap-berry, especially the fruit of *Sapindus saponaria* and *Sapindus emarginatus*. [a, 35.]—**S.-nut oil.** A pale-yellow, half-solid oil extracted from the kernel of *Sapindus emarginatus*. [a, 35.]—**S.-plant.** Any one of various plants with saponaceous parts (e. g., in Mexico, the *Agave saponaria*; in California, the *Chlorogalum pomeridianum* [see *S. bulb.*]). [a, 35.]—**S. pods.** The pods of various species of *Cesalpinia* (in China) and the pods of *Acacia concinna* (in India). [a, 35.]—**Soft s.** Lat., sapo mollis. Fr., savon mou. S. made by the action of caustic potash on a fatty substance. It is a dark-colored, green or brown, transparent, semisolid emulsion, containing an excess of the alkali and the glycerin produced in the process of saponification. [B, 3.] See also SAPO viridis.—**Spanish s.** See *Castile s.*—**Starkey's s.** See SAPO starkeyanus.—**Tallow curd s.** S. made from tallow by boiling with soda-lye gradually added. [B, 3.]—**Taxidermists' s.** Fr., savon de Becœur. A s. made by mixing 32 parts each of grated olive-oil s., arsenious acid, and boiling water, 12 of potassium carbonate, 4 of unslaked lime, and 1 part of camphor. [B, 92, 93 (a, 14).]—**Tincture of green s.** See *TINCTURA SAPONIS VIRIDIS*.—**Tincture of s.** 1. See *Tinctura saponis*. 2. Of the Fr. Cod., see *SPIRITUS SAPONATUS* (2d def.).—**Transparent s.** S. rendered transparent by dissolving in alcohol, filtering, and evaporating to a suitable consistence. [B, 5.]—**Turpentine s.** See SAPO starkeyanus.—**Venetian s.** See *Olive-oil s.*—**Windor s.** Fr., savon de Windsor. S. prepared by saponifying a mixture of 1 part of olive-oil and 9 parts of tallow. [B, 5.]

**SOAPBERRY**, n. Sop'ber-ri². The fruit of various species of the genus *Sapindus* (in the West Indies and South America, *Sapindus saponaria*; in the East Indies, *Sapindus emarginatus* and *Sapindus detergens*; in North America, *Sapindus marginatus*; in Java and the Moluccas, *Sapindus varak*; in Malabar, *Sapindus laurifolius*). [a, 35.]

**SOAP-ROOT**, n. Sop'ru²t. 1. The root of *Saponaria officinalis*. 2. The root of *Agave saponaria* and some cacti. The bulbous root of an undetermined species growing in the southwestern territories of North America and throughout Central America affords a saponaceous juice which is used as a wash for the hair. 3. The root of *Gypsophila struthium*. [a, 35.]—**Californian s.-r.** The *Leucocernium montanum*. [a, 35.] Cf. *SOAP bulb.*—**Levant s.-r.** 1. The saponaceous root (*radix saponaria lepanctica*) of *Gypsophila struthium*; much of the root so called is obtained, however, from *Gypsophila fastigiata*. 2. The root of *Leontice leontopetalum*. [a, 35.]

**SOAPWORD**, n. Sop'wúrt. The genus *Saponaria*, especially *Saponaria officinalis*; also the *Vaccaria vulgaris*. [a, 85.]—**Decoction of s.** See *Decoction SAPONARIÆ*.

**SOBBING**, n. Sob'ín². Lat., singullus. Fr., sanglot. Ger., Schluchzen. A series of convulsive inspirations, due mostly to the contraction of the diaphragm and an intermittent closure of the glottis, giving rise to a characteristic sound. [L, 18, 19, 40.]

**SOCALOIN**, n. So²k-a¹'lo-ín². A substance, C₂₄H₃₈O₁₆ + 5H₂O, or C₁₂H₁₈O₇ + 3H₂O, or C₁₂H₁₈O₇, forming yellow prismatic bitter crystals readily soluble in water; derived from Socotrine or Zanzibar aloes. [B.] See *ALOIN*.

**SOCIAL**, adj. So'sh¹. Lat., socialis (from socius, a companion). Fr., s. Ger., gesellschaftlich. Of animals, gregarious; of plants of the same species, growing together in great number. [a, 14, 35.]

**SOCIUS** (Lat.), adj. So(so²)shi²(ki²)u²s(u²s). Associated; as a n., in the f., socii (glandula understood), an accessory gland. [a, 48.]—**Socia parotidis.** See *Accessory parotid GLAND*.

**SOCIOLOGY**, n. So-si²-o¹'lo-ji². From socius, a companion, and λόγος, understanding. The science of the various relations of human society. [a, 48.]

**SOCK**, n. So²k. Fr., socquette. Ger., Socke. A short-legged stocking. **Neapolitan s.** Socks to be worn (without change) during the treatment of syphilis by the method of applying Neapolitan (mercurial) ointment to the feet.

**SOCOTRINE**, adj. So²k'ot-ri²n. Lat., socotrinus. Fr., socotrin. Obtained from Socotra, an island off the coast of Arabia.

**SODA** (Lat.), n. f. Sol'a². Fr., soude (caustique) [1st def.]. Ger., S. Sode, Natron, Aetzatron [1st def.]. 1. Caustic s., sodium hydroxide: a hard, white or grayish, opaque solid, of fibrous texture, melting just below a red heat, deliquescent in moist air, efflorescent in dry air, and very soluble in alcohol, less soluble in water. It is a strongly alkaline base, of very acrid and caustic taste. From its great affinity for water, it acts as a caustic, but is less diffusive in its action than caustic potash. 2. A name applied to various salts of sodium (especially sodium carbonate or bicarbonate) formerly considered as compounds of sodium oxide with water or with acid radicles. The term is now usually restricted to the salts of sodium occurring native or used in commerce. When used without qualification, caustic s. is generally understood. [B, 5.] 3. Carbonic acid water.—**Acetas sodæ** [Belg. Ph.]. See *SODIUM acetate*. For various similar forms, see the corresponding forms under *SODIUM*.—**Aqua sodæ effervescentes.** **Aqua supercarbonatis sodæ.** See *Liquor sodæ effervescentis*.—**Arsenus sodæ siccatus** [Belg. Ph.]. See *SODIUM arsenate*.—**Baking s.** **Bicarbonas sodæ.** See *SODIUM bicarbonate*.—**Borns sodæ (natalescentes).** See *Bo-*

**RAX.**—**Carbonas sodæ**. 1. Of the Belg. Ph., see **SODIUM carbonate**. 2. See **SODIUM bicarbonate**.—**Carbonas sodæ alcalinus**. See **SODIUM carbonate**.—**Carbonas sodæ impurus**. See **Crude sodium carbonate**.—**Carbonas sodæ incompletus**. See **SODIUM carbonate**.—**Carbonas sodæ siccatus**. See **Dried sodium carbonate**.—**Carbonas sodæ venalis**. See **Crude sodium carbonate**.—**Cataplasma sodæ chloratæ** [Br. Ph.]. Chlorine poultice; made by adding 2 fl. oz. of liquor sodæ chloratæ to a mixture of 4 oz. of linseed meal and 8 fl. oz. of water. [B. 5.]—**Caustic s.** See **S.** (1st def.).—**Effervescent s. citrotratarate**. See **SODII citrotrataras effervescens**.—**Hydrochloras sodæ**. See **Sodium chloride**.—**Hypoboras sodæ**. See **BORAX**.—**Hypocarbonas sodæ**. See **Sodium carbonate**.—**Liquid s. hypochlorite**. See **Liquor sodæ chloratæ**.—**Liquor sodæ** [U. S. Ph., Br. Ph.]. Fr., *soude caustique liquide* [Fr. Cod.]. Ger., *Aetznatronlösung, Aetznatron-lauge*. Syn.: *liquor natri caustici* [Ger. Ph.] (see *natrii hydrochlorici* [Swiss Ph.]), *natrium hydro-oxidatum solutum* [Hung. Ph.], *natrium causticum solutum* [Russ. Ph.], *s. caustica soluta* [Belg. Ph.], *solutio hydratis natri* [Dan. Ph., Swed. Ph.]. An aqueous solution of s., made either by dissolving it directly in water [U. S. Ph., Belg. Ph., Sp. Ph.] or by mixing solutions of sodium carbonate and of quicklime [U. S. Ph., Russ. Ph., Hung. Ph., Dan. Ph., Swed. Ph., Fr. Cod.] or of washed slaked lime [Br. Ph.], and diluting with water; a clear, colorless or yellowish, odorless, caustic liquid, of strongly alkaline taste and reaction, and of sp. gr. varying from 1.047 [Br. Ph.] to 1.35 [Hung. Ph.]. It contains 4.1 [Br. Ph.], 5 [U. S. Ph.], 15 [Ger. Ph.], 20 [Dan. Ph., Swed. Ph.], or from 30 to 31 [Fr. Cod., Belg. Ph., Sp. Ph., Swiss Ph., Russ. Ph.] per cent. of caustic s. [B. 95.]—**Liquor sodæ arseniatæ** [Br. Ph.]. See **Liquor sodæ arseniatæ**.—**Liquor sodæ chloratæ** [U. S. Ph.]. (see *chlorinatæ* [Br. Ph., U. S. Ph., 1870]). Fr., *chlorure de soude liquide* [Fr. Cod.], *eau de Labarraque*. Ger., *Chlornatronlösung*. Syn.: *liquor natri chlorati* [Ger. Ph., 1st ed.], *liquor natrii* [Swiss Ph.] (see *acidi* [Swed. Ph.]) *hypochloriti, natrium hypochlorosum solutum* [Russ. Ph.], *solutio hypochloritis natri* [Netherl. Ph.]. Labarraque's solution, consisting essentially of sodium chloride and sodium hypochlorite (or, according to the Swed. Ph., hypochlorous and carbonic acids) dissolved in water; made by rubbing up chlorinated lime with water and mixing with an aqueous solution of sodium carbonate. It should contain at least 2 per cent. [U. S. Ph.] or 2.5 per cent. [Br. Ph.] of available chlorine. The preparation of the Swed. Ph. is made by decomposing a solution of 3 parts of sodium carbonate in 10 of distilled water with chlorine gas. [B. 95.]—**Liquor sodæ effervescens** [Br. Ph.]. Fr., *eau acidule bicarbonatée* [Fr. Cod.]. Effervescent solution of s., s.-water. A preparation consisting of 1 part of sodium bicarbonate dissolved in 292 [Br. Ph.] (650 [Fr. Cod.], 169 [Swed. Ph.]) parts of water charged with carbon dioxide. [B. 95 (a, 38).] See also **Aqua natro-effervescens**.—**Lixivium sodæ**. See **Liquor sodæ**.—**Mephitic s.** See **Sodium carbonate**.—**Murias sodæ**. See **Sodium chloride**.—**Murias sodæ fossilis**. Ordinary rock salt. [a, 35.]—**Pilulæ subcarbonatis sodæ**. A pill-mass of 4 grammes of sodium carbonate and 2 of soap, divided into 40 pills; or of 30 parts of sodium carbonate, 23 of soap, and enough syrup, divided into 2-grain pills. [B. 119 (a, 38).]—**Pulvis sodæ tartaricus**. See **PULVIS aerophorus**.—**Rhodanæ** (Ger.). See **Sodium thiocyanate**.—**Sal s.**, **Sal sodæ**. See **S.** (1st def.).—**S. acetata**, **S. acetosa**. See **Sodium acetate**.—**S.-ash**. A substance produced in the manufacture of sodium carbonate. It contains 50 per cent. of the carbonate, which is derived from it by dissolving in water, filtration, evaporation, and slow crystallization. [B. 5.]—**S. ball**. See **British BARILLA**.—**S. calcinata** [Russ. Ph.]. See **Dried commercial sodium carbonate**.—**S. caustica** (fusa). See **S.** (1st def.).—**S. caustica liquida** (see *soluta*). See **Liquor sodæ**.—**S. cum calce**. See **London PASTE**.—**Sodæ acetas**. See **Sodium acetate**. For similar forms, such as **Sodæ arsenias**, see the corresponding forms under **SODIUM**.—**Sodæ carbonas exsiccata**. See **Dried sodium carbonate**.—**Sodæ et potassæ tartaras**. See **POTASSIUM and sodium tartrate**.—**Sodæ murias**, **S. muratica**. See **Sodium chloride**.—**S. phosphorata**. See **Sodium phosphate**.—**S. powder**. See **PULVIS aerophorus**.—**S. pura**. See **S.** (1st def.).—**S. salita**. See **Sodium chloride**.—**S. sulphurica**. See **Sodium sulphate**.—**S. tartarata**, **S. tartarisata**. See **POTASSIUM and sodium tartrate**.—**S. waste**. A by-product, insoluble in water, obtained in the manufacture of sodium carbonate from sodium sulphate and used for the production of sodium hypsulphite. [B. 5.]—**S.-water**. See **Liquor sodæ effervescens** and **Aqua acidi carbonici**.—**Solution of acetate of s.** [Br. Ph.]. A solution of sodium acetate in 10 times [Br. Ph.] (4 times [Ger. Ph.]) as much water. [B. 81 (a, 38).]—**Solution of phosphate of s.** See **Test solution of phosphate of sodium**.—**Solution of s.** See **Liquor sodæ**.—**Subboras sodæ**. See **BORAX**.—**Subcarbonas sodæ**. See **Sodium carbonate**.—**Sulphas sodæ**. See **Sodium sulphate**.—**Sulphurated s.** See **Sodium trisulphide**.—**Tabellæ bicarbonatis sodæ**. See **TROCHISCI sodii bicarbonatis**.—**Tartarus sodæ et kali**. See **POTASSIUM and sodium tartrate**.—**Vitriolated s.**, **Vitriolum sodæ**. See **Sodium sulphate**.—**Volumetric solution of s.** [U. S. Ph., Br. Ph.]. A solution of s. containing no carbonate and having such strength that 100 c. c. of it are exactly neutralized by the same quantity of the volumetric solution of oxalic acid or by  $\frac{1}{10}$  grammes of the acid itself. [B. 81 (a, 38).]—**Washing s.** See **Sodium carbonate**.

**SODA BAY**, n. Sod'a<sup>3</sup>. A place in Lake County, California, where there is an alkaline spring. [Anderson (a, 14).]

**SODA LAKE**, n. Sod'a<sup>3</sup>. A lake in San Bernardino County, California, containing sodium chloride and sodium, calcium, and magnesium sulphates. [Anderson (a, 14).]

**SODAMIDE**, n. Sod'a<sup>3</sup>m-i'd'id. A greenish or reddish crystalline substance, NH<sub>2</sub>Na, formed by the action of ammonia gas on metallic sodium. [B. 3.]

**SODA POND**, n. Sod'a<sup>3</sup>. A pond in Long Valley, Mono County, California, containing large amounts of sodium carbonate in solution. [Anderson (a, 14).]

**SODBRENNEN** (Ger.), n. Sod'bre'n-ne'n. See **PYROSIS**.

**SODEN** (Ger.), n. Sod'e'n. 1. A place in Hesse-Nassau, Prussia, where there are springs containing sodium chloride, potassium sulphate, magnesium carbonate, and free carbonic acid. 2. A place in Lower Franconia, Bavaria, where there are springs containing sodium and calcium chlorides and magnesium bromide. [a, 14.]

**SODIC**, adj. Sod'ik. Lat., *sodicus, naticus*. Fr., *sodique*. Containing or derived from sodium. [B.]

**SODIC-CHALYBEATE**, adj. Sod'ik-ka'l-i'b'e'e-at. Containing sodium and iron. [a, 48.]

**SODIC-POTASSIC**, adj. Sod'ik-po't-a's'ik. See **SODIO-POTASSIC**.

**SODIO-AURIC**, adj. Sod'io-a'u'r'ik. Containing sodium and gold. [a, 48.]—**S.-a. chloride**. See **GOLD and sodium chloride**.

**SODIO-BARYTIC**, adj. Sod'io-o-ba'r-i'ik. Containing sodium and barium. [B. 2.]

**SODIO-FERRIC**, adj. Sod'io-fe'r'ik. Containing sodium and iron. [a, 48.]—**S.-f. citrophosphate**. See **FERRI phosphas**.

**SODIO-POTASSIC**, adj. Sod'io-po't-a's'ik. Containing sodium and potassium. [B.]

**SODIUM** (Lat.), n. n. Sod'io-u'm(u'm). A metallic element discovered in 1807 by Sir H. Davy, who prepared it by electrolysis of caustic soda. It is one of the alkali metals, of a silvery-white color, waxy at ordinary temperature, melting at 95.6° C., and volatilizing at a red heat. It readily oxidizes on exposure to moisture, and unites with potassium to form an alloy which at ordinary temperatures is a liquid resembling mercury. Atomic weight, 23; symbol, Na (for natrium); sp. gr., 0.972. [B. 95 (a, 38).]—**Acid s. carbonate**. See **S. bicarbonate**.—**Acid s. chromate**. See **S. dichromate**.—**Acid s. metantimonate**. A crystalline substance, Na<sub>2</sub>H<sub>2</sub>SB<sub>3</sub>O<sub>6</sub>·6H<sub>2</sub>O, distinguished as being the only salt of s. insoluble in cold water. Its formation is therefore used as a test for the presence of s. [B. 3.]—**Acid s. sulphite**. See **S. bisulphite**.—**Anhydrous s. acetate**. Lat., *acetas sodæ anhydrous* [Belg. Ph.]. A substance, NaC<sub>2</sub>H<sub>3</sub>O<sub>2</sub>, occurring as a white powder or as a crystalline mass. [B. 95 (a, 38).]—**Basic s. salicylate**. See **Dibasic s. salicylate**.—**Bromure de s.** (Fr.). See **S. bromide**.—**Chlorure de s.** (Fr.). See **S. chloride**.—**Chlorure de s. du commerce** (Fr.). See **Sea-SALT**.—**Chlorure de s. purifié** (Fr.). See **S. chloride**.—**Chlorure d'oxyde de s.** (Fr.). See **Liquor sodæ chloratæ**.—**Chloruretum sodii depuratum**. See **S. chloride**.—**Crude s. carbonate**. Lat., *carbonas naticus* [Swed. Ph.] (*crudus* [Finn. Ph., Netherl. Ph.], see *venalis* [Dan. Ph.]), *carbonas sodæ venalis* [Belg. Ph.], *natrium carbonicum crystallinum crudum* [Russ. Ph.], *natrium subcarbonicum crudum* [Gr. Ph.], *natrium carbonicum crudum* [Ger. Ph., Swiss Ph.]. Sp., *sal de sosa* [Sp. Ph.]. Impure s. carbonate, occurring as large colorless and odorless transparent crystals of strong alkaline taste and reaction, and containing at least 32 per cent. [Ger. Ph., Finn. Ph.] (33 [Russ. Ph., Belg. Ph.], 36.17 [Swiss Ph.]) of pure anhydrous s. carbonate. [B. 95 (a, 38).]—**Crude s. sulphate**. Lat., *natrium sulfuricum* (see *sulphuricum* [Gr. Ph.]) *crudum* [Russ. Ph.]. Fr., *sulfate de soude du commerce* [Fr. Cod.]. Sp., *sal de Glaubero* [Sp. Ph.]. An impure s. sulphate, which must, however, be free from metallic substances [Gr. Ph., Russ. Ph.] (from these and also from magnesium oxide and alkaline earths [Sp. Ph.]), and have a neutral reaction [Gr. Ph., Russ. Ph.]. [B. 95 (a, 38).]—**Dibasic s. salicylate**. "Neutral" s. salicylate, C<sub>7</sub>H<sub>5</sub>NaO<sub>2</sub> = C<sub>6</sub>(H<sub>4</sub>H<sub>2</sub>H<sub>2</sub>O)Na.COONa; derived from s. salicylate by heating to 220° C. [B. 4.]—**Dried commercial s. carbonate**. Lat., *natrium carbonicum calcinatum, soda calcinata* [Russ. Ph.]. Fr., *carbonate de soude sec du commerce* [Fr. Cod.]. A white amorphous powder of no odor and caustic taste, containing, according to the Fr. Cod., at least 95 per cent. of pure s. carbonate. [B. 95 (a, 38).]—**Dried s. carbonate**. Lat., *carbonas naticus siccatus* [Dan. Ph.], *carbonas sodæ siccatus* [Belg. Ph.], *natrium* (see *natrium* [Russ. Ph.]) *carbonicum siccum* [Ger. Ph.], *natrium carbonicum dilapsum* [Swiss Ph.] (see *siccum* [Austr. Ph., Hung. Ph.]), *natrium subcarbonicum siccum* [Gr. Ph.], *sodii carbonas exsiccatus* [U. S. Ph.] (see *exsiccata* [Br. Ph.]). S. carbonate dried in various ways so as to produce a rather loose granular powder containing not more than 26 per cent. of water, whereas the undried salt contains sometimes nearly 63 per cent. [B. 95 (a, 38).]—**Dried s. phosphate**. Lat., *natrium phosphoricum siccum* [Russ. Ph.], *phosphas naticus siccatus* [Dan. Ph.]. A white powder easily soluble in water, made by drying s. phosphate crystals till they have lost about  $\frac{1}{4}$  [Dan. Ph.] ( $\frac{1}{4}$  [Russ. Ph.]) of their weight, and sifting. [B. 95 (a, 38).]—**Dried s. sulphate**. Lat., *natrium sulfuricum dilapsum* [Swiss Ph.] (see *siccum* [Ger. Ph., Austr. Ph., Hung. Ph.]), *natrium sulfuricum* (see *sulphuricum* [Gr. Ph.]) *siccum* [Russ. Ph.], *sulfas naticus siccus* [Finn. Ph.], *sulphus naticus siccatus* [Dan. Ph.]. A fine, white loose powder obtained by drying coarsely triturated s. sulphate till it has lost half its weight [Ger. Ph., Finn. Ph., Russ. Ph.] (nearly half [Austr. Ph., Dan. Ph., Hung. Ph.]), or till completely powdered [Swiss Ph.] (till completely dry [Gr. Ph.]), and sifting [Dan. Ph., Finn. Ph., Ger. Ph., Russ. Ph., Swiss Ph.]. [B. 95 (a, 38).]—**Glyceritum sodii boratis**. See **Glycerinum boracis** (under **BORAX**).—**Honey of s. borate**. See **Mel sodii boratis**.—**Hydrogen s. antimonite**. A crystalline substance, NaHSbO<sub>3</sub> = NaH<sub>2</sub>(SbO<sub>3</sub>)<sub>2</sub>. [B. 3.]—**Hydrogen s. sulphite**. See **S. sulphite**.—**Hypochloris sodii liquidus** [Belg. Ph.]. See **Liquor sodæ chloratæ**.—**Hyposulphis sodii** [Belg. Ph.]. See **S. thiosulphate**.—**Jodure de s.** (Fr.). See **S. iodide**.—**Liquor sodii arseniatæ** [U. S. Ph., Br. Ph.]. Fr., *solutio d'arsénate de soude*. Ger., *arsensaure Natronlösung*. Sp., *solución de arseniato sódico* [Sp. Ph.]. Syn.: *arsenias sodicus aqua solutus* [Fr. Cod.], *liquor arsenialis Pearson* [Belg. Ph., Swiss Ph.], *solutio arsenialis natri* [Dan. Ph.]. Solution of s. arsenate, Pearson's solution; an aqueous solution of s. arsenate containing 1 part of the anhydrous salt in 100 [U. S. Ph., Br. Ph.] (501 [Swiss Ph.], 839 [Dan. Ph.], 1,000 [Belg. Ph.], 1,008 [Fr. Cod., Sp. Ph.]) parts. [B. 95.]—**Liquor sodii car-**

**bolici.** See *Liquor NATRI carbolici*.—**Liquor sodii ethylatis** [Br. Ph.]. Lat. *liquor natrii ethylati*. A 19-per-cent. solution of s. ethylate in absolute alcohol; obtained by dissolving 1 part of metallic s. in 20 volumes of absolute alcohol. [B. 95.]—**Liquor sodii silicatis** [U. S. Ph.]. Fr. *silicate de soude liquide*. Ger. *flüssiges Wasserglas*. Solution of s. silicate, liquid (or water-) glass; a substance consisting essentially of a liquid acid s. silicate ( $\text{Na}_2\text{SiO}_3 + 2\text{SiO}_2$ ), prepared by heating together quartz-sand, anhydrous s. carbonate, and charcoal, or by dissolving silicic acid in a concentrated solution of caustic soda. It is a clear, odorless, and colorless or yellowish syrup, having a decided alkaline taste and reaction. [B. 95.]—**Lotion sulfurée avec le trisulfure de s. solide** [Fr. Cod.] (Fr.). A filtered solution of 1 part of s. sulphide in 50 parts of distilled water. [B. 95, 113.] Cf. *Lotion contre la gale*.—**Mel sodii boratis** [U. S. Ph., 1870]. Sp. *colutorio de bórax* [Sp. Ph.]. A preparation made by triturating 64 grains of borax with 1 oz. (av.) of clarified honey [U. S. Ph., 1870] (1 part of borax with 8 parts of honey and  $\frac{1}{2}$  part of glycerin [Br. Ph.]); or by dissolving 1 part of borax in 9 parts of honey of roses [Swiss Ph.] (in  $\frac{7}{8}$  of honey and 125 of decoction of barley [Sp. Ph.]).—**Monosulfure de s. cristallisé** (Fr.). See *S. monosulphide*.—**Oxyde de s. (hydraté)** (Fr.). Caustic soda. [B.]—**Paracresolate of s.** See *S. cresolate*.—**Protosulfure de s. cristallisé** (Fr.). See *S. monosulphide*.—**Protoxide de s. (Fr.)**. Caustic soda. [B. 119 (a, 38).]—**Sirap de monosulfure de s. (Fr. Cod.)** (Fr.). Lat. *syrupus cum monosulfureto sodico*. A preparation consisting of 1 part of the crystalline (hydrated) s. monosulphide dissolved in 10 parts of distilled water and mixed with 990 of syrup. [B.]—**Sodii acetates**. See *S. acetate*. For various similar Latin forms, see their obvious English equivalents.—**Sodii auroterchloridum**. See *GOLD and s. chloride*.—**Sodii biboras, Sodii boras**. See *BORAX*.—**Sodii citrotrastar effervescens** [Br. Ph.]. A dry pulverulent mixture containing 17 parts of s. bicarbonate, 9 of tartaric acid, 6 of citric acid, and 5 of sugar. On the addition of water it decomposes with effervescence, producing a compound of s. citrate and s. tartrate. [B. 5.]—**Sodii et argenti hyposulphis**. See *S. and silver thiosulphate*.—**Sodii phosphas** [U. S. Ph., Br. Ph.]. Ordinary phosphate of s.; disodic orthophosphate. [B.] See *S. phosphate*.—**Sodii tartras**. Normal s. tartrate. [B.]—**S. abietinate**. A substance,  $\text{C}_{20}\text{H}_{32}\text{O}_2\text{Na}$ , occurring as acicular crystals. [B. 270 (a, 38).]—**S. acetate**. Lat. *sodii acetat* [U. S. Ph.], *sodae acetat* [Br. Ph.], *acetat natrius* [Dan. Ph., Netherl. Ph., Swed. Ph.], *acetat sodae* [Belg. Ph.], *natrium aceticum* [Gr. Ph., Russ. Ph.], *natrium aceticum* [Aust. Ph., Ger. Ph., Swiss Ph., Hung. Ph.]. Fr. *acétate de soude cristallisé* [Fr. Cod.]. Ger. *essigsäures Natrium*. Sp. *acetato sódico* [Sp. Ph.]. A substance,  $\text{NaC}_2\text{H}_3\text{O}_2 + 3\text{H}_2\text{O}$ , occurring as efflorescent colorless prismatic crystals, moderately soluble in water, and having a salty taste. [B. 5; B. 95 (a, 21).]—**S. acetylene**. A 1-atom s. substitution product,  $\text{C}_2\text{HNa}$ , of acetylene. [B. 2.]—**S. acetylene**. A black, explosive mass,  $\text{C}_2\text{Na}$ , a compound of s. and acetylene. [B. 3.]—**S. acrylate**. A whitish mass,  $\text{NaC}_3\text{H}_3\text{O}_2$ . [B. 4.]—**S. albuminate**. A salt of albumin and s. Gerhardt supposes that there are two s. albuminates: (1) *acid s. albuminate*,  $\text{C}_{72}\text{H}_{111}\text{Na}_{11}\text{SO}_{22}$ , the form of the salt in which albumin naturally occurs in the blood, white of egg, etc.; and (2) *neutral s. albuminate*,  $\text{C}_{72}\text{H}_{111}\text{Na}_1\text{SO}_{22} + \text{H}_2\text{O}$ , one of the products of the decomposition of the acid salt by heat, the other product being free albumin. [B. 2.]—**S. allylene**. A colorless, crystalline powder,  $\text{C}_3\text{HNa}$ , that becomes resinous and often ignites when exposed to the air. [B. 3 (a, 38).]—**S. amalgam**. A compound of s. with mercury. It varies in consistence, according to the amount of mercury, from an oily liquid to a crystalline solid. When suitable proportions of s. and mercury are used, the crystalline compounds  $\text{Hg}_2\text{Na}_2$  and  $\text{Hg}_2\text{Na}_4$  are formed. [B. 3.]—**S. amidosulphonate**. The compound  $\text{NH}_2\text{SO}_3\text{ONa}$ . [E. Berglund, "Proc. of the Am. Pharm. Assoc." 1879, p. 331 (B).]—**S. ammonium, and hydrogen phosphate**. See *AMMONIUM and s. phosphate*.—**S. and ammonium arsenate**. A crystalline solid,  $\text{NaNH}_4\text{HAsO}_4 + 4\text{H}_2\text{O}$ . [B. 2.]—**S. and ammonium phosphate**. See *AMMONIUM and s. phosphate*.—**S. and potassium arsenate**. A crystalline body,  $\text{NaK.HAsO}_4 + 16\text{H}_2\text{O}$ . [B. 2.]—**S. and potassium borotartarate**. A compound of 1 part of borax with from 2 to 3 parts of potassium bitartrate. [B. 95 (a, 38).] Cf. *TARTARUS boracatus*.—**S. and potassium citrate**. A double salt prepared by dissolving 100 parts of citric acid in water and adding 108 parts of potassium carbonate and 231 of s. carbonate. [B. 5.]—**S. and silver hyposulphite (or thiosulphate)**. Lat. *sodii et argenti hyposulphis*. A very sweet, crystalline salt, readily soluble in water, formed by dissolving silver oxide in a solution of s. hyposulphite. [B. 5.]—**S. antimonate**. The compound  $\text{NaSbO}_3 + 7\text{H}_2\text{O}$ . [B. 3 (a, 38).]—**S. antimonite**. The compound  $\text{NaSbO}_2 + 3\text{H}_2\text{O}$ . [B. 3.] See also *Hydrogen s. antimonite*.—**S. arsenate**. Lat. *sodii (seu natrii, seu natrii) arsenas* (seu *arsenias*). Ger. *arsenaures Natrium*. A compound of s. and arsenic. The s. arsenates include (1) *normal s. arsenate*, *trisodic arsenate*, a crystalline body,  $\text{Na}_3\text{AsO}_4 + 12\text{H}_2\text{O}$ ; (2) *disodic arsenate*, the common s. arsenate, the *sodii arsenas* of the U. S. Ph. and Br. Ph. (Fr. *arséniate de soude* [Fr. Cod.], syn.: *arsenias sodicus* [Fr. Cod.] *natrium arsenicum* [Swiss Ph.], *arsenias sodae acutus* [Belg. Ph.]),  $\text{Na}_2\text{HAsO}_4$ , forming crystals which combine with various proportions of water of crystallization (the official salt containing 7 molecules), except that according to the Belg. Ph. it is anhydrous; used in the preparation of *liquor sodii arsenitis* and *charta arsenicalis*; (3) *monosodic arsenate*, a *dihydrogen arsenate*,  $\text{NaH}_2\text{AsO}_4$ , forming large crystals readily soluble in water. [B. 2, 5.]—**S. arsenofluoride**. The compound  $\text{Na}_3\text{AsF}_6$ . [B. 2.]—**S. arsenosulphate**. A body which, according to the mode of its preparation, has the composition  $\text{Na}_3\text{As}_2\text{O}_7 \cdot 2\text{Na}_2\text{SO}_4$ , or  $\text{Na}_4\text{As}_2\text{O}_7 \cdot \text{Na}_2\text{SO}_4$ , the latter being a compound of s. pyroarsenate with s. sulphate. [B. 2.]—**S. aurosulphide**. See *GOLD and s. sulphide*.—**S. aurosulphate**. See *GOLD and s. sulphate*.—**S. auroterchloride**. See *GOLD and s. chloride*.—**S. aurothiosulphate**. See *GOLD and s. thiosulphate*.—**S. benzoate**.

Lat., *sodii benzoas* [U. S. Ph.], *natrium benzoicum* [Ger. Ph.], *benzoas sodicus* [Belg. Ph.]. Fr. *benzoate de soude* [Fr. Cod.]. Ger. *Natriumbenzoat*. A compound,  $\text{NaC}_6\text{H}_5\text{O}_2 + \text{H}_2\text{O}$ , of s. and benzoic acid, occurring as acicular crystals or as a white efflorescent powder, soluble in water, and of a sweetish but astringent taste. The German salt is anhydrous. It has been used in cystitis, phthisis, and various infectious diseases. [B. 3, 95 (a, 38).]—**S. bicarbonate**. See *BORAX*.—**S. bicarbonate**. Lat. *sodii bicarbonas* [U. S. Ph., Br. Ph.], *natrium bicarbonicum* [Ger. Ph., Swiss Ph.] (seu *hydrocarbonicum* [Aust. Ph., Hung. Ph.]), *bicarbonas sodae* [Belg. Ph.] (seu *natrius* [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]), *natrium bicarbonicum* [Russ. Ph.] (*acidulum* [Gr. Ph.]). Fr. *carbonate (bi-) de soude* [Fr. Cod.]. Ger. *doppeltkohlensaures Natrium*. Acid s. carbonate,  $\text{NaHCO}_3$ , occurring as a very white powder or as a white crystalline mass, of no odor and a cool, slightly saline taste, soluble in alcohol and in from 12 to 14 parts of cold water. [B. 95 (a, 38).]—**S. bichromate**. See *S. dichromate*.—**S. bisulphate**. See *S. sulphate*.—**S. bisulphite**. Lat. *sodii bisulphis* [U. S. Ph.], *natrium bisulfurosum*. Fr. *bisulfite de soude* [Fr. Cod.]. A substance,  $\text{NaHSO}_3$ , occurring as transparent prismatic or irregular crystals or as a coarse powder of disagreeable sulphurous taste. [B. 95 (a, 38).]—**S. borate**. Fr. *borate de s.* Ger. *Natriumborat*. A compound of s. and boric acid. The borates of s. are the orthoborate,  $\text{Na}_2\text{BO}_3$ , an unstable salt, the pyroborate (see *BORAX*), and the metaborate,  $\text{NaBO}_2 + 4\text{H}_2\text{O}$ , a crystalline body. [B. 3.] See also *S. tetraborate*.—**S. borodisalicylate**. A substance,  $\text{NaBO}_2\text{C}_6\text{H}_4\text{O}_2$ , formed by the action of borax on salicylic acid, and occurring as white opaque crystals. Its solution is very bitter and has an acid reaction. [Jahns, "Arch. d. Pharm." Mar., 1878, p. 212; "Proc. of the Am. Pharm. Assoc." (1878), p. 538 (B).]—**S. bromide**. Lat. *sodii bromidum* [U. S. Ph., Br. Ph.], *natrium bromatum* [Ger. Ph., Swiss Ph., Hung. Ph., Russ. Ph.], *bromure de s.* [Fr. Cod.]. Ger. *Bromnatrium*. A compound,  $\text{NaBr}$ , of s. and bromine, occurring as whitish or colorless cubical or prismatic bitterish, salty crystals, readily soluble in water. When crystallizing in the prismatic form, the salt contains two molecules of water of crystallization. Used in medicine like potassium bromide. [B. 3, 5.]—**S. butyrate**. A substance,  $\text{C}_4\text{H}_7\text{O}_2\text{Na}$ , used as a hypnotic. [Janovsky, "Ann. di chim. e di farm." Mar., 1886, p. 194 (B).]—**S. camphophenate, S. camphor**. A substance,  $\text{C}_{10}\text{H}_{12}\text{O}_2\text{Na}$ , obtained by adding s. to a solution of camphor in benzene or toluene. [B. 3 (a, 38).]—**S. carbolate**. A white crystalline substance,  $\text{C}_6\text{H}_5\text{NaO}$ . Its aqueous solution is liquor natrii carbolici. [B.]—**S. carbonate**. Lat. *sodii carbonas* [U. S. Ph., Br. Ph.], *carbonas natrius* [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph.] (*depuratus* [Swed. Ph.]), *carbonas sodae* [Belg. Ph.], *natrium carbonicum* [Ger. Ph., Swiss Ph.] (*crystallissimum* [Aust. Ph., Hung. Ph.]), *natrium carbonicum crystallissimum depuratum* [Russ. Ph.], *natrium subcarbonicum depuratum* [Gr. Ph.], *alcali minerale*. Fr. *carbonate de soude pur cristallisé* [Fr. Cod.], *sel de soude cristallisé, cristaux de soude*. Ger. *kohlensaures Natrium*. Sp. *carbonato sódico* [Sp. Ph.]. A substance,  $\text{Na}_2\text{CO}_3 + 10\text{H}_2\text{O}$ , occurring as colorless transparent crystals or a white crystalline powder of strong alkaline taste, easily soluble in water, insoluble in alcohol, and melting at about  $35^\circ\text{C}$ . [U. S. Ph.] in its water of crystallization. [B. 95 (a, 38).]—**S. chlorate**. Lat. *chloras natrius* [Swed. Ph.], *natrium chloricum* [Swiss Ph.], *sodii chloras* [U. S. Ph.]. Fr. *chlorate de soude* [Fr. Cod.]. A compound,  $\text{NaClO}_3$ , occurring as large tetrahedral crystals, soluble in rather more than their own weight of water; readily explosive, especially when in contact with organic substances. It has been used as a cholagogue. [B. 5.]—**S. chloraurate**. See *GOLD and s. chloride*.—**S. chloride**. Lat. *sodii chloridum* [U. S. Ph., Br. Ph.], *chloruretum sodii depuratum* [Belg. Ph.], *natrium chloratum* [Ger. Ph.] (*depuratum* [Russ. Ph.]), *chlorureum natrium* [Finn. Ph., Netherl. Ph.], *natrium muriaticum* [Gr. Ph.]. Fr. *chlorure de s. purifié* [Fr. Cod.]. Ger. *Natriumchlorür, Kochsalz*. Sp. *cloruro sódico* [Sp. Ph.]. Common salt, table salt, purified cooking or sea salt; a substance,  $\text{NaCl}$ , occurring as cubical crystals of agreeable saline taste, melting at  $776^\circ\text{C}$ . S. chloride is an important constituent of the animal organism and of many articles of food. In strong solution, it is antiseptic, and, applied to the skin by friction, is stimulating and tonic. [B. 95 (a, 38).]—**S. chloroplatinate**. See *S. platinumchloride*.—**S. choleate, S. choleinate**. See *S. tauricholate*.—**S. chromate**. A body,  $\text{Na}_2\text{CrO}_4 + 10\text{H}_2\text{O}$ , forming yellow deliquescent prismatic crystals. [B. 3.]—**S. citrate**. A salt of s. and citric acid. Normal s. citrate,  $\text{Na}_2\text{C}_6\text{H}_5\text{O}_7 + 5\text{H}_2\text{O}$  (Lat. *citras sodae* [Belg. Ph.], *natrium oxydatum citricum* [Gr. Ph.]); Ger. *neutrales citronensaures Natrium*; Sp. *citrato sódico* [Sp. Ph.]), forms white pyramidal crystals of saline taste and mildly purgative. Two other s. citrates,  $\text{Na}_2\text{C}_6\text{H}_4\text{O}_7$  and  $\text{NaC}_6\text{H}_4\text{O}_7$ , are known. [B. 5; B. 95 (a, 38).]—**S. copalvate**. Ger. *copalvsaures Natrium*. A substance,  $\text{C}_{20}\text{H}_{22}\text{O}_2\text{Na}$ , isomeric with s. abietinate, obtained by mixing equal quantities of soda and copalvate acid. [B. 5 (a, 38).]—**S. cressolate**. A white, microcrystalline, bitter powder, slightly soluble in water; used in rheumatism and pneumonia and as an antipyretic and intestinal antiseptic. [a, 34.]—**S. dichromate**. A salt,  $\text{Na}_2\text{Cr}_2\text{O}_7 + 2\text{H}_2\text{O}$ , forming thin yellowish-red prismatic crystals which deliquesce on exposure to air. [B. 3.]—**S. dioxide**. See *S. peroxide*.—**S. disulphate**. Ger. *Natriumdissulfat*. 1. Acid s. sulphate (see under *S. sulphate*). 2. See *S. pyrosulphate*.—**S. disulphite**. 1. See *S. bisulphite*. 2. A salt,  $\text{Na}_2\text{S}_2\text{O}_4$ , formed by the action of sulphur dioxide on s. carbonate. [B. 3.]—**S. ditithio-salicylate**. A compound of s. salicylate and sulphur. Two such compounds exist, known as i and ii. Salt ii, a compound of 2 atoms of sulphur and 2 molecules of s. salicylate, is a grayish white, hygroscopic powder, very soluble in water. It has been recommended as preferable to s. salicylate in rheumatism and as an antiseptic. ["Nouv. rem." Sept. 24, 1889, p. 477; "Am. Jour. of Pharm." Nov., 1889, p. 560; "N. Y. Med. Jour." Dec. 14, 1889, p. 600 (a, 50).]—**S. ethide, S. ethyl**. The compound  $\text{NaC}_2\text{H}_5$ ; not yet obtained entirely pure. [B. 3.]—**S. ethylate**. Syn.: *caustic alcohol*. A body,  $\text{C}_2\text{H}_5\text{ONa}$ , crystallizing from a solution

of s. in ethyl alcohol in the form of acicular crystals united with two molecules of ethyl alcohol of crystallization,  $2C_2H_5O$ . When deprived of the latter it appears as a white amorphous powder. It decomposes on contact with organic matter with production of metallic s., which oxidizes and so may be used as a caustic for nœvi, etc. [Richardson, "Lancet," Jan. 29, Feb. 12, 1887 (B).]—**S. ethylsulphate**. Lat., *ethylsulphas sodicus*, *Natrium-æthyl-sulfuricum*. Fr., *sulfonate de soude* [Fr. Cod.]. Ger., *äthylschwefelsaures Natrium*, *Natriumsulfonate*. A substance,  $Na_2C_2H_5SO_4 + H_2O$ , occurring as sweet, colorless, six-sided tabular crystals. Used as a purgative. [B. 95 (a, 38).]—**S. ferrocyanide**. Ger., *Natriumferrocyanür*, *Ferrocyanid-Natrium*. A substance,  $Na_4Fe(C_5N_3)_2 + 12H_2O$ , occurring as yellowish efflorescent crystals. [B.]—**S. fluoride**. A compound of s. and fluorine, NaF. [B.]—**S. fluosilicate**. See *S. silicofluoride*.—**S. formanilide**. A substance,  $C_6H_5N(CH_3)Na$ , derived from formanilide by replacing hydrogen by s. [B. 4.]—**S. glyceroborate**. An antiseptic obtained by melting together equal parts of glycerin and s. borate. [Le Bon, "Compt. rend.," xcv, p. 145 (B).]—**S. glycocholate**. Lat., *Natrium choleincicum*. Ger., *Natriumcholal*. A substance,  $C_{25}H_{49}NO_9Na$ , occurring in ox-gall, obtainable as star-shaped groups of acicular crystals. [B. 270 (a, 38); K.]—**S. hippurate**. A substance,  $(C_6H_5NaNO_2)_4 + H_2O$ , occurring as a crystalline mass. [B. 3 (a, 38).]—**S. hydracrylate**. Ger., *Natriumhydracrylat*. A colorless crystalline salt,  $C_3H_5O_2Na$ , isomeric with s. lactate. [B. 3 (a, 38); B. 4.]—**S. hydrate**. See Soda (1st def.).—**S. hydride**. See *S. hydrogenide*.—**S. hydrobromate**. See *S. bromide*.—**S. hydrocarbonate**. See *S. bicarbonate*.—**S. hydrochloride**. See *S. chloride*.—**S. hydrogenide**. A compound,  $NaH_2$ , of s. with hydrogen considered as a metal, the fused s. taking up by occlusion 237 times its volume of hydrogen and forming an alloy of silvery-white metallic lustre. [B.]—**S. hydrosulphide**. The compound NaSH. [B.]—**S. hydrosulphite**. A substance,  $NaHSO_3$ , occurring as delicate acicular crystals; a reducing agent. [B. 3.]—**S. hydroxide**. A compound of s. with hydroxyl, Na—OH, formed by the oxidation of metallic s., or, on a commercial scale, by the decomposition of s. carbonate by quicklime. [B.]—**S. hypochlorite**. Lat., *sodii hypochloris* [U. S. Ph.], *sodæ hypochloris* [Br. Ph.]. A compound, NaOCl, of s. and hypochlorous acid. It has not been isolated, but occurs in combination with s. chloride in liquor sodæ chlorate. [B. 3.]—**S. hypophosphite**. Lat., *sodii hypophosphis* [U. S. Ph., Br. Ph.], *hypophosphis sodii* [Belg. Ph.], *hypophosphis natrius* [Netherl. Ph.], *natrium hypophosphorum* [Russ. Ph.]. Fr., *hypophosphite de soude* [Fr. Cod.]. Ger., *Natriumhypophosphit*. A substance,  $NaH_2PO_3 + H_2O$ , occurring as colorless tabular crystals or as an amorphous or crystalline powder of no odor and a sweetish saline [U. S. Ph.] (disagreeable, bitter [Br. Ph.]) taste, easily soluble in water or dilute alcohol. The salt of the Br. Ph. and the Fr. Cod. seems to be anhydrous. [B.; B. 95 (a, 38).]—**S. hyposulphate**. See *S. thiosulphate* and *S. hydrosulphite*.—**S. hypovanadate**. A salt,  $Na_2V_2O_7 + 7H_2O$ . [B. 3.]—**S. ichthyol-sulphonate**. See ICHTHYOL (2d def.).—**S. iodide**. Lat., *sodii iodidum* [U. S. Ph., Br. Ph.], *natrium iodatum* [Hung. Ph., Russ. Ph.]. Fr., *iodure de s.* [Fr. Cod.]. Ger., *Jodnatrium*. A compound of s. and iodine, NaI, occurring as fine cubical or prismatic crystals or as a white crystalline powder, very soluble in water and having a salty taste. In the prismatic form [Hung. Ph.] the salt contains two molecules of water of crystallization. It has lately been recommended in angina pectoris. [B. 5; B. 95 (a, 38).]—**S. isovalerate**. See *S. valerianate*.—**S. lactate**. A compound of s. and lactic acid. Different s. lactates are known; one,  $C_3H_5O_2Na$ , forming hair-shaped crystals which melt at about  $150^\circ C$ ; another, *basic s. lactate*,  $C_3H_5O_2Na_2 = CH_3CH(OH)COONa$ ; and a third,  $Na_2C_4H_9O_6$ , the *lactas soda* of the Belg. Ph. and *natrium lacticum* of the Swiss Ph., occurring as an odorless, yellow, crystalline mass or crust or as a yellow, syrupy liquid soluble in water or alcohol. [B. 4; B. 3, 95 (a, 38).]—**S. manganate**. A substance,  $Na_2MnO_4 + 10H_2O$ , forming small green crystals. [B. 3.]—**S. metantimonate**. 1. As ordinarily used, see *S. pyroantimonate*. 2. See *Acid s. metantimonate*.—**S. metaphosphate**. A salt of s. and metaphosphoric acid. The metaphosphates of s. are: (1) the *monometaphosphate*,  $NaPO_3$ , a whitish powder; (2) the *dimetaphosphate*,  $Na_2P_2O_5 + 2H_2O$ , acicular crystals; (3) the *trimetaphosphate*, or crystallizable, metaphosphate,  $Na_3P_3O_{10} + 6H_2O$ , prismatic crystals; and (4) the *tetrametaphosphate*,  $Na_4P_4O_{12}$ , a gelatinous mass. [B.]—**S. metastannate**. 1. A crystalline powder,  $Na_2Sn_2O_7 + 4H_2O$  (or  $Na_2H_2Sn_2O_{11}$ ). 2. The compound  $Na_2Sn_2O_7 + 8H_2O$ . [B. 3.]—**S. metatingstate**. A body,  $Na_2W_2O_{13} + 10H_2O$ , forming efflorescent octahedral crystals. [B. 3.]—**S. metavanadate**. The substance  $NaVO_3$ . [B. 3.]—**S. methazonate**. A highly explosive body,  $C_2H_5NaN_2O_3$ , formed by heating nitromethane with an alcoholic solution of s. hydrate. [B. 3.]—**S. molybdate**. Lat., *molybdæna natrius* [Swed. Ph.]. A substance,  $Na_2MoO_4 + 2H_2O$ , occurring as small, shining, white crystals. Several other s. molybdates are known, such as s. bimolybdate,  $Na_2Mo_2O_7$ ; s. trimolybdate,  $Na_2Mo_3O_{10} + 7H_2O$ , etc. [B. 95, 270 (a, 38).]—**S. monosulphide**. Lat., *sulphureum sodii crystallisatum* [Belg. Ph.]. Fr., *monosulfure de s. cristallisé* [Fr. Cod.]. Sp., *sulfuro sódico cristallizado* [Sp. Ph.]. A substance,  $Na_2S + 9H_2O$ , occurring as colorless or pale transparent crystals. [B. 95 (a, 38).]—**S. monoxide**. A grayish mass,  $Na_2O$ , melting at a dull-red heat. [B. 3.]—**S. muriate**. See *S. chloride*.—**S. nitrate**. Lat., *sodii nitrus* [U. S. Ph., Br. Ph.], *nitrus sodæ* [Belg. Ph.], *natrium* (seu *natrium* [Russ. Ph.]) *nitricum* [Ger. Ph., Swiss Ph., Hung. Ph.], *nitrus natrius* [Netherl. Ph., Norw. Ph., Swed. Ph.]. Fr., *azotate de soude* [Fr. Cod.]. Ger., *Natriumsalpeter*, *salpetersaures Natrium*. Sp., *nitró cubico* [Sp. Ph.]. A salt,  $NaNO_3$ , forming rhomboedral crystals, of a salty, bitterish taste; used in angina pectoris, epilepsy, and spasmodic asthma. [B. 5; B. 95 (a, 38); a, 34].—**S. orthophosphate**. See under *S. phosphate*.—**S. orthoxybenzoate**. See *S. salicylate*.—**S. oxide**. See *S. monoxide* and *S. peroxide*.—**S. paratingstate**. A crystalline substance,  $Na_{10}W_{10}O_{41} + 25$  (or 25, or 21)  $H_2O$ ; used as a mordant and for rendering fabrics

incombustible. [B. 3.]—**S. peptochloride**. See *SAL pepticus*.—**S. perchlorate**. A substance,  $NaClO_4$ , occurring as deliquescent crystals very soluble in water. [B. 3.]—**S. permanganate**. A deliquescent substance,  $NaMnO_4$ , resembling potassium permanganate. [B. 3.]—**S. peroxide**. Ger., *Natriumdioxyd*. A white deliquescent body,  $Na_2O_2$ , which combines with various proportions of water of crystallization to form crystalline compounds. [B. 3.]—**S. phenate**. See *S. carbolate*.—**S. phenolsulphonate**. See *S. sulphocarbolate*.—**S. phenylacetylene**. A white powder,  $C_8H_6$ ,  $C_2Na$ , igniting when exposed to the air. [B. 3, 4 (a, 38).]—**S. phenylate**. See *S. carbolate*.—**S. phenylsulphate**. See *S. sulphocarbolate*.—**S. phenylsulphonate**. The compound  $C_6H_5SO_3ONa$ . [B. 4.]—**S. phosphate**. A salt of s. and phosphoric acid. The orthophosphates include three different salts: (1) the *normal orthophosphate*, or *s. phosphocarbonate*,  $Na_3PO_4 + 12H_2O$ , forming thin prismatic crystals; (2) the *disodium hydrogen orthophosphate*, or *ordinary s. phosphate* (Lat., *sodii phosphas* [U. S. Ph., Br. Ph.], *natrium* (seu *natrium* [Russ. Ph.]) *phosphoricum* [Ger. Ph., Austr. Ph., Hung. Ph., Swiss Ph.], *natrium subphosphoricum* [Gr. Ph.], *phosphas natrius* [Dan. Ph., Finn. Ph., Netherl. Ph., Swed. Ph.], *phosphas sodæ* [Belg. Ph.]; Fr., *phosphate de soude* [Fr. Cod.]; Sp., *fosfato sódico* [Sp. Ph.]),  $Na_2HPO_4 + 12H_2O$ , occurring as large transparent, prismatic crystals, which readily effloresce and are moderately soluble in water; and (3) the *dihydrogen s. orthophosphate*,  $NaH_2PO_4 + 4H_2O$ , forming large transparent crystals, very soluble in water and of an acid reaction. Used as a purgative, in hepatic lithiasis, and, hypodermically (as an ingredient of an artificial serum), as a nerve tonic. [B. 3; B. 95 (a, 38); a, 34]. See also *S. pyrophosphate* and *S. metaphosphate*.—**S. phosphocarbonate**. See under *S. phosphate*.—**S. picrate**. A yellow, crystalline, bitter substance,  $C_6H_2(NO_2)_3ONa$ . It explodes on heating. [B. 5.]—**S. platinate**. A reddish-yellow powder,  $Na_2Pt_2O_7 + 6H_2O$ . [B. 3.]—**S. platinumchloride**. A yellowish-red body,  $Na_2PtCl_6 + 6H_2O$ , readily soluble in water and in alcohol. [B. 3.]—**S. platinosulphite**. A microcrystalline powder,  $Na_2Pt(SO_3)_4 + 7H_2O$ . [B. 3.]—**S. polysulphide**. See *S. trisulphide*.—**S. polytungstates**. The compounds  $Na_2W_2O_7 + 2H_2O$ ,  $Na_4W_3O_{11} + 7H_2O$ ,  $Na_4W_6O_{17} + 11H_2O$ , and  $Na_6H_2W_{12}O_{41} + 16$  (or 21)  $H_2O$ , and the so-called *s. paratungstate*. [B.]—**S. propylenedisulphonate**. A salt,  $Na_2C_3H_5S_2O_6 + H_2O = CH_2 - CH(SO_3Na) - CH_2SO_3Na + H_2O$ , forming minute granular hygroscopic crystals. [B.]—**S. pyrophosphate**. A salt of s. and pyrophosphoric acid. The pyrophosphates of s. are: (1) the *normal pyrophosphate* (Lat., *sodii pyrophosphas* [U. S. Ph.], *natrium* (seu *natrium* [Ger. Ph., 1st ed., Russ. Ph.]), *pyrophosphoricum*, *pyrophosphas natrius* [Netherl. Ph.], *pyrophosphas sodæ* [Belg. Ph.]; Fr., *pyrophosphate de soude* [Fr. Cod.]),  $Na_2P_2O_7 + 10H_2O$ , forming colorless prismatic crystals, moderately soluble in water, and having a cooling, salty taste; and (2) the *acid pyrophosphate*, *dihydrogen s. pyrophosphate*,  $NaH_2P_2O_7$ , an acid crystalline powder. [B. 3; B. 95 (a, 38).]—**S. pyrosulphate**. A salt,  $Na_2S_2O_7$ . [B. 3.]—**S. pyrovanadate**. A salt,  $Na_2V_2O_7 + 18H_2O$ . [B. 3.]—**S. saccharate**. See *S. saccharose*.—**S. sacrylate**.—**S. salicylate**. Normal s. salicylate—Lat., *sodii salicylas* [U. S. Ph., Br. Ph.], *salicylas sodæ* [Belg. Ph.] (seu *natrius* [Finn. Ph., Norw. Ph., Swed. Ph.]), *natrium* [Ger. Ph., Austr. Ph.] (seu *natrium* [Russ. Ph.]) *salicylicum*; Fr., *salicylate de soude* [Fr. Cod.]; Ger., *salicylsäures Natrium*, *Natriumsalicylat*; Sp., *salicilatosódico* [Sp. Ph.]), is a substance,  $Na_2(C_6H_5O_2)_2 + H_2O$ , occurring as colorless crystalline scales or as a white powder containing water of crystallization [U. S. Ph., Br. Ph.] (anhydrous [Fr. Cod., Ger. Ph., Finn. Ph.]), of no odor but of a salty taste. It is used in rheumatism, migraine, etc., also as an intestinal disinfectant. Besides this and the *basic s. salicylate* (see *Dibasic s. salicylate*), *acid s. salicylate* is known, a substance forming colorless, hard, transparent crystals which are decomposed, with evolution of salicylic acid, on contact with water. [B. 3; B. 95 (a, 38); a, 34].—**S. santonate**, *S. santoninate*. Lat., *sodii santoninas* [U. S. Ph.], *natrium* (seu *natrium* [Ger. Ph., 1st ed., Russ. Ph.]) *santonicum* [Swiss Ph.]. Ger., *Natriumsantonat*. A salt,  $NaC_{15}H_{15}O_4$ , usually combined with water of crystallization, a double molecule of the salt taking up 7 molecules of water,  $2NaC_{15}H_{15}O_4 + 7H_2O$ . It occurs as colorless tabular crystals of no odor but of somewhat salty and bitter taste. [B. 5; B. 95 (a, 38).]—**S. sesquicarbonate**. A substance,  $Na_2H_2CO_3 + 3H_2O = Na_2CO_3 + (NaHCO_3)_2 + 3H_2O$ , occurring as small transparent prismatic crystals. It forms the native soda found in Egypt, known in commerce as *trona*. [B. 5; B. 270 (a, 38).]—**S. silicate**. A salt of s. and silicic acid. The silicates of s. are the *metasilicate*,  $Na_2SiO_3$ , the *trisilicate*,  $Na_6Si_3O_{10}$ , and the *tetrasilicate*,  $Na_8Si_4O_{20}$ . The last-named is the ordinary s. silicate, or soluble glass (Ger., *Natriumwasserglas*), a transparent vitreous mass, which, dissolved in water, forms liquor sodii silicatis. [B.]—**S. silicofluoride**. A pulverulent, odorless body,  $Na_2SiF_6$ , moderately soluble in water. It is known as *salufer*, and is used as a surgical antiseptic. [B. 3.]—**S. stannate**. Ger., *zinnsaures Natrium*. A crystalline substance,  $Na_2SnO_3 + 3$  (or 10)  $H_2O$ , used in calico-printing. [B. 3.]—**S. sucrate**. A translucent substance,  $C_{12}H_{21}NaO_{11}$ , of alkaline taste. [B. 3.]—**S. sulphantimonate**. See *S. thioantimonate*.—**S. sulphate**. The s. sulphates include: (1) the *normal sulphate* (Lat., *sodii sulphas* [U. S. Ph., Br. Ph.], *natrium sulphuricum* [Ger. Ph., Swiss Ph.], *crystalisatum* [Austr. Ph., Hung. Ph.]), *natrium sulphuricum* (seu *sulphuricum* [Gr. Ph.]) *depuratum* [Russ. Ph.], *sulfas* (seu *sulphas* [Dan. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]) *natrius* [Finn. Ph.], *sulphas sodæ* [Belg. Ph.]; Fr., *sulfate de soude purifié* [Fr. Cod.]; Sp., *sulfato sódico* [Sp. Ph.]),  $Na_2SO_4$ , which occurs in combination with either seven or ten molecules of water of crystallization, in the latter case constituting the official salt, and forming prismatic efflorescent crystals, used as a purgative; and (2) the *acid sulphate*, or *hydrogen s. sulphate*,  $NaHSO_4$ , occurring as large prismatic crystals which are either anhydrous or combine with two molecules of water of crystallization. [B. 3; B. 95 (a, 38); a, 34].—**S. sulphibenzoate**. An antiseptic salt obtained by dissolving s.

benzoate in a strong solution of s. sulphite. [Proc. of the Am. Pharm. Assoc., xxxvi, p. 528 (a, 50).]—**S. sulphide.** The sulphides of s. are: (1) *s. monosulphide* (q. v.); (2) *s. disulphide*,  $\text{Na}_2\text{S}_2 + 5\text{H}_2\text{O}$ , forming yellow acicular crystals; (3) *s. trisulphide* (q. v.); (4) *s. tetrasulphide*,  $\text{Na}_2\text{S}_4 + 8\text{H}_2\text{O}$ , crystallizing at  $-15^\circ\text{C}$ . as orange crystals; and (5) *s. pentasulphide*,  $\text{Na}_2\text{S}_5 + 8\text{H}_2\text{O}$ , crystallizing at  $-5^\circ\text{C}$ . as deep-orange crystals. [B. 270 (a, 38).]—**S. sulphite.** A salt of s. and sulphurous acid. The normal s. sulphite,  $\text{Na}_2\text{SO}_3$ , combines with various proportions of water of crystallization. The salt official in the U. S. Ph. and Br. Ph. as *sodii sulphitis*, the *sulphitis natrius* of the Netherl. Ph., contains 7 molecules of water of crystallization, and occurs as transparent prismatic crystals having a salty, sulphurous taste and moderately soluble in water; used as an antiseptic. For the acid s. sulphite, or hydrogen s. sulphite, see *S. bisulphite*. [B. 5; B. 95 (a, 38).] See also *S. disulphite* (2d def.).—**S. sulphocarbonate.** Lat., *sodii sulphocarbonatis* [U. S. Ph., Br. Ph.]. Ger., *phenolsulfonsaures Natrium*. A salt,  $\text{NaC}_6\text{H}_4\text{SO}_3 + 2\text{H}_2\text{O}$ , forming colorless prismatic crystals having little or no odor and a somewhat bitter, salty taste. It has been recommended as an antiseptic and in flatulent dyspepsia. [B. 5; B. 95 (a, 38).]—**S. sulphocresylate.** Fr., *sulfocresylate de soude*. Ger., *Natrium-sulfocresylat*, *kresolschwefelsaures Natrium*. The substance  $\text{C}_6\text{H}_4\text{O}_3\text{Na} = (\text{C}_6\text{H}_3\text{O}_3\text{CH}_3)_2\text{O} \cdot \text{Na}_2\text{O}$ . [B. 5.]—**S. sulphaichthyolate.** See *Ichthyol*, (2d def.).—**S. sulphomethylate.** A purgative substance,  $\text{CH}_3\text{NaSO}_3 + \text{H}_2\text{O}$ . [B. 5 (a, 38).]—**S. sulphovinate.** See *S. ethylsulphate*.—**S. sulphhydrate.** See *S. hydrosulphide*.—**S. tartrate.** A salt of s. and tartaric acid. There are two s. tartrates: (1) *Normal, or neutral, s. tartrate* (Lat., *sodii tartras*,  $\text{C}_4\text{H}_4\text{K}_2\text{O}_{11} + 2\text{H}_2\text{O}$ ); and (2) *acid s. tartrate, or s. bitartrate* (Lat., *sodii bitartras*,  $\text{C}_4\text{H}_4\text{KO}_9$ ). [B. 5.]—**S. tetracholate.** A substance,  $\text{C}_{24}\text{H}_{32}\text{O}_8\text{Na}$ , occurring in ox-gall and obtainable as an amorphous oily or resinous mass; used in gouty obesity, torpor of the liver, and dyspepsia. [B. 5, 270 (a, 38; a, 34).]—**S. tellurate.** A compound of s. and telluric acid; used to reduce night-sweats. [a, 34.]—**S. tetraborate.** A compound obtained by heating a mixture of equal parts of borax, boric acid, and water. Recommended as a substitute for boric acid as an antiseptic, from its being much more soluble. [Ephem. of Mat. Med., etc., Feb., 1899.]—**S. tetraphosphate.** The compound  $\text{Na}_4\text{P}_4\text{O}_{12}$ . [B. 5.]—**S. tetrasilicate.** See under *S. silicate*.—**S. tetravanadate.** A substance,  $\text{Na}_4\text{V}_4\text{O}_{11} + 9\text{H}_2\text{O}$ , forming orange-red efflorescent crystals, which have a very great tinctorial power. [B. 3.]—**S. thioantimonate.** Lat., *natrium sulfantimoniatum* (seu *sulphuratum-stibiatum*), *sulphuretum natrii et stibii*. Fr., *sulfure d'antimoine et de soude*. (Ger., *Antimonpersulfidnatrium*. Schlippe's salt; a substance,  $\text{Na}_3\text{SbS}_4 + 9\text{H}_2\text{O}$ , forming large yellowish tetrahedral crystals, prepared by heating together 8 parts of s. sulphate, 6 of antimony trisulphide, and 3 of charcoal, boiling with 1 part of sulphur, adding water, and crystallizing out. [B. 5; B. 270 (a, 38).]—**S. thioarsenate.** A compound of s., sulphur, and arsenic. The *ortho-thioarsenate*,  $\text{Na}_2\text{AsS}_3$ , the *meta-thioarsenate*,  $\text{NaAsS}_3$ , and the *pyrothioarsenate*,  $\text{Na}_4\text{As}_2\text{S}_7$ , are known. [B. 270 (a, 38).]—**S. thiocyanate.** Ger., *Schwefelcyanatnatrium*, *Rhodannatrium*, *Natriumrhodanid*. A substance,  $\text{NaSCN}$ , occurring in the saliva and prepared by the action of sulphur on s. cyanide or s. ferrocyanide. It crystallizes with difficulty in rhombic tablets, easily soluble in water and in alcohol. It acts subcutaneously like strychnine, but less rapidly. [B. 5; B. 270 (a, 38); Paschikis, "N. Y. Med. Jour.," Aug. 28, 1889, p. 232.]—**S. thiosulphate.** Lat., *sodii hyposulphitis* [U. S. Ph.], *sodae hyposulphitis* [Br. Ph.], *hyposulphitis natrius* [Netherl. Ph., Swed. Ph.], *hyposulphitis sodii* [Belg. Ph.], *natrium* (seu *natrium* [Russ. Ph.]) *hyposulfurosum* [Swiss Ph.], *natrium subsulfurosum* [Ger. Ph., 1st ed.]. Fr., *hyposulfite de soude* [Fr. Cod.]. Sp., *hyposulfito sódico* [Sp. Ph.]. A substance,  $\text{Na}_2\text{S}_2\text{O}_3 + 5\text{H}_2\text{O}$ , occurring as large transparent prismatic crystals, having a cooling but somewhat bitter and sulphur-like taste, but no odor. Used as an antiseptic. [B. 95 (a, 38).]—**S. toluenesulphonate.** A substance,  $\text{C}_6\text{H}_4\text{CH}_3\text{SO}_3\text{ONa}$ , forming brilliant laminar crystals. [B. 5.]—**S. trichlorophenate.** An odorless substance,  $\text{C}_6\text{H}_2\text{Cl}_3\text{O}_2\text{K}$ , of marked antiseptic properties. [B. 5.]—**S. trisulphide.** Lat., *sulphuretum sodii officinale* [Belg. Ph.]. Fr., *trisulfure de s. solide* [Fr. Cod.]. A preparation analogous to potassium sulphurate; made by melting a mixture of 27 parts of dried s. carbonate [Belg. Ph.] (28 of dried commercial s. carbonate [Fr. Cod.]), and 20 of purified [Belg. Ph.] (sublimed [Fr. Cod.]) sulphur. The pure trisulphide,  $\text{Na}_2\text{S}_3 + 5\text{H}_2\text{O}$ , forms concentrically grouped yellow crystals. [B. 5; B. 95, 270 (a, 38).]—**S. tungstate.** Ger., *wolframsaures Natrium*. A substance,  $\text{Na}_2\text{WO}_4 + 2\text{H}_2\text{O}$ , forming prismatic crystals soluble in water. [B. 3.] See also *S. polytungstate*, *S. paratungstate*, and *S. metatungstate*.—**S. urate.** Ger., *harnsaures Natrium*. A salt of s. and uric acid. Two urates of s. are known: (1) *acid s. urate, or monosodic urate* (Ger., *Natriumurat*), a hard, nodular substance,  $\text{C}_5\text{H}_3\text{N}_4\text{O}_7\text{Na}$ ; (2) *normal s. urate, or disodic urate* (Ger., *Dinatriumurat*), a powder,  $\text{C}_5\text{H}_2\text{N}_4\text{O}_7\text{Na}_2$ , which, under the microscope, presents characteristic aggregations of fusiform crystals, dark-colored globular concretions, or (more frequently in the urine) a mass of amorphous granules. It is found as a deposit from acid urine after cooling, and is largely increased in gout, lithiasis, etc. It occurs in renal and cystic calculi and in gouty concretions. [B. 5.]—**S. valerianate.** Lat., *sodii valerianus* [Br. Ph.], *natrium valerianicum*, *valerianus sodicus* (seu *natrius*). Ger., *valeriansaures Natrium*. Syn.: *s. isovalerate*. A body,  $\text{NaC}_8\text{H}_{15}\text{O}_2$ , occurring as a deliquescent snowy-white mass, having the odor of valerianic acid and a sweetish, styptic taste. [B. 5.]—**S. vanadate.** Ordinary s. vanadate, or *s. orthovanadate*, is a salt,  $\text{Na}_3\text{VO}_4 + 16\text{H}_2\text{O}$ , forming colorless acicular crystals of alkaline reaction. [B. 3.] See also *S. pyrovanadate*, *S. metavanadate*, and *S. tetravanadate*.—**Solution of s. tartrate.** A preparation made by mixing a solution of 6 drachms of tartaric acid in 2 oz. of water with one of 7½ drachms of s. bicarbonate in 7 oz. of water, filtering, pouring the filtrate into a 12 ounce bottle, and adding slowly 2 oz. of syrup of lemon and 80 grains of tartaric acid. [B. 5.]—**Sulphuretum sodii crystallinum.** See *S. monosulphide*.—**Sulphuretum sodii officinale.** See *S. trisulphide*.—**Test-solution**

of bitartrate of s. [U. S. Ph.]. A clear filtered solution of 1 part of s. bitartrate in 9 parts of water, prepared by the aid of gentle heat. [B. 5 (a, 38).]—**Test-solution of carbonate of s.** [U. S. Ph.]. A clear solution of 1 part of s. carbonate in 10 parts of water. [B. 5 (a, 38).]—**Test-solution of hyposulphite of s.** [U. S. Ph.]. A clear solution of 1 part of s. thiosulphate in 10 parts of water. [B. 5 (a, 38).]—**Test-solution of phosphate of s.** [U. S. Ph.]. A solution of s. phosphate in 10 (19 [Ger. Ph.]) volumes of water. [B. 81 (a, 38).]—**Trisulfure de s. solide** (Fr.). See *S. trisulphide*.—**Trochisc sodii bicarbonatis** [U. S. Ph., Br. Ph.]. Fr., *tablettes de bicarbonate de soude* [Fr. Cod.], *pastilles de Vichy*. Sp., *tabletas de carbonato (bi-) sódico* [Sp. Ph.]. A preparation made up of 60 parts of s. bicarbonate, 180 of sugar, 3 of nutmeg, and the necessary amount of tragacanth mucilage, divided into lozenges containing each 3 grains of s. bicarbonate [U. S. Ph.]; or of 3,600 grains of s. bicarbonate, 25 oz. of sugar, 1 oz. of powdered gum arabic, 2½ oz. of gum-arabic mucilage, and enough water, divided into 720 lozenges containing each 5 grains of s. bicarbonate [Br. Ph.]. The Fr. Cod. and Russ. Ph. order the lozenges to be made up with sugar and tragacanth mucilage; the Belg. Ph. orders tragacanth powder and water; the Austr. Ph. and Hung. Ph. water alone; and the Ger. Ph., Swiss Ph., Sp. Ph., Norw. Ph., and Swed. Ph., alcohol to be substituted for the tragacanth mucilage; each lozenge containing 24 [Fr. Cod.] (5 [Belg. Ph., Norw. Ph., Swed. Ph.]) 10 [Austr. Ph., Hung. Ph., Ger. Ph., Swiss Ph., Russ. Ph.], 12 [Sp. Ph.] centigrammes of s. bicarbonate. [B. 95 (a, 38).]—**Trochisc sodii santalinatis** [U. S. Ph.]. Troches containing each one grain of s. santalininate. [B. 5.]—**Volumetric solution of hyposulphite of s.** [U. S. Ph.]. A solution made by dissolving 32 grammes of s. thiosulphate in water enough to make 1,000 c. c., mixing with 100 c. c. of the volumetric solution of iodine enough of this soda solution to render it nearly colorless, adding freshly gelatinized starch with more of the soda solution till the blue color just vanishes, diluting with enough water to make 1,000 c. c. ten times as much of the original soda solution as has been added to the starch mixture, and treating this diluted liquid as the test solution. [B. 81 (a, 38).]

**SODOMA** (Lat.), **SODOMIA** (Lat.), n's f.  $\text{So}^2\text{d}^2\text{o}^2\text{m}^2\text{a}^2$ ,  $\text{so}^2\text{d}^2\text{o}^2\text{m}^2\text{a}^2$  ( $\text{so}^2\text{d}^2\text{o}^2\text{m}^2\text{a}^2$ ). From *Sôdoma*, Sodom, a city of Palestine. See **SODOMY**.—**S. Gallorum.** See **STPHILIS**.

**SODOMITE**, n.  $\text{So}^2\text{d}^2\text{o}^2\text{m}^2\text{a}^2$ -it. One who practises sodomy.

**SODOMY**, n.  $\text{So}^2\text{d}^2\text{o}^2\text{m}^2\text{a}^2$ -it. Lat., *sodomia*. Fr., *sodomie*. Unnatural sexual intercourse, as of persons of the same sex or of men or women with animals.

**SOEST** (Ger.), n. Zost. A place in Westphalia, Prussia, where there is a saline spring. [L. 49 (a, 14).]

**SOFTENING**, n.  $\text{So}^2\text{f}^2\text{n}^2\text{a}^2$ . Gr., *μαλαξίς*. Lat., *malacia*, *malacosis*. Fr., *ramollissement*. Ger., *Auflöckerung*, *Erweichung*. A nutritional organic lesion characterized by a decrease in the natural cohesion of the tissues. [a, 34.]—**Acute gastric s.** Of Billard, a grave disorder of very young children (sometimes epidemic), characterized by painful tension of the stomach, vomiting, especially of a greenish or yellowish fluid, greenish diarrhoeal discharges, hurried and jerking respiration, cold extremities, prostration, insensibility, and death in from six to fifteen days. The intestines may also undergo s. [D. 25.]—**Atrophic s. of the brain.** See *White s. of the brain*.—**Brown s. of the stomach.** An alteration due to post-mortem digestion of the wall of the stomach, extending even to the peritonæum. It occurs in stomachs in which the vessels are filled with blood, the latter being converted into a brown or brownish-black coloring matter, with which the surrounding tissues are infiltrated. [D. 59.]—**Cardiac s.** Myomalacia of the heart consequent upon arterial anæmia resulting from sclerosis or atheroma of the coronary arteries. [a, 34.]—**Cerebral s.** See *S. of the brain*.—**Exudative s.** Necrosis and s. of tissue in consequence of hæmorrhagic or other exudation. [a, 34.]—**Gray s. of the spinal cord.** That stage of inflammatory s. in myelitis in which the affected portion assumes a grayish color, in consequence of the absorption of the fat granules and nerve substance. [Leyden (D. 35).]—**Green s. of the spinal cord.** The suppurative stage of myelitis; a rare condition, sometimes secondary to traumatic inflammation. [Leyden (D. 35).]—**Hæmorrhagic s.** Hæmorrhage into an organ with consequent ischæmia and s. of the hæmorrhagic area. [a, 34.]—**Hæmorrhagic s. of the brain.** A breaking up of the brain substance into larger or smaller masses, due to hæmorrhagic extravasations. [Bennett (D. 1).] Cf. *Red s. of the brain*.—**Inflammatory s. of the brain.** A condition due to exudation and infiltration among the elementary nerve structures. [Bennett (D. 1).]—**Ischæmic s.** A temporary or permanent ischæmia with necrosis and s. of the tissues affected. [a, 34.]—**Mechanical s. of the brain.** A post-mortem condition caused by violence in exposing the nerve-centres. [Bennett (D. 1).]—**Mucoid s.** Myxomatous degeneration. [a, 34.]—**Oesophageal s.** S. of the lower portion of the oesophagus in consequence of the regurgitation of gastric juice. [L. 20 (a, 34).]—**Red s.** See *Red hepatization*.—**Red s. of the brain.** Ischæmic s. of the brain accompanied by hæmorrhage and the deposit of hæmatoidin crystals and blood in the surrounding tissue. [Ziegler (a, 34).]—**Red s. of the spinal cord.** A form of inflammatory s. which occurs during the stage of hyperæmia and incipient exudation. [Leyden (a, 35).]—**Serous s. of the brain.** A post-mortem condition due to absorption of serum with consequent dissociation of the nerve-tubes and nerve-cells. [Bennett (D. 1).]—**S. of a thrombus.** Either a simple or red s. of the central parts of a thrombus by disintegration into a reddish pulp of broken-down corpuscles and detritus; or a yellow or puriform s. in which there are micro-organisms and pus-corpuscles. [Ziegler (a, 34).]—**S. of the bones.** See *Osteomalacia*.—**S. of the brain.** Lat., *encephalitis*. 1. Disintegration and liquefaction of the brain substance, the several constituents of the tissue breaking up and dissolving in the liquid poured out from the vessels. [a, 34.] 2. As used by the laity, any disease, especially general paresis

of the insane, associated with progressive dementia. [B.]—**S. of the cerebellum.** A rare affection characterized by slight impairment of the intellect, but extensive motor disturbance, usually paralysis on the opposite side with or without muscular contractions, and sometimes spasm on both sides. [D. 1.]—**S. of the stomach.** See GASTROMALACIA.—**True fatty s. of the brain.** A fatty degeneration of the nerve-cells, independent of exudation. [Bennett (D. 1).]—**White s. of the brain.** Ischemic s. of the brain unaccompanied by hemorrhage, the tissues remaining pale. [Ziegler (a. 34).]—**White s. of the spinal cord.** The stage of inflammatory s. in myelitis which follows the yellow s., and in which the diseased portions have a creamy or milky appearance. [Leyden (D. 35).]—**White s. of the stomach.** A post-mortem change which takes place in a stomach free from blood. It consists in a digestion of the mucous and submucous tissue of the organ, and even of the muscular and serous layers. [D. 59.]—**Yellow s. of the brain.** An alteration due to necrosis, involving usually a portion of the medulla varying in size from that of a bean to that of a hen's egg. The affected area becomes gelatinous and of a grayish-white to a yellow color. [D. 1.]—**Yellow s. of the spinal cord.** A stage of inflammatory s. in myelitis following red s. It is due to the diffusion and alteration of the coloring matter of the blood, to the fatty degeneration of the medullary sheaths, and to the formation of masses of fat granules. [D. 35.]

**SOHLE** (Ger.), n. Zol'e<sup>2</sup>. See SOLE.—**S'schreitend.** See PLANTIGRADE.

**SOHLENMUSKEL** (Ger.), n. Zol'e<sup>2</sup>n-musk-e<sup>2</sup>l. See SOLEUS.—**Dünner S., Langer S.** See PLANTARIS (n.).—**Viereckiger S.** See ACCESSORIUS flexoris longi DIGITUM PEDIS.

**SOHR** (Ger.), n. Zor. See APHTRÆ.

**SOIE** (Fr.), n. Swa<sup>2</sup>. See SILK and SETA.—**Esprit de s. (crue).** See SPIRITUS CORNU CERVI.—**Esprit volatil de s. crue.** A preparation containing ammonium carbonate. [B.]—**S. de montagne.** See ASBESTOS.—**Spiritus de s.** See SPIRITUS CORNU CERVI.

**SOJA** (Lat.), n. f. So'ya<sup>2</sup>. Fr., s. Ger., *S.* A genus of the Leguminosæ, now included in the genus *Glycine*. [a. 35.]

**SOLEUS** (Lat.), n. m. So'l'e<sup>2</sup>(a<sup>2</sup>e<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From *solea*, the sole. Ger., *Sohlenmuskel*, *Schollenmuskel*. 1. The strongest muscle of the leg. It arises from the head and upper posterior surface of the fibula and the posterior surface of the upper extremity of the tibia, and is inserted into the tendo Achillis. [L. 142, 332.] 2. In solipeds, a muscle which arises from the superior external tuberosity of the tibia and is inserted into the tendon of the bifemoro-calcaneus, of which it is an auxiliary. [L.]

**SOLAMEN** (Lat.), n. n. So'l(sol)-a(a<sup>2</sup>)'me<sup>2</sup>n. A comfort, solace. [a. 35.]—**S. hypochondriacorum.** See PULVIS RHEI COMPOSITUS.—**S. scabiosorum.** The herb of *Fumaria officinalis*.

**SOLANAL**, adj. So'l'a<sup>2</sup>n'l. Lat., *solanalis*. Belonging to Lindley's *Solanales*, an alliance (Lat., *nizus solanalis*) of perigynous exogens consisting of the *Oleaceæ*, *Solanaceæ*, *Cordiaceæ*, *Convolvulaceæ*, etc. [B. 170 (a. 35).]

**SOLÁN DE CABRAS** (Sp.), n. Sol-a<sup>2</sup>n' da ka<sup>2</sup>b'ra<sup>2</sup>s. A place in Cuenca, Spain, where there is a gaseous and alkaline spring.

**SOLANDRA** (Lat.), n. f. Sol-a<sup>2</sup>nd'ra<sup>2</sup>. From *Solander*, a Swedish botanist. Fr., *solandre*. A genus of solanaceous tropical American plants. [a. 35.]—**S. grandiflora.** Peach-colored trumpet-flower; indigenous to Jamaica and the Antilles. It has acrid poisonous properties, and is used like *Datura stramonium*. [a. 35.]

**SOLANICINE**, n. So'l-a<sup>2</sup>n'i<sup>2</sup>-sen. An amorphous base of uncertain formula produced by the action of strong hydrochloric acid on solanidine. [A. 308; B. 270 (a. 38).]

**SOLANIDINE**, n. So'l-a<sup>2</sup>n'i<sup>2</sup>d-en. Fr., s. Ger., *Solanidin*. A crystalline alkaloid, C<sub>25</sub>H<sub>29</sub>NO, forming one of the constituents of solanine. It forms silky, acicular crystals. [B. 93 (a. 14).]

**SOLANINE**, n. So'l'a<sup>2</sup>n-en. Fr., s. Ger., *Solanin*. An alkaloid obtained from various species of *Solanum* as colorless shining acicular crystals of bitter and burning taste. Its formula is variously given as C<sub>42</sub>H<sub>73</sub>NO<sub>15</sub>, C<sub>43</sub>H<sub>70</sub>NO<sub>16</sub>, and C<sub>40</sub>H<sub>52</sub>O<sub>14</sub>. [a. 38.]

**SOLANUM** (Lat.), n. n. So'l(sol)-an(a<sup>2</sup>n)<sup>2</sup>m(u<sup>2</sup>m). Fr., s., *morelle*. Ger., *Nachtschatten*. A genus of the *Solanaceæ* (Fr., *solanacées*), which are an order of perigynous, gamopetalous dicotyledons, including [Bentham and Hooker] the *Solanææ*, *Atropææ*, *Hyoscyamææ*, *Cestriaceæ*, and *Salpiglossidææ*. They are herbs or shrubs, or rarely trees, most abundant in the tropics. Their fruit and herbage are usually pervaded by a poisonous narcotic principle. They furnish many useful drugs, such as belladonna, henbane, stramonium, etc. The *Solanææ* (Fr., *solanées*; Ger., *Solaneen*) are the *Solanaceæ*, and also a tribe of that order. The *Solanidææ* of Dumortier are the *Solanaceæ*. [a. 35.]—**Amylum solani** (tuberosi). See *Potato starch*.—**Aqua solani nigri**. A preparation made by distilling off half of a mixture of *S. nigrum* with twice its weight of water. [B. 119 (a. 38).]—**Extractum solani tuberosi**. See under *S. tuberosum* (esculentum).—**Fœcula solani tuberosi** [Belg. Ph.]. See *Potato starch*.—**Fermentoleum solani**. The empyreumatic oil which gives potato spirit its peculiar flavor; employed by Huss in chronic alcoholism. [B. 46.]—**Fotus solani nigri** [Belg. Ph., 1st ed.]. A preparation made by boiling 35 parts of the leaves of *S. nigrum* in water enough to make 1,000 parts. [B. 95 (a. 38).]—**Oil of S. nigrum, Oleum solani nigri**. Fr., *huile de morelle* [Fr. Cod.]. A preparation made by boiling 1 part of the leaves of *S. nigrum* with 2 parts of olive-oil and filtering. [B.]—**S. acanthifolium**. Fr., *morelle à feuilles d'acanthé*. A West Indian species. The fruit is used for rheumatism. [a. 35.]—**S. acutiblobum**. A Brazilian species allied to and used like *S. paniculatum*. [a. 35.]—**S. albidum**. Fr., *morelle blanchâtre*. Ger., *weisslicher Nachtschatten*. A Peruvian species. The leaves are used as a poultice in ulcers, etc. [a. 35.]—**S. album**. Fr., *morelle blanche*. A Chinese species with edible

fruit. [a. 35.]—**S. baciferum**. A Jamaica species with two varieties, one of which bears the highly poisonous susumber berries, while the fruit of the other is edible. [a. 35.]—**S. bahamense**. Cankerberry of the West Indies. The fruits are used in ulcerated sore throat. [a. 35.]—**S. betaceum**. Beet-leaved nightshade; a Central American shrub, cultivated for its tomato-like fruits. [a. 35.]—**S. carolinense**. American horse-nettle; a weed found from New York to Illinois and Georgia. The juice of the berries has been used in tetanus, and the berries and root in epilepsy. [a. 35.]—**S. cerneum**. Fr., *morelle penchée*. A Brazilian species. The sudorific leaves and flowers are used in syphilis. [a. 35.]—**S. chenopodioides**. Fr., *morelle à feuilles de chénopode*. Ger., *gänsefussblättriger Nachtschatten*. A Chilean species allied to *S. nigrum*. The juice of the berries is used in fevers accompanied by intestinal inflammation, also in eye diseases. [a. 35.]—**S. coagulans**. An Egyptian species. The berries are used like rennet. [a. 35.]—**S. crispum**. Ger., *krauser Nachtschatten*. Potato-tree; a Chilean species. The bitter leaves are used as a febrifuge. [a. 35.]—**S. dulcamara**. Fr., *solanode, douce-amère, bronde, courge, crève-chien, herbe à la carte* (ou à la fièvre, ou de Judée), *morelle grimpante, vigne sauvage* (ou de Judée, ou vierge). Ger., *kletternder Nachtschatten, Bittersüss, Wasserranken, Hirschkraut, Hirschkraut*. Bitter-sweet, woody nightshade; a climbing plant common throughout Europe, and found also in northern Africa, middle Asia, and North America. The young branches (see DULCAMARA), the leaves, and the berries contain solanine and dulcamarine. The root-bark is also strongly narcotic, but is not used. The name *deadly nightshade* (see *ATROPA belladonna*) is often erroneously applied to this species. [a. 35.]—**S. esculentum**. Fr., *morelle comestible, aubergine, béringène, mayenne, melongène, œuf végétal, pondouse, vèringeanne, mélanzane*. Ger., *essbarer Nachtschatten, Eierpflanze*. Mad- (or egg-, or Jew's-) apple; indigenous to the hot regions of Asia and Africa, and cultivated in southern Europe and in America. There are two varieties, *S. melongena* and *S. insanum*. The cultivated form, *S. ovigerum*, is the well-known egg-plant. Its fruits, *mala insana, poma melongena*, are used as a discutient and anodyne poultice, especially for hæmorrhoids. The leaves are narcotic, and are used internally in intoxication and externally as a soothing poultice. [a. 35.]—**S. fœtidum**. Fr., *morelle fétide* (2d def.). 1. The *Datura stramonium*. 2. A Peruvian species. The leaves are used in a wash for ulcers. [a. 35.]—**S. furiosum**. See *ATROPA belladonna*.—**S. fuscatum**. Fr., *morelle brune*. A poisonous South American species. [a. 35.]—**S. guineense**. Large black-berried nightshade; a tropical shrub. It is eaten, cooked, like spinach, its narcotic and acrid properties being largely neutralized by the presence of an acid and a mucilage. [a. 35.]—**S. Hernandæzii**. A Mexican shrub with an acrid root, used as an evacuant and in dyspnoea and dropsy. [a. 35.]—**S. indicum**. India nightshade. A decoction of the root, which is said to be strongly excitant, is used in dysuria and ischuria, in difficult parturition, and in odontalgia. [a. 35.]—**S. insanum**. See under *S. esculentum*.—**S. Jacquinii**. An East Indian shrub. The subacid fruit and the root are used as an expectorant. The stems, flowers, and fruit are bitter and carminative. Fumigations of the seed are used empirically for odontalgia, probably giving relief through their powerfully sialagogue properties. The entire plant is employed as a diuretic. [a. 35.]—**S. lasiocarpum**. Hairy (fruited) nightshade, an East Indian species used in catarrhal fever, atony of the digestive organs, and chronic coughs. The root, which is purgative in large doses, is used as an emetic. [a. 35.]—**S. mammosum**. Fr., *pomme-poison* (ou tétou, ou à chavue-souris), *amourette bâtarde, poire de bachelier, morelle molle*. Ger., *zitzenförmiger Nachtschatten*. Turkey-berry of the West Indies, macaw-bush, apple of Sodom, nipple-nightshade; a species growing in the West Indies, the Carolinas, Georgia, etc. The leaves are expectorant, and are applied to ulcers. The bitter root is diuretic and purgative. The berries are narcotic. [a. 35.]—**S. maniacum**. See *ATROPA belladonna* and *DATURA stramonium*.—**S. manosum**. Fr., *morelle humide*. An East Indian species. Its juice is used as a pectoral and the root as a sudorific. [a. 35.]—**S. melongena**. See under *S. esculentum*.—**S. nigrum**. Fr., *morelle* [Fr. Cod.] (*commune, ou noire*), *morette, mourvete, crève-chien, raisin de loup, herbe aux magiciens*. Ger., *schwarzer Nachtschatten, Nachtkraut, Berstekraut, Saukraut, Sp., yerba mora* [Mex. Ph.]. Garden (or black-berried) nightshade, houndberry, petty morel; a low-growing annual. There are numerous varieties and closely related species. Those in southern Europe were known to Dioscorides as *στρογγύλον κριταῖον*. The herbaceous parts, or leaves, *herba solani* (seu *solatrii*) *nigri*, contain solanine, though authorities differ as to their poisonous character,

SOLANUM DULCAMARA. [A. 327.]

and also as to that of the berries. The leaves are diaphoretic, diuretic, and mildly purgative, and in large doses are said to produce nausea and giddiness. They have been used in chronic skin diseases and painful scrofulous, cancerous, and scorbutic affections. In India they are used also as a refrigerant, in diarrhoea, fevers, and hydrophobia, and as a soothing application in eye diseases. In Mexico their decoction is used in fomentations and vaginal injections. In Réunion and the Mauritius the leaves are eaten, the poisonous properties being removed in the cooking. [a, 35.]—*S. oleraceum*. Fr. *morelle oléracée*. A species the leaves of which are used in Brazil as an emollient. [L, 35.]—*S. ovigerum*. See under *S. esculentum*.—*S. paniculatum*. Fr. *morelle paniculée*, *croc de chien*. Ger. *rispiger Nachtschatten*. A shrub the leaves and unripe fruit of which are used medicinally in South America. [a, 35.]—*S. pseudo-capsicum*. Fr. *cérissette*, *amomon*. Ger. *Korallenbäumchen*, *Bouquetkirsche*. Jerusalem cherry, winter-cherry capsicum; indigenous to the Mauritius and cultivated elsewhere. Its berries are poisonous. [a, 35.]—*S. pseudo-china* (seu *quina*). A Brazilian arborecent species. The bitter bark is used as an antiperiodic. [a, 35.]—*S. quitense*, *S. quittoense*. Fr. *morelle de Quito*. Ger. *orangenfrüchtiger Nachtschatten*. A South American shrub. Its edible berries (Quito oranges), which have the taste of oranges, are used as a refrigerant. The flowers and leaves are used as an antispasmodic. [a, 35.]—*S. sodomium*. Fr. *morelle de Sodome*. Dead-Sea apple, apple of Sodome, black-spined nightshade; a shrub believed to be originally from southern Africa, but now found wild also in northern Africa, southern Europe, the region of the Dead Sea, Australia, and Brazil. The root is diuretic. The fruit is identified by some with the apple of Sodome, the fruit that turns to ashes on the lips. It is subject to the attacks of an insect that leaves the rind unchanged, but reduces the interior to powder. This powder, which is very bitter, and the seed are supposed to be the "dust and ashes" spoken of by Josephus. The *σπύγγιον μακρόν* of Dioscorides, used as an emetic, but highly poisonous in large doses, is referred to this species. [a, 35.]—*S. toxicarium*. Fr. *morelle vénéneuse*. A Guiana species. The roots, leaves, seeds, and fruit-juice are poisonous. [a, 35.]—*S. trilobatum*. Fr. *morelle trilobée*. A climbing shrub of the East Indies. The root, leaves, flowers, and fruits are used in coughs. [a, 35.]—*S. triste*. A narcotic species indigenous to the Antilles, where it is used like *S. nigrum*. [a, 35.]—*S. trongum*. Ger. *einblüthiger Nachtschatten*. An East Indian species. The root, which has a repugnant taste and smell, is said to be a powerful purgative and to be used also in odontalgia. [a, 35.]—*S. tuberosum* (*esculentum*). Fr. *morelle parmentière* (ou *tubéreuse*), *pomme de terre*, *patate* (*de la manche*, ou *des jardins*, ou *de Virginie*), *tartouffe*, *tartouffe*, *truffelle*. Ger. *knolliger Nachtschatten*, *Kartoffel*, *Erdbirne*, *Grundbirne*, *Erdapfel*. The common potato; a native, according to Baker, of the Andes of Chile, Peru, Bolivia, Ecuador, and Colombia, and of the mountains of Costa Rica and the southwestern United States. Its tubers, besides over 10 per cent. of starch (see *Potato* STARCH), also contain (Letheby) 2.1 per cent. of nitrogenous matter, 3.2 per cent. of sugar, small proportions of fat and saline matter, and 75 per cent. of water. They yield on distillation a powerful spirit or brandy, and, on fermentation, a strong wine. The raw tubers, *tubera solani tuberosi*, were formerly used as an antiscorbutic, and, in combination with cinchona, as an antiperiodic. They have also been employed as an aperient, diuretic, and galactagogue, and as nervous sedatives and stimulants in gout. When fully ripe, however, they are said not to contain solanine even in the raw state unless they are sprouting. Dried potatoes are used as a substitute for salep. The stalks, leaves, and unripe berries contain solanine. The berries have been known to cause death. The leaves, in the form of extract, *extractum solani tuberosi*, have been employed as an antispasmodic in chronic cough, producing effects similar to those of opium. [a, 35.]—*S. undatum*. A thorny undershrub growing in the Mauritius and the East Indies. The root is used medicinally. [a, 35.]—*Tubera solani*. Potatoes, the bulbs of *S. tuberosum* in its cultivated state. [B, 95 (a, 38).]

**SOLAR**, adj. *Sol'ar*. Gr. *ἡλιακός*. Lat., *solaris* (from *sol*, the sun). Pertaining to the sun, proceeding from the sun, or caused by sun-heat; resembling the sun in occupying a central position (see *S. plexus*), emitting rays, etc. [A, 300 (a, 28); a, 48.]

**SOLARIS** (Lat.), adj. *Sol'is* (sol)-*aris* (a)-*ri*2s. From *sol*, the sun. Pertaining to the sun; due to exposure to the sun (e.g., *eczema solare*).

**SOLARIUM** (Lat.), n. *Sol'is* (sol)-*ari*2s (a)-*um* (u4)m. From *sol*, the sun. 1. A sun-dial. 2. An apartment fully exposed to the sun, especially one used for sun-baths. [a, 48.]

**SOLARÖL** (Ger.), n. *Zol'ar'öl*. Kerosene distilled from peat-oil. [a, 14.]

**SOLATER**, n. Of the alchemists, quicksilver. [A, 325 (a, 21).]

**SOLBATURE** (Fr.), n. *Sol'batur*. See BLEIME.

**SOLDANELLA** (Lat.), n. *Sol'dan'el-lä*2. Fr., *soldanelle*. 1. The *Convolvulus* s. 2. A genus of primulaeous herbs. [a, 35.]—*S. alpina*, *S. Clusii*. Ger. *Alpenglockchen*. Blue moonwort; an herb indigenous to Switzerland. The root is purgative. [a, 35.]

**SOLE**, n. *Sol*. Gr. *ῥαπός*. Lat., *solum*, *sola*. Fr., *plante du pied*, s. on horses. Ger., *Sohle*, *Fusssohle*. The lower aspect of the foot; that part of the foot that touches the ground in standing.

**SOLEA** (Lat.), n. *Sol'eä*2. From *H. Sole*, a botanist. Fr., *solée*. A genus of violaceous plants, included by Bentham and Hooker in *Lomatium*. [a, 35.]—*S. concolor*. Green violet; growing in the United States. Its root is said to be emetic. [a, 35.]—*S. verticillata*. Sp., *opacacanna del país* (Mex. Ph.). A tropical American species. The emetic root has been used as a substitute for ipecac. [a, 35.]

**SOLEARIS** (Lat.), n. *m. Sol'is*2 (sol)-*eä*2 (a)-*ri*2s. From *solea*, the sole. Fr., *soléaire*. See SOLARIS.

**SOLEIL** (Fr.), n. *Sol'eä*2 y'. See HELIANTHUS.

**SOLEN** (Lat.), n. *m. Sol'e2n* (an). Gen., *-en'os* (-is). Gr., *σωλήν*. 1. A channel or gutter; of old writers, a fracture-box. [A, 311 (a, 17).] 2. The central canal of the spinal cord. [L, 50 (a, 14).]

**SOLENIARIUM** (Lat.), n. *n. Sol'e2n* (an)-*ari*2s (a)-*um* (u4)m. Gr., *σωληνάριον* (dim. of *σωλήν*, a canal). A small gutter-shaped splint. [E.]

**SOLENOCHALASIS** (Lat.), n. *f. Sol'e2n* (an)-*o* (o3)-*ka2* (ch2a2)l-*as*2 (a2s)-*i2s*. Gen., *-as'eos*, *-chal'asis*. From *σωλήν*, a channel, and *χάλασις*, a slackening. Fr., *solénochalase*. Dilatation and relaxation of a tubular organ. [L, 50 (a, 14).]

**SOLENOSTEGNOSIS** (Lat.), n. *f. Sol'e2n* (an)-*o* (o3)-*ste2g*-*nos'*-*i2s*. Gen., *-hos'eos* (-is). From *σωλήν*, a channel, and *στεγνῶσις*, stenosis. Fr., *solénostegnose*. Constriction of a tubular organ.

**SOLENOSTEMMA** (Lat.), n. *n. Sol'e2n* (an)-*o* (o3)-*ste2m*-*ma2*. Gen., *-stem'matos* (-atis). From *σωλήν*, a channel, and *στέμμα*, a wreath. Fr., *solénostemme*. A genus of the *Asclepiadaceæ*. [a, 35.]—*S. argel*, *S. argelii*. The *argel* of the Arabs; an undershrub indigenous to Upper Egypt, Nubia, and Arabia. The bitter, purgative leaves are used to adulterate senna. [a, 35.]

**SOLEUS** (Lat.), n. *m. Sol'e*2 (a)-*us*2 (u4)s. See SOLÆUS.

**SOLFERINO** (It.), n. *Sol-fe2r'e-no*. Rosaniline hydrochloride.

**SOLIDAGO** (Lat.), n. *f. Sol'i2d*-*ag* (a2g) y'o. Gen., *-ag'inis*. Fr., *verge d'or*. Ger., *Goldrute*. Golden-rod; a genus of composite plants. The *Solidaginaceæ* (Fr., *solidaginées*) are a division of the *Asteraceæ*. [a, 35.]—*S. odora*, *S. odorata*. The sweet-scented golden-rod of the United States and Canada. The aromatic leaves, formerly official in the U. S. Ph., are carminative, hemostatic, stimulant, and diaphoretic (in warm infusion). They yield a highly aromatic, pale greenish-yellow volatile oil, which is used, dissolved in alcohol, in flatulence, as a corrigent, etc. The dried flowers and leaves are substituted for tea. The perennial, creeping, aromatic root has an odor resembling that of *Geum urbanum*, and has been used like it. [a, 35.]—*S. sempervirens*. A North American species used as a vulnerary. [a, 35.]—*S. virga aurea*, *S. vulgaris*. Fr., *verge d'or* (*des bois*), *canne verge dorée*, *herbe des Juifs*. Ger., *gemeine* (oder *Heiden*-) *Goldrute*, *Golden*- (oder *Heiden*-) *Windkraut*, *St. Petersst. Machtheilkraut*. Common golden-rod; indigenous to both hemispheres. The leaves and flowering tops, *herba et summitates virgæ aureæ* (seu *solidaginis*, seu *solidaginis* [seu *consolidæ*] *saracenicæ*), were formerly used as a lithontripic. They are somewhat aromatic and astringent, and are still used as a vulnerary, antidiarrhetic, diuretic, and diaphoretic. The root is sialagogue, and is sometimes mixed with that of *Arnica montana*.

**SOLIDARPATHOLOG** (Ger.), n. *Zol-ed-ar'pa'to*-o-log. An adherent of solidistic pathology.

**SOLIDIFICATION**, n. *Sol'i2d*-*i2*-*fi2k*-a-'shu2n. From *solidus*, solid, and *facere*, to make. Fr., *s. Ger.*, *Verdichten*. The act of becoming or the condition of being solid, as in hepatization of the lung. [D.]

**SOLIDISM**, n. *Sol'i2d*-*i2m*. From *solidus*, solid. Fr., *solidisme*. Ger., *Solidismus*, *Solidarpathologie*. See SOLIDISTIC PATHOLOGY.

**SOLIDUNGULATE**, adj. *Sol'i2d*-*u2n*2 *gu2l*-at. Lat., *solidungulus* (from *solidus*, solid, and *ungula*, a hoof). Fr., *solidungulé*. Ger., *einhufig*, *ganzhufig*. Whole-hoofed. The *Solidungulae* are the group of perissodactylous mammals (the horse family) in which the foot terminates in an undivided hoof. [B, 28 (a, 27).]

**SOLIPED**, adj. *Sol'i2*-*pe2d*. From *solidus*, solid, and *pes*, the foot. Solidungulate; as a n., a solidungulate animal.

**SOLIS** (Fr.), n. *Sol'e*. See ALVENEI.

**SOLITARIUS** (Lat.), adj. *Sol'is* (sol)-*i2t*-a (a2)-*ri*2s (u4)s. See SOLITARY; as a n., in the m., a single or azygous muscle. [a, 48.]—*S. pharyngis*. See MIDDLE CONSTRUCTOR OF THE PHARYNX.

**SOLITARY**, adj. *Sol'i2t*-a-*ri*2. Lat., *solitarius* (from *solus*, alone). Fr., *solitaire*. Ger., *einzelstehend*. Not associated with others, single, azygous. [a, 35, 48.]

**SOLIUM** (Lat.), n. *n. Sol* (sol'i2)-*um*2 (u4)m. 1. A bath-tub. [A, 325 (a, 48).] 2. See TENIA s.

**SOLUBLE**, adj. *Sol'u2*-b'l. Lat., *solubilis* (from *solvere*, to loose). Fr., *s. Ger.*, *lösbar*, *löslich*. Capable of entering into solution. [B.]

**SOLUTÉ** (Fr.), n. *Sol-u2-tä*. 1. A solution. 2. Of the Fr. Cod., a solution of a simple chemical compound, an element, an acid, or a salt in water, with the occasional addition of alcohol. [B.]

**SOLUTIO** (Lat.), n. *f. Sol'u2* (u2)m)-*shi2* (ti2) o. Gen., *-on'is*. See SOLUTION and LIQUOR.—*S. acidimetria decinormalis* [Aust. Ph., 7th ed.]. A solution containing 4 milligrammes of caustic soda in each c. c. [B, 270 (a, 38).]—*S. atherena*. See LIQUOR *onodinus mineralis aquosus*.—*S. alcalimetria decinormalis* [Aust. Ph., 7th ed.]. A solution containing 0.5 milligrammes of oxalic acid in each c. c. [B, 270 (a, 38).]—*S. alexiteria*. See *Species pro vaporibus ACIDI MURIATICI*.—*S. alexiteria gauliana*. See FUMIGATIO *antiloimica Gaultii*.—*S. alexiteria oxygenata*. See *Aqua CHLORI*.—*S. arsenicalis Fowleri*. See LIQUOR *POTASSII ARSENITIS*.—*S. cuprata*. See LIQUOR *ÆRIS CINNAMOMATUS* (under *ÆS*).—*S. Donovan*. See LIQUOR *ARSENITIS ET HYDRARGYRI IODIDI*.—*S. ferrata*. See LIQUOR *TARTARI SOLUBILIS CHALYBEATI*.—*S. Fowleri*. See LIQUOR *POTASSII ARSENITIS*.—*S. Lugol*. See LIQUOR *IODI*.—*S. mercurialis*. See LIQUOR *HYDRARGYRI PERCHLORIDI*.—*S. murialis ferri et atheræ*. See *Tinctura FERRI CHLORATI Atheræ*.—*S. Pearsoni*. See LIQUOR *SODII ARSENITIS*.—*S. vitriolica*. See LIQUOR *ALUMINIS COMPOSITUS*.—*S. Vlemingxii*. A preparation consisting of 30 parts of quicklime, 20 of water, and 60 of flowers of sulphur, mixed for use with 10 parts of water for 3 of the solution and boiled down to 12 [Aust. Ph.]. [B, 270 (a, 38).]

**SOLUTION**, n.  $\text{So}^1\text{u}^2\text{shu}^2\text{n}$ . Gr.,  $\lambda\upsilon\sigma\iota\varsigma$ . Lat., *solutio, solum* (3d def.). Fr., s. Ger., *Lösung, Auflösung*. 1. The act or process by which a substance, whether solid, liquid, or gaseous, becomes diffused throughout a liquid and incorporated with it in a state of molecular subdivision. 2. The state or condition of being thus incorporated with a liquid. 3. The resulting product, consisting of the liquid with the substance so incorporated. 4. The act of separating. [B.]—**Aluminous s. of Fallopius**. Fr., *eau alumineuse de Fallopie*. It., *acqua aluminosa di Fallopio*. A lotion formerly used for venereal sores and foul ulcers; consisting of 7 parts each of alum and corrosive sublimate and 360 parts each of rose water and plantain water. [A. 314.]—**Arsenical s.** [Br. Ph.]. See *Liquor POTASSII arsenitis*.—**Burnett's s.** An aqueous solution of zinc chloride, being  $\frac{1}{2}$  stronger than the official liquor zinci chloridi. [B. 5.] Cf. *Burnett's disinfectant*.—**Burrow's s.** A mixture of 30 parts of lead acetate dissolved in 90 of water and 22 $\frac{1}{2}$  of alum dissolved in 270 of water, filtered when the resulting precipitate has settled. [B. 270 (a, 38).]—**Campani's s.** A mixture of a concentrated s. of lead acetate with a dilute s. of copper acetate; used in testing for glucose, which reduces the copper salt, while cane sugar has no effect upon the s. [B. 270.]—**Centinormal s.** A volumetric s. of one hundredth of the strength of a normal s. [B.]—**Decinormal s.** Fr., *s. normale décimée*. A volumetric s. of one tenth of the strength of a normal s. [B.]—**De Valangin's s.** See *Liquor ACIDI arseniosi*.—**Dobell's s.** A s. containing 45 grains of carbolic acid, 2 drachms of borax, 1 drachm of sodium bicarbonate, 1 oz. of glycerin, and water up to a pint. ["Drugg. Circ. and Chem. Gaz.," July, 1890 (B).]—**Donovan's s.** See *Liquor ARSENI et HYDRARGYRI iodidi*.—**Drees's s.** See *Liquor FERRI albuminati*.—**Farrant's s.** A mixture of equal volumes of thick gum-arabic mucilage, glycerin, and cold saturated s. of arsenious acid; used for microscopic mounting. [B. 270 (a, 38).]—**Fehling's s.** A preparation made by dissolving 40 grammes of crystallized cupric sulphate in 200 c. c. of water and 160 grammes of potassium tartrate with 180 of fused sodium hydrate in 600 c. c. of water, mixing the two, diluting to 1,000 c. c., and boiling for some minutes. [B. 5 (a, 38).]—**Fowler's s.** See *Liquor POTASSII arsenitis*.—**Heinecke's arsenical s.** See *Liquor arsenicale de Heinecke*.—**Javelle's s.** See *Javelle WATER*.—**Jenning's saline s.** A modification of the normal saline s. made by dissolving 50 grains of sodium chloride, 3 grains of potassium chloride,  $\frac{1}{2}$  grains of sodium sulphate,  $\frac{1}{2}$  grains of sodium carbonate, and 2 grains of sodium phosphate in a pint of boiling water, cooling to 100° F. (about 38° C.), and adding 2 drachms of absolute alcohol. [a. 34.]—**Labarraque's s.** See *Liquor sodæ chloratæ*.—**Lugol's s.** See *Liquor IODI*.—**Magendie's s.** A s. of 16 grains of morphine sulphate in an ounce of water. [a. 39.]—**Mayer's s.** See *Mayer's REAGENT*.—**Monselet's s.** See *Liquor FERRI subsulphatis*.—**Normal saline s.** A s. used as an intravenous injection in hemorrhage, etc., and in physiological experimentation, consisting of 75 parts of sodium chloride dissolved in 10,000 of water. [B. 12.]—**Normal s.** A volumetric s. containing in each litre an amount of the reagent sufficient to exactly replace or combine with 1 gramme of hydrogen; i. e., containing in each litre a number of grammes of the reagent equal to the molecular weight of the latter divided by the number of hydrogen atoms which it can replace or combine with. [B.]—**Pavy's s.** An aqueous s. of 4,158 grammes of copper sulphate and 20.4 each of potassium and sodium tartrate and caustic potash, mixed with 300 c. c. of ammonia water of the sp. gr. of 0.880, and diluted to 1,000 c. c. with water. [B. 270 (a, 38).]—**Pearson's s.** See *Liquor sodii arseniatis*.—**Rotter's s.** An antiseptic s. made by dissolving in a litre of water 2 grammes of carbolic acid, 3 of boric acid, 5 each of zinc chloride and zinc sulphocarbonate, 5 centigrammes of mercury bichloride, 25 of sodium chloride, 60 of salicylic acid, and 10 each of thymol and citric acid. ["N. Y. Med. Jour.," Aug. 10, 1889, p. 167.]—**Saturated s.** See under SATURATED.—**S. arsenicale de Fowler** (Fr.). See *Liquor POTASSII arsenitis*.—**S. arsenicale de Pearson** (Fr.). See *Liquor sodii arseniatis* and *Liquor arsenicalis Pearsonii*.—**S. cathérétique** (Fr.). **S. cupro-arsénicé** (Fr.). See *Mixture cathérétique*.—**S. de Coindet** (Fr.). A preparation made by dissolving 19 parts of potassium iodide in 300 of water, and adding 5 of iodine. [B. 119 (a, 38).]—**S. de Guidotti** (Fr.). See *MERCURIUS fluctuans*.—**S. de Heim** (Fr.). See *Liquor arsenicale de Heim*.—**S. de Marryat** (Fr.). A s. of 7 parts each of corrosive sublimate and hydrochloric acid in 300 of compound spirit of lavender. [B. 119 (a, 38).]—**S. de Saviard** (Fr.). A s. of 7 parts of caustic potash,  $\frac{1}{2}$  of camphor, and 60 of sugar in 720 of water. [B. 119 (a, 38).]—**S. iodurée caustique** (Fr.). A s. of 2 parts each of potassium iodide and iodine in 4 of water. [B. 119 (a, 38).]—**S. lithontriptique** (Fr.). A s. of 4 parts of potassium carbonate in 25 of water. [B. 119 (a, 38).]—**S. normale décimée** (Fr.). See *Decinormal s.*—**S. of Belloste**. See *Liquor HYDRARGYRI nitratis*.—**S. of contiguity**. The removal from each other of two parts normally in contact. [B.]—**S. of continuity**. Ger., *Continuitätsstörung*. Disruption or separation in a structure that is normally continuous. [a. 48.]—**Standardized s.** A s. made of standard strength. [B. 11.]—**Standard s's.** See *Volumetric s's.*—**Test s.** A s. used for detecting the presence or amount of certain constituents in a substance undergoing analysis. [a. 38.]—**Thompson's s.** See *Thompson's s. of PHOSPHORUS*.—**Vleming's s.** See *SOLUTIO Vlemingkæ*.—**Volumetric s's.** Lat., *liquores volumetrici*. S's containing known quantities of certain chemical constituents, and of such properties that given amounts of them are capable of producing definite chemical changes in certain substances. [B. 270 (a, 38).]

**SOLUTOL**, n.  $\text{So}^1\text{u}^2\text{to}^2\text{l}$ . A disinfectant said to be especially effective in the preservation of corpses: an alkaline solution of sodium cresylate in an excess of cresol. [Squibb, "Ephemeris," etc., Feb., 1893.]

**SOLVENS** (Lat.), n. com.  $\text{So}^1\text{ve}^2\text{nz}(\text{wans})$ . Gen., *-ent'is*. From *solvere*, to loose. A solvent.—**Solutio solventis mineralis**. See *Liquor ACIDI ARSENIOSI*.

**SOLVENT**, n.  $\text{So}^1\text{v}^2\text{nt}$ . Lat., *solvens*. Fr., s. Ger., *Lösungsmittel*. A liquid in which a substance is or can be dissolved.

**SOLVEOL**, n.  $\text{So}^1\text{ve}^2\text{o}^2\text{l}$ . A solution of sodium cresotate in an excess of cresol; a dark-colored, nearly odorless, neutral liquid, soluble in water in all proportions; an antiseptic of the creolin class, preferable to creolin and lysol from its freedom from greasiness. [Squibb, "Ephemeris," etc., Feb., 1893.]

**SOLVINE**, n.  $\text{So}^1\text{ven}$ . Syn.: *poly-solve*. Any one of a series of thick syrupy liquids of a yellow or brown color, obtained from various fixed oils, especially from castor-oil, olive oil, and rape-seed oil, by the action of concentrated sulphuric acid. They dissolve very many substances which are insoluble in water, but they decompose above 110° C. Their extended medicinal use is shown by the experiments of Kobert and Kiwull to be highly objectionable, as they dissolve the red corpuscles of the blood, irritate the subcutaneous tissues, and produce phenomena of poisoning very similar to those occasioned by sapotoxin and similar substances, so that they are not to be recommended either as ointments or for internal use. [B. 270 (a, 38); "N. Y. Med. Jour.," Mar. 8, 1890, p. 266.]

**SOMA** (Lat.), n. n.  $\text{Som}^1\text{a}$ . Gen., *som'atos (-atis)*. Gr.,  $\sigma\acute{\omega}\mu\alpha$ . See BODY.—**S. tyloides**. See *CORPUS callosum*.

**SOMACULE**, n.  $\text{Som}^1\text{a}^2\text{k-u}^2\text{l}$ . Of M. Foster, the physiological unit of protoplasm. [L. 233 (a, 48).]

**SOMASCESIS** (Lat.), n. f.  $\text{Som}^1\text{a-s}(\text{a}^2\text{s})\text{-se}(\text{k'a})/\text{si}^2\text{s}$ . Gen., *-es'eos (-is)*. From  $\sigma\omega\mu\alpha\sigma\kappa\epsilon\iota\upsilon$ , to exercise the body. Fr., *somascèse, somascétique*. Ger., *Somascetik*. See GYMNASICS.

**SOMATIC, SOMATICAL**, adj's.  $\text{Som}^1\text{a-t}^2/\text{i}^2\text{k}$ ,  $-\text{i}^2\text{k-l}$ . Gr.,  $\sigma\omega\mu\alpha\tau\iota\kappa\acute{o}\varsigma$  (from  $\sigma\omega\mu\alpha$ , the body). Lat., *somaticus*. Fr., *sonatique*. Ger., *somatisch*. Pertaining to the body at large. [D; L.]

**SOMATO-ÆTIOLOGICAL**, adj.  $\text{Som}^1\text{a-t}^2\text{-o-e}^2\text{-t}^2\text{-i}^2\text{-o-l}^2\text{g}^2/\text{i}^2\text{k-l}$ . From  $\sigma\omega\mu\alpha$ , the body, *aitia*, a cause, and  $\lambda\acute{o}\gamma\omicron\varsigma$ , understanding. Pertaining or relating to mental aberration caused by some physical disease. ["N. Y. Med. Jour.," June 25, 1887, p. 701 (a, 34).]

**SOMATODIDYMUS** (Lat.), n. m.  $\text{Som}^1\text{a-t}^2(\text{a}^2\text{t})\text{-o}(\text{o}^2)\text{-di}^2\text{d}^2/\text{i}^2\text{m}$  ( $\text{u}^2\text{m}$ )- $\text{u}^2\text{s}(\text{u}^2\text{s})$ . From  $\sigma\omega\mu\alpha$ , the body, and  $\delta\acute{\iota}\delta\upsilon\mu\omicron\varsigma$ , double. Fr., *somatodidyme*. Ger., *Körperzwilling*. A double monster the individuals of which are united at the trunk. [L. 50 (a, 34).]

**SOMATOLOGY**, n.  $\text{Som}^1\text{a-t}^2\text{-o}^2\text{l}^2\text{-o-g}^2\text{i}^2$ . Lat., *somatologia* (from  $\sigma\omega\mu\alpha$ , the body, and  $\lambda\acute{o}\gamma\omicron\varsigma$ , understanding). Fr., *somatologie*. The anatomy, physiology, etc., of organisms, especially of the human body. [a. 48.]

**SOMATOME**, n.  $\text{Som}^1\text{a-t}^2\text{-om}$ . From  $\sigma\omega\mu\alpha$ , the body, and  $\tau\omicron\mu\eta$ , a cutting. Fr., s. 1. A segment of the trunk of the embryo; a somite. 2. An instrument devised by the younger Baudelocque for dividing the body of the fœtus in the operation of embryotomy.

**SOMATOPAGUS** (Lat.), n. m.  $\text{Som}^1\text{a-t}^2(\text{a}^2\text{t})\text{-o}^2\text{p}^2\text{-a}^2\text{g}^2(\text{a}^2\text{g})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From  $\sigma\omega\mu\alpha$ , the body, and  $\pi\acute{\alpha}\gamma\omicron\varsigma$ , that which is fixed. A double monster having two trunks. [a. 34.]

**SOMATOPLEURE**, n.  $\text{Som}^1\text{a-t}^2\text{-o-plu}^2\text{r}$ . Lat., *somatopleura* (from  $\sigma\omega\mu\alpha$ , the body, and  $\pi\lambda\epsilon\upsilon\rho\acute{\alpha}$ , the side). Fr., s., *lamé somatique, feuille médullo-épidurale*. 1. Of Foster and Balfour, the outer wall of the pleuroperitoneal space in the embryo. [A. 11.] 2. See *Parietal MESOBLAST*.

**SOMATOTOMY**, n.  $\text{Som}^1\text{a-t}^2\text{-o-t}^2\text{-om-i}^2$ . Lat., *somatotomia* (from  $\sigma\omega\mu\alpha$ , the body, and  $\tau\omicron\mu\eta$ , a cutting). See DISSECTION (1st def.).

**SOMATOTRIDYMUS** (Lat.), n. m.  $\text{Som}^1\text{a-t}^2(\text{a}^2\text{t})\text{-o}(\text{o}^2)\text{-tri}^2\text{d}^2/\text{i}^2\text{m}(\text{u}^2\text{m})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From  $\sigma\omega\mu\alpha$ , the body, and  $\tau\acute{\rho}\iota\delta\upsilon\mu\omicron\varsigma$ , threefold. Fr., *somatotridyme*. Ger., *Leibdrilling*. Of Geoffroy Saint-Hilaire, a monster having three bodies. [a. 34.]

**SOMITE**, n.  $\text{Som}^1\text{it}$ . From  $\sigma\omega\mu\alpha$ , the body. Ger., *Somit*. 1. Any one of the individual embryonic segments out of which a particular segment of the body is subsequently developed. 2. A single segment in the body of an articulate animal. [B. 28 (a, 27).]—**Mesoblastic s's, Protovertebral s's.** A row of s's formed on each side of the dorsal ridges of the embryo by the transverse cleavage of the protovertebral column of the mesoblast, and ultimately developed into the spinal ganglia, permanent vertebrae, and muscular and dermal plates. They were formerly called *primordial vertebrae* and *protovertebrae*. [A. 5.]—**Vertebral s's.** In embryology, the rudimentary vertebrae.

**SOMMEL** (Fr.), n.  $\text{So}^2\text{m-me}^2\text{-y'}$ . See SLEEP.—**S. à distance**. See *Telepathic HYPNOTISM*.—**S. d'été**. The immobile, lethargic state assumed by certain *Amphibia* during hot, dry seasons. [A. 385 (a, 18).] Cf. *HIBERNATION*.—**S. d'hiver, s. hibernal**. See *HIBERNATION*.—**S. mécanique**. Of Luys, a hypnotic state produced by the action of rotating mirrors. ["Sem. méd.," Mar. 27, 1889, p. 101 (a, 18).]—**S. nerveux**. See *HYPNOTISM*.—**S. somnambulique artificiel (ou provoqué)**. See *HYPNOTISM*.—**S. paradoxal**. Of Szczypiorski, an abnormal hypnosis in insane persons, apparently voluntary, and not related to the familiar forms of hypnotic and hysterical sleep, but always accompanied by contractions, anaesthesia, etc. ["Ann. de méd. psych.," Nov. 16, 1891, p. 373 (a, 34, 50).]

**SOMMERAUSSATZ** (Ger.), n.  $\text{Zom}^1\text{me}^2\text{r-a}^2\text{-u}^2\text{s-za}^2\text{ts}$ . See NEOLEPRA.

**SOMMERAL** (Ger.). **SOMMERSPROSSE** (Ger.), n's.  $\text{Zom}^1\text{me}^2\text{r-ma}^2\text{l}$ ,  $\text{-spros-se}^2$ . See LENTIGO.

**SOMMET** (Fr.), n.  $\text{So}^2\text{m-ma}$ . See APEX, CULMEN, and VERTEX.—**S. du bassin**. The inferior strait of the pelvis.—**S. du faiscéau intermédiaire du bulbe** [Hirschfeld]. The portion of the medulla oblongata lying between the groove separating the olivary and restiform bodies and the vagus and glossopharyngeal nuclei. [I. 42 (K).]—**S. du monticule**. See *CULMEN cerebelli*.—**S. du sacrum**. The lower extremity of the sacrum.

**SOMMITÉ** (Fr.), n.  $\text{So}^2\text{m-me-ta}$ . The flowering top of a plant. [a. 35.]—**S's fleuris** [Fr. Cod.]. The flowering tops of various plants used in pharmacy. [B. 95 (a, 38).]

**SOPOROSE, SOPOROUS**, adj's. So<sup>2</sup>p<sup>2</sup>o<sup>2</sup>r-os, -u's. Lat., *soporosus*. Fr., *soporeux*. Ger., *schlaf-süchtig* (2d def.). 1. Causing sleep, narcotic. 2. Of diseases, accompanied with excessive drowsiness. [L, 41, 49 (a, 14).]

**SOKA** (Lat.), n. f. So<sup>2</sup>r<sup>2</sup>a<sup>2</sup>. See URTICARIA.

**SORBAMIDE**, n. So<sup>2</sup>rb<sup>2</sup>a<sup>2</sup>m-i<sup>2</sup>d(id). Fr., s. A substance, C<sub>6</sub>H<sub>7</sub>O<sub>2</sub>NH<sub>2</sub>, obtained by the action of liquid ammonia on sorbic ethyl sorbate. It forms white needles. [B, 93 (a, 14).]

**SORBEFACIENT**, adj. So<sup>2</sup>rb<sup>2</sup>e<sup>2</sup>f<sup>2</sup>a<sup>2</sup>si<sup>2</sup>e<sup>2</sup>nt. From *sorbere*, to suck in, and *facere*, to make. Producing or promoting absorption. [a, 17.]

**SORBIC ACID**, n. So<sup>2</sup>r<sup>2</sup>bi<sup>2</sup>k. Fr., *acide sorbique*. Ger., *Sorbeer-säure*, *Vogelbeersäure*, *Sorbinsäure*, *Spiersäure*. A monatomic acid, C<sub>6</sub>H<sub>6</sub>O<sub>4</sub>, obtained from the fruit of *Pyrus aucuparia* and *Pyrus sorbus*. [B, 3 (a, 38); B, 93 (a, 14).]

**SORBIN, SORBINOSE**, n's. So<sup>2</sup>rb<sup>2</sup>i<sup>2</sup>n, -i<sup>2</sup>n-os. Fr., *sorbine*. Ger., *Sorbin*. A substance, C<sub>6</sub>H<sub>10</sub>O<sub>4</sub>, obtained from the juice of the berries of *Pyrus aucuparia*. [B, 3 (a, 38).]

**SORBITE**, n. So<sup>2</sup>rb<sup>2</sup>i<sup>2</sup>t. Fr., s. Ger., *Sorbit*. A crystalline substance, (C<sub>6</sub>H<sub>14</sub>O<sub>6</sub>) + H<sub>2</sub>O, found in the berries of *Pyrus aucuparia*. [B, 3, 93 (a, 14, 38).]

**SORBUS** (Lat.), n. f. So<sup>2</sup>rb<sup>2</sup>u's(u's). Fr., *sorbier*. Ger., *Eberesche*. A section of the genus *Pyrus*. [a, 35.]—**S. americana**. The *Pyrus americana*, American mountain ash. Its properties are supposed to be similar to those of *Pyrus aucuparia*. The fruit is said to yield nearly 7 per cent. of malic acid. [a, 35.]—**S. aucuparia**. See *Pyrus aucuparia*.—**S. cydonia**. See *CYDONIA vulgaris*.—**S. domestica**. See *Pyrus s.*—**S. sambucifolia**. See *Pyrus sambucifolia*, the western mountain ash. [a, 35.]—**S. sativa**. See *Pyrus s.*

**SORDES** (Lat.), n. f. So<sup>2</sup>rd<sup>2</sup>ez(as). Gen., *sordis*. From *sordere*, to be dirty. Fr., *saburre*. Ger., *Unreinigkeit*. 1. Dirt, filth; especially the foul matter which collects on the teeth and lips in certain fevers. [D.] 2. See CERUMEN.—**Dental s.** See S. (1st def.).—**S. aurium**. See CERUMEN.—**S. capitis**. See SCABIES capitis.—**S. cutis embryonis**. See VERNIX caseosa.—**S. oculi**, **S. oculorum**. See ACNE (2d def.).

**SORDIDIN**, n. So<sup>2</sup>r<sup>2</sup>di<sup>2</sup>d-i<sup>2</sup>n. Fr., *sordidine*. Ger., *S.* A substance, C<sub>15</sub>H<sub>12</sub>O<sub>7</sub> (or C<sub>15</sub>H<sub>10</sub>O<sub>6</sub>), obtained from *Zeora sordida*. [B, 270 (a, 38).]

**SORE**, adj. Sor. A-S., *sār*. Gr., *δωρπός*. Lat., *dolorosus*. Fr., *sensible*, *dououreux*. Ger., *schmerzhaft*. Painful, tender on pressure. [G.]

**SORE**, n. Sor. Gr., *ἔλκος*. Lat., *ulcus*. Fr., *ulcère*. Ger., *offenes Geschwür*, *wunde Stelle*. An ulcer or any painful or tender lesion on the surface of the body. [G.]—**Bed s.** Lat., *gangrena per decubitus*, *decubitus*. Fr., *escharre de decubitus*. Ger., *Druckbrand*, *Durchliegen*. Gangrene of the skin or of deeper tissues, due to prolonged recumbency. It may occur in the form either of primary necrosis of the skin or of phlegmonous gangrene. [G, 73.] Cf. *DERMATITIS per decubitus*.—**Hard s.**, **Infecting s.** See *SYPHILITIC CHANCERE*.—**Kandahar s.** A s., similar to the Delhi boil, affecting inhabitants of Kandahar. [a, 34.]—**Lahore s.**, **Moulton s.** See *DELHI BOIL*.—**Natal s.** A chronic cutaneous s. affecting residents of Natal; believed to be due to the heat, uncleanness, and a scorbutic tendency. [a, 34.]—**Oriental s.** Of Tilbury Fox, any one of the diseases occurring in the East which have the general characters of Aleppo and Delhi boil, Biskra button, etc. [G, 69.]—**Pandjeh s.**, **Pendjeh s.** A chronic s. affecting residents of Pandjeh, caused by irritation of the skin by sand, dirt, and uncleanness, the intense heat, and the scorbutic tendency of many of the inhabitants favoring its occurrence. [Ind. Med. Gaz., Oct., 1886, p. 296 (a, 34).]—**Soft (venereal) s.** See *SIMPLE CHANCERE*.—**Veldt s.** See *Natal s.*

**SORE** (Fr.), n. Sor. See SORUS.

**SOREDIAL**, adj. So<sup>2</sup>r<sup>2</sup>e<sup>2</sup>d-i<sup>2</sup>l. Pertaining to or developed from a soredium. [a, 35.]

**SOREDIAE**, adj. So<sup>2</sup>r<sup>2</sup>e<sup>2</sup>d-i<sup>2</sup>at. Lat., *sorediatus* (from *soredium* [q. v.]). Having small patches or mealy spots on the surface. [a, 35.]

**SOREDIDIUM** (Lat.), n. n. So<sup>2</sup>r<sup>2</sup>(sor)-ed(i<sup>2</sup>d)-i<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m). From *σωρός*, a heap. Fr., *sorédié*, *sorédiom*. Ger., *Keimhäufchen*, *Brut-häufchen*, *Staubhäufchen*. A brood bud; one of the gonidia or one of the groups of gonidia (algal cells, according to some authors) either occurring on the upper surface or bordering the margin of the thallus of many lichens, in the form of rounded or diffuse pulverulent eruptions which, when discharged from the fronds, develop into new plants. [a, 35.]

**SORE-HEELS**, n. Sor-helz'. Fr., *maladie du talon*. Of Jenner, see HORSE-POX.

**SORE MOUTH**, n. Sor mu<sup>2</sup>u<sup>2</sup>th. See STOMATITIS.—**Nursing s. m.** See STOMATITIS materna.

**SORE THROAT**, n. Sor thro<sup>2</sup>t'. See ANGINA.—**Clergymen's s. t.** See *FOLLICULAR PHARYNGITIS*.—**Gouty s. t.** Of Mackenzie, a pharyngitis due to gout. [a, 34.]—**Hospital s. t.** Chronic pharyngitis affecting residents of hospitals. [a, 34.]—**Inflammatory s. t.** See *CYNANCHE tonsillar* and *Erythematous PHARYNGITIS*.—**Malignant s. t.**, **Putrid s. t.** See *Malignant ANGINA*.—**Sandringham s. t.** A term applied to diphtheria at Norfolk, England. [Brit. Med. Jour., 1887, ii, p. 176 (a, 34).]—**Sloughing s. t.** The gangrenous throat affection of malignant scarlet fever. [D.]—**Ulcerated s. t.**, **Ulcerous s. t.** See *Malignant ANGINA*.

**SOREUMA** (Lat.), n. n. So<sup>2</sup>r<sup>2</sup>(sor)-u<sup>2</sup>m(a<sup>2</sup>). Gen., -eum(a<sup>2</sup>os (-atis)). Gr., *σώρευμα* (from *σωρεύειν*, to heap up). Fr., *soreume*. Of Walroth, see SOREDIDIUM.

**SORGHUM** (Lat.), n. n. So<sup>2</sup>rg<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m). Fr., *sorgho*. Ger., *Moorhirse*. A genus of the *Andropogoneæ*, considered by some a

subgenus of *Andropogon*. The *Sorghes* are a subtribe of the *Saccharineæ*. [a, 35.]—**S. commune**, **S. dora**. See *S. vulgare*.—**S. halepense**. Ger., *aleppische Moorhirse*. The Aleppo millet-grass of southern Europe and the Orient. The sweetish mucilaginous root (lt. *graminaceæ*, *smilacæ dulce*) is used in Italy in place of European sarsaparilla. [a, 35.]—**S. saccharatum**. Fr., *sorgho sucré*, *gros mil* (ou millet), *millet de Cafre*. Broom-corn, Chinese sugar-cane, sugar-millet; indigenous to northern China and cultivated in India, Africa, Europe, and the United States. The juice is rich in glucose, and yields molasses, sugar, alcohol, and a liquor like cider. The leaves and seed are used as fodder. The stems are made into paper. In China the coloring matter of the seed is used to deepen the color of wines. The spikelets are used for making brooms. [a, 35.]—**S. vulgare**. Fr., *sorgho* (commun, ou d'Afrique), *balais* (de jonc), *blé de Guinée*, *garnotte*, *grand (ou gros) mil*, *millet d'Afrique* (ou d'alaïs, ou de Turquie), *grand millet noir*. Ger., *gemeine Moorhirse*, *Durrags*, *Mohrenhirse*, *Kaffernkorn*. Dhourra, Guinea-corn, East Indian (or great, or Turkish) millet; cultivated for its grain. It was the *κρυπτος* of the ancient Greeks, who used a decoction of the seed as a pectoral and the flour as an astringent and in poultices. In China the seeds of one variety are used for making wine. [a, 35.]

**SORORATION**, n. Sor-or-i<sup>2</sup>a'shu<sup>2</sup>n. From *soror*, a sister. Fr., s. The development of a girl's breasts at puberty. [a, 14.]

**SOROSIS** (Lat.), **SOROSUS** (Lat.), n's f. and m. So<sup>2</sup>r(sor)-os-i<sup>2</sup>s, -u's(u's). Gen., -os(-is), -os'i. From *σωρός*, a heap. Fr., *sorrose*. Ger., *Haufenfrucht*. The product of a compact flower-cluster; a fleshy multiple fruit. [a, 35.]

**SORREL**, n. So<sup>2</sup>r<sup>2</sup>re<sup>2</sup>l. 1. The genus *Oxalis*. 2. The *Rumex acetosa* and other species of *Rumex*. [a, 35.]—**Common s.** The *Rumex acetosa* and (in the United States) *Rumex acetosella*. [a, 35.]—**Cuckoo-s.** See *OXALIS acetosella*.—**French s.** See *Rumex scutellatus* and *OXALIS acetosella*.—**Guinea s.** The *Hibiscus sabdariffa* and its variety *alba*. [a, 35.]—**Horse-s.** See *Rumex lapathicus*.—**Mountain s.** 1. The *Oxalis acetosella*. 2. The genus *Oxyria*. [a, 35.]—**Red s.** See *HIBISCUS sabdariffa*.—**Salt of s.** See *POTASSIUM oxalate* (3d def.).—**Sheep-s.**, **Sheep's s.** See *Rumex acetosella*.—**S-tree**. 1. The *Oxydendron arboreum*. 2. In Queensland, the *Hibiscus heterophyllus*. [a, 35.]—**S-vine**. The *Cissus acida*. [a, 35.]—**S-wood**. 1. The *Oxalis acetosella*. 2. The *Oxydendron arboreum*. [a, 35.]—**Sow-s.** Probably a corruption of *sour s.*; the *Rumex acetosa*. [a, 35.]—**Water-s.** See *Rumex hydrolapathum*.—**Wood-s.** 1. The genus *Oxalis*, especially *Oxalis acetosella*. 2. In Jamaica, the *Begonia nitida*. [a, 35.]

**SORTIE** (Fr.), n. So<sup>2</sup>r<sup>2</sup>te. An outlet. [A, 537 (a, 21).]—**S. du bassin**. See *INFERIOR STRAIT of the pelvis*.

**SORUS** (Lat.), n. m. So<sup>2</sup>r<sup>2</sup>u's(u's). From *σωρός*, a heap. Fr., *sore*. Ger., *Häufchen*, *Sporenhäufchen* (2d def.). 1. The fruit dot, or collection of sporangia, of ferns. 2. A collection of spores or globules on the fronds of various *Algae*. [a, 35.]

**SORY** (Lat.), n. n. So<sup>2</sup>r<sup>2</sup>i<sup>2</sup>u's. Gr., *σῶπρ*. See IRON sulphate.

**SOSIBIOUS**, adj. Soz-i<sup>2</sup>b<sup>2</sup>i<sup>2</sup>u's. Lat., *sosibiūs* (from *σῶζειν*, to save, and *bios*, life). Fr., *sosibié*. Used or fitted for preserving life. [L, 50 (a, 14).]

**SOSICREAS** (Lat.), n. n. So<sup>2</sup>z(sos)-i<sup>2</sup>k're<sup>2</sup>a's(a's). Gen., -crea(-atis). From *σῶζειν*, to save, and *κρέας*, flesh. See CREASOTE.

**SOTERIOLOGY**, n. So<sup>2</sup>t-e<sup>2</sup>r-i<sup>2</sup>o<sup>2</sup>l'i<sup>2</sup>o<sup>2</sup>-ji<sup>2</sup>. From *σωτήρ*, a savior, and *λόγος*, understanding. See HYGIENE.

**SOTERIUS** (Lat.), adj. So<sup>2</sup>t(sot)-e(a)<sup>2</sup>ri<sup>2</sup>u's(u's). Gr., *σωτήριος* (from *σωτήρ*, a savior). Preserving, healing (said especially of mineral springs). [L, 50 (a, 14).]

**SOTIRELLA** (Lat.), n. f. So<sup>2</sup>t-i<sup>2</sup>r-el'la<sup>2</sup>. See under BALSAMUM odontalgicum.

**SOTTEVILLE-LEZ-ROUEN** (Fr.), n. Sot-vel-la-ru-a<sup>2</sup>n<sup>2</sup>. A place in the department of the Seine-Inférieure, France, where there is a sulphurous spring. [L, 49, 87 (a, 14, 50).]

**SOUARI NUT**, n. See *Suwarrow NUT*.

**SOUBIZE** (Fr.), n. Sub-ez. A place in the department of the Charente-Inférieure, France, where there is a chalybeate spring.

**SOUBRELANGE** (Fr.), n. Sub-r-la<sup>2</sup>n<sup>2</sup>g. See TONGUE-TIE.

**SOUBRESAUT** (Fr.), n. Sub-r<sup>2</sup>so. 1. The "bumping" of a boiling liquid. [B, 8.] 2. See SUBSULTUS.

**SOUCELLES** (Fr.), n. Su-se<sup>2</sup>l. A place in the department of the Maine-et-Loire, France, where there is a chalybeate spring.

**SOUCHE** (Fr.), n. Sush. A stump; the thick subterranean portion of a plant (usually the rhizome and sometimes the root of a perennial plant); in the pl., s's, of the Fr. codr., rhizomes. [a, 35, 38.]—**S's des hémisphères**. See CHURA cerebri.

**SOUCHET** (Fr.), n. Su-sha. See CYPERUS.—**S. babylonique**. See *Larger GALANGAL*.—**S. des Indes**. See *CURCUMA longa*.—**S. sultan**, **S. tubéreux**. See CYPERUS esculentus.

**SOUCHEYRE** (Fr.), n. Su-she<sup>2</sup>r. A place in the department of the Haute-Loire, France, where there is a gaseous alkaline spring. [L, 105 (a, 50).]

**SOUCI** (Fr.), n. Su-se. See CALENDALE (1st def.).—**Conserve de s.** See *CONSERVA CALENDALE*.—**Extrait de s.** See *EXTRACTUM CALENDALE*.—**S. d'eau**. See *CALTHA palustris* and *LYSIMACHIA thyrsoflora*.—**S. des blés**, **S. des champs**. See *CHRYSANTHEMUM segetum*.

**SOUDE** (Fr.), n. Sud. 1. Soda. For such subheadings as *Benzoate de s.*, etc., see the manifestly equivalent forms *SODIUM benzoate*, etc. 2. The genus *Salsola*. [a, 35.]—**Acétate de s. cristallisé**. See *SODIUM acetate*.—**Alun de s.** See *SODA ALUM*.—**Azotate de s.** See *SODIUM nitrate*.—**Borate de s.** [Fr. Cod.] (avec excès de base), **Borate sursaturé de s.** See BORAX.—**Carbonate de**

**s.** Normal sodium carbonate. [B.]—**Carbonate de s. neutre.** Sodium bicarbonate. [B, 119 (a, 38).]—**Carbonate de s. pur cristallisé.** See **Sodium carbonate.**—**Carbonate de s. sec du commerce.** See **Dried commercial sodium carbonate.**—**Chlorite de s. chloruré.** Chlorure de s. liquide. See **Liquor sodæ chloratæ.**—**Collutoire au borate de s.** [Fr. Cod.] Lat., *collutorium cum borate sodico*. Collutory of borax; made by triturating 1 part of powdered borax with 4 parts of honey of rose. [B.]—**Craie de s., Cristaux de s.** See **Sodium carbonate.**—**Eau de s. (carbonatée).** See **Liquor sodæ effervescent.**—**Gargarisme au borate de s.** See **Gargarisma boraxatum.**—**Hydrolé de bicarbonate de s.** See **Liquor sodæ effervescent.**—**Hydrolé de s.** See **Liquor sodæ.**—**Hypochlorite de s.** See **Sodium hypochlorite** and **Liquor sodæ chloratæ.**—**Hypochlorite de s. liquide.** See **Liquor sodæ chloratæ.**—**Hyposulfite de s.** See **Sodium thiosulfate.**—**Phénate de s.** See **Sodium carbonate.**—**Phénate de s. dissous.** See **Liquor natri carbolici.**—**Phosphate de s.** See **Sodium phosphate.**—**Phosphate de s. et d'ammoniaque.** See **Ammonium and sodium phosphate.**—**Poudre de bicarbonate de s.** Sodium bicarbonate powdered and sifted through a No. 1 hair sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]—**Poudre de borate de s.** [Fr. Cod.] Borax powdered and sifted through a No. 1 hair sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]—**Sel de s. (cristallisé).** See **Sodium carbonate.**—**Silicate de s. liquide.** See **Liquor sodii silicatis.**—**Sirap d'hypophosphite de s.** [Fr. Cod.] A preparation made up of 1 part of sodium hypophosphite, 10 parts of syrup of orange-flowers, and 89 of syrup. [B.]—**Soluté d'arséniate de s.** See **Liquor arsenicæ Pearsonii** and **Liquor sodii arseniatis.**—**Solution de s.** See **Liquor sodæ.**—**S. aérée.** Sodium carbonate. [B, 119 (a, 38).]—**S. à la chaux.** A substance formed by mixing a solution of sodium carbonate with lime, as in the first stage in the preparation of caustic soda. [L, 49 (a, 14).]—**S. boratée.** See **BORAX.**—**S. carbonatée.** See **Sodium carbonate.**—**S. caustique.** Caustic soda. [B.]—**S. caustique liquide.** See **Liquor sodæ.**—**S. commune.** See **SALSOOLA soda.**—**S. crayeuse.** Sodium carbonate. [B, 119 (a, 38).]—**S. cultivée.** See **SALSOLA sativa.**—**S. de varec.** See **KELP** and **Fucus vesiculosus.**—**S. effervescent.** **S. fondue.** Sodium carbonate. [B, 119 (a, 38).]—**S. sulfatée.** See **Sodium sulphate.**—**S. tartarisée.** See **POTASSIUM and sodium tartrate.**—**S. vitriolée.** See **Sodium sulphate.**—**Sous-carbonate de s.** See **Sodium carbonate.**—**Sous-phosphate de s.** See **Sodium phosphate.**—**Sulfate de s.** Normal sodium sulphate. [B.]—**Sulfate de s. du commerce.** See **Crude sodium sulphate.**—**Sulfate de s. purifié.** See under **Sodium sulphate.**—**Sulfite acide de s.** See **Sodium bisulfite.**—**Sulfite sulfurée de s.** See **Sodium thiosulfate.**—**Sulfonate de s.** See **Sodium ethylsulphate.**—**Sulfure de s.** See **Sodium sulphide** and **Sodium trisulphide.**—**Tablettes de bicarbonate de s.** See **Trochisci sodii bicarbonatis.**—**Tablettes de bicarbonate de s. à la menthe.** Ninety-six-centigramme lozenges made from a mixture of 64 grammes of sodium bicarbonate, 1,125 of sugar, 144 of mucilage, and 18 drops of oil of peppermint. [B, 119 (a, 38).]—**Tablettes de borate de s.** Sp., *tablettas de bórato sodico* [Sp. Ph.]. Lozenges each containing 10 centigrammes of borax, and made up with 60 centigrammes of water, 90 of sugar, and a very small proportion of gum tragacanth and tincture of benzoin [Fr. Cod.]. The Sp. Ph. orders tragacanth mucilage and omits the water and the tincture of benzoin. [B; B, 95 (a, 38).]

**SOLDON** (Fr.), n. Sud-o<sup>2</sup>n<sup>2</sup>. A place in the department of the Maine-et-Loire, France, where there is a sulphurous spring. [a, 14.]

**SOUDURE** (Fr.), n. Sud-u<sup>6</sup>r. 1. Coalescence, union. [a, 35.] 2. See **False ankylosis.**—**S. des os.** See **True ankylosis.**

**SOUFFLE**, n. Suf. Gr., *σπῶς*. Lat., *flatus*. Fr., s. A low blowing sound, a murmur. [D.] See also **BRUIT de s.** For various subheadings not here given, see the corresponding forms under **MURMUR.**—**Bronchial s.** See **Bronchial respiration** (1st def.) and cf. **Bronchial murmur.**—**Cardiac s.** 1. See **Heart murmur.** 2. In obstetrics, that variety of the fetal s. which originates in the heart. [A, 15.]—**Cavernous s.** See **Cavernous rale.**—**Electric s.** Of Charcot, a feeling of coolness produced by bringing a metallic ball within six inches of a person charged with static electricity. [N. Y. Med. Jour., June, 1881, p. 720 (a, 34).]—**Fetal s.** 1. A s. of inconstant occurrence, thought by Nägele, Hecker, Schröder, and others to be different from the funicular s., and to be due to temporary compression of the umbilical cord between the foetus and the uterine wall, excited especially by the application of the stethoscope. 2. A collective term for a cardiac and a funicular s. [A, 15, 24.]—**Funic s., Funicular s.** Ger., *Nabelschnurgeräusch*. A hissing sound, synchronous with the fetal heart sound, sometimes heard on auscultation of the abdomen of a pregnant woman, and supposed to have its origin in the arteries of the umbilical cord. [A, 22.]—**Glottic s.** An auscultatory s. heard in the neck caused by air passing through the glottis. [a, 34.]—**Intracardiac s.** See **Cardiac s.**—**Placental s.** Fr., *s. placentaire*. Ger., *Placentargeräusch*. See **Uterine s.**—**S. bronchique** (Fr.). See **Bronchial respiration.**—**S. continu (avec redoublement)** (Fr.). See **BRUIT de s. à double courant.**—**S. du grand silence** (Fr.). Of Voilez, a cardiac s. (1st def.) that begins during diastole and is reinforced little by little; observed in cases of extreme stenosis when the valves are joined at their free border. They close easily but open with difficulty. [Barth., "Gaz. hebdom. de méd. et de chir.," March 6, 1885, p. 105 (a, 34).]—**S. tubaire** (Fr.). See **Tracheal respiration** (1st def.) and **Bronchial respiration** (1st def.).—**S. vénéux.** See **Venous murmur** and **BRUIT vénéux**, and cf. **Venous hum.**—**S. volité.** Of Laennec, an auscultatory sign in which it seems that each vibration, cough, or respiration agitates a sort of mobile veil interposed between a pulmonary cavity and the observer's ear. It is observed in pulmonary cavities, bronchial dilatation, and peripneumonia. [Laennec (a, 34).]—**Tracheal s.** See **Tracheal respiration** (1st def.).—**Umbilical s.** 1. See **Funicular s.** 2. Of Nägele, see **Fetal s.** (1st def.).—**Uterine s.** Fr., *s. utérin*, s. pla-

centaire, grand bruit (to distinguish it from the fetal heart sounds). Ger., *Circulationsgeräusch des schwangeren Uterus*, *Placentargeräusch*, *Uteringeräusch*, *Uterinalgéräusch*. A blowing sound like that heard over an aneurysm, recognized, on auscultating the uterus in advanced pregnancy, as synchronous with the mother's pulse; supposed to be due to enlargement of the uterine arteries.

**SOUFFLET** (Fr.), n. Suf-fla. See **INSUFFLATOR.**

**SOUFRE** (Fr.), n. Su-fr'. See **SULPHUR.**—**Alcool de s.** See **CARBON disulphide.**—**Baume de s.** See **Balsamum sulphuris.**—**Baume de s. anisé.** See **Balsamum sulphuris anisatum.**—**Baume de s. succiné.** See **Balsamum sulphuris succinatum.**—**Baume de s. térébenthiné.** See **Balsamum sulphuris terebinthinatum.**—**Clyssus de s.** See **ANTIMONI clyssus.**—**Électuaire de s.** See **Confectio sulphuris.**—**Esprit de s. (par la cloche).** See **ANTIMONI clyssus.**—**Fleurs de s.** Flowers of sulphur. [B.]—**Fleurs de s. composées.** See **Flores sulphuris compositi.**—**Fleur de s. lavée.** Washed sulphur. [B.]—**Foie de s.** Liver of sulphur. [B.]—**Foie de s. alcalin.** Potassium or sodium sulphide. [B.]—**Foie de s. antimoné.** Liver of antimony. [B, 92.]—**Foie de s. calcaire.** Calcium sulphide. [B, 119.]—**Foie de s. volatil.** See **Liquor fumans Beguini.**—**Glycéré de s.** See **Glyceritum cum sulphure.**—**Huile de s.** See **ANTIMONI clyssus.**—**Lait de s.** See **Lac sulphuris.**—**Liniment de foie de s. calcaire.** See **Linimentum calcarie sulphuratæ.**—**Magistère de s.** Precipitated sulphur. [a, 38.]—**S. non lavé.** Crude sulphur. [a, 38.]—**S. précipité.** Precipitated sulphur. [B.]—**S. sublimé.** Sublimed sulphur. [B.]—**S. sublimé lavé.** Washed sulphur. [B.]—**S. végétale.** Lycopodium powder. [a, 35.]—**Tablettes de s.** See **Tabellæ sulphuris.**

**SOUGRAGNE** (Fr.), **SOUGRAIGNE** (Fr.), n's. Sug-ra'n-y', -re'n-y'. A place in the department of the Aude, France, where there is a saline and sulphurous spring. [B, 93 (a, 14).]

**SOUL**, n. Sol. Gr., *ψυχή*. Lat., *anima*. Fr., *âme*. Ger., *Seele*. The non-corporeal, immaterial part of man (cf. **MIND**). [a, 48.]—**Physical s.** Lat., *anima structrix*. An old term for the cause of the development of organisms in the likeness of the parents; a "formative power" of the mother's mind. [A, 42.] Cf. **VIS ESSENTIALIS** and **Théorie des moules intérieurs.**—**Spinal s.** A faculty of sensation and consciousness supposed by some to exist in the spinal cord. [L, 20 (a, 48).]

**SOULAMEA** (Lat.), n. f. Sul-a'm'e-a<sup>2</sup>. Fr., *soulamé*. A genus of the *Simarubaceæ*, tribe *Picramnieæ*; formerly placed in the *Polygalææ* and by Endlicher made a distinct family (*Soulameæ*) allied to the *Polygalææ*. [a, 35.]—**S. amara.** A tree of the Molucca and Fiji Islands. All parts of the plant are bitter, especially the tonic and emetic bark and root, which are used in epilepsy, asthma, snake-bites, cholera, pleurisy, etc. The fruit-kernel is used in colic. *Radix mustela* (Fr., *racine de belette*) is by some authors identified with the root of this tree. [a, 35.]

**SOULEUX** (Fr.), n. Sul-e-u<sup>2</sup>. A place in the department of the Isère, France, where there is a saline and sulphurous spring.

**SOUND**, n. Su<sup>2</sup>u<sup>2</sup>nd. Gr., *φωνή*. Lat., *sonus*. Fr., *son*. Ger., *Schall*. The sensation produced on the auditory-nerve filaments by the vibrations of a sonorous body. [F.]—**Anasarcons s.** A moist bubbling s. heard on applying a stethoscope to the chest when its skin is oedematous.—**Band-box s.** Ger., *Schachtelschall*. Of Biermer, the abnormally resonant percussion note heard over the chest in pulmonary emphysema. [P. Guttman (a, 17).] Cf. **WOODEN DULLNESS.**—**Bellows s.** Fr., *bruit de soufflet*. An endocardial murmur like the blowing s. of a bellows. [D, 29.]—**Blowing s.** An organic murmur likened to the s. of air expelled with moderate force through an aperture.—**Bottle s.** See **Amphoric murmur** (1st def.).—**Bronchial s.** See **Bronchial respiration.**—**Cardiac s's.** See **Heart s's.**—**Cracked-pot s.** Fr., *bruit de pot fêlé*. A variety of tympanic resonance heard over pulmonary cavities, etc. [D.]—**Flapping s.** See **BRUIT de drapeau.**—**Fetal heart s's.** Fr., *bruits (ou battements) du cœur fœtal*. Ger., *Herztöne des Kindes (oder des Fötus)*, *Fötalpulps*, *Herzschlag des Fötus*, *fœtale Herztöne*. The s's made by the beating of the fetal heart, as heard on auscultation of the mother's abdomen: the most trustworthy sign of pregnancy as well as of the fact that the child is alive.—**Friction s.** See the major list.—**Funicular bellows s.** See **Funicular souffle.**—**Heart s.** *Herztöne*. The two s's, one dull and prolonged, the other short and sharp, heard over the cardiac region. The first, long, or systolic s. is isochronous with the systole of the ventricles. The second, short, or diastolic s. is isochronous with the closure of the semilunar valves. The s's emitted have been compared to the pronunciation of the syllables *lub* and *dup*, with a short pause after the latter s. One of the chief factors in the production of these s's is the contracting muscular fibres of the ventricles; the s's are supported and increased by the s. produced by the tension and vibration of the auriculo-ventricular valves and their chordæ tendineæ. [Landois (a, 34).]—**Hollow s.** Of Alison, an amphoric percussion s. [a, 34.]—**Humming s.** See **HEM.**—**Humoric s.** See **BRUIT humorique.**—**Hydro-meric s.** See **BRUIT humorique**, **GARGOILLEMENT**, and **GUTTA cadens.**—**Kettle-boiling s.** **Kettle-singing s.** Of Alison, an auscultatory thoracic s., resembling that of water boiling in a kettle; heard in incipient phthisis. [a, 34.]—**Metallic heart s's.** See under **Metallic murmur.**—**Metamorphosing breath s.** Of Seitz, an inspiratory s. due to the passage of air through a narrow opening into a pulmonary cavity. It consists of a harsh s. lasting for one third of the inspiratory period, and then continued as blowing respiration at-

tended with a metallic echo or as ordinary râles. [D. 25, 47].—**Muscle s.** Lat., *myophonia*. Fr., *son musculaire*. Ger., *Muskelton, Muskelgeräusch*. The s. heard by auscultation over a muscle that is contracted and kept in a state of tension. [a. 34.] See also **BRUIT musculaire**.—**New-leather s.** See **BRUIT de cuir neuf**.—**Osseous s.** Of Cammann and Clark, an elevated intense auscultatory s. having a slightly metallic timbre. [L. 87 (a. 34).]—**Pseudo-cavernous s.** See **BRUIT humorique**.—**Pulmonary s.** See **Vesicular murmur** and **Respiratory murmurs**.—**Rasping s.** Fr., *bruit de râpe* (ou de lime à bois). A rough pleural or pericardial friction s. [a. 34].—**Respiratory s's.** See **Respiratory murmurs**.—**Sawing s.** Fr., *bruit de scie*. A morbid s. produced by disordered cardiac action, resembling that of sawing. [D.]—**S. shadow.** An interference with the complete projection of a s. wave by some obstacle interposed between the source of the s. and the ear of the observer. ["N. Y. Med. Jour.," Feb. 23, 1889, p. 223 (a. 34).]—**Splashing s.** Ger., *plätscherndes Geräusch*. See **BRUIT de clapement**.—**To-and-fro s.** Fr., *bruit de va et vient*. Of Watson, the rasping, friction s. of pericarditis. Cf. **To-and-fro murmur**.—**Tubular s.** See **Traacheal respiration** (1st def.).—**Water-wheel s.** See **BRUIT de moulin**.

**SOUND**, n. Su<sup>5</sup>u<sup>nd</sup>. Gr., *μήλη, στύλος*. Lat., *specillum, stylus*. Fr., *sonde*. Any elongated instrument, usually metallic, by which cavities of the body are explored. [E.]—**Anel's s.** See **Anel's PROBE**.—**Bellocoq's s.** See **Bellocoq's CANNULA**.—**Conical s.** A dilating urethral steel s. gradually increasing in size from the point to the shaft. [a. 34].—**Cooling s.** A double-

BREWER'S LACRYMAL CUPPED SOUND.

current catheter without eyes, the two canals communicating near the instrument's point; used to cool the prostatic urethra by passing cold water through it. [a. 34].—**Cupped s.** A s. with cups or depressions at the curved portion for holding ointments. [E.] Cf. **Ointment BOUGIE**.—**Gouley's**

OTIS'S BULBOUS SOUND.

VAN BUREN'S SOUND.

**tunneled s. and guide.** A fine urethral s. grooved like a director, the groove ending with a bulbous point which is perforated for the passage of a filiform bougie through it to serve as a guide. [E.]—**Hunter's s.** A small silver cannula containing a coil of wire; used for removing calculi from the urethra, the wire being pushed through the cannula and engaging the calculus in its

SOUND AND SCALE.

coil. [E.]—**Jenks's spiral s.** A uterine s. formed of a flexible spiral of metal. [a. 34].—**Kraus's s.** A gum s. having a circumference corresponding to 18 or 20 of Charrière's scale; it is introduced between the membranes and the uterus to produce abortion. [a. 34].—**Laforest's s.** A small cannula for probing and injecting the nasal duct from below. [E.]—**Lithometer s.** A s. shaped like a lithotrite, having an index on the handle for the purpose of showing the degree of separation between the blades. [a. 34].—**Micro-telephonic s.** Of Sir H. Thompson,

A DOUBLE-CURVED SOUND.

SIMPSON'S UTERINE SOUND.

an ordinary s. on the handle of which is a microphone connected with a pole of a battery, a telephone that may be placed at the ear

VAN BUREN'S CUPPED SOUND.

being connected with the other pole. [a. 34].—**Myrtle-leaved s.** See **Feuille de MYRTE**.—**Nélaton's s.** See **Nélaton's PROBE**.—**Oesophageal s.** A long, flexible rubber s. used in determining lesions of the œsophagus. [a. 34].—**Thermo-electric s.** A fine probe

that may be passed into an affected part or organ and connected with an electro-thermostat so as to register temperature variations. [a. 34].—**Urethral s.** Ger., *Blasensonde, Steinsonde*. A s. used in examining the urethra. [a. 34].—**Uterine s.** A metallic s. having a graduated stem with a slight curve at its extremity corresponding to the axis of the normal uterus; used to measure the length of the uterine canal. [L. 49 (a. 14).]

**SOUND**, n. Su<sup>5</sup>u<sup>nd</sup>. The air-bladder of a fish. [a. 35.]

**SOUND**, v. tr. and intr. Su<sup>6</sup>u<sup>nd</sup>. To catheterize; to search the bladder for stone. [E.]

**SOUPIR** (Fr.), n. Sup-er. See **SIGH**, n.

**SOUR**, adj. Su<sup>5</sup>u<sup>r</sup>. Gr., *ὄξυς*. Lat., *acer*. Fr., *aigre, acide*. Ger., *sauer*. Tart, acid.

**SOURBERRY**, n. Su<sup>5</sup>u<sup>r</sup>-be-rî-jî. 1. The *Berberis vulgaris*, var. *canadensis*. 2. The cranberry (*Vaccinium macrocarpum*).

**SOURCE** (Fr.), n. Surs. See **FONS**.—**S. minérale**. A mineral spring. [a. 21.]

**SOURCIL** (Fr.), n. Sur-se. The eyebrow. [a. 14].—**S. cotyloïdien**. The brim of the acetabulum. [A. 385 (a. 48).]

**SOURCILIER** (Fr.), n. Sur-se-le-a. See **CORRUATOR supercili**.

**SOURD** (Fr.), adj. Sur. See **DEAF**.—**S. muet**. See **DEAF-mute**.

**SOUR LAKE SPRING**, n. Su<sup>5</sup>u<sup>r</sup>. A health resort on Sour Lake, Harding County, Texas. [a. 14.]

**SOUR SPRINGS**, n. Su<sup>5</sup>u<sup>r</sup>. 1. A health resort in Caldwell County, Texas, where there is an acid mineral spring. 2. A summer resort in Erie County, New York, where there are several intensely acid springs. [a. 14.]

**SOUS** (Fr.), prep. Su. Under. For subheadings not here given, see the corresponding forms in *Sub-* and *Infra-*.

**SOUS-ACROMIO-CLAVI-HUMÉRAL** (Fr.), **SOUS-ACROMIO-HUMÉRAL** (Fr.), n's. Suz-a<sup>3</sup>k-rom-e-o-klâ<sup>3</sup>-ve-u<sup>6</sup>m-a-ra<sup>3</sup>l, -o-u<sup>6</sup>m-a-ra<sup>3</sup>l. The deltoid muscle.

**SOUS-TROCHANTINIEN** (Fr.), adj. Su-tro-ka<sup>3</sup>n<sup>2</sup>-te-ne-a<sup>3</sup>n<sup>2</sup>. Situated or passing beneath the lesser trochanter. [L. 41 (a. 14).]

**SOUTHERNWOOD**, n.  $\text{Su}^3\text{th}^2\text{u}^4\text{rn-wu}^4\text{d}$ . See *ARTEMISIA abrotanum*, *ARTEMISIA pontica*, and *ARTEMISIA santonica*.

**SOUTHPORT**, n.  $\text{Su}^3\text{u}^4\text{th-port}$ . A sea-bathing resort in Lancashire, England. [L. 37, 57 (a. 14).]

**SOWBREAD**, n.  $\text{Su}^3\text{u}^4\text{-bre}^2\text{d}$ . See *CYCLAMEN europæum*.

**SOW-THISTLE**, n.  $\text{Su}^3\text{u}^4\text{-thi}^2\text{sl}$ . See *SONCHUS*.

**SOYA** (Lat.), n. f.  $\text{So}^3\text{ya}^2$ . See *SOJA*.

**SOYMIDA** (Lat.), n. f.  $\text{Soim}^3\text{id-a}^2$ . A genus of the *Meliaceæ*. [a. 35.]—*S. febrifuga*. Fr., *amiténie fébrifuge*. Ger., *Rothholzbaum*, *S'baum*. East Indian mahogany, redwood, bastard cedar; a tree growing in central and southern India. The bitter, astringent, somewhat aromatic bark, rohu bark (Lat., *cortex s.* [seu *soymide*, see *swietenia*]), is used as a tonic and antiperiodic. In very large doses it is said to cause vertigo. It contains, besides much tannin, a yellowish-white or nearly colorless, very bitter, resinous substance regarded as the tonic principle. [a. 35.]

**SOZAL**, n.  $\text{So}^3\text{z'l}$ . Aluminium paraphenyldisulphonate; an astringent antiseptic of a slight carboic-acid odor. [Squibb, "Ephemeris," etc., Feb., 1893.]

**SOZINS**, n. pl.  $\text{Soz}^3\text{inz}$ . Defensive proteins that are normally present in an animal and render it proof against a certain disease. [a. 34.]

**SOZODONT**, n.  $\text{Soz}^3\text{o do}^2\text{nt}$ . A proprietary liquid dentifrice said to consist of about 15 parts of Venetian soap and 200 of dilute alcohol, colored with extract of red sandal-wood and perfumed with oil of wintergreen. [B. 270 (a. 38).]

**SOZOIOL**, n.  $\text{So-zo-i}^2\text{o}^2\text{-ol}$ . Ditoloparaphenol sulphonic acid,  $\text{C}_6\text{H}_4\text{SO}_3\text{H}(\text{OH})$ , a brilliant crystalline powder, colorless, odorless, non-poisonous, and not decomposed by light, though containing over 50 per cent. of iodine. It has been used externally as an antiseptic, disinfectant, and antiparasitic, in burns, and in various cutaneous nasal and pharyngeal affections, and internally in diabetes. ["Therap. Gaz.," Jan., 1888, p. 30; "Proc. of the Am. Pharm. Assoc.," xxxvi, p. 502 (a. 50); Squibb, "Ephemeris," etc., Feb., 1893.]—**Mercuric s.** A salt,  $(\text{C}_6\text{H}_4\text{SO}_3)_2\text{Hg}$ , occurring as a fine orange-colored powder soluble with difficulty in water. [B. 270 (a. 38).]—**Potassic s.** A salt,  $\text{C}_6\text{H}_4\text{SO}_3\text{K}$ , occurring as colorless prismatic crystals. [B. 270 (a. 38).]—**Sodic s.** A salt,  $\text{C}_6\text{H}_4\text{SO}_3\text{Na}$ , occurring as colorless prismatic crystals. [B. 270 (a. 38).]—**Zincic s.** A salt,  $(\text{C}_6\text{H}_4\text{SO}_3)_2\text{Zn} + 6\text{H}_2\text{O}$ , occurring as colorless acicular crystals. [B. 270 (a. 38).]

**SOZOIOLATE**, n.  $\text{So-zo-i}^2\text{o}^2\text{-ol-at}$ . A compound of sozoiodolic acid and a base.

**SOZOIOLIC ACID**, n.  $\text{So-zo-i}^2\text{o}^2\text{-ol}^2\text{ic}$ . A substance,  $\text{C}_6\text{H}_4\text{SO}_3\text{H} + 3\text{H}_2\text{O}$ , occurring as large monosymmetric prismatic crystals. [B. 270 (a. 38).]

**SPA** (Ger.), **SPAA** (Ger.), n.s. **Spa**<sup>3</sup>. A place in Liège, Belgium, where there are gaseous springs, containing iron, sodium, and calcium carbonates, and sodium chloride and sulphate. From this place-name any mineral spring is sometimes designated as.

**SPACE**, n. **Spas**. Ger., *Spaa*. Lat., *spatium*. Fr., *espace*. Ger., *Raum*. Continuous extension in the three dimensions of length, breadth, and thickness; in a popular restricted sense, room, empty or vacant s. [a. 48.]—**Air-s.** Fr., *couronne*. Ger., *Luftraum*. Syn.: *air-chamber*. 1. An accumulation of air at the rounded end of an egg, between the middle and internal fibrous envelopes, which penetrates through the shell to replace a certain amount of the watery material of the egg lost by evaporation. [A. 17.] 2. In a plant, see under *LACUNA* (2d def.).—**Anterior perforated s.** Lat., *locus perforatus anterior* (seu *præperforatus*), *substantia perforata*, *lamina cribrosa antica*. Fr., *lame criblée (antérieure)*, *espace perforé antérieur*, *substance perforée antérieure*. Ger., *vordere durchlöchernte Substanz*, *Siebplatte*. A triangular s. on the lower surface of each cerebral hemisphere, bounded anteriorly by the three roots of the olfactory nerve, posteriorly by the optic tract, and externally by the beginning of the Sylvian fissure. It corresponds to the lower portion of the corpus striatum, and is pierced by a number of blood-vessels which enter that body. [L. 2 (K).]—**Arachnoid s.** See *Subarachnoid s.* and *Subdural s.*—**Bioplasson s.** The parts which remain unstained when connective tissue is treated with silver nitrate; considered by von Recklinghausen to be lymph-s's in the basis substance, but supposed by Heitzmann to be either unstained bioplasson or cavities containing it. [J. 26.] See also *CELL-s.* (1st def.).—**Blood-s's (of the placenta)**. See *Intervillous LACUNÆ*.—**Bregmatic s.** See *Anterior FONTANELLE*.—**Cell-s's of connective tissue**. S's, rather larger than the cells of connective tissue, in which the tissue-cells are contained. [C.]—**Circumcellular s.** See *CELL-s.*—**Circumvascular lymph-s's**. Ger., *perivascular Räume*. Tubes surrounding blood-vessels and communicating with true lymphatic vessels. [L.]—**Contractile s.** See *Contractile VACUOLÆ*.—**Douglas's s.** See *Recto-uterine pouch*.—**Epicerebral s.** See *SPACE lymphaticæ epicerebral*.—**Epidural s. of the spinal canal**. Of Waldeyer, a lymph-s. between the periosteum lining the vertebral canal and the spinal dura. [J. 17 (K).]—**Fontana's s.** See *CANAL of Fontana*.—**Haversian s's**. Fr., *espaces haversiens*. Ger., *Havers'sche Räume*. Irregular s's found especially in growing bones. They have jagged outlines, and appear to be the result of the absorption of compact bone. Such a s. may become filled by the development of Haversian systems within it. [J. 24, 33.]—**Interarytenoid s.** See *SPACE interarytenoidien*.—**Intercellular s's**. 1. Minute s's between the intercellular apophyses of prickly cells. They are crossed by the intercellular bridges. [J.] 2. Cavities, minute or large, formed in the tissues of plants either by the unequal growth or splitting of walls separating adjacent cells or by the destruction of intermediate cells. The former mode of development is known as *schizogenus*, the latter as *lysigenus*. They are found chiefly in mature tissues, and may contain air, water, crystals, or milky or resinous secretions, etc. [a. 35.]—**Intercoastal s's**. Fr., *espaces*

*intercostaux*. Ger., *Zwischenrippenräume*, *Intercoasträume*. S's between adjacent ribs. [L.]—**Intercoastal s.** See *Interpeduncular s.*—**Interfascicular s's**. S's in fibrous connective tissue between the bundles of fibres. [L.]—**Interlobular s's**. Of Czermak, apparent irregular s's in the interlobular substance and the granule layer of the dentin. They are filled with a soft mass. [J. 26, 30, 35.]—**Interneural s's**. Fr., *cavités pleuro-péritoneales* (ou *amnio-choriales*), *celomes*. Ger., *Körperhöhlen*. Cavities, one on each side, included between the parietal and the visceral laminae of the lateral mesoblastic plates of the embryo. [A. 5.]—**Intermetatarsal s's**. S's between the metatarsal bones. [L.]—**Interorganic s's**. See *ESPACES interorganiques*.—**Interosseous s.** Ger., *Zwischenknochenraum* (1st def.), *Zwischenwirbelspalte* (2d def.). 1. The s. between two parallel bones. 2. The foramen intervertebrale posterius. [L. 51.]—**Interparietal s.** Of J. Hoffmann, the Virchow-Robin s.—**Interpeduncular s.** Fr., *lac central*, *trigone intercrural*. Ger., *graue Bodencommissur*, *Zwischenschendeldreieck*. A diamond-shaped cavity at the base of the brain, bounded anteriorly by the optic tracts and posteriorly by the crura cerebri. It contains the tuber cinereum, infundibulum, pituitary body, and corpora albicantia. [J. 15 (K).]—**Interplacental s's**. See *Intervillous LACUNÆ*.—**Intervaginal s's of the optic nerve**. See *Subvaginal s.*—**Intertumoral s's**. Of J. Hoffmann, the Virchow-Robin s.—**Investing s.** [Freyl.] See *Lymph SINUS*.—**Ischio-rectal s.** See *Ischio-rectal FOSSA*.—**Lacunar s.** See *LACUNA* (3d def.).—**Large medullary s's**. See *Secondary AREOLÆ*.—**Lateral perforated s.** See *SPACE perforé latéral*.—**Lymph-s.** 1. See *Poiseuille's s.* 2. A cleft or s. in the tissues or in lymphatic glands containing or giving passage to lymph. [J. 55.] Cf. *LYMPH-SINUS*.—**Marrow s.** See *MEDULLARY CAVITY*.—**Maxillo-pharyngeal s.** See *SPACE maxillo-pharyngien*.—**Mediastinal s.** The cavity mediastinum (see under *MEDIASTINUM*). [L.]—**Medullary s's (of ossification)** [Müller]. See *Secondary AREOLÆ*.—**Pelvic s's**. See *Ischio-rectal FOSSA*.—**Perforated s.** Fr., *lamelle perforée*, *lame criblée*. See *Anterior perforated s.*, *Lateral perforated s.*, and *Posterior perforated s.*—**Pericellular s's**. Of Obersteiner, lymph-s's in the brain. The large ganglion-cells of the cortex cerebri are contained in such s's. [J. 17 (K).]—**Perichorioid s.** A lymph-s. between the chorioid and the sclerotic. [L.]—**Perigastric s.** The cavity which surrounds the stomach and other viscera. [B. 28 (a. 27).]—**Perineurial s's**. S's between the lamellæ of the perineurium which communicate with the lymphatics of the perineurium. [L. 332.]—**Perivascular s's**. See *Circumvascular lymph-s's*.—**Perivittelline s.** See *Yolk-s.*—**Placental blood-s's**. See *Intervillous LACUNÆ*.—**Plasmatic s.** See *MER PLASMATIQUE*.—**Pleuro-peritoneal s's**. See *Intermesoblastic s's*.—**Poiseuille's s.** The inert layer or "plasmatic current" seen in a blood-vessel under the microscope, being the peripheral colorless part of the stream in which red blood-corpuscles are absent. [J.]—**Popliteal s.** Ger., *Kniekehle*. A s. on the posterior surface of the knee bounded by the hamstring tendons and the heads of the gastrocnemius. [L.]—**Posterior perforated s.** Lat., *locus perforatus posterior*, *lamina perforata* (seu *cribrosa*) *posterior*. Ger., *hintere durchlöchernte Lamelle*. A small mass of gray matter near the centre of the lower surface of the brain, bounded anteriorly by the corpora albicantia, posteriorly by the pons Varolii, and laterally by the crura cerebri. It is a portion of the floor of the third ventricle, and is pierced by numerous small vessels which supply the optic thalami. [L. 29 (K).]—**Posterior triangular s.** A s. bounded by the posterior border of the sterno-cleido-mastoideus, the upper border of the clavicle, and the anterior border of the trapezius and occiput. [L. 142, 332.]—**Prevesical s.** Lat., *cavum Retzii*. Fr., *cavité de Retzius*, *fosselle vésico-pubienne*. The s. between the transversalis fascia and the posterior surfaces of the recti abdominis below the semicircular line of Douglas. [L. 332.]—**Primary marrow-s's**. See *Primary AREOLÆ*.—**Retroperitoneal s's**. The s. posterior to the peritoneum and in front of the spinal column and the muscles of the lumbar region. [L.]—**Semilunar s.** See *Traube's s's of Fontana*. Cavities between the processes of the ligamentum pectinatum iridis communicating with the anterior chamber of the eye. [L. 31.]—**S's of His**. See *Circumvascular s's—S. of Tenon*. A lymph-s. between the fascia of Tenon and the sclerotic. [L.]—**Subarachnoid (lymph) s.** Lat., *cavum subarachnoideale*. Ger., *subarachnoidealer Raum*. The interval between the arachnoid and the pia. That of the spinal cord and the brain are continuous and communicate with the ventricles of the brain by the foramen of Monro, the circumvascular s's of the brain, and the perineurium. [L. 142, 351.]—**Subdural s.** The s. between the dura and the arachnoid. [L. 15 (K).]—**Subvaginal s.** A lymph-s. within the sheath of the optic nerve. [L.]—**Traube's (semilunar) s.** The area on the thoracic wall overlying the stomach and between the area of precordial dullness and the seventh rib. In it there is normally a tympanic resonance. [L. 191 (a. 20); "Progr. méd.," July 29, 1887, p. 64 (a. 50).]—**Utero-rectal s.** Lat., *cavum utero-rectale*. The pouch of Douglas. [L.]—**Utero-vesical s.** The vesico-uterine fossa. [L.]—**Virchow-Robin s.** Syn.: *intertumoral s.*, *interparietal s.* In cerebral anatomy, an adventitious lymph-s. found between the tunics of the capillaries. [J. Hoffmann, "Am. Jour. of Neurol. and Psych.," Aug., 1883, p. 403.]—**Visual s.** Ger., *Schraum*, *Gesichtsräum*. The s. contained within the visual field. [a. 48.]—**Yolk-s.** The s. left between the vitellus and the zona pellucida by a retraction of the vitellus at that point. Into this s. are expelled the extrusion-globules. [J. 1, 30.]

**SPADICEOUS**, adj.  $\text{Spa}^2\text{d}^2\text{-i}^2\text{shu}^3\text{s}$ . Lat., *spadicus* (from *spadix* [see *SPADIX*]). Fr., *brun-lisant* (1st def.). 1. Of a bright-brown, chestnut-brown. 2. Having the character of or provided with a spadix. The *Spadiceæ* are: Of Scopolia, a genus of the *Orobanchæ*; of Lindley, a division of the *Petalostemæ*. The *Spadiceæ* of Dumortier are an order consisting of the *Typhaceæ*, *Avoideæ*, *Naiadeæ*, *Pandaneæ*, and *Cycaudeæ*. [a. 35.]

**SPADICIFLORÆ** (Lat.), n. f. pl.  $\text{Spa}^2\text{d}^2(\text{spa}^2\text{d}^2)\text{-i}^2\text{s}(\text{ek})\text{-i}^2\text{flor}^2\text{-e}$  (a<sup>2</sup>-e<sup>2</sup>). From *spadix* [see *SPADIX*], and *flor*, a flower. A division of

achlamydeous monocotyledons distinguished by the flowers being borne on a thickened spadix, which is often enveloped in a spathe. In Endlicher's system they include the *Aroidae*, *Typhaceae*, and *Pandaneae*, to which other authors have added the *Cycadaceae* (1st def.) or the *Palmeae*, or both. [B. 34, 170 (a, 35).]

**SPADIX** (Lat.), n. f. Spad(spā'di)z. Gen., -ic'is. Gr., σπάδιξ (from σπᾶν, to draw). Fr., *spadice* (2d def.). Ger., *Kolben* (2d def.). 1. A branch broken off, especially a palm branch. [A. 311 (a, 48).] 2. A thick, fleshy rhachis bearing closely packed sessile flowers; usually enveloped in a spathe. [a. 35.] 3. See *HECTOCOTYLUS*.

**SPADO** (Lat.), n. f. Spad(spā'do)-o. Gen., *spad'onos* (-is). Gr., σπαδών (from σπᾶν, to draw). A spasm. [L. 50 (a, 14).]—S. *hippocratica*. See *PNEUMONOCOSIOS*.

**SPADO** (Lat.), **SPADON** (Lat.), n's m. Spad(spā'do)-o, -o'n(on). Gen., -on'is. Gr., σπαδών. A eunuch. [L. 50 (a, 14).]

**SPAGIRIA** (Lat.), n. f. Spā'j(spā'g)-i-ā(er)'i-ā. From σπᾶν, to draw out, and ἀγείρειν, to bring together. Fr., *spagyrie*. Ger., *Spagirie*. Of Paracelsus, chemistry, alchemy. [A. 325 (a, 48).]

**SPALATO, SPALATRO**, n's. A place in Dalmatia, Austria, where there is a saline and sulphurous spring. [L. 30, 37, 49 (a, 14).]

**SPALT** (Ger.), n. Spā'lt. See *SPALTE*.—S'bildung. See *FISURATION*.

**SPALTE** (Ger.), n. Spā'lt'e. See *FISURE*.—**Augenhöhle's**. See *Palpebral fissure* and *Ocular cleft*.—**Bauch's**. See *Fissura abdominalis*.—**Furchung's**. A segmentation cavity or furrow between the segmentation spheres. [L.]—**Gaumens**. 1. The palatine cleft of the embryo. 2. See *Cleft palate*.—**Gefäss's des Halses**. See *Carotid sheath*.—**Gegen's**. See *CONTRAFISSURA*.—**Gesäss's**. See *Cleft of the nates*.—**Gewebs's**. See *AREOLA* (2d def.).—**Gezähnte S.** See *Hippocampal fissure*.—**Grosse Längs's**. See *Great longitudinal fissure of the brain*.—**Grosshirs's**. See *Fissure of Sylvius*.—**Haut's n.** See *RHAGADES*.—**Hemisphären's**. See *Great longitudinal fissure of the brain*.—**Hilfs's**. See *Accessory cleft*.—**Hinterhaup't's**. See *Occipital fissure*.—**Hinters's**. See *Fissura posterior*.—**Hirns's**. See the major list.—**Keilbeinkiefer's**. See *Spheno-maxillary fissure*.—**Keilbeins's**. See *Sphenoidal fissure*.—**Kiefergaumens's**. See *Maxillary fissure*.—**Kiemens's n.** The branchial or visceral clefts of the embryo.—**Kopfs's**. See *Cephalic fissure*.—**Längens's**. See *Fissure of the liver*.—**Lymp'h's**. See *Lymph-space*.—**Mantels's des Grosshirs's**. See *Great longitudinal fissure of the brain*.—**Mastdarms's**. See *Fissure of the anus*.—**Mittels's**. See the major list.—**Munds's**. 1. The oral cleft of the embryo. 2. The line of union of the lips when closed.—**Obers's**. See *Fissura posterior*.—**Peritonäals's**. See *Peritoneal fissure*.—**Quere Gehirns's**. See *Transverse fissure of the brain*.—**Rachens's**. See *Isthmus faucium*.—**Rands's**. See *Transverse fissure of the brain*.—**Retro-visceral's S. des Halses**. A space between the layers of deep cervical fascia posterior to the oesophagus. [L. 332.]—**Riech's**. See *Olfactory fissure*.—**Roland'sche S.** See *Central fissure*.—**Rückenmark's's**. A fissure of the spinal cord. [L.]—**Rückens's**. See *SPINA bifida*.—**Schädel's**. See *Fissure of the cranium*.—**Schams's**. See *Cleft of the vulva*.—**Schlunds's n.** See *Visceral clefts*.—**Sehs's**. See *Palpebral commissure*.—**Subquadrigeminal's S.** A space in the layers of the superficial cervical fascia in the lower part of the neck. [L. 332.]—**Suprasternal's S.** See *SPATIUM inter-aponeuroticum suprasternale*.—**Untere Stirns's**. See *Subfrontal fissure*.—**Unters's**. See *Basivivular fissure*.—**Vorders's**. See *Anterior fissure*.—**Zwischenwirbels's**. See *FORAMEN intervertebrale posterius*.

**SPALTFRUCHT** (Ger.), n. Spā'lt'frucht. A schizocarp.

**SPALTHEFE** (Ger.), n. pl. Spā'lt'haf-e. Schizomycetes that cause fermentation. [A. 396 (a, 21).]

**SPALTÖFFNUNG** (Ger.), n. Spā'lt'uf-nun. See *PORE*.

**SPALTPILZE** (Ger.), n. pl. Spā'lt-piltz-e. See *SCHIZOMYCETES*.

**SPALTUNG** (Ger.), n. Spā'lt'un. See *FISURATION*, *FISURE*, and *HIATUS*.—**Gabel's**. See *DICHOTOMY*.—**Keims's**. See *Germ-segmentation* and *Nuclear division*.—**S'stücke**. A lacuna formed by a separation of layers.

**SPAMENORRHEA** (Lat.), n. f. Spā'(spā)-me'n(man)-o-rē'(ro'ē)-ā. From σπάς, scarcity, μῆν, a month, and ροία, a flowing. Scanty menstruation. [W. R. D. Blackwood, "Therap. Gaz.," Nov., 1882, p. 403.]

**SPAN** (Ger.), n. Spā'n. See *SPLINT*.

**SPANEMIA** (Lat.), n. f. Spā'n(spā'n)-em'(a'ē'm)-i-ā. From σπάς, scarcity, and αἷμα, blood. Fr., *spanémie*. Ger., *Spanämie*. See *OLIGOCYTHÆMIA*.

**SPANDUS** (Lat.), adj. Spā'nd(spā'nd)'u's(u's). Fr., *festonné*. Provided with marginal incisions somewhat deeper than in repand organs. [B. 1 (a, 35).]

**SPANGRÜN** (Ger.), n. Spā'gru'n. See *GRÜNSPAN*.

**SPANIOLITMINE**, n. Spā'iol-i't'men. A bright-red non-nitrogenous constituent of litmus. [B. 93 (a, 14).]

**SPANISCHFLIEGE** (Ger.), n. Spā'n'i'sh-flieg-e. See *CANTHARIS vesicatoria*. For S'nöl, etc., see the corresponding Latin forms *Oleum cantharidis*, etc., under *CANTHARIS*.

**SPANNADER** (Ger.), n. Spā'n'a'd-e'r. A nerve or tendon.

**SPANNER** (Ger.), n. Spā'n'ne'r. See *Tensor*.—**Aderhaut's**. See *Ciliary muscle*.—**Gaumens's**. See *ABDUCTOR of the Eustachian tube*.—**Handflechsens's**. See *PALMARIS brevis*.—**Handsehnens's**. See *PALMARIS longus*.—**Kapsels's**. See *GRACILIS anterior*.—**Kniegelenks's**. See *SUBCRURALIS*.—**Kurzer Handflechsens's**. See *PALMARIS brevis*.—**Paukenfells's**. See *Tensor tympani*.—**Schenkelbindens's**. See *Tensor vaginæ femoris*.—S.

des Kapselbandes. See *SCAPULO-HUMERALIS parvus*.—S. des weichen Gaumens. See *ABDUCTOR of the Eustachian tube*.

**SPANNKRAFT** (Ger.), n. Spā'n'kra'ft. Elasticity, tonic power. [A. 521.]—**Krankhafte S.** See *DYSTONIA*.

**SPANNMITTEL** (Ger.), n. Spā'n'mit'tel. See *Tonic*, n.

**SPANNUNG** (Ger.), n. Spā'n'un. 1. Tone, tonicity. 2. Strain, tension. [a. 17.]—S'stirreseln. See *CATATONIA*.—S'skraft. See *TONICITY*.—S'senergie. Energy in tension, potential energy. [B.]

**SPANOPOGON** (Lat.), n. m. Span(spā'n)-o(o)-pog'o'n(on). Gen., -on'os (-is). Gr., σπανοπόγων (from σπάς, scarcity, and πώγων, the beard). A man who has little or no beard. [L. 50 (a, 14).]

**SPAR**, n. Spā'r. Gr., γύψος. Lat., *gypsum*. Fr., *spath*. Ger., *Spath*. Any lustrous, lamellar mineral having distinct cleavage. [a. 17.]—**Bitter s.** See *DOLOMIA*.—**Calc-s.** See the major list.—**Fluor-s.** See *FLUOR-s*.—**Heavy s.** See *Barium sulphate*.—**Iceland s.** A transparent kind of calc-s. [a. 48.]—**Satin-s.** 1. A fibrous, satiny variety of calcium carbonate. 2. Fibrous gypsum. [B. 7.]

**SPARADRAP** (Lat.), n. n. Spā'r(spā'r)-a-ā-dra'p(dra'p). Fr., s. Ger., S. A plaster, especially one used for uniting wounds. [E.] In the pl., s's, of the Fr. Cod., see *EMPLASTRA extensa*.—S. *ceratum*. See *S. de CIRE*.—S. *commun* (Fr.). A s. made of 2 parts of turpentine, 8 of olive-oil, and 16 of yellow wax; or of 3 each of turpentine and lard, 4 of mutton suet, and 12 of yellow wax; or of 9 of turpentine, 24 of stag's suet, 36 of white wax, and enough oil of rose. [B. 119 (a, 38).]—S. *d'emplâtres* (Fr.). A s. consisting of 3 parts each of simple plaster, plaster of yellow wax, turpentine plaster, and galbanum plaster, and 5 of spermaceti. [B. 119 (a, 38).]—S. *diapalma*, S. *diapalme* (Fr. Cod.) (Fr.). See *S. DIAPALME*.—S. *mercuriel* (Fr. Cod.) (Fr.). Lat., s. cum *hydrargyro*. Emplastrum hydrargyri (2d def.) spread upon linen, with the aid of a little olive-oil if necessary. [B. 95 (a, 38).]—S. *rouge* (Fr.). A s. consisting of 12 parts of yellow wax, 4 of stag's suet, 3 each of terebinthina cocta and oil of white lilies, and 8 of minium. [B. 119 (a, 38).]—S. *simplex*. See *EMPLASTRUM adhaesivum luteo extensum*.—S. *vesicans*. Fr., s. *vésicant*. A preparation made by melting cantharides plaster over the water-bath and spreading upon oiled silk [Belg. Ph.]; by melting together 25 parts each of yellow wax, colophony, and black pitch, straining, cooling a little, adding 2 parts of olive-oil, 4 each of glycerin and larch turpentine, and 40 of cantharides in medium fine powder, heating for half an hour over the water-bath, and spreading on oiled silk [Fr. Cod.]; or by melting together 15 parts of yellow wax, 45 of rosin, 5 of linseed-oil, and 35 of cantharides (powdered and sifted through a 300-mesh sieve), and spreading upon oiled silk so that 250 square centimetres receive 20 grammes of plaster [Swed. Ph.]. [B. 95 (a, 38).]

**SPARADRAPUM** (Lat.), n. n. Spā'r(spā'r)-a-ā-d(a'd)/ra'p-(ra'p)-u'm(u'm). See *SPARADRAP*.—S. *adhaesivum*. See *Court PLASTER*.—S. *album*. See *SPARADRAP DIAPALME*.—S. *antarthriticum*. See *CHARTA resinosa* (1st def.).—S. *ceratum*. See *SPARADRAP de CIRE*.—S. *commun* (Belg. Ph.). A preparation made by melting together 88 parts of litharge plaster and 12 of larch turpentine and spreading upon strips of cloth. [B. 95 (a, 38).] Cf. *SPARADRAP commun*.

**SPARADRAPUS** (Lat.), n. m. Spā'r(spā'r)-a-ā-d(a'd)/ra'p-(ra'p)-u's(u's). See *SPARADRAP*.—S. *pallidus*. A preparation made by melting together 600 parts of epliotic plaster and 172 of yellow wax and spreading upon strips of linen. [B. 119 (a, 38).]

**SPARGMA** (Lat.), n. n. Spā'r(spā'r)-a-ā-g(a'g)/ma'. Gen., -ag'matos (-atis). Gr., σπάγμα (from σπαράσσειν, to tear). See *LACERATION* (2d def.).

**SPARGMATODES** (Lat.), adj. Spā'r(spā'r)-a-ā-g(a'g)/ma't-(ma't)-o'd(ez)as. Gr., σπαγματώδης (from σπάγμα, a piece torn off, and εἶδος, resemblance). Fr., *spargmateux*. Of Hippocrates, affected with repeated violent convulsions or cramps. [L. 50 (a, 14).]

**SPARGMOS** (Lat.), **SPARGMUS** (Lat.), n's m. Spā'r(spā'r)-a-ā-g(a'g)/mo's, -mu's(mu's). Gr., σπαγμαός (from σπαράσσειν, to tear). Fr., *spargme*. 1. Of Hippocrates, a violent cramp. 2. Of Cælius Aurelianus, an intense choking sensation. [L. 50 (a, 14).]

**SPARALLIUM** (Lat.), n. n. Spā'r(spā'r)-a-ā-l(a'l)/li-ū'm(u'm). Of Paracelsus, a uterine injection. [A. 325 (a, 48).]

**SPARATOSPERMA** (Lat.), n. f. Spā'r(spā'r)-a-ā-t(a't)/to-(to)-spu'rm(spe'rm)-ā. A genus of the *Bignoniaceae*, tribe *Tecomeae*. [a. 35.]—S. *leucantha*, S. *lithontripica*. A Brazilian tree. The leaves are powerfully diuretic, and are used in diseases of the liver and spleen. It contains bignoin. [a. 35.]

**SPARGANION** (Lat.), n. n. Spā'rg-a'n(a'n)'i-ā(-o)n. Gr., σπαργάνιον (dim. of σπαργάνον, a water-plant). Fr., *bande de maillot*. 1. A bandage for a broken limb. 2. A swaddling-band for children. [L. 50 (a, 14).]

**SPARGANIUM** (Lat.), n. Spā'rg-a'n(a'n)'i-ū'm(u'm). Fr., *ruban d'eau*, *sparganier*. Ger., *Igelkolbe*, *Igelknospe*. Bur-reed; a genus of aquatic herbs of the *Typhaceae*. The *Sparganieae* (of Dumortier, a tribe of the *Typhaceae*) and the *Sparganioideae* (of Link, a suborder of the *Cyperoideae*) consist of the single genus S. [a. 35.]—S. *natans*. Fr., *hérisson d'eau*, *ruban d'eau nageant*. Floating bur-reed; a species having the properties of S. *ramosum*. [a. 35.]—S. *ramosum*. Fr., *ruban d'eau rameux*, *clou de Dieu*, *rubaneau*, *rubanier*. Ger., *ästige Igelkolbe*, *Degenknopf*. Bede (or knop-) sedge, bur-flag, common bur-reed; a species growing in pools and ditches and, with S. *simplex*, known to the ancient Greeks as *σπαργάνιον*. The leaves of both species are said to be astringent, and their root, *radix sparganii*, was formerly used for snake-bites. [a. 35.]—S. *simplex*. Ger., *einfache Igelkolbe*. Unbranched bur-reed; a species having the same habitat and properties as S. *ramosum*. [a. 35.]

**SPARGEL** (Ger.), n. Spa<sup>3</sup>rg-e<sup>2</sup>l. See ASPARAGUS (2d def.).—**Fichtens**. See HYPOPHYTIS and MONOTROPA *hypophytis*.—**S'siure**. See ASPARTIC ACID.—**S'toff**. See ASPARAGINE.

**SPARGOSIS** [Wilson] (Lat.), n. f. Spa<sup>3</sup>rg-os'i<sup>2</sup>a. Gen. -os'eos (-is). Gr. *σπάργωσις* (from *σπάρω*, to swell). Fr. *spargose* (2d def.). 1. Elephantiasis. 2. Congestion of milk in the breasts. 3. Metastasis of the milk. [L. 50 (a, 14).]—**S. fibro-areolaris**. See ELEPHANTIASIS ARABUM.

**SPARK**, n. Spa<sup>3</sup>rk. Gr. *σπινθήρ*. Lat. *scintilla*. Fr. *étincelle*. Ger. *Funke*. A luminous particle of burning matter. [a, 48.]

**SPARKED**, adj. Spa<sup>3</sup>rkd. Having been subjected to the passage of electric sparks (said of serum, etc., used in experiments on their power to kill pathogenic organisms). [E. H. Hankin, "Brit. Med. Jour.," Oct. 1, 1892, p. 728.]

**SPARKLING CATAWBA SPRINGS**, n. Spa<sup>3</sup>rk'i<sup>2</sup>n<sup>2</sup> ka<sup>2</sup>-a<sup>2</sup>b'a<sup>2</sup>. Mineral springs at Catawba Springs, Catawba County, North Carolina. [A, 363 (a, 21).]

**SPARMANNIA** (Lat.), n. f. Spa<sup>3</sup>rk-ma<sup>3</sup>n'i<sup>2</sup>a<sup>2</sup>. From *Sparmann*, a Swedish naturalist. Fr. *sparmannie*. A genus of the *Sparmanniaceae*, which are a subdivision of the *Tiliaceae*. [a, 35].—**S. africana**. African hemp; a mucilaginous shrub indigenous to the Cape of Good Hope and found in the West Indies. The leaves and flowers are emollient, pectoral, and antispasmodic. [a, 35.]

**SPARSE**, adj. Spa<sup>3</sup>rs. Lat. *sparsus*. Fr. *épars*, *éparpillé*. Ger. *zerstreut*. Scattered; distributed without apparent order or regularity. [a, 35.]

**SPARTEINE**, n. Spa<sup>3</sup>rt'e<sup>2</sup>-en. Lat. *sparteina*, *sparteinum*. Fr. *sparteine*. Ger. *Sparteïn*. A poisonous alkaloid, C<sub>15</sub>H<sub>25</sub>N<sub>3</sub>, obtained from *Spartium scoparium*, and occurring as a thick oil of very bitter taste, boiling at 287° C. It acts as a stimulant to the heart. [B, 270 (a, 38).]—**S. sulphate**. A substance, C<sub>15</sub>H<sub>25</sub>N<sub>3</sub>H<sub>2</sub>SO<sub>4</sub>, occurring as colorless acicular crystals easily soluble in water. It acts like *s*, especially in cardiac affections. [B, 270 (a, 38).]

**SPARTIANTHUS** (Lat.), n. m. Spa<sup>3</sup>rt-i<sup>2</sup>-a<sup>2</sup>nth(a<sup>2</sup>nth'u<sup>2</sup>s'u<sup>2</sup>s). See SPARTIUM (3d def.).

**SPARTIUM** (Lat.), n. n. Spa<sup>3</sup>rt'shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). Gr. *σπάριον* (1st def.). Fr. *spartier*. Ger. *Besenginster* (3d def.), *Pfriemen* (2d def.). 1. Of Dioscorides, the *S. junceum*. 2. Of Linnaeus, a genus of the *Leguminosae* including species referred to a section (*Sarothamnus*) of the genus *Cytisus*. 3. Of Bentham and Hooker, a genus of the *Leguminosae* consisting of a single species referred by Baillon to the genus *Genista*; the genus *Spartianthus* of Link. The *Spartieae* of Bentham and Hooker are a subtribe of the *Genisteae*. [a, 35].—**S. junceum**. Fr. *spartier jonciforme*, *genêt* (ou *jone*) d'Espagne. Ger. *binsenartiger Besenginster*, *spanischer Ginster*, *spanische Geniste*. Rush- (or Spanish) broom, the *σπάριον* of Dioscorides; a shrub of the Canary Islands and the Mediterranean regions, introduced into the New World. All parts, especially the seeds (which are recommended in dropsy), are tonic, diuretic, emetic, and purgative. The herbaceous tops and the seeds were formerly official as *herba et semen geniste hispanica* (seu *geniste juncea*). [a, 35].—**S. scoparium**. Fr. *genêt commun* (ou *à balais*). Ger. *gemeiner Pfriemen*, *Besenkraut*, *Hasenhaide*, *Rehhaide*, *grosser Ginster*, *Haideschmuck*, *Künnchotten*. Common broom; a bitter, woody shrub, growing chiefly in western, northern, and central Europe. The young tops of the branches, the flowers, and the seeds, *herba, flores* (seu *cacumina*), et *semen spartii* (seu *scopariae*, seu *geniste*) have been used. The tops, the *scoparius* of the U. S. Ph., which contain scoparin and sparteine, are used as a diuretic, etc., and the flowers, infused in milk, as a lotion in skin diseases. The flower-buds, preserved in vinegar, are eaten like capers, and the seeds, roasted, are used for coffee. [a, 35.]

**SPASM**, n. Spa<sup>3</sup>zm. Gr. *σπασμός*, *σπάσμα* (from *σπᾶν*, to draw). Lat. *spasmus*. Fr. *spasme*. Ger. *Spasma*, *Krampf*. 1. An involuntary and abnormal contraction of one or more muscles or muscular fibres. 2. A convulsion. [D, 20.]—**Bell's s**. Convulsive tic of the face. ["Un. méd. et sci. du Nord-Est," "Province méd.," Oct. 6, 1888, p. 57.]—**Bronchial s**. See ASTHMA.—**Carpopedal s**. Spastic contractions of the hands and feet. [D, 40.]—**Choreiform s**. Spasmodic movements simulating chorea. [D, 35.]—**Clonic s**. Lat. *spasmus clonicus*. A s. in which the muscles or muscular fibres contract and relax alternately in very quick succession. [D, 30.]—**Cynic s**. See *RISUS sardonius*, *Convulsive tic*, and *Spasmus cynicus*.—**Facial s**. Ger. *Gesichtskrampf*. Involuntary contraction of the muscles supplied by one or other of the seventh pair of nerves. [D, 35.]—**Convulsive tic**.—**Functional s**. 1. Of H. W. Mitchell, see *Professional hypercinesia*. 2. Of Duchenne, the spastic form of writers' cramp. [D, 72.]—**Habit s**. Of Gowers, a proterable term for what is called habit chorea. [a, 34.]—**Histrionic s**. See *RISUS sardonius* and *RISUS sardonius*.—**Inspiratory s**. A spasmodic rhythmic contraction of all or nearly all the inspiratory muscles. There is a succession of deep inspirations, with ordinary expirations. The inspirations are noisy and often accompanied by eruptions of gas and by hicough, and the abdomen is usually tympanitic. [D, 35.]—**Lingual s**. See APHTHONIA.—**Masticatory s**. See TRISMUS.—**Mimic s**. See *Facial s*.—**Mobile s**. Of Gowers, slow irregular movements, chiefly conspicuous in the hands, consequent upon hemiplegia. [a, 34.]—**Neural s**. See *Peripheral s*.—**Nictitant s. See SPASMUS NICTANS.—**Nodding s**. Lat. *spasmus nutans*. S. of the muscles innervated by the spinal accessory nerve, causing a nodding of the head. It may be a habit s. or an epileptic or hysterical phenomenon. [a, 40.]—**Chorea nutans**.—**Phonetic s**. of the glottis. A variety of s. of the phonetic apparatus with elevation of the larynx and complete prevention of respiration. According to Seikorski, probably the same as spastic aphonia. ["Wien klin. Wochenschr.," Jan. 7, 1892, p. 17 (a, 50).]—**Salam s**. See *Salam convulsions*.—**Salutatoric s**.—**Salutatory s**. A clonic s. in the flexors and extensors of the legs on attempting to stand, causing jumping movements. [Gowers (a, 34).]—**S. of accommodation**. Over-action of the apparatus of**

accommodation of the eye.—**S. of the eyelids**. See BLEPHAROSPASM.—**S. of the glottis**. Ger. *Glottiskrampf*, *Kehlkopfkrampf*. Syn.: *thymic asthma*. A spasmodic adduction of the vocal bands, producing a narrowing of the glottis during inspiration. It is caused by a peripheral irritation of the laryngeal, pulmonary, or gastric filaments of the pneumogastric nerve or by reflex action affecting that nerve. [a, 34.] Cf. *Infantile LARYNGISMUS* and *LARYNGISMUS stridulus*.—**S. with rigidity**. See TETANUS.—**Tonic s**. Lat. *spasmus tonicus*. A s. in which the muscles or muscular fibres contract in a steady and uniform manner and remain contracted for a comparatively long time. [D, 20.]—**Winking s**. See SPASMUS NICTANS.—**Writers' s**. See *Writers' CRAMP*.

**SPASMATIC**, **SPASMODIC**, **SPASMODICAL**, adj's. Spa<sup>3</sup>z-ma<sup>3</sup>t'i<sup>2</sup>k, -mo<sup>2</sup>d'i<sup>2</sup>k, -i<sup>2</sup>k'l. Gr. *σπασμωδής* (from *σπασμός*, a spasm, and *αἰδώς*, resemblance). Lat. *spasmaticus*, *spasmodicus*, *spasmodicus*. Fr. *spasmatique*, *spasmodique*. Ger. *spasmatisch*, *spasmodisch*, *krampfartig*. Pertaining to or of the nature of a spasm; convulsive. [D.]

**SPASMODISME** (Fr.), n. Spa<sup>3</sup>s-mo-des-m'. Of Fleury, a generic term for those nervous states that originate in medullary excitation. ["Union méd.," June 10, 1886, p. 957 (a, 34).]

**SPASMODYSPNEA** (Lat.), n. f. Spa<sup>3</sup>z(sp<sup>3</sup>s)-mo(mo<sup>3</sup>)-di<sup>2</sup>s-(du<sup>2</sup>s)-pae'(pno<sup>2</sup>e<sup>2</sup>)-a<sup>2</sup>. From *σπασμός*, a spasm, and *δύσπνοια*, dyspnea. Fr. *spasmodyspnée*. See *Spasmodic DYSPNEA*.

**SPASMOLIPOPYRIA** (Lat.), n. f. Spa<sup>3</sup>z(sp<sup>3</sup>s)-mo(mo<sup>3</sup>)-li<sup>2</sup>p-o(o<sup>2</sup>)-pi<sup>2</sup>r(pu<sup>2</sup>r'i<sup>2</sup>-a<sup>2</sup>). From *σπασμός*, a spasm, *λείπειν*, to leave, and *πύρ*, fever. Fr. *spasmolipopyrie*. A supposed variety of yellow fever in which the occurrence of convulsions causes death before the febrile symptoms can become manifest. [a, 34.]

**SPASMOLOGY**, n. Spa<sup>3</sup>z-mo<sup>2</sup>'o-ji<sup>2</sup>. From *σπασμός*, a spasm, and *λόγος*, understanding. Fr. *spasmiologie*. The pathology of spasms. [L. 50 (a, 14).]

**SPASMOLOGYMUS** (Lat.), n. m. Spa<sup>3</sup>z(sp<sup>3</sup>s)-mo(mo<sup>3</sup>)-li<sup>2</sup>g-(lu<sup>2</sup>g)'mu<sup>2</sup>s(mu<sup>2</sup>s). From *σπασμός*, a spasm, and *λύγμος*, a sobbing, dyspnea. Fr. *spasmodic hicough*. [L. 50 (a, 14).]

**SPASMOPHILIA** (Lat.), n. f. Spas(sp<sup>3</sup>s)-mo(mo<sup>3</sup>)-fi<sup>2</sup>l'i<sup>2</sup>-a<sup>2</sup>. From *σπασμός*, a spasm, and *φιλεῖν*, to love. Ger. *Spasmophilie*. Of Seeligmüller, nervous over-excitability with a tendency to convulsions. ["Deutsch. med. Woch.," 1887, xlii (a, 34).]

**SPASMORTHOPNEA** (Lat.), n. f. Spa<sup>3</sup>z(sp<sup>3</sup>s)-mo<sup>2</sup>rth-o<sup>2</sup>p-ne'(no<sup>2</sup>e<sup>2</sup>)-a<sup>2</sup>. From *σπασμός*, a spasm, and *ὀρθόπνοια*, orthopnea. Fr. *spasmorthopnée*. Spasmodic orthopnea.

**SPASMOTOXINE**, n. Spa<sup>3</sup>z-mo<sup>2</sup>'to<sup>2</sup>x'en. From *σπασμός*, a convulsion, and *τοξικόν*, poison. A poisonous alkaloid of uncertain composition, found by Brieger in cultures made to isolate the toxic principle of tetanus. [B.]

**SPASMOTRACHEOCYANANCHE** (Lat.), n. f. Spa<sup>3</sup>z(sp<sup>3</sup>s)-mo(mo<sup>3</sup>)-trak(trach'e<sup>2</sup>)-ea'(o<sup>2</sup>o<sup>2</sup>)-si<sup>2</sup>n(ku<sup>2</sup>n)-a<sup>2</sup>n'k(a<sup>2</sup>n'ch'e<sup>2</sup>)(ea). Gen. -anch'es. From *σπασμός*, a spasm, *τραχὺς*, rough, and *κυανήκη*, cyanache. Fr. *spasmotracheocyananche*. See *ASTHMA acutum* et *chronicum* Milleri.

**SPASMUS** (Lat.), n. m. Spa<sup>3</sup>z(sp<sup>3</sup>s)'mu<sup>2</sup>s(mu<sup>2</sup>s). See SPASM.—**S. agitated**. Of Jacobsohn, see *PARALYSIS agitata*.—**S. cynicus**. A spasmodic contraction of the muscles on both sides of the mouth, giving an expression as of a grinning dog. [B, 117.]—**S. fixus** Paracelsi. Rheumatism in the lower extremity of the sacrum. [L.]—**S. maxillae inferioris**. See TRISMUS.—**S. muscularis**, *S. musculorum*. See CRAMP (1st def.).—**S. nictans**. Spasmodic winking or blinking of the eyelids, of the same nature as clonic spasm of the orbicularis palpebrarum muscles. [F.]—**S. nutans**. See *Nodding SPASM* and *Jacksonian EPILEPSY*.—**S. oculi**. See NYSTAGMUS (3d def.).—**S. periphericus**. See CUTIS anserina.—**S. ventriculi**. See CARDIALGIA.

**SPASTIC**, adj. Spa<sup>3</sup>st'i<sup>2</sup>k. Gr. *σπαστικός* (from *σπᾶν*, to draw). Lat. *spasticus*. Fr. *spastique*. Ger. *spastisch*. 1. Spasmodic. 2. Dependent on spasm (see S. ALBUMINURIA).

**SPÄTBLUTUNG** (Ger.), n. Spa<sup>3</sup>t'blut-un<sup>2</sup>. Secondary hæmorrhage.—**Puerperale s**. See *Secondary post-partum HÆMORRHAGE*.

**SPATEL** (Ger.), n. Spa<sup>3</sup>t'e<sup>2</sup>l. See SPATULA.—**Furchens**. A grooved spatula. [A, 521.]—**S'unterschieden**. See HYPOSPATHISMUS.—**Zungens**. See TONGUE-DEPRESSOR.

**SPÄTBURT** (Ger.), n. Spa<sup>3</sup>t'ge<sup>2</sup>-burt. See *Prolonged gestation* and *PARTUS serotinus*.

**SPATH** (Fr.), n. Spa<sup>3</sup>t. See SPAR.—**S. calcaire**. See CALCIUM carbonate.—**S. d'Islande**. See ICELAND SPAR.—**S. pesant**. See BARIUM sulphate.—**S. sédatif**. See MAGNESIUM borate.

**SPATH** (Ger.), n. Spa<sup>3</sup>t. See SPAR and SPAVIN.—**Fluors**, **Fluorsk**. See FLUOR-spar.—**Knochen**. See BONE SPAVIN.—**S'siure**. See FLUORIC ACID.

**SPATHE**, n. Spa<sup>3</sup>th. Gr. *σπάθη*. Lat. *spatha*. Fr. *s*. Ger. *Blüthenscheide*. A sheath-like leaf subtending or enveloping a flower-cluster. [a, 35.]

**SPATHELLA** (Lat.), **SPATHELLULA** (Lat.), n's f. Spa<sup>3</sup>th-(spa<sup>3</sup>th-e<sup>2</sup>)'la<sup>2</sup>, -e<sup>2</sup>l'u<sup>2</sup>l'u<sup>2</sup>la<sup>2</sup>-a<sup>2</sup>. Dim. of *spatha*, a blade. Fr. *spathelle*. Ger. *Scheidchen*. See GLUME.

**SPATHESTER** (Lat.), n. m. Spa<sup>3</sup>t(hspa<sup>3</sup>th)-e<sup>2</sup>st'u<sup>2</sup>r(ar). Gen. -er'is. From *σπᾶν*, to draw. An instrument for drawing the prepuce down over the glans penis. [L. 50 (E).]

**SPATHILLA** (Lat.), n. f. Spa<sup>3</sup>th(sp<sup>3</sup>th)-i<sup>2</sup>'la<sup>2</sup>. Dim. of *spatha*, a blade. Fr. *spathille*. A secondary spathe. [a, 35.]

**SPATHIUM** (Lat.), n. n. Spath(sp<sup>3</sup>th)-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *spatha*, a blade. 1. See APOCYNOS. 2. The genus *Saururus*. [a, 35].—**S. chinense**. An East Indian perennial aquatic species with edible roots. [a, 35.]

**SPATHOMELE** (Lat.), n. f. Spath(sp<sup>3</sup>th)-o(o<sup>2</sup>) me(ma<sup>2</sup>)'le(a). Gen. -me'les. From *σπάθη*, a blade, and *μελέη*, a probe. Fr. *spathomèle*. A spatula like probe. [A, 325 (a, 48).]

**SPATHUM** (Lat.), n. n. Spath(spa'th)/u'm(u'm). See SPAR.  
**SPATILE** (Lat.), n. f. Spa'te(spa'te)-ll(el)/e(a). Gen., -il/ea. Gr., σπατίλη. Liquid faeces. [L. 50 (a, 43).]

**SPATIUM** (Lat.), n. n. Spa(spa't)/shi'ti't(u'm(u'm). See SPACE.  
—**S. interaponeuroticum supraternale**. Ger., *supraternale Spalte*. A space above the sternum between the sterno-cleido-mastoids and between the superficial and the deep layers of the deep cervical fascia. [L. 352.] —**S. interarytenoideum**. A space in the ventricle of the larynx between the inner surfaces of the bases of the arytenoid cartilages. [L. 31.] —**S. intercostale**. See *Intercostal space*. —**S. intervalvulare**. Of Henle, a triangular space on the outer surface of the aorta between the sinuses of Val-salva. [L. 31.] —**S. oris**. See *Buccal cavity*. —**S. trigonum**. See *Interpeduncular space*.

**SPATULA** (Lat.), n. f. Spa'tt(spa'tt)/u'l(u'l)/a<sup>2</sup>. Dim. of *spatha*, a blade. Fr., *spatule*. Ger., *Spatel*. A blunt-edged knife-like implement having a thin blade rounded at the distal end and of equal thickness throughout; used in mixing ointments, spreading plasters, etc. —**Tongue s.** See *Tongue-depressor*.

**SPATULATE**, adj. Spa'tu'l-a'te. From *spatula*, a spatula. Fr., *spatulé*. Ger., *spatelig, spatelförmig*. Resembling a spatula; in outline, oblong with the lower end attenuated. [a. 35.]

**SPATULE-LEVIER** (Fr.), n. Spa'tu'l-le'v-a. An instrument invented by A. Petit, resembling a spatula and a vectis, for introduction into the rectum for the purpose of making pressure on the body of a retroverted uterus. [A. 59.]

**SPAUL**, n. Of the alchemists, blood. [A. 325.]

**SPAVIN**, n. Spa'v-i'n. Fr., *éparvin, capelet*. Ger., *Spath. Stollbeule*. A disease of the hock-joint of the horse. [L.] —**Blood s.** A distended condition of the veins in the vicinity of the hock. [L.; a. 34.] —**Bog-s.** A tense fluctuating swelling of the hock-joint, accompanied by heat and pain; also hydrarthrosis of that joint. [Williams (a. 34).] —**Bone s.** Fr., *jarde, jardou*. Ger., *Rehbein, Knochenpath*. An exostosis involving the internal face of all the bones of the hock. [a. 34.] —**External s.** A s. formed on the outside of the hock. [a. 34.] —**High s.** An enlargement on the upper part of the hock or a little below the inner side of the lower extremity of the shank bone. [a. 34.] —**Outside s.** See *External s.*

**SPAWN**, n. Spa'n. From *expandere*, to spread abroad. Fr., *frai*. Ger., *Leich*. 1. A mass of extruded ova of an aquatic animal enveloped in a gelatinous material. [A. 385.] 2. See MYCELIUM.

**SPAYING**, n. Spa'i'ng. See CASTRATION des femelles.

**SPEARMINT**, n. Sper'mi'nt. See *Mentha viridis*. —**Essence of s.** See *Spiritus menthae viridis* and *Oil of s.* —**German oil of s.** Ger., *Krauseminzöl*. The essential oil distilled from *Mentha crispata* (1st def.), said to be identical in composition with oil of s. [a. 35.] —**Oil of s.** Lat., *oleum menthae viridis*. Fr., *huile volatile de menthe (verte)*. Ger., *Römisch-Minzelöl*. A colorless or pale-yellow oil obtained by distillation from *Mentha viridis*. It has a strong odor and taste, like that of the herb, and becomes darker and thicker with time. It is less pungent than oil of peppermint, but is used like it. [B. 5, 18 (a, 35); B. 93 (a, 38).] —**S. water**. See *Aqua menthae viridis*.

**SPEARWORT**, n. Sper'wu't. The *Ranunculus lingua*, *Ranunculus flammula*, and other species of *Ranunculus*. [a. 35.]

**SPECIALIST**, n. Spe'cial-i'st. From *specialis*, particular. Fr., *specialiste*. Ger., *Spezialist*. One who occupies himself mainly with some particular department (e. g., of scientific investigation or of medical practice). [a. 48.]

**SPECIALITY**, n. Spe'cial-i'te/a'shu'n. Lat., *specialitas*. Fr., *spécialité*. In embryology, the quality of being differentiated.

**SPECIALIZATION**, n. Spe'cial-i'ze/a'shu'n. See DIFFERENTIATION.

**SPECIES** (Lat.), n. f. Spe(spe't)/shi't(ki't)-ez(as); in Eng., spe'shez. Gen., -ei. Fr., *espèce*. Ger., *Art* (1st def.). 1. In classification, a group of individuals assumed, on account of their close similarity, to have emanated from the same stock, while specifically distinct from other groups of the same genus. [a. 35.] 2. In the pl., s. of the Ger. Ph., Belg. Ph., Dan. Ph., Norw. Ph., and Russ. Ph. (Fr., *espèces* [Fr. Cod.]), a mixture consisting chiefly of vegetable substances dried and pulverized; used in the preparation of infusions, decoctions, etc. [B. a. 35.] 3. See SPICE. —**Antispasmodic s.** Fr., *espèces antispasmodiques*. A mixture of 9 parts of valerian-root, 6 of orange-leaves, and 3 of millefolium. [B. 119 (a, 38).] —**Extractum specierum Smith**. Sp., *extracto alcohólico de especies de Smith* [Sp. Ph.]. A preparation made by macerating s. sudorificæ in 8 times as much 60-per-cent. alcohol for a fortnight, decanting, filtering, and distilling off the alcohol. [B. 95 (a, 38).] —**S. ad elixir domesticum** [Swiss Ph.]. A mixture of 20 parts of aloes with 2 each of saffron, *Polyporus officinalis*, myrrh, gentian-root, rhubarb-root, rhizome of zedoary, and electuarium theriacale. [B. 95 (a, 38).] —**S. ad fomentum resolventes** [Swed. Ph.]. A mixture of 2 parts each of chamomile-flowers, hops, and wormwood with 4 of crisped mint. [B. 95 (a, 38).] —**S. ad gargarisma**. A mixture of equal parts of the flowers of *Malva silvestris*, elder-flowers, and marsh-mallow leaves [Ger. Ph.]; of figs, elder-flowers, red poppies, marsh-mallow root, and the herb of mallows [Gr. Ph.]; of the flowers of *Malva silvestris*, elder-flowers, and sage-leaves [Russ. Ph.]. [B. 95 (a, 38).] —**S. ad infusum amarum**. See *S. amara*. —**S. ad infusum pectorale**. See *S. pectorales* (1st def.). —**S. ad longam vitam**. See *S. ad elixir domesticum*. —**S. adstringentes**. Fr., *espèces astringentes*. A mixture of equal parts of pomegranate-bark and the roots of tormentilla and bistort; or of 2 parts each of pomegranate-flowers and red-rose petals, 4 of sage, 8 each of plantain and the herb of *Prunella vulgaris*, and sometimes 2 of the flowers of *Ligustrum vulgare*; or of 30 grammes of pomegranate-bark with 4 handfuls each of elder-flowers, and the herbs of *Plantago major*, *Achillea millefolium*, and *Verbascum thapsus*.

[B. 119 (a, 38).] —**S. ad suffiendum**. Fr., *espèces fumigatoires*. Ger., *Räucherwerk*. A mixture of 6 parts each of benzoïn, oil-banum, and amber with 2 of lavender-flowers [Belg. Ph.]; or of equal parts of benzoïn, mastic, oil-banum, and styrax [Gr. Ph.]. [B. 95, 119 (a, 38).] See also *S. fumales*. —**S. amara** [Belg. Ph., Swiss Ph., Norw. Ph., Finn. Mil. Ph.], **S. amaricantes** [Aust. Ph., Hung. Ph., 2d ed.]. A mixture of equal parts of the herbs of wormwood, blessed thistle, lesser centaury, and chamædrys [Belg. Ph.]; of senna-leaves, juniper-berries, and the leaves of *Menyanthes trifoliata* [Dan. Ph.]; of these and guaiac-wood [Norw. Ph.]; of 2 parts each of orange-peel, gentian-root, and herb of lesser centaury, with 6 of wormwood [Swiss Ph.]; of 2 of the fruit of star-anise and 4 each of quassia-wood and the leaves of blessed thistle [Swed. Ph.]; of 3 parts of the leaves of *Menyanthes trifoliata* and 4 of the rhizome of calamus [Finn. Mil. Ph.]; of two parts of Chinese cinnamon, 8 each of the leaves of *Menyanthes trifoliata*, the rhizome of calamus, and gentian-root, and 16 each of orange-peel, absinth, and the flowering herb of lesser centaury [Aust. Ph.]; or of these and 8 parts of blessed thistle [Hung. Ph., Roum. Ph.]. [B. 95, 119 (a, 38).] —**S. anthelminticæ**. A mixture of equal parts of wormwood, tansy, and chamomile. [B. 119 (a, 38).] —**S. aperitives majores**. Fr., *espèces aperitives majeures*. A mixture of 60 grammes of senna-leaves, 30 of *Polypodium quercifolium*, 15 each of selected agaric, raisins, and the roots of fennel, parsley, licorice, and *Apium graveolens*, 7 each of aniseed, fennel-seed, thyme, tansy-bark, and the bark of *Capparis spinosa*, a handful each of the herbs of endive, chicory, and fumitory, and half a handful of the herbs of eupatorium, borage, bugloss, scolopendrium, and *Cuscuta europæa*. [B. 119 (a, 38).] —**S. aperitives minores**. Fr., *espèces aperitives mineures*. A mixture of 6 parts of senna-leaves, 12 each of damsons and Corinthian raisins, 2 each of aniseed, fennel-seed, the four cordial flowers, and the herbs of agrimony, betonica, chicory, *Cuscuta europæa*, fumitory, and spleenwort, and 1 part each of the roots of *Apium graveolens*, fennel, licorice, parsley, *Polypodium quercifolium*, asaret, and *Triticum repens*. [B. 119 (a, 38).] —**S. aromaticæ**. Fr., *espèces aromatiques*. Sp., *especies aromáticas*. A mixture of equal parts of lavender-flowers, leaves of crisped mint, sage-leaves, and the herb of origanum [Aust. Ph., Hung. Ph.]; of these and chamomile-flowers, leaves of melissa and rosemary, and the herbs of hyssop and *Thymus serpyllum* [Belg. Ph.]; of chamomile-flowers, elder-flowers, and wormwood [Finn. Mil. Ph.]; of the leaves of peppermint, sage, and rosemary, and the herbs of wormwood, hyssop, origanum, *Thymus serpyllum*, and *Thymus vulgaris* [Fr. Cod.]; of chamomile-flowers, the leaves of melissa and sage, and the herbs of origanum, pulegium, and *Thymus serpyllum* [Gr. Ph.]; of lavender-flowers, the leaves of rosemary and sage, and the herbs of hyssop, origanum, *Thymus vulgaris*, and cassidony [Sp. Ph.]; of these except the hyssop, cassidony, and *Thymus vulgaris*, for which are substituted peppermint-leaves and the herbs of wormwood and *Thymus serpyllum* [Roum. Ph.]; of 6 parts each of chamomile-flowers and lavender-flowers with 4 [Dan. Ph.] (3 [Norw. Ph.]) of elder-flowers, and 16 each [Dan. Ph.] (15 [Norw. Ph.]) of melissa-leaves, peppermint-leaves, wormwood, and origanum; of 2 each of cloves and cubeb, and 4 each of lavender-flowers, peppermint-leaves, and the herbs of *Thymus serpyllum* and *Thymus vulgaris* [Ger. Ph.]; of 2 each of cloves and lavender-flowers, 4 each of peppermint-leaves, sage-leaves, and the herbs of sweet marjoram and *Thymus serpyllum* [Swiss Ph.]; or of 2 of cloves, 4 of lavender-flowers, and 8 each of leaves of crisped mint and herb of sweet marjoram [Russ. Ph.]. [B. 95 (a, 38).] —**S. aromaticæ caryophyllatæ** [Würtemb. Ph., 1798]. Fr., *espèces aromatiques cinnamomées*. A mixture of 14 parts of licorice, 8 each of zedoary, galangal, aloes-wood, yellow sandal-wood, cinnamon, mace, long pepper, and cardamom, 5 of cubeb, 30 of rose-petals, and 60 of cloves. [B. 119 (a, 38).] —**S. aromaticæ pro balneo** [Russ. Ph.]. A mixture of equal parts of chamomile-flowers, lavender-flowers, leaves of crisped mint and rosemary, the herb of *Thymus serpyllum*, and the rhizome of calamus. [B. 95 (a, 38).] —**S. aromaticæ pro cataplasmatæ** [Aust. Ph., Hung. Ph., 1st ed.]. A mixture of equal parts of lavender-flowers, leaves of crisped mint and sage, and herb of origanum, reduced to a coarse powder. [B. 95 (a, 38).] —**S. aromaticæ rosatæ** [Palat. Disp., 1764; Würtemb. Ph., 1798]. Fr., *espèces aromatiques rosées*. A powdered mixture of 25 parts of licorice, 4 of galangal, 7 each of aloes-wood and yellow sandal-wood, 22 of cinnamon, 10 each of cloves and mace, 4 each of cardamom and nutmeg, and 60 of rose-petals. [B. 119 (a, 38).] —**S. avenacæ**. Fr., *espèces pour la décoction d'avoine*. A mixture of 36 parts of washed and dried oats, 6 of red sandal-wood, and 3 of chicory-root; or of 18 of the oats with 3 each of the roots of chicory, soapwort, *Carex arenaria*, and dandelion. [B. 119 (a, 38).] —**S. bechicæ**. See *S. pectorales cum fructibus* and *S. FLORUM pectoralium*. —**S. carminativæ**. Fr., *espèces carminatives* [Fr. Cod.] (2d def.). 1. A mixture of 8 parts each of anise, cumin, caraway, fennel, and carrot, 3 each of licorice and chamomile, and 24 of raisins; or of 2 each of anise and caraway, 8 of chamomile, and 4 each of crisped mint, melissa, and sage; or of 4 each of valerian and peppermint, 6 each of chamomile and elder, and 2 each of caraway and dill. [B. 119 (a, 38).] 2. A mixture of 1 part of sal ammoniac, 4 parts of chamomile, and 2 parts each of bay-berries and juniper-berries. [L. 85.] —**S. cephalicæ**. 1. A powdered mixture of 5 parts of sal ammoniac and 12 each of juniper, arnica-flowers, chamomile-flowers, and the leaves of mint, rue, rosemary, sage, and laurel. 2. A mixture of 15 parts each of Florentine iris-root, the root of *Cyperus rotundus*, aloes-wood, yellow sandal-wood, and lignum Rhodii, 22 each of lavender, rosemary, and rose-flowers, and 11 each of cloves, cinnamon, nutmeg, amber, and styrax; or of 45 of Florentine iris, 15 each of betonica, sweet marjoram, and rosemary, 30 of red rose, 7 each of sage, lavender, wallflower, spike-nard, yellow sandal-wood, and lignum Rhodii, 11 each of styrax and amber, and 5 each of aloes-wood, cloves, *Cyperus rotundus*, cinnamon, and benzoïn. 3. A mixture of 4 parts each of crisped mint, sweet marjoram, origanum, and *Thymus serpyllum*, and 2 each of chamomile, lavender, laurel-berries, juniper, and caraway. [B. 119

each of verbasum-flowers and aniseed, 30 of the leaves of *Tussilago farfara*, 15 of licorice, and 5 of rhizome of iris [Ger. Ph.], or with 40 of fennel-seed and 80 each of elder-flowers and licorice [Finn. Mil. Ph.], or with 5 of red-poppy petals, 20 of marsh-mallow flowers, and 10 of licorice [Gr. Ph.], or with 10 each of linden-flowers and the leaves of *Adiantum capillus Veneris* and mallow, 5 each of verbasum-flowers and fennel-seeds, and 20 of licorice [Swiss Ph.], or with 18 each of elder-flowers, verbasum-flowers, licorice, and the leaves of *Tussilago farfara*, and 13½ of aniseed [Norw. Ph.], or with 10 each of red-poppy petals, verbasum-flowers, and the fruit of star anise, 20 of the leaves of *Tussilago farfara*, 15 of licorice, and 5 of rhizome of iris [Russ. Ph.], or with 20 of verbasum-flowers, 8 of the fruit of star anise, 80 of the herb of *Myrrhis odorata*, and 40 of licorice [Swed. Ph.]; or of 28 parts of marsh-mallow root, 16 of elder-flowers, 12 each of verbasum-flowers, leaves of *Tussilago farfara*, licorice, and the herb of *Veronica officinalis*, and 8 of the fruit of star anise [Dan. Ph.]. [B, 95 (a, 38), 2.] Of the Austr. Ph. see *S. pectorales cum fructibus*. — **S. pectorales cum fructibus**. Fr., *espèces pectorales (avec les fruits)* [Fr. Cod.]. Sp., *espèces pectorales* [Sp. Ph.]. A mixture of 60 parts of figs with 32 each of verbasum-flowers and the fruit of star anise, 64 of the leaves of *Tussilago farfara*, 120 of St. John's bread, 80 of pearl barley, 48 of licorice, 128 of marsh-mallow root, and 16 of rhizome of iris [Ger. Ph.]; or with 60 each of St. John's bread, pearl barley, licorice, and marsh-mallow root, 240 of marsh-mallow leaves, and 6 each of mallow-flowers, verbasum-flowers, red-poppy petals, and the fruit of star anise [Austr. Ph., Roum. Ph.]; or with 60 each of dates, St. John's bread, and jujube, 48 of red-poppy petals, 192 of marsh-mallow leaves, 384 of marsh-mallow root, and 96 of licorice [Gr. Ph.]; or with 30 each of St. John's bread, jujube, pearl barley, small raisins, licorice, and marsh-mallow root, and 15 each of the herbs of hyssop, *Veronica officinalis*, *Adiantum capillus Veneris*, and *Asperula odorata* [Swiss Ph.]; or of equal parts of figs, dates, raisins (small raisins [Fr. Cod.]), and jujube [Fr. Cod., Sp. Ph.]. [B, 95 (a, 38).] — **S. pro cataplasmate emollienti**. See *S. emollientes*. — **S. pro epithemate cordis et pulsum**. Fr., *espèces pour épithème*. A mixture of 15 parts each of the herbs of rosemary, sweet marjoram, and melissa, and the flowers of wallflower and clove-pink, 22 each of lavender-flowers, roses, cinnamon, mace, nutmeg, aloes-wood, and lignum rhodii, and 11 each of lemon-peel and orange-peel; or of a handful each of the flowers of bugloss, borage, and melissa, 7 grammes each of red roses and white, yellow, and red sandal-wood, 6 each of lemon-peel, aloes-wood, cloves, and sorrel-seeds, and 5 each of amber, leopard's bane, *Centaurea behen*, and *Statice limonium*. [B, 119 (a, 38).] — **S. pro fotu ad gangrenam**. A mixture of 3 parts each of Barbadoes aloes and asafetida, 6 of myrrh, 12 each of wormwood, rue, sage, and St. John's wort, 24 of willow bark, and 36 of litharge; or of 22 parts each of myrrh and the herbs of millefolium and wormwood, 15 each of asafetida, aloes, the herbs of scordium, sage, hyssop, and rue, and the flowers of elder and St. John's wort, 30 of rose petals, and 180 of litharge. For use, the first preparation is boiled with 180 parts of lime-water and 72 of vinegar; the second, with 10 times the amount of each. [B, 119 (a, 38).] — **S. pro fotu emmenagogo**. Fr., *espèces emménagogues*. A mixture of 120 grammes of bryony, 60 of round birthwort, 30 each of laurel-berries and zedary, and 2 handfuls each of chamomile, savin, feverfew, and artemisia; or of equal parts of the herbs of feverfew, melissa, and pennyroyal and the flowers of chamomile and *Lamium album*. [B, 119 (a, 38).] — **S. pro thea amara**. See *S. amara*. — **S. pro thea demulcenti**. See *S. demulcentes*. — **S. pro thea pectorali**. See *S. pectorales* (1st def.). — **S. pro thea St.-Germani**. See *S. lazantes St.-Germani*. — **S. puerperarum** [Swiss Ph.]. A mixture of 2 parts each of mallow-flowers, peony-flowers, linden-flowers without the bracts, and the flowers of *Primula officinalis*, 4 each of aniseed and fennel-seeds, 10 each of St. John's bread and licorice, and 20 of rasped hartshorn. [B, 95 (a, 38).] — **S. purgative**. See *S. laxantes* (3d def.). — **S. resolventes**. See *S. aromatica*. — **S. sudorificae**. Fr., *espèces sudorifiques*. Sp., *espèces sudorificas de Smith* [Sp. Ph.]. A mixture of equal parts of guaiac-wood, sassafras-wood, china-root, and sarsaparilla [Fr. Cod.]; or of 30 parts each of the first three and of licorice, and 115 of sarsaparilla [Sp. Ph.]; or of 40 parts of guaiac-wood, 10 of licorice, and 20 of china-root with 10 of sassafras-wood and 20 of sarsaparilla [Belg. Ph.], with 10 each of aniseed, fennel-seed, and red sandal-wood, and 40 each of juniper-wood, sassafras-wood, and sarsaparilla [Roum. Ph.]. [B, 95 (a, 38).] — **S. vulnerarie** [Fr. Cod.]. Fr., *espèces vulnéraires* [Fr. Cod.], *the suisse* [Fr. Cod.]. A mixture of equal parts of arnica-flowers, the flowers of *Antennaria dioica* and *Tussilago farfara*, and the leaves and tops of wormwood, betonica, chamadryas, ground ivy, hyssop, millefolium, origanum, rosemary, sage, scolopendrium, *Veronica officinalis*, *Thymus vulgaris*, ajuga, calaminat, sanicle, water germander, and *Urtica minor*. [B, 95 (a, 38).]

**SPECIFICUM** (Lat.), n. n. Spe2s(spe2k)i2f22k-u2m(u4m). A specific (4th def.). [*a*, 48]. -*S. antiepilepticum* Weismanni. See COPPER ammoniosulphate. -*S. Paracelsi*. See POTASSIUM sulphate. -*S. stomachicum* Poterii. See ANTIMONY diaphoreticum martiale.

**SPECIMEN** (Lat.), n. n. Spɹɛˈsɪmən kɹɪˈmɛn. Gen., -im'inis. From *specere*, to look at. Anything shown as an example or for purposes of illustration or demonstration. [a. 48.]—Card s. A

British term for a s. having the exhibitor's card attached, and not presented by him personally.—**Living s.** A British term for a patient shown at a society meeting.

**SPECK** (Ger.), n. Spe<sup>2</sup>k. See ADEPS.—**S'beule.** See LIPOMA.—**S'bruch.** See STEATOCELE.—**S'geschwulst, S'gewächs.** See LIPOMA.—**S'ig.** Fatty, lardaceous.—**S'öl.** See OLEUM ADIPIS.

**SPECTACLES**, n. Spe<sup>2</sup>kt/a<sup>3</sup>k'lz. From *spectaculum*, a show. Lat., *conspicilla*. Fr., *lunettes*. Ger., *Brillen*. Glasses or lenses to assist or improve sight. [F.]—**Decentred s.** Lenses devised by Giraud-Teulon, so constructed that the eccentric portions of two convex lenses are used instead of the centre; they thus acquire a slightly prismatic action. [F.]—**Mica s.** S. made of mica invented by Cohn, to be used as eye-protectors in place of those made of glass and wire-gauze. [F.]—**Orthoscopic s.** Of Scheffler, lenses cut out from the periphery of a large lens so as to act as decentred lenses. [F.]—**Pantoscopic s.** Ger., *Mallerbrillen*. Lenses having different foci in their upper and lower parts; first employed by Franklin. [F.]—**Periscope s.** See PERISCOPE GLASSES.—**Prismatic s.** S. having prisms with bases so arranged that overstrain of an ocular muscle is relieved. [a, 34.]—**Snow s.** A kind of s. used in high latitudes, as a protector against the glare of the snow; usually made of very light wood, with a narrow slit for the passage of light. [F.]—**Stenopæic s.** S. consisting of an oval metal plate having a small central aperture that permits the passage of only the central rays that fall in the optic axis. [a, 34.]—**Turn-pin temple s.** Spectacle-frames in which the wings are jointed and the end pieces turned down behind the ears, giving the glasses a firmer support. [F.]

**SPECTRE** (Fr.), n. Spe<sup>2</sup>kt'r. 1. A phantom. 2. See SPECTRUM.—**S's oculaires, S's perlés.** See MUSCÆ VOLITANTES.—**S. solaire.** See SOLAR SPECTRUM.

**SPECTRO-COLORIMETER**, n. Spe<sup>2</sup>kt'/ro-ko<sup>2</sup>l-o<sup>2</sup>r-i<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *spectrum* (q. v.), *color* (q. v.), and *metrum*, a measure. Of Viorodt, an ophthalmospectroscope that isolates a single spectral color; used in detecting color-blindness. [A, 319 (a, 34).]

**SPECTROLOGY**, n. Spe<sup>2</sup>kt-ro<sup>2</sup>l'o-jl<sup>2</sup>. From *spectrum*, an image, and *lógos*, understanding. Fr., *spectrologie*. Ger., *Spectrologie*. The science of spectrum analysis.

**SPECTROMETER**, n. Spe<sup>2</sup>kt-ro<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *spectrum* (q. v.), and *μέτρον*, a measure. A spectroscopy having a graduated circle and vernier for determining the deflection of the telescope when directed upon different parts of the spectrum. [a, 49.]

**SPECTROPHOTOMETER**, n. Spe<sup>2</sup>kt-ro-fot-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *spectrum* (q. v.), *φῶς*, light, and *μέτρον*, a measure. A spectroscopy for determining the amount of a color in spectrum analysis. [a, 34.]

**SPECTROSCOPE**, n. Spe<sup>2</sup>kt-ro-skop. From *spectrum* (q. v.), and *σκοπεῖν*, to examine. An instrument used for forming and examining spectra. It consists essentially of a collimator, one or

SPECTROSCOPE.

more prisms, and a telescope. The collimator is a narrow vertical slit formed by the adjustment of two metallic jaws at the principal focus of a convex lens which so condenses the divergent rays of light received through the slit as to cause them to enter the prisms as a beam. This prism, or series of prisms, is so arranged that the edges are parallel to the slit; and thus a spectrum is produced which it is the function of the telescope to magnify. [a, 49.]—**Direct-vision s.** A s. made by combining prisms of crown glass with one or more of flint glass. The edges of the prisms of crown and of flint glass are in opposite directions. The dispersion is given by the flint and the refraction is overcome by the crown glass prisms, so that the spectrum appears directly in the line of the source of light, instead of being bent as with a single prism. Used largely in the formation of spectral oculars or microspectroscopes. [J.]

**SPECTRUM** (Lat.), n. n. Spe<sup>2</sup>kt'ru<sup>2</sup>m(ru<sup>2</sup>m). From *specere*, to look at. Fr., *spectre*. Ger., *S.* 1. A band consisting of a definite succession of colors into which a beam of white light is decom-

posed when it is passed through a prism or a diffraction grating. Its formation depends on the principle that the different colored rays of which a ray of white light is composed are unequally refrangible and hence, on undergoing refraction, occupy different positions and are no longer blended together. Their order, beginning with the less refrangible, is red, orange, yellow, green, blue, indigo, and violet. [B.] 2. Of any specific substance, its absorption s. [a, 48.]—**Absorption s.** A s. crossed with dark bands produced by the specific absorptive action of gases, liquids, or solutions of solids or translucent or transparent colored solids, such as monazite, on a beam of white light made to pass through them before falling upon the prism or other refracting medium. The position of the bands, which are called absorption bands, is constant for the same substance, but the breadth and definition of the bands depend to some extent on the degree of concentration of the absorbing medium. [B.; J.]—**Continuous s.** A s. uninterrupted by dark or bright lines crossing it. [B.]—**Diffraction s.** **Grating s.** Ger., *Gitterspectrum*. A s. produced by passing light through a grating (q. v., 3d def.). [B.]—**Solar s.** Fr., *spectre solaire*. Ger., *Sonnenspectrum*. The s. afforded by the refraction of a beam of sunlight. Under ordinary circumstances this is continuous, but when solar light is passed through a fine slit the s. is crossed by numerous dark lines called *Fraunhofer's lines*. [B.]

**SPECULARIA** (Lat.), n. f. Spe<sup>2</sup>k-u<sup>2</sup>l(u<sup>2</sup>l)-a(a<sup>2</sup>)ri<sup>2</sup>-a<sup>2</sup>. From *speculum* (q. v.). Fr., *spéculaire*. Ger., *Spiegelglocke*. A genus of the Campanulaceæ. [a, 35.]—**S. speculum.** Fr., *miroir de Venus, doucette, mirette*. Ger., *Ackerviole, Venusspiegel*. Lady's- (or Venus's-) looking-glass; an astringent species rarely used. The young shoots and the roots are eaten. [a, 35.]

**SPECULUM** (Lat.), n. n. Spe<sup>2</sup>k-u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). From *specere*, to look at. Fr., *spéculum*. Ger., *S.*, *Spekulum*, *Spiegel*. 1. An instrument by means of which internal parts of the body may be observed or examined. 2. A tendinous structure. [E.] 3. See SÆPTUM LUCIDUM.—**Ashton's fenestrated anal s.** A cylindrical s. with a reflecting internal surface and a fenestra for the entire length. [E.]—**Auerbach's s.** An ear s. with a biconcave lens fixed at its entrance, for producing a magnified image of the membrana tympani. [F.]—**Bath s.** A vaginal s. to be worn during a bath, to admit water into the vagina.—**Bivalve s.** A s. having two hinged blades that may be separated after its introduction. [a, 34.]—**Bonafont's nasal s.** A bivalve s. with solid blades, the joint near the middle of the blades, and a screw for opening and closing them. [E.]—**Cervical s.** See UTERINE s.—**Cusco's s.** A bivalve uterine s., the segments articulating at their outer extremities, and each segment having fixed handles that hold the s. open by means of a screw and nut extending from one to the other. [a, 34.]—**Ear s.** A conical tube or valvular s. having a calibre sufficiently small to permit its introduction into the external auditory canal. [a, 34.]—**Elsberg's s.** A three-bladed s., the blades being straight and opening and closing with a handle like a forceps. [E.]—**Emmet's s.** Emmet's perineal retractor.—**Erhard's ear s.** A funnel-shaped metal s., blackened on the inside, the flare of the funnel having a generally rounded convexity. [F.]—**Fenestrated s.** A metal, glass, porcelain, or vulcanite cylinder having varying diameters, and a fenestra cut along a portion of one side of the cylinder so as to expose the membrane. [a, 34.]—**Ferguson's s.** A glass cylindrical vaginal s. silvered like a mirror.—**Foveaux's lid s.** A silver s. to hold the eyelids open; it is reversible and can be used for either eye. [F.]—**Gross's oral s.** A heavy forceps with blades deeply notched on the back for holding the teeth. When it is placed between the teeth the jaws are separated by pressing the handles together. [E.]—**Gruber's ear s.** A metal s. highly polished within and slightly ovoid in shape, so that its transverse section corresponds to that of the auditory canal. [F.]—**Harnblausen's** (Ger.). See CYSTOSCOPE.—**Kelsey's rectal s.** A bivalve s. with a large fenestra in one blade on the same principle as Cusco's s. [E.]—**Kramer's aural s.** A bivalve dilating s. used only with direct sunlight, and of more use in anterior rhinoscopy than in otoscopy. [F.]—**Larynx s.** See LARYNGOSCOPE.—**Mott and Heister's oral s.** A s. having two strong blades deeply notched on the backs, connected at one end, each by a hinge, to a cross-piece through which a thumb-screw works to open them. [E.]—**Neugebauer's s.** A vaginal s. consisting of two crescentic concave pieces of metal, one of which is narrower than the other; to be introduced with the concavities of the metallic pieces opposed. [a, 34.]—**Noyes's lid s.** A s. consisting of two short limbs working by rack and pinion on a curved aluminium bar. This bar is always placed next the nose, so that the s. is not reversible. It leaves the temporal side quite open and free. [F.]—**Politzer's vulcanite s.** An ear s. shaped like a truncated cone. It is lighter than the polished metal s., and its dark interior serves to render the surface of the membrana tympani more distinct by contrast. [F.]—**Rectal s.** Ger., *Afterspiegel, Mastdarmspiegel*. A s. that may be introduced through the anus and permit examination of the rectum. [a, 34.]—**Robert and Collin's nasals.** A small bivalve s. with non-fenestrated blades. [E.]—**Siegle's pneumatic ear s.** A s. used in the diagnosis of affections of the middle ear. Its wide extremity is closed by an obliquely inserted thin glass plate, and from the side projects a small nipple to which is fastened an India-rubber tube furnished with a small air-bag. By putting a small piece of India-rubber tubing on the end of the s. the instrument can be hermetically fixed in the external meatus. [F.]—**Simrock's nasal s.** A cylindrical s. with a beveled end and flange. [E.]—**Sims's s.** A piece of metal shaped like a modified w, the central portion being used as a handle while the extremities are concave on their external surfaces and placed at a slight inward curve from the axis of the handle. [a, 34.]—**Skene's urethral s.** A small bivalve s., one blade considerably larger than the other, both ends of the instrument being controlled by a common screw at the middle. [E.]—**S. Helmontii.** See CENTRUM NERVEUM.—**S. lucidum.** See SÆPTUM LUCIDUM.—**S. matricis.** A uterine s. Some of the older writers seem to have applied the term to uterine dilators

**SPEISE** (Ger.), n. *Spīz'e*. See ALIMENT.—**Glockens'**. See BELL METAL.—**S'brel**. See CHYME.—**S'durchfall**, *S'fluss*. See LIENTERIC DIARRHEA.—**S'gang**. See (ESOPHAGUS).—**S'öl**. Oil used in culinary operations. [B.]—**S'ordnung**. See DIET.

**SPEISEND** (Ger.), adj. *Spīz'e'nd*. See ALIMENTARY.

**SPEISERÖHRE** (Ger.), n. *Spīz'e'r-ru'r-e*. See (ESOPHAGUS).—**S'neröffnung**. See (ESOPHAGOTOMY).—**S'nkrampf**. See DYSPHAGIA SPASMODICA.—**S'nloch**, *S'n'schlitz*. See FORAMEN OESOPHAGEUM.—**S'n'schnitt**. See (ESOPHAGOTOMY).

**SPEISESAFT** (Ger.), n. *Spīz'e'z-a'ft*. See CHYLE.—**S'behält-er**, *S'behält-niss*. See RECEPTACULUM CHYLI.—**S'gang**, *S'röhre*. See THORACIC DUCT.

**SPEISUNG** (Ger.), n. *Spīz'un*. See ALIMENTATION.

**SPEITÄUBLING** (Ger.), **SPEITEUFEL** (Ger.), n's. *Spī'toib-lī'n*, -toif-e'l. See RUSSULA *emetic*.

**SPELT**, n. *Spēlt*. Gr., *σπός*. Lat., *spelta*, *ador*. Ger., *S.*, *Speltz*. The *Triticum spelta* or its grain. [a. 35.]

**SPELTER**, **SPELTERINE**, n's. *Spēlt'u'r*, -en. Lat., *speltum*. Commercial zinc. [B.]

**SPELZ** (Ger.), n. *Spe'lts*. See **SPELT**.—**S'blütthe**. A glumaceous flower. [a, 35].—**S'chen**. See **PALEOLA**.

**SPELZE** (Ger.), n. *Spe'lts'e²*. A pale or glume. [a, 35.] See also **CHAFF** (3d def.).

**SPENCER SPRINGS**, n. *Spe'ns'u²r*. Mineral springs situated in Tioga County, New York. [A, 363 (a, 21).]

**SPERGULA** (Lat.), n. f. *Spu'rg(spe'rg)/u²l(u¹l)-a²*. From *spargere*, to scatter. Fr., *espargoutte*, *spargoutte*, *espargoutte*. Ger., *Spergel*, *Spark*, *Spurre*. A genus of Caryophyllaceae herbs. The *Spergulae* are a family including *S. Buda*, *Telephium*, *Pharmaceum*, etc. The *Sperguleae* are a division of the *Paronychieae*. [a, 35].—*S. arvensis*. Fr., *espargoutte des champs*, *spergule*, *espargoutte*. Ger., *Läusegras*, *Ackerknöterich*. Corn spurrey, toad-flax; a weed found in cultivated fields. One variety is cultivated for fodder, and its seeds are eaten. [a, 35.]

**SPERGULARIA** (Lat.), n. f. *Spu'rg(spe'rg)-u²l(u¹l)-a(a³)/ri²-a²*. From *spargere*, to scatter. A genus of the *Spergulariaceae*, which are a tribe of the *Paronychieae*. [a, 35].—*S. campestris*, *S. rubra*. Red sandwort, a species found in temperate regions; used in lithiasis. [a, 35.]

**SPERM**, n. *Spu'rm*. Gr., *σπέρμα* (from *σπείρειν*, to sow). Lat., *sperma*. Ger., *Befruchtungsstoff* (3d def.), *Befruchtungsmasse* (2d def.). 1. See **SEMEN** (1st def.). 2. In botany, the contents (foveae) of pollen-grains and antheridia; of T. J. Parker, the male gamete or spermatozoid. [“*Four*, of the Roy. Micr. Soc.”, 1890, p. 19; B, 123 (a, 35).]—*S. mass*. The mass of spermatozooids emitted at one time by one of the tailed *Amphibia* and attached to a spermato-phore. [J.]—*S. morula*. See **SPERMOSPHERE**.—*S. nucleus*. See **SPERMATIC NUCLEUS**.

**SPERMA** (Lat.), n. n. *Spu'rm(spe'rm)/a²*. Gen., *sperm/atos (-atis)*. Gr., *σπέρμα*. See **SPERM**.—*S. ceti* [Netherl. Ph.]. See **SPERMACEUTI**.—*S. ranae*, *S. ranarum*. See under *RANA esculenta*.—*S. virile*. See **SEMEN** (1st def.).

**SPERMACETI**, n. *Spu'rm-a²-set/i²*. Lat., *sperma ceti*, *cetaceum*, *album ceti*. Fr., *spermaceti*, *blanc de baleine*, *cétine* [Fr. Cod.], *ambre blanc*. Ger., *S. Waldrath*. A soft, unctuous, pearly white, solid substance of crystalline texture, obtained from the *Physalus macrocephalus*. It is devoid of taste, has a slight odor, is inflammable, and dissolves in ether, in chloroform, in carbon bisulphide, and in boiling alcohol. It consists of a mixture of the ethers of various fatty acids, the larger part being made up of cetyl palmitate, although the ethers of stearic, myristic, and lauric acids are also present, with small quantities of lethal, methal, and stethal. [B, 3, 5.] Cf. **CETACEUM**.—*Ointment of s.* See **UNGUENTUM CETACEI**.—*Prepared s.*, *Saccharated s.* See **CETACEUM præparatum**.—*S. cerate*. See **CERATUM CETACEI**.—*S. ointment*. See **UNGUENTUM CETACEI**.—*S. plaster*. See **CERATUM CETACEI**.

**SPERMA CETI** (Lat.), n. n. *Spu'rm(spe'rm)/a² se(ka³)/ti(te)*. Gen., *sperm/atis ceti*. See **SPERMACEUTI**.—*Ceratum* (seu *emplastrum*, seu *pomatum*) *spermatis ceti*. See **CERATUM CETACEI**.

**SPERMACOCE** (Lat.), n. f. *Spu'rm(spe'rm)-a²k(a³k)-os(ok¹)-e(a)*. Gen., *-oc¹e*. From *σπέρμα*, a seed, and *ἄκωκη*, a point. A genus of rubiaceae plants. The *Spermaceceae* are an order or tribe of the *Rubiaceae*. The *Spermaceceae* are a tribe of the *Coffeae*. [a, 35].—*S. alata*, *S. aspera*. A Brazilian species used in gonorrhoea. [a, 35].—*S. ferruginea*. A Brazilian species. The root is used in place of ipecacuanha. [a, 35].—*S. hirta*, *S. hispida*. Fr., *s. velu*. Shaggy button (-weed); an East Indian species. The root, which has the taste of sarsaparilla, is used as an alterative, and the juice of the plant as an antisyphilitic. The seeds are used as a tonic and aphrodisiac. [a, 35].—*S. longifolia*. A Guiana species used in gonorrhoea and leucorrhoea. [a, 35].—*S. poaya*. A Brazilian species used like *S. ferruginea*. [a, 35].—*S. scabra*, *S. velu* (Fr.). See *S. hispida*.—*S. verticillata*. A South American and West Indian species having properties like those of *S. ferruginea*; used in blennorrhoea. [B, 19, 173, 180 (a, 35).]

**SPERMACRASIA** (Lat.), n. f. *Spu'rm(spe'rm)-a²k(a³k)-raz(ras²)/i²-a²*. From *σπέρμα*, seed, and *ἀκρασία*, want of power. Fr., *spermacrasie*. See **SPERMATORRHEA**.

**SPERMAPHORE**, n. *Spu'rm-a²-for*. Lat., *spermaphorum* (from *σπέρμα*, seed, and *φορεῖν*, to bear). Fr., *s.* See **PLACENTA** (4th def.).

**SPERMAPODIUM** (Lat.), n. n. *Spu'rm(spe'rm)-a²-pod(po²d)/i²-u²m(u¹m)*. From *σπέρμα*, seed, and *πούς*, the foot. Fr., *spermapode*. Ger., *Säulchen*. The carphore of the *Umbelliferae*. [a, 35.]

**SPERMA RANÆ** (Lat.), n. n. *Spu'rm(spe'rm)/a² ran(ran²)/e(a²-e²)*. Frog's spawn.—*Aqua spermatis ranæ*. Fr., *eau de frai de grenouille*. A preparation made by distilling frogs' spawn gently over the water-bath and preserving the first third of the distillate. [B, 119 (a, 38).]—*Oleum spermatis ranæ*. Fr., *huile de frai de grenouille*. A preparation made by boiling equal parts of frogs' spawn and olive-oil till the moisture is dissipated, and straining. [B, 119 (a, 38).]

**SPERMARY**, n. *Spu'rm-a²-r-i²*. Lat., *spermarium* (from *σπέρμα*, seed). A male gonad; the organ in which spermatozooids are produced. [B, 28 (a, 27).]

**SPERMATACRATIA** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-a²k(a³k)-ra(ras²)-ti(ti²)/a²*. From *σπέρμα*, seed, and *ἀκράτεια*, debility. Fr., *spermatocratie*. See **SPERMATORRHEA**.

**SPERMATANENERGIA** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-a²n(a²n)-e²n-u²rj(e²rg)-i(e²a²)*. From *σπέρμα*, seed, and *ἀνεργεία*, inefficacious. Fr., *spermatanergie*. Sterility in the male.

**SPERMATOPHRAXIS** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-e²m-fra²x(fra²x²)/i²s*. Gen., *-phrax²eos (-is)*. From *σπέρμα*, seed, and *ἐμφραξίς*, a stoppage. Of Signorini, spermatocele caused by obstruction of the seminiferous tubules. [L, 50 (a, 14).]

**SPERMATHECA** (Lat.), n. f. *Spu'rm(spe'rm)-a²-the(thay)/ka²*. From *σπέρμα*, seed, and *θήκη*, a chest. An organ in which semen is stored. [A, 12.]

**SPERMATIAS** (Lat.), n. m. *Spu'rm(spe'rm)-a(a³)/shi²(ti²)-a²s(a²s)*. Gen., *-at²iu (-iae)*. Gr., *σπερματίας* (from *σπέρμα*, seed). 1. A many-seeded fruit. 2. A plant grown from the seed. [L, 50 (a, 14).]

**SPERMATIC, SPERMATICAL**, adj's. *Spu'rm-a²t/i²k, -i²k¹*. Gr., *σπερματικός* (from *σπέρμα*, seed). Lat., *spermaticus*. Fr., *spermatique*. Ger., *spermatisch*. Pertaining to semen or its elements or to the organs concerned in its production, storage, or discharge. [J; L.]

**SPERMATID**, n. *Spu'rm-a²t-id*. See **Seminal CELL** (1st def.).

**SPERMATINE**, n. *Spu'rm-a²t-en*. From *σπέρμα*, seed. Fr., *s. Ger.*, *Spermatin*. A peculiar animal matter contained in the semen, said to be related to alkali albumin. [K.] Cf. **SPERMINE**.

**SPERMATIS** (Lat.), n. f. *Spu'rm(spe'rm)/a²t(a²t)-i²s*. Gen., *-at²idos (-idis)*. Gr., *σπερματίς* (from *σπέρμα*, seed). A spermatic vein. [L, 50 (a, 48).]

**SPERMATISCHESES** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-i²s'-ke²(ch²e²)-si²s*. Gen., *-es²eos (-isch²eis)*. See **ASPERMATISM** (2d def.).

**SPERMATISM**, n. *Spu'rm-a²t-i²z-m*. From *σπέρμα*, seed. Fr., *spermatisme*. The theory that the foetus is a direct product of the spermatozoid. [K.]

**SPERMATISMUS** (Lat.), n. m. *Spu'rm(spe'rm)-a²t(a²t)-i²z(-i²s)/mu²s(mu²s)*. Gr., *σπερματισμός* (from *σπέρμα*, seed). Fr., *spermatisme*. The emission of semen. [L, 50 (a, 14).]

**SPERMATITIS** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-i(e²)/ti²s*. Gen., *-it²idos (-idis)*. From *σπέρμα*, seed. See **FUNCULITIS**.

**SPERMATUM** (Lat.), n. n. *Spu'rm(spe'rm)-a(a³)/shi²(ti²)-u²m(u¹m)*. From *σπερματίον*, a small seed. Fr., *spermatie*. Ger., *Spermatie*. One of the minute, colorless, unclitiated, spore-like bodies or corpuscles, each surrounded by a cell-wall, produced in the floridian *Algae* in or on variously shaped structures (antheridia), and in lichens and *Fungi* in urn-shaped bodies (spermogones) on antheridial filaments (sterigmata), from which they are detached at maturity. They are in most cases incapable of germinating, but are supposed to fertilize the spores by conjugating with the female cells (trichogynes). They possess no motion except a molecular or Brownian movement. [a, 35.]

**SPERMATOBLASTS**, n. pl. *Spu'rm-a²t'o-bla²sts*. From *σπέρμα*, seed, and *βλαστός*, a sprout. Fr., *spermatoblastes*. Ger., *Spermatoblasten*, *Samenständer*. 1. Of Fouchet and Tournoux, certain flattened, polygonal epithelial cells resting upon the hyaline membrane of the seminiferous tubules, supposed to be the seat of formation of the spermatozooids. [a, 15.] 2. Of von Ebner (1872), the separate cells or multinucleated cells arising from a proliferation of the nuclei of the seminal cells. From the nuclei of these s. arise the heads of the spermatozooids, while the middle piece, the tail, and the delicate layer of protoplasm around the head are derived from the protoplasm of the cell-body of the s. [J, 1, 30, 32.]

**SPERMATOCELE** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-se(ka³)/le(la)*; in Eng., *spu'rm-a²t-o-sel*. Gen., *-cel²es*. From *σπέρμα*, seed, and *κύστη*, a tumor. 1. A hydrocele containing spermatozooids. [A, 326 (a, 21).] 2. See **Seminal CYST**.

**SPERMATOCHORDA** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-ko²rd(ch²o²rd)/a²*. From *σπέρμα*, seed, and *χορδή*, a cord. See **Spermatic CORD**.

**SPERMATOCLEMMMA** (Lat.), n. n. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-kle²m²ma²*. Gen., *-clem²m²atos (-atis)*. From *σπέρμα*, seed, and *κλέμμα*, a theft. See **POLLUTION**.

**SPERMATOCYST**, n. *Spu'rm-a²t-o-si²st*. From *σπέρμα*, seed, and *κύστις*, a bladder. Ger., *Spermatocyste*. 1. See **SPERMOSPHERE**. 2. In the pl., see **Follicular CELLS** (2d def.).

**SPERMATOCYSTIDIUM** (Lat.), n. n. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-si²st(ku²st)-i²d-i²-u²m(u¹m)*. From *σπέρμα*, seed, and *κύστις*, a bladder. 1. See **ANTHERIDIA** (1st def.). 2. Of Hedwig, the anther in phanerogams. [a, 35.]

**SPERMATOCYSTIDORRHAGIA** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-si²st(ku²st)-i²d-o²r-ra²j(ras²j)/i²-a²*. From *σπέρμα*, seed, *κύστις*, a bladder, and *ρίγνυσθαι*, to break forth. Hemorrhage from the seminal vesicles.

**SPERMATOCYSTITIS** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-si²st(ku²st)-i(e²)/ti²s*. Gen., *-it²idos (-idis)*. From *σπέρμα*, seed, and *κύστις*, a bladder. See **GONOCYSTITIS**.

**SPERMATOCYTE**, n. *Spu'rm-a²t-o-sit*. From *σπέρμα*, seed, and *κύτος*, a cell. Ger., *Spermatocyt*. 1. The mother cell of a spermatozoid. [a, 35.] See also **Seminal CELL** (1st def.). 2. See **SERMATOBlast** (2d def.).

**SPERMATOGENE**, n. *Spu'rm-a²t'o-je²m*. Lat., *spermatogemma* (from *σπέρμα*, seed, and *gemma*, a bud). Ger., *Spermatogemme*. See **SPERMOSPHERE**.

**SPERMATOGENESIS** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-je²n(ge²n)/e²s-i²s*. Gen., *-es²eos (-gen²esis)*. From *σπέρμα*, seed, and *γένεσις*, generation. Fr., *spermatogénèse*. Ger., *Spermatogenese*. The production of spermatozooids. [a, 48.]

**SPERMATOGONIA** (Lat.), n. f. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-go²n-i(e²a²)*. From *σπέρμα*, seed, and *γόνις*, generation. Fr., *spermatogonie*. Ger., *Spermatogonie*. See **GONEOPIESIS**.

**SPERMATOGONIUM** (Lat.), n. n. *Spu'rm(spe'rm)-a²t(a²t)-o(o²)-gon²(zon²)/i²-u²m(u¹m)*. Fr., *spermatogonie*. Ger., *Spermatogonie*, *Ursamenzelle*. 1. Of La Valette St.-George, a young seminal cell. [J.] 2. Of Hartog, see **SPERMATOSPORE**.

**SPERMATOID**, n. *Spu'rm-a²t-oid*. Lat., *spermatoidium* (from *σπέρμα*, seed, and *είδος*, resemblance). See **SPERMATOZOID**.

**SPERMATOLEPSIS** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}(\text{o}^2)\text{-le}^2\text{ps}(\text{laps})/\text{i}^2\text{s}$ . Gen., *-leptēos* (-is). From *σπέρμα*, seed, and *λήψις*, a seizure. See POLLUTION.

**SPERMATOMERE**, n.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-mer}$ . From *σπέρμα*, seed, and *μέρος*, a part. Fr., *spermatomère*. Ger., S. 1. Of Van Beneden, one of the cells formed in the first section (*Keinzone*) of a seminiferous tubule. 2. Of O. Hertwig, an element which, formed by the segmentation of a spermatogonium, has entered the second section (*Wachstumszone*) of a seminiferous tubule. [*Arch. f. mikr. Anat.*, xxxvi, p. 1 (a, 32).]

**SPERMATOPATHY**, n.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o}^2\text{p}^2\text{a}^2\text{th}\text{-i}^2$ . Lat., *spermatopathia* (from *σπέρμα*, seed, and *πάθος*, disease). Fr., *spermatopathie*. Any disease affecting the production or quality of the semen. [L, 50 (a, 14).]

**SPERMATOPÉ** (Fr.), adj.  $\text{Spe}^2\text{rm}\text{-a}^2\text{-o-pa}$ . See GONEPOIETIC.

**SPERMATOPHORE**, n.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-for}$ . From *σπέρμα*, seed, and *φορέω*, to bear. Fr., s. Ger., *Spermatophor*. 1. The part of a spermospore that remains passive and does not become transformed into spermatoblasts. It may serve as an envelope or carrier of all the spermatozooids developed from the original spermospore. [J, 1, 33.] 2. A semi-transparent, tough substance secreted by the cloacal glands and serving to support a mass of spermatozooids. [J.] 3. In the pl., see *Seminiferous TUBULES*.

**SPERMATOPHTHORA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}^2\text{p}^2\text{tho}^2\text{r}\text{-a}^2$ . From *σπέρμα*, seed, and *φθορά*, decay. Fr., *spermatophthore*. Deterioration of the semen. [L, 50 (a, 14).]

**SPERMATOPHYTA** (Lat.), n. n. pl.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}^2\text{p}^2\text{hyt}\text{-a}^2$ . From *σπέρμα*, seed, and *φυτόν*, a plant. Fr., *spermatophytes*. Phanerogams. [a, 35.]

**SPERMATOPLANIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}(\text{o}^2)\text{-plan}(\text{plān})/\text{i}^2\text{-a}^2$ . From *σπέρμα*, seed, and *πλάνη*, a wandering. Fr., *spermatoplane*. A supposed metastasis of the semen.

**SPERMATOPOETIC, SPERMATOPOIETIC**, adj's.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-po-et}^2/\text{i}^2\text{k}$ ,  $\text{-poi-et}^2/\text{i}^2\text{k}$ . Lat., *spermatopoieticus*. Fr., *spermatopé*. See GONEPOIETIC.

**SPERMATORRHEA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}^2\text{r-re}^2(\text{ro}^2\text{e}^2)\text{-a}^2$ . From *σπέρμα*, seed, and *ροία*, a flowing. Fr., *spermatorrhée*, flux de sperme, pertes séminales. Ger., *Samenfluss*, *Spermatorrhoe*. A morbid condition characterized by too frequent involuntary emissions of semen. [E.]—S. *atonica*. See GONORRHEA *libidinosa*.

**SPERMATOSCHESIS** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}^2\text{s}^2\text{ke}^2\text{sch}^2\text{e}^2\text{si}^2\text{s}$ . Gen., *-schēsis* (-oschesis). From *σπέρμα*, seed, and *σχέσις*, retention. Fr., *spermatoschèse*. See ASPERMATISM (2d def.).

**SPERMATOSIS** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-os}^2/\text{i}^2\text{s}$ . Gen., *-osēos* (-ia). From *σπέρμα*, seed. Fr., *spermatose*. See GONEPOIETIS.

**SPERMATOSOME**, n.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-som}$ . Lat., *spermatosoma* (from *σπέρμα*, seed, and *σῶμα*, the body). Ger., *Spermatosom*. See SPERMATOZOID.

**SPERMATOSPHERES**, n. pl.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-sferz}$ . From *σπέρμα*, seed, and *σφαίρα*, a sphere. See SPERMATOBlasts and cf. SPERMOSPHERE.

**SPERMATOSPORES**, n. pl.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-sporz}$ . From *σπέρμα*, seed, and *σπόρος*, a sowing. Cells, equivalent to ova, which by division give rise to the spermatoblasts. [J, 1.] See also *Seminal CELL*.

**SPERMATOTHECA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}(\text{o}^2)\text{-the}^2\text{ta}^2/\text{ka}^2$ . See PERICARP.

**SPERMATOZEMIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-o}(\text{o}^2)\text{-zem}(\text{zam})/\text{i}^2\text{-a}^2$ . From *σπέρμα*, seed, and *ζῆμία*, loss. Fr., *spermatozémie*. See SPERMATORRHEA.

**SPERMATOZOID, SPERMATOZOID**, n's.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-zoid}$ ,  $\text{spe}^2\text{rm}\text{-a}^2\text{-o-zoid}$ . Lat., *spermatozoid* (from *σπέρμα*, seed, and *ζῶον*, an animal), *spermatozoidium*, *animalculum seminis masculi* [Lewyenhoeck], *filum spermaticum*. Fr., *spermatozoïde*, *spermatozoïre*, *zoösperme*, *zoöplaste*, *ver spermatische*, *animalcule spermatique*, *spermastule*, *spermatoïde*. Ger., *Spermatozoide*, *Spermatozöon*, *Zoöspermie*, *Samenfaden*, *Samenkörper*, *Samen-thier*. 1. The fertilizing or male sexual element of the semen. In

HUMAN SPERMATOZOIDS: MAGNIFIED 600 DIAMETERS. (FROM FLINT [AFTER LANDOLFI].)

1 full view; 2, side view; A A, head; B B, intermediate segment; C C, tail; D D, terminal diamant.

the great majority of cases it is only after one or more s's have fused with an ovum that segmentation and the development of an embryo take place. In all cases a s is supposed to be the equivalent of a cell. In man and most of the higher animals s's appear in shape and action like minute tadpoles. The head represents the nucleus of the cell, and a delicate layer of protoplasm enveloping the head, together with the tail, represents the cell-body. In some cases there is seen a thickening in the tail at its junction with the head, and also in some cases the tail and middle pieces are bordered by a kind of frill. In the inferior animals the s's are of very various form, some being hair-like, as in insects, while others are cell-like. In most cases the tail has a continuous lashing or cilia-like motion, but in the two groups in which the s's are cell-like (nema-

toids and crustaceans) they exhibit amœboid movement. [J, 1, 80, 35.] 2. In cryptogams, a male motile cell (gamete) developed in the antheridium, occurring in most cases as a more or less spiral filament provided at its smaller end with two or more lash-like appendages (cilia) by means of which, under suitable conditions of moisture, it is propelled from the antheridium and, entering the archegonium or oogonium, fuses with the contained oosphere and forms the oospore. The term is also applied, but less correctly, to a non-motile, unilaminated antherozoid (see SPERMATUM). [B, 19, 77, 121, 229, 291 (a, 35).]

**SPERMATOZOON**, n.  $\text{Spu}^2\text{rm}\text{-a}^2\text{-o-zo-o}^2\text{n}$ . See SPERMATOZOID.

**SPERMATURIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2(\text{a}^2)\text{-u}^2\text{-r}(\text{ur})/\text{i}^2\text{-a}^2$ . From *σπέρμα*, seed, and *ουρον*, urine. Ger., *Spermaturie*. The escape of semen during micturition. [L, 57 (a, 14).]

**SPERMAZOIRE** (Fr.), n., **SPERMAZOIRE** (Lat.), n. n.  $\text{Spe}^2\text{rm}\text{-a}^2\text{-zo-a}^2\text{r}$ ,  $\text{spe}^2\text{rm}(\text{spe}^2\text{rm})\text{-a}^2\text{-zo-o}^2\text{n}$ . See SPERMATOZOID.

**SPERMIDIUM** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-i}^2\text{d}^2/\text{i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . See ACHENIUM.

**SPERMIDUCT**, n.  $\text{Spu}^2\text{rm}\text{-i}^2\text{-du}^2\text{kt}$ . From *σπέρμα*, seed, and *ducere*, to lead. Fr., *spermiducte*. The tract (or a part thereof) through which the semen passes to arrive at the urethra. [A, 4.]

**SPERMINE**, n.  $\text{Spu}^2\text{rm}\text{-en}$ . From *σπέρμα*, seed. Fr., s. Ger., *Spermin*. 1. Of Schreiner (1878) and others, a non-poisonous base,  $\text{C}_8\text{H}_{12}\text{N}$  (perhaps =  $\text{NH}(\text{CH}_2)_2$  or  $\text{CH}_2\text{-NH-CH}_2$ ), having the odor of semen, occurring in putrefying sea-poly, in sputum, in human semen, in the organs of leucocythæmic patients, in the alcohol in which anatomical preparations have been preserved, in cultures of choleraic matter, and, according to Poehl, in the thyroid gland and brain substance. [Brieger, *Arch. f. path. Anat. u. Physiol.* u. f. klin. Med., v. 500 (B); *Gaz. hebdom. de méd. et de chir.*, Oct. 15, 1892, p. cxv (a, 34).] 2. See *Brown-Séquard's ELIXIR*.

**SPERMOLIUM** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-li}^2\text{u}^2\text{-m}(\text{u}^2\text{m})$ . From *σπέρμα*, seed. Fr., *spermiole*. See SPERMA RANÆ.

**SPERMOLASTS**, n. pl.  $\text{Spu}^2\text{rm}\text{-o-bla}^2\text{sts}$ . See SPERMATOBLASTS.

**SPERMBOLE** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}^2\text{b}^2\text{-o}^2\text{-le}^2(\text{e})\text{-a}^2$ . Gen., *-ob-oles*. From *σπέρμα*, seed, and *βολή*, a throwing. See SPERMATISMUS.

**SPERMOCOCCUS** (Lat.), n. m.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-ko}^2\text{k}^2\text{-ku}^2\text{s}(\text{ku}^2\text{s})$ . From *σπέρμα*, seed, and *κόκκος*, a kernel. The head of a spermatozoid, with the exception of the outer sheath. [L, 146.]

**SPERMODERM**, n.  $\text{Spu}^2\text{rm}\text{-o-du}^2\text{rm}$ . Lat., *spermoderma*, *spermodermis* (from *σπέρμα*, seed, and *δέρμα*, skin). Fr., *spermoderme*. 1. Of Vines and others, the entire covering of a seed, including (when the ovule has two integuments) both the testa and the tegmen. [a, 35.] 2. Of Gray and others, see TESTA (2d def.).

**SPERMODOPHORE**, n.  $\text{Spu}^2\text{rm}\text{-o}^2\text{d-o-for}$ . Lat., *spermophorum* (from *σπέρμα*, seed, and *φορέω*, bearing). Fr., s. The gynophore of *Umbelliferae*. [a, 35.]

**SPERMEDONECROSIS** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-e}^2\text{d}^2\text{-}(\text{o}^2\text{e}^2\text{d})\text{-e}^2\text{-o}(\text{o}^2)\text{-ne}^2\text{k-ros}^2/\text{i}^2\text{s}$ . Gen., *-rosēos* (-is). From *σπέρμα*, seed, *οίσειν*, to swell, and *νεκρός*, deadness. Fr., *spermédionécrose*. Gangrene produced by ergot. [L, 50 (a, 14).]

**SPERMEDIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-e}^2\text{d}^2(\text{o}^2\text{e}^2\text{d})\text{-i}^2\text{-a}^2$ . From *σπέρμα*, seed, and *οίσειν*, to swell. Of Fries, the sclerotium. [a, 35.] Cf. ERGOT (1st def.).

**SPERMOGENOUS**, adj.  $\text{Spu}^2\text{rm}\text{-o}^2\text{g}^2\text{-e}^2\text{n-u}^2\text{s}$ . From *σπέρμα*, seed, and *γεννᾶν*, to beget. Forming or assisting to form spermatozooids. [J.]

**SPERMOGONES**, n. pl.  $\text{Spu}^2\text{rm}\text{-o-gonz}$ . Lat., *spermogonia* (from *σπέρμα*, seed, and *γεννᾶν*, generation). Fr., *spermogonies*. Ger., *Spermogonien*. In lichens and certain Fungi, urn-shaped conceptacles in which spermatia are developed. [a, 35.]

**SPERMOLITH**, n.  $\text{Spu}^2\text{rm}\text{-o-li}^2\text{th}$ . From *σπέρμα*, seed, and *λίθος*, a stone. See SPERMATIC CALCULUS.

**SPERMONEURALGIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-nu}^2\text{r-a}^2(\text{a}^2)\text{-l}^2\text{-gi}^2\text{-a}^2$ . From *σπέρμα*, seed, *νεῦρον*, a nerve, and *άλγος*, pain. Neuralgia of the spermatic cord. [L, 50 (a, 14).]

**SPERMOPHLEBECTASIA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-}(\text{o}^2)\text{-}(\text{o}^2)\text{-fle}^2\text{b}^2\text{-e}^2\text{k-taz}^2(\text{ta}^2\text{s})/\text{i}^2\text{-a}^2$ . From *σπέρμα*, seed, *φλέψ*, a vein, and *εκτασία*, a stretching. Fr., *spermophlébectasie*. A varicose condition of the spermatic veins. [E.]

**SPERMOPHORE**, n.  $\text{Spu}^2\text{rm}\text{-o-for}$ . Lat., *spermophorum* (from *σπέρμα*, seed, and *φορέω*, to bear). See PLACENTA (4th def.) and SPERMOPHORE.

**SPERMOPHORUM** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}^2\text{f-o}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . 1. A seed-bearing organ. 2. The testicle. 3. The uterus. [L, 50 (a, 14).]

**SPERMOPLASMA** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-pla}^2\text{-z}(\text{plāz})\text{-ma}^2$ . Gen., *-plasmatos* (-atis). From *σπέρμα*, seed, and *πλάσμα*, anything formed. The central portion and the tail of the seed-thread together with the outer sheath of the "head" of a spermatozoid. [L, 146.]

**SPERMORRHEA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}^2\text{r-re}^2(\text{ro}^2\text{e}^2)\text{-a}^2$ . See SPERMATORRHEA.

**SPERMOSPHERE**, n.  $\text{Spu}^2\text{rm}\text{-o-sfer}$ . From *σπέρμα*, seed, and *σφαίρα*, a sphere. Ger., *Samenknoten*. A ball of cells arising by the repeated division of a germinal cell or gonoblast. Each cell ultimately becomes a spermatozoid. [J, 1.]

**SPERMOSPORES**, n. pl.  $\text{Spu}^2\text{rm}\text{-o-sporz}$ . See SPERMATOSPORES.

**SPERMOTHECA** (Lat.), n. f.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-the}^2\text{(tha)}/\text{ka}^2$ . From *σπέρμα*, seed, and *θήκη*, a chest. See PERICARP.

**SPERMOTYLUM** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-ti}^2(\text{tu}^1)\text{-i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . From *σπέρμα*, seed, and *τύλος*, a swelling. Ger., *Saemenschwiele*. In some seeds, a small protuberance near the hilum, on the side of the testa opposite to the micropyle. [a, 35.]

**SPERMOZOON** (Lat.), n. n.  $\text{Spu}^2\text{rm}(\text{spe}^2\text{rm})\text{-o}(\text{o}^2)\text{-zo}^2\text{-o}^2\text{n}$ . See SPERMATOZOOID.

**SPERNIOLA** (Lat.), n. f.  $\text{Spu}^2\text{rn}(\text{spn})\text{-i}^2(\text{i}^2)\text{-o}^2\text{-a}^2$ . See SPERMA RANÆ.—**S. Crollii**. A mixture of  $\frac{1}{2}$  oz. each of myrrh and oilbainum and 1 scruple of saffron, moistened with water distilled from frogs' spawn, and mixed with 6 scruples of camphor; used as a hæmorrhagic and as a remedy for inflammatory troubles and for rabies. [Palat. Disp., 1764; Würtemb. Ph., 1798 (B, 119).]

**SPERRE** (Ger.), n.  $\text{Spe}^2\text{r}^2\text{re}^2$ . 1. Dilatation. 2. Stricture, contraction. [a, 14.]—**After's**. 1. See *Imperforate ANUS*. 2. Rectal tenesmus. 3. Stricture of the rectum. [A, 306.]—**Maul's**. See *DIVARICATIO maxillarum* and *TRISMUS*.

**SPERRELEVATEUR** (Ger.), n.  $\text{Spe}^2\text{r}^2\text{re}^2\text{-le}^2\text{-va}^2\text{-u}^2\text{r}$ . See *LID-SPECULUM*.

**SPERRER** (Ger.), n.  $\text{Spe}^2\text{r}^2\text{re}^2\text{r}$ . 1. A dilating speculum; a dilator. 2. A constrictor. [E.]

**SPERRKRAUT** (Ger.), n.  $\text{Spe}^2\text{r}^2\text{kra}^2\text{-u}^2\text{t}$ . The genus *Polemonium*. [a, 35.]

**SPHACELARIA** (Lat.), n. f.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-e}^2\text{-a}^2\text{r}^2\text{-i}^2\text{-a}^2$ . From *σφάκελος*, gangrene. Ger., *Brandtang*. A genus of *Algæ*. The *Sphacelariæ* of DeCaulis are the *Aplosporeæ*. [a, 35.]—**S. scoparia**. Ger., *besenförmiger Brandtang*. A brownish-green species found on the coast of the Atlantic and Mediterranean, forming a part of helminthochorton. [a, 35.]

**SPHACELATED**, adj.  $\text{Sfa}^2\text{s}^2\text{-el}^2\text{-at}^2\text{-e}^2\text{d}$ . Lat., *sphacelatus* (from *σφάκελος*, gangrene). Fr., *sphacélé*. Affected with sphacelus.

**SPHACÈLE** (Fr.), n. See SPHACELUS.—**S. de la bouche**. See *CANCER aquaticus*.

**SPHACELIA** (Lat.), n. f.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-el}^2(\text{e}^2)\text{-i}^2\text{-a}^2$ . Fr., *sphacélie*. Of Leveillé and Fée, a genus of *Fungi*; now recognized as the first or conidial stage of *Claviceps purpurea* and *Epichloe typhina*. [a, 35.]—**S. segetum**. The primary or sphacelial stage in the development of ergot; consisting of an oblong, homogeneous, soft mass of slender hyphae enveloping and penetrating the soft ovaries of the rye. The outer layer of the mycelial threads is made up of radially-diverging cells (basidia) which produce a multitude of elongated, agglutinated granules (conidia) covering the floral organs of the rye in the form of a whitish dust. [a, 35.]

**SPHACELISM**, n.  $\text{Sfa}^2\text{s}^2\text{-e}^2\text{-i}^2\text{-zm}$ . See SPHACELUS.

**SPHACELISMUS** (Lat.), n. m.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-e}^2\text{-i}^2\text{-z}(\text{i}^2\text{s})\text{-mu}^2\text{s}$  (mu<sup>2</sup>s). See SPHACELUS.—**S. cerebri**. See *ENCEPHALITIS*.

**SPHACELIUM** (Lat.), n. n.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-el}^2(\text{e}^2)\text{-i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . See SPHACELIA.

**SPHACELOTYPHUS** (Lat.), n. m.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-e}^2\text{-l}^2\text{-o}^2\text{-ti}^2(\text{tu}^1)\text{-fu}^2\text{s}(\text{fu}^2\text{s})$ . From *σφάκελος*, sphacelus, and *τύφος*, smoke. Fr., *sphacélotyphus*. Ger., *Brandfleckfieber*. Gangrenous typhus fever.

**SPHACELUS** (Lat.), n. m.  $\text{Sfa}^2\text{s}(\text{sfa}^2\text{k})\text{-e}^2\text{-l}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Gr., *σφάκελος*. Fr., *sphacèle*. Ger., *S*. Cold gangrene; mortification in which complete death of a part in its entirety takes place rapidly.

**SPHÆRAGRA** (Lat.), n. f.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-a}^2\text{g}^2(\text{a}^2\text{g})\text{-ra}^2$ . From *σφαῖρα*, a ball, and *ἀγρα*, a seizure. Fr., *sphéragre*. See *Bullet FORCES*.

**SPHÆRALCEA** (Lat.), n. f.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-a}^2\text{l}^2\text{s}(\text{a}^2\text{l})\text{-e}^2\text{-a}^2$ . From *σφαῖρα*, a ball, and *ἀλκία*, a kind of wild mallow. Fr., *sphéralcée*. Globe-mallow; a genus of the *Malvaceæ*. [a, 35.]—**S. cisplatina**. A Brazilian shrub. The leaves are used like those of *Aitha officinalis* as a pectoral. [a, 35.]

**SPHÆRANTHUS** (Lat.), n. m.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-a}^2\text{nth}^2(\text{a}^2\text{nth})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *σφαῖρα*, a ball, and *άνθος*, a flower. Fr., *sphéranthè*. Ger., *Kugelblume*. A genus of the *Umbelliferae*. The *Sphæranthes* are: Of Cassini, a subdivision of the *Bupththalmæ*; of DeCandolle, a subdivision of the *Conyzeæ*; of Lindley, a subtribe of the *Asteroidæ*. [a, 35.]—**S. amarantoides** (*cochinchinensis*). An emollient and tonic species. [a, 35.]—**S. hirtus**, **S. indicus**. East Indian globe-flower; a weed of honey-like odor. The roots, seeds, and receptacles are considered antelmintic; the herb is used as an alterative and pectoral, and externally as an emollient; and the flowers are used as an alterative, depurative, refrigerant, and tonic. The root-rub is used in piles. In Java the entire plant is considered diuretic. Lamarck's *S. indicus* is *S. suaveolens*; Blume's is *S. microcephalus*. [a, 35.]—**S. levigatus**, **S. microcephalus**. A species common in rice-fields in the East Indies and China; used as a stomachic tonic, vermifuge, and diuretic. [a, 35.]—**S. suaveolens**. A species with a strong, pleasantly aromatic odor, growing in Egypt and in the East Indies. It has the properties of *S. hirtus*. [a, 35.]

**SPHÆRECPHLOGISCUM** (Lat.), n. n.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-e}^2\text{-p}^2\text{-k}^2\text{-lo}^2(\text{lo}^2\text{g})\text{-i}^2\text{-sk}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . From *σφαῖρα*, a ball, and *ἐφλογίζεω*, to set on fire. See *VARICELLA globularis*.

**SPHÆRENCHYMA** (Lat.), n. n.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-e}^2\text{-n}^2\text{-ch}^2\text{-i}^2\text{-m}$  (ch<sup>2</sup>u<sup>2</sup>m)-a<sup>2</sup>. Gen., *-chymatos (-atis)*. From *σφαῖρα*, a ball, and *ἐγχυμα*, an infusion. Tissue in which the cells are spheroidal.

**SPHÆRIA** (Lat.), n. f.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-i}^2\text{-a}^2$ . From *σφαῖρα*, a ball. Fr., *sphérie*. A genus of *Fungi* formerly constituting nearly all the *Sphæriaceæ* (Fr., *sphériacées*) or *Sphæriacei* (Fr., *sphériacés*), which are a division of the *Pyrenomyces*. The *Sphæriæ* are a cohort of *Fungi*; the *Sphæriariæ* include the *Sphæriaceæ*, *Hysteriæ*, and *Xylomyces*; and the *Sphæriini* are a suborder of the *Sphæriacei*. [a, 35.]—**S. sinensis**. See *CORDICEPS sinensis*.

**SPHÆRIOCARCINOMA** (Lat.), n. n.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{r})\text{-e}^2\text{-r}^2\text{-i}^2\text{-o}(\text{o}^2)\text{-ka}^2\text{-r}^2\text{-si}^2\text{-n}^2(\text{ki}^2\text{n})\text{-om}^2\text{-a}^2$ . Gen., *-omatos (-atis)*. From *σφαῖριον*, a lit-

tle ball, and *καρκίνωμα*, carcinoma. Fr., *sphérocarcinome*. Of Dorrington, a cancer of globular shape. [L, 50 (a, 14).]

**SPHÆROBACTERIUM** (Lat.), n. n.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{-e}^2\text{r})\text{-o}(\text{o}^2)\text{-ba}^2\text{kt}(\text{ba}^2\text{kt})\text{-e}^2(\text{a})\text{-ri}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . From *σφαῖρα*, a ball, and *βακτήριον*, a little rod. Fr., *sphérobactérie*. See *MICROCoccus*.

**SPHÆROCoccus** (Lat.), n. m.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{-e}^2\text{r})\text{-o}(\text{o}^2)\text{-ko}^2\text{k}^2\text{-ku}^2\text{s}(\text{ku}^2\text{s})$ . From *σφαῖρα*, a ball, and *κόκκος*, a kernel. Fr., *sphérocoque*. Ger., *Kugelfruchtalge*, *Knopffalge*, *Knopftang*. A genus of *Algæ* with spherical fruit, typical of a division (*Sphærococoidæ*) of the *Florideæ*. Most of the species formerly included in this are now referred to *Chondrus*, *Gigartina*, *Rhodomenia*, *Gelidium*, etc. [a, 35.]—**S. acicularis**. Ger., *nadelförmige Knopffalge*. A gelatinous species sometimes constituting part of helminthochorton. It yields an empyreumatic oil recommended in helminthiasis. [a, 35.]—**S. cartilagineus**, **S. compressus**. Species said to furnish part of Japanese agar-agar. [a, 35.]—**S. gelatinosus**, **S. gelatinus**. Ger., *gallertartige Knopffalge*. A species common in the Indian Ocean. It yields an edible jelly, and is used as a demulcent. [a, 35.]

**SPHÆROMA** (Lat.), n. n.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{-e}^2\text{r})\text{-om}^2\text{-a}^2$ . Gen., *-omatos (-atis)*. Gr., *σφαῖρωμα*. Fr., *sphérome*. 1. A globular protuberance. 2. Of Paulus Ægineta, the head of the femur. 3. In the pl., of Galen, the nates. [L, 50 (a, 14).]

**SPHÆROTHECA** (Lat.), n. f.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{-e}^2\text{r})\text{-o}(\text{o}^2)\text{-the}^2(\text{tha})\text{-ka}^2$ . From *σφαῖρα*, a ball, and *θήκη*, a chest. Fr., *sphérotèque*. A genus of *Fungi*. [B.]—**S. Castagnei**. Hop-mildew; a species forming white patches on hop-leaves. [B, 61.]

**SPHÆROZYGA** (Lat.), n. f.  $\text{Sfe}^2\text{r}^2(\text{sfa}^2\text{-e}^2\text{r})\text{-o}(\text{o}^2)\text{-zig}^2(\text{zu}^2\text{g})\text{-a}^2$ . From *σφαῖρα*, a ball, and *ζυγόν*, a yoke. Fr., *sphérozyge*. A genus of *Algæ* allied to *Ocellularia*, abundant in some hot springs; said to contain a small proportion of an alkaline iodide, and applied to diseased glands. [a, 35.]—**S. spiralis**. See *ANABAINA spiralis*.

**SPHAGE** (Lat.), n. f.  $\text{Sfa}^2\text{j}(\text{sfa}^2\text{g})\text{-e}^2(\text{a})$ . Gen., *sphages*. Gr., *σφαγή* (from *σφάζειν*, to slay). Lat., *jugulum*. Fr., *s*. Ger., *Kehle*. The anterior aspect of the neck. [L, 50 (a, 14).]

**SPHAGIASMUS** (Lat.), n. m.  $\text{Sfa}^2\text{j}(\text{sfa}^2\text{g})\text{-i}^2\text{-a}^2\text{-z}(\text{a}^2\text{s})\text{-mu}^2\text{s}$  (mu<sup>2</sup>s). Gr., *σφαγιασμός* (from *σφαγή*, the throat). Fr., *sphagiasme*. Of M. Hall, spasm of the cervical muscles. [a, 34.]

**SPHAGITIS** (Lat.), n. f.  $\text{Sfa}^2\text{j}(\text{sfa}^2\text{g})\text{-i}^2(\text{e})\text{-ti}^2\text{s}$ . Gen., *-itis* (*-idis*). Gr., *σφαγίτις* (from *σφαγή*, the throat). See *JUGULAR VEIN*.

**SPHAGNUM** (Lat.), n. n.  $\text{Sfa}^2\text{j}(\text{sfa}^2\text{g})\text{-nu}^2\text{m}(\text{nu}^2\text{m})$ . From *σφάγνος*, tree-moss. Fr., *sphaigne*. Ger., *Torfmoos*. Bog-moss, gold heath; the only genus of an order of mosses, the *Sphagna* of Fumrohr, *Sphagnaceæ* of Reichenbach, *Sphagnaceæ* [Fr., *sphagnacées*] of Endlicher, *Sphagneæ* of Reichenbach, *Sphagneæ* or *Sphagnideæ* of Dumortier, *Sphagnoidæ* of Arnott, and *Sphagnoidæ* of Bridel. By their successive growth and decay these plants share in the formation of peat. They are spongy and elastic, and are used for antiseptic dressings. The *Sphagnaceæ* of Nees include the *Sphagnaceæ* of other authors and the *Andreaceæ*. [a, 35.]

**SPHALEROTOCIA** (Lat.), n. f.  $\text{Sfa}^2\text{l}(\text{sfa}^2\text{l})\text{-e}^2\text{-r}^2\text{-o}(\text{o}^2)\text{-tos}(\text{to}^2\text{k})\text{-i}^2\text{-a}^2$ . From *σφαλερός*, uncertain, and *τόκος*, childbirth. Fr., *sphalérotocie*. See *DOLORES præparantes*.

**SPHÆRE** (Ger.), n. *Sfar*<sup>2</sup>. See SPHERE and REGION.—**Fühls**, **Gefühls**. See *Sensory SPHERE*.

**SPHENDONE** (Lat.), n. f.  $\text{Sfe}^2\text{nd}^2\text{-o}^2\text{-n}^2\text{-e}^2(\text{a})$ . Gen., *sphendones*. Gr., *σφενδόνη*. Fr., *s*. See *FUNDA* (1st def.).

**SPHENO-BASILAR**, adj.  $\text{Sfen}^2\text{-o}^2\text{-ba}^2\text{-s}^2\text{-i}^2\text{-a}^2\text{r}$ . Lat., *spheno-basilaris* (from *σφην*, a wedge, and *basis*, a base). Fr., *sphénobasilaire*. Pertaining to the sphenoid bone and the basilar apophysis. [A, 385 (a, 48).]

**SPHENOBASILARIS** (Lat.), adj.  $\text{Sfen}^2(\text{sfa}^2\text{n})\text{-o}(\text{o}^2)\text{-ba}^2\text{s}^2(\text{ba}^2\text{s})\text{-i}^2\text{-a}^2\text{r}^2\text{-i}^2\text{s}$ . See SPHENO-BASILAR; as a n., see *BASILAR BONE* (1st def.).

**SPHENOCEPHALIA** (Lat.), n. f.  $\text{Sfen}^2(\text{sfa}^2\text{n})\text{-o}(\text{o}^2)\text{-se}^2\text{f}^2(\text{ke}^2\text{f})\text{-al}^2(\text{a}^2\text{l})\text{-i}^2\text{-a}^2$ . From *σφην*, a wedge, and *κεφαλή*, the head. Fr., *sphénocéphalie*, *sphénocéphalie*. Ger., *Sphenoccephalie*, *Sphénoccephalie*. Of G. St.-Hilaire, a form of monstrosity in which the cranium is wedge-shaped, there are two distinct eyes, the inferior maxilla is shorter than the superior, and the ears approach closely or are even united below the head. [L, 41, 49, 50 (a, 14).]

**SPHENO-ETHMOID**, **SPHENO-ETHMOIDAL**, adj's.  $\text{Sfen}^2\text{-o}^2\text{-e}^2\text{th}^2\text{-m}^2\text{-oid}$ ,  $\text{-e}^2\text{th}^2\text{-m}^2\text{-oi}^2\text{-d}$ . From *σφην*, a wedge, and *ἠθμώδης*, ethmoid. Pertaining to the sphenoid and ethmoid bones. [A, 48.]

**SPHENO-FRONTAL**, adj.  $\text{Sfen}^2\text{-o}^2\text{-fru}^2\text{-n}^2\text{-t}^2\text{-l}$ . From *σφην*, a wedge, and *frons*, the forehead. Pertaining to the sphenoid and frontal bones. [a, 48.]

**SPHENOID**, adj.  $\text{Sfen}^2\text{-oid}$ . Gr., *σφηνοειδής* (from *σφην*, a wedge, and *είδος*, resemblance). Lat., *sphenoides*. Fr., *sphénoïde*. Ger., *sphenoidisch*. Wedge-shaped; as a n., the s. bone. [C.]

**SPHENOIDAL**, adj.  $\text{Sfe}^2\text{-n}^2\text{-oi}^2\text{-d}$ . Lat., *sphenoidialis*. Fr., *sphénoïdal*. 1. See SPHENOID. 2. Pertaining to or connected with the sphenoid bone. [L.]

**SPHENOIDALIS** (Lat.), adj.  $\text{Sfen}^2(\text{sfa}^2\text{n})\text{-o}(\text{o}^2)\text{-i}^2\text{-d}(\text{ed})\text{-al}^2(\text{a}^2\text{l})\text{-i}^2\text{-s}$ . Sphenoidal; as a n., in the n., *sphenoidale*, the sphenoid bone. [C.]—**Sphenoidalia lateralia**. See *ALÆ majores*.

**SPHENOÏDE** (Fr.), adj. and n. *Sfan*-o-ed. See SPHENOID.—**S. postérieur** [Cuvier]. The basisphenoid bone in mammals. [L, 14.]—**S. principal**. The basisphenoid bone [Agassiz] or the presphenoid bone [Cuvier] of fishes. [L, 14.]

**SPHENOIDEUM** (Lat.), n. n.  $\text{Sfe}^2\text{-n}^2(\text{sfa}^2\text{n})\text{-o}(\text{o}^2)\text{-i}^2\text{-d}(\text{ed})\text{-e}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . See *Sphenoid BONE*.—**S. basilare**. 1. Of Hallam, see *Presphenoid BONE*. 2. Of Bojanus, Harting, and Stannius, see *Basisphenoid BONE*.

**SPHENOIDO-AURICULAR**, adj. Sfe<sup>2</sup>n-oid''o-a<sup>4</sup>r-i<sup>2</sup>k'u<sup>2</sup>l-a<sup>2</sup>r. From σφηνοειδής, wedge-shaped, and *auricula*, the external ear. Pertaining to the bauricular and sphenoidal diameters, etc., of the skull. [L.]

**SPHENOIDO-FRONTAL**, adj. Sfe<sup>2</sup>n-oid''o-fru<sup>2</sup>n't'l. From σφηνοειδής, wedge-shaped, and *frontis*, the forehead. Pertaining to the sphenoidal and frontal diameters, etc., of the skull. [L.]

**SPHENOIDO-PARIETAL**, adj. Sfe<sup>2</sup>n-oid''o-pa<sup>2</sup>r-i'e<sup>2</sup>t'l. From σφηνοειδής, wedge-shaped, and *paries*, a wall. Pertaining to the sphenoidal and parietal diameters, etc., of the skull. [L.]

**SPHENOMAXILLARIS** (Lat.), adj. Sfen(sfan)-o(o<sup>3</sup>)-ma<sup>2</sup>x-(ma<sup>2</sup>x)-i<sup>2</sup>l-la(la<sup>2</sup>)/ri<sup>2</sup>s. From σφην, a wedge, and *maxilla*, the jaw. Sphenomaxillary; as a n., in solipeds, the muscle formed by the union of the two pterygoid. [L, 13.]

**SPHENO-MAXILLARY**, adj. Sfen-o-ma<sup>2</sup>x'i<sup>2</sup>l-a-ri<sup>2</sup>. Lat., *sphenomaxillaris*. Fr., *spheno-maxillaire*. Pertaining to the sphenoid bone and the superior maxilla. [a, 48.]

**SPHENOMETEI**, n. Sfe<sup>2</sup>n-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From σφην, a wedge, and μέτρον, a measure. An instrument for determining the size of the wedge in cuneiform osteotomy. [a, 34.]

**SPHENO-OCCIPITAL**, adj. Sfen''o-o<sup>2</sup>k-si<sup>2</sup>p'i<sup>2</sup>l. From σφην, a wedge, and *occiput* (q. v.). Pertaining to the sphenoid and occipital bones. [a, 48.]

**SPHENO-ORBITAIRE** (Fr.), n. Sfa-no-o<sup>2</sup>r-be-ta<sup>2</sup>r. See *Pre-sphenoid bone*.

**SPHENO-ORBITAL**, adj. Sfen''o-o<sup>2</sup>r-b'i<sup>2</sup>t'l. Lat., *sphenoorbitalis* (from σφην, a wedge, and *orbita*, the orbit). Fr., *sphéno-orbitaire*. Pertaining to the sphenoid bone and the orbit. [a, 48.]

**SPHENO-PALATINE**, adj. Sfen''o-pa<sup>2</sup>l'a<sup>2</sup>t-i<sup>2</sup>n. Lat., *sphenopalatinus* (from σφην, a wedge, and *palatum*, the palate). Pertaining to the sphenoid bone and the palate. [C.] As a n., see *Abductor of the Eustachian tube*.

**SPHENO-PARIETAL**, adj. Sfen''o-pa<sup>2</sup>r-i'e<sup>2</sup>t'l. From σφην, a wedge, and *paries*, a wall. Pertaining to the sphenoid and parietal bones. [a, 48.]

**SPHENO-PETROSAL**, adj. Sfen''o-pe<sup>2</sup>t-ro<sup>2</sup>s'l. From σφην, a wedge, and πέτρα, a rock. See *Petro-sphenoid*.

**SPHENOPHARYNGEUS** (Lat.), n. m. Sfen(sfan)''o(o<sup>3</sup>)-fa<sup>2</sup>r-(fa<sup>2</sup>r)-i<sup>2</sup>n-u<sup>2</sup>n<sup>2</sup>g'i<sup>2</sup>e<sup>2</sup>(ae<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From σφην, a wedge, and φάρυγξ, the pharynx. That portion of the superior constrictor of the pharynx which arises from the base of the internal pterygoid plate. [Winslow (L).]

**SPHENOPTERYGOPALATINUS** (Lat.), n. m. Sfen(sfan)''o(o<sup>3</sup>)-te<sup>2</sup>r-pte<sup>2</sup>r''i<sup>2</sup>g'u<sup>2</sup>g)-o(o<sup>3</sup>)-pa<sup>2</sup>l(pa<sup>2</sup>l)-a<sup>2</sup>t(a<sup>2</sup>t)-i<sup>2</sup>n(en)'u<sup>2</sup>s(u<sup>2</sup>s). From σφην, a wedge, πέτρνξ, a wing, and *palatum*, the palate. Fr., *spheno-ptérygo-palatin*. See *Abductor of the Eustachian tube*.

**SPHENOSALPINGOSTAPHYLINUS** (Lat.), n. m. Sfen(sfan)''o(o<sup>3</sup>)-sa<sup>2</sup>l(psa<sup>2</sup>l)p-i<sup>2</sup>n-i<sup>2</sup>n''g''o(o<sup>3</sup>)-sta<sup>2</sup>t(sta<sup>2</sup>t)-i<sup>2</sup>l(u<sup>2</sup>l)-i<sup>2</sup>n(en)'u<sup>2</sup>s(u<sup>2</sup>s). From σφην, a wedge, σάλπιγξ, a trumpet, and σταφυλή, the uvula. See *Abductor of the Eustachian tube*.

**SPHENOSIPHON** (Lat.), n. m. Sfen(sfan)-o(o<sup>3</sup>)-sif(sef)/o<sup>2</sup>n-(on). Gen., -m'os (-is). From σφην, a wedge, and σίφων, a tube. Fr., *sphénosiphon*. Ger., *Keilspritze*. A syringe devised by Schnackenberg for stimulating premature labor by dilating the cervix uteri. [L, 50 (a, 14).]

**SPHENOSIS** (Lat.), n. f. Sfe<sup>2</sup>n(sfan)-os'i<sup>2</sup>s. Gen., -os'eos (-is). Gr., σφηνωσις (from σφην, a wedge). Ger., *Einkeilung*. Of Galen, aggravated infarction. [L, 50 (a, 14).]

**SPHENO-SQUAMOUS**, adj. Sfen''o-skwa<sup>2</sup>m'u<sup>2</sup>s. From σφην, a wedge, and *squama*, a scale. Pertaining to the sphenoid bone and the squamous portion of the temporal bone. [a, 48.]

**SPHENOSTAPHYLINUS** (Lat.), n. m. Sfen(sfan)''o(o<sup>3</sup>)-sta<sup>2</sup>t-(sta<sup>2</sup>t)-i<sup>2</sup>l(u<sup>2</sup>l)-i<sup>2</sup>n(en)'u<sup>2</sup>s(u<sup>2</sup>s). From σφην, a wedge, and σταφυλή, the uvula. See *Abductor of the Eustachian tube*.

**SPHENO-TEMPORAL**, adj. Sfen''o-te<sup>2</sup>mp'o<sup>2</sup>r'l. From σφην, a wedge, and *tempora*, the temples. Pertaining to the sphenoid and temporal bones. [a, 48.]

**SPHENOTRESIA** (Lat.), n. f. Sfen(sfan)-o(o<sup>3</sup>)-tre(tre)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>. From σφην, a wedge, and τρήσις, perforation. Fr., *sphénotrésie*. Ger., *Sphenotresie*. Perforation with dilatation.

**SPHENOTRIBE**, n. Sfe<sup>2</sup>n'o-trib. From σφην, a wedge, and τριβειν, to rub. Fr., *sphénotribe*. An instrument for breaking up the base of the skull in the operation of craniotomy; a combination of the cephalotribe and the transforateur. [A, 22.]

**SPHERE**, n. Sfer. Gr., σφαῖρα. Lat., *sphæra*. Fr., *sphère*. Ger., *Sphäre*. 1. A solid that has all parts of its surface equidistant from the centre; hence, loosely, a ball or globe. 2. A limited space or aspect regarded as a scene of action. [a, 48.]—**Attraction** s. A region within which there is a wheel-like arrangement of fine fibrils or rows of granules radiating from a clear area in the cell protoplasm, and in the middle of which lies the attraction-particle. [Schäfer (a, 31).]—**Embryonic** s. See *Segmentation* s.—**Extrusion** s. See *Extrusion globules*.—**Granule** s. Ger., *Körnchen*. One of the large granular corpuscles, with numerous fine, very active pseudopodia on their surface, found in connection with ordinary lymph corpuscles in serous exudations into the great body cavities. [J, 35.]—**Hearing** s. Ger., *Hörspäre*. Of Munk, certain portions of the temporal lobes of the brain supposed to be the seats of the sense of hearing, the anterior and posterior parts being engaged in the perception of high and low tones respectively. [F, 3.] Cf. *Acoustic centre* (2d def.).—**Hypoblastic** s's. Those inner products of the segmentation of the fertilized ovum that give rise to the hypoblast. [a, 31.]—**Motor** s. A region of the central

nervous system that, when stimulated, originates movement. [a, 34.]—**Protoplasmic primordial** s. See *Segmentation* CELL.—**Segmentation** s. Fr., *sphère blastémique*. Ger., *Furchungsabschnitt*, *Dotterabschnitt*. One of the nucleated cells into which the vitellus is divided by the process of segmentation. [J.] Cf. *BLASTULA* and *Embryonic cell* (1st def.).—**Sensory** s. Of Meynert, a region of the central nervous system that perceives sensory impressions. [a, 34.]—**Vitelline** s., *Yolk* s. See *Segmentation* s.

**SPHÈRE** (Fr.), n. Sfe<sup>2</sup>r. See *SPHERE*.—**S. blastémique**. See *Segmentation* SPHERE.—**S's de fractionnement**. See *BLASTOMERES*.—**S. de l'émotivité**. See *SENSORIUM commune*.—**S. de rebut**. See *Extrusion* GLOBULE.—**S. nutritive**. Of Coste, the sphere to which the cicatrula is attached. [A, 4.]

**SPHERICAL**, adj. Sfe<sup>2</sup>r'i<sup>2</sup>k'l. Gr., σφαῖρικός (from σφαῖρα, a sphere). Lat., *sphæricus*. Fr., *sphérique*. Ger., *sphärisch*. Having the shape of a sphere. [a, 35.]

**SPHEROCHLORINE**, n. Sfer-o-klor'en. From σφαῖρα, a sphere, and χλωρός, green. Fr., *sphérochlorine*. The green of the spectrum of the colored globules of the retina in birds. [Waelchli.]

**SPHEROIDAL**, adj. Sfe<sup>2</sup>-roi'd'l. Approaching the form of a sphere. [B, 19 (a, 85).]

**SPHEROMETER**, n. Sfe<sup>2</sup>r-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From σφαῖρα, a sphere, and μέτρον, a measure. An instrument for measuring the degree of curvature of a lens. [a, 34.]

**SPHERORRHODINE**, n. Sfe<sup>2</sup>r-o<sup>2</sup>r-ro<sup>2</sup>d-en. From σφαῖρα, a sphere, and ῥόδον, a rose. Fr., *sphérorhodine*. The red of the spectrum of the colored globules of the retina in birds. [Waelchli.]

**SPHÉROTHÈQUE** (Fr.), n. Sfa-ro-te<sup>2</sup>k. A macrosporangium.

**SPHEROXANTHINE**, n. Sfe<sup>2</sup>r-o<sup>2</sup>x-a<sup>2</sup>n'then. From σφαῖρα, a globe, and ξανθός, yellow. Fr., *sphéroxanthine*. The orange color of the spectrum of the colored globules of the retina in birds.

**SPHERULE**, n. Sfe<sup>2</sup>r'u<sup>2</sup>l. Gr., σφαῖριδιον. Lat., *sphærule*. A globule.—**Segment** s. See *Segmentation* SPHERE.

**SPHINCTER** (Lat.), n. m. Sfi<sup>2</sup>n'kt'u<sup>2</sup>s(ar). Gen., -er'os (-is). Gr., σφιγκτήρ. Fr., s. Ger., *Schließmuskel*. An annular muscle which constricts or closes a natural orifice; especially the s. ani. [L, 343.]—**Circular s. of the anus**. See *S. ani internus*.—**Laryngeal** s. See *S. laryngis*.—**S. ani** (cutaneous, seu *externus*). Fr., s. anal (ou de l'anus). Ger., *Afterschliesser*. A flat azgyous oval muscle surrounding the anus. It arises from the tip and posterior surface of the coccyx and blends anteriorly with the skin of the perineum and the perineal fascia and muscles. [L, 31, 332.]—**S. ani internus**. Ger., *innerer Afterschliesser*. A thickened bundle of the circular muscular fibres of the rectum about an inch above the anus. [L.]—**S. ani superficialis**. See *S. ani externus*.—**S. ani tertius**. An inconstant thickening of the circular fibres of the rectum a short distance above the s. ani internus. [L.]—**S. coccygio-cutané** (Fr.). See *S. ani externus*.—**S. cunni**. See *S. vaginae*.—**S. de la bouche** (Fr.). See *ORBITICULARIS oris*.—**S. de Nélaton** (Fr.). See *S. ani tertius*.—**S. gulae**. 1. The constrictor pharyngis regarded as a single structure. 2. Of Cowper, the inferior constrictor of the pharynx. [a, 46.]—**S. ilei**. See *Ileo-caval VALVE*.—**S. iridis** (major). Circular muscular fibres of the iris surrounding the pupil. [L, 332.]—**S. iridis minor**. Circular muscular fibres at the periphery of the iris. [L, 332.]—**S. labiorum**. See *ORBITICULARIS oris*.—**S. laryngis**. See *Compressor laryngis*.—**S. oculi**. See *ORBITICULARIS palpebrarum*.—**S. œsophagus**. See *FORAMEN œsophageum*.—**S. of the uterus**. A special re-enforcement of the circular muscular fibres surrounding the os uteri internum. [a, 22.]—**S. oris**. See *ORBITICULARIS oris*.—**S. oris externus**. See *STRATUM externum orbicularis oris*.—**S. oris internus**. See *STRATUM internum orbicularis oris*.—**S. palpebrarum**. See *ORBITICULARIS palpebrarum*.—**S. pharyngolaryngeus**. The inferior constrictor of the pharynx, the cricothyroid, and the thyroidei transversal. [L, 332.]—**S. prostatic**. See *S. urethrae prostatica*.—**S. pupille**. See *S. iridis* (major).—**S. pylori**. A ring like bundle of muscular fibres surrounding the pylorus. [L.]—**S. superior** (tertius). See *S. ani tertius*.—**S. urethrae**. See *STRATUM musculare circulare urethrae*.—**S. urethrae prostatica**. Muscular fibres surrounding the anterior portion of the prostate gland. [L, 31, 332.]—**S. vaginae**. Ger., *Schließmuskel der Scheide*. A circular bundle of voluntary muscular fibres surrounding the lower extremity of the vagina and urethra, and serving to close those canals. See also *CONTRACTOR cunni*.—**S. vaginae profundus**. See *CONTRACTOR cunni profundus*.—**S. ventriculi**. See *PYLORUS*.—**S. vesicae**. Circular muscular fibres of the bladder nearest the commencement of the urethra. [L.]—**S. vesicae externus**. See *S. urethrae prostatica*.—**S. vesicae internus**. 1. See *S. vesicae*. 2. The portion of the muscular coat of the prostate gland nearest the bladder. [L, 31.]—**Superficial s. of the anus**. See *S. ani externus*.

**SPHINCTÉRALGIE** (Fr.), n. Sfa<sup>2</sup>n'kt-ta-ra<sup>2</sup>l-zhe. Pain caused by spasm of the sphincter ani. [E.]—**S. fissuralis**. S. due to fissure of the anus. [D, 92.]

**SPHINCTEROLYSIS** (Lat.), n. f. Sfi<sup>2</sup>n'kt-o<sup>2</sup>r(ar)-o<sup>2</sup>l'i<sup>2</sup>(u<sup>2</sup>l)-si<sup>2</sup>s. Gen., -si<sup>2</sup>eos (-of ysis). From σφιγκτήρ, a band, and λύσις, a loosing. The operation of loosening the iris in anterior synechia. [a, 34.]

**SPHINCTEROTOMY**, n. Sfi<sup>2</sup>n'kt-o<sup>2</sup>r-o<sup>2</sup>t'u<sup>2</sup>m i<sup>2</sup>. From σφιγκτήρ, a sphincter, and τομή, a cutting. Ger., *Sphincterotomie*. Section of the sphincter ani. [A, 319 (a, 21).]

**SPHINGOINE**, n. Sfi<sup>2</sup>n'g'o-en. An alkaloid, C<sub>17</sub>H<sub>35</sub>NO<sub>2</sub>, found in cerebral tissue in combination with cerebrose and neurostearic acid. [Brit. Med. Jour., Sept. 15, 1893, p. 524 (B).]

**SPHINGONTA** (Lat.), n. n. pl. Sfi<sup>2</sup>n'g-o<sup>2</sup>nt'a<sup>2</sup>. From σφίγγων, to bind. Astringent medicines. [L, 94 (a, 43).]

**SPHINGOSINE**, n.  $\text{Sf}^{2n}2^{\circ}\text{go sen}$ . Fr., s. Ger., *Sphingosin*. A crystal-line alkaloid,  $\text{C}_7\text{H}_{15}\text{NO}_3$ , said to be a decomposition product of phrenosin. [Thudichum (K).]

**SPHINXIS** (Lat.), n. f.  $\text{Sf}^{12n}2^{\circ}\text{x}^{\circ}\text{i}^2\text{s}$ . Gen., *sphinxæos* (-is). Gr., *σφίγξις* (from *σφίγγειν*, to bind). See CONSTRUCTION.

**SPHONDYLUM** (Lat.), n. n.  $\text{Sfo}^{2nd}2^{\circ}\text{l}^2(\text{u}^{\circ})\text{i}^2\text{-u}^2\text{m}(\text{u}^4\text{m})$ . Gr., *σφονδύλιον* (1st def.). Fr., *spondyle*, *spondylium*. 1. Of Dioscorides, probably the *Heracleum* s. and related species of *Heracleum*. 2. In pharmacy, the *Heracleum* s. 3. Of Tournefort, the genus *Heracleum*. The *Spondylium* of Adanson are a section of the *Umbellata* (*Umbellifera*). [a, 35.]—**S. branca ursina**. See *HERACLEUM* s.—**S. conforme**. See *HERACLEUM sibiricum*.

**SPHRAGIDONYCHARGOCOMETA** (Lat.), n. m.  $\text{Sfra}^{2j}2^{\circ}(\text{sfr}^{2j}2^{\circ})\text{i}^2\text{d-o}^2\text{n}^2\text{i}^2\text{k}^2(\text{u}^{\circ}\text{ch}^2)\text{-a}^2\text{rg-o}^2(\text{o}^2)\text{-ko}^2\text{m-et}(\text{at})^2\text{a}^2$ . Gr., *σφραγιδονυχροκομήτης* (from *σφραγίς*, a seal-ring, *ὄνυξ*, the nail, *ἀργός*, shining, or *ἀργυρός*, silver, and *κομᾶν*, to plume one's self). A physician or a quack who seeks to gain the public favor by his personal adornments (as by having his fingers covered with rings down to the nails) more than by his professional merits. [a, 48.]

**SPHRIGOSIS** (Lat.), n. f.  $\text{Sfri}^2\text{g-os}^{\circ}\text{i}^2\text{s}$ . Gen., *-osæos* (-is). From *σφρίγος*, strength. An overluxuriance in the development of vegetable products. [a, 35.]

**SPHYGMIC**, adj.  $\text{Sf}^{2g}\text{m}^2\text{i}^2\text{k}$ . Gr., *σφυγμικός* (from *σφυγμός*, the pulse). Lat., *sphygmicus*. Fr., *sphygmique*. Ger., *sphygmisch*. Pulsating; of or pertaining to the pulse. [K.]

**SPHYGMOCEPHALIA** (Lat.), n. f.  $\text{Sf}^{2g}(\text{sfu}^g)\text{-mo}^2(\text{mo}^2)\text{-se}^2\text{f}$ . ( $\text{ke}^2\text{f}$ )- $\text{al}^2(\text{a}^2)\text{i}^2\text{-a}^2$ . From *σφυγμός*, the pulse, and *κεφαλή*, the head. Fr., *sphygmocéphalie*. See CROTAPHIUM.

**SPHYGMOCHRONOGRAPH**, n.  $\text{Sf}^{2g}\text{mo-kro}^2\text{n}^2\text{o-gra}^2\text{f}$ . From *σφυγμός*, the pulse, *χρόνος*, time, and *γράφειν* to write. Ger., *Präcisionssphygmograph*. An instrument for recording graphically the extent and oscillations of the pulse-wave. It consists essentially of a button which is placed over the artery, any movement communicated to which is registered by an index upon a slip of paper which is moved by clockwork. [K.]

**SPHYGMODIC**, adj.  $\text{Sf}^{2g}\text{mo}^2\text{d}^2\text{i}^2\text{k}$ . Gr., *σφυγμώδης* (from *σφυγμός*, the pulse, and *εἶδος*, resemblance). Lat., *sphygmoides*. Fr., *sphygmodique*. Ger., *pulsähnlich*. Pulse-like, throbbing like the pulse. [K.]

**SPHYGMOGRAM**, n.  $\text{Sf}^{2g}\text{mo-gra}^2\text{m}$ . From *σφυγμός*, the pulse, and *γράμμα*, a writing. Fr., *sphygmogramme*. The pulse-curve; the curve that is traced out by means of a sphygmograph. [K.]

**SPHYGMOGRAPH**, n.  $\text{Sf}^{2g}\text{mo-gra}^2\text{f}$ . Lat., *sphygmographium* (from *σφυγμός*, the pulse, and *γράφειν*, to write). Fr., *sphygmographe*. Ger., *S. Pulszeichner*. A recording pulsimeter, especially a sphygmochronograph. [a, 17.]—**Czermak's s.** A s. in which the pulse pad communicates with a small mirror that throws a beam of light on a screen or on sensitive paper. [a, 34.]—**Differential s.** Two small conjoined glass tubes containing

MAREY'S SPHYGMOGRAPH.

mercury and closed by two fine caoutchouc membranes. On the surface of each column of mercury floats a registering style. The tubes are attached to an artery and the accompanying vein and indicate the character of the arterial and venous impulses. [C. Ozanam, "Gaz. hebdom. de méd. et de chir.," Jan. 29, 1886, p. 78 (a, 34).]—**Keyes's s.** An instrument consisting of a rubber-membrane-covered pulse pad, glass transmission tubes, a manometric tube, a water reservoir, a lever that registers the pulse tracing on a writing surface, and a chronograph. [a, 34.]—**Landolt's (gas) s.** A s. in which the pulsations are transmitted to a reservoir of gas, so that the oscillations in the height of a flame of the lighted gas are synchronous with the pulse waves. [a, 34.]—**Ozanam's s.** An instrument consisting of a small elastic bulb communicating with a tube containing a column of mercury. On the surface of the latter is a float that supports a slender rod holding a pen. The pen is kept in contact with a moving band of paper by means of a magnet placed behind the paper. [L, 88 (a, 34).]—**Vierordt's s.** A s. consisting of a beam from which are suspended two levers of unequal length that articulate by means of a metal square attached to their free extremities. An index which is in contact with a revolving cylinder is attached to the square, and it oscillates coincidently with pulsations communicated to the longer lever. [L, 88 (a, 34).]

**SPHYGMOGRAPHY**, n.  $\text{Sf}^{2g}\text{mo}^2\text{g-ra}^2\text{f-i}^2$ . Lat., *sphygmographia*. Fr., *sphygmographie*. Ger., *Sphygmographie*, *Pulszeichnung*. The use of the sphygmograph; also the collection and analysis of facts and principles that pertain to the sphygmograph and its use. [D; L, 50 (a, 14).]

**SPHYGMOID**, adj.  $\text{Sf}^{2g}\text{m}^2\text{o}^2\text{id}$ . Gr., *σφυγμώδης* (from *σφυγμός*, the pulse, and *εἶδος*, resemblance). Lat., *sphygmoides*. See SPHYGMODIC.

**SPHYMOLOGE** (Fr.), n.  $\text{Sfeg-mo-lozh}$ . A pulsimeter; a sphygmograph. [K.]

**SPHYMOLOGY**, n.  $\text{Sf}^{2g}\text{mo}^2\text{-o-j}^2$ . Lat., *sphygmologia* (from *σφυγμός*, the pulse, and *λόγος*, understanding). Fr., *sphyg-*

*mologie*. Ger., *Pulslehre*. The physiology, pathology, etc., of the pulse. [a, 48.]

**SPHYGMOMANOMETER**, n.  $\text{Sf}^{2g}\text{-mo-ma}^2\text{n-o}^2\text{m}^2\text{-e}^2\text{t-u}^2\text{r}$ . From *σφυγμός*, the pulse, *μανός*, thin, and *μέτρον*, a measure. Fr., *sphygmomanomètre*. Ger., *S. See MANOMETER* (2d def.).

**SPHYGOMETER**, n.  $\text{Sf}^{2g}\text{-mo}^2\text{m}^2\text{-e}^2\text{t-u}^2\text{r}$ . Lat., *sphygmometrum* (from *σφυγμός*, the pulse, and *μέτρον*, a measure). Fr., *sphygmomètre*. Ger., *S. See PULSIMETER*.

**SPHYGMOPHONE**, n.  $\text{Sf}^{2g}\text{-mo-fon}$ . From *σφυγμός*, the pulse, and *φωνή*, a sound. Fr., *s.* An instrument for rendering the rhythm and variations of the pulse audible, consisting of a small pad that may be adjusted over the radial artery at the wrist. The pad is brought in contact, by means of a nut and screw, with a spring, and the pad and spring are connected with the poles of a microphone. By means of the latter the pulse sounds are transmitted to the ear. [B; a, 34.]

**SPHYGMOSCOPE**, n.  $\text{Sf}^{2g}\text{-mo-skop}$ . Lat., *sphygmoscopium* (from *σφυγμός*, the pulse, and *σκοπεῖν*, to examine). Fr., *s. Ger., Sphygmoskop*. See PULSIMETER.

**SPHYGMOSTOLE** (Lat.), n. f.  $\text{Sf}^{2g}(\text{sfu}^g)\text{-mo}^2(\text{mo}^2)\text{-si}^2\text{s}$ . ( $\text{su}^g$ )/ $\text{to}^2\text{l-e}^2(\text{a})$ . Gen., *-systoles*. From *σφυγμός*, pulsation, and *συστολή*, a drawing together. The difference of time between the cardiac and arterial systole as shown by the sphygmograph. [a, 34.]

**SPHYGMOZOAIRES** (Fr.), n. pl.  $\text{Sfeg-mo-zo-a}^2\text{r}$ . Of Ehrenberg, invertebrates in which there is a circulation of the blood caused by a heart or pulsatile vessels. [L, 231.]

**SPHYGMUS** (Lat.), n. m.  $\text{Sf}^{2g}(\text{sfu}^g)\text{-mu}^2\text{s}(\text{mu}^2\text{s})$ . Gr., *σφυγμός*. See PULSE.

**SPHYRA** (Lat.), n. f.  $\text{Sf}^{2r}(\text{sfu}^r)\text{-a}^2$ . Gr., *σφύρα*. See MALLEUS.

**SPHYROTOMY**, n.  $\text{Sf}^{2r-o}^2\text{t-o}^2\text{m-i}^2$ . From *σφύρα*, a hammer, and *τομή*, a cutting. Fr., *sphérotomie*. Ger., *Sphérotomie*. Of Wreden, excision of part of the handle of the malleus, so as to remove a portion of the blood-vessels supplying the membrana tympani, and thus prevent the re-formation of an excised piece of the latter. It has not proved efficient. [F.]

**SPHYXIS** (Lat.), n. f.  $\text{Sf}^{2x}(\text{sfu}^x)\text{-i}^2\text{s}$ . Gen., *sphyxæos* (-is). Gr., *σφύξις*. See PULSATION.

**SPIC** [Fr. Cod.] (Fr.), n. *Spék*. See LAVANDULA *spica*.

**SPICA** (Lat.), n. f. *Spik*(*spek*)/*a*<sup>2</sup>. Fr., *s. Ger., S. See SPIKE*, *S.-BANDAGE*, and *LAVANDULA s.*—**Essentia spicæ indicæ**. A filtered infusion of spikenard in four times as much alcohol. [B, 119 (a, 38).]—**Gummibindens' (Ger.)**. A rubber s. bandage.—**Inguinal s.** Fr., *s. de l'aîne*. See *S.-BANDAGE for the groin*.—**Oleum (florum) spicæ**. See *Oil of SPIKE*.—**S. alpina**. The *Valeriana celtica* or its root. [a, 35.]—**S. carpi**. See *S.-BANDAGE for the hand*.—**S. celtica**. See *S. alpina*.—**S. coxæ**. See *S.-BANDAGE for the groin*.—**S. cretica**. See *ORIGANUM creticum*.—**S. de l'aîne** (Fr.). See *S.-BANDAGE for the groin*.—**S. dorsl**. See *Chest-BANDAGE*.—**S. duplex**. Of Galen, a kind of bandage encircling both shoulders. [A, 325 (a, 48).]—**S. humeri**. See *S.-BANDAGE for the shoulder*.—**S. indica**. See *NARDOSTACHYS jatamansi*.—**S. inguinalis**. See *S.-BANDAGE for the groin*.—**S. manus**. See *S.-BANDAGE for the hand*.—**S. nardi**. See *NARDOSTACHYS jatamansi*.—**S. pectoris**. See *Chest-BANDAGE*.—**S. pedis**. See *S.-BANDAGE for the foot*.—**S. perinæ**. See *S.-BANDAGE for the perinæum*.—**S. pollicis**. See *S.-BANDAGE for the thumb*.—**S. pro luxatione carpi (seu manus)**. See *S.-BANDAGE for the hand*.—**S. pro luxatione pedis, s. tarsi**. See *S.-BANDAGE for the foot*.—**Tinctura spicæ indicæ**. See *Essentia spicæ indicæ*.

**SPICANARD** (Fr.), n. *Spék-a}na}r*. See SPIKENARD.—**Faux s.** See *ALLIUM victorale*.—**S. commun**. See *LAVANDULA vera*.

**SPICATE**, adj. *Spik*/at. Lat., *spicatus* (from *spicare*, to furnish with spikes). Ger., *ährrig* (1st and 2d def.), *ährenhabend* (1st def.). 1. Provided with a spike. 2. Disposed in spikes. [a, 35.] 3. See SPICIFORM.

**SPICE**, n. *Spis*. Gr., *ἄρωμα*. Lat., *species*. Fr., *épice*. Ger., *Würze*, *Gewürz*. A fragrant or aromatic, pungent vegetable substance, used for flavoring food. [a, 35.]—**S. plaster**. See *EMPLASTRUM aromaticum*.

**SPICEBERRY**, n. *Spis*/be}r}i<sup>2</sup>. See *GAULTHERIA procumbens* and *BENZON odoriferum*.

**SPICED**, adj. *Spist*. Rendered aromatic by means of spice.

**SPICEWOOD**, n. *Spis*/wu}d. See *BENZON odoriferum*.

**SPICIFORM**, adj. *Spis*/i}fo}rm. Lat., *spiciformis* (from *spica*, a spike, and *forma*, form). Fr., *spiciforme*. Resembling or having the form of a spike. [a, 35.]

**SPICKE** (Ger.), n. *Spék*/e<sup>2</sup>. See LAVANDULA *spica*.—**Indische S.** See SPIKENARD.

**SPICKNEL**, n. *Spik*/ne}l. See *MEUM athamanticum*.

**SPLICULATE**, adj. *Spik*/u}l-at. Lat., *spiculatus* (from *spiculum* [q. v.]). Fr., *spiculé*. 1. Covered with spicules. 2. Having the form of a spicule. 3. Of a spike, composed of many sessile spikelets applied closely to the axis. 4. Of a leaf, cordato-hastate or cordato-sagittate. [a, 35.]

**SPICULE**, n. *Spik*/u}l. Lat., *spiculum* (dim. of *spica*, a point). Fr., *s. épillet* (2d def.). Ger., *Aehrchén* (2d def.). 1. A fine, erect point. 2. A spikelet of grasses and sedges; a cluster of one or more flowers forming one of the little spikes of a compound spike. 3. A sterigma. 4. An acicular crystal. [a, 35.] 5. See *SPICULUM* (1st def.).—**Bony s., Osseous s.** One of the minute rod-like processes of bony matter which extend in a radiating manner from the centre of ossification. [J, 24, 30.]

**SPICULUM** (Lat.), n. n. *Spik*(*spek*)/u}l(u}l)-u}m(u}m). 1. A pointed, needle-shaped body. [a, 27.] 2. See *Bony spicule*.—**S.**

**amoris**. A love-dart; a copulatory dart-like organ in some gastropods and worms. [a, 48.]

**SPIDER**, n. *Spid*'u<sup>r</sup>. Gr., ἀράχνη, ἀράχνης. Fr., araignée. Ger., Spinne. See ARANEA (1st def.) and cf. COWEB.—**Itch-s**. See SARCOPTES scabiei.

**SPIDERWORT**, n. *Spid*'u<sup>r</sup>-wu<sup>r</sup>t. The genus *Tradescantia*.

**SPIEGEL** (Ger.), n. *Speg*'e<sup>l</sup>. See MIRROR and SPECULUM.—**Gebärmutter's**. See VAGINAL SPECULUM and UTERINE SPECULUM.—**Kehlhopf's**. See LARYNGOSCOPE.—**S'kunst**. See CATOPTICS.—**S'untersuchung**. Examination by means of a speculum. [a, 48.]

**SPIERAPFEL** (Ger.), **SPIERBAUM** (Ger.), **SPIERBIRNE** (Ger.), n's. *Sper*'a<sup>3</sup>pf-e<sup>2</sup>l, -ba<sup>3</sup>-u<sup>m</sup>, -ber-n-e<sup>2</sup>. See PYRUS sorbus and PYRUS terminalis.

**SPIERSÄURE** (Ger.), n. *Sper*'zoir-e<sup>2</sup>. See SORBIC ACID.

**SPIERSTAUDE** (Ger.), n. *Sper*'sta<sup>3</sup>-u<sup>d</sup>-e<sup>2</sup>. See SPIREAE.

**SPIESSIG** (Ger.), adj. *Spes*'ig. See ACICULAR.

**SPIESSGLANZ** (Ger.), n. *Spes*'gla<sup>3</sup>nts. See ANTIMONY and ANTIMONY trisulphide.—**Branner S**. See CROCUS ANTIMONI.—**Gewaschener schweisstreibender S**. See ANTIMONIUM diaphoreticum lotum.—**Grauer oxydulter S**, **Grauer Sauers'** (oder S'kalk), **Graues S'oxyd**, **Graues S'oxydul**. See ANTIMONY ash.—**Graus'erz**. See ANTIMONIUM diaphoreticum lotum.—**Weiss'erz**. See ANTIMONY trioxide.

**SPIESSGLAS** (Ger.), n. *Spes*'gla<sup>3</sup>s. See ANTIMONY.

**SPIGELIA** (Lat.), n. f. *Speg*'e<sup>2</sup>l'i<sup>2</sup>-a<sup>3</sup>. From A. van der Spiegel, a Belgian anatomist. Fr., *spigèle* (1st def.), *spigélie* (1st def.). Ger., *Spigelle* (1st def.). 1. A genus of the Loganiaceae. The *Spigelleae* are a tribe of the Loganiaceae. The *Spigeliaceae* are an order of plants. The *Spigeliaceae* are: Of Dumortier, a tribe of the Gentianaceae; of Bentham and Hooker, a subtribe of the Eulogiaceae. 2. (Indiana) pinkwort; in the U. S. Ph., the rhizome and rootlets of *S. marilandica*. [a, 35.]—**Extractum spigellie fluidum** [U. S. Ph.]. A fluid extract made by moistening 100 grammes of s. in No. 60 powder with 30 of alcohol of sp. gr. 0.928, exhausting in a percolator with more of the alcohol, reserving 85 c.c., evaporating the rest to a soft extract, mixing the two, and bringing up to 100 c.c. with more of the alcohol. [B, 95 (a, 38).]—**Herba spigellie** (Belg. Ph.). Fr., *spigélie anthelminthique* [Fr. Cod.]. The flowering plant of *S. anthelminthica*. [B, 95 (a, 38).]—**Infusum spigellie** [U. S. Ph., 1870]. An infusion of s. in twelve times as much boiling water, strained after two hours. [B, 119 (a, 38).]—**S. anthelmia**, **S. anthelminthica**, **S. arabaca**. Fr., *spigelle anthelmintique* ou *anthelminthique* [Fr. Cod.], *brainwillière*. Ger., *Wurmkraut*, *wurmtreibende Spigelle*. Pinkroot of Demerara; a common weed in the West Indies and South America. It has the properties, though in greater degree, of *S. marilandica*. Both the root and the herb, *radix et herba spigellie* (*anthelmie*, seu *arabaca*), are used. [a, 35.]—**S. glabrata**, **S. laurina**. Fr., *spigélie glabre*. Ger., *kahl* (oder *glänzende*) *Spigelle*. A suffrutescent species growing in Brazil. Its root, which tastes and smells like *Valeriana officinalis*, is used as an excitant, diaphoretic, and anthelmintic. [a, 35.]—**S. lonicea**, **S. marilandica**. Fr., *spigélie de Maryland*, *willét de la Caroline*. Ger., *marylandische Spigelle*, *indianischer Pink*, *Gegenblattpigelle*, *marylandisches Wurmkraut*. Carolina (or Indian) pink, worm-grass; a perennial herb growing in the southern and southwestern United States. Its rhizome and the rootlets constitute the s., or pinkroot, of the U. S. Ph. In overdoses this is an acro-narcotic poison. It is said to be alterative and tonic, but is mainly used as an anthelmintic. The herb and leaves are less active. [a, 35.]

**SPIGÉLIE** (Fr.), n. *Spé*'zha-le. See SPIGELIA.—**S. anthelminthique**. See *Herba spigellie*.

**SPIGELINE**, n. *Spig*'e<sup>2</sup>l-en. Fr., *spigéline*. Ger., *Spigelin*, *Spigelibitter*. A reddish brown, bitter, acrid, nauseous substance regarded as the active principle of the root of *Spigelia anthelmia*; according to Dudley, a volatile alkaloid. It is neutral, uncrystallizable and very deliquescent, and acts as a purgative, producing also vertigo and intoxication. [B, 38, 48, 93 (a, 14, 35).]

**SPIGEL, n.** *Spi*'g'ne<sup>2</sup>l. See MEUM athamanticum.

**SPIKE**, n. *Spik*, Lat., *spica*, Fr., *épi* (1st def.). Ger., *Aehre* (1st def.). 1. A form of indeterminate anthotaxis in which the flowers are sessile, or nearly so, and are arranged on an elongated axis. 2. In the *Equisetinae*, the fruiting cone, consisting of compactly arranged modified leaves (sporophylls) elevated centrally on a short stalk. [a, 35.] 3. See LAVANDULA *spica*. 4. See SPIKENARD.—**Compound s.** A collection of spikes (spikelets) arranged in a racemose manner. [a, 35.]—**Oil of s.** Lat., *oleum (lavandulae, seu florum) spicae*. Ger., *Spiköl*, *Spieköl*. The essential oil of *Lavandula spica*.

**SPIKED**, adj. *Spikd*. See SPICATE.

**SPIKELET**, n. *Spik*'le<sup>2</sup>t. See SPICULE (2d def.).

**SPIKENARD**, n. *Spik*'na<sup>2</sup>rd. Ger., *Spiek*, *Spieke*. The *Nardostachys jatamansi* or its root. [a, 35.]—**Celtic s.** The *Valeriana celtica* or its root. [a, 35.]—**Indian s.** See *S. Jamaica s.* See HYPTIS *ebrectata*.

**SPILANTHES** (Lat.), n. f. *Spil*'a<sup>2</sup>nth(a<sup>2</sup>nth/ez(as). Gen., -anth'ia. From σπῖλος, a spot, and ἄνθος, a flower. Written also *spilanthus*. Fr., *spilanthe*. Ger., *Fleckblume*. The typical genus of the *Spilantheae*, which are a subdivision of the *Heliantheae*. [a, 35.]—**Capitula et folia spilanthis**, **Herba spilanthis** (Ger. Ph., 1st ed.). Fr., *cresson de Parad* [Fr. Cod.]. The leaves and flowering tops [Fr. Cod.] (flowering herb [Ger. Ph., Austr. Ph., Hung. Ph.]) of *S. oleracea*. [B, 95 (a, 38).]—**S. acmella**. Fr., *abécdaire*, *cresson de l'île de France*, *herbe de Malacca*. Ger., *wahre Fleckblume*, *indianisches Harnkraut*. The alphabet-plant of the East Indies; a bitter balsamic herb introduced into many tropical countries. The herb and seed, *herba et semen acmelle* (seu *acmellæ*, seu *acmellæ*, seu *atmellæ*, seu *spilanthis*), especially the herb, are diuretic, diaphoretic, and antiscorbutic. The leaves are powerfully sialagogue. In India they are given to infants to munch, under the belief that this will enable them to talk the more readily. [a, 35.]—**S. alba**. Ger., *weisse Fleckblume*. A Peruvian species having the same properties as *S. oleracea*; used especially as a sialagogue. [a, 35.]—**S. ciliata**. Fr., *spilanthe ciliée*, *herbe aux serpents*. An antiscorbutic species of tropical America. In Brazil it is regarded as possessing the properties of guaco. The juice is used in snake-bites. [a, 35.]—**S. oleracea**. Fr., *cresson de Parad* [Fr. Cod.] (ou *du Brésil*). Ger., *kressenartige Fleckblume*, *Para-Kresse*. *Para cress*; a pungent salad plant said to be indigenous to the East Indies, but found also wild in South America. The leaves and flower-heads contain spilanthin, and are powerfully sialagogue. They are used in odontalgia, in affections of the gums and throat, in India, with *Inula bifrons*, in the preparation of certain dentifrices, as an antiscorbutic, stimulant, hydragogue, etc. [a, 35.]—**S. pseudo-acmella**. Ger., *falsche Fleckblume*. An East Indian species often confounded with *S. acmella*, and having probably the properties of the latter. [a, 35.]—**S. urens**. Fr., *spilanthe brûlante*. A very pungent East Indian species; used especially as a masticatory and in odontalgia. [a, 35.]—**Tinctura spilanthis composita**. A tincture made by digesting 40 parts of fresh [Hung. Ph., Austr. Ph.] (dried [Ger. Ph., 1st ed., Swiss Ph.]) herb of *S. oleracea* with 40 of the root of *Anacyclus officinarum* and 200 of dilute alcohol for a week [Swiss Ph.] (for 8 days [Ger. Ph.]), or with 20 of the root of *Anacyclus officinarum* and 120 of 90-per-cent. alcohol for three days [Austr. Ph., Hung. Ph.]; or by macerating 333 parts of the herb of *S. oleracea* and 165 of the root of *Anacyclus officinarum* in 1,000 of 92-per-cent. alcohol for six days [Belg. Ph.]. [B, 95 (a, 38).]

**SPILANTHIN**, n. *Spil*'a<sup>2</sup>nth'i<sup>2</sup>n. Fr., *spilanthine*. Ger., *S*. An acrid crystalline principle obtained from *Spilanthes oleracea*.

**SPILANTHUS** (Lat.), n. m. *Spil*'a<sup>2</sup>nth(a<sup>2</sup>nth/u<sup>2</sup>s(u<sup>2</sup>s). See SPILANTHES; of the Austr. Ph. and Hung. Ph. See *Herba spilanthis*.—**Herba (et semen) spilanthis**. See under SPILANTHES *acmella*.—**Tinctura spilanthis (oleraceae) composita**. See *Tinctura spilanthis composita*.

**SPIILLBAUM** (Ger.), n. *Spil*'ba<sup>3</sup>-u<sup>m</sup>. See EUCONYMUS (1st def.) and RHAMNUS *frangula*.

**SPILOMA** (Lat.), n. n. *Spil*'om'a<sup>3</sup>. Gen., -om'atos (-atis). Gr., σπῖλον. See SPILUS.

**SPILOPLANIA** (Lat.), n. f. *Spil*'o(o<sup>3</sup>)-plan(pla<sup>2</sup>n)'i-a<sup>3</sup>. From σπῖλος, a spot, and πλάνη, a wandering. 1. Elephantiasis Græcorum. 2. Erythema fugax. [a, 34.]

**SPILOPLAXIA** (Lat.), n. f. *Spil*'o(o<sup>3</sup>)-pla<sup>2</sup>x(pla<sup>2</sup>x)'i-a<sup>3</sup>. From σπῖλος, a spot, and πλάξ, a plate. Fr., *spiloplasie*. Ger., *Spiloplasie*. See LEPROSY.—**S. indica**. The leprosy of India. [L.]—**S. scorbutica**. See ROSE of the Asturias.—**S. vulgaris**. See LEPROSY.

**SPILOSIS** (Lat.), n. f. *Spil*'os'is. Gen., -os'eos (-is). Fr., *spilose*. Ger., *Flecksucht*. See EPICHRISIS.—**S. permanens**. See SPILUS.

**SPILOS** (Lat.), n. m. *Spil*(spil)'u<sup>2</sup>s(u<sup>2</sup>s). Gr., σπῖλος. A spot, stain, or macule. [G.] See XANTHUS *pigmentosus*.

**SPINA** (Lat.), n. f. *Spin*'en'a<sup>2</sup>. 1. See SPINE. 2. Any one of various thorny plants. 3. Of Scopoli, a section of the genus *Mespilus*. [a, 35.]—**S. accessoria Ischii**. An anomalous process projecting from the sacro-iliac synchondrosis into the great sciatic notch. [L.]—**S. alba**. The *Onopordium acanthium*, *Rhamnus catharticus*, *Lycium europæum*, *Mespilus oxyacantha*, or *Silybium marianum*. [a, 35.]—**S. angularis**. Ger., *Wespenbeinstachel*. The spinous process of the ala magna of the sphenoid bone. [L.]—**S. anterior inferior ossis IIII**. See *Anterior inferior spine of the ilium*.—**S. anterior superior ossis IIII**. See *Anterior superior spine of the ilium*.—**S. basilaris**. See *Pharyngeal spine*.—**S. bicipitalis**

**externa.** See *S. tuberculi majoris*.—**S. biclipsis interna.** See *S. tuberculi minoris*.—**S. bifida.** See the major list.—**S. cervicalis.** **S. cervaria.** **S. cervina.** See *RHAMNUS catharticus*.—**S. condyli externi femoris.** See *LABIUM laterale cristae ossis femoris*.—**S. condyli interni femoris.** See *LABIUM mediale cristae ossis femoris*.—**S. condyloidea externa.** See *External condylar ridge*.—**S. condyloidea interna.** See *Internal condylar ridge*.—**S. cruciata.** See *SPINE of the tibia*.—**S. Darwinii.** See *SPINE of Darwin*.—**S. domestica.** See *RHAMNUS catharticus* and *RHAMNUS frangula*.—**S. dorsi.** The vertebral column. [A. 47.]—**S. ethmoidalis.** See *Ethmoidal spine*.—**S. frontalis.** See *Frontal crest* and *Nasal spine* (1st def.).—**S. frontalis interna.** See *Frontal crest*.—**S. heliis.** 1. A slight projection on the lower anterior margin of the helix. [L. 2.] 2. See *CRURA bifurcata* (under *CRUS*).—**S. ilio-pectinea.** See *Ilio-pectineal line*.—**S. intercondyloidea.** **S. intermedia.** See *SPINE of the tibia*.—**S. ischiadica.** **S. ischii.** See *SPINE of the ischium*.—**S. jugularis.** A sharp elevation on the jugular process of the occipital bone. [L. 332.]—**Spinae mentales internae.** See *Genial tubercles*.—**S. mentalis externa.** The mental protuberance.—**S. muscularis inferior.** An elevation on the outer surface of the arytenoid cartilage near its lower third. [L. 31.]—**S. muscularis superior.** A blunt, knot-like prominence near the upper part of the external surface of the arytenoid cartilage. [L. 31.]—**S. musculi teretis majoris.** An anomalous blunt, tooth-like projection of the anterior border of the scapula for the attachment of the *teres major*. [L. 332.]—**Spinae mustelae piscis.** See under *LOTA vulgaris*.—**S. nasalis.** See *Nasal spine*.—**S. nasalis anterior.** See *Anterior nasal spine*.—**S. nasalis externa** (seu *ossis frontis*). See *Nasal spine* (1st def.).—**S. nasalis ossis maxillaris superioris.** See *Anterior nasal spine*.—**S. nasalis palatina** (seu *posterior ossis palatini*). See *Posterior nasal spine*.—**S. nasalis superior.** See *Nasal spine* (1st def.).—**S. navicularis.** An anomalous process at the union of the external and inferior surfaces of the scaphoid bone of the foot. [L. 332.]—**S. neuralis.** See *Neural spine*.—**S. occipitalis (exterior).** See *External occipital protuberance*.—**S. occipitalis interna.** See *Internal occipital protuberance*.—**S. orbitalis inferior.** A slight prominence below the s. orbitalis superior. [L.]—**S. orbitalis superior.** A slight prominence on the border of the ala magna of the sphenoid bone, projecting into the sphenoidal fissure at the point where it is slightly constricted. [L. 332.]—**S. ossis illi anterior superior.** See *Anterior superior spine of the ilium*.—**S. ossis ischii.** See *SPINE of the ischium*.—**S. ossis pubis.** See *SPINE of the pubes*.—**S. pedum.** See *CLAVUS* (1st def.).—**S. pharyngea.** See *Pharyngeal spine*.—**S. posterior inferior ossis illi.** See *Posterior inferior spine of the ilium*.—**S. posterior superior ossis illi.** See *Posterior superior spine of the ilium*.—**S. pubis.** See *SPINE of the pubes*.—**S. recti lateralis.** See *S. orbitalis superior*.—**S. scapulae.** See *SPINE of the scapula*.—**S. solutiva.** See *RHAMNUS catharticus*.—**S. sphenoidalis.** See *S. angularis*.—**S. tibiae.** See *SPINE of the tibia*.—**S. transversa.** See *S. muscularis inferior*.—**S. trochanterica major.** See *LABIUM laterale cristae ossis femoris*.—**S. trochanterica minor.** See *LABIUM mediale cristae ossis femoris*.—**S. trochlearis.** See *TROCHLEA*.—**S. tuberculi majoris (humeri).** The ridge forming the external margin of the bicipital groove. [L.]—**S. tuberculi minoris (humeri).** The ridge forming the inner margin of the bicipital groove. [L.]—**S. tympanica anterior.** A prominent point on the anterior and upper part of the tympanic ring, at the anterior end of a ridge forming the upper boundary of the sulcus malleolaris. [F. 33.]—**S. tympanica major.** Of Helmholtz, the s. tympanica postica of the foetal temporal bone. It is the anterior point of insertion for the ligaments supporting the malleus in the developed organ. [F. 33.]—**S. tympanica minor.** Of Helmholtz, a point on the posterior-superior portion of the annulus tympanicus, which forms the posterior point of insertion for the suspensory ligaments of the malleus. [F.]—**S. tympanica posterior** (seu *postica*). See *S. tympanica major*.—**S. ventosa.** Ger., *Winddorn*. 1. A disease of the bones which causes them to dilate as if distended with air (cf. *OSTEOMALACIA*). 2. A bony tumor due to internal caries, generally confined to the wrist or ankle. [E.]—**S. vertebrae.** **S. vertebralis.** See *SPINOUS PROCESS of a vertebra*. [L.]—**S. vestibuli.** See *CRISTA vestibuli*.—**S. zygomatica.** An offshoot from the zygomatic process of the superior maxilla which aids in forming the sphenomaxillary fissure. [L.]—**Syrupus spinæ cervinae.** A syrup made by boiling equal parts of sugar and the purified juice of *Rhamnus catharticus* to the proper consistence. [B. 119 (a. 38).]

**SPINA BIFIDA** (Lat.), n. f. *Spin*(spen)-a<sup>3</sup> bi(bi)<sup>2</sup>/fi<sup>2</sup>d-a<sup>3</sup>. Ger., *Rückenspalte*, *Rückgratsspalte*. A congenital malformation caused by absence or deficiency of the laminae or spinous processes of some of the vertebrae, usually associated with a sacculated protrusion of the membranes of the spinal cord. The sac contains cerebro-spinal fluid and sometimes a portion of the cord. [a. 31.]—**False s. b.** Any congenital tumor communicating with the spinal canal but not with the spinal membranes. [E. 4.]—**Pelvic s. b.** S. b. in which the cleft is in the anterior surface of the vertebral column, the sac presenting in the pelvis. [T. G. Thomas, "Gaillard's Med. Jour.," Mar., 1885, p. 237 (a. 34).]—**S. b. aperta.** S. b. associated with fissure of the superficial tissues. [A. 319 (a. 34).]—**S. b. cervicalis.** S. b. of the cervical vertebrae. [A. 319 (a. 34).]—**S. b. crânien** (Fr.). An encephalocele associated with a hydromeningocele. [Dalbaune, "Lyon méd.," Oct. 4, 1885, p. 143 (a. 34).]—**S. b. cystica.** S. b. with the protrusion of a cyst through the fissure. [L. 57 (a. 34).]—**S. b. dorsalis.** S. b. of the dorsal vertebrae. [A. 319 (a. 34).]—**S. b. lumbalis.** S. b. of the lumbar vertebrae. [A. 319 (a. 34).]—**S. b. lumbosacralis.** S. b. of the lumbosacral region. [A. 319 (a. 34).]—**S. b. occulta.** That variety in which the bony deficiency is present, but no tumor.—**S. b. sacralis.** S. b. of the sacral vertebrae. [A. 319 (a. 34).]

**SPINACH**, n. *Spī*<sup>2</sup>n/e<sup>2</sup>. The genus *Spinacia*, especially *Spinacia oleracea*. [a. 35.]—**Garden s.** See *SPINACIA oleracea*.—

**New Zealand s.** The *Tetragonia expansa* and *Tetragonia implexicoma*. [a. 35.]—**Wild s.** The *Chenopodium bonus Henrius*, *Chenopodium album*, *Beta maritima*, or *Campanula latifolia*.

**SPINACIA** (Lat.), n. f. *Spī*<sup>2</sup>n(spen)-as(a<sup>3</sup>k)<sup>2</sup>/i<sup>2</sup>-a<sup>3</sup>. From *spina*, a spine. Fr., *épinard*. Ger., *Spinat*. Spinach (or spinage); a genus of the *Chenopodiaceae*. The *Spinaciae* are a tribe of the suborder *Cycloboae* (cf. *ATRIPLICEAE* [3d def.]). [a. 35.]—**S. glabra.** **S. inermis.** Fr., *épinard lisse*, *grand* (ou *gros*) *épinard*, *épinard de Hollande*. Ger., *glattfrüchtiger Spinat*. Round-seeded spinach; a culinary herb indigenous to the East Indies, usually regarded as a variety of *S. oleracea*, the properties of which it possesses. [a. 35.]—**S. oleracea.** **S. spinosa.** Fr., *épinard cultivé* (ou *commun*). Ger., *stachelfrüchtiger Spinat*, *Gemüsespinat*. Garden spinach; supposed to be indigenous to western Asia. The herbaceous parts, *herba spinaciae* (seu *spinachia*, seu *lapathi hortensis*), are mildly laxative; they are used as an emollient poultice. [a. 35.]

**SPINAL**, adj. *Spī*<sup>2</sup>n'l. Gr., *ῥαχίτης*. Lat., *spinalis*. Pertaining to the vertebral column.

**SPINALIS** (Lat.), adj. *Spin*(spen)-al(a<sup>3</sup>l)<sup>2</sup>/i<sup>2</sup>s. From *spina*, the spine. Spinal; as a n. (Ger., *Dornmuskel*), a muscle arising from or inserted into spinous processes of the vertebrae.—**S. capitis.** See *RECTUS capitis posticus major*.—**S. cervicis.** **S. colli.** Fr., *élevateur épineux de la nuque*. Ger., *Dornmuskel des Halses*. A muscle arising from the spinous processes of the fifth and sixth cervical vertebrae, occasionally from those of one or two dorsal vertebrae, and inserted into the spines of the axis and an irregular number of the vertebrae below. [L. 31, 142, 332.]—**S. dorsi (major).** Fr., *élevateur épineux du dos*. Ger., *Dornmuskel des Rückens*. A long, narrow muscle arising from the lateral surface of the spinous processes of the two upper lumbar and two lower dorsal vertebrae, and inserted into the spinous processes of from 4 to 8 upper dorsal vertebrae. [L. 31, 143, 332.]—**S. lumborum.** See *LONGISSIMUS dorsi*.

**SPINAT** (Ger.), n. *Spen*-a<sup>3</sup>t'. See *SPINACIA*.

**SPINDEL** (Ger.), n. *Spī*<sup>2</sup>d/e<sup>2</sup>l. See *SPINDLE*, *MODIOLUS* (1st def.), and *RHACHIS* (3d def.).—**Furchungss'.** See *Nuclear SPINDEL*.—**Kerns'.** See *Nuclear SPINDEL* and *Achromatic figure*.—**Muskels'n.** 1. Of Bremer, young motor end-plates. 2. Of Kölliker, young or incompletely developed striated muscular fibres. 3. Of Kraske, parts of degenerating striated muscular fibre. 4. Striated muscular fibres. [J. 35.]—**Richtungss'.** See *Nuclear SPINDEL*.—**S'bein.** The radius.—**S'blatt.** See *LAMINA spiralis ossea*.—**S. der Schnecke.** See *MODIOLUS* (1st def.).—**S'element.** A fusiform anatomical element. [J.]—**S'förmig.** See *FUSIFORM*.—**S'taar.** See *FUSIFORM CATARACT*.—**Theilungss'.** See *Nuclear SPINDEL*.

**SPINDLE**, n. *Spī*<sup>2</sup>n/d'l. A.-S., *spindel*. Lat., *fusus*. Fr., *fuseau*. Ger., *Spindel*. 1. The tapering rod or pin on which the thread is wound in spinning. 2. Anything of s-like shape (cf. *FUSIFORM*). [a. 48.]—**Achromatic s.** **Caryocinet s.** See *Nuclear s.*—**Cleavage s.** See *Nuclear s.* and *AMPHIASTER* (1st def.).—**Muscle s's.** See *MuskelsPINDELN*.—**Nuclear s.** **Nucleated s.** **Nucleus s.** **Segmentation s.** Fr., *fuseau nucléaire*, *amphias tre de rebut*. Ger., *Kernspindel*, *achromatische Fadenspin del*. Of Bütschli, the striated s-shaped or double cone-like appearance of the nucleus, especially in ova, during indirect division or caryocinesis. The striæ (achromatic fibrils) are supposed to be formed of the achromatin of the nucleus, with perhaps an admixture of protoplasm from the cell-body. They extend in a curved direction from pole to pole of the nucleus, and the nuclear fibrils move along these lines to the poles, where the daughter nuclei are formed. At the ends of the nuclear s. faint striæ are often seen, radiating outward and giving something the appearance of a sun or star (see *AMPHIASTER* [1st def.]). [J. 1, 30, 32; "Quart. Jour. of Micr. Sci.," 1876-1884; "Archiv. f. mikr. Anat.," 1878-1884 (J.).]—**Thiersche's s.** (Ger.). A small s-shaped object having an aperture in the centre for the passage of a ligature thread; used to secure apposition of tissues in ligaturing. [a. 34.]

**SPINE**, n. *Spin*. Gr., *ᾰκνῆα* (1st def.), *ῥάχis* (2d def.). Lat., *spina*. Fr., *épine* (1st def.), *colonne vertébrale* (2d def.). Ger., *Dorn*, *Gräte*, *Stachel* (all 1st def.), *Rückgrat* (2d def.). 1. A hard sharp projection. 2. The vertebral column; so called from the spinous processes of the vertebrae. [C.] 3. In fishes, a non-jointed fin ray. [L. 341 (a. 27).]—**Anterior inferior s. of the ilium.** Fr., *épine iliaque antérieure et inférieure* (ou *antéro-inférieure*). Ger., *vorderer unterer Darmbeinstachel*. A rough eminence on the margin of the ilium immediately above the acetabulum. [L.]—**Anterior nasal s.** The inferior sharp edge of the nasal crest of the superior maxilla. [L.]—**Anterior superior s. of the ilium.** Fr., *épine iliaque antérieure et supérieure*. Ger., *vorderer oberer Darmbeinstachel*. The anterior termination of the crest of the ilium. [L.]—**Cleft s.** **Cloven s.** See *SPINA BIFIDA*.—**Cruciate s.** See *S. of the tibia*.—**Ethmoidal s.** A slight projection in the middle line of the anterior border of the body of the sphenoid bone, which articulates with the cribriform plate of the ethmoid bone. [L.]—**External occipital s.** See *External occipital crest*.—**Frontal s.** See *Frontal crest*.—**Hæmal s.** The portion of the hæmal arch of a typical vertebra that closes it in. In the first seven dorsal vertebrae it is represented by the sternum, in the sacral vertebrae by the symphysis pubis, in the occipital vertebra by the manubrium sterni, in the parietal vertebra by the body of the hyoid bone, in the frontal vertebra by the symphysis of the inferior maxilla, and in the nasal vertebra by the premaxilla. [L.]—**Iliac s's.** Ger., *Darmbeinstacheln*. The anterior superior and inferior and the posterior superior and inferior s's of the ilium. [L.]—**Inferior anterior nasal s.** See *Anterior nasal s.*—**Inferior posterior nasal s.** See *Posterior nasal s.*—**Irritable s.** See *SPINAL IRRITATION*.—**Ischiadic s.** **Ischiatic s.** See *S. of the ischium*.—**Mental s's.** See *Genial tubercles*.—**Nasal s.** Ger., *Nasenstachel*. 1. A sharp process which descends in the middle line from the inferior surface of the frontal bone, between the

superior maxillæ. [L.] 2. See *Anterior nasal s.* 3. See *Posterior nasal s.*—*Nasal s. of the palate bone.* See *Posterior nasal s.*—*Nasal s. of the superior maxillary bone.* See *Anterior nasal s.*—*Neural s.* The portion of the neural arch of the typical vertebra that closes it in. It is found in all the vertebrae proper (except the last sacral and the coccygeal) as the spinous process. In the occipital vertebra it is the occipital plate, in the parietal the parietal bones, in the frontal the frontal bone, and in the nasal the nasal bones. [L.]—*Palatine s.* See *Posterior nasal s.*—*Peroneal s.* See *Processus trochlearis calcanei.*—*Pharyngeal s.* Lat., *crista basilaris.* Fr., *épine basilaire.* A short elevation in the middle line of the lower surface of the basilar portion of the occipital bone. [L.]—*Posterior inferior s. of the ilium.* Fr., *épine iliaque postéro-inférieure.* Ger., *hinterer unterer Darmbeinstachel.* A slight eminence on the margin of the ilium immediately above the great sciatic notch. [L.]—*Posterior nasal s.* Ger., *hinterer Nasenstachel.* A prominence formed by the union in the middle line of the elevations upon the posterior internal contiguous margins of the palatal plate of the palate bones. [L., 31, 332.]—*Posterior superior s. of the ilium.* Fr., *épine iliaque postéro-supérieure.* Ger., *hinterer oberer Darmbeinstachel.* The posterior extremity of the crest of the ilium. [L., 31, 332.]—*Pubic s.* See *S. of the pubes.*—*Railway s.* Ger., *Rückenmarkerschütterung nach Eisenbahnunfällen, Eisenbahnkrankheit.* 1. Chronic meningomyelitis consequent upon shock caused by a railway accident. 2. A peculiar train of symptoms following a railway accident. There is initial shock followed by collapse or a period of excitement, there are temperature and pulse disturbances, and the feebleness may terminate in death or there may be temporary improvement that is followed by various functional nervous and mental disturbances. The condition in the latter case may persist for life. No gross lesion can be detected on post-mortem examination. [a, 34.]—*Sciatic s.* See *S. of the ischium.*—*Sphenoidal s.* See *SPINA angularis.*—*S'ache.* See *RACHIALGIA.*—*S. of Darwin.* Ger., *Darwin'scher Vorsprung, Darwin'sches Spitzohr.* A slight projection of the free margin of the helix near the upper part, assumed to represent the inverted upper pointed extremity of the ear of quadrupeds. [L., 142, 332.]—*S. of Spix.* See *LINGULA mandibule.*—*S. of the ischium.* Lat., *spina ischii* (seu *ischiadica*). Fr., *épine ischiatique* (ou *sciatique*). Ger., *Sitzbeinstachel.* An elevation on the posterior border of the ischium just behind the acetabulum. It forms the lower boundary of the great sciatic notch. [L.]—*S. of the pubes.*—*S. of the pubic bone.* Lat., *spina pubis, crista obturatoria.* Fr., *épine du pubis.* Ger., *Schambeinstachel, Schambeinkamm.* The outer termination of the crest of the os pubis. [L., 142, 332.]—*S. of the scapula.* Lat., *spina scapulae.* Fr., *épine de l'omoplate.* Ger., *Schulterkamm.* An osseous plate projecting from the posterior surface of the scapula which extends obliquely upward and outward from a point near the upper fourth of the posterior border to terminate in the acromion process. [L., 31, 142, 332.]—*S. of the sphenoid bone.* See *Ethmoidal s.* and *SPINA angularis.*—*S. of the tibia.* Ger., *Schienbeinkamm.* An elevation on the upper surface of the tibia, between its articular surfaces, which terminates in two tubercles. [L., 142, 332.]—*Superior nasal s.* See *Nasal s.* (1st def.).—*Typhoid s.* An acute inflammation of the peritoneum and the fibrous structures holding the spinal column together, following upon and caused by typhoid fever. [V. P. Gibney, "N. Y. Med. Jour.," Nov. 30, 1889, p. 596 (a, 34).]—*Zygomatic s.* See *SPINA zygomatica.*

**SPINELLA** (Lat.), n. f. *Spīn*(spen)-e'l-lā. Dim. of *spina*, a spine. Fr., *spinelle.* In botany, an appendage intermediate between ordinary hairs and spines; a very rigid hair. [a, 35.]

**SPINESCENT**, adj. *Spīn*-e's-snt. Lat., *spinescens* (from *spinescere*, to grow thorny). Fr., *s.* 1. Ending in a sharp, hard point. 2. Of a leaf, bract, stipule, etc., transformed into a spine.

**SPINI-AXOIDO-OCCIPITAL** (Fr.), n. *Spe-ne-ax-o-e-do-o-x-ep-et-a-l.* See *Rectus capitis posticus major.*

**SPINI-AXOIDO-TRACHIL-ATLOIDIEN** (Fr.), n. *Spe-ne-ax-o-e-do-tra-kā-le-a-t-lo-e-de-a-n.* See *OBLIQUUS capitis major.*

**SPINICEREBRAL**, adj. *Spīn*-i-sē-r'e-b-r'l. Lat., *spinicerebralis* (from *spina*, a spine, and *cerebrum*, the brain). Fr., *spini-cérébral.* See *CEREBRO-SPINAL.*

**SPINI-PUBIO-FÉMORAL** (Fr.), n. *Spe-ne-pu-be-o-fam-o-ra-l.* See *Adductor femoris longus.*

**SPINIRECTOR** (Lat.), n. m. *Spīn*(spen)-i-r'e-kt(r)kt/r'ō-r. Gen., -ō-r'is. From *spina*, the spine, and *rector*, a guider. See *MULTIPLEX spinæ.*

**SPINITIS** (Lat.), n. f. *Spīn*(spen)-i(e)'tī-s. Gen., -it'idos (-idis). Fr., *spinite.* See *SPONDYLITIS.*

**SPINNE** (Ger.), n. *Spīn*'ne. See *SPIDER.*—*Blasenziehende S.* See *CANTHARIS vesicatoria.*—*S'ngewebe.* See *COWBEE.*

**SPINNERET**, n. *Spīn*'e-r'et. Fr., *filière.* See *ARACHNIDUM.*

**SPINNERULES**, n. pl. *Spīn*'e-r'ū-lz. The glandular ducts of the arachnoidal papillæ (see under *ARACHNIDUM*). [B.]

**SPINOCOSTALIS** (Lat.), n. m. *Spīn*(spen)-ō-s'tāl(a)'l. From *spina*, the spine, and *costa*, a rib. A muscle connected with the vertebrae and the ribs. [L.]—*Spinocostales longi.* The serrati postici inferior and superior. [L., 332.]

**SPINOLA** (Lat.), n. f. *Spīn*(spen)-ō-lā. Dim. of *spina*, the spine. See *SPINA BIFIDA.*

**SPINOMETER**, n. *Spīn*'o-m'e-t'r. From *spina*, the spine, and *metron*, a measure. See *RACHIMETER.*

**SPINOTRANSVERSALIS** (Lat.), n. m. *Spīn*(spen)-'o(s)-trāns(trāns)-vēr'sāl(a)'l. From *spina*, the spine, and *transversus*, transverse. See *TRANSVERSOSPINALIS*, *SACROSPINALIS*, and *SPLENIUS.*—*Spinotransversales brevissimi.* See *TRANSVERSOSPINALIS breves.*

**SPINOTRANSVERSARIUS** (Lat.), n. m. *Spīn*(spen)-'o(s)-trāns(trāns)-vēr'sār(i)'s. A muscle connected with the transverse processes of the vertebrae. [L.]—*Spinotransversarii longi.* The splenius capitis, splenius cervicis, and obliquus capitis major. [L., 332.]

**SPINOUS**, adj. *Spīn*'u's. Lat., *spinus* (from *spina*, a spine). Fr., *épineux.* Ger., *dornig.* Pertaining to a spine or sharp process of a bone; having or constituting such a process or processes. [C.]

**SPINTHERISMUS** (Lat.), n. m. *Spī*'nth-e'r(ar)-i-z(iz)'m'us. (mu's). From *σπινθηρίσσειν*, to emit sparks. 1. The production or emission of sparks. [L., 50 (a, 14).] 2. See *PHOTOPSIA.*

**SPINTHEROMA** (Lat.), n. n. *Spī*'nth-e'r(thar)-om'a's. Gen., -om'atos (-atis). From *σπινθίρ*, a spark. Of blazius, ocular scintillation produced by cholesterolin deposits. [a, 34.]

**SPINTHEROPIA** (Lat.), n. f. *Spī*'nth-e'r(ar)-op'i'a's. From *σπινθίρ*, a spark, and *ὥπη*, the eye. Fr., *spintéropie.* See *PHOTOPSIA.*

**SPINULOSE**, adj. *Spī*'n'u-l'os. Lat., *spinulosus* (from *spīnula*, a small thorn). Fr., *spinuleux.* Spiny; having diminutive spines. [a, 35.]

**SPIRA** (Lat.), n. f. *Spir*(sper)'a's. Gr., *σπείρα.* 1. A spiral structure. [a, 48.] 2. A cerebral convolution. [I, 3 (K).]—*S. cerebri.* See *S.* (2d def.).

**SPIRACLE**, n. *Spī*'r'a's-k'l. Lat., *spiraculum* (from *spirare*, to breathe). Fr., *spiracule.* Ger., *Luftloch.* A respiratory opening or pore, such as the blow-hole of a cetacean or one of the openings of the tracheæ in an insect. [B, 28 (a, 27).]

**SPIRÆA** (Lat.), n. f. *Spi*(spe)-re'(rā's'e)-a's. From *σπείρα*, a coil. Fr., *spirée, spirée.* Ger., *Spierteude.* Meadow-sweet; a genus of rosaceous plants. The *Spiræaceæ* are a family of the *Caulingulæ*, now forming a section or tribe (the *Spirææ*, or *Spiræaceæ*) of the *Rosaceæ*. The *Spiræoideæ* are a suborder of the *Rosaceæ*. [a, 35.]—*Flores spirææ* (ulmarie (Belg. Ph.)). Fr., *ulmaire, reine-des-près* [Fr. Cod.]. The flowers of *S. ulmaria*. [B, 95 (a, 38).]—*Oil of s.* Fr., *essence de reine-des-près.* A colorless, aromatic volatile oil obtained from the flowers and herb of *S. ulmaria*. [a, 35.]—*S. aruncus.* Fr., *barbe de chèvre* (ou *de bouc*), *épine de bouc.* Ger., *Waldspierstaude, Waldgeisbart, Waldbocksbart.* Goat's beard. The root, leaves, and flowers, *radix, folia, et flores barbe capræ* were formerly official. [a, 35.]—*S. filipendula.* Fr., *filipendule.* Ger., *knollige Spierstaude, Filipendelwurzel, rother Steinbrech, Erdeicheln, Tropfswurz, Wasserfarnekrut, Dropwort, Italian may, pride of the meadow.* The tuberous root, the leaves, and the flowers, *radix, herba* (seu *folia*), *et flores filipendule* (seu *filipendula tenuifolia*, seu *saxifraga rubra*, seu *anemones*, seu *filicis aquaticæ*, seu *osmundæ*), are used. The roots contain tannin and a volatile oil (probably salicyl aldehyde, which is found also in the leaves and stem). They are used as a stimulant, laxative, and mild astringent, and, along with the bark, in rabies. The leaves and flowers are used as a mild tonic and astringent and as a teniafuge. [a, 35.]—*S. salicifolia.* Ger., *weideblättrige Spierstaude.* Queen-of-the-meadow; a shrubby species of eastern Europe and western Asia. The seeds are used as an astringent, and the mildly astringent leaves as a substitute for green tea. [a, 35.]—*S. tomentosa.* Fr., *spirée cotonneuse.* Ger., *filzige Spierstaude.* Hardhack, steepie-bush; a bitter, astringent shrub abundant in the northern United States. The root was once official in the U. S. Ph., but is said to be less active than the leaves and stem. [a, 35.]—*S. ulmaria.* Fr., *ulmaire, ornière, ornière, vignette.* Ger., *Ulm(en) oder Sumpf-) Spierstaude, Krampfkraut, Wurnkraut, Geisbart.* Bitter-sweet, bride-wort, common meadow-sweet; indigenous to Europe and northern Asia and naturalized in North America. It yields oil of s. The root, leaves, and flowers, *radix, herba, et flores reginae prati* (seu *reginae pratensis*, seu *ulmarie*, seu *drimopogonis*, seu *spirææ*, seu *barbe capræ*, seu *barbulæ caprinæ*), are diuretic, tonic, and astringent. The flowers, and probably other parts, yield salicyl aldehyde. [a, 35.]

**SPIREIC ACID, SPIREIN**, n's. *Spi*-re-'i'k. *spi*-re-'i'n. Fr., *acide spiréique, spiréine.* Ger., *Spiräöl, Spiräusäure, Spiräin.* See *SALICYL aldehyde.*

**SPIRAL**, adj. *Spi*'r'l. Lat., *spiralis* (from *σπείρα*, a coil). Ger., *spiralig, spiralförmig, schraubenförmig.* Screw like; turning like the thread of a screw around an axis; of a flower, having the members arranged in a series; as a n. (Ger., *Spirale*), a s. line or structure. [a, 35.]—*Cheese s.* See *SPIRILLUM typhogenum.*—*Curschmann's s's.* See *Leyden's s's.*—*Fundamental s., Generating s., Genetic s.* Fr., *spire génératrice.* In phylloxy, the horizontal projection of an imaginary line winding round an axis either to the right or to the left and passing through the points of insertion of all the leaves on the axis. [a, 35.]—*Leyden's s's.* A thick mesh-work of very delicate fibres, commonly looped round in s's, but occasionally retiform, formed in desquamative catarrh of the bronchi and alveoli. They are often overlaid with epithelium and sometimes with Charcot-Leyden crystals. They may be found in the sputum in pneumonia, asthma, or pulmonary tuberculosis. [a, 34.]

**SPIRALBLATT** (Ger.), n. *Sper*-a'l'blāt. A spiral lamina. [L.]—*Knöchernen S.* See *LAMINA spiralis ossæ.*—*S. der Schnecke.* See *LAMINA spiralis.*

**SPIRAMEN** (Lat.), **SPIRAMENTUM** (Lat.), n'n's. *Spir*(sper)-a-s'm'e'n, -a's-me'n't'um(m). Gen., -am'inis, -men't'um. From *spirare*, to breathe. See *SPIRACLE.*

**SPIRANTHES** (Lat.), n. f. *Spir*(sper)-a'n'th(a'n'th)'ez(as). From *σπείρα*, a coil, and *άνθος*, a flower. Fr., *spiranthe.* Ger., *Drehähre, Blüthenschraube.* Lady's-tresses (or -traces); a genus of orchids. The *Spiranthideæ* are a division of the *Neottia*; the *Spiranthideæ* are a subtribe of the *Neottia*. [a, 35.]—*S. autumnalis.* Ger., *gemeine Drehähre.* Autumn flowering lady's-tresses. The tuberous

roots, *radix triorchidis abeo odorata* (seu *orchidis spiralis*), were formerly used as an aphrodisiac. [a, 35.]—*S. diuretica*. A Chilean species, used in ischuria. [a, 35.]

**SPIRANTHY**, n. *Spiranth*-<sup>12</sup>. An occasional development of a flower in which the parts are twisted. [a, 35.]

**SPIRATION**, n. *Spir-a*'sh'n. Lat., *spiratio* (from *spirare*, to breathe). See **RESPIRATION**.

**SPIRÉE** (Fr.), n. *Spe-ra*. See **SPIRÆA**.

**SPIRÉNE** (Fr.), n. *Spe-ra-en*. See **SALICYL aldehyde**.

**SPIREM**, n. *Spir-e*'m. Lat., *spirema* (from *σπείρα*, a spiral). Fr., *spirème*. Ger., *Mutterkneuel*. In caryocinesis, the phase in which the nuclear figure shows no sign of division into two parts. [L, 351.]

**SPIRICLES**, n. pl. *Spi'r*-(<sup>12</sup>)-k'lz. Fr., *spiricules*. Very attenuated threads in the hairs on the surface of certain seeds and achenea. They uncoil when wetted, and are discharged, along with mucilage, from the hairs. [a, 35.]

**SPIRILLUM** (Lat.), n. *Spi'r*(<sup>12</sup>)-l'z. Dim. of *spira*, a coil. A coiled bacillus; a distinct genus of *Schizomycetes* in some classifications. Some authors include in *S.* only the spirally twisted threads in which the coils are rigid and few in number, giving the name *Spirochæte* to those in which the coils are numerous and not rigid. [a, 35.] Cf. **VIBRIO**.—**Cheese s.** See *S. tyrogenum*.—*S. amyliiferum*. A species living in the syrup of beet-root sugar and giving rise to brisk fermentation. [A, 396 (a, 21).]—*S. attenuatum*. A species of varying length, having three convolutions; found in sea-water. [A, 396 (a, 21).]—*S. cholerae asiatica*. Fr., *bacille-virgule cholérigène*. Ger., *Kommabacillus*. The comma bacillus (see Plate iii, Fig. 16); a species regarded as the causal agent of Asiatic cholera on account of its constant presence in that disease and its absence in other diseases and in health. It is found in the dejecta and intestinal contents, and, according to Nicati and Rietsch, sometimes in the bile-ducts and gall-bladder, but it never occurs in the other organs or in the blood. It has been observed in small numbers on several occasions in the vomit of cholera, but Flüge suggests that in these cases the vomited matter may have been the intestinal contents which had passed into the stomach. The bacilli are usually minute, and curved like a comma, though at times (as almost always in drop cultivations) they form by the continuous adhesion of the individual bacilli long screw-like filaments. These fragments, or individual bacilli, which vary in length from 0.8 to 2  $\mu$  (averaging about 1.5  $\mu$ ) and have a thickness of from  $\frac{1}{4}$  to  $\frac{1}{2}$  their length, are in their youngest state slightly curved or straight, and when more fully developed distinctly curved, sometimes showing a full half-circle. They are usually very active, shooting forward or turning round their axis. The longer spirilla have a slower and more oscillating motion. Under various conditions, as on moist linen or moist earth, they multiply very rapidly. Spore-formation has never been observed with certainty. The *s.* liquefies gelatin slowly, both in punctures and on plates. In punctures it forms a thin tube, funnel-shaped toward the surface of the gelatin, where it has a diameter after 48 hours of about  $\frac{1}{4}$  ctm. The funnel contains liquid the level of which is often lower than the surface of the gelatin. It is not till after from 4 to 6 days that the liquefaction has extended to the margin of the glass at the surface of the gelatin. On the plates it forms after 24 hours at 22° C. very minute white points which appear under a low power of the microscope as small, round, whitish-yellow discs which are so refracting that the surface of the plates seem as if sprinkled with bits of glass. These discs, which have an irregular, wavy, not sharply defined margin, become gradually larger, and retain their color, except that the central point becomes somewhat darker. They form, on liquefying the gelatin, funnels containing fluid, the colonies lying at the bottom of the funnels. After 48 hours' growth at 22° C. these funnels measure hardly 1 mm. in diameter at the surface. On the surface of agar-agar the bacillus forms a grayish-yellow, gelatinous, folded coating without liquefying the substratum. Unlike the *S. Finkler-Prior*, it does not grow at all on potatoes at ordinary temperatures, and at higher temperatures forms only a slight, brownish mucous coating. The organisms develop in large numbers in blood-serum, neutralized meat infusion, and milk, the milk not being sensibly altered in character. According to Flüge, in none of the cultivations is there any development of putrefactive gases or foul odor. Buchner asserts, however, that a foul smell was observable in his cultivations of the bacilli in meat infusions. As the bacilli are sensitive to acids, the nutrient jelly, meat infusions, etc., must be slightly alkaline or accurately neutralized. Though the bacilli develop best when in contact with the oxygen of the air, they grow even where that gas is absent, if other conditions are favorable. No growth occurs below a temperature of 16° C., and at 17° C. only a slight growth (Koch). The gelatin cultivations are usually made between 22° C. and 25° C.; between 30° C. and 40° C. the gelatin is completely liquefied. The bacilli are more sensitive to drying than almost any other bacteria, dying in from 2 to 3 hours at the ordinary temperature if spread out in the air on a cover-glass. Hence infection through the air is impossible, unless perhaps in the exceptional cases where bubbles, detached by agitation from infective fluids, might be carried for short distances by currents of air. The presence of saprophytic bacteria, especially when in excess or when the conditions as regards nutrition, temperature, etc., are unfavorable to the comma bacilli, leads rapidly to the death of the latter. According to Koch, if added to sewage, they can not be found after 24 hours, and in impure water they are said to die in 6 or 7 days except when in very large numbers. They will live even at —10° C.; boiling the fluid containing them, or exposing them for half an hour to a temperature of 60° C., causes their destruction. Alcohol, iron sulphate, hydrochloric acid, and quinine check their development; mercury bichloride and carbolic acid are most effectual in killing them. Natural infection of animals is unknown, and experiments made on them by the usual methods have shown no certain pathogenic action. Rietsch, Koch, and other experi-

menters have, however, caused the death of guinea-pigs with symptoms of cholera by injections of pure cultivations into the intestinal canal after having caused hyperæmia of the intestine and alteration of peristaltic action; and Koch produced similar results in guinea-pigs by first neutralizing the gastric juice with soda and slowing peristaltic movements with opium or alcohol, and then administering pure cultivations by the mouth. In some cases he used, instead of the pure cultivations, the intestinal contents of animals which had been infected and died. There is a case on record in which a physician was taken sick with cholera under circumstances which seemed to preclude all sources of infection other than the pure cultivations of the bacilli upon which he had been working. The virulence is said to be somewhat decreased if the cultivation is carried on for a long time in meat infusion or nutrient jelly kept at from 20° to 25° C. No inoculations with such bacilli, however, have been shown to be protective. [a, 35.]—*S. Cohni*, *S. dentium*. The spirochæte of the saliva; very thin, wavy threads, 10 to 20  $\mu$  long, pointed at the extremities, occurring, along with *Leptothrix buccalis*, in the contents of carious teeth and in the deposit on the teeth. [a, 35.]—*S. Finkler-Prior*. A species obtained by Finkler and Prior from the dejecta of patients with cholera nostras, resembling *S. cholerae asiatica*, but presenting many differences in its mode of development, especially on potatoes, on which it forms within forty-eight hours, at the temperature of the room, a grayish-yellow coating marked by a white border from the substance of the potato. Further, the curved bacilli are somewhat thicker and longer than the cholera bacilli, and show less regularity in their thickness, being often somewhat pointed at their ends and thicker in the middle. In nutrient substrata containing sugar fermentation occurs with the formation of acid, and in all the cultivations a rather foul odor is developed. According to Buchner, it shows a marked tendency to change its form if the condition of the medium is not favorable; for instance, in gelatin to which 5 per cent. of sugar or 2 per cent. of glycerin has been added it sometimes forms spindles, sometimes spheres, and sometimes monad-bodies. As this organism has been found in other situations than the dejecta of cholera nostras (by Miller in a hollow tooth), as it was found by Finkler and Prior only in dejecta that had been kept so long as to undergo putrefaction, as other observers have not found it in the dejecta of cholera nostras at all, and as the experiments with the cultivations on animals show pathogenic action only under complex conditions, and then but rarely, it is probably saprophytic only. [a, 35.]—*S. leucomelænum*. A rare form of *s.* having alternating light and dark spaces. It is found in water over decaying *Algae*. [A, 396 (a, 21).]—*S. Obermeieri*. The *Spirochæte Obermeieri* (see Plate iii, Fig. 18); flexible, colorless threads between 16 and 40  $\mu$  long, found in the blood of patients with relapsing fever. It occurs only during the febrile attacks, and is never found in the secretions and evacuations. The threads are not more than  $\frac{1}{1000}$  of an inch thick, have from 10 to 20 convolutions, and when fresh exhibit active movements, partly unfolding and becoming wavy throughout their entire length. They resist the action of concentrated acetic acid, and are readily stained by certain dyes, such as fuchsin and alkaline methylene blue. Relapsing fever has been produced in man by accidental inoculations from cuts during autopsies; and Koch and Carter inoculated monkeys with the disease (though without true relapses) with human defibrinated blood containing the spirilla, the blood of the animals showing during the febrile attack large numbers of the spirilla. The monkeys were not protected from a recurrence of the disease by one attack. The fever could not be set up by inoculations with blood not containing the spirilla in a living state. [a, 35.]—*S. plicatile*, *S. portæ*. A very active organism found in stagnant water, consisting of thin baculi from 110 to 225  $\mu$  long, with many narrow turns, forming in most cases a double wavy line. The primary turns are equal in size, the secondary often unequal.—*S. rosaceum*. A species forming a red coloring matter; found in excrement that has been kept in water. [A, 396 (a, 21).]—*S. Rosenbergl*. A species consisting of filaments from 4 to 12  $\mu$  long with granules of sulphur; found in brackish water. [A, 396 (a, 21).]—*S. rugula*. See *Vibrio rugula*.—*S. sanguineum*. A species found in brackish, putrescent water; consisting of cylindrical baculi, rounded at the apex, uniflagellate, 3  $\mu$  or more in width, varying in length, usually with 2 turns; its plasma is of a purplish color, and contains numerous granules of sulphur. Zopf refers it to the genus *Beggiatoa*. [a, 35.]—*S. serpens*. Syn.: *Vibrio serpens*. A species occurring, often in dense masses, in stagnant water and various infusions; rapidly moving filaments 0.8 to 1.1  $\mu$  thick, 11 to 28  $\mu$  long, with 3 or 4 regular permanent turns, and not rarely united in chains. [a, 35.]—*S. tenue*. An exceedingly active form often occurring in heaps or zoogloea masses in marsh water, decoctions of plants, and putrid infusions; very thin threads 4 to 15  $\mu$  long, with 2 to 5 turns. [a, 35.]—*S. tyrogenum*. Ger., *Käsespirille*. A species obtained by Deneke from very old cheese, resembling *S. cholerae asiatica*, but with smaller individual bacilli and often smaller screws and somewhat narrower twists in the threads. Moreover, it liquefies gelatin more energetically. It forms in 24 hours on gelatin plates small, white, punctiform colonies appearing under a low power of the microscope as dark greenish-brown discs with sharp outlines which disappear as the gelatin begins to liquefy, the margins becoming lighter and the centre of the discs assuming a dark-yellow color. On agar-agar it forms a yellowish-white layer, but does not develop at all on potatoes. From experiments on animals, the organism is regarded as purely saprophytic. [a, 35.]—*S. undula*. Syn.: *Vibrio undula* (seu *prolifer*). A form very common in putrefying liquids, consisting of threads (1 to 1.5  $\mu$  thick and 8 to 16  $\mu$  long [Saccardo], 1.1 to 1.4  $\mu$  by 8 to 12  $\mu$  [Flüge]) exhibiting "rapid simultaneously turning and twisting movements." Each thread makes from  $\frac{1}{4}$  to 3 or 4 turns. The flagella are long and slightly arched, becoming thinner toward their ends. [a, 35.]—*S. volutans*. A species found in marsh or stagnant water and in a decoction of dead fresh-water snails; threads, sometimes motile, sometimes non-motile, 1.5 to 2  $\mu$  thick, 25 to 30  $\mu$  long, with  $\frac{1}{2}$  to  $\frac{3}{4}$  turns, and

with a distinct flagellum at each end. The threads contain a dark granular matter. [a, 35.]

**SPIRIT**, n. *Spi<sup>tr</sup>rit*. Lat., *spiritus*, *alcoholatum*. Fr., *esprit*, *alcoholat*, *teinture d'essence*. Ger., *Geist*, *Spirit*. 1. Of the alchemists, any light or volatile principle, so called from the fanciful analogy existing between the relation of such a principle to the substance whence it was extracted and the relation of the body to the soul. 2. Alcohol, the volatile principle, or s., of wine; subsequently a term mainly restricted to preparations consisting of alcohol distilled with a volatile substance. Such preparations are now, however, usually made by simply dissolving the volatile substance in alcohol. Used without qualification, s. means distilled s. [B.]—**Adiaphoretic s.** Of Boyle, an alcohol (acetone) obtained by the distillation of wood. [A, 306.]—**Adiaphorous s.** Ger., *Mittel-dingsgeist*, *Weinsteingeist*. An old name for an inodorous liquid obtained by distilling cream of tartar. [A, 322.]—**Animal s's.** The nervous fluid (q. v.) supposed by the ancients to be formed by a mixture of blood and air. [H; K.]—**Ardent s's.** See *Distilled s's*.—**Aromatic s.** See *Aqua aromatica*.—**Bay s.** See *Bay rum*.—**Beguini's volatile s.** Lat., *spiritus sulphuris volatilissimus Beguini*. A blood-red oily liquid described by Beguini in the seventeenth century, prepared by mixing sulphur, quicklime, and sal ammoniac. It consists essentially of a volatile ammonium sulphide, together with an excess of sulphur. [B, 2, 3.]—**Distilled s's.** Alcoholic beverages prepared by distillation. [B.]—**Dyer's s's.** Tin tetrachloride, used as a mordant in dyeing. [B, 3.]—**Ethyl s.** Ger., *Aethylgeist*, *Ethyl alcohol*. [B.]—**Methylated s.** *Methyl s.* See *METHYL ALCOHOL*.—**Nitro-aerial s.** Of Mayou, one of the constituents of the atmosphere, to which he attributed the properties of oxygen; so called from its relation to nitric acid. [Yeo, "Lancet," July 8, 1882, p. 1.]—**Overproof s.** A spirituous liquor containing more alcohol than proof s. [B.]—**Perfumed s.** See *SPIRITUS odoratus*.—**Potato s.** See *AMYL ALCOHOL*.—**Proof s.** Originally, a liquid containing sufficient alcohol to ignite gunpowder moistened with it when the s. was set on fire; now, according to an act of the British Parliament, a spirituous liquor of sp. gr. 0.823077 at 51° F. (i. e., having at that temperature  $\frac{1}{11}$  of the weight of as much water). It contains 49.3 per cent. by weight of alcohol. [B, 3.] See table under *ETHYL ALCOHOL*.—**Pyroacetic s.** Ger., *Brenzessiggeist*. See *ACETONE*.—**Pyroligneous s.** *Pyroxylic s.* See *METHYL ALCOHOL*.—**Rectified s.** See *ETHYL ALCOHOL*.—**S. of Mindererus.** See *Liquor ammonii acetatis*.—**Three-six s.** 1. In general, any aqueous solution of alcohol ranging from 25° to 36° Beaumé, and having usually a strength of 33° Beaumé (= 76 per cent. alcohol). 2. An old commercial term for an alcoholic solution of such strength that 3 volumes of it added to 3 volumes of water made 6 volumes of Holland proof s. (marking 19° Cartier). [B, 38, 81, 97.]—**Underproof s.** A spirituous liquor containing less alcohol than proof s. [B.]—**Wood s.** See *METHYL ALCOHOL*.

**SPIRITUOUS**, adj. *Spi<sup>tr</sup>rit<sup>u</sup>ous*. Lat., *spirituosus*. Ger., *spirituös*. Alcoholic (q. v., 1st and 2d def's); containing alcohol.

**SPIRITUS** (Lat.), n. m. *Spi<sup>tr</sup>rit<sup>u</sup>s* (sp<sup>er</sup>) /i<sup>tr</sup>it<sup>u</sup>s (u's). Gen., *spir<sup>it</sup>us*. See *SPIRIT* and *ETHYL ALCOHOL*.—**Abstractitius s.** Alcohol that has been impregnated with some of the principles of a plant by their distillation together. [A, 305.]—**Bussii s. bezoardicus**. Fr., *esprit (bézoardique) de Bussii*. Syn.: *liquor alcoli volatilissimus composuit*. An old preparation made by distilling 60 parts of s. cornu cervi, 120 of sal ammoniac, 360 of potassium carbonate, 180 of powdered amber, and 7 of essential oil of lemon. [L, 85.]—**Mistura s. vini gallici**. See *Mistura s. vini gallici*.—**S. absolutus**. See *Absolute alcohol*.—**S. acetico-aetherus**. Fr., *ether acétique alcoolisé*, *liqueur anodine végétale*. A mixture of acetic ether with two, three, or four times as much alcohol. [B, 119 (a, 38).]—**S. aetherus**. 1. See *S. ETHERIS*. 2. Ethyl ether. [B, 59.]—**S. aetherus camphoratus**. See *Solutio camphorae atherae*.—**S. aetherus ferratus**. See *Tinctura ferri chlorati atherae*.—**S. aetherus vitriolatus**. See *S. ETHERIS composuit*.—**S. alcoholisatus** [Dan. Ph., Swiss Ph.]. Fr., *alcool à 55° centésimaux* [Fr. Cod.]. Ninety-five-per-cent. alcohol, obtained by treating 90-per-cent. alcohol with potassium acetate or calcium chloride or in other ways, and having a sp. gr. of 0.800 to 0.816. [B, 95 (a, 38).] See also under *ETHYL ALCOHOL*.—**S. alexiterius**. See *S. aromaticus* 1st def.].—**S. ammonio-anisatus**. See *Liquor ammonii anisatus*.—**S. anhaltinus**. See *Aqua anhaltina*.—**S. animalis**. 1. See *Animal spiritus*. 2. Of Raymond Lully, aqueous ammonia. [B.]—**S. animatus**. Ger., *eingesetter Geist*. See *AEOTH* (2d def.).—**S. antihystericus**. A preparation made by digesting 30 grammes of castoreum, 22 of lavender, 11 each of sage and rosemary, 7 of cinnamon, 4 each of mace and cloves, 540 of alcohol, 180 of lavender water, 60 of sal ammoniac, and 90 of potassium carbonate for three days, distilling 450 grammes, and adding 7 of camphor and 30 drops each of the oils of rue and amber; or by digesting 6 parts of asafoetida, 3 of castoreum, 9 each of the herbs of chamomile and rue, and 288 of white wine for 24 hours and distilling 144 parts. [B, 119 (a, 38).]—**S. antiepilepticus**. A preparation made by distilling oil of turpentine with four times as much alcohol by the aid of gentle heat and rejecting the oil that rises to the surface. [B, 119 (a, 38).]—**S. antiparalyticus** [Dan. Ph., Norw. Ph.]. A mixture of 4 parts of rectified oil of amber and 16 of ammonia water with 4 of oil of turpentine, 64 of spirit of camphor, and 72 of liquor ammonii carbonici pyro-oleosi [Dan. Ph.] (with 4 of oil of juniper, 60 of spirit of camphor, and 16 of liquor ammonii carbonici pyro-oleosi [Norw. Ph.]). [B, 95 (a, 38).]—**S. antiscorbuticus Drawitzii**. A preparation made by distilling a mixture of 12 parts of spirit of cochlearia with 72 of calcined vitriol and either 36 of spirit of tartar or 108 of crude tartar; or with 36 of spirit of tartar and 3 of sulphuric acid; or with 6 of pyrotartaric acid and 1 of ether; or with 8 of pyrotartaric acid and 1 of sulphuric acid. [B, 119 (a, 38).]—**S. aperitivus Renoli**. See *S. TARTARI vitriolatus*.—**S. aromaticus**. 1. Of the Russ. Ph., a preparation made by dissolving 10 parts each of oil of lavender and ethereal

oil of nutmeg, 3 each of the oils of cloves, cassia, lemon, fennel, and crisped mint, and 1 part of oil of melissa in 1,728 of 90-per-cent. alcohol, adding 5,184 of 70-per-cent. alcohol, and filtering. 2. Of the Netherl. Ph., see *S. carminativus*. 3. Of the Swiss Ph., see *S. odoratus*. 4. Of the Austr. Ph., Hung. Ph., 2d ed., and Gr. Ph., see *Spiritus MELISSAE composuit*. [B, 95, 119 (a, 38).]—**S. aromaticus ammoniacalis**. See *S. AMMONIAE aromaticus*.—**S. arthriticus Pottli**. Fr., *liniment résolutif*. A preparation made by distilling over the sand-bath 4 parts each of sodium chloride and oil of turpentine slowly mixed with 2 of concentrated sulphuric acid. [B, 119 (a, 38).]—**S. balsamicus**. See *ALCOOLAT de Fioravanti*.—**S. Beguini**. See *Liquor fumans Boylii*.—**S. bezoardicus Bussii**. See *Bussii s. bezoardicus*.—**S. cæruleus**. Fr., *esprit bleu*. A preparation made by distilling 216 parts of a mixture of 384 of brandy and 10 each of wormwood, scordium, savin, and lavender, and adding 3 of verdigris and 36 of water of ammonia. [B, 119 (a, 38).]—**S. camphorato-crocatus**. See *S. VINI camphoratus crocatus*.—**S. camphoratus**. See *S. CAMPHORÆ*.—**S. cardiaca**. An old preparation distilled from a mixture of zedoary, gentian, serpentaria, *Aristolochia rotunda*, and various aromatics with alcohol. [B.]—**S. Carmellitorum**. Ger., *Carmelitegeist*. See *Spiritus MELISSAE composuit*.—**S. carminativus**. 1. A preparation made by distilling after two days' digestion a mixture of 29 parts each of the roots of elecampane and *Carlina acaulis*, laurelberries, fennel, caraway, and anise, 115 each of the tops of rosemary and sweet marjoram, 14 each of pimenta and cinnamon, 11 of orange-peel, and 1,095 of brandy. 2. A preparation made by macerating 25 parts each of cloves, cinnamon, nutmeg, and sweet marjoram, and 50 of coriander-seed with 1,000 of 80-per-cent. alcohol and 540 of water [Belg. Ph.] (with 750 of alcohol of sp. gr. 0.829 and 575 of water [Netherl. Ph.]) and distilling 1,000 parts of sp. gr. 0.787 [Belg. Ph.] (such quantity as is of sp. gr. 0.880 to 0.895 [Netherl. Ph.]). [B, 95, 119 (a, 38).]—**S. carminativus de tribus**. A distilled mixture of 3 parts of fuming spirit of nitre, 26 of strong alcohol, and 18 of spirit of tartar; or of equal parts of crude nitre and white tartar. [B, 119 (a, 38).]—**S. concentratissimus**. Concentrated alcohol. [B, 97.]—**S. concentratus**. See under *ETHYL ALCOHOL*.—**S. concoctivus**. A spirit anciently supposed to perfect the organic processes (e. g., the arterialization of the blood). [Harvey (H).]—**S. de tribus**. *S. diatrion*. See *MIXTURE pyrotartarica*.—**S. dilutus**. Dilute alcohol. See under *ETHYL ALCOHOL*.—**S. formicicus**. Ger., *Ameisenspirit*. See *S. FORMICARUM*.—**S. fumans Glauberi**. Hydrochloric acid. [B, 270 (a, 38).]—**S. fumans Libavii**. Tin tetrachloride. [B.]—**S. genitalis**. See *AURA seminalis*.—**S. iack** (Ger.). An alcoholic solution of shellac. It has been used as a dressing. [A. S. Toporoff "Russkaja Med." "Ctbl. f. Chir." Nov. 7, 1885, p. 781.]—**S. Mindereri**. See *Liquor ammonii acetatis*.—**S. mineralis**. The carbonic acid contained in effervescing mineral waters. [B, 2.]—**S. morbi**. A morbid principle. [Paracelsus (H).]—**S. muriatico-aetherus**. Hydrochloric ether. [B, 119 (a, 38).]—**S. naturales**. Animal spirits supposed to move in the veins. [H.]—**S. nitrico-aetherus**. Nitrous ether. [B, 97.] See *ETHYL nitrite*.—**S. odoratus** (U. S. Ph., Russ. Ph.). Fr., *teinture d'essence de citron composée* [Fr. Cod.], *eau de Cologne*. Sp., *alcohol de cidra compuesto* [Sp. Ph.]. A solution of various amounts of the oils of orange-flowers, bergamot, lemon, lavender (flowers) [U. S. Ph.], and rosemary in alcohol, to which the Fr. Cod. adds oil of orange-peel, omitting the oil of lavender; the Swiss Ph. adds oil of orange-peel and a little of the oils of cloves and cinnamon; the Sp. Ph. adds a little oil of cinnamon, some essence of cidra, and a generous amount of spirit of rosemary and compound spirit of melissa; the Russ. Ph. adds the oils of orange-peel, cloves, cassia, and thyme, and tincture of musk; and the U. S. Ph. adds acetic ether. [B, 95 (a, 38).]—**S. oleosus aromaticus Sylvii**. See *S. AMMONIAE aromaticus*.—**S. peccans**. A morbid principle. [Paracelsus (H).]—**S. potassatus**. See *ALCOHOL POTASSÆ*.—**S. pyroacetatus**. See *ACETONE*.—**S. pyroxylicus rectificatus**. See *METHYL ALCOHOL*.—**S. rectificatissimus**. *S. rectificatus*. See under *ETHYL ALCOHOL*.—**S. salinus aromaticus**. See *S. AMMONIAE aromaticus*.—**S. saponato-camphoratus**. See *LINIMENTUM saponato-camphoratum liquidum*.—**S. saponatus**. Fr., *teinture de savon* [Fr. Cod.] (2d def.). 1. Of the Ger. Ph. and Russ. Ph., see *Tinctura SAPONIS viridis*. 2. Of the Ger. Ph. (1st ed.), Austr. Ph., Hung. Ph. (2d ed.), Gr. Ph., Swiss Ph., a solution of soap in from four to eleven times as much dilute alcohol, perfumed with rose-water [Ger. Ph., Swiss Ph.] (with a little oil of lavender [Austr. Ph., Belg. Ph., Hung. Ph., Roum. Ph.]). [B, 95 (a, 38).] 3. See *Tinctura SAPONIS*.—**S. silvestris**. Carbon dioxide. [B, 2.]—**S. strumalis** [Swiss Ph.]. A solution of 3 parts of potassium iodide in a mixture of 15 of spirit of lavender, 30 of spirit of soap, and 3 of water. [B, 95 (a, 38).]—**S. suavoleus**. Fr., *esprit odorifiant*. A solution of 1 part each of the oils of lemon, bergamot, and lavender in 4 parts of acetic ether. [B, 119 (a, 38).]—**S. sulphurico-aetherus**. See *SPIRITUS ETHERIS composuit*.—**S. sulphurico-aetherus camphoratus**. Ger., *Campherschwefeläthergeist*. See *Solutio camphorae atherae*.—**S. sulphurico-aetherus ferratus** (sen feruginosus, sen martialis). See *Tinctura ferri chlorati atherae*.—**S. tartarizatus**. See *S. VINI tartarizatus*.—**S. tenutor**. *S. tenuis*. Dilute alcohol. [a, 38.] See under *ETHYL ALCOHOL*.—**S. thieracalis**. See *S. ANGELICÆ composuit*.—**S. traumaticus**. See *Aqua vulneraria*.—**S. urinae**. An old name for aqueous ammonia, as the volatile principle of stale urine. [B.]—**S. Veneris**. See *S. XERUGINIS*.—**S. vitæ**. *S. vitallis*. The nervous fluid (q. v.), anciently supposed to circulate in the arteries. [H; K.]—**S. volatilis aromaticus**. See *S. AMMONIAE aromaticus*.—**S. volatilis causticus**. See *Aqua ammoniac*.—**S. volatilis fetidus**. See *S. AMMONIAE fetidus*.—**S. vulnerarius**. Fr., *alcoolat vulnéraire* [Fr. Cod.]. Sp., *alcohol de salvia vulneraria* [Sp. Ph.]. A preparation made by distilling 100 parts each of lavender-flowers and the leaves of wormwood, hyssop, rosemary, rue, and sage with 100 each of the leaves of basil, sweet marjoram, melissa, *Nepeta cataria*, origanum, and *Thymus vulgaris* in 9,000 of 60-per-cent.

alcohol and the necessary amount of water [Belg. Ph.] (with 100 of peppermint in 2,000 of alcohol of sp. gr. 0.832 and 5,000 of water [Swiss Ph.], with 100 each of the herbs of angelica, basil, calamint, fennel, sweet marjoram, melissa, mint, origanum, satureja, *Thymus serpyllum*, and *Thymus vulgaris*, and the flowering tops of hypericum in 4,500 of 60-per-cent. alcohol [Fr. Cod.]); or by distilling 80 parts each of lavender-flowers, wormwood-leaves, and peppermint, and 5 of oil of rosemary in 1,500 each of alcohol of sp. gr. 0.892 and water [Dan. Ph.] (24 parts each of the tops of lavender, sweet marjoram, and rosemary, and the herb of scordium, 46 each of the herbs of wormwood, hypericum, crisped mint, sage, and tanacetum, and 68 each of the herbs of agrimony, artemisia, and betonica in 2,208 of white wine [Sp. Ph.]). [B, 95 (a, 38).]—*S. vulnerarius acidus*. See *S. MILLEFOLI acetatus*.

**SPIROCHÆTA** (Lat.), *n. f.* Spir(sper)-o(o)<sup>3</sup>-et(-a)<sup>3</sup>, -e(a). Gen., -chætæ, -chæt'es. From *σπείρα*, a coil, and *χῆται*, flowing hair. 1. A genus of the *Compositæ*, included by Bentham and Hooker in *Elephantopus*. [a, 35.] 2. See under *SPIRRILLUM*.—*S. buccalis*, *S. dentium*. See *SPIRRILLUM Cohnii*.—*S. Obermeieri*. See *SPIRRILLUM Obermeieri*.

**SPIROGRAPH**, *n.* Spir-o-gra<sup>3</sup>f. From *spirare*, to breathe, and *γράφειν*, to write. See *ATMOGRAPH*.

**SPIROLOBEUS** (Lat.), *adj.* Spir(sper)-o(o)<sup>3</sup>-lob(lo)<sup>3</sup>b<sup>3</sup>e<sup>3</sup>-u<sup>3</sup>s(-u<sup>3</sup>s). From *σπείρα*, a coil, and *λόβος*, a pod. Fr., *spirolobé*. Ger., *spirlappig*, *engerollt-keimblättrig*. Having the cotyledons forming a spiral coil, as in the *Spirolobæ* (an order of the *Apetalæ*) or in the *Spirolobæ* (of De Candolle, a suborder of the *Cruciferae* consisting of the *Buniadeæ* and *Erucarieæ*; of C. A. Meyer, a suborder of chenopodiaceous plants consisting of the *Anabaseæ* and *Salsoleæ*; of Bentham and Hooker, a series of the *Chenopodiaceæ* comprising the *Suedææ*, *Salsoleæ*, and *Sarcobateæ*). [a, 35.]

**SPIROMETER**, *n.* Spir-o-mē<sup>3</sup>-tēr. From *spirare*, to breathe, and *μέτρον*, a measure. Fr., *spiromètre*. Ger., *S. Athemmesser*. Of Hutchinson, an instrument constructed on the principle of a gasometer, for measuring the various volumes of air in the lungs, especially the breathing capacity (q. v., under *BREATHING*). [J, 3, 40, 46.]—*Barnes's dry s.* A s. invented by Barnes (1865), consisting of a flexible, hollow bag or cylinder fixed at the lower end and there connected with a tube through which the air is forced. At the upper end is a disc of wood from the centre of which rises a graduated tube communicating with the bag. The whole is contained in a frame. For an experiment, the graduated tube is closed at the top, air is blown into the lower tube, thus inflating the bag, and the amount of inflation is determined by the height to which the graduated tube rises. [J.]—*Brown's s.* A simple arrangement of two rectangular boxes, one inside the other. The outer one is fitted with a mouth-piece, and the force of the air raises the inner one to a height marked by a gauge. [E.]—*Hutchinson's s.* A cylinder fitted with a mouth-piece and containing another cylinder which is supported by weights passing over pulleys and fitted with a gauge. [E.]

**SPIROMETRY**, *n.* Spir-o-mē<sup>3</sup>-t-ri<sup>2</sup>. Fr., *spirométrie*. Ger., *Spirometrie*, *Athemmessung*. The use of a spirometer for determining the breathing capacity, the thoracic pressure, or the elasticity of the lungs. [J, 3.]

**SPIROMONAS** (Lat.), *n. f.* Spir(sper)-o(m)<sup>3</sup>-o<sup>3</sup>n-a<sup>3</sup>s(a<sup>3</sup>s). Gen., -mon'ados (-adis). From *σπείρα*, a coil, and *μόνος*, a unit. A genus of the *Schizomycetes* in which the cells are "flat like a leaf and twisted around an ideal long axis." Multiplication takes place by transverse division. [a, 35.]—*S. Cohnii*. A form occurring in stagnant water; hyaline cells 1.2 to 4 μ broad, with 1½ turn, very pointed at each end, and with a single flagellum. [a, 35.]—*S. volubilis*. A species in the form of rapidly revolving vibrating, colorless, transparent cells from 15 to 18 μ long, found in stagnant water and putrefying infusions. [A, 396 (a, 21); a, 35.]

**SPIROPHORE**, *n.* Spir-o-for. From *spirare*, to breathe, and *φορέω*, bearing. Fr., *s.* Of Woillez, an apparatus for establishing artificial respiration by insufflation in cases of asphyxia neonatorum. [A, 15.]

**SPIROPTERA** (Lat.), *n. f.* Spir(sper)-o-pt<sup>3</sup>e<sup>3</sup>r-a<sup>3</sup>. From *σπείρα*, a coil, and *πτερόν*, a wing. Fr., *spiroptère*. A genus of the *Filaridæ*. [Dujardin (L, 16).]—*S. hominis*. A pseudeminent found in the bladder of a woman, but decided to be either the young of *Strongylus gigas* or the ovisac of the cod introduced for purposes of deception. [L, 16.]—*S. megastoma*. A species found in tubercles in a horse's stomach. [L, 17.]—*S. Rudolphi*. See *S. hominis*.—*S. sanguinolenta*. A species found in tubercles of the stomach in dogs and wolves. [L, 17.]—*S. strongylina*. A species found in the stomach of the hog. [L, 17.]

**SPIROSCOPE**, *n.* Spir-o-skop. From *spirare*, to breathe, and *σκοπεῖν*, to examine. A wet as distinguished from a dry spirometer. [K.]

**SPIROYL**, *n.* Spir'o-i<sup>2</sup>l. Fr., *spiroyle*. See *SALICYL*.—*S. hydride*. Ger., *S'säure*. See *SALICYL aldehyde*.

**SPIROYLOUS ACID**, *n.* Spir-o'i<sup>2</sup>l-u<sup>3</sup>s. See *SALICYL aldehyde*.

**SPIRRE** (Ger.), *n.* Sper're<sup>2</sup>. See *ANTHELA*.

**SPIRSÄURE** (Ger.), *n.* Sper'zöir-e<sup>2</sup>. See *SALICYLIC ACID*.

**SPIRULINA** (Lat.), *n.* Spir(sper)-u<sup>3</sup>l(u<sup>3</sup>l)-inen'a<sup>3</sup>. From *spiza*, a coil. A subgenus of the *Schizomycetes*, consisting of loops of filaments having the ends wound around each other like a plait of hair (cf. *ARTHROBACTERIACEÆ*). [a, 35.]—*S. plicatilis*. See *SPIRRILLUM plicatile*.

**SPIRYLE** (Fr.), *n.* Sper-el. See *SALICYL*.

**SPISSATED**, *adj.* Spi<sup>3</sup>s'at-e<sup>3</sup>d. Lat., *spissatus* (from *spissare*, to thicken). See *INSPISSATED*.

**SPIITAL** (Ger.), *n.* Spet-a<sup>3</sup>i'. See *HOSPITAL* and *ASYLUM*.

**SPIITTLE**, *n.* Spi<sup>3</sup>t'l. See *SALIVA*.

**SPITZAMPFER** (Ger.), *n.* Spi<sup>3</sup>ts'a'mpf-e<sup>3</sup>r. The *Rumex obtusifolius*, *Rumex crispus*, and other species of *Rumex*. [a, 35.]

**SPITZBLATTEN** (Ger.), *n. pl.* Spi<sup>3</sup>ts'bla<sup>3</sup>t-te<sup>3</sup>rn. See *VARI-CELLA*.

**SPITZBUCKEL** (Ger.), *n.* Spi<sup>3</sup>ts'buk-e<sup>3</sup>l. See *POTT'S DISEASE*.

**SPITZE** (Ger.), *n.* Spi<sup>3</sup>ts'zē<sup>2</sup>. See *ACME*, *APEX*, *CUSP*, and *POINT* (1st def.).—*Herz's*. The apex of the heart. [L.]—*Hinterhaupt's*. The point or extremity of the occiput. [K.]—*Roll's*. See *TROCHLEA*.—*Schlafenlappens*. The anterior extremity of the temporo-sphenoidal lobe. [L, 27 (K).]—*S'nerkrankung*. A disease of the pulmonary apex. [a, 34.]—*S'n'fussstellung*. The contraction of the foot caused by tuberculous inflammation of the articulations. [L, 57 (a, 34).]—*S'n'wachsthum*. Consolidation of a pulmonary apex. [a, 34.]—*Schells*. See *MUCRO*.

**SPITZENHAARE** (Ger.), *n. pl.* Spi<sup>3</sup>ts'e<sup>3</sup>n-ha<sup>3</sup>r-e<sup>3</sup>. Pointed hairs; of Pincus, those hairs of the scalp that fall out before attaining the average length, and, having never been cut, have pointed extremities. [G.]

**SPITZFUSS** (Ger.), *n.* Spi<sup>3</sup>ts'fus. See *TALIPES equinus*.

**SPITZKEIM** (Ger.), *n.* Spi<sup>3</sup>ts'kim. See *ACROBLAST*.

**SPITZKEIMEND** (Ger.), **SPITZKEIMIG** (Ger.), *adj's*. Spi<sup>3</sup>ts'kim-e<sup>3</sup>nd, -ig. See *MONOCOTYLEDONOUS*.

**SPITZKOPF** (Ger.), *n.* Spi<sup>3</sup>ts'ko'pf. See *OXYCEPHALIA*.

**SPITZPOCKEN** (Ger.), *n. pl.* Spi<sup>3</sup>ts'po<sup>3</sup>k-e<sup>3</sup>n. See *VARICELLA*.

**SPLANCHNA** (Lat.), *n. pl.* Splan'ch'na. The viscera, or entrails; also, in a restricted sense, the intestines. [a, 48.]

**SPLANCHNECTOPIA** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-ne<sup>2</sup>k-top(to<sup>2</sup>p)<sup>2</sup>i<sup>2</sup>a<sup>2</sup>. From *σπλάγχων*, a viscus, and *εκτοπος*, out of place. A displacement of the intestines. [L, 50 (a, 14).]

**SPLANCHNEMPHRAXIS** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-ne<sup>2</sup>m-fra<sup>2</sup>x(fra<sup>2</sup>x)<sup>2</sup>i<sup>2</sup>s. Gen., -phra<sup>2</sup>x'eos (-is). From *σπλάγχων*, a viscus, and *ἐμφραξις*, a stoppage. Fr., *splanchnemphraxie*. Intestinal obstruction. [L, 50 (a, 14).]

**SPLANCHNEURYSMA** (Lat.), *n. m.* Splan'2k(splan'2ch<sup>2</sup>)-nu<sup>2</sup>r'iz(u<sup>2</sup>s)<sup>2</sup>ma<sup>2</sup>. Gen., -yē'matos (-atis). From *σπλάγχων*, a viscus, and *εὐρύνειν*, to distend. Fr., *splanchnéurysme*. Abnormal dilatation of the intestines. [L, 50 (a, 14).]

**SPLANCHNIC**, *adj.* Splan'2k'ni<sup>2</sup>k. Gr., *σπλάνχνης*. Lat., *splanchnicus*. Fr., *splanchnique*. Pertaining to or supplying the viscera, visceral; of bones, developed within the substance of some of the viscera. [C, 1.]

**SPLANCHNODIASTASIS** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>(no<sup>2</sup>)-di<sup>2</sup>(di<sup>2</sup>)-a<sup>2</sup>st(a<sup>2</sup>st)<sup>2</sup>a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s. Gen., -as'eos (-atis). From *σπλάγχων*, a viscus, and *διάστασις*, separation. Abnormal separation of the viscera. [L, 50 (a, 14).]

**SPLANCHNODYNE** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>d'(-i<sup>2</sup>n(u<sup>2</sup>n)-e(a)). Gen., -od'ynes. From *σπλάγχων*, a viscus, and *δύνη*, pain. Intestinal colic. [L, 50 (a, 14).]

**SPLANCHNOGRAPHY**, *n.* Splan'2k-no<sup>2</sup>g'ra<sup>2</sup>f-i<sup>2</sup>. Lat., *splanchnographia* (from *σπλάγχων*, a viscus, and *γράφειν*, to write). Fr., *splanchnographie*. See *SPLANCHOLOGY*.

**SPLANCHNOLITHIASIS** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>(no<sup>2</sup>)-li<sup>2</sup>(th-i<sup>2</sup>a<sup>2</sup>)-a<sup>2</sup>i<sup>2</sup>s. Gen., -as'eos (-is). From *σπλάγχων*, a viscus, and *λίθιασις*, lithiasis. Fr., *splanchnolithiase*. The formation of intestinal calculi. [L, 50 (a, 14).]

**SPLANCHNOLITHUS** (Lat.), *n. m.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>li<sup>2</sup>(th-u<sup>2</sup>s)(u<sup>2</sup>s). From *σπλάγχων*, a viscus, and *λίθος*, a stone. Fr., *splanchnolithe*. See *INTESTINAL CALCULUS*.

**SPLANCHNOLOGY**, *n.* Splan'2k-no<sup>2</sup>i<sup>2</sup>-o<sup>2</sup>-ji<sup>2</sup>. Lat., *splanchnologia* (from *σπλάγχων*, a viscus, and *λόγος*, understanding). Fr., *splanchnologie*. Ger., *Eingeweidelehre*. The anatomy, pathology, etc., of the viscera. [a, 48.]

**SPLANCHNON** (Lat.), *n. n.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>n. Gr., *σπλάγχων*. Fr., *viscère*. Ger., *Eingeweide*. A viscus; little used in the sing. (see *SPLANCHNA*). [a, 48.]

**SPLANCHNOPATHY**, *n.* Splan'2k-no<sup>2</sup>p'a<sup>2</sup>th-i<sup>2</sup>. Lat., *splanchnopathia* (from *σπλάγχων*, a viscus, and *πάθος*, disease). Fr., *splanchnopathie*. A visceral disease. [L, 50 (a, 14).]

**SPLANCHNOPLEURE**, *n.* Splan'2k'-no<sup>2</sup>-plu<sup>2</sup>r. From *σπλάγχων*, a viscus, and *πλευρά*, the side. Fr., *lame pariétal*. Of Fost r and Balfour, the inner wall of the pleuro-peritoneal space in the embryo. [A, 11.] Cf. *Splanchnic MESOBLAST*.

**SPLANCHNOPTOSIS** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>p-tos'i<sup>2</sup>s. Gen., -ptos'eos (-is). From *σπλάγχων*, a viscus, and *πτῶσις*, a falling. Prolapse of the viscera (cf. *ENTEROPTOSIS*). [a, 17.]

**SPLANCHNOSCLEROSIS** (Lat.), *n. f.* Splan'2k(splan'2ch<sup>2</sup>)-no<sup>2</sup>(no<sup>2</sup>)-skle<sup>2</sup>r(sklar)-os'i<sup>2</sup>s. Gen., -os'eos. From *σπλάγχων*, a viscus, and *σκληρώσις*, an induration. Fr., *splanchnosclérose*. Induration of viscera. [L, 50 (a, 43).]

**SPLANCHNOSCOPY**, *n.* Splan'2k-no<sup>2</sup>sk'e<sup>2</sup>p-i<sup>2</sup>. Lat., *splanchnoscopy* (from *σπλάγχων*, a viscus, and *σκοπεῖν*, to examine). Fr., *splanchnoscopie*. Ger., *Splanchnoskopie*. Of Millot, an inspection of the viscera by means of strong transmitted light. [a, 34.]

**SPLANCHNO-SKELETON**, *n.* Splan'2k'-no<sup>2</sup>-ske<sup>2</sup>l'e<sup>2</sup>-t'n. From *σπλάγχων*, a viscus, and *σκελετόν*, a skeleton. Fr., *splanchnosquelette*. The bones or hard structures collectively that are associated with the viscera. [B, 28 (a, 27).]

**SPLANCHNOSYMPATHY**, *n.* Splan'2k'-no<sup>2</sup>-si<sup>2</sup>m'-pa<sup>2</sup>th-i<sup>2</sup>. Lat., *splanchnosympathia* (from *σπλάγχων*, a viscus, and *συμπάθεια*, sympathy). The reflex action of the viscera on each other and on other organs. [L, 50 (a, 14).]

**SPLANCHNOTOMY**, n. *Spla*<sup>n</sup>*nk*-no<sup>t</sup>om-i<sup>2</sup>. Lat., *splanchnotomia* (from *σπλάγχνον*, a viscous, and *τομή*, a cutting). Fr., *splanchnotomie*. Dissection of the viscera. [L, 50 (a, 14).]

**SPLAY-FOOT**, n. *Spla*<sup>n</sup>*fu*<sup>t</sup>. See **FLAT-FOOT**.

**SPLEEN**, n. *Splen*. Gr., *σπλήν*. Lat., *lien*, *splen*. Fr., *rate*. Ger., *Milz*. 1. A soft, vascular organ, usually classed among the ductless glands, about five inches in length, four in breadth, and an inch in thickness and somewhat flattened or concavo-convex when removed from the body. When in situ it is concavo-convex and embraces the cardia. Its internal and concave side contains a vertical fissure (the hilum) through which the splenic vessels and nerves pass. It lies between the stomach and the diaphragm. The peritoneum covers it externally except where it is reflected to the stomach and diaphragm. Beneath the peritoneum is a layer of fibrous tissue which surrounds the splenic vessels and sends numerous processes within the organ, forming a supporting framework inclosing the Malpighian corpuscles and true splenic tissue. To it has been ascribed the formation of the red and white blood-corpuscles and of a ferment which plays a part in pancreatic digestion. [L, 31, 142, 172, 332.] 2. Anger; hypochondriasis; melancholy. [B.]—**Accessory s.** Lat., *lien accessorius* (seu *secenturiatus*). Ger., *Nebenmilz*. A nodule (of which there may be a number) of splenic tissue in the vicinity of the spleen. [L, 332.]—**Bacon s.** A form of amyloid degeneration affecting the spleen. The organ is enlarged and firm, (like the *sago s.*) but, on section, patches or islands of tissue are seen which resemble the fat of fried bacon. [D, 48.]—**Floating s.** Lat., *lien mobilis*. Fr., *rate flottante*. Ger., *Wandermilz*, *verschiebbare Milz*. An anomalous condition of the s. in which the organ is movable, generally enlarged, and no longer protected by the ribs in the left hypochondriac region, and lies on the brim of the pelvis or even in the right side of the abdomen. This condition is more frequently observed in women than in men. [A, 326 (a, 21).]—**Indian s.** The hypertrophied or indurated s. observed in Anglo-Indians. [Med. Press and Circ., 1871, p. 45 (a, 34).]—**Lardaceous s.** Lat., *lien lardaceus* (seu *cereus*). Enlargement of the s. from the presence of lardaceous matter. Cf. *Lardaceous DEGENERATION*.—**Sago s.** Ger., *Fischroggenmilz*. Amyloid degeneration of the follicles of the s. presenting on section the appearance of *sago grains*. [a, 34.]—**Waxy s.** See *Lardaceous s.*

**SPLEEN**, v. tr. To deprive of the s. [B.]

**SPLEENWORT**, n. *Splen*<sup>wu</sup>*rt*. The genus *Asplenium*. [a, 35.]—**Common s.**, **Dwarf s.**, **Maiden-hair s.** See **ASPENIUM trichomanes**.

**SPLEN** (Lat.), n. m. *Sple*<sup>n</sup>(*splan*). Gen., *splen*<sup>os</sup> (-is). See **SPLEEN**.

**SPLENADENOMA** (Lat.), n. n. *Splen*(*splan*)-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>n-a<sup>2</sup>m<sup>2</sup>. Gen., -om<sup>2</sup>atos (-atis). From *σπλήν*, the spleen, and *ἀδένω*, a gland. Fr., *splénadenome*. Ger., *Splénadenom*. Lymphadenoma of the spleen. [a, 34.]

**SPLENÆMIA** (Lat.), n. f. *Splen*(*splan*)-em<sup>2</sup>(a<sup>2</sup>e<sup>2</sup>m)-i<sup>2</sup>-a<sup>2</sup>. From *σπλήν*, the spleen, and *αἷμα*, blood. 1. See **LEUCOCYTHÆMIA**. 2. Of Virchow, leucocythæmia in which abnormal elements are present in the blood, particularly lactic, acetic, and formic acids and hypoxanthin. [D, 1.] Cf. *Splenic LEUCOCYTHÆMIA*.

**SPLENALGIA** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-a<sup>2</sup>l(a<sup>2</sup>l)-ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>2</sup>. From *σπλήν*, the spleen, and *ἀλγος*, pain. Fr., *splénalgie*. Pain in the spleen. [L, 50 (a, 14).]

**SPLENAUXE** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-a<sup>2</sup>x<sup>2</sup>(a<sup>2</sup>u<sup>2</sup>x)-e(-a). Gen., -aux<sup>2</sup>es. From *σπλήν*, the spleen, and *αὔξω*, growth. Enlargement of the spleen. [L, 50 (a, 14).]

**SPLENCULUS** (Lat.), n. m. *Sple*<sup>n</sup>(*splan*)-ku<sup>2</sup>l(ku<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From *σπλήν*, the spleen. See **Accessory SPLEEN**.

**SPLENECHOS** (Lat.), **SPLENECHUS** (Lat.), n's m. *Sple*<sup>n</sup>(*splan*)-ek<sup>2</sup>(ach<sup>2</sup>)-o<sup>2</sup>s, -u<sup>2</sup>s(u<sup>2</sup>s). From *σπλήν*, the spleen, and *ἥχος*, a sound. Ger., *Miltzton*. The sound heard on percussing over the spleen. [L, 50 (a, 14).]

**SPLENECTAMA** (Lat.), **SPLENECTASIS** (Lat.), n's n. and f. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>kt<sup>2</sup>a<sup>2</sup>m(a<sup>2</sup>m)-a<sup>2</sup>, -a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s. Gen., -am<sup>2</sup>atos (-atis), -as<sup>2</sup>eos (-e<sup>2</sup>tasis). From *σπλήν*, the spleen, and *ἐκταμα*, extent, or *ἐκτασις*, extension. Enlargement of the spleen. [L, 41 (a, 14).]

**SPLENECTOMY**, n. *Sple*<sup>n</sup>-e<sup>2</sup>kt<sup>2</sup>om-i<sup>2</sup>. Lat., *splenectomy* (from *σπλήν*, the spleen, and *ἐκτομή*, a cutting out). Fr., *splénectomie*. Ger., *Splénektomie*. Removal of the spleen. [E.]

**SPLENECTOPIA** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>kt<sup>2</sup>op(to<sup>2</sup>p)-i<sup>2</sup>-a<sup>2</sup>. From *σπλήν*, the spleen, and *ἐκτοπος*, out of place. Fr., *splénectopie*. Displacement of the spleen.

**SPLENELCONIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>lk<sup>2</sup>o<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *σπλήν*, the spleen, and *ἐλκωσις*, ulceration. Fr., *splénelcose*. Ulceration of the spleen. [L, 50 (a, 14).]

**SPLENELCUS** (Lat.), n. n. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>lk<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s). From *σπλήν*, the spleen, and *ἐλκος*, an ulcer. Fr., *splénulcère*. An ulcer of the spleen. [L, 50 (a, 14).]

**SPLENEMPHRAXIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>m<sup>2</sup>fra<sup>2</sup>x(-fra<sup>2</sup>x-i<sup>2</sup>s. Gen., -phra<sup>2</sup>x<sup>2</sup>eos (-is). From *σπλήν*, the spleen, and *ἐμφράξις*, a stoppage. Fr., *splénemphraxie*. Obstruction or congestion of the spleen. [L, 50 (a, 14).]

**SPLENEPATITIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-e<sup>2</sup>p<sup>2</sup>ap(-a<sup>2</sup>p)-a<sup>2</sup>i<sup>2</sup>(a<sup>2</sup>i<sup>2</sup>). Gen., -it<sup>2</sup>idos (-itis). From *σπλήν*, the spleen, and *ἥπαρ*, the liver. Fr., *splénepatite*. Inflammation of the liver and spleen. [L, 50 (a, 14).]

**SPLENETIC**, adj. *Sple*<sup>n</sup>-e<sup>2</sup>t<sup>2</sup>i<sup>2</sup>k. Lat., *splénéticus*. Fr., *splénétique*. 1. See **SPLENIC**. 2. Affected with the spleen (2d def.).

**SPLENTIAL**, adj. and n. *Sple*<sup>n</sup>-i<sup>2</sup>l<sup>2</sup>. Gr., *σπληντικός*, a bandage. 1. Of or pertaining to the splenius or to the s. bone. 2. The s. bone. [B.]

**SPLENIC**, adj. *Sple*<sup>n</sup>-i<sup>2</sup>k. Gr., *σπληνικός* (from *σπλήν*, the spleen). Lat., *splénicus*. Fr., *splénique*. Ger., *splénisch*, *miltzartig*, *miltzig*. 1. Pertaining to the spleen. 2. Affected with splenitis. [L, 41, 44, 49, 50 (a, 14).]

**SPLENICUS** (Lat.), adj. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Splenic; as a n., in the n. (*splenicum*); Ger., *Miltzmittel*, a medicine that affects the spleen. [L, 50 (a, 14).]

**SPLENICOGASTRICUM** (Lat.), n. n. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>k-o(o<sup>2</sup>)-ga<sup>2</sup>st(ga<sup>2</sup>st)-i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m). From *σπλήν*, the spleen, and *γαστήρ*, the stomach. See **Gastro-splenic LIGAMENT**.

**SPLENICO-PANCREATIC**, adj. *Sple*<sup>n</sup>-i<sup>2</sup>k-o<sup>2</sup>pa<sup>2</sup>n-kre<sup>2</sup>. a<sup>2</sup>t<sup>2</sup>i<sup>2</sup>k. From *σπλήν*, the spleen, and *πάγκρεας*, the pancreas. Pertaining to the spleen and the pancreas. [a, 48.]

**SPLENICTERUS** (Lat.), n. m. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>kt<sup>2</sup>e<sup>2</sup>r-u<sup>2</sup>s(u<sup>2</sup>s). From *σπλήν*, the spleen, and *icteros*, jaundice. Fr., *splénictère*. Splenitis complicated with jaundice. [L, 50 (a, 26).]

**SPLENIFICATION**, n. *Sple*<sup>n</sup>-i<sup>2</sup>i<sup>2</sup>shu<sup>2</sup>n. From *splen*, the spleen, and *facere*, to make. See **SPLENIZATION**.

**SPLENIOLA** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>i<sup>2</sup>o<sup>2</sup>i<sup>2</sup>-a<sup>2</sup>. Fr., *spléniole*. See **SPLENIUM** (1st def.).

**SPLENISCUS** (Lat.), n. m. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>sk<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s). Gr., *σπληνίσκος* (dim. of *σπλήν*, the spleen). See **SPLENIUM** (1st def.).

**SPLENISERRATOR** (Lat.), n. m. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>se<sup>2</sup>r-rat(-ra<sup>2</sup>t<sup>2</sup>o<sup>2</sup>r. Gen., -or<sup>2</sup>is. The serrati postici and splenii taken collectively. [L.]

**SPLENISIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>s-i<sup>2</sup>s. Gen., -is<sup>2</sup>eos, *splen<sup>2</sup>isis*. From *σπλήν*, the spleen. Fr., *splénisie*. Of Louis, a form of degeneration of the lung observed at Gibraltar in yellow-fever patients, characterized by well-marked dark spots, resembling the tissue of the spleen in color and consistence. [L, 50 (a, 14).]

**SPLENITIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-i<sup>2</sup>(e<sup>2</sup>i<sup>2</sup>s. Gen., -it<sup>2</sup>idos (-itis). Gr., *σπληνίτις* (from *σπλήν*, the spleen). Fr., *splénite*. Inflammation of the spleen. [D, 1.]

**SPLENIUM** (Lat.), n. n. *Splen*(*splan*)-i<sup>2</sup>a<sup>2</sup>m(u<sup>2</sup>m). Gr., *σπλήνιον* (from *σπλήν*, the spleen). Fr., *splénium*. Ger., *Balkenwurst* (3d def.). 1. A plant used by the ancients in affections of the spleen (cf. **ASPENIUM**). 2. A bandage or compress. [A, 322, 500 (a, 48).] 3. An enlargement at the posterior extremity of the corpus callosum, just before it joins the fornix. [L, 6 (K).]—**S. corporis callosi**. See **S. (3d def.)**.

**SPLENIUS** (Lat.), adj. *Splen*(*splan*)-i<sup>2</sup>s-u<sup>2</sup>s(u<sup>2</sup>s). From *splénium*, a bandage. Fr., *splénius*, *cervico-trachélien*. Strap-shaped; as a n. (Ger., *Bauchmuskel*), a muscle so shaped (the s. capitis and s. colli taken as one); also, an analogous muscle in solipeds. [L.]—**S. accessorius**. An anomalous muscle arising from the spinous processes of the lower cervical or upper dorsal vertebrae and inserted into the transverse process of the atlas. [L, 332.]—**S. capitis**. Ger., *Bauchmuskel des Kopfes*. A muscle arising from the spinous processes of two or three lower cervical and two or three upper dorsal vertebrae and inserted into the mastoid process of the temporal bone and the superior curved line of the occipital bone. [L, 31, 142, 332.]—**S. cervicis**, **S. colli**. Ger., *Halsbauchmuskel*, *Riemenmuskel des Halses*. A long flat muscle arising from the spinous processes of the 3d, 4th, 5th, and 6th dorsal vertebrae and inserted into the transverse processes of two or three of the upper cervical vertebrae. [L, 31, 142, 332.]

**SPLENIZATION**, n. *Sple*<sup>n</sup>-i<sup>2</sup>z-a<sup>2</sup>shun<sup>2</sup>. Lat., *splénisatio* (from *σπλήν*, the spleen). Fr., *splénisation*. Ger., *Splénisation*. An infiltrated and thickened condition of tissue, especially of lung tissue, in which it resembles the spleen in consistence. Cf. **HEPATIZATION**. [D.]—**Hypostatic s.** See **HYPOTASTIC PNEUMONIA**.

**SPLENOCERATOSIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-o<sup>2</sup>(o<sup>2</sup>)-se<sup>2</sup>r(-ke<sup>2</sup>r)-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>i<sup>2</sup>s. Gen., -os<sup>2</sup>eos (-is). From *σπλήν*, the spleen, and *κέρας*, a horn. Induration of the spleen. [L, 50 (a, 14).]

**SPLENOCELE** (Lat.), n. f. *Splen*(*splan*)-o<sup>2</sup>(o<sup>2</sup>)-se<sup>2</sup>ka<sup>2</sup>(le<sup>2</sup>la); in Eng., *sple<sup>2</sup>n<sup>2</sup>o<sup>2</sup>cel*. From *σπλήν*, the spleen. Ger., *Miltzbruch*. A hernia of the spleen. [a, 34.]

**SPLENO-COLIC**, adj. *Sple*<sup>n</sup>-o<sup>2</sup>kol<sup>2</sup>i<sup>2</sup>k. From *σπλήν*, the spleen, and *κόλον*, the colon. Pertaining to the spleen and the colon. [a, 48.]

**SPLENODE-OOPHORITIS** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-od<sup>2</sup>-o<sup>2</sup>o<sup>2</sup>f<sup>2</sup>-i<sup>2</sup>(e<sup>2</sup>i<sup>2</sup>s. Gen., -it<sup>2</sup>idos (-itis). From *σπλήν*, the spleen, *εἶδος*, resemblance, *φόν*, an egg, and *φορός*, bearing. Fr., *splénodéophorite*. Oophoritis with splenization. [A, 322.]

**SPLENODE-OOPHOROMALACIA** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-od<sup>2</sup>-o<sup>2</sup>o<sup>2</sup>f<sup>2</sup>-o<sup>2</sup>r(-o<sup>2</sup>o<sup>2</sup>)-ma<sup>2</sup>l<sup>2</sup>(ma<sup>2</sup>l)-a<sup>2</sup>sa<sup>2</sup>k<sup>2</sup>(i<sup>2</sup>a<sup>2</sup>). From *σπλήν*, the spleen, *εἶδος*, resemblance, *φόν*, an egg, *φορός*, bearing, and *μαλακία*, softness. Fr., *splénodéophoromalacie*. Oophoromalacia with splenization. [A, 322.]

**SPLENODYNIA** (Lat.), n. f. *Sple*<sup>n</sup>(*splan*)-o<sup>2</sup>(o<sup>2</sup>)-di<sup>2</sup>n<sup>2</sup>(du<sup>2</sup>n<sup>2</sup>)-i<sup>2</sup>a<sup>2</sup>. From *σπλήν*, the spleen, and *δύνη*, pain. Fr., *splénodynie*. Pain in the spleen. [L, 50 (a, 14).]

**SPLENOGRAPHY**, n. *Sple*<sup>n</sup>-o<sup>2</sup>g<sup>2</sup>ra<sup>2</sup>f<sup>2</sup>-i<sup>2</sup>. Lat., *splénographia* (from *σπλήν*, the spleen, and *γράφω*, to write). See **SPLENOLOGY**.

**SPLENOHÆMIA** (Lat.), n. f. *Splen*(*splan*)-o<sup>2</sup>(o<sup>2</sup>)-hem<sup>2</sup>(ha<sup>2</sup>e<sup>2</sup>m)-i<sup>2</sup>a<sup>2</sup>. From *σπλήν*, the spleen, and *αἷμα*, blood. Fr., *splénohémie*. Congestion of the spleen. [a, 34.]

**SPLENOID**, adj. *Splen*<sup>oid</sup>. Gr., *σπληνώδης* (from *σπλήν*, the spleen, and *εἶδος*, resemblance). Lat., *splénoides*. Fr., *splénoïde*. Ger., *miltzartig*. Resembling the spleen.

**SPLENOLOGY**, n. *Sple*<sup>n</sup>-o<sup>2</sup>l<sup>2</sup>o<sup>2</sup>-j<sup>2</sup>. Lat., *splénologia* (from *σπλήν*, the spleen, and *λόγος*, understanding). Fr., *splénologie*. Ger., *Miltzlehre*. The anatomy, etc., of the spleen. [a, 48.]

**SPLENOLYMPHOMA** (Lat.), n. n. *Sple*<sup>n</sup>(*splan*)-o<sup>2</sup>(o<sup>2</sup>)-li<sup>2</sup>m<sup>2</sup>f(-lu<sup>2</sup>m<sup>2</sup>f)-o<sup>2</sup>ma. Gen., -om<sup>2</sup>atos (-atis). See **SPLENADENOMA**.

**SPLENOMA** (Lat.), n. n. *Sple<sup>2</sup>n(splan)-om<sup>2</sup>a<sup>3</sup>*. Gen., -*om<sup>2</sup>atos* (-*atis*). Fr., *splénome*. 1. A swelling or a tumor of the spleen. [L., 50 (a, 14).] 2. See *Fungus hæmatodes*.

**SPLENOMALACIA** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o(o<sup>2</sup>)-ma<sup>2</sup>l(ma<sup>2</sup>l)-as(a<sup>2</sup>k)/i<sup>2</sup>-a<sup>3</sup>*. From *σπλήν*, the spleen, and *μαλακία*, softness. Fr., *splénomalacie*. Softening of the spleen. [L., 50 (a, 14).]

**SPLENO-MEGALY**, n. *Sple<sup>2</sup>n-o-me<sup>2</sup>g<sup>2</sup>a<sup>2</sup>l-i<sup>2</sup>*. From *σπλήν*, the spleen, and *μέγας*, large. Fr., *splénomégatie*. Hypertrophy of the spleen; of Debove, splenic hypertrophy and progressive anemia without leucocytosis or alteration in the lymphatic glands. ["Fr. méd.," Aug. 5, 1892 (a, 34).]

**SPLENONCUS** (Lat.), n. m. *Sple<sup>2</sup>n(splan)-o<sup>2</sup>n<sup>2</sup>k<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s)*. From *σπλήν*, the spleen, and *ὄγκος*, a tumor. Fr., *splénoncve*. Ger., *Milzgeschwulst*. Tumefaction of the spleen. [L., 50 (a, 14).]

**SPLENOPTARECTASIS** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o(o<sup>2</sup>)-pa<sup>2</sup>r-(pa<sup>2</sup>r)-e<sup>2</sup>kt/a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s*. Gen., -*us<sup>2</sup>eos* (-*ect<sup>2</sup>asis*). From *σπλήν*, the spleen, *πάρὰ*, beyond, and *ἐκτασις*, extension. Fr., *splénoptarectase*. See SPLENECTASIS.

**SPLENOPATHY**, n. *Sple<sup>2</sup>n-o<sup>2</sup>p<sup>2</sup>a<sup>2</sup>th-i<sup>2</sup>*. Lat., *splenopathia* (from *σπλήν*, the spleen, and *πάθος*, disease). Fr., *splénopathie*. Ger., *Splenopathie*. Disease of the spleen. [L., 18.]

**SPLENOPHLEGMON** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o(o<sup>2</sup>)-fle<sup>2</sup>g<sup>2</sup>-mo<sup>2</sup>n-e(a)*. Gen., -*phleg<sup>2</sup>mones*. From *σπλήν*, the spleen, and *φλεγμονή*, inflammation. Fr., *splénophlegmon*. Phlegmonous inflammation of the spleen. [L., 50 (a, 14).]

**SPLENO-PHAXIA** (Lat.), **SPLENO-PHAXIS** (Lat.), n's f. *Sple<sup>2</sup>n(splan)-o(o<sup>2</sup>)-fra<sup>2</sup>x/(fra<sup>2</sup>xy)/i<sup>2</sup>-a<sup>3</sup>, -i<sup>2</sup>s*. Gen., -*phax<sup>2</sup>ia<sup>2</sup>/e<sup>2</sup>, -phax<sup>2</sup>e<sup>2</sup>os* (-*is*). Fr., *splénophaxie*. See SPLENO-PHAXIS.

**SPLENO-PHRENIC**, adj. *Sple<sup>2</sup>n-o-fre<sup>2</sup>n<sup>2</sup>i<sup>2</sup>ck*. From *σπλήν*, the spleen, and *φρήν*, the midriff. Pertaining to the spleen and the diaphragm. [L.]

**SPLENO-PHTHISIS** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o<sup>2</sup>t(o<sup>2</sup>ft<sup>2</sup>h)-i<sup>2</sup>a-i<sup>2</sup>s*. Gen., -*phthis<sup>2</sup>eos* (-*oph<sup>2</sup>thisis*). From *σπλήν*, the spleen, and *φθίσις*, a wasting. Fr., *splénophthisie*. Atrophy of the spleen.

**SPLENO-PNEUMONIA**, n. *Sple<sup>2</sup>n-o-nu<sup>2</sup>-mon-i<sup>2</sup>-a<sup>3</sup>*. Of Grancher, a form of pulmonary congestion characterized by engorgement of the pulmonary capillaries and partial obliteration of the alveoli, the lung becoming dense, hard, and fleshy, and sinking in water. It is observed in some forms of heart disease. [a, 34.]

**SPLENOPTOSIS** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o<sup>2</sup>pt-os/i<sup>2</sup>s*. Gen., -*ptos<sup>2</sup>eos* (-*is*). From *σπλήν*, the spleen, and *πτῶσις*, a falling. See Floating spleen.

**SPLENNORRHAGIA** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-o<sup>2</sup>r-raj(ras<sup>2</sup>g<sup>2</sup>y)-i<sup>2</sup>-a<sup>3</sup>*. From *σπλήν*, the spleen, and *ῥήγνυσθαι*, to burst forth. Fr., *splénorrhémie*, *splénorrhagie*. Hæmorrhage into or from the spleen.

**SPLENSCIRRUS** (Lat.), n. m. *Sple<sup>2</sup>n(splan)-o(o<sup>2</sup>)-si<sup>2</sup>r-(ski<sup>2</sup>r)/ru<sup>2</sup>s(ru<sup>2</sup>s)*. From *σπλήν*, the spleen, and *σκίρρος*, an induration. Fr., *splénoscirrhe*. A hard, fibrous tumor in the spleen.

**SPLENOTOMY**, n. *Sple<sup>2</sup>n-o<sup>2</sup>t/om-i<sup>2</sup>*. Lat., *splenotomia* (from *σπλήν*, the spleen, and *τομή*, a cutting). Fr., *splénotomie*. Ger., *Milzzerlegung* (1st def.), *Splenotomie*. 1. Dissection of the spleen. [L., 50 (a, 14).] 2. See SPLENECTOMY.

**SPLINT**, n. *Sple<sup>2</sup>nt*. See SPLINT (2d def.).

**SPLENYPERTROPHIA** (Lat.), n. f. *Sple<sup>2</sup>n(splan)-ip(o<sup>2</sup>p)-u<sup>2</sup>r(e<sup>2</sup>r)-tro(tro<sup>2</sup>y)/i<sup>2</sup>-a<sup>3</sup>*. From *σπλήν*, the spleen, *πέρ*, in excess, and *τροφή*, nutrition. Fr., *splénypertrophie*. Hypertrophy of the spleen.

**SPLINT**, n. *Spl<sup>2</sup>nt*. Gr., *νάρθηξ*. Lat., *assula*, *ferula*. Fr., *éclisse*, *attelle*. Ger., *Beinbruchlade*, *Beinrüstung*, *Schiene*, *Span*. 1. Any apparatus composed of firm and hard material to be applied to an injured or diseased part to prevent motion or displacement. [E.] 2. In horses, an exostosis usually found upon the inner surface of the metacarpal bone. [L.]—**Agnew's s. for hip-joint disease**. A long s. with foot-piece and perineal band, fitting close against the tuber ischii and intended to support the weight of the trunk; used after the subsidence of acute symptoms. [E., 2.]—**American hip s.** See *Davis's s. for coxalgia* and *Sayre's s. for coxalgia*.—**Amesbury's s.** See *McIntyre's s.*—**Anchor-s.** A s. consisting of metal loops that fit over the teeth and are held in apposition by means of a rod and nut; used for fractures of the jaw. ["Med. Record," Oct. 6, 1888, p. 420 (a, 34).]—**Ashhurst's wire s.** A bracketed s. of wire fitted with a foot-piece, made to cover the thigh and leg; used after excision of the knee joint. [E.]—**Bauer's s.** See *Bauer's APPARATUS* (2d def.).—**Bavarian s.** An immovable s. made of coarse flannel soaked in plaster of Paris, gum, or chalk. The cloth is cut to the shape of the part and stitched over the limb. [E., 1.]—**Bean's interdigital s.** A s. consisting essentially of a plate of vulcanized rubber, accurately molded to a wax impression of the dental arches and kept in position by a chin compress of the same material fastened by an occipito-frontal bandage; particularly employed in comminuted fractures of the jaws. [E.]—**Billroth's knee s.** A s. consisting of a plaster bandage in which are incorporated two hinged iron strips attached to broad plates. The bandage is allowed to harden, then the front over the knee is cut out, and at the back a transverse division is made. Into this slit are inserted wedges of increasing size until the leg is straight. [A., 520 (a, 29).]—**Bond's s. for fracture of the lower end of the radius**. An apparatus consisting of two s's, one of binder's board and the other of thin, light wood, furnished with a block and edges of thin sole-leather, about an inch in height, the whole presenting somewhat the appearance of a shallow trough. They are long enough to reach from a short distance below the elbow to within an inch of the distal end of the metacarpal bones, the block resting in the palm of the hand, and both being well padded with wadding. The pasteboard s. goes upon the back of the forearm. [E.]—**Boyer's s. for fractured clavicle**. A s. consisting of a strong metal plate made to fit between the shoulders behind, where it is held in place by straps

connecting it with an abdominal belt. To this plate are buckled two cushioned straps passing over the shoulders and chest and under the axilla, which draw the shoulders backward. [E., 3.]—**Bracketed s.** A s. consisting of two metallic or wooden segments connected by brackets. [a, 34.]—**Busk's long s.** A s. in which a joint exists opposite the hip, which enables the patient, after union has taken place, to sit up without affecting the femur. [E., 1.]—**Cabot's s.** A s. made of stout iron wire for securing fixation of the joint in hip disease. [A., 520 (a, 29).]—**Cooper's s. for fracture of the great trochanter**. A long s. with a foot-piece for extension, and a leather belt passing around the pelvis. The belt is fitted with a cup for receiving and holding the trochanter. [E.]—**Crib-s.** See *Steadle-s.*—**Cripps's s.** A long s. for fracture of the femur in which extension and counter-extension are both kept up by carefully regulated elastic force. [E., 1.]—**Davis's s.** A knee-joint apparatus consisting of two metallic bands that fit about the thigh connected by two riveted rods parallel with the axis of the thigh. These bars articulate by pivot-joints with rods parallel to the axis of the leg, the latter rods being riveted to bands that fit about the leg. [a, 34.]—**Davis's s. for coxalgia**. A s. intended to exert extension and admit of motion. It consists of an external steel plate, extending from a short distance above the ankle to the crest of the ilium, at the upper extremity of which there is a swivel for attaching a counter-extending perineal band, partly elastic and partly inelastic. At the lower end there is a screw having a button on the outer side near its free extremity, in which to fasten a strip of webbing, and which can be lengthened by a key for the purpose of extension. At the upper third of the s. there is a sliding joint by which the appliance can be lengthened or shortened, and at the lower third there is a buckle for securing a band which passes around the knee. [E.]—**Desault's s.** A long s. for fracture of the femur. It consists of one long s. extending from below the sole of the foot to the axilla, and of a short s. extending from the same point to the perineum. They are connected below by a transverse bar for receiving the extending bands, and along the leg and thigh by strips of bandage. The counter-extension is effected by a suitable thigh belt, the ends of which are passed through the mortise-holes near the upper end of the long s. [E.]—**Dupuytren's s. for fracture of the leg**. A straight wooden s., reaching from the knee to a point 3 inches below the sole of the foot, joined to a wedge-shaped cushion reaching from the knee to the ankle. The apparatus is bandaged to the inner side of the leg, the thin edge of the cushion upward. [E.]—**Fergusson's s. for the hip joint**. A long, straight s. extending from the axilla to below the foot. Counter-extension is made through the opposite thigh by means of a laced socket having a band attached to its upper extremity and connected with the upper end of the s.; used after excision of the joint. [E., 3.]—**Fox's s. for fractured clavicle**. See *Fox's APPARATUS*.—**Gilbert's long s.** A s. stretched along the outer side of each lower limb from a point a few inches below the sole to within a short distance of the axilla. The extending strips, tied under the sole of the foot and secured to a horizontal block, were controlled by a tourniquet, while the counter-extending strips were carried along the pelvis, both in front and behind, and firmly fastened by transverse bands passed around the hip-bones, the back, and the abdomen. Used in fracture of both thighs. [E.]—**Gordon's s.** A side s. for the arm and hand in Colles's fracture. [E.]—**Hamilton's s. for fracture of the patella**. A triangular apparatus, of which one side rests on the bed, a second side is vertical and is hinged to the lower end of the first, and the third slants from the upper end of the first to the upper end of the second, and is also attached to the upper end of the first by hinges. To this third piece the leg and thigh are fastened, and it is then raised and fastened to the second at any desired angle. In this way the muscles of the thigh are relaxed, while the fragments of the patella are held in apposition by straps which pass over the bone and under the board on which the limb rests. [E.]—**Hammond's s.** A wire s. for fractures of the lower jaw. It consists of a wire frame fitting closely over the teeth, where it is fastened in place by other pieces of fine wire passed around it between the different teeth. [E., 1.]—**Heath's s. for the elbow**. A s. used for extension and counter-extension after excision of the elbow. It consists of a firm band surrounding the arm, of another surrounding the forearm, and of two straight metallic rods connecting them. By means of screws the apparatus may be lengthened to any extent necessary to separate the parts of the joint. [E.]—**Hodgen's suspension s.** See *Hodgen's APPARATUS*.—**Interdental s.** A s. used for treating fractures of the jaw. It consists of a dentist's lower cup having a flat bottom and square sides that is filled with some plastic material and introduced into the mouth as when taking an impression for a lower set of teeth. A bandage is then placed over the head and chin. [a, 34.]—**Levis's s. for fractured clavicle**. See *Levis's APPARATUS*.—**Lister's s.** A long s. for treating fractures of the thigh, extending from the axilla to below the sole of the foot. [E.]—**McIntyre's s.** A posterior s. for the leg and thigh, in the form of a double inclined plane. The two pieces are connected by a screw-and-nut arrangement beneath them, by means of which the angle of inclination may be altered at will. [E.]—**Mento-dental s.** A s. consisting of a stiff wire chin-support covered with canvas to which head and neck bandages may be pinned; the wire is attached to a tray, and the latter is connected by means of a screw and rods with a second tray that holds a semi-ovoid concave rim for covering the teeth. ["Jour. of the Am. Med. Assoc.," Jan. 21, 1893, p. 55 (a, 34).]—**Moon's s.** An interdental s. for fracture of the lower jaw, made in halves which may be adapted to a jaw of any size. [E.]—**Morgan's s.** An extension s. for fracture of the femur in which the extending force is carried from the foot through a pedal cross-bar to a long s. applied to the other femur. [E., 1.]—**Neill's s. for the leg**. A s. consisting of a fracture box with extension made by fastening the lower part of the leg to the foot-board, and counter-extension made by adhesive straps passed through holes in the upper part of the box and tied on the outside. [E., 3.]—**Nélaton's s. for Colles's fracture**. A

pistol-shaped s. consisting of two pieces, one for the inner and the other for the outer aspect of the forearm. [E.]—**Neudorfer's s.** Strips of fabric covered with soft plaster of Paris and applied beneath a bandage. [a, 34]—**Packard's bracketed s.** A long s. divided into two parts connected by iron rods, for the treatment of compound fractures. Through the space thus left a ready access is permitted to the wound. [E.]—**Physick's long s.** A modification of Desault's s. (q. v.). [E.]—**Price's s.** A bracketed s. for the thigh and leg; used after excision of the knee joint. [E, 2.]—**Sayre's s. (for the ankle).** A s. consisting of a steel collar to surround the leg, a foot-piece to fit the sole of the foot, and two rods, each having a male and a female screw, and connected with the band and foot-piece—the anterior rod by a hinge and stirrup. The limb is prepared for the apparatus by first placing longitudinally around the leg strips of adhesive plaster long enough to extend from the ankle to the tubercle of the tibia. These strips are additionally secured by covering them with a roller, leaving about three inches of their upper extremities exposed. The band of the instrument is opened, slipped around the leg, and clasped, and the free ends of the adhesive strips are turned over the collar and fixed by a roller. The foot at the same time is placed upon the foot-piece and fastened by adhesive plaster and a bandage. With a key the screws in the two rods are next turned, increasing the extension until the patient realizes the required support. [E.]—**Sayre's s. for coxalgia.** A s. made on the same principle as Davis's s., but modified so that for walking extension is made from the thigh and counter-extension from the groin, the appliance not extending below the knee. It consists of an extensible steel bar made up of two sections, one running within the other and reaching from the crest of the ilium to a point 2 inches above the lower end of the femur. At its upper end, and connected with it by a ball-and-socket joint, is a well-padded pelvic band, to which one or two perineal bands are attached for counter-extension. At the lower end of the bar is a rectangular branch, designed to include a part of the inner side of the thigh, and at the lower end of both the outer and inner pieces of metal are rollers, over which run the tabs attached to the ends of the adhesive plaster used for extension. [E.]—**Sayre's s. (for the knee).** A s. consisting of two steel collars, one inch wide, which encircle respectively the thigh and the leg below the knee. These collars admit of being opened and then closed and locked by a hinge and clasp, and are connected with each other by two rods which can be lengthened or shortened by a rack and pinion, worked by a key. This apparatus is secured to the limb by means of adhesive plasters placed longitudinally around the thigh from the lower end of it almost to the groin, and in the same manner around the leg from the head of the tibia to a little above the ankle. These plasters are bound to the leg and thigh by a roller, leaving about two inches of each uncovered. The s. is next slipped around the thigh and leg, and after being adjusted, is fixed in position by turning the ends of the plaster (left uncovered by the roller) over the bands and securing them by the turn of another bandage. Extension and counter-extension are made by screws connected with the lateral rods. [E.]—**Sector s.** Two terminal plates of thin, perforated metal, connected with each other by a bridge consisting of a sector and two overriding slotted steel strips, connected by three thumb-screws or key-clamps. Used in treating fractures or deformities. [a, 34.]—**Shaffer's s. for knock-knee.** An adjustable s. which can be bent to any lateral angle by turning the key which works a traction rod. The s. is applied to the limb in its deformed position and buckled tightly in place, and then by turning the key the s. is straightened and with it the limb. [A, 520 (a, 29).]—**Smith's anterior s.** See under *Suspension apparatus*.—**Smith's s. for ununited fracture.** An apparatus made on the same principle as the ordinary club-foot apparatus, consisting of a shoe and a leg- and thigh-piece, connected by hinges and fastened around the limb by straps and buckles. [E, 3.]—**Stendle's s.** The use of a steidle, bedstead, or crib for the purposes of a s., in treating fractures of the thigh. The upper portion of the body is attached to the head and the fractured limb to the foot and each side of the limb by bandages. [S. W. Hope, "Brit. Med. Jour.," Nov. 21, 1885, p. 963 (a, 34).]—**Stillman's s.** See *Sector s.*—**Swinburne's s. for Colles's fracture.** A s. consisting of a single wooden straight s. placed along the posterior aspect of the forearm and reaching from the elbow to the metacarpophalangeal joints. It is fitted with two compresses, one of which fills the concavity of the carpus, while the other supplies the deficiency in the straight line of the arm above. The s. is secured with adhesive straps or arranged so as to make extension and counter-extension. [E.]—**Swinburne's s. for the leg.** A long, narrow, straight wooden s. and foot-piece. The foot is bandaged to the foot piece, and counter-extension is made from the knee by strips of plaster looped about the limb below the joint and fastened by a rope passed through the loop and then through a hole in the side opposite the middle of the thigh. [E.]—**Tamplin's s.** A modification of Scarpa's shoe for the treatment of talipes. [E, 14.]—**Taylor's s. for coxalgia (modified by Sayre).** A long s. consisting of two bars, one working within the other, and extending from the crest of the ilium to the sole of the foot, underneath which is fastened to the shoe. At its upper extremity is an iron girdle, and to this are attached two perineal bands, one for the sound and the other for the affected limb. There is also a knee-pad. [E.]—**Thomas's knee s.** A s. for relieving the knee joint from the pressure of the weight of the body by transferring it to the ischium and perineum. It consists of two parallel metallic bars connected by a piece of sacking or leather, with a foot-piece and a metallic patten at their lower extremities, and also a ring, well padded, and attached, at an angle of 53°, to the upper ends of the rods, and having a buckle in front and behind for the attachment of a strap. [E, 2.]—**Thomas's s. for hip-joint disease.** A s. made long enough to extend from the middle of the posterior surface of the leg to the middle of the trunk. It consists of thin sheet steel 1 inch wide and  $\frac{3}{8}$  inch thick, and is bent so as to rest close up against the tuber ischii, beneath the nates. On it are

placed two semicircular strips of strap-iron, the one on the thigh part of the iron and the other on the leg part. These may be slid up or down. Two short segments of metal are also connected to the upper end of the s., and are designed to embrace half the circumference of the body. A shoe with a cork sole  $\frac{2}{4}$  or 3 inches high, designed for the foot of the sound limb, is also required. The patient stands on the sound limb, with a block placed beneath the foot of the affected limb, high enough to correct the obliquity of the pelvis and the inclination of the spine. The s. is next placed along the posterior surface of the leg, the thigh, the buttock, and the back, and bent so as to conform exactly to the outlines of these parts. A plain roller is then applied around the limb, beginning at the middle of the leg and continuing it up to the groin, from which point it is passed to the body, and ended by a few circular turns beginning about the crests of the ilia and terminating at the lower angle of the scapula. For this roller, which is merely a protective for the skin, one leg of a pair of woolen drawers may be substituted. A plaster roller-bandage is next applied around the limb at the middle of the leg, at the knee, and around the thigh a short distance below the buttock; after which the plaster bandage is made to encircle the body as high as the lower angle of the scapula, care being taken to protect the crests of the ilia. The s. is next placed in position along the posterior aspect of the leg, thigh, and buttock, and is secured by a second and third plaster roller following the same order as the first. After the plaster has hardened it may either be left undivided or split up along the anterior surface and secured by straps. [E, 2.]—**Vance's s.** A leather s. intended to fix the joint in hip disease. [A, 520 (a, 29).]—**Welch's leg s.** A double s., one part guttered and having the general shape of the leg and foot, the other straight; used for fracture of the tibia. [E.]—**Welch's shoulder s.** An angular guttered s. for covering the cap of the shoulder and outer surface of the arm in cases of fracture high up in the humerus. [E.]

**SPLINTCHINA** (Ger.), n. Spli<sup>2</sup>nt<sup>2</sup>ch<sup>2</sup>en-a<sup>2</sup>. Yellow cinchona devoid of suberous layers. [a, 35.]

**SPODE** (Fr.), n. Spod. 1. Zinc oxide obtained by calcination. 2. White calcined ivory. [A, 385.]

**SPODIACON** (Lat.), **SPODIACUM** (Lat.), n's n. Spo<sup>2</sup>d-(i)<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o<sup>2</sup>n, -u<sup>2</sup>m(u<sup>2</sup>m). Gr., σποδιακόν (from σποδός, ashes). A certain old ash-colored collyrium. [A, 325 (a, 48).]

**SPODIOMYELITIS** (Lat.), n. f. Spod(spo<sup>2</sup>d)-i<sup>2</sup>-o(o<sup>2</sup>)-mi(mu<sup>2</sup>)-e<sup>2</sup>l(i<sup>2</sup>e)-i<sup>2</sup>ti<sup>2</sup>s. Gen., -i<sup>2</sup>ti<sup>2</sup>dos (-idis). From σποδός, gray, and μυελός, marrow. Fr., *spondiomyélite*, *spondomyélite antérieure aiguë*. See *Acute anterior poliomyelitis*.

**SPODIUM** (Lat.), n. n. Spod(spo<sup>2</sup>d)-i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Gr., σποδίων (from σποδός, ashes). An old name for animal charcoal. [E.]—**S. Græcorum.** See *ALBUM græcum*.

**SPOGEL**, n. See *ISPAHUL*.

**SPONDIAS** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>-a<sup>2</sup>s(a<sup>2</sup>s). Gen., -i<sup>2</sup>ados (-is). Gr., σπονδιάς. Fr., s., *mombin*. Ger., *Mombin*; *Jaume*. Hog-plum; a genus of trees of the *Spondiaceæ*, or *Spondiææ*, which are a tribe or order of the *Anacardiaceæ*. [a, 35.]—**S. cytherea**, **S. dulcis**. Fr., *arbre de Cythère*. Otaheite apple; a species cultivated in the Friendly and Society Islands for its edible fruit, which is aperient and refrigerant. The leaves are eaten. [a, 35.]—**S. lutea**. Fr., s. *jaune*. Golden apple, Jamaica plum, yellow hog-plum; an astringent species of the West Indies and South America. [a, 35.]—**S. mangifera**. Hog-plum or wild mango of the East Indies. The root is used as an emmenagogue, the powdered root-bark as an antidiysenteric, and the wood in gonorrhœa, leucorrhœa, etc. A mild, insipid gum exuding from the bark is used as a tonic and in fumigations. The fruit is eaten; and in China its juice is a constituent of several hair tonics. [a, 35.]—**S. mombin**, **S. mombin**, **S. purpurea**. Fr., s. *d fruits rouges*, *prunier d'Espagne*, *ramboustin*. Ger., *purpurrotte Mombin*. Spanish plum, purple hog plum of the West Indies and tropical South America. The sugary, acidulous drupes are used medicinally like prunes. The seeds are poisonous. Most parts of the tree are mildly astringent. The leaves are a feeble anodyne and diaphoretic, and the flower-buds are used as a sweetmeat with sugar. [a, 35.]—**S. tuberosa**. A Brazilian species. The tubers contain a potable sap, and the ripe fruits are used as a refrigerant. [a, 35.]—**S. venulosa**. A species with an aromatic and astringent bark. [a, 35.]

**SPONDYALGIA** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-a<sup>2</sup>l(a<sup>2</sup>l)-i<sup>2</sup>a<sup>2</sup>. From σπόνδυλος, a vertebra, and άλγος, pain. See *CACORRHACHITIS*.

**SPONDYLARTHROSIS** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-a<sup>2</sup>rth-r(i<sup>2</sup>re)-i<sup>2</sup>ti<sup>2</sup>s. Gen., -i<sup>2</sup>ti<sup>2</sup>dos (-idis). From σπόνδυλος, a vertebra, and ἄρθρον, a joint. Inflammation of the vertebral articulations. [E.]—**S. synovialis**. Of Hüller, inflammation of the synovial membrane of the oblique processes of the vertebrae. [A, 326 (a, 21).]

**SPONDYLARTHROACE** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-a<sup>2</sup>rth-ro<sup>2</sup>k(a<sup>2</sup>s)-e(a). Gen., -thro<sup>2</sup>aces. From σπόνδυλος, a vertebra, and ἄρθρον, a joint, and ἄκας, evil. Fr., s. *Caries of the vertebrae*. [E.]

**SPONDYLEXARTHROSIS** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-e<sup>2</sup>x-a<sup>2</sup>rth-ro<sup>2</sup>s(i<sup>2</sup>ti<sup>2</sup>s). Gen., -thro<sup>2</sup>oses (-is). From σπόνδυλος, a vertebra, and ἐξάρθρωσις, a dislocation. Fr., *spondylexarthrose*. Dislocation of a vertebra. [E.]

**SPONDYLITIS** (Lat.), n. f. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-i<sup>2</sup>ti<sup>2</sup>ti<sup>2</sup>s. Gen., -i<sup>2</sup>ti<sup>2</sup>dos (-idis). From σπόνδυλος, a vertebra. Fr., *spondylite*. Inflammation of one or more vertebrae. [E.] Cf. *POLL'S DISEASE*.—**S. cervicalis**. Arthritis of the cervical vertebrae. [A, 57 (a, 14).]—**S. deformans**. Chronic rheumatic or gouty arthritis of the vertebral column terminating in ankylosis and deformity. [A, 520 (a, 20).]—**S. tuberculosa**. Tubercular s.

**SPONDYLIZEMA** (Lat.), n. n. Spo<sup>2</sup>nd-i<sup>2</sup>(u<sup>2</sup>l)-i<sup>2</sup>z(e<sup>2</sup>z)-em(am)<sup>2</sup>-a<sup>2</sup>. Gen., -em<sup>2</sup>alos (-alis). From σπόνδυλος, a vertebra, and ἱζημα, a subsiding. Fr., *spondylizème*. Of Hergeott, pelvic obstruction in which, instead of mere spondylolisthesis, there is destruction,

total or partial, of the body of a vertebra, as in Pott's disease, so as to allow the vertebra above it to sink into its place. [Auvard, "Union méd.," May 1, 1884, p. 759; A, 15.]

**SPONDYLOCACE** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{k/a}^2\text{s(a}^1\text{k)-e(a).}$  Gen., -oc/acea. From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\kappa\alpha\kappa\acute{o}\varsigma$ , evil. See SPONDYLARTHROCAE.

**SPONDYLODYNIA** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{(a)-di}^2\text{n-}$  (du<sup>n</sup>)/i<sup>2</sup>-a<sup>2</sup>. From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\delta\acute{o}\nu\eta\eta$ , pain. See CARORRHACHITIS.

**SPONDYLOLISTHESIS** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{l-i}^2\text{sth-}$  e(a<sup>1</sup>/si<sup>2</sup>s. Gen., -es/eos (-is). From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\delta\iota\lambda\iota\sigma\theta\eta\sigma\iota\varsigma$ , a sliding. Fr., *spondylolisthésis*, *spondylolisthèse*, *glissement de la colonne vertébrale*. Ger., *Wirbelglitt*. Of Kilian, a deformity of the vertebral column due to the lumbar vertebrae gliding upon each other, so as to overhang and obstruct the brim of the pelvis, the body of the last lumbar vertebra, especially, being separated from that of the first sacral vertebra. Cf. *Spondylolisthætic PELVIS*, *PELVIS obiecta*, and SPONDYLIZEMA.

**SPONDYLOMYELITIS** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{(a)-mi-}$  (mu<sup>n</sup>)/e<sup>2</sup>-li/i<sup>2</sup>/ti<sup>2</sup>s. Gen., -it/idos (-idis). From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\mu\epsilon\lambda\acute{o}\varsigma$ , marrow. See SPONDYLITIS.

**SPONDYLOPATHIA** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{(a)-pa}^2\text{th-}$  (pa<sup>2</sup>th)/ie/a<sup>2</sup>. From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\pi\acute{\alpha}\theta\omicron\varsigma$ , disease. Fr., *spondylopathie*. Any vertebral disease.

**SPONDYLOPTOSIS** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{pt-os}^2\text{/i}^2\text{s.}$  Gen., -ptos/eos (-is). From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\pi\tau\acute{o}\varsigma$ , a falling. See SPONDYLOLISTHESIS.

**SPONDYLOPYOSIS** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{(a)-pi}^2\text{(pu}^2\text{-}$  os/i<sup>2</sup>s. Gen., -os/eos (-is). From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\pi\acute{\nu}\omega\upsilon\varsigma$ , pus. Vertebral disease attended by the production of pus. [E.]

**SPONDYLOSCHISIS** (Lat.), n. f.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{sch}^2\text{(o}^2\text{sch}^2\text{'-}$  i<sup>2</sup>a/i<sup>2</sup>s. Gen., -schis/eos (-osch/i<sup>2</sup>is). From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\sigma\chi\iota\sigma\iota\varsigma$ , a fissure. A lack of ossification, either unilateral or bilateral, in the arch of the fifth lumbar vertebra; said to be one of the causes of spondylolisthesis. [F. L. Neugebauer, "Arch. f. Gyn.," xxii, 3; "Rev. d. sci. méd.," Jan., 1885, p. 443.]

**SPONDYLOMOTY**, n.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-o}^2\text{m-i}^2\text{-}$  From  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ , a vertebra, and  $\tau\omicron\mu\acute{\eta}$ , a cutting. Fr., *spondylotomie*. Ger., *Spondylotomie*. See RHACHITOMY.

**SPONDYLUS** (Lat.), n. m.  $\text{Spo}^2\text{nd-i}^2\text{l(u}^1\text{)-u}^2\text{s(u}^1\text{s).}$  Gr.,  $\sigma\pi\acute{o}\nu\delta\upsilon\lambda\omicron\varsigma$ . Fr., *spondyle*. See VERTEBRA and VERTICILLUS.

**SPONGE**, n.  $\text{Spu}^2\text{n}^1\text{j.}$  Gr.,  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ . Lat., *spongea*, *spongia*. Fr., *éponge*. Ger., *Schwamm*, *Meerschwamm*. It., *spugna*. Sp., *esponja*. An individual of the *Spongia*, *Spongia*, or *Spongida*, a class of the *Cœlentera* or of the *Protozoa*; as commonly used, the horny or fibrous skeleton of such an individual. [L.]—**Burnt s.** [U. S. Ph., 1850]. See CARBO SPONGIÆ.—**Compressed s.** Lat., *spongia compressa* [Belg. Ph.] (*seu pressa* [Austr. Ph., Hung. Ph., 2d ed.], *seu funicularis* [Fr. Cod.]), *spongiæ compressæ* [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. Fr., *éponge préparée à la cire* [Fr. Cod., 1868] (*ou à la ficelle* [Fr. Cod.]). Ger., *Pressschwamm*. Sp., *esponja preparada* [Sp. Ph.]. Fine s's, cleansed and exposed to pressure—being wound about with fine thread for the purpose, according to many of the ph's. [B, 95 (a, 38).]—**Honeycomb s.** See SPONGIA EQUINA.—**Levant s.** See EUSPONGIA OFFICINALIS.—**Prepared s.** See SPONGIA PRÆPARATA.—**River s.** See SPONGIA FLUVIATILIS.—**S-particle.** See SARCOD.—**Turkeys.** See EUSPONGIA OFFICINALIS.—**Vegetable s.** See LUFFA AEGYPTIACA.—**Waxed s.** See SPONGIA CERATA.

**SPONGE-HOLDER**, n.  $\text{Spu}^2\text{n}^1\text{j'hold-u}^2\text{r.}$  Ger., *Schwammhalter*. A rod terminating in a clasp-like device for grasping a sponge, to which it serves as a handle.—**Finger s.-h.** A s.-h. with a thimble at one end, for use within the throat. [E.]

**SPONGIA** [Swiss Ph.] (Lat.), n. f.  $\text{Spo}^2\text{n(spo}^2\text{n}^2\text{'j}^2\text{i}^2\text{g}^2\text{i}^2\text{-a}^2\text{.}$  Gr.,  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , *spongia*. Fr., *éponge fine* [Fr. Cod.] (1st def.). Sp., *esponja* [Sp. Ph.] (1st def.). 1. A sponge. In pharmacy, *S. officinalis*, or, according to the Fr. Cod., Belg. Ph., and Sp. Ph., *S. usitatissima*, washed and pressed. The Finn. Ph. and Norw. Ph. require Mediterranean sponges; the Swed. Ph. allows also sponges from the Red Sea. 2. See TONSIL. [B, 95 (a, 38).]—**Carbo spongiæ** [Gr. Ph.]. See CARBO SPONGIÆ.—**Pulvis spongiæ ustæ** [Fr. Cod.]. Fr., *poudre d'éponge torréfiée* [Fr. Cod.]. Fine sponges, cleansed, burned in a coffee-mill, powdered, and sifted through a No. 100 silk sieve [Fr. Cod.]; river sponge sifted through a 1,600-mesh sieve [Russ. Ph.]. [B, 95 (a, 38).]—**S. cerata** [Belg. Ph., Dan. Ph., Finn. Mil. Ph., Norw. Ph., Swed. Ph.], *Spongiæ ceratæ* [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. Ger., *Wachschwamm*. Fine sponges carefully cleansed, soaked in melted yellow wax, pressed in a warm press [Ger. Ph., Norw. Ph., Russ. Ph., Swed. Ph.], and, when cold, freed from the wax on their edges; used to make sponge tents. [B, 95 (a, 38).]—**S. compressa** [Belg. Ph.], *Spongiæ compressæ* [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. See COMPRESSED SPONGE.—**S. cynorrhodontis**, *S. cynosbati*. See BEDEGAR.—**S. equina**. Ordinary bath-sponge. [a, 35.]—**S. fluviatilis** [Russ. Ph.]. Small sponges found on stones or on the stalks and leaves of water plants in rivers, ponds, or swamps. [B, 95 (a, 38).]—**S. funiculo pressa** [Fr. Cod.]. See COMPRESSED SPONGE.—**S. gossypina**. Wool sponge, "lamb's wool"; a variety of *S. equina*. [a, 35.]—**S. lacinulosa**. Fr., *éponge peluchée*. A very porous, round, soft sponge found in the Mediterranean and Red Seas and the Indian Ocean. [B, 119 (a, 38).]—**S. lacustris**. A Russian species used in the fresh state by the homeopaths for the preparation of a tincture. [B, 270.]—**S. marina** [Dan. Ph., Finn. Mil. Ph., Gr. Ph., Norw. Ph., Russ. Ph., Swed. Ph.]. See *S. officinalis* [Belg. Ph.]. Fr., *éponge fine* [Fr. Cod.]. See *S. præparata* (2d def.).—**S. præparata**. 1. See *S. cerata*. 2. Sponge rendered soft and suitable for surgical purposes by maceration in cold water and separation of the calcareous matter. [a, 35.]—**S. pressa** [Austr. Ph., Hung. Ph., 2d ed.]. See COMPRESSED SPONGE.—**S. rosarum**.

See BEDEGAR.—**S. usitatissima**. Fr., *éponge fine* [Fr. Cod.]. A fine porous species of sponge admitted by the Belg. and Sp. Ph's and the Fr. Cod. for medical uses along with *S. officinalis*. [B, 95 (a, 38).]—**S. usta** [Fr. Cod., U. S. Ph., 1850]. Fr., *éponge torréfiée* [Fr. Cod.]. See CARBO SPONGIÆ.—**Spongiæ ustæ pulveratæ**. See PULVIS SPONGIÆ USTÆ.

**SPONGIN**, n.  $\text{Spu}^2\text{n}^1\text{j}^2\text{n.}$  Fr., *spongine*. Ger., *S*. The fibrous substance of sponges exhausted by water, alkalies, and feeble acids. It is analogous to sericin, and is soluble in caustic potassa and in concentrated acids. [B, 38, 48, 93 (a, 14).]

**SPONGIOBLASTS**, n. pl.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-o-bla}^2\text{sts.}$  From  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , a sponge, and  $\beta\lambda\alpha\sigma\tau\acute{o}\varsigma$ , a sprout. A variety of cells from which the stroma of gray nervous tissue develops. [L.]

**SPONGIOLA** (Lat.), n. f.  $\text{Spo}^2\text{n(spo}^2\text{n}^2\text{'j}^2\text{i}^2\text{g}^2\text{i}^2\text{-o}^2\text{l-a}^2\text{.}$  Dim. of *spongia*, a sponge. See SPONGIOLE.—**S. seminis**. See APPENDIX FUNICULARIS.

**SPONGIOLE**, n.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-ol.}$  Lat., *spongiola* (q. v.). Fr., *s*. Ger., *Schwämmchen*. 1. A spongelet; a term formerly applied to certain small bodies, especially the tender tip of a root, on account of their spongy texture and supposed property of absorbing moisture like a sponge. [a, 35.] 2. A chorionic villus.—**Pistillary s.** A stigma. [a, 35.]—**Seed s.** Of De Candolle, one of the minute bodies said to be situated upon the external surface of seeds and to induce germination by the absorption of water. [a, 35.]

**SPONGIOPILINE**, n.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-o-pil'en.}$  From *spongia*, a sponge, and  $\pi\acute{\iota}\lambda\omicron\varsigma$ , felted wool. Fr., *s*. Ger., *Filzschwamm*. A sheet, about half an inch thick, consisting of cotton-wool mingled with small pieces of sponge, coated with gutta-percha on one side; to be wrung out of hot water and applied as a poultice.

**SPONGIOPLASM**, n.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-o-pla}^2\text{zm.}$  Lat., *spongioplasma* (from *spongia*, a sponge, and  $\pi\lambda\acute{\alpha}\sigma\mu\alpha$ , anything molded). The material forming the reticulum of the protoplasm of a cell. [Schäfer (a, 34).] Cf. HYALOPASM.

**SPONGIOSA** (Lat.), n. f.  $\text{Spo}^2\text{n(spo}^2\text{n}^2\text{'j}^2\text{i}^2\text{g}^2\text{i}^2\text{-os-a}^2\text{.}$  From  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , a sponge. See CANCEROSUS TISSUE.—**Horns'** (Ger.). See NEUROGLIA and HORN FRAMEWORK.

**SPONGIOSE**, adj.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-os.}$  Lat., *spongiosus*, *spongiodes* (from  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , a sponge). Fr., *spongieux*. Ger., *spongiös*, *schwammig*, *locker*. Spongy, resembling a sponge in texture; very cellular, with the cells filled with air. The *Spongioti* of Fries are a section of the genus *Polyporus*. [a, 35.]

**SPONGOCYNANCHE** (Lat.), n. f.  $\text{Spo}^2\text{n}^2\text{-go}^2\text{(go}^2\text{'-si}^2\text{n(ku}^2\text{n}^2\text{'-}$  a<sup>2</sup>n<sup>2</sup>k(a<sup>2</sup>n<sup>2</sup>ch<sup>2</sup>)/e(a). Gen., -anch'es. From  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , a sponge, and  $\kappa\upsilon\alpha\lambda\acute{\alpha}\chi\eta$ , cynanche. Fr., *s*. See CYNANCHE TONSILLARIS.

**SPONGOID**, adj.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-oid.}$  Gr.,  $\sigma\pi\acute{o}\gamma\gamma\omicron\iota\delta\eta\varsigma$  (from  $\sigma\pi\acute{o}\gamma\gamma\omicron\varsigma$ , a sponge, and  $\epsilon\iota\delta\omicron\varsigma$ , resemblance). Lat., *spongioides*. Fr., *εσπιουοιδη*. Resembling sponge. [L, 41 (a, 43).]

**SPONGOS** (Lat.), **SPONGUS** (Lat.), n's m.  $\text{Spo}^2\text{n}^2\text{'gos, -gu}^2\text{s-}$  (gu<sup>2</sup>s). See SPONGE; in the pl., *spongi*, swollen tonsils. [L, 50 (a, 14).]

**SPONGY**, adj.  $\text{Spu}^2\text{n}^1\text{j}^2\text{-y.}$  Fr., *spongieux*. Ger., *schwammig*, *locker*. Resembling sponge in texture or in characters. [a, 17.]

**SPONTANEOUS**, adj.  $\text{Spo}^2\text{n}^2\text{-an'e}^2\text{-u}^2\text{s.}$  Lat., *spontaneus* (from *sponte*, of one's free will). Fr., *spontané*. Ger., *freiwillig* (1st def.), *wildwachsend* (2d def.). 1. Originating within one's self; produced by internal agencies or impulses, apart from external influences. [a, 48.] 2. Of plants, growing wild. [a, 35.]

**SPONTÉPARITÉ** (Fr.), n.  $\text{Spo}^2\text{n}^2\text{-ta-pa}^2\text{-re-ta.}$  See SPONTANEOUS GENERATION.

**SPOON**, n.  $\text{Spu}^2\text{n.}$  Gr.,  $\kappa\omicron\chi\lambda\iota\acute{\alpha}\rho\iota\omicron\upsilon$ . Lat., *cochlearia*. Fr., *cuvier*. Ger., *Löffel*. A utensil, consisting of a hollow part (usually more or less oval) and a stem, used in eating and feeding; also a s.-shaped instrument. [a, 48.]—**Sharp s.** A small metallic s., usually circular, and having a sharp edge, used for scraping away granulations, fungous growths, etc. Special varieties are designated according to the name of their inventors. [B.]

**SPORA** (Lat.), n. f.  $\text{Spo}^2\text{r(spo}^2\text{r}^2\text{'a}^2\text{.}$  See SPORE.—**Globulus sporarum**. Ger., *Sporenbällchen*. A round conceptacle containing four united spores. [a, 35.]

**SPORACEOUS**, adj.  $\text{Spo}^2\text{r-a-shu}^2\text{s.}$  From *sporā*, a spore. Lat., *sporaceus*. Composed of or convertible into spores. [a, 35.]

**SPORADIAL**, **SPORADIC**, adj's.  $\text{Spo}^2\text{r-ad}^2\text{'i}^2\text{-a}^2\text{l, -a}^2\text{'d}^2\text{i}^2\text{a}^2\text{l.}$  Gr.,  $\sigma\pi\omicron\text{ραδικός}$  (from  $\sigma\pi\epsilon\iota\text{ρεν}$ , to sow). Lat., *sporadicus*. Fr., *sporadique*. Ger., *sporadisch*, *zerstreut*. 1. Occurring at isolated points; of diseases, not epidemic. [a, 48.] 2. In botany, scattered, widely dispersed. [a, 35.]

**SPORANGEIOLE**, n.  $\text{Spo}^2\text{r-a}^2\text{n}^2\text{'j}^2\text{i}^2\text{-ol.}$  Lat., *sporangioleum* (from *sporā*, a spore, and  $\gamma\acute{\alpha}\gamma\epsilon\iota\omicron\upsilon$ , a vessel). Fr., *eporangiole*. A case containing sporidia. [a, 35.]

**SPORANGIUM** (Lat.), n. n.  $\text{Spo}^2\text{r(spo}^2\text{r}^2\text{'-a}^2\text{n}^2\text{'(a}^2\text{n}^2\text{'-j}^2\text{i}^2\text{(ge}^2\text{'i}^2\text{-u}^2\text{m}^2\text{'u}^2\text{m).}$  From *sporā*, a spore, and  $\gamma\acute{\alpha}\gamma\epsilon\iota\omicron\upsilon$ , a vessel. Fr., *sporangie*. Ger., *Sporenhälter*, *Sporenghäuse*, *Sporangie*. A spore-case containing non-sexual spores. [a, 35.]

**SPORANGIDIUM** (Lat.), n. n.  $\text{Spo}^2\text{r(spo}^2\text{r}^2\text{'-a}^2\text{n}^2\text{'(a}^2\text{n}^2\text{'-j}^2\text{i}^2\text{d}^2\text{(gi}^2\text{'d}^2\text{'-i}^2\text{u}^2\text{m}^2\text{'u}^2\text{m).}$  Fr., *eporangidium*. Of Bischoff, the theca of mosses.

**SPORE**, n.  $\text{Spo}^2\text{r.}$  Lat., *spora*. Fr., *s*. Ger., *S*. A specialized cell, consisting essentially of a nucleated mass of protoplasm (usually inclosed by a cell-wall), capable of developing into a new individual. The term is usually restricted to the free reproductive cells of cryptogams, the s's of phanerogams being known as ovules and pollen. [a, 35.] Cf. CARPOSPORE, CHLAMYDOSPORE, GYMNOPORE, MACROSPORE, MENISPORE, MICROPORE, OOSPORE, PROTOPORE, TELENTOPORE, UREDOPORE, ZOOSPORE, and ZYGOSPORE.—**Autumn s's.** The teliospores of the *Uredineæ*. [a, 35.]—**Coat s.** See CHLAMYDOSPORE.—**Compound s's.** S's that become septate by division and produce secondary s's (merisporous). [a, 35.]—**Dauers' (Ger.).** See RESTING-CELL.—**Daughter s's.** S's pro-

duced together in a cyst or mother-cell. [a, 35].—**Inactive s.** A non-motile, reproductive cell. [a, 35]. Cf. *Resting-cell*.—**Mother-s.** A cell or cyst containing s's; more properly, a mother-cell. [a, 35].—**Naked s.** See *Gymnospor* (1st def.).—**Primary s.** See *Protospor*.—**Resting s.** See *Resting-cell*.—**Secondary s.** See *Teleutospore* and *Merispor*.—**S.-case.** See *Sporangeium*.—**S'-nblase** (Ger.). See *Sporocyst*.—**S'-nfrucht** (Ger.). See *Sporocarp*.—**S'-nhaat** (Ger.). See *Sporoderm*.—**S'-nplanze** (Ger.). See *Cryptogam*.—**S'-nschicht** (Ger.). See *Hymenium*.—**S'-nschlauchpilze** (Ger.). See *Ascomycetes*.—**S'-nträger** (Ger.). See *Sporophore*.—**S.-sac.** See *Sporangeium*.—**Summer s's.** The urospores of the *Uredineae*. [a, 35].—**Swarm s.** See *Flagellula* and *Zoospore*.—**Winter s's.** See *Autumn s's*.

**SPORID**, n. Spor'id. Lat. *sporidium* (from *σπορά*, a spore). Fr., *sporidie*. Ger., *Sporidie*. A small spore; a reproductive cell produced within a cyst or ascus. [a, 35].

**SPORIDIOLA** (Lat.), n. f. Spor(spo'r)-i'd-i(i²)/o'l-a². See *SPORULE*.

**SPORIDIUM** (Lat.), n. n. Spo'r-i'd-i²/u²m(u²m). See *SPORID*.

**SPORIFEROUS**, adj. Spo'r-i-f'e'r-u²s. From *σπορά*, a spore, and *ferre*, to bear. Fr., *sporifère*. Ger., *sporenführend*. Bearing spores. The *Sporifera* are a section of the *Fungi*. [a, 35].

**SPORISORIUM** (Lat.), n. n. Spor(spo'r)-i²-sor'i²-u²m(u²m). Fr., *sporisorie*. The genus *Tilletia*. [a, 35].—**S. maidis**. A species parasitic on Turkish corn, said to produce pellagra. [B, 108 (a, 14)].

**SPORN** (Ger.), n. Spo'rn. See *Calcar* and *Hippocampus minor*.—**Hahmens'.** See *Hippocampus minor*.

**SPOROCARP**, n. Spo'r-o-kar'p. Lat., *sporocarpium* (from *σπορά*, a spore, and *καρπός*, a fruit). Fr., *sporocarpe*. Ger., *Sporenfrucht*, *Keimfrucht*. The fructification in cryptogams, especially the pluricellular body produced in the *Carpoporeae* by the fertilization of the carpospogonium. [a, 35].

**SPOROCLADIUM** (Lat.), n. n. Spor(spo'r)-o(o²)-klad(kla²d)/i²-u²m(u²m). From *σπορά*, a spore, and *κλάδος*, a branch. In some *Algae*, a branch bearing spores. [a, 35].

**SPOROCYST**, n. Spor'o-si²st. Lat., *sporocystis* (from *σπορά*, a spore, and *κύστις*, a bladder). A sporangium in *Algae*. [a, 35].

**SPORODERM**, n. Spo'r-o-du'r'm. Lat., *sporodermis* (from *σπορά*, a spore, and *δέρμα*, the skin). Ger., *Sporenhaut*. The wall or envelope inclosing the nucleus of a spore. [a, 35].

**SPOROGENIUM** (Lat.), n. n. Spor(spo'r)-o(o²)-gon(ge²n)/i²-u²m(u²m). From *σπορά*, a spore, and *γόνος*, offspring. Fr., *sporigène*. 1. A sporangium. 2. The sporocarp in *Muscinæ*. [a, 35].

**SPOROPHORE**, n. Spo'r'o-for. Lat., *sporophorum* (from *σπορά*, a spore, and *φόρος*, bearing). Fr., s. Ger., *Sporenträger*. Lit., a spore-bearer; in phanerogams, the placenta; in certain *Fungi*, the basidium; in mosses, that part of the sporogonium that bears the spores, also the sporophyte. [a, 35].

**SPOROPHYLL**, n. Spo'r'o-fl²l. Lat., *sporophyllum* (from *σπορά*, a spore, and *φύλλον*, a leaf). Fr., *sporophylle*. A foliar organ bearing spores. [a, 35].

**SPOROPHYTE**, n. Spo'r'o-fl²t. From *σπόρος*, seed, and *φυτόν*, a plant. Fr., s. 1. A cryptogam. 2. In the *Bryophyta* and *Pteridophyta*, the plant bearing the non-sexual spores. [a, 35].

**SPOROS** (Lat.), n. n. Spor(spo'r)/o²s. Gr., *σπόρος* (from *σπερειν*, to sow). See *SEMEN*.

**SPOROSAC**, n. Spo'r'o-sa²k. From *σπόρος*, seed, and *σάκος*, a sac. Fr., s. One of the simple generative buds of certain hydroids in which the medusoid structure is not developed. [B, 28 (a, 27)].

**SPOROTRICHUM** (Lat.), n. n. Spo'r-o-t'r'i²k(r'i²eh²)-u²m(u²m). From *σπόρος*, seed, and *τρίχ*, a hair. Fr., *sporotriche*. A genus of hyphomycetous *Fungi*. The *Sporotricha* are a cohort of *Fungi*; the *Sporotrichaceae*, a family of *Hyphomycetes*; the *Sporotrichaceae*, a division of the *Mucedinæ*; and the *Sporotrichi*, a section of the *Mucedinæ*. [a, 35].—**S. dermatodes**. A species that infests Provence cane, in the shape of a whitish, pulverulent mold, of a disagreeable, irritating odor, provocative of sneezing. Contact with it gives rise to *maladie des cannes*.

**SPOROZOEA** (Lat.), n. n. pl. Spor(spo'r)-o(o²)-zo²a². From *σπόρος*, a spore, and *ζωον*, an animal. Fr., *sporozoites*. Ger., *Sporozoen*. A class of cortical unicellular, endoparasitic *Protozoa* reproducing by spores. [L, 121].

**SPORET**, n. Sport. A shoot bearing leaves, flowers, or fruit different in character from those of the parent plant. [a, 35].

**SPORULE**, n. Spo'r'u²l. Lat., *sporula* (dim. of *spora*, a spore). Ger., s., *Sporchen*. 1. See *SPORE*. 2. A diminutive spore. 3. A granule contained within a spore. 4. A sporid. [a, 35].

**SPORULOUS**, adj. Spo'r'u²l-u²s. Lat., *sporulus* (from *sporula*, a little spore). Fr., *sporuleuse*. Of *Fungi*, having peridia containing many sporules. [B, 38 (a, 35)].

**SPOT**, n. Spo't. Gr., *στίγμα*, *στίλος*. Lat., *macula*. Fr., *tache*. Ger., *Flack*. A small extent of surface differing, especially in appearance, from surrounding parts. [a, 48].—**Anterior perforated s.** of the brain. See *Anterior perforated space*.—**Blind s.** (of Mariotte). See *Optic disc*.—**Cornual s.** See *Leucoma* (3d def.).—**Embryonic s.** Ger., *Embryonal Fleck* (3d def.). 1. The germinal s. 2. See *PROTOSOMA*. 3. See *Embryonic area*.—**Germinal s.** Germinative s., Germ s. Lat., *macula germinativa* (see *germinans*). Fr., *tache germinative*. Ger., *Körnflack*, *Porehauungskern*. A nucleolus of a germinal vesicle; of R. Wagner, a more or less lenticular or spheroidal aggregation of granules contained within the germinal vesicle in contact with the inner surface of its wall, supposed by him to be the true germ of the embryo. [A, 4].—**Heat s.** See *Chloasma cuticarium*.—**Hectic s.** A bright-red s. on

the cheek of a person suffering from hectic fever. [a, 34].—**Hepatic s.** See *Chloasma* (1st def.).—**Igneal s.** See *Epheles ab igne*.—**Lenticular s's.** Lat., *maculae lenticulares*. See *LENTIGO* and *ROSEOLA typhosa*.—**Light s. on the membrana tympani**. Ger., *Lichtkegel*. A sharply defined and usually triangular s. of light situated in the inferior quadrant of the tympanic membrane. Its apex is in front of the umbo, and it extends forward and downward so that it forms an obtuse angle forward with the direction of the handle of the malleus. Its shape varies greatly on account of differences in the inclination of the membrane and variations in its curvature. The principal cause of this light s. is the inclination of the membrane to the axis of the meatus in connection with the concavity of the membrane. [F].—**Livers s.** See *Chloasma* (1st def.).—**Mariotte's s.** The optic disc. [A, 301 (a, 34)].—**Milk s.** Fr., *tache laiteuse*. An opaque patch,  $\frac{1}{2}$  inch to 1 inch in diameter, found post mortem, on the outer aspect of the visceral layer of the pericardium, most frequently over the right ventricle, less often over the left ventricle, the left auricle, or the prominences of the coronary vessels. It is very common in persons who have passed middle life, and may or may not be detachable. [D, 1].—**Mother's s.** See *Nævus*.—**Receptive s.** In vascular cryptogams, mosses, and *Hepaticæ*, a small s. on the wall of the oosphere, near its apex, through which the antherozoids enter the oosphere to fertilize it. [a, 25].—**Rose s's.** The rose-colored maculae of the eruption of typhoid fever.—**Soldier s.** Circumscribed leucoplakia of a serous surface. [a, 34]. Cf. *Milk s.*—**S. of sömmering**. See *MACULA lutea*.—**Sun s's.** See *LENTIGO*.—**Wagner's s.** See *Germinal s.*—**Wine s.** See *Nævus flammeus*.—**Yellow s.** See *MACULA lutea*.

**SPOTTING**, n. Spo't/i²n². See *NECROSIS* (2d def.).

**SPRACHE** (Ger.), n. Spra'ch²/e². See *SPEECH*.—**Geberdens'.** See *MIMOGRAPHY*.—**Hands'.** See *CHEIROLOGY*.—**Todde S.** Of Meyer, the monotonous snuffling language of persons affected with adenoid vegetations of the pharynx. ["Rev. de laryng.", May, 1892, p. 259 (a, 50)].

**SPRACHLOSIGKEIT** (Ger.), n. Spra'ch²/los-i²g-kit. See *ALALIA*, *APHONIA* (1st def.), and *DUMBNESS*.

**SPRACHSTÖRUNG** (Ger.), n. Spra'ch²/stu²r-un². Any disorder of speech. [a, 14].

**SPRACHWERKZEUG** (Ger.), n. Spra'ch²/we²rk-tsoig. The organs of speech. [a, 48].

**SPRAIN**, n. Spran. Gr., *δυστορμία*. Lat., *distorsio*. Fr., *fou-lure*, *entorse*. Ger., *Verrenkung*. The condition of pain, swelling, etc., produced in the soft parts about a joint by a violent wrenching or straining of them without dislocation of the articular surfaces; also the lameness that follows.—**Rider's s.** A s. of the adductor longus femoris muscle, said to be caused generally by the horseman suddenly making a strong grip, owing to his horse rearing, shying, slipping, or unexpectedly taking a jump. [Morris, "Lancet," July 29, 1882, p. 133].

**SPRAY**, n. Spra. Fr., s., *pulvérisation*. Ger., *Flüssigkeitstaub*. Water or other liquid divided into fine particles by wind or a current of a gas; also a jet of liquid in such a condition. [a, 48]. Cf. *ATOMIZATION*.—**Listerian steam s.** The carbolyzed vapor from a steam atomizer used to cover the field and environment of a surgical operation. [a, 34].

**SPRAY-PRODUCER**, n. Spra'pro-du²s'/u²r. See *ATOMIZER*.—**Sass's s.-p.** Two glass tubes with fine points welded one on top of the other with the points in close apposition. Through the upper tube passes a strong current of air, while the lower one is bent at a right angle and fitted by a cork to a small glass test-tube which contains the medicated solution. [E].

**SPREIZLADE** (Ger.), n. Sprits'la²d-e². Of Renz, an extension apparatus for fractures of the femur. [L, 57 (a, 14)].

**SPREKELIA** (Lat.), n. f. Spre'k-e²-l²/a². From *Sprekelsen*, a German botanist. Fr., *sprekétie*. 1. An old name for the *Galen-thus nivalis*. 2. A genus of the *Amaryllidaceae*. [a, 35].—**S. cybaster**. Fr., *amaryllis salimbanque*. A plant referred by Benth and Hooker to the genus *Hippeastrum*. It scarcely differs from *Hippeastrum reginae*. [a, 35].—**S. formosissima**. Fr., *amaryllis magnifica* (ou reine de beauté). Ger., *Jakobs-lilie*, *spanische Lilie*. Sp., *flor de Santiago* [Mex. Ph.]. Jacobean lily. The bulbs are emetic. [a, 21, 35].

**SPREW**, n. Spru². Written, also, *sprue*. A local term for thrush. See *APHTHÆ*.

**SPRINGEN** (Ger.), n. Spr'i²n²/e²n. A variety of gid in sheep in which the animal leaps up into the air; due to the presence of *Cænurus cerebralis* in the fourth ventricle of the brain. [B].

**SPRINGFERTIG** (Ger.), adj. Spr'i²n²/fe²rt-i²g. Ready to be ruptured (said of the membranes in labor). [A, 88].

**SPRINGGURKE** (Ger.), n. Spr'i²n²/gurk-e². See *ECBALLIUM elaterium*.

**SPRING-HALT**, n. Spr'i²n²/ha²t. A disease of horses manifested by sudden, convulsive, and exaggerated lifting of the hind leg, believed to be choreic. [a, 34].

**SPRINGKRAFT** (Ger.), n. Spr'i²n²/kra²ft. See *ELASTICITY*.

**SPRING LAKE WEL**, n. Spr'i²n² lak we²l'. A place in Ot-tawa County, Michigan, where there is a saline and sulphurous spring. [Anderson (a, 14)].

**SPRINGWURM** (Ger.), n. Spr'i²n²/vurm. See *ASCARIS* (1st def.).

**SPRITZE** (Ger.), n. Spr'i²t²/ze². See *SYRINGE*.—**Klystiers'.** An enema syringe. [a, 34].—**Magens'.** See *Stomach pump*.—**Nä-sens'.** See *RUINESCHYTA*.—**Salbens'.** An ointment syringe. [a, 34].—**S'nöröhren**. The cannula of a syringe. [E].—**Thränen's.** See *DACHRYOXYN* (2d def.).

**SPRITZFLASCHE** (Ger.), n. Spritz'fla'sh-e<sup>2</sup>. A squirting-bottle; an apparatus for injecting chloroform and other volatile liquids. [L. 57 (a, 14).]

**SPROFONDO** (It.), n. Spro-fon'do. A place in Tuscany where there are alkaline springs. [L. 49 (a, 14).]

**SPROSSE** (Ger.), n. Spro'sse<sup>2</sup>. 1. A bud, a sprout. 2. A freckle.—**Gefäss'**. A vascular sprout. [H.]—**Lagers'**, **Seitens'**. See ANABLASTEMA.—**S'nbildung**. See PROLIFERATION and CELL-GENESIS.—**Urnierens'**. The rudiment of the primitive kidney of the embryo.

**SPROSSER** (Ger.), n. Spro's'se'r. See STOLON.—**Gipfels'**. See ACROBRYON.

**SPROSSUNG** (Ger.), n. Spro's'sun<sup>3</sup>. See GEMMATION.

**SPROUT**, n. Spru's'ut. A shoot; in the pl., s's, young colewort. [a, 35].—**S.-chain**. A chain of cells formed by pullulation.

**SPROUTING**, n. Spru's'ut-i'n<sup>2</sup>. See PULLULATION.

**SPRUCE**, n. Spru's<sup>2</sup>. The genus *Abies*. [a, 35.] For subheadings, see under Fir.—**Hemlock s.** See *Abies canadensis*.—**Oil of s.** See HEMLOCK-OIL.—**S. beer**. A preparation made by boiling 4 pint of essence of s. and 4 oz. each of pimenta, ginger, and hops in 3 gallons of water for five or ten minutes, straining, adding 11 gallons of warm water, 1 pint of yeast, and 6 pints of molasses, and allowing to ferment for twenty-four hours. It is diuretic and antiscorbutic. [B. 5 (a, 38); B. 98 (a, 31).]—**S. gum**. The exudation of *Abies alba* and *Abies nigra*. [Proc. of the Am. Pharm. Assoc., xxx (a, 14).]

**SPRUDEL** (Ger.), n. Sprud'e<sup>2</sup>. A bubbling or spouting spring; hence, a name for many mineral springs. [a, 14].—**S'salz**. Salts from spouting mineral springs, especially Carlsbad salt. [a, 14].—**S'stein**. A mineral deposit formed around hot spouting springs, containing calcium carbonate, especially at Carlsbad. [a, 14].

**SPRUDE**, n. Spru's<sup>2</sup>. See SPREW.

**SPRUNG** (Ger.), n. Sprun<sup>2</sup>. See FISSURE.

**SPRUNGROLLE** (Ger.), n. Sprun'ro'l-le. The superior articular surface of the astragalus. [L. 332.]

**SPÜLSCHLAUCH** (Ger.), n. Spu'l'shla<sup>2</sup>-u'ch<sup>3</sup>. An irrigating bag.

**SPULWURM** (Ger.), n. Spul'wurm. See ASCARIS and ASCARIS lumbricoides.—**S'krankheit**. See ASCARIDIASIS.

**SPUMESCENT**, **SPUMOSE**, adj's. Spu'm-e's's'nt, spu'm'os. Lat., *spumescens*, *spumosus* (from *spuma*, foam). Fr., *mousseux*. Ger., *schäumig*. Frothing, having a froth-like appearance. [a, 35.]

**SPUNK**, n. Spu'n<sup>2</sup>k. See AMADOU.

**SPUR**, n. Spu'r. Lat., *calcar*. Fr., *éperon*. Ger., *Sporn*. 1. A sharp projection, such as the hippocampus minor. 2. A projection of tissue intervening between the upper and the lower part of the intestine at the seat of an artificial anus. [Morris (A, 87).] 3. In botany, (1) in the *Coniferae*, a contracted lateral shoot bearing a tuft of leaves at its summit; (2) see under CALCAR (2d def.). [a, 35.]

**SPURGE**, n. Spu'rj. See EUPHORBIA.

**SPURGE-FLAX**, n. Spu'rj'fla<sup>2</sup>x. See DAPHNE genkida.

**SPURRY**, n. Spu'r'i<sup>2</sup>. The genus *Spergula*. [a, 35.]

**SPUTUM** (Lat.), n. Spu't(sput)'u'm(u'm). From *spuere*, to spit. Fr., *crachât*. Ger., *Auswurf*, *Spucken*. A liquid discharge ejected from the mouth (when not swallowed). It may be simply saliva, or saliva plus the mucous secretions of the air passages; or it may be more or less purulent or bloody. [D.]—**Black-pigmented s.** S. colored black by inhaled particles of carbon. [a, 34].—**Cavernous s.** Of Guttman, nummulars from a pulmonary cavity. [a, 34].—**Egg-yolk s.** Of Traube, yellows. [a, 34].—**Globular sputa**. The irregularly globular yellow masses of s. composed of mucus, pus corpuscles, epithelium, etc., observed in the later stages of bronchial catarrh, etc. [a, 34].—**Green s.** Sanguinolent s. in which there has been oxidation of the hæmoglobin, observed in croupous and caseous pneumonia. [a, 34].—**Icteric s.** S. colored yellow or green by the bile-pigment in icterus. [a, 34].—**Nummular sputa**. The thick, heavy, and roundish (somewhat coin-like) sputa of pulmonary phthisis. [D.]—**Prune-juice s.**, **Rusty (colored) s.** The typical dark reddish-brown s. of pneumonia. It is viscid and semi-transparent, and adheres tenaciously to the side of the containing vessel. Its color is due to the presence of blood. [D. 1].—**S. coctum**. A muco-purulent, yellowish, thick, opaque s., rich in cells, characteristic of the second stage of acute catarrh and also of chronic catarrh. [A. 326 (a, 21).]—**S. croceum**. See *Prune-juice s.*—**S. crudum**. The frothy, clear, mucous s. observed in the beginning of bronchial catarrh. [a, 34].—**S. fundum petens**, **Sputa globosa**, **Sputa lanuginosa**. See *Globular sputa*.—**S. pneumonicum**. See *Prune-juice s.*—**S. puriforme**. S. resembling pus. [A. 326 (a, 21).]—**Sputa rotunda**. See *Nummular sputa*.—**S. tuberculosum**. A muco-purulent or simply purulent s. occurring in pulmonary tuberculosis and cheesy pneumonia, characterized by the presence of Koch's *Bacillus tuberculosis*. [A. 326 (a, 21).]—**Yellow s.** 1. Sanguinolent s. rendered yellow by the oxidation of hæmoglobin. 2. S. rendered yellow by the presence of fungous growth. [a, 34.]

**SPYROCOLON**, n. Spir-o'k'o'l'o'n. A disease first noticed in 1820 in Greece, supposed to be a peculiar form of syphilis. [C. Wiener, "Jahrb. d. in-u. ausl. ges. Med.," xxx, p. 305 (a, 34).]

**SQUALE** (Fr.), n. Skwa'l. See SHARK.—**Huile de s.** See SHARK-OIL.

**SQUAMA** (Lat.), n. f. Skwam(skwa'm)'a<sup>3</sup>. Gr., *ἀερίς*. Fr., *squame*, *écaille*. Ger., *Schuppe*. A scale or scale-like object; in botany, usually homologous to a leaf. [a, 35].—**S. frontalis**. See *Pars ossis frontalis*.—**S. occipitalis**. See *Supra-occipital BONE*.—**S. occipitalis superior**. See *BONE of the Incas*.—**S. occipitis**

[Hallmann]. See *Epitotic BONE* and *Supra-occipital BONE*.—**S. ossis frontis**. See *Pars ossis frontalis*.—**S. ossis occipitis**. See *Supra-occipital BONE*.—**S. ossis temporis**, **S. temporalis**. The thin scale-like part of the squamous portion of the temporal bone.

**SQUAMATE**, **SQUAMATED**, adj's. Skwam'at, -at-e'd. Lat., *squamatus* (from *squama*, a scale). Fr., *squaméen* (2d def.). Ger., *schuppig*. 1. Scale-like. 2. Furnished with scales. [a, 35.]

**SQUAMATIO** (Lat.), n. f. Skwa'm(skwa'm)-a(a's)'sh'i<sup>2</sup>(t'i<sup>2</sup>)-o. Gen., -on'is. From *squama*, a scale. A disease of plants in which rosettes of scale-like leaves are produced. [a, 35.]

**SQUAMELLA** (Lat.), n. f. Skwa'm(skwa'm)-e'l'la<sup>2</sup>. Dim. of *squama*, a scale. Fr., *squamelle*. A minute scale. [a, 35.]

**SQUAMES**, n. pl. Skwamz. The cells of pavement epithelium.

**SQUAMIFEROUS**, adj. Skwa'm-i'f'e'r-u's. Lat., *squamifer*, *squamiferus* (from *squama*, a scale, and *ferre*, to bear). Fr., *squamifère*. Bearing a scale or scales. [a, 35.]

**SQUAMIFLOROUS**, adj. Skwa'm-i'f'lor-u's. From *squama*, a scale, and *flos*, a flower. Lepidanthous; having flowers resembling scales, or having small bracts colored like petals. [a, 35.]

**SQUAMOID**, adj. Skwam'oid. From *squama*, a scale, and *είδος*, resemblance. Fr., *squamoïde*. Scale-like. [C.]

**SQUAMOSAL**, adj. Skwa'm-o's'l. 1. Scale-like (see *S. BONE*). 2. As a n., in the pl., in comparative anatomy, the squamous portion of the temporal bone. [C.]

**SQUAMOUS**, adj. Skwam'u's. Lat., *squamosus* (from *squama*, a scale). Fr., *squaméux*. Ger., *schuppig*. 1. Pertaining to or resembling scales or a scale. 2. Scaly; marked by the formation of scales or by desquamation. [G.]

**SQUAMO-ZYGOMATIC**, adj. Skwam'o-zig'o-m-a't'i'k. Pertaining to the squamous portion and the zygomatic process of the temporal bone. [C.]

**SQUAMULA** (Lat.), n. f. Skwa'm(skwa'm)-u'l(u'l)-a<sup>3</sup>. Dim. of *squama*, a scale. Fr., *squamule*, *squamellule*, *squamelle*. Ger., *Schuppchen*. A small scale; of Cassini, one of the scales forming a pappus (2d def.). [a, 35.]

**SQUAMULOSE**, adj. Skwa'm-u'l-os'. Lat., *squamulosus*. Minutely squamate, covered with small scales. [a, 35.]

**SQUARROSE**, adj. Skwa'r-os'. Lat., *squarrosus*. Fr., *squar-reux*. Ger., *sparrig*. Roughened with spreading processes such as closely arranged bracts. [a, 35.]

**SQUARROSO-DENTATE**, adj. Skwa'r-os'-o-de'n't'at. Lat., *squarroso-dentatus*. Ger., *sparrig-gezähnt*. Of a leaf, having teeth which form an angle with the plane of the leaf. [a, 35.]

**SQUARROUS**, adj. Skwa'r'u's. 1. See SQUARROSE. 2. Scurfy, scabby. [G.]

**SQUELETTE** (Fr.), n. Ske'-le't. See SKELETON.—**S. dermique**. See EXOSKELETON.—**S. viscéral**. See SPLANCHNO-SKELETON.

**SQUELETTOPÉE** (Fr.), n. Ske'-le'to-pa. The art of preparing a skeleton for purposes of study. [L. 41 (a, 14).]

**SQUILL**, n. Skwi'l. Gr., *σκόλλα*. Lat., *scilla* [U. S. Ph., Br. Ph., Aust. Ph., Hung. Ph., Belg. Ph., Netherl. Ph., Roum. Ph.], *bulbus scillæ* [Ger. Ph., Swiss Ph., Norw. Ph., Swed. Ph., Dan. Ph.] (2d def.), *radix scillæ* [Fin. Ph.], *scillæ bulbus* (see *radix* [Gr. Ph.]) (2d def.). Fr., *scille* (bulbe) [Fr. Cod.], *bulbe de scille*, *ognon marin* (2d def.). Ger., *Meerzwiebel* (2d def.). 1. The genus *Scilla*. 2. The sliced bulb of *Scilla maritima* (*Urginea scilla*). [B. 5, 18 (a, 35).]—**Medicinal s.** See *S.* (2d def.).—**Red s.** *S.* (2d def.) in which the scales are of a roseate hue. It does not differ in properties from white s. [a, 35].—**White s.** *S.* (2d def.) in which the scales are colorless. [a, 35.]

**SQUILLITINE**, n. Skwi'l'i't-i'n. See SCILLITIN.

**SQUINANCY**, n. Skwi'n'a'n's-i<sup>2</sup>. Lat., *squinanthia*, *squinachia*. See CYNANCHE tonsillaris.

**SQUINE** [Fr. Cod.] (Fr.), n. Sken. See SMILAX china.

**SQUINT**, **SQUINTING**, n's. Skwi'n't, skwi'n't'i'n<sup>2</sup>. See STRABISMUS.

**SQUIRRHE** (Fr.), n. Sker. See SCIRRHUS.—**S. en cuirasse**. Of A. Velpeau, that form of s. ligneux in which the induration extends in the integument surrounding the thorax in the form of a cuirass. [A. 222].—**S. ligneux**. Of A. Velpeau, a form of cancer of the skin of the breast characterized by woody density and by shading off insensibly into the surrounding tissues. [A. 222.]

**SQUIRRHOGASTRIC** (Fr.), n. Sker-ro-ga'st-re. Scirrhus degeneration of the stomach. [L. 41, 55 (a, 14).]

**SQUIRRHUS** (Lat.), n. m. Skwi'r'u's(ru's). See SCIRRHUS.

**SRINT**, n. A disease endemic in Hungary, in which there are inflammatory swellings in the mouth, throat, or anus. [a, 14.]

**STAAR** (Ger.), n. Sta'r. See CATARACT.—**Aderhants'**, **Ader-s'**. See CATARACTA chorioidealis.—**Alters'**. See *Senile CATARACT*.—**Angewachsener S.** See *Adherent CATARACT*.—**Axioler S.** See *Nuclear CATARACT*.—**Balkens'**. See *Barré CATARACT*.—**Baumförmiger S.**, **Baums'**. See *Pigmented CATARACT*.—**Beginnender S.** See *Incipient CATARACT*.—**Blauer S.** See *Punctated CATARACT*.—**Bunter S.** See *CATARACTA marmoracea*.—**Centralinsens'**. See *Nuclear CATARACT*.—**Complicirter S.** See *Complicated CATARACT* and *Secondary CATARACT*.—**Cystischer S.** See *Morgagnian CATARACT*.—**Eiters'**. [L. 30, 135 (a, 14, 50).]—**S'extraction.** The extraction of a cataract.—**S'fell.** The lenticular capsule when it is affected with cataract.—**S'operirt.** A person who has been operated on for cataract.—**S'stöchen.** See **COUCHING.**—**S'sucht.** See **CATARACT.**—**S'ternen'.** See **Stellate CATARACT.**—**Unreifer S.** See **Immature CATARACT** and **Unripe CATARACT.**—**Weicher S.** See **Soft CATARACT.**—**Weisser S.** See **LEUCOMA** (4th def.).—**Wunds'.** See **Traumatic CATARACT.**

**STAB** (Ger.), n. **Sta<sup>b</sup>.** A rod or staff. [a, 48].—**Bergmann'scher Klangs'.** See **BAGUETTE d'harmonie.**—**Hohls'.** 1. A grooved staff or director. 2. A catheter or cannula. [E.]—**Magnets'.** See **Magnetic NEEDLE.**

**STÄBCHEN** (Ger.), n. **Sta<sup>b</sup>ch<sup>e</sup>n.** A little rod; a bacillus. [A. 521 (a, 48).]—**Gehörs'.** See **Rods of Corti.**—**S'ellipsoid.** The conical termination of a retinal rod. [L. 332.]—**S'saum.** See **Cuticular LAYER.**—**Wendungs'.** See **PORTE-FILLET.**

**STABILE**, adj. **Sta<sup>b</sup>l<sup>e</sup>.** Lat., *stabilis* (from *stare*, to stand). Fixed, stable; in medical electrization, with the electrodes held motionless. [a, 48.] Cf. **LABILE.**

**STABKRANZ** (Ger.), n. **Sta<sup>b</sup>kra<sup>n</sup>ts.** See **CORONA radiata.**—**S. des Thalamus.** Those nerve-fibres in the optic thalamus which radiate from the cerebral cortex. [I, 17 (K).]—**S'bündel.** The nerve-fibres constituting the corona radiata. [I, 17 (K).]

**STACHEL** (Ger.), n. **Sta<sup>ch</sup>el.** See **ACULEUS** and **SPINE.**—**Darmbeins'n.** See **Iliac SPINES.**—**Gaumens'.** See **Posterior nasal SPINE.**—**Gesässbeins'.** See **SPINE of the ischium.**—**Hinterhaupt's.** See **External occipital PROTUBERANCE.**—**Hüftbeins'n.** **Hüfts'n.** See **Iliac SPINES.**—**Kinns'n.** See **Genial TUBERCLES.**—**Nasens'.** See **Nasal SPINE.**—**Roll's.** See **HAMULUS trochlearis.**—**Sitzbeins'.** See **SPINE of the ischium.**—**S'beere.** See **RIBES.**—**S'ig.** See **ACULEATE** and **ECHINATE.**—**S'panzer.** The prolongations or prickles of a cell of the epidermis. [G.]—**Wespenbeins'.** See **SPINA angularis.**

**STACHELBECKEN** (Ger.), n. **Sta<sup>ch</sup>el<sup>e</sup>be<sup>k</sup>e<sup>n</sup>.** See **ACANTHOPELVIS.**

**STACHELBERG** (Ger.), n. **Sta<sup>ch</sup>el<sup>e</sup>ber<sup>g</sup>.** A place in the canton of Glarus, Switzerland, where there is a sulphurous spring. [L. 30, 49, 57 (a, 14).]

**STACHYDREUS** (Ger.), n. **Sta<sup>ch</sup>dr<sup>e</sup>us.** 1. The genus *Trapa*. [a, 35.] 2. See **DATURA stramonium.**

**STACHELSCHWEIN** (Ger.), n. **Sta<sup>ch</sup>el<sup>e</sup>sch<sup>w</sup>in.** See **HYSTRIX** (3d def.).—**S'aussatz.** **S'krankheit.** See **HYSTRICIASIS.**—**S'menschen.** A person affected with ichthyosis hystrix. [G.]

**STACHYOPTERIDES** (Lat.), n. f. pl. **Stach<sup>o</sup>pt<sup>er</sup>id<sup>e</sup>s.** (115) <sup>o<sup>2</sup>pt<sup>er</sup>id<sup>e</sup>s</sup> (14-ez-e<sup>2</sup>s). From *stachys*, an ear, and *ptéris*, a fern. Ger., *Achrenfarne*, *Achrenfarren*. Of Willdenow, an order of cryptogams corresponding in part to the *Equisetaceae* and the *Lycopodiaceae*. [a, 35.]

**STACHYS** (Lat.), n. m. **Sta<sup>ch</sup>ys** (125) <sup>is</sup> (u<sup>s</sup>). Gen., *stach<sup>o</sup>yos* (-is), *stach<sup>o</sup>yl<sup>o</sup>s* (-is). Ger., *stachys*. Fr., *stachyde*, *épiaire*. Ger., *Ziest*, *Andorn*. 1. See *S. palestina*. 2. Hedge-nettle; a genus of the *Stachydeae* in tribe of the *Labiatae*. [a, 35.]—**S. alopecurus.** Ger., *gellbeisse Botanie*. The *κάρπος* of Dioscorides; a medicinal herb of middle and southern Europe. [a, 35.]—**S. arvensis.** Fr., *épiaire des champs*. Ger., *kleiner Andorn*. Corn hedge-nettle, petty ironwort, field-betony; a European and New England species, said to be emmenagogue and diaphoretic. [a, 35.]—**S. germanica.** **S. heterophylla.** **S. lanata.** Fr., *épiaire d'Allemagne*, *épi fleuri*. Common woundwort, lamb's-ear, base horsehound. The herb, *herba stachydis vel marubii agrestis*, was once used as an emmenagogue and diuretic. [a, 35.]—**S. palestina.** A species common in Greece; identified by some authors with the *stachys* of Dioscorides, which was used as a vulnerary, etc. [a, 35.]—**S. palustris.** Fr., *épi* (see *épiaire des marais*). Ger., *Sumpfwiest*, *brauner Wasserdorn*. Clown's all-heal (or woundwort), the marsh betony of Europe and North America. The bitter herb, *herba marubii aquatici autem stachydis aquatica*, seu *galeopasidis foetidis*, was formerly used as a deobstruent and antispasmodic, and externally as an anodyne and vulnerary. [a, 35.]—**S. pectin.** Fr., *crépandine*. Ger., *gerader Ziest*, *Beschreibkraut*, *Berufkraut*, *Rosenrinze*. A European species formerly used in hysteria, epilepsy, suppressed lochia, etc. [a, 35.]—**S. silvatica.** Fr., *épiare des bois*, *orte puaute ou à craynaud*, *ou morte des bois*, *stachyde*, *panne des labours*. Ger., *Waldziest*, *otinkender*, *Waldandorn*. Archangel, wild nettle-grass, wood-betony; a bitter European herb with a disagreeable, petroleum-like odor, formerly used, under the name of *herba galeopasidis silvatica* (see *galeopasidis foetidis*, seu *lami silvaticae foetidis*, seu *urticae inactis foetidosissimae*), in scrofula and glandular swellings and as an emmenagogue and diuretic. [a, 35.]

**STACHYTARPHIA** (Lat.), **STACHYTARPHETA** (Lat.), n's f. **Sta<sup>ch</sup>ytar<sup>ph</sup>ia** (125) <sup>ia</sup> (u<sup>s</sup>). From *stachys*, a spike, and *tarphos*, thick. Fr., *stachytarphète*. Ger., *Düchtlöhre*. *Harard-vervain*; a genus of the *Verbenaceae*. [a, 35.] **S. diochotoma.** A species used in the Argentine Republic as a tonic, pec-

toral, sedative, and vulnerary. ["Proc. of the Am. Pharm. Assoc." xxxviii, p. 395 (a, 50).]—**S. jamaicensis.** **S. pilosiuscula.** Fr., *verveine bleue*. An aromatic undershrub of the West Indies and South America. The leaves (known in Europe as Brazilian tea and used to adulterate tea) are employed as a stimulant, tonic, diuretic, and vulnerary. The root is considered emmenagogue, anthelmintic, vulnerary, and antirheumatic. [a, 35.]

**STACTE** (Lat.), n. f. **Sta<sup>ct</sup>e** (125) <sup>te</sup> (ta). Gen., *stact'es*. Gr., *στακτή* (from *στάζειν*, to drop). Of the ancients, a liquid myrrh; according to Guibourt, probably liquid storax. [a, 35.]

**STADIUM** (Lat.), n. n. **Stad** (125) <sup>um</sup> (u<sup>m</sup>). Gr., *στάδιον*. Fr., *stade*. Ger., *Stufe*. See **STAGE** (1st def.).—**Ends' (Ger.).** The final stage of a disease.—**Condylomatöses S. (Ger.).** Of Zeissl, the stage of condylomata; the secondary stage of syphilis. [G.]—**Frosts' (Ger.).** The stage of chill, as in intermittent fever. [D.]—**S. acmes.** See **ACME** (1st def.) and cf. **Crisis** (1st def.).—**S. amphiboles.** The stage of a disease intermediate between its acme and its subsidence. [D. 3.]—**S. contagii.** See *S. prodromorum* (1st def.).—**S. decrementii.** The stage of decrease in the intensity of a disease; the defervescence of a fever. [D. 3.]—**S. decrustationis.** The stage of an eruptive fever during which the pustules form crusts or scales. [G.]—**S. der sinkenden Exacerbationswerthe (Ger.).** The period of descending tendency of the exacerbation. [D. 18.] Cf. **LYSIS.**—**S. der steigenden Exacerbationswerthe (Ger.).** The stage of ascending rate of exacerbation or increase of temperature; especially noticeable in typhoid fever. [D. 18.]—**S. desquamations.** The stage of an eruptive fever corresponding to the desquamation of the exanthem. [G. 3.]—**S. eruptionis.** The stage of an eruptive fever corresponding to the outbreak of the exanthem. [G. 3.]—**S. exsiccationis.** See *S. decrustationis*.—**S. florescentie.** The stage of development of the exanthem of an exanthematous disease. [D.]—**S. floritionis.** The stage of an eruptive fever during which the exanthem is at its height. [G. 3.]—**S. incubationis.** See **STAGE of latency.**—**S. initiale.** The initial stage of a disease. [L. 57 (a, 14).]—**S. maniacale.** The final stage of nervous excitement in mania, after which the affection gradually becomes less violent. [L. 57 (a, 14).]—**S. maturations et exsiccationis.** See *S. suppurations*.—**S. nervosum.** The nervous or convulsive stage of a disease, as in whooping-cough. [L. 57 (a, 14).]—**S. paralyticum.** The paralytic stage that occurs in some diseases, such as hydrophobia. [a, 34.]—**S. prodromorum.** 1. In eruptive fevers the stage intervening between the inception of the fever and the appearance of the eruption. [G. 2.] In obstetrics, the premonitory stage of labor. [A. 88.]—**S. staseos.** See **ACME** (1st def.).—**S. suppurationis.** The stage in the course of variola at which suppuration takes place in the efflorescences upon the skin. [G.]

**STAEHELINA** (Lat.), n. f. **Sta<sup>he</sup>l<sup>e</sup>n<sup>a</sup>.** From *Stachelin*, a Swiss botanist. Fr., *stacheline*. A genus of the *Compositae*. [a, 35.]—**S. dubia.** A very bitter species, used in southern Europe as a diuretic, anthelmintic, and emmenagogue. [a, 35.]

**STAFF**, n. **Sta<sup>f</sup>.** Gr., *βάκτρον*. Lat., *baculus*. Fr., *bâton*. Ger., *Stäbchen*. 1. A pole-like or rod-like object. 2. A grooved steel rod, straight or curved like a catheter, to serve as a guide to the knife in perineal cystotomy.—**Lithotomy s.** See *S.* (2d def.).

**STAFFORD SPRINGS.** n. **Sta<sup>f</sup>ord s.** A place in Tolland County, Connecticut, where there are chalybeate and sulphurous springs. [L. 30, 87 (a, 14).]

**STAGE**, n. **Staj.** Gr., *στάδιον*. Lat., *stadium* (1st def.). Fr., *étape* (1st def.), *stade* (1st def.). Ger., *Stufe* (1st def.). 1. A definite period or condition in the course of a disease. [D.] Cf. subheadings under **STADIUM**. 2. That accessory part of a microscope that serves to support the slide on which the material to be examined is laid, and to admit of the transmission of reflected light from below through the material. It may be furnished with various supplementary devices, such as those for regulating the illumination, for measuring objects, and for enabling the observer to bring a particular portion of the specimen into the field quickly.—**Algid s.** A period in certain diseases (especially in those characterized by exhausting intestinal discharges), marked by lowered temperature, retarded circulation, secondary nervous disorders, etc., largely due to loss of water from the blood. [D. 3.]—**Amphibolic s.** See **STADIUM amphiboles**.—**Asphyxial s.** The first period in Asiatic cholera, marked by dryness of the tissues, an altered circulation, etc., due to loss of water from the blood. [D. 3.]—**Expulsive s. of labor.** Fr., *période d'expulsion*. Ger., *Austreibungsperiode der Geburt*. That s. which begins when dilatation of the cervix uteri is complete and consists in the expulsion of the fetus.—**First s. of labor.** That s. which is occupied by the dilatation of the cervix uteri.—**Flexion s. of labor.** The whole of the expulsive s. except that which begins with extension of the child's head.—**Infective s.** In the course of an eruptive fever, that period during which infection is excluded by the body in the atmosphere and infects its surroundings. [Makuna, "Med. Times and Gaz.," May 13, 1882, p. 495.]—**Initial s. (of an eruptive fever).** The period of the primary fever. [Makuna, l. c.]—**Placental s. of labor.** Fr., *période de la délivrance*. Ger., *Nachgeburtszeit*. The s. that follows the expulsion of the child and ends with that of the placenta and the foetal envelopes.—**Pre-eruptive s.** Of an eruptive fever, the time that elapses from the entrance of the poison into the system to the first appearance of the eruption. [Makuna, l. c.]—**Pyrogenetic s.** The period of increase or invasion in febrile diseases. [D. 3.]—**Resting s.** In the reproduction of certain cryptogams, that period during which the ciliated spores are quiescent. [a, 35.] Cf. **SCALEOTISM.**—**Seconds s. of labor.** See **Expulsive s.**—**S. of decreasing energy.** Of Landeis, the period of relaxation of a contracting muscle. [K.]—**S. of increasing energy.** Of Landeis, the period of contraction of a muscle. [K.]—**S. of invasion.** The period in the history of a disease in which the developing causes have taken effect, and the system is fairly under the influence of the virus. In fevers, it follows the s. of latency. [D.]—**S. of latency.** Lat.,

*stadium prodromorum*. Ger., *Stadium der Latenz, Latenzperiode*. The s. of an infectious disease intervening between the time of the lodgment of the virus in the body and that of the outward manifestation of disease. [G.]—**Third s. of labor**. See *Placental s.*

**STAGGER-BUSH**, n. *Sta<sup>2</sup>g'u<sup>r</sup>-bu<sup>4</sup>sh*. See *ANDROMEDA mariana*.

**STAGGER-GRASS**, n. *Sta<sup>2</sup>g'u<sup>r</sup>-gra<sup>3</sup>s*. See *ZEPHYRANTHES atamasco*.

**STAGGERS**, n. *Sta<sup>2</sup>g'u<sup>r</sup>z*. Ger., *Kaller*. 1. See *GID*. 2. A disease of horses and cattle characterized by a staggering gait. [a, 34.]—**Blind s.** S. (2d def.) due to cerebral disease accompanied by convulsions, blindness, etc. [L.]—**Grass s.** See *Loco-disease*.—**Mad s.**, **Sleepy s.** See *Blind s.*—**Stomach-s.** S. (2d def.) caused by cerebral disturbance due to gastric disorders. [L.]

**STAGGIA** (It.), n. *Sta<sup>3</sup>d'je-a<sup>3</sup>*. A place in Tuscany where there is a sulphurous spring. [L, 135 (a, 50)]

**STAGMODEPSORIASIS** (Lat.), n. f. *Sta<sup>2</sup>g(sta<sup>2</sup>g)-mod-e<sup>2</sup>.o(a<sup>3</sup>)-sor(por)-i<sup>2</sup>a(a<sup>3</sup>/si<sup>3</sup>s*. Gen., -as'eos (-is). From *στάγμα*, a dropping, *ἔδος*, resemblance, and *ψωρίασις*, psoriasis. Fr., *stagmodépsoriasse*. See *PSORIASIS guttata*.

**STAGNATION**, n. *Sta<sup>2</sup>g-na'shu<sup>2</sup>n*. Lat., *stagnatio* (from *stagnare*, to stagnate). See *STASIS*.

**STAG'S-HORN**, n. *Sta<sup>2</sup>g'z'ho<sup>2</sup>rn*. 1. The *Rhus typhina*. 2. The *Lycopodium clavatum*. 3. A species of *Cenomyce*. [a, 35.] In pharmacy, see *CORNU CERVI*.

**STAHL** (Ger.), n. *Sta<sup>3</sup>l*. See *STEEL*.—**S'feile**. See *FERRUM preparatum* and *FERRUM metallicum*.—**S'haltig**. See *CHALYBEATE*.—**S'mittel**. A chalybeate medicine. [a, 48.]—**S'wein**. See *Vinum ferri* and *Vinum ferri citratis*.—**S'weinstein**. See *IRON tartrate*.

**STAIN**, n. *Stan*. Gr., *κλίς, στίλος* Lat., *macula*. Fr., *tache*. Ger., *Fleck*. 1. A discoloration, a discolored spot or tract of surface. [a, 48.] 2. A dyeing preparation.—**Blue s.** See *MAL del pinto*.—**Carbol-Fuchsin s.** See *Ziehl's s.*—**Ehrlich-Biondi triple s.** A mixture of 5 c. c. of a saturated watery solution of methyl green, 10 of a saturated solution of methyl orange, and 2 of Rubin s. (acid fuchsin). The specimen is put into the s. for from 15 minutes to 12 hours, washed in dilute alcohol, then for 1 minute in absolute alcohol, and then in xylol and benzol, and mounted in xylol balsam. The green stains the nuclei, and the acid fuchsin and the orange stain the ground substance of the specimen. [a, 34.]—**Ehrlich's s.** A s. for tubercle bacilli, composed of a saturated solution of aniline oil in distilled water to which is added enough of a saturated alcoholic solution of fuchsin to give the fluid a dark, opalescent appearance. The fluid to be examined is dried on a cover-glass, passed through a flame, floated on the coloring fluid, and boiled from 3 to 5 minutes. The specimen is then decolorized by floating it on a 25-per-cent. aqueous solution of nitric acid, rinsed in water or alcohol, and mounted. If, after rinsing, the specimen is floated in a dilute aqueous solution of methylene-blue, all bacteria except the tubercle bacilli are stained blue, the red of the latter contrasting with the blue of the former. [a, 34.]—**Friedländer's s.** The specimen is stained as by Ziehl's method, heated over a flame until steam is given off, washed in distilled water, and decolorized with a 5-per-cent. alcoholic solution of nitric acid, and then a few drops of an aqueous solution of methylene-blue are added as a contrast s. The specimen is then washed and mounted in balsam. [a, 34.]—**Gabbets's s.** A method of staining tubercle bacilli in Ziehl's s. The specimen is then placed in a mixture of 100 c. c. of a 25-per-cent. solution of sulphuric acid and 2 c. c. of methylene-blue, washed, dried, and mounted. [a, 34.]—**Gibbes's tubercle s.** A solution of 2 parts of rosaniline hydrochloride and 1 part of methylene-blue, made by heating and trituration in a glass mortar, with the addition of 3 parts of aniline oil dissolved in 15 of rectified spirit, and finally of 15 parts of distilled water added slowly. [a, 34.]—**Kühne's s.** A solution of 1.5 part of methylene-blue, 10 parts of absolute alcohol, and 100 of a 5-per-cent. solution of absolute alcohol, in which, in staining bacteria, the section is immersed for half an hour, washed in water, decolorized in a solution of 10 drops of hydrochloric acid in 500 grammes of water, immersed in a solution of 8 drops of a saturated solution of lithium carbonate in 10 grammes of water, washed in distilled water, dipped in absolute alcohol colored with methylene-blue, placed in aniline oil colored with methylene-blue, and washed in pure aniline oil and then in xylol. [a, 34.]—**Lewis's s.** A s. for nerve tissue. On a frozen section of tissue a few drops of a 2-per-cent. osmic acid solution are poured and allowed to remain a few minutes; the section is then washed in water, immersed in a 1-per-cent. watery solution of aniline-black for one or two hours, and mounted in potassium acetate or in glycerin. [a, 34.]—**Löffler's s.** A mixture of 30 c. c. of a saturated solution of methylene-blue and 100 c. c. of a 1-to-10,000 solution of caustic potash; used for staining bacteria. [a, 34.]—**Milky s's.** See *LEUCOPLAKIA*.—**Preble's s.** A modification of Kühne's s. The alcohol in a dehydrated section is absorbed by a piece of filter paper, and a drop of acetone celloidin solution is placed upon it; the section is then stained by dropping upon it the solution composing Kühne's s. from a pipette. [a, 34.]—**Weigert's hæmatoxylin s.** A process of staining various tissue elements of the central nervous system. Sections of tissue that has been hardened in Müller's fluid are soaked for twenty-four hours in a saturated aqueous solution of neutral cupric acetate diluted with an equal bulk of water. They are then soaked for two hours in a solution of 1 gramme of hæmatoxylin crystals in a mixture of 10 c. c. of 97-per-cent. alcohol, 90 c. c. of water, and 1 c. c. of a saturated aqueous solution of lithium carbonate. They are next washed in two or three waters, rinsed in alcohol, and transferred to a bleaching solution of 2.5 grammes of potassium ferricyanide, 2 grammes of sodium bichlorate, and 200 c. c. of water, in which they remain until the gray matter has a distinct yellow color and the white matter is bluish-black. The sec-

tion is then washed in water, dehydrated with absolute alcohol, cleared with oil of cloves, and mounted in balsam. The gray matter, connective-tissue elements, and ganglion cells have a yellow or yellowish-brown color, the axis-cylinders are uncolored or have a slight yellowish tint, while the medullary sheaths are bluish-black or black. [a, 34.]—**Ziehl's s.** A s. for the typhoid bacillus; a mixture of 9 parts of a filtered 5-per-cent. aqueous solution of carbolic acid and 1 part of a 10-per-cent. alcoholic solution of fuchsin, in which specimens are soaked for half an hour, then decolorized by alcohol, cleared in cedar-oil, and mounted. [a, 34.]

**STAINING**, n. *Stan'<sup>3</sup>n<sup>2</sup>*. The act of impregnating a substance, especially a tissue under microscopic examinations, with pigments so as to distinguish the various structures of which it is composed. The principal s's used in microscopy are hæmatoxylin, carmin, ammonia-carmin, picro-carmin, silver nitrate, gold chloride, and the various aniline dyes (fuchsin, eosin, vesuvium, auramine, safranine, fluorescein, methylene-blue, gentian-violet, methyl-violet, malachite-green, etc.). [B.]—**Double s.** S. with two pigments simultaneously. [B.]—**Golgi's method of s.** S. with a nitrate-of-silver solution (strength 0.5 to 0.8 per cent.) after preliminary hardening with potassium dichromate or Müller's fluid. Used for demonstrating ganglion cells and processes. [B.]—**Gram's method of s.** A method of s. bacteria in which the pigment is designed to be limited to them. The object placed on a cover-glass is stained with gentian-violet, then placed for a minute in a solution of iodine and potassium iodide, and then transferred to absolute alcohol, where it is left until it is apparently colorless, when the glass is washed off with water. [B.]—**Multiple s.** S. with several pigments simultaneously. [B.]—**Triple s.** S. with three pigments simultaneously. [B.]

**STALAGMOMETER**, n. *Sta<sup>2</sup>l-a<sup>2</sup>g-mo<sup>2</sup>m'e<sup>2</sup>u<sup>r</sup>*. From *σταλάγμα*, a dropping, and *μέτρον*, a measure. Fr., *stalagmomètre*. An instrument for measuring the size of drops. [L, 41 (a, 14).]

**STALAGMUS** (Lat.), n. m. *Sta<sup>2</sup>l(sta<sup>2</sup>l)-a<sup>2</sup>g(a<sup>2</sup>g)/mu<sup>2</sup>s(mu<sup>4</sup>s)*. Gr., *σταλάγμα* (from *σταλάσσειν*, to drop). A dropping, as of blood in epistaxis. [L, 50 (a, 14).]

**STALAIPOS** (Fr.), n. *Sta<sup>2</sup>l-a<sup>2</sup>po*. A place in the department of Cantal, France, where there is a chalybeate spring. [a, 14.]

**STALAXIS** (Lat.), n. f. *Sta<sup>2</sup>l(sta<sup>2</sup>l)-a<sup>2</sup>x(a<sup>2</sup>x)/i<sup>2</sup>s*. Gen., -ax'eos (-is). See *STASIS*.

**STALK**, n. *Sta<sup>4</sup>k*. Gr., *καυλός*. Lat., *caulis*. Fr., *tige*. Ger., *Stengel*. Any lengthened support to an organ. [a, 35.]—**Flower-s.** See *PEDUNCLE*.—**Leaf-s.** See *PETIOLE*.

**STALKED**, adj. *Sta<sup>4</sup>kt*. Furnished with a stalk, not sessile. [a, 35.]

**STALLROTH** (Ger.), n. *Sta<sup>3</sup>l/rot*. The "black-water" of cattle. [a, 34.]

**STAMEN** (Lat.), n. n. *Stam(sta<sup>2</sup>m)/e<sup>2</sup>n*. Gen., *stam'inis*. From *stare*, to stand. Fr., *étamine*. Ger., *Staubgefäss, Staubblatt*.

The male sporophyll in a flower, consisting, when complete, of a filament and an anther. [a, 35].—**Coherent s's.** S's more or less united to each other by the filaments or by the anthers or by both. [a, 35].—**Diadelphous s's.** S's coherent into two sets. [a, 35].—**Didynamous s's.** S's of which two are longer than the other two. [a, 35].—**Epigynous s.** A s. borne on the top of the ovary. [a, 35].—**Epipetalous s.** A s. inserted on the tube of the corolla. [a, 35].—**Free s's.** S's not coherent. [a, 35].—**Gynandrous s.** A s. inserted on or growing fast to the pistil. [a, 35].—**Hypogynous s.** A s. situated on the receptacle. [a, 35].—**Included s.** A s. that does not project beyond the corolla, but is contained within it. [a, 35].—**Monadelphous s's.** S's coherent into but one set. [a, 35].—**Perigynous s.** A s. borne on the margin of the disc or calyx-tube. [a, 35].—**Polyadelphous s's.** S's united into a considerable number of sets. [a, 35].—**Sterile s.** See STAMINODIUM. —**Superimposed s.** An outer s. that is converted into a carpel superimposed on the normal carpel. [a, 35].—**Syngenesious s's.** S's coherent by their anthers. [a, 35].—**Tetradynamous s's.** S's so grouped that four are long and two short. [a, 35].—**Triadelphous s's.** S's coherent into three sets. [a, 35].

TRIADÉPHOUS STAMENS.

**STAMINAL**, adj. *Sta'm'i-nál*. Lat., *staminalis* (from *stamen* [q. v.]). Fr., *s.* Pertaining to or consisting of stamens. [a, 35].  
**STAMINATE**, adj. *Sta'm'i-n-at*. From *stamen*, a stamen. Of a flower, male; having stamens but no pistils. [a, 35].  
**STAMINEOUS**, adj. *Sta'm-i-n'e-o-u-s*. Lat., *stamineus*. Fr., *stamineux*. See STAMINAL.

**STAMINIDIA** (Lat.), n. n. pl. *Sta'm(sta'm)-i-n-i-d'i-a*. From *stamen* (q. v.). The antheridia of cryptogams. [a, 35].  
**STAMINODIUM** (Lat.), n. n. *Sta'm(sta'm)-i-n-o-d'i-u-m* (u'm). From *stamen* (q. v.), and *éidos*, resemblance. Fr., *staminode*. A staminode, or sterile stamen; an imperfectly developed stamen having no pollen. [a, 35].

**STAMINODY**, n. *Sta'm-i-n-o-d-i*. The metamorphosis of other parts of the flower into stamens. [a, 35].  
**STAMINOSUS** (Lat.), adj. *Sta'm(sta'm)-i-n-o-s-u-s* (u's). From *stamen* (q. v.). Fr., *stamineux*. Of flowers, having very long stamens. [a, 35].

**STAMM** (Ger.), n. *Sta'm*. 1. A stem; of the trunk of the body; in botany, see CAUDEX. 2. Stock, lineage, breed. [A, 315 (a, 48)].  
**Chilienwurzel's.** See *Originating FIBRE*.—**Gefäss's.** An arterial trunk. [L, 31].—**Grosshirns.** See CAUDEX *cerebri*.—**Marks-tümpe des kleinen Hirns.** See PEDUNCLES *of the cerebellum*.—**Nervens.** See ORIGIN *of a nerve*.—**Rippennackens.** See TRUNCUS *costo-cervicalis*.—**S. der Fissura Sylvii.** Of Bischoff, the depression of the base of the brain the floor of which is formed by the anterior perforated space. [I, 17 (K)].

**STAMMÄHNlichkeit** (Ger.), n. *Sta'm'an-lí-ch²-kit*. See ATAVISM.

**STAMMART** (Ger.), n. *Sta'm'a²rt*. The primary species of a genus. [a, 35].

**STAMMBLÄSCHEN** (Ger.), n. *Sta'm'blas-ch²-e²n*. The first primary cephalic vesicle. [I, 17 (K)].

**STAMMERING**, n. *Sta'm'u²-e²-n²*. Fr., *bégaiement, anonnement*. Ger., *Stammeln*. Fluttering in speaking; as often used, stuttering. [D, 20].—**Gutturo-tetanie s.** See BÉGALEMENT *gutturo-tétanique*.

**STAMMESGESCHICHTE** (Ger.), n. *Sta'm'me²s-ge²-shí²ch²-t-e²*. See PHYLOGONY.

**STAMMTHEIL** (Ger.), n. *Sta'm'tí-l*. The lower portion of the primary cephalic vesicle, corresponding to the base of the brain. [I, 17 (K)].

**STAMPED**, adj. *Sta²mpt*. See SIGILLATE.

**STÄMPEL** (Ger.), n. *Stamp'e²l*. See EMBOLUS.

**STANDARD**, n. *Sta²n'd'rd*. 1. A basis of comparison; as an adj., corresponding to the recognized s. [a, 48]. 2. In botany, see VEXILLUM.

**STANDARDIZED**, adj. *Sta²n'd'rd-í²d*. Brought to the standard strength or to a standard degree of efficiency. [B, 11].

**STANDIETHYL**, n. *Sta²n-di-é²th'í²l*. Ger., *Standdiethyl*, *Zinndiethyl*. A bivalent radicle,  $\text{Sn(C}_2\text{H}_5)_2$ ; in the free state, a double molecule,  $\text{Sn}_2(\text{C}_2\text{H}_5)_4$ , constituting a thick oily liquid. [B, 3].

**STANDIPHENYL**, n. *Sta²n-di-fe²n'í²l*. A bivalent radicle,  $\text{Sn(C}_6\text{H}_5)_2$ . [B].

**STANDIPROPYL**, n. *Sta²n-di-pro'pí²l*. A bivalent radicle,  $\text{Sn(C}_3\text{H}_7)_2$ . [B].

**STANDSTILL**, n. *Sta²nd'stí²l*. Ger., *Stillstand*. The quiescent state resulting from suspension of action, especially of motion. —**Expiratory s.** A condition in which the respiratory apparatus remains in the state seen at the close of an ordinary or labored expiration. [J, 1] Cf. *Expiratory TETANUS*. —**Inspiratory s.** Ger., *Athemcrampf, Inspirationscrampf*. A condition in which the respiratory rhythm is so accelerated that the diaphragm remains tetanically contracted, and hence the lungs remain filled with air. It may be produced by strongly stimulating the central end of a divided vagus nerve. [J, 1] —**Respiratory s.** Ger., *Athmungsstillstand*. A suspension of the respiratory movements in either the inspiratory or the expiratory phase. [J, 19, 40].

**STANNAR**, n. Of the alchemists, a hypothetical elementary substance from which metals were supposed to be produced. [A, 325 (a, 48)].

**STANNIC**, adj. *Sta²n'í²k*. Lat., *stannicus*. Fr., *stannique*. Containing tin as a tetrad radicle. [B.]—**S. acid.** Fr., *acide stannique*. Ger., *Zinnsäure*. A gelatinous white precipitate,  $\text{SnO(OH)} = \text{H}_2\text{SnO}_3$ , which on drying forms a semitransparent vitreous mass; acid and dibasic. A related (probably isomeric) acid is called *metastannic acid*. [B, 3].—**S. anhydride.** Tin dioxide. [B.]—**S. hydroxide.** See *S. acid*.

**STANNICHLORIDE**, n. *Sta²n-i²-klor'í²d(id)*. A more correct form for chlorostannate. [B.]

**STANNIOL** (Ger.), n. *Sta²n'ne-o²l*. Tin-foil. [B, 48, 124 (a, 14)].

**STANNOCHLORIDE**, n. *Sta²n-o-klor'í²d(id)*. See CHLORO-STANNATE.

**STANNOFLUORIDE**, n. *Sta²n-o-flu²'o²r-i²d(id)*. A compound of tin tetrafluoride with the fluoride of another element or radicle. [B, 3].

**STANNOSOSTANNIC**, adj. *Sta²n-os'²-o-sta²n'í²k*. Made up of a combination of both stannous and stannic compounds, i. e., containing two atoms of tin which have atomicities of two and four respectively. [B, 3].—**S. ethide.** See STANNIETHYL.

**STANNOUS**, adj. *Sta²n'u²s*. Containing tin as a bivalent element,  $\text{Sn}''$ , or, more probably, containing a bivalent molecule of the metal consisting of two quadrivalent atoms so united as to present only two free bonds each:  $\text{=Sn=Sn=}$ . [B.]

**STANNUM** (Lat.), n. n. *Sta²n(sta²n)'nu²m(nu²m)*. See TIN.—**Arbor stanni.** See ARBOR Jovis.—**Butyrum stanni.** Tin chloride. [B, 270].—**Calx stanni, Cineres stanni.** See CALX Jovis.—**Limatura stanni.** See ÉTAIN *en poudre*.—**Magisterium stanni, Oxydum stanni cinereum, Protoxydum stanni.** See CALX Jovis.—**Rasura stanni.** Tin filings. [B.]—**S. anglicum.** Tin. [B.]—**S. cinereum, S. glaciale.** See BISMUTH.—**S. indicum.** Zinc. [B.]—**S. præparatum, S. pulveratum.** See ÉTAIN *en poudre*.—**S. purissimum** [Fr. Cod.]. Fr., *étain pur en baguettes*. A very pure, shining, white tin, soft and very ductile, of the sp. gr. 7.29, and melting at 228° C. [B, 95 (a, 38)].—**S. rasputum** [Ger. Ph.]. Tin filings. [B.]—**S. suboxydatum.** Tin protoxide. [B, 119 (a, 38)].

**STANNIETHYL**, n. *Sta²n-tri-e²th'í²l*. A thick, oily liquid,  $\text{Sn(C}_2\text{H}_5)_4$ . [B, 3].—**S. chloride.** An oily liquid,  $\text{Sn(C}_2\text{H}_5)_2\text{Cl}_2$ , having a highly irritant vapor. [B, 4].—**S. hydrate, S. hydroxide.** The compound  $\text{Sn(C}_2\text{H}_5)_2\text{OH}$ . [B, 4].—**S. iodide.** Ger., *Zinntriäthyljodür*. An oily liquid,  $\text{Sn(C}_2\text{H}_5)_2\text{I}_2$ . [B, 3].—**S. oxide.** An oily liquid,  $\text{Sn}_2(\text{C}_2\text{H}_5)_4\text{O}$ . [B, 3].

**STAPÉAL** (Fr.), n. *Sta²-pa²l*. See OPERCULAR BONE.

**STAPÉDIAL**, adj. *Sta²p-ed'í²-l*. Lat., *stapedius*. Fr., *stapédien, stapédiel*. Ger., *Steigbügelig, Steigbügel*. Pertaining to or connected with the stapes. [a, 48].

**STAPÉDIO-VESTIBULAR**, adj. *Sta²p-ed'í²-o-ve²st-i²b-u²-l'í²r*. From *stapes* (q. v.), and *vestibulum*, a vestibule. Ger., *Steigbügel-Vorhof*. Pertaining to the stapes and the margin of the fenestra ovalis.

**STAPÉDIUS** (Lat.), adj. *Sta²p(sta²p)-ed(e²d)'í²-u²s(u²s)*. From *stapes* (q. v.). See STAPÉDIAL; as a n. m. (Fr., *stapédien, muscle de l'étrier*; Ger., *Steigbügelmuskel*), a muscle arising from the hollow in the eminentia pyramidalis and inserted into a point between the capitulum and the posterior axis of the stapes; an antagonist of the tensor tympani. [F, 32].

**STAPELIA** (Lat.), n. f. *Sta²p-e²l'í²-a²*. From *Van Stapel*, a Dutch botanist. Fr., *stapèle, stapélie, crapaudine*. Ger., *S. Carion-flower*; a genus of African plants. The *Stapeliaceæ* are a division, and the *Stapeliæ* a tribe, of the *Asclepiadææ*. [a, 35].—**S. hirsuta.** Ger., *rauhhaarige S., Aasblume, Aasplanze*. A species cultivated as an ornament; its flowers, like those of the other species, have a disgusting odor. [a, 35].

**STAPES** (Lat.), n. m. *Sta²p(sta²p)-ez(as)*. Gen., *stap'edis (-idis)*. Fr., *étrier*. Ger., *Steigbügel*. Lit., a stirrup. The third ossicle of the middle ear. It consists of a collum (see NECK *of the s.*) and a head, or capitulum, on which there is a hollowed articular surface for the lenticular process of the incus, and from which two crura diverge, that end in an oval or bean-shaped foot-plate. The longitudinal axis of the s. stands almost perpendicular to the longitudinal axis of the malleus and incus. [F, 32].

**STAPHIS** (Lat.), n. f. *Sta²f(sta²f)'í²s*. Gen., *staph'idos (-idis)*. Of Pliny, see DELPHINIUM *staphisagria*.—**Grama staphidis agria.** See SEMEN STAPHISAIGRE.—**S. agria.** See STAPHISAIGRA.

**STAPHISAIGRA** (Lat.), n. f. *Sta²f(sta²f)-í²s-a²g(a²g)'rí²-a²*. From *staphis*, dried grapes, and *áypos*, wild. Fr., *staphisaigre (semenie)* [Fr. Cod.] (2d def.). Ger., *Staphisagrier, Lausköpfer*. Sp., *estafisagria, albaraz (semilla)* [Sp. Ph.] (2d def.). 1. Of the ancients, see DELPHINIUM s. 2. Of the U. S. Ph., the seed of *Delphinium s.* [B, 95 (a, 38)].—**Semen** [Belg. Ph.] (see SEMINA) *staphisagria, Staphisagria semina* [Belg. Ph.]. See S. (2d def.).—**Tinctura staphisagria.** A tincture made by macerating 100 parts of s. for three days in enough 70-per-cent. alcohol to make 500 parts after straining, expressing, and filtering. [B, 95 (a, 38)].—**Unguentum staphisagria [Br. Ph.]. An ointment made by macerating bruised s. in twice as much melted benzoated lard for two hours, straining, and cooling. [B, 95 (a, 38)].**

**STAPHISAIGRINE**, n. *Sta²f'í²s-a²g're²n*. Fr., *a. Ger., Staphisaigra*. A poisonous alkaloid,  $\text{C}_{22}\text{H}_{25}\text{NO}_6$ , extracted from *Delphinium staphisagria*; a bitter anagregous powder. [B, 93 (a, 14)].

**STAPHISAIGRE** (Fr.), n. *Sta²f-fe-zo²gr²*. See STAPHISAIGRA.—**Poudre de s.** [Fr. Cod.]. The seed of *Delphinium staphisagria* dried at 25° C., powdered, and sifted through a No. 1 hair sieve.

[B, 95 (a, 38).]—**Semence de s., S. (semence)** [Fr. Cod.]. See STAPHYSAGRIA (2d def.).

**STAPHYLÆA** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e'(a<sup>2</sup>/e<sup>2</sup>)-a<sup>2</sup>. See STAPHYLÆA.

**STAPHYLÆMATOMA** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e<sup>2</sup>m-(a<sup>2</sup>-e<sup>2</sup>m)-a<sup>2</sup>t(a<sup>2</sup>t)-om/a<sup>2</sup>. Gen., -om'atos (-atis). From σταφυλή, the palate, and αμα, blood. Fr., *staphylématome*. Ger., *Staphylämatom*. A hæmatoma of the palate. [a, 34.]

**STAPHYLAGRA** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)/a<sup>2</sup>g(a<sup>2</sup>g)-ra<sup>2</sup>. Gr., σταφυλάγρα (from σταφυλή, the uvula, and ἀγρα, a seizure). Ger., *Zäpfchenzange, Zäpfchenhalter*. An instrument for seizing and removing the uvula. [E.]

**STAPHYLE** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e(a). Gen., *staphylyes*. Gr., σταφύλη. Lit., a bunch of grapes; see UVULA.

**STAPHYLÆA** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e(a)/a<sup>2</sup>. From σταφυλή, a bunch of grapes. Fr., *staphylier*. Ger., *Pimpernuss*. Bladder-nut; a genus of the *Staphyleaceæ* (a tribe of the *Celastrineæ*), which are now regarded as a suborder (the *Staphyleæ*, or *Staphyleæ*) of the *Sapindaceæ*. [a, 35].—**S. pinnata**. Fr., *staphylier penné*, né (ou nez) coupé, *patenôlier*. Ger., *gemeiner Pimpernussbaum, Klappernuss, Blasenussbaum, Todtenkopfbäum*. Anthony-nut, common (or European) bladder-nut. The seeds are purgative and yield an oil. [a, 35].—**S. trifoliata**. Fr., *pistachier bâlard* (ou *savage*). North American bladder-nut. The edible seeds are slightly laxative and yield a sweet oil. [a, 35.]

**STAPHYLEPARTES** (Lat.), n. m. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e<sup>2</sup>p-a<sup>2</sup>t'ez(as). Gr., σταφυλεπάρτης (from σταφυλή, the uvula, and ἐπαρτεν, to lift up). See STAPHYLÆA.

**STAPHYLEUS** (Lat.), adj. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From σταφυλή, the uvula. Pertaining to the uvula; as a n. m., see PALATOSTAPHYLEUS.

**STAPHYLINOPHARYNGEUS** (Lat.), adj. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-in(en)-i'no(o<sup>3</sup>)-fa<sup>2</sup>r(fa<sup>2</sup>r)-in(u<sup>1</sup>n<sup>2</sup>)/je<sup>2</sup>(je<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s)). From σταφυλή, the uvula, and φάρυγξ, the pharynx. See PALATOPHARYNGEUS.

**STAPHYLINUS** (Lat.), adj. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-in(en)-u<sup>2</sup>s(u<sup>2</sup>s). Gr., σταφύλιος. Fr., *staphylin*. 1. See STAPHYLEUS. 2. As a n. m., see *ΔΥΣΟΣ UVULÆ*. 3. As a n. m., see *PASTINACA SATIVA*.—**S. externus**. See ABDUCTOR of the Eustachian tube.—**S. internus**. See LEVATOR PALATI.—**S. medius**. See *ΔΥΣΟΣ UVULÆ*.

**STAPHYLION** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)/i<sup>2</sup>-o<sup>2</sup>n. From σταφυλή, the uvula. See PUNCTUM SPINÆ NASALIS POSTERIUS.

**STAPHYLITIS** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-i(e)/ti<sup>2</sup>s. Gen., -i'idos (-idis). From σταφυλή, the uvula. Fr., *kionite*. Inflammation of the uvula. [E.]

**STAPHYLIUM** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Gr., σταφύλιον (dim. of σταφυλή, a bunch of grapes). See NIPPLE.

**STAPHYLOCAUSTICUM** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-ka<sup>2</sup>st(ka<sup>2</sup>s't-u<sup>2</sup>st)/i<sup>2</sup>ek-u<sup>2</sup>m(u<sup>2</sup>m). From σταφυλή, the uvula, and καυστικός, caustic. A caustic for the uvula. [L, 50 (a, 14).]

**STAPHYLOCOCCUS** (Lat.), n. m. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-ko<sup>2</sup>k/ku<sup>2</sup>s(ku<sup>2</sup>s). From σταφυλή, a bunch of grapes, and κόκκος, a kernel. Fr., *staphylococque*. Ger., *S. Traubenkokkus*. A genus of *Schizomyces* (*Micrococi*) in which the spheres become arranged in irregular masses compared to clusters of grapes. [B, 238, 316 (a, 35).]—**S. albus liquefaciens**. Of Escherich, an aerobic, liquefying micrococcus from 0.8 to 1.2 μ in diameter, occasionally oval in form and 3 μ in its long diameter; found associated in irregular groups; occasionally found in the alvine discharges of healthy infants. [a, 34].—**S. Biskrae**. Fr., *microbe du bouton de Biskra*. The micrococcus of Biskra button, in which disease it is found in the blood, pustules, etc. It is closely related to *S. pyogenes aureus*, but it liquefies gelatin much more slowly; its colonies, moreover, on agar-agar are whitish and raised, and on potatoes are of an orange-red color. [a, 35].—**S. candidus**. A species found by Warington in milk, in which it forms so small a quantity of acid that the milk does not coagulate after boiling. The cocci are glistening white, and are associated in the irregular groups peculiar to the genus. [a, 35].—**S. cereus (albus)**. A non-pathogenic species forming cocci 1.16 μ in diameter. On gelatin plates, which it does not liquefy, it produces white points that eventually attain a size of from 1 to 2 mm. In stroke cultivation it forms a white, wax-like layer with irregular, somewhat thickened borders, and on potatoes a grayish-white layer of medium thickness. The micro-organism was found by Passeti in pus, but experiments on animals show it to possess no pyogenic properties. [a, 35].—**S. cereus flavus**. See *S. Passeti*.—**S. epidermidis albus**. Of Welch, an almost constant inhabitant of the epidermis, resembling *S. pyogenes albus* except that it has a feeble pyogenic capacity; possibly an attenuated or modified form of that organism. [a, 34].—**S. flavescens**. A variety occurring in pus, differing from *S. pyogenes aureus* in the pale-yellow color of its cultivations. [a, 35].—**S. fulvus**. A species occurring as rusty-red globules on horse dung. The cells are from 1 to 1.5 μ in diameter, usually with a viscid intercellular substance. [a, 35].—**S. Leloirii**. A diplococcus resembling *S. Biskrae* found by Leloir in circumfollicular dermatitis. [B, 316 (a, 34).]—**S. Passeti**. A non-pathogenic organism occurring as diplococci about 1 μ long, found in pus. It forms on gelatin plates (without liquefying them) prominent, intensely yellow droplets. [a, 35].—**S. pyogenes**. A species including as varieties, according to Saccardo, *S. pyogenes albus*, *S. pyogenes citreus*, and *S. flavescens*. [a, 35.] See Plate III, Fig. 10.—**S. pyogenes albus**. A s. found in pus, along with *S. pyogenes aureus*, from which it differs only in the absence of pigment, the colonies remaining white even after a long time. According to Flügge, this variety occurs more frequently in rabbits and other animals than *S. pyogenes aureus*. [a, 35].—**S. pyogenes aureus**. Fr., *staphylococque doré*. The most common of the pyogenic microbes, being found in acute abscesses, empyema, boils, acute osteomyelitis, pyæmia, ulcerative endo-

carditis, etc. It occurs as isodiametric cells about 0.84 μ (Saccardo) or 0.87 μ (Passet) in diameter, often as diplococci, usually grouped in irregular masses. On agar-agar it forms yellowish colonies undulated at the margins, and on gelatin plates punctiform colonies which appear at first, under a low power of the microscope, as light-brown balls having a dark centre and smooth borders. When the colonies reach the surface of the gelatin (after 2 or 3 days), they assume a yellow color and, slowly liquefying the gelatin, form circular depressions, which finally coalesce. The yellow pigment occurs only when the colonies are in contact with the air, the cultivations under a layer of oil remaining white. The puncture in nutrient jelly produces comparatively rapid liquefaction with the deposition of the colonies in the form of a golden-yellow sediment. Inoculated into milk, it curdles the latter after 1 to 8 days by the production of lactic and other acids. This s. is remarkable for its great resistance to external agents, the cultivations remaining active after more than a year. [a, 35].—**S. pyogenes citreus**. A variety occurring in the pus of acute abscesses, differing from *S. pyogenes aureus* only in the bright, citron-yellow pigment. [a, 35].—**S. pyosepticus**. Of Héricourt and Richey, a variety found in an epithelial non-ulcerated swelling on a recently killed dog. It closely resembles *S. pyogenes albus*. [N. Y. Med. Jour., July 6, 1889, p. 14 (a, 50).]—**S. salivarius pyogenes**, *S. sialopyus*. A species occurring as diplococci 0.3 to 0.5 μ long in the contents of an abscess of a guinea-pig inoculated with the saliva from a man with angina scarlatinosa. On gelatin plates, which it liquefies slowly, it forms, especially in the lowest strata, sharply defined rounded colonies of a whitish, opalescent appearance. [a, 35].—**S. viridiflavescens**. A non-pyogenic species found in varicella. It forms on gelatin plates, which it does not liquefy, greenish-yellow, circular, smooth-edged colonies, and on blood-serum lemon-yellow colonies. [B.]

**STAPHYLODIALYSIS** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-di(di<sup>2</sup>)-a<sup>2</sup>l(a<sup>2</sup>l)/i<sup>2</sup>(u<sup>1</sup>)-si<sup>2</sup>s. Gen., -ys'eos (-al'ysis). From σταφυλή, the uvula, and διάλυσις, relaxation. A relaxation of the uvula. [L, 50 (a, 14).]

**STAPHYLEDEMA** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-e<sup>2</sup>d(o<sup>2</sup>-e<sup>2</sup>d)-em(am)/a<sup>2</sup>. Gen., -em'atos (-atis). From σταφυλή, the uvula, and οίδημα, oedema. Edema of the uvula. [E.]

**STAPHYLOMA** (Lat.), n. n. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-om/a<sup>2</sup>. Gen., -om'atos (-atis). Gr., σταφυλόμα (from σταφυλή, a bunch of grapes). Fr., *staphylôme*. Ger., *Staphylom, Traubenauge*. A more or less irregular protrusion of some one of the tunics of the eye, due to a thinning or to a perforation from previous ulceration. [F.]—**Annular s.** Of Walther, cirrhopthalmia. [a, 34].—**Anterior s.** See *S. corneæ*.—**Ciliary s.** Ger., *Ciliar-S.* Scleroticæ in the ciliary region, due to intra-ocular inflammation usually affecting the uveal tract. [F.]—**Posterior s.** 1. See *S. scleroticæ*. 2. See CONUS (2d def.).—**Projecting s.** See *Conical CORNEÆ*.—**Scleral s.** See *S. scleroticæ*.—**Sclerochorioidals s.** See CONUS (2d def.).—**S. æquatorialis oculi**. S. scleroticæ in the equatorial region. [F.]—**S. annulare**. S. scleroticæ in the ciliary region, which extends either continuously or by slight interruptions all round the corneal margin. [F.]—**S. anticum scleræ**. See *Ciliary s.*—**S. conicum**. See *Conical CORNEÆ*.—**S. corneæ**. Ger., *Hornhautstaphylom*. A bulging of the cornea, in whole or in part, from thinning of the membrane, with or without a preceding ulceration, due to injury or to a chronic inflammation of the cornea and usually of the iris, with abolition of the anterior chamber, adhesion of the iris to the posterior surface of the cornea, and increased tension. The cornea is opaque and occasionally thickened instead of thinned. According to some, the term is restricted to protrusion originating in prolapse of the iris and consisting of iridic tissue replacing the cornea. [B; F.] Cf. *HERNIA CORNEÆ*.—**S. corneæ intercalare**. A staphylomatous process located in the sclero-corneal region, apparently between the cornea and iris on the one hand and the sclera and ciliary body on the other. [F.]—**S. intercalare**. S. in which the projecting part of the eyeball is inserted between the insertion of the iris and the ciliary body, owing to a thinning of the ligamentum pectinatum and the region of Schlemm's canal. [F.]—**S. iridis**. See *HERNIA IRIDIS*.—**S. laterale**. A s. situated on one side of the equator of the eyeball. [A, 319 (a, 34).]—**S. of the corneæ**. See *S. corneæ*.—**S. pellucidum (conicum)**. See *Conical CORNEÆ*.—**S. posticum (Scarpæ)**. See CONUS (2d def.).—**S. racemosum corneæ**. S. corneæ with perforation at several points, through which small portions of the iris protrude. [F.]—**S. scleræ, S. scleroticæ**. A bulging of the sclerotic at any portion of its circumference, from thinning of the membrane due to long-continued intra-ocular inflammation with increased pressure. [F.]—**S. scleroticæ posticum**. See CONUS (2d def.).—**S. uvææ**. A bulging of a portion of the uveal tract through a perforation in the sclera. [F.]

**STAPHYLOME** (Fr.), n. Sta<sup>2</sup>f-el-om. See STAPHYLOMA.—**S. rameux**. See STAPHYLOMA racemosum corneæ.

**STAPHYLONGIA** (Lat.), **STAPHYLONGUS** (Lat.), n's f. and m. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-o<sup>2</sup>ns(o<sup>2</sup>n<sup>2</sup>k)/i<sup>2</sup>-a<sup>2</sup>, -o<sup>2</sup>n<sup>2</sup>k(u<sup>2</sup>s(u<sup>2</sup>s)). From σταφυλή, the uvula, and γκος, a tumor. Swelling of the uvula.

**STAPHYLO-PHARYNGIEN** (Fr.), adj. Sta<sup>2</sup>-fe-lo-fa<sup>2</sup>-ra<sup>2</sup>n<sup>2</sup>-zhe-a<sup>2</sup>n<sup>2</sup>. Pertaining to the uvula and the pharynx. [L, 41 (a, 14).]

**STAPHYLOPLASTY**, n. Sta<sup>2</sup>f-i<sup>2</sup>l-o-pla<sup>2</sup>st-i<sup>2</sup>. From σταφυλή, the uvula, and πάσσειν, to mold. Fr., *staphyloplastie*. Ger., *Staphyloplastik*. The plastic surgery of the palate. [a, 34.]

**STAPHYLOPTOSIS** (Lat.), n. f. Sta<sup>2</sup>f(sta<sup>2</sup>f)-i<sup>2</sup>l(u<sup>1</sup>)-o<sup>2</sup>pt-os/i<sup>2</sup>s. Gen., -ptos'eos (-is). From σταφυλή, the uvula, and πτώσις, a falling. Elongation of the uvula, as in staphyloedema. [L, 50 (a, 14).]

**STAPHYLORRHAPHY**, n. Sta<sup>2</sup>f-i<sup>2</sup>l-o<sup>2</sup>r<sup>2</sup>a<sup>2</sup>f-i<sup>2</sup>. Lat., *staphylorrhaphia* (from σταφυλή, the uvula, and ράπτειν, to sew). Fr., *staphylorrhaphie*. Ger., *Staphylorrhaphie, Gaumennaht*. The operation of closing a cleft of the velum palati. Cf. URANOPLASTY.—**Fergusson's s.** An operation of which the essential feature is the division of the levator palati muscles in all cases and of the

palato-pharyngeus in some, to prevent their interference with the healing of the freshened surface of the cleft by retracting the flaps. [E.]—**Garretson's s.** An operation essentially the same as Ferguson's, except that the operator stands behind the patient, and uses the same instruments as in the operation for vesico-vaginal fistula. [E.]

**STAPHYLOTOME**, n. Sta<sup>2</sup>f-i<sup>2</sup>l-o-tom. Gr., σταφυλοτόμειον (from σταφύλη, the uvula, and τέμνω, to cut). Fr., s. An instrument for cutting the uvula or incising the palate. [E.]

**STAPHYLOTOMY**, n. Sta<sup>2</sup>f-i<sup>2</sup>l-o<sup>2</sup>t<sup>2</sup>om-i<sup>2</sup>. Gr., σταφυλοτομία (from σταφύλη, the uvula, and τομή, a cutting). Lat., staphylotomia. Fr., staphylotomie. Ger., Staphylotomie. 1. Amputation of the uvula. [E.] 2. Abcession of a staphyloma. [a, 34.]

**STAPHYLYGROMA** (Lat.), n. Sta<sup>2</sup>f-(sta<sup>2</sup>f)-i<sup>2</sup>l-(u<sup>2</sup>l)-ig-(u<sup>2</sup>g)-rom'a<sup>2</sup>. Gen., -om'atos (-atis). From σταφύλη, the uvula, and γρῶς, wet. See STAPHYLYGDEMA.

**STAR**, n. Sta<sup>2</sup>r. See **ASTER** (1st def.). in the pl., s's, see **Polar s's**.—**Daughter s.**, **Double s.** See **AMPHIASTER**.—**Mother s.** See **ASTER** (1st def.).—**Polar s's.** Fr., *étoiles des pôles*. Radiating masses of the granules of the cell-protoplasm during carycinesis, seen at the poles of the nuclear spindles. [L, 121.]—**S's of Verheyen.** See **STELLULÆ Verheyeni**.

**STARAJA-RUSSA**, n. A place in the government of Novgorod, Russia, where there is a mineral spring. [a, 14.]

**STAR-ANISE**, n. Sta<sup>2</sup>r'a<sup>2</sup>n'i<sup>2</sup>sa. The genus *Illicium*, especially *Illicium anisatum*; also its fruit. [a, 35.]

**STARASOL** (Ger.), n. Sta<sup>2</sup>r'a<sup>2</sup>s-zol. A place in Austrian Galicia where there is a saline spring. [L, 30, 37, 57 (a, 14).]

**STARCHE**, n. Gr., άμυλον. Lat., amyllum. Fr., amidon, féculle blanche (ou amyglacée). Ger., Stärke, Stärkemehl. It., amido. Sp., almidón. A carbohydrate having the chemical constitution C<sub>6</sub>H<sub>12</sub>O<sub>6</sub>, or some multiple of this formula (C<sub>18</sub>H<sub>36</sub>O<sub>16</sub>, C<sub>36</sub>H<sub>72</sub>O<sub>32</sub>, and C<sub>72</sub>H<sub>144</sub>O<sub>64</sub> have been given, and C<sub>12</sub>H<sub>24</sub>O<sub>10</sub> for dried s.); according to Salomon, however, the simple formula C<sub>6</sub>H<sub>12</sub>O<sub>6</sub> represents its composition most nearly. S. is contained in nearly all chlorophyllaceous plants, being derived from the protoplasm of the chlorophyll corpuscles and from small protoplasmic bodies called *s-formers*. It is stored up in the tubers, roots, seeds, etc., forming a supply of nourishment for the young shoots and other rapidly growing parts. S. is a white, shining, tasteless, and colorless powder, which, under the microscope, is seen to be made up of striated granules, differing in size, shape, and markings according to the source from which the s. is derived. The diameter of these granules ranges from 2 to 185 μ. Each granule consists of a series of concentric layers disposed about an eccentrically situated nucleus, called the *hilum*, the layers being separated from each other, according to some authorities, by concentric septa. S. granules have the property of polarizing light, and under polarized light show a dark cross, with arms intersecting the hilum. Chemically, s. consists of several isomeric substances differing in their solubility in water and their reaction toward iodine. The outer wall of each granule and the concentric septa found, according to some, in its interior are made up of *amylin* or *s-cellulose* (*furfurase*), which is insoluble in water but soluble in caustic potash, and gives a yellowish or brownish coloration with iodine. The interior of the granule consists of a soluble s. (see **AMYULUM** [2d def.]). Between this soluble s. and s.-cellulose various intermediate isomeric substances exist, which give yellow, violet, and red colorations with iodine. On boiling with water, the s.-granules burst and the contents swell up, forming a gelatinous s. paste (cf. *Mucilago AMYLLI*), which on drying changes to a stiff transparent mass. On long boiling, or by prolonged exposure to a heat of 100° C. in the dry state, or by the action of diastase and chemical agents, s. is converted into a modification soluble in cold water (soluble s.). By the continued action of diastase and chemical agents, or by a dry heat of 300° C., s. is converted into *dextrin*. By the action of cold nitric acid it forms *xylodrin*. With solutions of iodine, s. in all its forms gives a deep-blue color, which disappears on heating, but reappears on cooling. Iodine in substance converts s. into a compound (iodized s.) soluble in water, and from this solution a neutral salt precipitates the *iodide of s.* S. is obtained from the grains of the cereals, from the tubers of the potato, from the pith of the sago-palm (sago), from different species of *Marranta* (arrowroot), and from the *Jatropha manihot* (tapioca). It also enters largely into the composition of peas and beans, chestnuts, acorns, and other nuts, and the various edible rhizomes and tuberosous roots. [B, 3, 5, 8, 9; L, 105.]—**Animal s.** See **GLYCOGEN**.—**Canna s.**, **Cane s.** See **CANNA s.**—**Corn s.** Lat., *amyllum maidis*. Fr., *amidon ou féculle de maïs*. Ger., *Maissstärke*. A variety of s. obtained from Indian corn, distinguished by the small size of its granules. It is valuable for its nutritive properties. [B, 5 (a, 38).]

**Detection of s.** See under *Mucilago AMYLLI*.—**Explosive s.** Xylodrin. [B, 2.]—**Gelatinized s.** A preparation used as a test in the U. S. Ph. [B.]—**Glycerine or Glycerite, or Glycerolate of s.** See *Glyceritum AMYLLI*.—**Hepatic s.** See **GLYCOGEN**.—**Hydrated s.** S. reduced to a pasty consistency by the action of hot water. [B.]—**Iceland s.** See **LICHENIN**.—**Iodized s.** See **AMYULUM**.—**Liver s.** See **GLYCOGEN**.—**Moss s.** See **LICHENIN**.—**Out s.** Lat., *amyllum avicæ*. Ger., *Hafersstärke*. A variety of s. found in oats, constituting nearly 60 per cent. of oatmeal. [B, 5 (a, 38).]—**Potato s.** Lat., *amyllum* (Finn. Ph. *potatis*). Fr., *féculle de pomme-de-terre*. Ger., *Kartoffelstärke*, *Kartoffelmehl*. S. obtained from the potato. Its granules are very large and somewhat shiny. Used to imitate sago, arrowroot, etc. [B, 5 (a, 38).]—**Soluble s.** A modification of s., produced by the action of heat or chemical agents, which is soluble in cold water, but still gives a blue color with iodine. [B.]—**S. and opium clyster.** See **ENEMA opii**.—**S. enema.** See **Lavement à l'amidon**.—**S. iodide.** A compound of s. with iodine. Whether a true s. iodide actually exists is uncertain, although the iodized s. of the U. S. Ph. (see **AMYULUM**

*iodatum*) and that prepared in other ways is supposed to contain such a compound. According to Withaus, s. iodide is precipitated from the soluble iodized s. by the addition of a neutral salt. [B.]—**S. mucilage.** See *Mucilago AMYLLI*.—**S. paste.** See *Hydrated s.*—**S. poultice.** See *Cataplasma AMYLLI*.—**S. sugar.** See **GLUCOSE**.—**Troches of s.** See *Trochisci bechici*.—**Wheat s.** Lat., *amylum* (*tritici*). Fr., *amidon de blé* (ou de froment). Ger., *Weizenstärke*. S. obtained from wheat. [B.]

**STARCHY**, adj. Sta<sup>2</sup>r'ch'i<sup>2</sup>. See **AMYLOID**.

**STARKBÄRTIGKEIT** (Ger.), n. Sta<sup>2</sup>r'k'bart-i<sup>2</sup>g-kit. See **POGONIASIS**.

**STÄRKE** (Ger.), n. Stark'e<sup>2</sup>. 1. Strength, intensity. 2. See **STARCH**.—**Jods'.** See **STARCH iodide**.—**S'terment.** See **AMYLOLYTIC FERMENT**.—**S'glycerit.** See *Glyceritum AMYLLI*.—**S'gummi.** See **DEXTRIN**.—**S'lösung.** See *Solutio AMYLLI*.—**S'schleim.** See *Mucilago AMYLLI*.—**S'zucker.** See **GLUCOSE**.

**STÄRKEMEHL** (Ger.), n. Stark'e<sup>2</sup>mal. See **STARCH**.—**Amerikanisches S.** Ordinary arrowroot. [a, 35.]

**STARR** (Ger.), adj. Sta<sup>2</sup>r. Rigid, inflexible. [a, 35.]

**STARRBLINDHEIT** (Ger.), n. Sta<sup>2</sup>r'bl'nd-hit. The momentary darkening of the visual field by long-continued staring at a single point. [L, 57 (a, 14).]

**STARKE** (Ger.), n. Sta<sup>2</sup>r'e<sup>2</sup>. Rigidity. [a, 14.]—**Frosts'.** See **STARRFROST**.—**Leichens'.** See **RIGOR mortis**.—**Nackens', Rückens'.** See **OPISTHOTONOS**.—**Säures'.** Artificial muscular rigidity, induced by immersion of a muscle in weak acids. [K.]—**Todtens'.** See **RIGOR mortis**.—**Wassers'.** Artificial rigidity of a muscle caused by immersing it for some time in water. [K, 16.]

**STARRFROST** (Ger.), n. Sta<sup>2</sup>r'f'r'o<sup>2</sup>st. Shivering due to cold; ague. [a, 34.]

**STARRKRAMPF** (Ger.), n. Sta<sup>2</sup>r'kra<sup>2</sup>mpf. Tetanus.—**Selten's'.** See **PLEUROTHOTONUS**.

**STARRSUCHT** (Ger.), n. Sta<sup>2</sup>r-zuch't. See **CATALEPSY**.

**STARVATION**, n. Sta<sup>2</sup>r'v-a'shu'n. Gr., *ἀστία*. Lat., *inedia*. Fr., *inanition*. Ger., *Hungerleiden*. The condition resulting from continued want of food or from lack of food sufficient for nutrition. [a, 48.]—**Heart s.** Of Fothergill, neurasthenia of the heart. [L, 57 (a, 14).]

**STARWORT**, n. Sta<sup>2</sup>r'w'urt. 1. The genus *Aster*. 2. The genus *Stellaria*. 3. The genus *Callitriche*. 4. The *Helonias dioica*. 5. The *Aletris farinosa*. [a, 35.]

**STASIMETRY**, n. Sta<sup>2</sup>s-i<sup>2</sup>m'e<sup>2</sup>t-ri<sup>2</sup>. From *στάσις*, a condition, and *μέτρον*, a measure. Of Bitot, the measurement of the consistence of soft organic bodies. [*Arch. de phys. norm. et path.*, 1878, 2, Ser., v, p. 164 (a, 34).]

**STASIMORPHY**, n. Sta<sup>2</sup>s-i<sup>2</sup>m-o<sup>2</sup>r'f-i<sup>2</sup>. From *στάσις*, a standing, and *μορφή*, form. In botany, a deviation from the normal form of a part or organ, produced by arrested development. [a, 35.]

**STASIRAFISTERO** (It.), n. Sta<sup>2</sup>s-er-a<sup>2</sup>-fes-ta'ro. An instrument invented by Scivelli for maintaining the stitches secure after hysterorrhaphy. [a, 32.]

**STASIS** (Lat.), n. f. Sta(sta)<sup>2</sup>'si<sup>2</sup>sa. Gen., *stas'eos* (-is). Gr., *στάσις* (from *ἵσταναι*, to stand). Fr., *stase*. Ger., *Stillstand*, *Stase*, *Stauung*, *Stockung*. Stagnation of blood or other organic fluid in some portion of the body. [a, 34.]—**Diffusion s.** Ger., *Diffusionsstase*. S. with diffusion of serum or lymph. [A, 319 (a, 34).]—**Venous s.** A blood s. due to venous congestion. [a, 34.]

**STATEMENT**, n. Stat'm'nt. A declaration.—**Ante-mortem s.** A declaration made just before death, with special reference to its medico-legal bearings. Such a s., when made with the consciousness and belief that death is impending, is held in law as equally binding with a s. made on oath. [D, 38.]

**STATIC**, adj. Sta<sup>2</sup>t'i<sup>2</sup>k. Gr., *στατικός* (from *ἵσταναι*, to cause to stand). Fr., *statique*. Ger., *statisch*. 1. Pertaining to what is stationary or in a state of rest or equilibrium. [a, 48.] 2. Pertaining to the standing posture. See **ATAXIA**. 3. Of electricity, existing without manifestation by currents (see **S. ELECTRICITY**).

**STATICE** (Lat.), n. f. Sta<sup>2</sup>t-(sta<sup>2</sup>t'i<sup>2</sup>)<sup>2</sup>st'i<sup>2</sup>k(-ea). Gen., *stat'ices*. Gr., (1st def.) *στατική* (from *ἵσταναι*, to cause to stand). Fr., *statice*. Ger., *Strandnelke*, *Seestrandnelke*. 1. Of the ancients, see **ARMERIA vulgaris**. 2. Sea-lavender; a genus of plants forming, with *Armeria*, etc., a tribe (*Staticeæ* or *Statiaceæ*) of the *Plumbaginæ*. [a, 35.]—**S. brasiliensis.** A Brazilian species. The root, known as *bayeru* or *quaycurá*, is used as an astringent gargle and as a discutient. [a, 35.]—**S. caroliniana.** Fr., *statice de la Caroline*. Ger., *carolinische Strandnelke*. Marsh-rosemary, inkroot; a North American herb. The bitter root, formerly in the secondary list of the U. S. Ph., is a powerful astringent, and is used in aphthæ, angina, etc. [a, 35.]—**S. limonium.** Fr., *behen rouge*, *saladele*. Ger., *gemeine Strandnelke*. Common sea-lavender, wild marsh-beet of Europe. The root and leaves are tonic and astringent. [a, 35.]—**S. mucronata.** A species the roots of which are used in Morocco as a nervine. [a, 35.]—**S. pseudo-limonium.** A species found especially on the shores of the North Sea; used like *S. limonium*. [a, 35.]—**S. speciosa.** Fr., *statice superbe*. Showy sea-lavender; a solidifying species of southern Siberia and Russia, used especially in uterine affections. [a, 35.]

**STATOBLASTS**, n. pl. Sta<sup>2</sup>t'o-bla<sup>2</sup>sta. From *στάσις*, placed, and *βλαστός*, a sprout. Ger., *Statoblasten*. Certain reproductive buds developed in the interior of *Polyzoa*, but not liberated until the death of the parent organism. [B, 28 (a, 27).]

**STATOMETER**, n. Sta<sup>2</sup>t-o<sup>2</sup>m'e<sup>2</sup>t-er. From *στάσις*, placed, and *μέτρον*, a measure. Fr., *statomètre*. Ger., *S.* An instrument used to determine the amount of protrusion of an eye; consisting of a rod or bar with two perpendicular arms or legs of equal length, one of them fixed, the other movable. On the former slides a sight-

vane, while on the latter is a mirror. The distance between the arms is made equal to the diameter of the base of the orbit, and the sight-vane is so adjusted that the cornea, its reflected image, and the vane are in the same line. Opposite the eye to be examined, on the cross-bar, is a small, round mirror, in which the eye sees its own image. This mirror, by means of a rod, may be pushed backward and forward upon the cross-bar. [F.]—**Zehender's s.** A s. consisting of a small, rectangular box, with one side open. In this box is a mirror about as wide as the face. When the instrument is placed before both eyes so that the mirror is parallel to the frontal surface, each eye is reflected in it. Small pins, movable by a screw, are so arranged as to stand immediately in front of the centre of the reflected pupils. Their distance from each other may be read off from a scale. [F.]

**STATUS** (Lat.), n. m. Stat(sta)t(u)s(u)s. Gen., *stat/us*. From *stare*, to stand. Fr., *état*. Ger., *Zustand*, *Beschaffenheit*. A condition, a stage; particularly (of old writers) that stage of a disease in which, having reached its height, it remains stationary before it begins to decline. [A, 244.]—**S. arthriticus**. Nervous or gastric disturbances due to imperfect or masked gout. [A, 325 (a, 34).]—**S. cribrosus**. See **ÉTAT criblé**.—**S. eclampticus**. The state or condition of an individual affected with eclampsia. [a, 34.]—**S. epilepticus**. Fr., *état de mal épileptique*. 1. That state in which an epileptic has a number of fits in rapid and often regular succession, so that he does not become conscious between them. The condition is often associated with fever and frequently causes death. 2. See **HYSTERO-EPILEPSY**.—**S. gastricus**. See **GASTRICISM** (2d def.).—**S. hystericus**. The hysterical state or condition. [D.]—**S. nervosus**. See **NEURASTHENIA**.—**S. pituitosus**. See **GLUTINOSUM spontaneum**.—**S. praesens**. The condition of an individual at the time a note is made of it (used generally of his condition when he first comes under observation as a patient). [a, 34.]—**S. typhosus**. The asthenic, delirious condition observed in typhoid and certain other fevers; characterized by great prostration, subsultus tendinum, floccitatio, feeble, frequent pulse, low muttering delirium or coma vigil, and dryness with brown color of the tongue. [B; a, 34.]

**STAUB** (Ger.), n. Sta'tu'b. See DUST.—**Befruchtungss', Blüthens'**. See POLLEN.—**Gehirnmarks'**. See MYELOCTE.—**S'beutel**. See ANTER.—**S'fieber**. Fever due to the inhalation of dust in certain occupations. [a, 34.]—**S'gefäss**. See STAMEN.—**S'krankheit**. See ANTHRACOSIS (4th def.).

**STAUDE** (Ger.), n. Sta'tu'd'e's. An undershrub. [a, 35.]

**STAUDIG** (Ger.), adj. Sta'tu'd-i'g. See SUFFRUTICOSE.

**STAUPÉ** (Ger.), n. Sta'tu'p'e-s. Epilepsy; distemper (of dogs); influenza (of horses). [A, 315, 521 (a, 21).]—**Böse S.** See EPILEPSY.—**Korns'**. See ERGOTISM.

**STAUROPLÉGIE** (Fr.), n. Stor-o-pla-zhe. See **Crossed HEMIPLEGIA**.

**STAUUNG** (Ger.), n. Sta'tu'un'g. See STASIS.

**STAVESACRE**, n. Stav'ak'r. The *Delphinium staphisagria* or its seed. [a, 35.]

**STAXIS** (Lat.), n. f. Sta'tx(s)x'i's. Gen., *stax'eos* (-is). Gr., *στάξις* (from *στάξω*, to drop). Fr., s. Ger., S. Of Hippocrates, an effusion of blood in drops. [D.]

**STEPSIN**, n. Ste'a'p'sin. Fr., *stéapsine*. Ger., S. A principle obtained from pancreatic juice, capable of digesting twenty-four times its own weight of fat. It forms translucent, shining scales, soluble in water. [B.]

**STEARALDEHYDE**, n. Ste-a'r-a'l'd'e'z-hid. Ger., *Stearaldehyd*. See **STEARIC aldehyde**.

**STEARATE**, n. Ste-a'r-at. Fr., *stéarate*. Ger., *Stearat*. A salt of stearic acid. [B, 93 (a, 14).]

**STEARERIN**, n. Ste-a'r'e'r-i'n. Fr., *stéarérine*. Ger., S. A fatty substance, analogous to stearin, found in the grease of sheep's wool. [B, 93 (a, 14).]

**STEARIC**, adj. Ste-a'r'i'k. Fr., *stéarique*. Derived from or contained in stearin. [B.]—**S. acid**. Fr., *acide stéarique*. Ger., *Stearinsäure*, *Talgssäure*. A monobasic acid, C<sub>18</sub>H<sub>36</sub>O<sub>2</sub>, forming laminar crystals, and occurring as a glyceryl stearate along with glyceryl palmitate in the solid animal fats. It unites with the alkalis to form soaps. [B, 4; K.]—**S. aldehyde**. A body, C<sub>17</sub>H<sub>34</sub>·CHO, bearing the same relation to s. acid that ordinary aldehyde bears to acetic acid. It occurs in foliate crystals. [B, 4.]

**STEARIDIC ACID**, n. Ste-a'r-i'd'i'k. Fr., *acide stéaridique*. Ger., *Stearidinsäure*. An amorphous substance, C<sub>18</sub>H<sub>34</sub>O<sub>2</sub>, isomeric with oleic acid. [B, 93 (a, 14).]

**STEARIN**, n. Ste'a'r-i'n. From *stéarap*, stiff fat. Fr., *stéarine*. Ger., S. A derivative of glycerin in which one or more molecules of stearyl replace one or more molecules of hydroxyl. The term, when used without qualification, is understood to mean tristearin. [B, 4.] See also **DISTEARIN** and **TRISTEARIN**.

**STEAROCONOT**, n. Ste-a'r-o'k'o'n-o't. From *stéarap*, fat, and *κόνος*, dust. Fr., *stéaroconote*. Ger., *Stearokonot*. A yellowish-brown, pulverulent fatty substance resembling cephalot; said to have been obtained by Couerbe from the brain. According to Frémy, it is a mixture of albumin, oleophosphates, and stearic acid, while Bibra considers it as simply a mixture of fatty acids. [B, 93 (a, 14); B, 118.]

**STEAROL**, n. Ste'a'r-o'l. Fr., *stéarol*. A medicament having fat as an excipient. [B, 38 (a, 14).]

**STÉAROLÉ** (Fr.), n. Sta-a'r-o-la. See OINTMENT.

**STEAROLEIC ACID**, **STEAROLIC ACID**, n's. Ste-a'r-o'l'e'i'k, -o'l'i'k. Fr., *acide stéaroléique*. Ger., *Stearolsäure*. A monobasic acid, C<sub>18</sub>H<sub>32</sub>O<sub>2</sub> = C<sub>17</sub>H<sub>31</sub>·COOH, crystallizing from alcohol as long prisms. [B, 3 (a, 38).]

**STEARONE**, n. Ste'a'r-on. Fr., *stéarone*. Ger., *Stearon*. Diasteryl ketone, (C<sub>17</sub>H<sub>34</sub>)<sub>2</sub>·CO = C<sub>36</sub>H<sub>70</sub>O. [B, 2.]

**STEAROPHANIC ACID**, n. Ste-a'r-o-fa'n'i'k. Fr., *acide stéarophanique*. Ger., *Stearophansäure*. See **STEARIC ACID**.

**STEAROPHANIN**, n. Ste-a'r-o-f'a'n-i'n. Fr., *stéarophanine*. Ger., *Stearophan*. See **ANAMIRTIN**.

**STEAROPTENE**, n. Ste-a'r-o'p't-en. Fr., *stéaroptène*. Ger., *Stearopten*. A camphor-like solid residue formed by the essential oils at a low temperature. [B, 93, 108 (a, 14).] Cf. **LEOPTENE**.

**STEARORICINIC ACID**, n. Ste-a'r-o-ri'z-s'i'n'i'k. Fr., *acide stéaroricinique*. Ger., *Stearoricensäure*. See **RICINOSTEARIC ACID**.

**STEAROXYLIC ACID**, n. Ste-a'r-o-x'i'k. Fr., *acide stéaroxylique*. Ger., *Stearoxylsäure*. A monobasic acid, C<sub>18</sub>H<sub>32</sub>O<sub>4</sub> = C<sub>17</sub>H<sub>31</sub>O<sub>3</sub>·COOH, crystallizing from alcohol as small shining plates. [B, 3 (a, 38); B, 4.]

**STEARRHŒA** (Lat.), n. f. Ste(ste)'a'r(a'r)-re'(ro'e')-a'. From *stéarap*, fat, and *ρῶα*, a flowing. Fr., *stéatorrhée*. Ger., *Stéatorrhœe*. See **SEBORRHŒA**.—**S. congestiva**. See **SEBORRHŒA congestiva**.—**S. flavescens**. Seborrhœa in which either yellow sebaceous matter is secreted or the sebaceous matter turns yellow after its deposit upon the skin. [G.]—**S. nigricans**. Of Wilson and Neligan, a form of seborrhœa in which the sebaceous matter is of a dark color, varying from gray to jet black when first secreted, forming a dark-colored deposit upon the skin; said by them to be attended with more irritation and sensitiveness of the affected region than ordinary seborrhœa. Other writers regard the disease as a seborrhœa oleosa in which the sebaceous deposit upon the skin is colored dark by admixture with dirt. [G, 1, 45.]—**S. simplex**. Seborrhœa of the common type. [G, 1.]

**STEARYL**, n. Ste'a'r-i'l. Ger., S. The radicle, C<sub>18</sub>H<sub>35</sub>O, of stearic acid. [B.]

**STEATHYLE** (Lat.), n. f. Ste(ste)'a'th(a'th)-il(u'l)-e(a). Gen., *-hyles*. From *stéarap*, fat, and *ῥῆν*, matter. Of Lobstein, a morbid lardaceous substance. [L, 50 (a, 14).]

**STEATITE**, n. Ste'a't-it. From *stéarap*, fat. Lat., *lardites*. Fr., *stéatite*. Ger., *Steatit*, *Bildstein*, *Schreibstein*, *Seifenstein*. Soapstone, granular magnesium silicate; a gray or grayish-green variety of talc, very greasy to the touch. [L, 30, 41, 49.]—**Sulphurated s.** A mixture of 9 parts of powdered s. with 1 part of zinc sulphate; used as a dusting powder for intertrigo of infants. [Vigier, "Gaz. hebdomadaire de méd. et de chir.," Feb. 5, 1886; "N. Y. Med. Jour.," Mar. 6, 1886, p. 283 (a, 50).]

**STEATOCELE** (Lat.), n. f. Ste(ste)'a't(a't)-o(o)-se(ka)'le(la); in Eng., *ste'a'to(-sel)*. Gen., *-cel'es*. From *stéarap*, fat, and *κύλη*, a tumor. Fr., *stéatocele*. A fatty tumor in the scrotum. [E.]

**STEATODES** (Lat.), adj. Ste(ste)'a't(a't)-o(o)-ed'ez(as). Gr., *στεατώδης* (from *stéarap*, fat, and *εἶδος*, resemblance). Fatty, abounding in fat. [L, 50 (a, 14).]

**STEATOMA** (Lat.), n. n. Ste(ste)'a't(a't)-om'a's. Gen., *-om'atos* (-atis). Gr., *στεάτωμα* (from *stéarap*, fat). Fr., *stéatôme*. Ger., *Speckgeschwulst*, *Speckgewächs*, *Steatom*. See **LIPOMA** and **ATHEROMA** (1st def.).—**S. testiculi**. See **STEATOCELE**.

**STEATOMYCES** (Lat.), n. m. Ste(ste)'a't(a't)-o(o)-m'i'z(u'e)-sez(kas). Gen., *-et'os(-etis)*. From *stéarap*, fat, and *μύκης*, a mushroom. Fr., *stéatomyce*. Ger., *Speckschwamm*. Of Ritgen, a fatty, fungous excrescence. [L, 50 (a, 14).]

**STEATOPYGIA** (Lat.), n. f. Ste(ste)'a't(a't)-o(o)-pi'z(pu'g)-i'z-a's. From *stéarap*, fat, and *πυγή*, the nates. Fr., *stéatopygie*. Ger., *Fettsteiss*. An excessive development of fat about the nates, as in Hottentot women.

**STEATORRHAGIA** (Lat.), **STEATORRHŒA** (Lat.), n's f. Ste(ste)'a't(a't)-ra'j(r'a'g)-i'z-a's. -re'(ro'e')-a's. From *stéarap*, fat, and *ῥῆγναι*, to burst forth, or *ρῆν*, to flow. See **SEBORRHŒA**.

**STEATOSIS** (Lat.), n. f. Ste(ste)'a't(a't)-o(o)-s'i'z. Gen., *-os'eos* (-is). From *stéarap*, fat. Fr., *stéatose*. Ger., *Steatose*, *Fettbildung* (1st def.), *Speckbildung* (2d def.). 1. Fatty degeneration. 2. A tendency to the formation of abnormal deposits of fat. [D.] 3. A cutaneous affection consisting in an anomaly of sebaceous secretion; in Auspitz's classification, a suborder of the *Keratonosi*, including *Hypersteatosis*, *Parasteatosis*, and *Asteatosis*. [G, 4.] See **SEBORRHŒA**.

**STEATOSPONGUS** (Lat.), n. m. Ste(ste)'a't(a't)-o(o)-s'po'n'g(u)s(u)s. From *stéarap*, fat, and *σπόγγος*, a sponge. See **STEATOMYCES**.

**STEATOZOON** (Lat.), n. n. Ste(ste)'a't(a't)-o(o)-zo'o'n. From *stéarap*, fat, and *ζῷον*, an animal. See **DEMODEX folliculorum**.

**STEBEN** (Ger.), n. Stab'e'n. A place in Upper Franconia, Bavaria, where there are chalybeate and alkaline springs. [a, 14.]

**STECHAPFEL** (Ger.), n. Ste'ch'a'p'f-el. See **DATURA** and **DATURA stramonium**.—**S'form**. A thorn-apple shape assumed by the red blood-discs after their contents have evaporated. [K.]—**S'samenextrakt**. See **Extractum STRAMONII**.

**STÉCHAS** (Fr.), n. Sta-ka's. See **LAVANDULA stéchas**.

**STECHBECKEN** (Ger.), n. Ste'ch'be'k-e'n. See **STECK-BECKEN**.

**STECHEN** (Ger.), n. Ste'ch'e'n. See **ACUPUNCTURE**.

**STECHEND** (Ger.), adj. Ste'ch'e'nd. See **PUNCTENT**.

**STECHPILLE** (Ger.), n. Ste'ch'p'il-le. See **SUPPOSITORY**.

**STECHSAUGER** (Ger.), n. Ste'ch'z'a'u'g-e'r. An instrument for puncturing the foetal membranes.

**STECHWINDE** (Ger.), n. Ste'ch'v'i'nd-e. See **SMILAX**.

**STECKBECKEN** (Ger.), n. Ste'k'be'k-e'n. A bed-pan.

**STECKFLUSS** (Ger.), n. Ste'k'flus. See **Suffocative CATARRH**.

**STECKHUSTEN** (Ger.), n. *Ste'k'hust-e'n*. See **PERTUSSIS**.

**STEEL**, n. *Stel*. Gr. *χάλυξ*. Lat., *chalybs*. Fr., *acier*. Ger., *Stahl*. 1. A form of iron containing 0.6 to 1.9 per cent. of carbon susceptible of being tempered by exposure to heat and a subsequent cooling in water, oil, lead, mercury, etc. S. is capable of being sharpened to a fine, durable edge. [B; L.] 2. As sometimes used in Great Britain, any medicinal preparation of iron.—S. *balsam*. See *Linimentum Ferri Nitrici*.—S. *wine*. See *Vinum Ferri*.

**STEELYARD**, n. *Sti'l'y'rd*. A balance consisting essentially of a lever on the graduated long arm of which the weights are placed. [a, 48.]

**STEEP-WEED**, **STEEP-WORT**, n's. *Step'wed*, *-wu'rt*. The *Pinguicula vulgaris*. [A, 505 (a, 21).]

**STEGIUM** (Lat.), n. n. *Stej'(ste'g)'i'2-u'm(u'm)*. From *στεγός*, a roof. Of Miers, the mass of apical prolongations of the filaments (stamens) which often cover the top of the style in the *Asclepiadeae*. [a, 35.]

**STEGNOSIS** (Lat.), n. f. *Ste'g-nos'i's*. Gen., *-os'eos (-is)*. Gr., *στεγνωσις* (from *στεγνώνω*, to constrict). See **CONDENSATION** and **STENOSIS**.

**STEGNOTIC**, adj. *Ste'g-not'i'k*. Gr., *στεγνωτικός*. Lat., *steg-noticus*. Fr., *stegnolique*. Astringent. [L, 50 (a, 14).]

**STEHLUCHT** (Ger.), n. *Stal'zucht*. See **CLEPTOMANIA**.

**STEIFWERDEN** (Ger.), **STEIFWERDUNG** (Ger.), n's. *Stif've'rd-e'n*, *-un'2*. See **ERECTION**.

**STEISCH** (Ger.), n. *Sti'e'r*. See **ERECTOR**.—S. *des Kitzlers*. See **ISCHIO-CAVERNOSUS**.

**STEIFHALS** (Ger.), n. *Stif'ha's*. See **STIFF-NECK**.

**STEIFHEIT** (Ger.), n. *Stif'hit*. See **RIGIDITY**.—**Muskels'**. 1. Muscular rigidity. 2. See **THOMSEN'S DISEASE**.

**STEISUCHT** (Ger.), n. *Stif'zucht*. See **CATALEPSY**.

**STEIGBÜGEL** (Ger.), n. *Stig'bu'g-el*. See **STAPES**.

**STEIN** (Ger.), n. *Stin*. See **CALCULUS**, **LAPIS**, **PYRENE** (1st def.), and **STONE**.—**Aders'**. See **PHLEBOLITH**.—**Press'**. See **HÖLLENSTEIN**.—**Gallens'**. See the major list.—**Gebärmutter's**. See **UTERINE CALCULUS**.—**Gelbs'**, **Gelbsuchts'**. See **ICTERUS**.—**Gifts'**. White arsenic ore. [L, 46 (a, 21).]—**Griess'**. See **CALCULUS**.—**Harnsäures'**. See **URIC-ACID CALCULUS**.—**Harns'**. See **URINARY CALCULUS**.—**Höllens'**. See the major list.—**Hörs'e**. See **OTOLITHS**.—**Judens'e**. See **PHENICITES**.—**Kröten's**. See **BUPONITES** and **SALIVARY CALCULUS**.—**Lendens'**. See **NEPHRITE** and **RENAL CALCULUS**.—**Lungens'**. See **PULMONARY CALCULUS** and **LUNG-STONE**.—**Magens'**. See **GASTRIC CALCULUS**.—**Maulbeers'**. See **MULBERRY CALCULUS**.—**Milchs'**. A cheesy mass formed in a galactocoele by the absorption of the watery portion of the milk. [a, 37.] Cf. *Lactical calculus*.—**Mutters'**. See **UTERINE CALCULUS**.—**Narrens'e**. See **CARBONES ARTEMISIE RUBRA**.—**Nasens'**. See **RHINOLITE**.—**Nierens'**. See **RENAL CALCULUS** and **NEPHRITE**.—**Speichels'**. See **SALIVARY CALCULUS**.—**S'auflösend**. See **LITHOTRIPIC**.—**S'auflösung**. See **LITHOTRITY**.—**S'ausleerend**. See **LITHOGOGUE**.—**S'beschwerde**, **S'bildung**. See **LITHIASIS**.—**S'brechung**. See **LITHOTRITY**.—**S'bruch**. See **POROCOELE**.—**S'erzeugung**. See **LITHIASIS**.—**S'fach**. See **PYRENE** (1st def.).—**S'frucht**. See **LITHOPEDION** and **DRUPE**.—**S'fühler**. See **LITHOSCOPE**.—**S'geschwulst**. See **SCIRRHUS**.—**S'gries**. See **GRAVEL**.—**S'harnen**. See **LITHURISIS**.—**S'hauerlunge**. See **STONE-CUTTERS' PHTHISIS**.—**S'husten**. See **TUSSIS CALCULOSA**.—**S'kern**. See **OSSICULUS** (2d def.) and **PYRENE** (1st def.).—**S'kind**. See **LITHOPEDION**.—**S'kohle**. See the major list.—**S'krank**. See **CALCULUS**; as a n. a person suffering from stone. [E, 34.]—**S'leiden**. See **LITHIASIS**.—**S'löffel**. See **LITHOTOMY SCOOP**.—**S'mittel**. See **LITHOTRIPIC**.—**S'öl**. See **PETROLEUM**.—**S'pocken**. See **STONE-POX**.—**S'rotz**. See **UTERINE CALCULUS**.—**S'venens'**. See **PHLEBOLITH**.—**S'vorhaut's**. See **PREPUAL CALCULUS**.

**STEINAPFEL** (Ger.), n. *Stin'a'pf-el*. A pome, like that of the hawthorn, containing bony carpels. [a, 35.]

**STEINBRECH** (Ger.), n. *Stin'bre'ch*. See **SAXIFRAGA**, **EM-PETRUM**, **ASPLENIUM trichomanes**, and **ENANTHE fistulosa**.

**STEINCHEN** (Ger.), n. *Stin'che'2n*. See **CALCULUS**.—**Ohr-ens'**. See **AURAL CALCULUS**.—**Thränenweges'**. See **LACRYMAL CALCULUS**.

**STEINFARN** (Ger.), n. *Stin'fa'n*. See **ASPLENIUM trichomanes**, **ASPLENIUM ceterach**, and **POLYPODIUM vulgare**.

**STEINKLEE** (Ger.), n. *Stin'kla*. See **MEDICAGO lupulina** and **MELLOTIS**.

**STEINKOHLE** (Ger.), n. *Stin'kol-e*. See **ANTHRACITE** and **LITHRANTHRAN**.—**S'kalk**. See **ASTHAKORALL**.—**S'ntheer**. See **COAL TAR**.—**S'ntheerkreosot**. See **PHENOL**.—**S'ntheeröl**. *Coal-tar oil*. [B.]—**S'ntheersäure**. *Rosolic acid*. [A, 524.]

**STEINKRAUT** (Ger.), n. *Stin'kra'ut*. See **ALYSSUM**, **ASPERULA odorata**, and **RESEDA luteola**.

**STEINLEBERKRAUT** (Ger.), **STEINLEBERMOOS** (Ger.), n's. *Stin'lab-e'r kra'ut*, *-moos*. The *Marchantia polymorpha*, *Parmlina omphalodes*, and other lichens. [a, 35.]

**STEINSAMEN** (Ger.), n. *Stin'za'm-e'n*. See **LITHOSPERMUM**.

**STEINSCHNITT** (Ger.), n. *Stin'shn'i't*. See **LITHOTOMY** and **CYSTOTOMY**.—**Bauch's**. See **Suprapubic cystotomy**.—**Grosser S**. See **Median cystotomy**.—**Kleiner S**. See **APPARATUS minor**.—**Seltem's**. See **Lateral cystotomy**.—**S. durch das Trigonum**

**Lieutaudii**. See **Rectal cystotomy**.—**S'lage**, **S'slage**. See **Lithotomy position**.—**S'messer**. See **CYSTOTOME** (1st def.).

**STEINWASSER** (Ger.), n. *Stin'va's-se'r*. A place in Bohemia where there is a sulphurous spring. [L, 49 (a, 14).]

**STEIROSIS** (Lat.), n. f. *Sti'r'(ste'2-i'r)-os'i's*. Gen., *-os'eos (-is)*. Gr., *στείρωσις* (from *στείρω*, barren). Fr., *stérose*. See **STERILITY**.

**STEISS** (Ger.), n. *Stis*. See **BREECH**.—**Fetts'**. See **STEATOPYOLA**.—**S'geschwulst**. A swelling in the sacral region. [a, 34.]—**S'tuch**. See **DIAPER** (2d def.).

**STEISSBEIN** (Ger.), n. *Stis'bin*. See **COCYX**.—**S'glatze**, **S'hautgrube**. See **FOVEOLA coccygea**.—**S'hörner**. See **CORNUA coccygea**.—**S'knoten**. See **COCYGEAL GLAND**.—**S'spitze**. The apex of the coccyx. [L, 30 (a, 14).]

**STEISSCHEN** (Ger.), n. *Stis'ch'e'2n*. See **COCYX** (1st def.).

**STEISSENDE** (Ger.), n. *Stis'e'nd-e*. See **PELVIC POLE**.

**STEISSLAGE** (Ger.), n. *Stis'la'g-e*. A breech presentation. —**Einfache S**. See **Vollkommene S**.—**Gedoppelte S**. That variety in which both knees and hips are flexed. [A, 61.]—**Unvollkommen gedoppelte S**. That variety in which only one of the lower limbs is flexed at the knee, the other being applied to the abdomen and the chest. [A, 61.]—**Vollkommene S**. That variety in which both lower limbs are flexed at the hips, but neither is flexed at the knee. [A, 61.]

**STEISSRÜCKENLAGE** (Ger.), n. *Stis'ru'k-e'n-la'g-e*. That posture of a patient in which the body resting on the back, the knees are bent, and then the thighs brought up against the abdomen, so as to tilt the pelvis forward. [A, 35.]

**STEISSTERATOM** (Ger.), n. *Stis'tar-a't-om*. A teratoma in the sacral region. [a, 34.]

**STELLA** (Lat.), n. f. *Ste'l'la*. A roller bandage applied to the thorax with figure-of-eight turns over both shoulders so that the point of crossing is over the spine (s. *dorsi*) or over the sternum (s. *pectoris*). [A, 326 (a, 34).]

**STELLAL**, adj. *Ste'l'l*. Of or pertaining to the *Stellales*, which are Lindley's s. alliance (Lat., *nixus stellatis*) of the *Epigynæ*, consisting of the *Stellatæ*. [a, 35.]

**STELLARIA** (Lat.), n. f. *Ste'l-la'(la'2)-ri'2-a*. From *stella*, a star. Fr., *stellaire* (2d def.). Ger., *Sternkraut* (2d def.), *Stern-miere* (2d def.). 1. The *Asperula odorata* and *Alchemilla vulgaris*. 2. Star-chickweed; a genus of Caryophyllaceae herbs. The *Stellariaceæ* are a family of the *Stellariæ*; the *Stellariæ* are a tribe of the *Caryophyllæ*; the *Stellariæ* are: Of Dumortier, an order of the *Tropetaleæ*; of Reichenbach, a section of the *Stellariæ* (a division of the *Caryophyllæ*); the *Stellariæ* are a tribe of the *Alsinææ*. [a, 35.]—**Herba stellariae**. The *Asperula odorata* (the plant in flower). [a, 35.]—**S. alpine**, **S. aquatica**. Fr., *stellaire alpine*. Water-starwort; a refrigerant growing in Europe and North America, recommended as an application to boils. [a, 35.]—**S. holostea**. Fr., *stellaire des haies*, *langue d'oiseau*. Ger., *grossblumiges Sternkraut*, *Augentrostgras*, *Blumengras*, *Sterngras*, *Brustkraut*, *Jungferngras*. Agworm-flower, all-bone, bird's-tongue, break-bones, may-grass, snap-stalks, great starwort of Europe; a demulcent and refrigerant species. The stems and leaves were formerly used like *S. media*. The bruised leaves, the juice, and a distilled water made from the plant have been used as an application to sore eyes. [B; a, 35.]—**S. media**. Fr., *morgeline*, *mouron blanc* (ou des oiseaux, ou d'hiver). Ger., *mittleres Sternkraut*, *Vogelkraut*, *Miere*, *Hühnerbiss*, *Mäusedarm*, *Stern-miere*. Chickweed. It is somewhat astringent and was formerly used in phthisis, hæmoptysis, hæmorrhoids, and skin diseases, also as an application to wounds, ulcers, and inflamed eyes. [a, 35.]—**S. nemorum**. Ger., *Waldsternmiere*. Wood-starwort; identified by some with the *ἀλσών* of Dioscorides, which was used like *S. media*. [a, 35.]—**S. pallasiانا**. An astringent species found in northern Asia. [a, 35.]

**STELLATE**, adj. *Ste'l'at*. Lat., *stellatus*, *stellaris* (from *stella*, a star). Fr., *étoilé*, *stellaire*. Ger., *sternförmig*. Star-shaped; having parts more or less pointed, projecting all round, like a star as conveniently figured. The *Stellate*, or *Stellateæ*, are the *Galiaceæ*. [a, 35; a, 48.]

**STELLE** (Ger.), n. *Ste'l'le*. See **LOCUS**.—**Broca'sche S**. See **BROCA'S CONVOLUTION**.

**STELLIFORM**, adj. *Ste'l'i'2-förm*. Lat., *stelliformis* (from *stella*, a star, and *forma*, form). See **STELLATE**.

**STELLINERVIS** (Lat.), adj. *Ste'l'i'2-nu'r(ne'2r)'vi's(wi'2s)*. From *stella*, a star, and *nervus*, a sinew. Fr., *stellénerve*. Of a leaf, having the veins radiating from the centre. [a, 35.]

**STELLULA** (Lat.), n. f. *Ste'l'lu'2(hu'2)-a*. Dim. of *stella*, a star. Fr., *stellule*. Ger., *Sternchen*. A rosette; in some mosses, a collection of leaves terminating the stem. [a, 35.]—**Stellulae Verheyenii**. Fr., *étoiles de Verheyen*. The stellular radicles of the venule interlobulares of the kidney. [L, 57 (a, 14).]

**STELLUNG** (Ger.), n. *Ste'l'lun'2*. See **POSITION**.—**Blossa's**. See **EXPOSURE**.—**Election's**. See **POSITION of election**.—**Hinterhaupt's**. See **Vertex presentation**.—**Hinterscheitel's**. That form of obliquity of the fetal head, during parturition, in which the occiput is situated in the axis of the pelvic canal. [A, 15.]—**Kindens'**. See **POSITION of the fetus**.

**STELZBEIN** (Ger.), n. *Ste'l'z-bein*. An artificial leg. [E.]

**STELZFUSS** (Ger.), n. *Ste'l'z-fus*. An artificial foot. [E.]

**STEM**, n. *Ste'm*. Gr., *καυλός*. Lat., *caulis*. Fr., *étui cortical*. Ger., *Stengel*, *Stamm*. 1. The ascending axis of a plant; the leaf-bearing part of the axis. [a, 35.] 2. A stalk; any stalk-like structure or formation. [a, 48.]—**Brain-s**. Ger., *Gehirnstamm*. The brain, less the pallium or fissured portion and the cerebrum. [J (K).]—**Gland s**. The duct of a gland.—**Herbaceous s**. A s. that

dies down to the ground at the close of the season. [a, 35.]—**Intra-uterine s.** See *Intra-uterine pessary*.—**Leaf-s.** A s., such as a trunk, culm, caudex, etc., having the internodes fully developed and ascending crowned with leaves. [a, 35.]—**Primary s.** The central axis or trunk of a plant. [a, 35.]—**Primitive arterial s.** See *Aortic bulb*.—**Scale-s.** A s. in which the internodes, undeveloped (as in the corm and bulb) or only partially developed (as in the creeper), usually bear undeveloped leaves (scales). [a, 35.]—**S. of the encephalon.** See *Caudex cerebri*.—**S. of a hair.** See *Hair-shaft*.

**STEMMA** (Lat.), n. n. *Ste'm'ma*<sup>3</sup>. Gen., *stem'matos* (-atis). Gr., *στέμμα* (from *στέφειν*, to encircle). Fr., *stemma*. See *Stemulus* (4th def.).

**STEMMHANGEN** (Ger.), n. *Ste'm'ha'n'n-e'n*. In chirotherapy, the forward position of the body in which it is suspended by the arms, the soles of the feet resting firmly against a fixed surface. [L, 57 (a, 14).]

**STEMODIA** (Lat.), n. f. *Ste'm(stam)-od'i-a*<sup>3</sup>. For *Stemodiaca* (from *στέμων*, a thread, *dis*, two, and *ἀκρον*, a point). Fr., *stémodie*. A genus of the *Scrophulariaceae*. [a, 35.]—**S. maritima**. Bastard germander; a bitter undershrub growing in the West Indies; used in indigestion. [a, 35.]

**STEMONA** (Lat.), n. f. *Ste'm(stam)'o'n-a*<sup>3</sup>. From *στέμων*, a thread. Fr., *stémone*. A genus of the *Liliaceae*. [a, 35.]—**S. tuberosa**. A Cochinchina species. The tubers are used as a demulcent and pectoral. [a, 35.]

**STEMPEL** (Ger.), n. *Ste'm'p'e*<sup>2</sup>. See *PISTIL*.—**S'boden**. See *GYNBASE*.—**S'decke**. See *GYNOSTEGIUM*.—**S'fuss**. See *PODOGYNE*.—**S'haube**. See *GYNOSTEGIUM*.—**S'hülle**. See *PERIGYNIUM*.—**S'pölsler**. See *GYNBASE*.—**S'stiel**, *S'träger*. See *GYNOPHORE* (1st def.).

**STENAGMA** (Lat.), n. n. *Ste'n-a'g(a'g)'ma*<sup>3</sup>. Gen., *-ag'matos* (-atis). Gr., *στέναιμα* (from *στενάζειν*, to sigh). See *SIGH*.

**STENAGMUS** (Lat.), n. m. *Ste'n-a'g(a'g)'mu's(mu's)*. Gr., *στεναγμός*. See *SIGHING*.

**STENGEL** (Ger.), n. *Ste'n'a'g'e*<sup>2</sup>. See *CAULIS* and *STEM*.—**Haupts.** The axis of a plant, the primary stalk or stem. [a, 35.]—**S'prosse**. See *STOLON*.—**S'treibend**. See *CAULESCENT*.

**STENOBREGMATE**, adj. *Ste'n-o-bre'g'mat*. From *στενός*, narrow, and *βρέγμα*, the bregma. Having the upper fore part of the head narrow. [a, 48.]

**STENOCARDIA** (Lat.), n. f. *Ste'n-o(o')-ka'r'd'i-a*<sup>3</sup>. From *στενός*, narrow, and *καρδία*, the heart. Ger., *Stenocardie*. See *ANGINA PECTORIS*.

**STENOCARPINE**, n. *Ste'n-o-ka'r'p'en*. See *GLEDITSCHINE*.

**STENOCEPHALISM**, **STENOCEPHALY**, n's. *Ste'n-o-se'f'-a'l-i'z'm*, *-i'*. From *στενός*, narrow, and *κεφαλή*, the head. Fr., *sténocéphalie*. Ger., *Stenokephalie*. A condition in which one of the diameters of the head is unusually short. [a, 34.]

**STENOCHASMUS** (Lat.), adj. *Sten(ste'n)-o(o')-ka'z(ch'a's)'mu's(mu's)*. From *στενός*, narrow, and *χαρμός*, an incision. Having lines drawn from the punctum alae vomeris to the punctum spinæ nasalis posterioris and to the punctum foraminis magni anterius respectively intersecting at an angle of from 74° to 94°. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (a, 50); a, 48.]

**STENOCHORIA** (Lat.), n. f. *Sten(ste'n)-o(o')-kor(cho'r)'i-a*<sup>3</sup>. Gr., *στενοχώρα* (from *στενός*, narrow, and *χώμα*, a place). Ger., *Stenochorie*. Contraction in general. [A, 301 (a, 34).]—**S. sacci lacrimalis**. Narrowing of the calibre of the lacrymal sac and nasal duct. [F.]

**STENOCORIASIS** (Lat.), n. f. *Sten(ste'n)-o(o')-ko'r-i(i'a)'a's(a's)-i'a*<sup>3</sup>. Gen., *-a'seos* (-i'asis). Fr., *sténocoréasie* (from *στενός*, narrow, and *κόρη*, the pupil). Gr., *stenocoria*. Contraction of the pupil. [L, 50 (a, 14).]

**STENOCROTAPHY**, n. *Ste'n-o-kro't'a'f-i'*. From *στενός*, narrow, and *κρόταφος*, the temple. Fr., *sténocrotaphie*. Ger., *Stenokrotaphie*. A narrowing of the temporal region of the skull, due to the approximation of the squamous portion of the temporal bone to the coronal edge of the frontal bone, by which the anterior lateral angle of the parietal bone and the corresponding part of the greater wing of the sphenoid bone become pointed. The extension of the pterion (sutura sphenoparietalis) is from 3 to 7 mm. S. is also known by the narrowing of the great wing of the sphenoid itself. ["Arch. f. Anthrop.," xx, p. 37 (a, 50).]

**STENOMYCTERIA** (Lat.), n. f. *Ste'n-o(o')-mi'kt(mu'kt)-e(a)'ri'a*<sup>3</sup>. From *στενός*, narrow, and *μυκτίρ*, the nose. Contraction of the nasal passages. [E.]

**STENONIAN**, **STENONINE**, adj's. *Ste'n-on'i'a*<sup>3</sup>, *ste'n'-o'n-in*. Named from N. Stenson (Latinized as Stenonianus), a Danish anatomist. [a, 48.]

**STENOPEIC**, adj. *Ste'n-o'p'e-i'k*. From *στενός*, narrow, and *ὥρατος*, containing a hole. Fr., *sténopéique*. Ger., *stenopäisch*. Admitting light through a small opening or narrow slit. [F.]

**STENOSE** (Ger.), n. *Stan-oz'e*<sup>3</sup>. See *STENOSIS*.—**Kropfs'**. Laryngeal stenosis caused by goitre. [a, 34.]—**Narbens'**. Cicatricial stenosis.

**STENOSIS** (Lat.), n. f. *Ste'n-os'i'a*<sup>3</sup>. Gen., *-os'eos* (-is). Gr., *στένωσις* (from *στενώνω*, to straighten). Fr., *sténose*. Ger., *Stenose*. *Verengerung*. A constriction; the narrowing of a canal, passage, or aperture. [D; E.]—**Aortic s.** S. of the aortic valves, of the aortic orifice, or of the aorta itself. [D, 90.]—**Cardiac s.** Ger., *Herzklemme*. S. of the aortic, mitral, tricuspid, or pulmonary aperture. [a, 34.]—**Cicatricial s.** Ger., *Narbenstenose*. S. caused by a cicatrix. [a, 34.]—**Granulation s.** S. caused by an encroachment of granulations or by their contraction. [a, 34.]—**Mitral s.** S. of the mitral valve or orifice or of both. [D.]—**Post-trache-**

**otomic s.** Granulation s. of the trachea after tracheotomy. [Ross, "Edinb. Med. Jour.," Mar., 1883 (E).]—**Subaortic s.** See *Aortic s.*

**STENOSTEGNOSIS** (Lat.), **STENOSTENOSIS** (Lat.), n's f. *Ste'n-o(o')-ste'g-nos'i'a*<sup>3</sup>, *-ste'n-os'i'a*<sup>3</sup>. Gen., *-nos'eos* (-is), *-os'eos* (-is). From *Stenonianus* (see *STENONIAN*), and *στενωσις*, stenosis. Fr., *sténostegnosis*. Stenosis of Stenson's duct. [E.]

**STENOSTOMIA** (Lat.), n. f. *Ste'n-o(o')-stom(sto'm)'i-a*<sup>3</sup>. From *στενός*, narrow, and *στόμα*, the mouth. Fr., *sténostomie*. Ger., *Stenostomie*. Stenosis of the mouth. [E.]

**STENOTHORAX** (Lat.), n. m. *Sten(ste'n)-o(o')-thor'a'x(a'x)*. Gen., *-ac'os* (-ac'is). From *στενός*, narrow, and *θώραξ* (see *THORAX*). A pigeon-breasted person. [L, 50 (a, 48).]

**STEPHANIA** (Lat.), n. f. *Ste'f-an(a'n)'i-a*<sup>3</sup>. Fr., *stéphanie*. A genus of the *Menispermaceae*. [a, 35.]—**S. capitata**. A Java shrub. All parts contain a viscid mucus. The leaves are used as a pectoral. [a, 35.]—**S. rotunda**. A Cochinchina species. The rootstock is used like that of *Aristolochia rotunda*. [a, 35.]

**STEPHANIC**, adj. *Ste'f-a'n'i'k*. Pertaining to the stephanion. [a, 48.]

**STEPHANION** (Lat.), n. n. *Ste'f-a'n(a'n)'i-a*<sup>3</sup>. Gr., *στέφανιον* (dim. of *στέφανος*, a crown). The point where the coronal suture crosses the temporal ridge. [C.]

**STEPHANURUS** (Lat.), n. m. *Ste'f-a'n(a'n)-u'r(ur)'u's(u's)*. From *στέφανος*, a crown, and *οὔρα*, the tail. Fr., *stéphanure*. Of Dising, a genus of nematoid parasites, of the *Strongylidae*. [L, 16, 18.]—**S. dentatus**. A species found in the adipose tissue of the hog, believed to be the cause of "hog cholera." [L, 24.]

**STERBEND** (Ger.), adj. *Ste'r'b'e'nd*. See *MORIBUND*.

**STERBLICHKEIT** (Ger.), n. *Ste'r'b'li'ch'kit*. See *MORTALITY*.

**STERBLING** (Ger.), n. *Ste'r'b'li'n'*. A still-born child. [L, 46 (a, 21).]

**STERCIBILIN**, n. *Stu'r'k-o-bil'i'n'*. Fr., s. Ger., *S.* A coloring matter found in the faeces; a product of change in the bile pigments thought by some to be identical with hydrobilirubin. [a, 38.]

**STERCO-ENTÉRECTASIE** (Fr.), n. *Ste'r'ko-a'n't'a-re'k-ta's-z'e*. Dilatation of the intestines by faeces; one of Piorry's divisions of constipation that he considered due to insufficient alimentation. [a, 34.]

**STERCORACEOUS**, adj. *Stu'r'k-o'r-a'shu's*. From *stercus*, excrement. Fr., *stercoral*, *stercoraire*. Ger., *kothig*. Pertaining to, of the nature of, or containing faeces; caused by the retention of faeces. [D.]

**STERCORÆMIA** (Lat.), n. f. *Stu'r'k(ste'r'k)-o'r-em'(a'e'm)-i-a*<sup>3</sup>. From *stercus*, excrement, and *αἷμα*, blood. See *STERCORMIÆ*.

**STERCORAL**, adj. *Stu'r'k-o'r'l*. See *STERCORACEOUS*.

**STERCORÉMIE** (Fr.), n. *Ste'r'kor-a-me*. Of Bouchard, a state of blood-poisoning supposed to be due to the absorption of excretory alkaloids from the intestinal contents. [Dujardin-Beaumez, "Gaz. hebdomadaire de méd. et de chir.," June 13, 1884, p. 403.] Cf. *COPRÆMIA* and *LEUCOMIÆ*.

**STERCORIN**, n. *Stu'r'k-o'r-i'n*. Fr., *stercorine*. A crystalline substance obtained from faeces, similar to cholesterol, from which Flint supposed it to be derived. [B, 93 (a, 14); K.] Cf. *EXCRETIN*.

**STERCULIA** (Lat.), n. f. *Stu'r'k(ste'r'k)-u'l'i(u'l)'i-a*<sup>3</sup>. From *Sterculius*, the god presiding over manuring. Fr., *sterculier*. Ger., *Stinkbaum*. A genus of trees giving name to an order (*Sterculiaceae*; Fr., *sterculiacees*) of the *Malvales*. The *Sterculeae*, or *Sterculiaceae*, are a tribe of this order. [a, 35.]—**S. acuminata**. Fr., *sterculie à aiguillons*. See *COLA acuminata*.—**S. balanghas**. Ger., *länglichblättriger Stinkbaum*. A species found in the Moluccas. The bark is used as an emmenagogue. The seeds, called Malabar nuts, are edible and yield an oil. [a, 35.]—**S. cola**. See *COLA acuminata*.—**S. foetida**. Fr., *arbre (ou bois) puant*. Ger., *fingerblättriger Stinkbaum*, *Kothbaum*. An East Indian species. The leaves and bark are aperient, diuretic, and diaphoretic, and a decoction of the mucilaginous, astrigent fruit is used in gonorrhoea. The oily seeds are edible if roasted, but, uncooked, produce nausea and vertigo. [a, 35.]—**S. tomentosa**. Fr., *sterculier cotonneux*. Ger., *filziger Stinkbaum*. A Senegambian species. The seeds are used like those of *Cola acuminata*. [a, 35.]—**S. urceolata**. Ger., *krugkelchiger Stinkbaum*. A species found in the Molucca and Sunda Islands. The bark is used as an emmenagogue, and the root externally in cephalalgia. [a, 35.]—**S. urens**. Ger., *brennender Stinkbaum*. Kuteera-gum plant; an East Indian species. The astrigent bark exudes a gum resembling tragacanth, and a sort of coffee is prepared from the seeds. [a, 35.]

**STERCUS** (Lat.), n. n. *Stu'r'k(ste'r'k)'u's(u's)*. Gen., *sterc'oris*. See *DRUG*.—**Dæmonis s.** An old name for asphalt. [A, 335.]—**S. camelorum**. Camel's dung; once official. Egyptian sal-ammoniac is made from the soot of the burnt dung. [a, 35.]—**S. caninum album**. See *ALBUM græcum*.—**S. cuculi**. The excrement of the cuckoo; formerly official. [a, 35.]—**S. Diaboli**. See *ASAFÆTIDA*.—**S. nigrum**. See *ALBUM nigrum*.

**STERELMINTHA** (Lat.), n. n. pl. *Ste'r-el'mi'n'th'a*<sup>3</sup>. From *στερεός*, hard, and *ἐλμινς*, a worm. The solid or parenchymatous worms, constituting a class of entozoa characterized by having the nutrient cavities or canals excavated in the parenchyma of the body. [L, 27.]

**STEREOCHEMIE** (Ger.), n. *Star'a-o-ch'e'am-e'*. Fr., *stéréochimie*. That branch of chemistry which deals with the spatial arrangement of the atoms in the molecule. [B, 270 (a, 48).] Cf. *Physical ISOMERISM*.

**STEREOCYST**, n. *Ste²r-e²-o-si²st*. Lat., *stereocystis* (from *στερεός*, stiff, and *κύστις*, a bladder). Fr., *stéréocyste*. Ger., *Fettbalgeschwulst*. A cyst containing fatty matter. [L, 50 (a, 14).]

**STÉRÉOGNOSTIQUE** (Fr.), adj. *Sta-ra-o²g-no²s*-te-s. Relating to the sense of touch. [H. Hoffmann, "Thèse de Strasbourg," 1883; "Arch. de neur.", Jan., 1885, p. 134.]

**STEREOM**, n. *Ste²r-e²-om*. From *στερεός*, stiff. Fr., *stéréome*. The elements, such as fibres, that give strength to a fibro-vascular bundle. [a, 35.] Cf. *MESOM*.

**STEREOMONOSCOPE**, n. *Ste²r-e²-o-mo²n'o-skop*. From *στερεός*, solid, *μόνος*, alone, and *σκοπεῖν*, to examine. Fr., *stéréomonoscope*. Ger., *Stereomonoskop*. An instrument devised by Claudet, consisting of a stereoscope in which, by means of two lenses, two stereoscopic images are thrown upon the same spot of a ground-glass plate. When this glass plate is looked at with both eyes, each eye sees only the corresponding image. [F.]

**STEREOPHANTOSCOPE**, n. *Ste²r-e²-o-fa²nt'o-skop*. From *στερεός*, solid, *φαντός*, visible, and *σκοπεῖν*, to examine. Fr., *stéréophantoscope*. Ger., *Stereophantoskop*. A panorama-stereoscope in which, instead of pictures, rotating stroboscopic discs are inserted.

**STEREOPHOROSCOPE**, n. *Ste²r-e²-o-fo²r'o-skop*. From *στερεός*, solid, *φορός*, bearing, and *σκοπεῖν*, to examine. Fr., *stéréophoroscope*. Ger., *Stereophoroskop*. An instrument devised by Czermak and used in investigating the theories of visual perceptions with special reference to the effects produced on different zones of the retina. It consists of the ordinary lenticular stereoscope, in which both images are pasted by the side of each other on the same piece of paper. These strips of paper are fastened on the lateral surfaces of a many-sided prism rotating round a horizontal axis. Around the prism, several inches from the images, runs a girdle of pieces of pasteboard in which the necessary openings have been cut. Outside of the girdle is fastened the prismatic combination of a Brewster's stereoscope. [F.]

**STEREOSCOPE**, n. *Ste²r-e²-o-skop*. From *στερεός*, solid, and *σκοπεῖν*, to examine. Fr., *stéréoscope*. Ger., *Stereoskop*. An apparatus employed to produce the impression of projection in a picture, so that the observer, looking with both eyes, sees what appears to him the actual things represented instead of a picture on a flat surface.—**Brewster's prismatic s.** A s. consisting of two prisms with convex surfaces, having their refracting angles turned inward, one before each eye, through which the person being examined must look with parallel visual lines. In the median plane between the two prisms is placed a blackened screen, which reaches nearly to the points of fixation. The eyes are correctly accommodated by the convexity of the prismatic surface, and the images of the two objects of fixation are fused into one by the action of the prisms. [F.]—**Lenticular s.** A s. having, instead of convex prisms, ordinary convex lenses of about 200 mm. focus. In other respects it resembles Brewster's prismatic s. [F.]—**Wheatstone's mirror s.** A s. which consists of two plane mirrors joined together at right angles, in which are reflected the projected images corresponding to the right and left eye, which are placed at the limit of distinct vision in front of the mirrors at an angle of 45° to their reflecting surface. The two eyes then see the reflected images united at one point. [F.]

**STEREOSCOPE** (Fr.), n. *Sta-ra-o²-skop*. See *STEREOSCOPE*.—**S. à charnière**. Ger., *Spiegel-Stereoskop*. A stereoscope devised by Javal for the subjective determination of the squinting angle. Around a vertical hinge two mirrors may be rotated. Each of these mirrors is firmly fastened at its other end at an angle of 45° with a plate or tablet. Upon the inner surface of the latter are placed the objects of fixation, which are to be reflected by the mirrors. If an observer looks with one eye toward one mirror and the other toward the other, then by a proper arrangement of the angle of the hinge he can fuse the two reflected images. If this angle is 90° the eyes must stand parallel, if it is greater than 90° they must diverge, if it is smaller they must converge, in order to see binocularly. The position of the mirrors in which each eye is directed toward one of the images is thus found, and the included angle may be read off on a graduated arc. ["Ann. d'ocul." liv, p. 14, lxxv, p. 124 (F).]

**STEREOSPERMUM** (Lat.), n. n. *Ste²r-e²-o(o²)-spu²rm* (*spe²rm*/'u²m(u²m)). From *στερεός*, solid, and *σπέρμα*, a seed. Fr., *stéréosperme*. A genus of the *Bignoniaceæ*. [a, 35.] **S. chelonoides**. An East Indian species. The root is used in fevers and snake-bites, and the bark in menorrhagia. [a, 35.]—**S. suaveolens**. A tree of southern India. The roots are tonic. [a, 35.]

**STERESIS** (Lat.), n. f. *Ste²r-s(a)²si²s*. Gen., *-es²cos* (-is). Gr., *στέρσις* (from *στερεῖν*, to deprive). Ger., *Beräubung*. Deprivation; negation. [A, 311, 322 (a, 48).]

**STERETICUS** (Lat.), adj. *Ste²r-e²t(at)²ik-u²s(u²s)*. Gr., *στερητικός*. Ger., *beraubend*. Privative, negative. [A, 311, 322 (a, 48).]

**STERIGMA** (Lat.), n. n. *Ste²r(star)²ig²ma²*. Gen., *-ig²mata²* (*atis*). Gr., *στρίγμα* (from *στρίψω*, to set fast). Fr., *stérigmate*, *stérigme*. Ger., *Sterigne*, *Stützschlauch*. 1. A prolongation of a leaf-blade down on the stem by decurrence. 2. In *Fungi* and lichens, a slender filamentous process (stalk) giving origin to the spores or spermatia; in a narrow sense, as distinguished from arthrosterigma, such a process when not distinctly articulated and when producing spermatia from its apex only. [a, 35.]

**STERIGMATOCYSTIS** (Lat.), n. f. *Ste²r(star)²ig²ma²t(ma²t)-o(o²)-si²st(ku²st)²is*. Gen., *-cyst²ios* (-*cyst²is*). From *στρίγμα*, a support, and *κύστις*, a bladder. A genus of hyphomycetous *Fungi*. Many of the so-called species are stages of *Aspergillus*. [a, 35.]—**S. antacustica**. Of Cramer, a species found in the external auditory canal; according to some, a conical stage of *Eurotium aspergillus niger*. [a, 35.]

**STERILE**, adj. *Ste²r-i²l*. Gr., *στερίος*. Lat., *sterilis*. Fr., *stérile*. Ger., *unfruchtbar*. 1. Barren, unfruitful, unproductive. [a, 35.] See also *EFFETE*. 2. Freed from living micro-organisms.

**STERILITY**, n. *Ste²r-i²l-i²t-i²*. Gr., *στερίτης* (from *στερίος*, barren). Lat., *sterilitas*, *impotentia generandi*. Fr., *stérilité*. Ger., *Sterilität*, *Unfruchtbarkeit*. The condition of being sterile. [a, 35.]—**Facultative s.** Ger., *facultative Sterilität*. The prevention of conception. [C. Hasse, "Ctbl. f. d. ges. Therap.," June, 1886, p. 277.]—**Idiopathic s.** See *AZOOSPERMATISM*.—**Relative s.** S. in consequence of the fertilizing element being wanting or of the ovum not coming to maturity, there being no abnormal condition of the sexual organs. [a, 34.]

**STERILIZATION**, n. *Ste²r-i²l-i²z-a²shu²n*. Fr., *stérilisation*. Ger., *Sterilisierung*. The process of rendering sterile by the destruction of all living matter on or within a substance. [a, 34.]—**Hueppe's method of s.** The exposure of the substance to be sterilized to a temperature of from 52° to 65° C. for one or two hours so as to destroy the living bacteria. The process is repeated at periods of 24 and 48 hours, so as to destroy any germinated spores that may have resisted these temperatures. [a, 34.]

**STERILIZED**, adj. *Ste²r-i²l-iz²d*. Deprived of all living matter; rendered sterile. [a, 34.]

**STERILIZER**, n. *Ste²r-i²l-iz²u²r*. Ger., *Sterilisator*. An apparatus for effecting sterilization. Seibert's milk-s. consists of a circular tray having a central handle by which it may be carried and sufficient capacity for holding eight specially constructed bottles. It is placed in a covered kettle for steam sterilization. ["N. Y. Med. Jour.," Feb. 15, 1890, p. 172 (a, 34).]

**STERN** (Ger.), n. *Ste²rn*. See *ASTER* (2d def.).

**STERNAD**, adv. *Stu²rn'a²d*. Toward the sternal aspect.

**STERNAL**, adj. *Stu²rn'al*. Lat., *sternalis* (from *sternum* [q. v.]). 1. Pertaining to the sternum. [L.] 2. Of Barclay, see *VENTRAL*.

**STERNALGIA** (Lat.), n. f. *Stu²rn(ste²rn)-a²l(a²l)²ig²i²-a²*. From *στέρον*, the sternum, and *ἀλγος*, pain. Fr., *sternalgie*. Ger., *Brustbeinschmerz*. Pain in or about the sternum. [L, 41 (a, 14).]

**STERNALIS** (Lat.), adj. *Stu²rn(ste²rn)-al(a²l)²is*. See *STERNAL*; as a n. (Fr., *sternal*). (1) a muscle connected with the sternum, especially the s. *brutorum*; (2) see *TRIANGULARIS sterni*.—**S. brutorum**, **S. rectus**, **S. thoracicus**. An anomalous muscle on the anterior surface of the sternum connected with the sternocleido-mastoideus, pectoralis major, and rectus abdominis. [L, 332.]

**STERNANIS** (Ger.), n. *Ste²rn'a²n-es*. The genus *Illicium*; also the fruit (star-anise) of *Illicium anisatum*. [a, 35.]—**S'-samen**. See *STAR-ANISE*.

**STERNBERG** (Ger.), n. *Ste²rn/be²rg*. A place in Bohemia where there are alkaline and chalybeate springs. [L, 49, 57 (a, 14).]

**STERNBERGIA** (Lat.), n. f. *Ste²rn-be²rg-i²-a²*. From *Sternberg*, a German botanist. Fr., *sternbergie*. A genus of bulbous plants. The *Sternbergieæ* are a subtribe of the *Amariyllinæ*. [a, 35.]—**S. lutea**. Fr., *fauz safran*, *narcisse d'automne*. Winter-daffodil; a native of the Orient and southern Europe. The purgative root, *radix lilio-narcissi*, was formerly used as a maturant.

**STERNDISTEL** (Ger.), n. *Ste²rn'di²st-e²l*. See *CALCITRAPA*.

**STERNEBER**, n. *Stu²rn'e²b-u²r*. Lat., *sternebra* (see *STERNUM* and *VERTEBRA*). Fr., *sternèbre*. A subdivision or segment of the sternum. [L, 50 (a, 14).]

**STERNO-ABDOMINALIS** (Lat.), n. m. *Stu²rn(ste²rn)-o(o²)-a²b(a²b)-do²m(dom)-i²n-al(a²l)²is*. Of Rosenmüller, the triangularis sterni and transversus abdominis muscles considered as a single structure. [L, 31 (a, 50).]

**STERNO-APONEUROTICUS** (Lat.), n. m. *Stu²rn(ste²rn)-o(o²)-a²p(o²)-o²ne²u²r-o²ti²(ot)²ik-u²s(u²s)*. From *στέρον*, the sternum, and *ἀπνευρωσις*, a tendon. The portion of the pectoralis superficialis that is attached to the fascia of the arm. [L, 13.]

**STERNOCERVICALIS** (Lat.), n. m. *Stu²rn(ste²rn)-o(o²)-su²r(h²r)-vi²k(wik)-al(a²l)²is*. From *sternum* (q. v.), and *cervix*, the neck. An anomalous variety of the costo-fascialis muscle arising from the sternum. [L, 31.]

**STERNO-CLAVICULAR**, adj. *Stu²rn-o-kla²v-i²k(u²l)-a²r²*. Lat., *sternoclavicularis*. Pertaining to the sternum and the clavicle.

**STERNOCLAVICULARIS** (Lat.), adj. *Stu²rn(ste²rn)-o(o²)-kla²(kla²)-vi²k(wi²k)-u²l-la²(la²)²ri²s*. See *STERNO-CLAVICULAR*; as a n. m., an anomalous muscle arising from the sternum or from the cartilage of the first rib and inserted into the clavicle, internally to the subclavius.—**S. anticus**. See *S. -S. posticus*. An anomalous muscle arising from the posterior surface of the manubrium sterni and inserted into the clavicle. [L, 332.]—**S. superior**. An anomalous muscle arising from the upper part of the sternum and inserted into the clavicle. [L, 31, 332.]

**STERNO-CLAVIO-HUMERAL** (Fr.), n. *Ste²r-no-kla²-ve-o-u²-ma-ra²l*. See *PECTORALIS major*.

**STERNO-CLAVIO-MASTOÏDIEN** (Fr.), n. *Ste²r-no-kla²-ve-o-ma²st-o-e-de-a²n*. See *STERNO-CLEIDO-MASTOID*.

**STERNOCLEIDOBRACHIALIS** (Lat.), n. m. *Stu²rn(ste²rn)-o(o²)-klid²(kle²)²-i²d-i²-o(o²)-brak(bra²ch²)-i²-al(a²l)²is*. From *στέρον*, the sternum, *κλειδίον*, the clavicle, and *βραχίον*, the arm. See *PECTORALIS major*.

**STERNO-CLEIDO-HUMERAL**, adj. *Stu²rn''o-klid²'o-hu²m(u²r)-l*. For deriv., see *STERNUM*, *CLEIDION*, and *HUMERUS*. Pertaining to the sternum, clavicle, and humerus. [L.]

**STERNOCLEIDOHYOIDEUS** (Lat.), n. m. *Stu²rn(ste²rn)-o(o²)-o(o²)-klid²''(kle²)²-i²d-i²-o(o²)-hi²hu²-o(o²)-i²d(e)²-u²s(u²s)*. For deriv., see *STERNUM*, *CLEIDION*, and *HYOID*. See *STERNOHYOIDEUS*.

**STERNO-CLEIDO-MASTOID**, n. *Stu<sup>6</sup>rn''o-klid''o-ma<sup>2</sup>st'-oid*. For deriv., see STERNUM, CLEIDION, and MASTOID. Lat., *sterno-cleidomastoideus*. Fr., *sterno-cleido-mastoidien*. Ger., *Kopfnackemuskel*, *Kopfnackermuskel*, *Brustschlüsselbeinzitzenfortsatzmuskel*. A muscle arising from the anterior surface of the manubrium and the upper side of the inner third of the clavicle, and inserted into the external surface of the mastoid process of the temporal bone and the superior curved line on the occipital bone. The two s.-c.-m's acting together bend the head forward or elevate the upper portion of the thorax. When one of them acts separately, it flexes and rotates the head. This has been described by some anatomists as two muscles, viz., the sternomastoideus and cleidomastoideus. [L.]

**STERNOCOSTALIS** [Cotes] (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-al(a<sup>3</sup>l)/i<sup>2</sup>s*. From *sternum* (q. v.), and *costa*, a rib. Fr., *sterno-costal*. See TRIANGULARIS sterni.

**STERNO-COSTO-CLAVI-HUMERAL** (Fr.), n. *Ste<sup>2</sup>r-nos-to-kla-ve-u<sup>6</sup>-ma-ra<sup>3</sup>l*. See PECTORALIS major.

**STERNOCOSTOCORACOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-ko<sup>2</sup>st-a<sup>2</sup>k(a<sup>3</sup>k)-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. For deriv., see STERNUM, COSTA, and CORACOID. See PECTORALIS minimus.

**STERNOCOSTOEPIPTROCHLEARIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-e<sup>2</sup>p-i<sup>2</sup>-tro<sup>2</sup>ch(tro<sup>2</sup>ch<sup>2</sup>)-le<sup>2</sup>-ar(a<sup>3</sup>r)/i<sup>2</sup>s*. For deriv., see STERNUM, COSTO, and EPIPTROCHLEA. The chondroepitrochlearis when it is inserted into the condyle of the humerus. [L, 332.]

**STERNOCOSTOFASCIALIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-fa<sup>2</sup>s(fa<sup>2</sup>s)-si<sup>2</sup>(ki<sup>2</sup>)-al(a<sup>3</sup>l)/i<sup>2</sup>s*. From *sternum*, the sternum, *costa*, a rib, and *fascia*, a band. See STERNOCERVICALIS.

**STERNOCOSTOGLOSSUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-glo<sup>2</sup>s(glos)/su<sup>3</sup>s(su<sup>4</sup>s)*. From *sternum* (q. v.), *costa*, a rib, and *γλῶσσα*, the tongue. See STERNOGLOSSUS.

**STERNOCOSTOHYOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-hi(hu<sup>6</sup>)-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. For deriv., see STERNUM, COSTO, and HYOID. See STERNOHYOIDEUS.

**STERNOCOSTOTHYREOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ko<sup>2</sup>st-o-(o<sup>3</sup>)-thir(thu<sup>6</sup>r)-e<sup>2</sup>-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. For deriv., see STERNUM, COSTA, and THYROID. See STERNOTHYREOIDEUS.

**STERNODIDYMUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-di<sup>2</sup>d/i<sup>2</sup>m-(u<sup>6</sup>m)-u<sup>3</sup>s(u<sup>4</sup>s)*. From *στέρνον*, the sternum, and *δίδυμος*, double. See STERNOPAGUS.

**STERNO-DORSAL**, adj. *Stu<sup>6</sup>rn-o-do<sup>2</sup>r's'l*. From *στέρνον*, the chest, and *dorsum*, the back. Fr., *s.-d.* Pertaining to or extending between the sternum and the back. [L.]

**STERNODYNIA** (Lat.), n. f. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-di<sup>2</sup>n(du<sup>6</sup>n)/i<sup>2</sup>s*. a<sup>3</sup>. From *στέρνον*, the chest, and *δύνη*, pain. Fr., *sternodynie*. See STERNALGIA and ANGINA PECTORIS.

**STERNOFASCIALIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-fa<sup>2</sup>s(fa<sup>2</sup>s)-si<sup>2</sup>(ki<sup>2</sup>)-al(a<sup>3</sup>l)/i<sup>2</sup>s*. For deriv., see STERNUM and FASCIA. See STERNOCERVICALIS.

**STERNOGLOSSUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-glo<sup>2</sup>s(glos)/su<sup>3</sup>s(su<sup>4</sup>s)*. From *στέρνον*, the sternum, and *γλῶσσα*, the tongue. A muscle attached to the sternum and tongue, found in animals with retractile tongues, and occasionally in man. [L.]

**STERNOHUMERALIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-hu<sup>2</sup>m(hu<sup>6</sup>m)-e<sup>2</sup>r-al(a<sup>3</sup>l)/i<sup>2</sup>s*. For deriv., see STERNUM and HUMERUS. Fr., *sterno-huméral*. 1. In solipedes, the portion of the pectoralis superficialis that is attached to the anterior ridge of the humerus. [L, 13.] 2. Of Chaussier, see PECTORALIS major.—**S. magnus**. See STERNOTROCHINEUS.

**STERNOHYOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-hi(hu<sup>6</sup>)-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. For deriv., see STERNUM and HYOID. Fr., *sterno-hyoïdien*. Ger., *Brustbeizungenbeinmuskel*. A muscle which arises from the sternal extremity of the clavicle, from the posterior sterno-clavicular ligament, and from the posterior surface of the sternum and is inserted into the lower margin of the body of the hyoid bone. [L, 31, 142, 332.]

**STERNO-MASTOID**, adj. *Stu<sup>6</sup>rn-o-ma<sup>2</sup>st'-oid*. Pertaining to the sternum and to the mastoid process of the temporal bone. Cf. STERNO-CLEIDO-MASTOID.

**STERNOMASTOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ma<sup>2</sup>st(ma<sup>2</sup>st)-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. Fr., *sterno-mastoidien*. 1. See STERNO-CLEIDO-MASTOID. 2. That portion of the sterno-cleido-mastoid which arises from the sternum (cf. CLEIDOMASTOIDEUS). [L.]

**STERNOMAXILLARIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ma<sup>2</sup>x(ma<sup>2</sup>x)-i<sup>2</sup>l-lar(la<sup>3</sup>r)/i<sup>2</sup>s*. For deriv., see STERNUM and MAXILLA. 1. An anomalous offshoot of the sterno-cleido-mastoid inserted into the inferior maxilla. 2. The analogue of the sternomastoid in quadrupeds. [L, 13.]

**STERNOMPHALODYMIA** (Lat.), n. f. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o<sup>3</sup>m''-al(a<sup>3</sup>l)-o-(o<sup>3</sup>)-di<sup>2</sup>m(du<sup>6</sup>m)/i<sup>2</sup>s-a<sup>3</sup>*. From *στέρνον*, the sternum, *μφαλός*, the navel, and *δίδυμος*, twin. See STERNOPAGUS.

**STERNON** (Lat.), n. n. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o'n*. See STERNUM.

**STERNO-OMOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-om-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. From *στέρνον*, the sternum, *ῶμος*, the shoulder, and *εἶδος*, resemblance. See STERNOCLAVICULARIS superior.

**STERNOPAGIA** (Lat.), n. f. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-pa<sup>2</sup>(pa<sup>3</sup>g)/i<sup>2</sup>s-a<sup>3</sup>*. Fr., *sternopagie*. The condition of a sternopagus. [a, 14.]

**STERNOPAGUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o<sup>3</sup>p-a<sup>2</sup>g(a<sup>3</sup>g)-u<sup>3</sup>s(u<sup>4</sup>s)*. From *στέρνον*, the chest, and *πᾶγναι*, to make fast. Fr., *sternopage*. Of I. Geoffroy St.-Hilaire, a monster composed of two individuals having a common umbilicus and united face to face for the entire length of the thorax. [a, 34.] Cf. XIPHOPAGUS.

**STERNOPETROSPHARYNGEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-pe<sup>2</sup>t-ro<sup>2</sup>s''-o-(o<sup>3</sup>)-fa<sup>2</sup>r(fa<sup>3</sup>r)-i<sup>2</sup>n(u<sup>6</sup>n)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>3</sup>s(u<sup>4</sup>s)*.

For deriv., see STERNUM, PETROUS, and PHARYNX. An anomalous muscle arising from the anterior surface of the manubrium, internally to the right sterno-cleido-mastoid, by a tendon  $\frac{1}{2}$  inch wide, and attached by three heads, the first being inserted into the vaginal process of the temporal bone, while the second is blended with the pharyngeal aponeurosis and the third with the lower fibres of the constrictor pharyngis superior. [Rennie, "Jour. of Anat. and Phys.," Jan., 1886 (L).]

**STERNOPRÆSCAPULARIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-præ(pra<sup>3</sup>-e<sup>2</sup>)-ska<sup>2</sup>p(ska<sup>3</sup>p)-u<sup>2</sup>l(u<sup>4</sup>l)-a(a<sup>3</sup>)/ri<sup>2</sup>s*. From *sternum* (q. v.), *præ*, before, and *scapula* (q. v.). The anterior portion of the pectoralis profundus. [L, 13.]

**STERNOPUBIALIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-pu<sup>2</sup>b-(pub)-i<sup>2</sup>-al(a<sup>3</sup>l)/i<sup>2</sup>s*. For deriv., see STERNUM and PUBES. Fr., *sternopubien*. 1. Of Chaussier, see RECTUS abdominis. 2. The analogue of the rectus abdominis of man found in the lower mammals. [L.]

**STERNORADIALIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-rad-(ra<sup>3</sup>d)-i<sup>2</sup>-al(a<sup>3</sup>l)/i<sup>2</sup>s*. For deriv., see STERNUM and RADIUS. See STERNO-APONEUROTICUS.

**STERNOSCAPULARIS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-ske<sup>2</sup>p(ska<sup>3</sup>p)-u<sup>2</sup>l(u<sup>4</sup>l)-a(a<sup>3</sup>)/ri<sup>2</sup>s*. For deriv., see STERNUM and SCAPULA. 1. An anomalous portion of the subclavius muscle inserted into the upper border of the scapula. 2. An anomalous muscle arising from the first rib and inserted into the coracoid process near the scapular notch. [L, 332.]

**STERNOTHYREOHYOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-thir(thu<sup>6</sup>r)-e(a<sup>3</sup>)/o<sup>3</sup>(o<sup>3</sup>)-hi(hu<sup>6</sup>)-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. For deriv., see STERNUM, THYROID, and HYOID. Of Percival, the sternohyoideus and the sternothyroideus. [L, 13.]

**STERNOTHYREOIDEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-thir(thu<sup>6</sup>r)-e<sup>2</sup>-o-(o<sup>3</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s)*. From *στέρνον*, the sternum, and *θυρεοειδής*, shield-shaped. Fr., *sterno-thyroïdien*. Ger., *Brustschilddrüse*, *Kehlkopfniederzieher*. A muscle which arises from the posterior surface of the manubrium sterni and the first or second, or both, costal cartilages, and inserted into an oblique line of the ala of the thyreoid cartilage. [L, 31, 142, 332.]

**STERNOTROCHINEUS** (Lat.), n. m. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-tro<sup>2</sup>ch(tro<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>n(e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s))*. For deriv., see STERNUM and TROCHINEUS. The inferior portion of the pectoralis profundus in solipeds.

**STERNOTRYPESIS** (Lat.), n. f. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-o-(o<sup>3</sup>)-tri<sup>2</sup>p-(tru<sup>6</sup>p)-e(a<sup>3</sup>)/si<sup>2</sup>s*. Gen., *-es'eos* (-is). From *στέρνον*, the sternum, and *τρυπίσις*, a boring. Fr., *sternotrypèse*. Perforation of the sternum. [L, 50 (a, 14).]

**STERNO-XIPHOID**, adj. *Stu<sup>6</sup>rn-o-xi<sup>2</sup>f'oid*. For deriv., see STERNUM and XIPHOID. Pertaining to the sternum and the ensiform cartilage. [a, 48.]

**STERNUM** (Lat.), n. n. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-u<sup>3</sup>m(u<sup>6</sup>m)*. Gr., *στέρνον*. Fr., s. Ger., s. *Brustbein*. The breast bone; a long, flat bone with which the true ribs and the clavicles articulate in front. From its general resemblance to a sword, its broad upper part has been called the manubrium, or præsternum; and the middle part, the gladiolus, mucro, or mesosternum. [A, 70.]—**Abdominal** s. See LINEA alba (1st def.).—**S. fissum**. See FISSURE of the thorax.

**STERNUTAMENTUM** (Lat.), n. n. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-u<sup>2</sup>t(ut)-a<sup>2</sup>-me<sup>2</sup>nt(u<sup>6</sup>m)*. From *sternutare*, to sneeze. See SNEEZING and STERNUTATORY.

**STERNUTATIO** (Lat.), n. f. *Stu<sup>6</sup>rn(ste<sup>2</sup>rn)-u<sup>2</sup>t(ut)-a(a<sup>3</sup>)/shi<sup>2</sup>-ti<sup>2</sup>-o*. Gen., *-on'is*. See SNEEZING.—**S. convulsiva**. Paroxysmal or spasmodic sneezing. The act of sneezing may be repeated many times before the paroxysm ends, and is accompanied by a profuse watery secretion from the nose. [D, 35.]

**STERNUTATORY**, adj. *Stu<sup>6</sup>rn-u<sup>2</sup>t'a<sup>2</sup>t-o-ri<sup>2</sup>*. From *sternutare*, to sneeze. Fr., *sternutatoire*. Pertaining to or promoting sneezing; errhine; as a n. (Lat., *sternutatorium*; Fr., *sternutatoire*; Ger., *Niesemittel*), a substance that causes or promotes sneezing. [a, 48.]

**STEROCARBOIC ACID**, n. *Ste<sup>6</sup>r-o-ca<sup>2</sup>r-ob'i<sup>2</sup>k*. A pale-brown acid found in caroba. ["Sentido Católico"; "Med. Rec.," Aug. 5, 1882, p. 163.]

**STERTOR** (Lat.), n. m. *Stu<sup>6</sup>rt(ste<sup>2</sup>rt)/o<sup>3</sup>r*. Gen., *stertor'is*. From *stertere*, to snore. Fr., *sterteur*, *ronflement*. Ger., *Schnarchen*. See SNORING.

**STERTOROUS**, adj. *Stu<sup>6</sup>rt'o<sup>3</sup>r-u<sup>3</sup>s*. Fr., *stertoreux*. Ger., *röchelnd*, *schnarchend*. Snoring; characterized by stertor. [D.]

**STETHAL**, n. *Ste<sup>6</sup>th'l*. An alcohol, C<sub>18</sub>H<sub>38</sub>O = C<sub>18</sub>H<sub>37</sub>.(OH), not yet obtained in a pure state, but occurring combined with fatty acids in spermaceti. [B, 3.]

**STETHARTERITIS** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-a<sup>2</sup>r-e<sup>2</sup>r(ar)-i(e)'/ti<sup>2</sup>s*. Gen., *-it'idis* (-idis). From *στήθος*, the chest, and *ἀρτηρία*, an artery. Fr., *stétharthritis*. Inflammation of the arteries of the chest. [L, 50 (a, 14).]

**STETHOCATHARSIS** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-o-(o<sup>3</sup>)-ka<sup>2</sup>th-(ka<sup>3</sup>th)-a<sup>2</sup>rs'i<sup>2</sup>s*. Gen., *-ars'eos* (-is). From *στήθος*, the chest, and *κάθαρσις*, a cleansing. Fr., *stéthocatharsie*. Expectoration.

**STETHOCELE** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-o-(o<sup>3</sup>)-se(ka)/le(la)*; in Eng., *steth'o-sel*. Gen., *-cel'es*. From *στήθος*, the chest, and *κύημα*, a tumor. Fr., *stéthocèle*. See PNEUMONOCELE.

**STETHOCELODYSPNÆA** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-o-(o<sup>3</sup>)-sel(kal)-o-(o<sup>3</sup>)-di<sup>2</sup>s(du<sup>6</sup>s)-pne'(pno<sup>3</sup>e<sup>2</sup>)-a<sup>2</sup>s*. From *στήθος*, the chest, *κύημα*, a tumor, and *δυσπνοία*, dyspnoea. Fr., *stéthocélo-dyspnée*. Dyspnoea due to hernia of the lung. [L, 50 (a, 14).]

**STETHOCHYSIS** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-o<sup>2</sup>k(o<sup>2</sup>ch<sup>2</sup>)/i<sup>2</sup>(u<sup>6</sup>)-si<sup>2</sup>s*. Gen., *-chys'eos* (-och'yis). From *στήθος*, the chest, and *χύσις*, an effusion. Fr., *stéthochysie*. See HYDROTHORAX.

**STETHODESMIS** (Lat.), **STETHODESMIUM** (Lat.), n's f. and n. *Ste<sup>2</sup>th(stath)-o-(o<sup>3</sup>)-de<sup>2</sup>s(mi<sup>2</sup>s, mi<sup>2</sup>-u<sup>3</sup>m(u<sup>6</sup>m))*. From *στήθος*,

the chest, and *δεσμός*, a bond. Fr., *stéthodesmie*. See *Chest-BAND-AGE* and *CORSET* (2d def.).

**STETHOGONIOMETER**, n. *Ste<sup>2</sup>th-o-gon-i<sup>2</sup>-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r*. From *στήθος*, the chest, *γωνία*, an angle, and *μέτρον*, a measure. An instrument for measuring the curvature of the chest. [D, 25.]

**STETHOGRAPH**, n. *Ste<sup>2</sup>th'o-gra<sup>2</sup>f*. From *στήθος*, the chest, and *γράφειν*, to write. See *STETHOMETER*.

**STETHOMENIA** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-o(o<sup>2</sup>)-men(man)/i<sup>2</sup>-a<sup>2</sup>*. From *στήθος*, the chest, and *μήν*, a month. Fr., *stéthoménié*. Vicarious menstruation by way of the bronchial tubes.

**STETHOMETER**, n. *Ste<sup>2</sup>th-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r*. From *στήθος*, the chest, and *μέτρον*, a measure. Fr., *stéthomètre*. Ger., *S. Brustmesser*. Of Quain, an instrument for measuring the variations in size of the thorax. As modified by J. B. Sanderson, for registering the respiratory movements of the chest, it consists of two parallel rigid bars joined at right angles to a cross-piece. The free end of one bar bears an ivory button and that of the other a receiving tambour, the latter being connected with a registering tambour. The instrument is somewhat similar to Bert's tambour mounted on calipers and is used much in the same way. [J, 5, 6, 19.]

**STETHOMETRY**, n. *Ste<sup>2</sup>th-o<sup>2</sup>m'e<sup>2</sup>t-ri<sup>2</sup>*. Ger., *Brustmessung*. The process of using the stethometer. [D.]

**STETHOMYITIS** (Lat.), n. f. *Steth(stath)-o(o<sup>2</sup>)-mí(mu<sup>2</sup>)-í(e<sup>2</sup>)-tí<sup>2</sup>s*. Gen., *-ítidos (-idis)*. From *στήθος*, the chest, and *μύς*, a muscle. Fr., *stéthomyiite*. Inflammation of the pectoral muscles.

**STETHOPHONOMETER**, n. *Ste<sup>2</sup>th-o-fon-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r*. From *στήθος*, the chest, *φωνή*, a sound, and *μέτρον*, a measure. A straight stethoscope having a sliding graduated tube to measure the intensity of an auscultatory sound. ["Wien. klin. Woch.," Nov. 3, 1892, p. 629 (a, 34).]

**STETHOPOLYSCOPIUM** (Lat.), n. n. *Ste<sup>2</sup>th(stath)'o(o<sup>2</sup>)-po<sup>2</sup>l-i<sup>2</sup>(u<sup>2</sup>)-sko<sup>2</sup>p(sko<sup>2</sup>p)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m)*. From *στήθος*, the chest, *πολύς*, many, and *σκοπεῖν*, to examine. Fr., *stéthopolyscopie*. Ger., *Stethopolyskop*. A stethoscope furnished with conducting tubes, so as to be used by several persons simultaneously. [L, 50 (a, 14).]

**STETHORRHEUMA** (Lat.), n. n. *Ste<sup>2</sup>th(stath)-o<sup>2</sup>r-ru<sup>2</sup>m'a<sup>2</sup>*. Gen., *-rheum'atos (-atis)*. From *στήθος*, the chest, and *ῥεύμα*, a flux. Fr., *stéthorrhume*. Pectoral rheumatism. [L, 50 (a, 14).]

**STETHOSCOPE**, n. *Ste<sup>2</sup>th'o-skop*. From *στήθος*, the chest, and *σκοπεῖν*, to examine. Fr., *stéthoscope*. Ger., *Stethoskop*, *Brusthorcher*. An instrument for conveying to the ear the sounds pro-

A BINAURAL STETHOSCOPE.

duced within the body for diagnostic purposes; consisting of a tube with one end flaring for application to the chest-wall and the other end shaped for insertion into the ear. [B; a, 34.]—**Binaural s.** A s. adapted for adjustment to both ears. [D.]—**Differentials.** A binaural s. with two cones in connection with the ear-tubes, capable of being applied to different parts of the body simultaneously, and thus enabling the observer to compare the sounds at two different points. [D, 1.]—**Double s.** See *Binaural s.*—**Pulse s.** See *SPHYGMOPHONE*.

**STETHOSCOPY**, n. *Ste<sup>2</sup>th-o<sup>2</sup>sk'op-i<sup>2</sup>*. Fr., *stéthoscopie*. Ger., *Stethoskopie*. Examination by means of the stethoscope. [a, 48.]—**Vaginal s.** Auscultation of the gravid uterus by means of a stethoscope introduced into the vagina. [J. Wallace, "Edinb. Med. Jour.," xviii, p. 427 (a, 34).]

**STETHOSPASMUS** (Lat.), n. m. *Ste<sup>2</sup>th(stath)-o(o<sup>2</sup>)-spa<sup>2</sup>z-(spa<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s)*. From *στήθος*, the chest, and *σπασμός*, a spasm. Fr., *stéthospasme*. Pectoral spasm. [L, 50 (a, 14).]

**STETHOTHLASTES** (Lat.), n. m. *Ste<sup>2</sup>th(stath)-o(o<sup>2</sup>)-thla<sup>2</sup>st-(thla<sup>2</sup>st)/ezias*. From *στήθος*, the chest, and *θλάω*, to crush. Ger., *Brustzermalmer*. An instrument for crushing the thorax in embryulcia.

**STETHURIA** (Lat.), n. f. *Ste<sup>2</sup>th(stath)-u<sup>2</sup>(u<sup>2</sup>)/ri<sup>2</sup>-a<sup>2</sup>*. From *στήθος*, the chest, and *ούρον*, urine. Fr., *stéthurie*. Metastasis of urine to the chest. [L, 50 (a, 14).]

**STETHYLIC ALCOHOL**, n. *Ste<sup>2</sup>th-i<sup>2</sup>l'i<sup>2</sup>k*. See *STETHAL*.

**STETIG** (Ger.), adj. *Stat/i<sup>2</sup>g*. See *CONTIGUOUS*.

**STEUERFEDER** (Ger.), n. *Stoi'e<sup>2</sup>r-fad-e<sup>2</sup>r*. See *RECTRIX*.

**STEVIA** (Lat.), n. f. *Sta<sup>2</sup>vi<sup>2</sup>-a<sup>2</sup>*. From *Estève*, a Spanish botanist. Fr., *stévie*. A genus of the *Eupatoriaceæ*. The *Stevia* of Reichenbach are a section of the *Ageratæ*. [a, 35.]—**S. febrifuga**. A North American species used as a tonic, stomachic, and febrifuge. [B, 173 (a, 35).]

**STHENIA** (Lat.), n. f. *Sthen(sthe<sup>2</sup>n)-í(e<sup>2</sup>)/a<sup>2</sup>*. From *σθένος*, strength. Fr., *sthénie*. Ger., *Kraftthätigkeit*. 1. Strength, vigor. 2. In the Brunonian nosology, see under *ASTHENIA* (2d def.).

**STHENIC**, adj. *Sthe<sup>2</sup>n'i<sup>2</sup>k*. Fr., *sthénique*. Ger., *sthenisch*. Strong, forcible. [D.] See under *ASTHENIA* (3d def.) and cf. *ASTHENIC*.

**STHENOPYRA** (Lat.), n. f. *Sthe<sup>2</sup>n-o<sup>2</sup>p'i<sup>2</sup>r(u<sup>2</sup>r)-a<sup>2</sup>*. From *σθένος*, strength, and *πύρ*, fever. See *FEBRIS sthenica*.

**STIBAMINE**, n. *Sti<sup>2</sup>b'a<sup>2</sup>m-en*. See *HYDROGEN antimonide*.

**STIBDIAMYL**, n. *Sti<sup>2</sup>b-di<sup>2</sup>a<sup>2</sup>m/i<sup>2</sup>l*. A radicle, *SbC<sub>5</sub>H<sub>11</sub>*.

**STIBETHYL**, n. *Sti<sup>2</sup>b-e<sup>2</sup>th'i<sup>2</sup>l*. Fr., *stibéthyle*. Ger., *Stibäthyl*. See *TRIETHYSTIBINE*.

**STIBI** (Lat.), n. n. *Stib(sti<sup>2</sup>b)/i<sup>2</sup>*. Gen., *stib'is*. Gr., *στίβι*. See *ANTIMONY*.

**STIBIACNE** (Lat.), n. f. *Sti<sup>2</sup>b-i<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)/ne(na)*. Gen., *-ac'nes*. From *στίβι*, antimony, and *ἀκνή*, acne. Acne produced by the use of antimony. [L, 50 (a, 14).]

**STIBIALIS** (Lat.), adj. *Sti<sup>2</sup>b-i<sup>2</sup>-al(a<sup>2</sup>)/i<sup>2</sup>s*. Of, pertaining to, or containing antimony. [B.]

**STIBIALISM**, n. *Sti<sup>2</sup>b/i<sup>2</sup>a<sup>2</sup>l-i<sup>2</sup>zm*. From *στίβι*, antimony. Systemic poisoning by antimony. [a, 34.]

**STIBIAS** (Lat.), n. m. *Sti<sup>2</sup>b-i<sup>2</sup>-a<sup>2</sup>s(a<sup>2</sup>s)*. Gen., *-at'is*. See *ANTIMONATE*.—**S. kalicus**. See *POTASSIUM antimonate*.—**S. natrius**. Sodium antimonate. [B.]

**STIBIATION**, n. *Sti<sup>2</sup>b-i<sup>2</sup>-a<sup>2</sup>/shu<sup>2</sup>n*. From *στίβι*, antimony. Fr., *s*. The excessive use of antimonials. [L, 41, 49 (a, 14).]

**STIBIATUS** (Lat.), adj. *Sti<sup>2</sup>b-i<sup>2</sup>-at(a<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s)*. Fr., *stibié*. Containing antimony, antimonial. [B.]

**STIBICUS** (Lat.), adj. *Sti<sup>2</sup>b/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s)*. See *ANTIMONIC*.

**STIBIÉ** (Fr.), adj. *Steb-e<sup>2</sup>a*. See *STIBIATUS*.

**STIBIIS** (Lat.), n. m. *Sti<sup>2</sup>b/i<sup>2</sup>-i<sup>2</sup>s*. See *ANTIMONITE*.

**STIBINE**, n. *Sti<sup>2</sup>b'en*. Ger., *Stibin*. See *HYDROGEN antimonide* and *ANTIMONY trisulphide*.

**STIBIOKALI TARTARICUM** (Lat.), n. n. *Sti<sup>2</sup>b-i<sup>2</sup>-o<sup>2</sup>k'al(a<sup>2</sup>l)/i<sup>2</sup>e* *ta<sup>2</sup>r-ta<sup>2</sup>(a<sup>2</sup>)/ri<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m)*. See *ANTIMONY and potassium tartrate*.—**Emplastrum stibioali tartarici**. See *Emplastrum TARTARI stibiat*.—**Unguentum stibioali tartarici**. See *Unguentum ANTIMONII*.—**Vinum stibioali tartarici**. See *Vinum ANTIMONII*.

**STIBIOSO-STIBICUS** (Lat.), adj. *Sti<sup>2</sup>b-i<sup>2</sup>-os'o(o<sup>2</sup>)-sti<sup>2</sup>b/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s)*. See *ANTIMONIO-ANTIMONIC*.

**STIBIOSUS** (Lat.), adj. *Sti<sup>2</sup>b-i<sup>2</sup>-os'u<sup>2</sup>s(u<sup>2</sup>s)*. Antimonious. [B.]

**STIBIUM** (Lat.), n. n. *Sti<sup>2</sup>b/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m)*. Gr., *στίβι*. Antimony; of the Gr. Ph., crude antimony. [B, 95 (a, 38).]—**Calx stibii grisea** (seu imperfecta), **Cinis stibii**. See *ANTIMONY ash*.—**Flos stibii helmuntianus**. See *Flores ANTIMONII Helmuntii*.—**Hydrosulphuretum oxydi stibii fuscum** (seu oxydi stibii rubrum, seu oxyduli stibii). Kermes mineral. [B, 119.]—**Liquor stibii chlorati**. See under *Liquor ANTIMONII chloridi*.—**Morsuli stibii**. See *TROCHISCI stibiat*.—**Murias oxyduli stibii**, **Murias stibii** (oxygenatus). Antimony chloride (trichloride). **STICH** (Ger.), n. *Sti<sup>2</sup>ch<sup>2</sup>*. A puncture or stab; a darting pain; a sting or bite. [a, 17.]—**Impf<sup>2</sup>**. A puncture or incision for vaccination. [a, 14.]—**Sonnens'**. See *INSOLATION* (2d def.).—**S'kanal**. The tract of a puncture (e. g., one made by the passage of a suture).

**STICHELN** (Ger.), n. *Stech*<sup>2</sup>/*e*ln. See SCARIFICATION.

**STICHIDUM** (Lat.), n. *Sti*<sup>2</sup>k(sti<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>d/i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Gr., *στικίδιον* (dim. of *στικός*, a row). Ger., *Reihenfrucht*. In certain *Algae* (*Rhodophyceae*), a special branch of the thallus containing spores (tetragonidia) arranged in rows. [a, 35.]

**STICKDAMPF** (Ger.), n. *Sti*<sup>2</sup>k/da<sup>3</sup>mpf. See NITROGEN and CHOKE-DAMP.

**STICKEND** (Ger.), adj. *Sti*<sup>2</sup>k/e<sup>2</sup>nd. Choking, suffocating.

**STICKFLUSS** (Ger.), n. *Sti*<sup>2</sup>k/flus. See SUFFOCATIVE CATARRH and NARCOTHOPEA.

**STICKGAS** (Ger.), n. *Sti*<sup>2</sup>k/ga<sup>3</sup>s. Nitrogen. [B.]

**STICKHUSTEN** (Ger.), n. *Sti*<sup>2</sup>k/hust-e<sup>2</sup>n. A convulsive cough, especially whooping-cough.

**STICKLUFT** (Ger.), n. *Sti*<sup>2</sup>k/luft. See MEPHITIS (1st def.) and NITROGEN.

**STICKOXID** (Ger.), n. *Sti*<sup>2</sup>k/ox-u<sup>4</sup>d. See NITROGEN dioxide.

**STICKOXYDUL** (Ger.), n. *Sti*<sup>2</sup>k/ox-u<sup>4</sup>d-ul. See NITROGEN monoxide.

**STICKSTOFF** (Ger.), n. *Sti*<sup>2</sup>k/sto<sup>3</sup>f. See NITROGEN.—*S'haltig*. See NITROGENOUS.—*S'jodir*. See NITROGEN iodide.—*S'oxyd*. See NITROGEN dioxide.—*S'oxydul*, *S'oxydulgas*. See NITROGEN monoxide.—*S'säure*. See NITRIC ACID.

**STICKSUCHT** (Ger.), n. *Sti*<sup>2</sup>k/zuch<sup>2</sup>t. See ATELECTASIS pulmonum.

**STICKWURZ** (Ger.), n. *Sti*<sup>2</sup>k/vurts. See BRYONIA.

**STICTA** (Lat.), n. f. *Sti*<sup>2</sup>kt/a<sup>3</sup>. From *στικός*, punctured. Fr., *s.*, *sticte*. Ger., *Grubenflechte*. A genus of lichens, of the *Stictici* (a tribe of the *Phylloidei*). [a, 35.]—*S. aurata*. A species found on cinchona barks, especially loxa-bark. [a, 35.]—*S. pulmonacea*, *S. pulmonaria*. Fr., *pulmonaire de chêne, hépatique des bois, herbe aux poumons, thé des forêts (ou des Vosges), sticte pulmonacée*. Ger., *Lungengrubenflechte, Lungenflechte, Lungenmoos, Baumlungenkraut, Eichenlungenmoos*. Sp., *pulmonaria* [Mex. Ph.]. Hazel-rag (or -crotches), lung lichen, tree lungwort; a species formerly official as *lichen pulmonarius* (seu *arbores*), *muscus arbores pulmonarius*, *muscus pulmonarius quercinus*, etc. It contains a mucilaginous, astringent principle, and is still sometimes used as a pectoral. [a, 35.]

**STICTACNE** (Lat.), n. f. *Sti*<sup>2</sup>kt-a<sup>2</sup>k(a<sup>3</sup>k'/ne(na). Gen., -ac'nes. From *στικός*, punctured, and *ἀκνη*, acne. See ACNE punctata.

**STICTIC ACID**, n. *Sti*<sup>2</sup>kt/i<sup>2</sup>k. Fr., *acide stictique*. Ger., *Stictinsäure*. A bitter substance, analogous to cetraric acid, obtained from *Sticta pulmonacea*. [B, 38, 93, 108 (a, 14).]

**STIEFEL** (Ger.), n. *Stef*<sup>2</sup>e<sup>2</sup>l. A boot; of Günther, the hippocampus minor. [I, 3 (K).]—*Schröpf's*. Junod's boot. See BOOT.

**STIEL** (Ger.), n. *Stel*. 1. A pedicle; in botany, a stipe, a corm (q. v., 2d def.). [a, 35.] 2. The petiolus of the epiglottis. [L, 304.]—*Augenblasen's*. See under AUGER.—*Blüthen's*. See PEDUNCLE (4th def.).—*Flocken's*. See FLOCCULUS (2d def.).—*Gehirnanhang's*. See INFUNDIBULUM (2d def.).—*Harnsacks's*. See URACHUS.—*Hirn's*. See CRURA cerebri and CAUDA cerebri.—*Hypophysiss's*. See INFUNDIBULUM (2d def.).—*Kleinhirn's*. The restiform body. [J, 6 (K).]—*Marks's*. See PEDUNCLE of the flocculus.—*Rückenmarks's*. Of Meckel, the inferior peduncles of the cerebellum. [J, 3 (K).]—*Schnitts's*. See ANSA (2d def.).—*S'behandlung*. The treatment of a pedicle.—*S'hirn*. See PODENCERPHALUS.—*S'torsion*. Twisting of a pedicle, as of an ovarian tumor. [a, 34.]—*S'versenkung*. Treatment of the pedicle of an ovarian tumor by dropping it into the abdominal cavity. [a, 34.]—*S'versorgung*. The treatment of an ovarian-tumor pedicle. [a, 34.]—*S'zerreissung*. Rupture of a pedicle, as of an ovarian tumor. [a, 34.]—*Unterer S. des Thalamus*. The inferior pillar of the optic thalamus, a bundle of fibres which extends downward from the posterior and inferior part of the optic thalamus into the temporo-sphenoidal lobe. [I, 17 (K).]—*Vorderer S. des Thalamus*. Of Meynert, the anterior peduncle of the optic thalamus, a tract of nerve-fibres which issues from the central part of the frontal lobe, extends between the head of the caudate nucleus and the lenticular nucleus, and enters the anterior extremity of the optic thalamus. [I, 17 (K).]

**STIELCHEN** (Ger.), n. *Stel*<sup>2</sup>/ch<sup>2</sup>e<sup>2</sup>n. See PEDICLE and STIPULE.

**STIELBRUND** (Ger.), adj. *Stel*<sup>2</sup>/rund. See TERETE.

**STIER** (Ger.), n. *Ster*. See BOS taurus.—*S'kugig*. Affected with buphthalmia.

**STIFF-NECK**, n. *Sti*<sup>2</sup>f-ne<sup>2</sup>k'. 1. A state of painfulness on bringing the neck-muscles into play, so that the head is carried stiffly. [D.] 2. See TORTICOLLIS.

**STIFLE**, **STIFLE-JOINT**, n. *Stifl*, *stifl*/joint. Fr., *grasset*. Of the veterinarians, the region of the hind-limb corresponding to the human knee and having for a base the patella and the soft parts that surround it. [a, 34.]

**STIFT** (Ger.), n. *Sti*<sup>2</sup>ft. See PENCIL (1st def.).—*Pastens's*. See STILUS diluibilis.—*Salbens's*. See STILUS unguens.

**STIGMA** (Lat.), n. n. *Sti*<sup>2</sup>g/ma<sup>3</sup>. Gen., *stig'matos* (-atis). Gr., *στίγμα*. Fr., *stigmaté*. Ger., *S*. 1. A punctiform spot or mark on the skin (see MARK and NÆVUS). 2. A red spot on the skin with an elevated efflorescence at its centre; an umbo. 3. A small cicatrix; a cicatricula. [G, 16.] 4. The mark of stigmatization (q. v.). 5. See *S. folliculi*. 6. Of J. Arnold, one of the gaps between the endothelia forming the wall of blood-capillaries. The gaps are filled with cell-cement, and it is supposed that at these points the white blood-corpuscles emigrate from the capillaries. According to Heitzmann, the *s'ta* are gaps along the sides of the cells, those at the angles being called stomata. [J, 26.] 7. In botany: (a) the part of a pistil, usually the apex of the style, that receives the pol-

len for the fertilization of the ovules (see *Stigmatic cell*); (b) of Hedwig, a small prominence on the globules in the involucre of the *Equisetinae*; (c) of Beauvois, a point persisting at the apex of the columella of mosses. [a, 35.] 8. The spiracle of an insect. [a, 27.] 9. Any mark or distinguishing feature.—*Baker's s'ta*. Callosities on the dorsal surface of the first and second phalanges of the hands produced by kneading dough. [a, 24.]—*Hysterical s'ta*. 1. Psychical or somatic *s'ta* indicative of neurasthenia. [a, 34.] 2. The *s'ta* of stigmatization (q. v.).—*Neurasthenic s'ta*. See *Hysterical s'ta* (1st def.).—*Physical s'ta of degeneration*. Certain variations from the normal type in the configuration of the skull, extremities, or other portions of the body, indicating a low or vicious type of mental development. [a, 34.]—*Psychical s'ta*. Of Gilles de la Tourette, certain mental peculiarities characterized by extreme susceptibility to suggestions of a particular kind. [a, 34.]—*Somatic s'ta*. Of Gilles de la Tourette, the objective signs of hysteria, neurasthenia, and other neuroses. [a, 34.]—*S'ta degenerations*. See *Physical s'ta of degeneration*.—*S. folliculi*. Ger., *Narbe*. A small non-vascular spot (the macula) near the middle of the thinner and more projecting part of a maturing Graafian vesicle, formed by the convergence of minute blood-vessels. At a subsequent period it is devoid of blood- and lymph-vessels, and its cells are undergoing fatty degeneration. It marks the spot where the vesicle bursts when it is fully matured, and the ovum escapes. [A, 5; J, 35.]—*S'ta hereditatis*. Psychical or somatic *s'ta* resembling those of an ancestor and attributed to heredity. [a, 34.]—*S'ta Malpighi*. Opening of small veins into the larger splenic veins. [L, 332.]—*S'ta nativa*. Punctate naevi. [G, 11.]—*S'ta nigra*. Black spots caused by the lodgment of particles of gunpowder in the skin. [G, 11.]—*S. of the Graafian vesicle*, *S. ovarii*. See *S. folliculi*.—*S'ta rubra*. Red spots (petechiae) on the skin due to violent coughing or vomiting, to scurvy, or to suppression of the menses. [G, 11.]—*Venous s'ta*. Varicose veins of the lower portion of the body and extremities. [a, 34.]

**STIGMATIC**, adj. *Sti*<sup>2</sup>g-ma<sup>2</sup>/i<sup>2</sup>k. Lat., *stigmaticus*. Fr., *stigmatique*. Ger., *stigmatisch*. Of or pertaining to a stigma.

**STIGMATIZATION**, n. *Sti*<sup>2</sup>g-ma<sup>2</sup>-i<sup>2</sup>z-a<sup>3</sup>shu<sup>3</sup>n. From *στίματιζω*, to brand. Fr., *stigmatisation*. The supposed miraculous impression of marks like those of Christ's wounds on the bodies of certain individuals; hence the formation or appearance of bleeding points on the body in consequence of some psychical or nervous morbid state. [G, 60; a, 48.]

**STIGMATOID**, adj. *Sti*<sup>2</sup>g-ma<sup>2</sup>-oid. Lat., *stigmatoides* (from *στίγμα*, a stigma, and *είδος*, resemblance). Resembling a stigma.

**STIGMATOPHORE**, n. *Sti*<sup>2</sup>g-ma<sup>2</sup>/o-for. Lat., *stigmatophora*, *stigmatophorus* (from *στίγμα*, a stigma, and *φορέω*, bearing). Fr., *s*. Of Cassini, that part of the style of *Compositae* which bears the stigmata. [a, 35.]

**STIGMATOSES** (Lat.), n. f., pl. of *stigmatis* (q. v.). *Sti*<sup>2</sup>g-ma<sup>2</sup>(ma<sup>2</sup>)-os/ez(e<sup>2</sup>s). From *στίγμα*, a mark. Ger., *Stigmatosen*, *erosive Hautkatarrhe*. Erosive catarrhs of the skin; of Auspitz, the second family under *Dermatitides catarrhales*, embracing catarrhal affections of the skin which are primarily of an erosive character, including parasitic and traumatic *s*. [G, 4.]

**STIGMATOSTEMON** (Lat.), n. m. *Sti*<sup>2</sup>g-ma<sup>2</sup>(ma<sup>2</sup>)-o(o<sup>2</sup>)-stem(stam)/o<sup>2</sup>n(on). Gen., -stem/onos(-is). From *στίγμα*, a stigma, and *στέμον*, a filament. Fr., *stigmatostémone*. Of Mönch, a body formed by the union of stamens (or anthers) with the stigma.

**STILAGO** (Lat.), n. f. *Sti*<sup>2</sup>l-a<sup>2</sup>(a<sup>3</sup>)go. Gen., -ag'inis. Fr., *stilage*. Ger., *Salamanderbaum*. The genus *Antidesma*. The *Stilaginaceae* or *Stilagineae* are the *Antidesmaceae*. [a, 35.]—*S. bunias*. Ger., *lorbeerblättriger Salamanderbaum*. Chinese laurel, the *Antidesma bunias*. [a, 35.]

**STILBE** (Lat.), n. f. *Sti*<sup>2</sup>l/b(e)a. Gen., *stil'bes*. From *στίλβειν*, to glitter. Fr., *s*. A genus of shrubs found in southern Africa. The *Stilbaceae*, or *stilbids* of Lindley and *Stilbineae* (the *Stilbineae* of Kunth) are now regarded as a tribe (*Stilbeae*) of the *Verbenaceae*. [a, 34.]

**STILBENE**, n. *Sti*<sup>2</sup>l/ben. Fr., *stilbène*. Ger., *Stilbene*. A substance, C<sub>14</sub>H<sub>12</sub>, isomeric with diphenylethylene. [B, 38, 93 (a, 14).]

**STILBOCARPA** (Lat.), n. f. *Sti*<sup>2</sup>l-b-o(o<sup>2</sup>)-ka<sup>3</sup>rp/a<sup>3</sup>. From *στίλβειν*, to glitter, and *καρπός*, fruit. A genus of the *Araliaceae*. [a, 35.]—*S. polaris*. An herb with saccharine, edible roots, found in New Zealand. [a, 35.]

**STILBUM** (Lat.), n. n. *Sti*<sup>2</sup>l/b-u<sup>3</sup>m(u<sup>4</sup>m). From *στίλβειν*, to glitter. Fr., *stilbe*. A genus of hyphomycetous *Fungi*, the type of the *Stilbacei* (of Lindley, a suborder of the *Hyphomycetes*), the *Stilbei* or *Stilbini* (of Fries, a tribe of the *Mucorini*), the *Stilbideae* (of Gray, a division of the *Nematomyces*), and the *Stilboidei* (of Fries, an order of the *Hyphomycetes*). [a, 35.]

**STILETT** (Ger.), **STILETTE** (Fr.), n's. *Stel*<sup>2</sup>-e<sup>2</sup>t, -e<sup>2</sup>t'. See STYLET.

**STILL**, n. *Sti*<sup>2</sup>l. Gr., *κόγχος σιδίρεος*. Lat., *concha ferrea*. Fr., *alambic*. Ger., *Destillirapparat*. See under DISTILLATION.

**STILLAMME** (Ger.), n. *Sti*<sup>2</sup>l/a<sup>3</sup>m-me<sup>2</sup>. See WET NURSE.

**STILLATORY**, n. *Sti*<sup>2</sup>l/a<sup>2</sup>-or-i<sup>2</sup>. A still.

**STILL-BORN**, adj. *Sti*<sup>2</sup>l-bo<sup>3</sup>rn'. Lat., *natus mortuus*. Fr., *mort-né*. Ger., *stillgeboren*. Dead at the time of birth. [a, 48.]

**STILLE** (Ger.), n. *Sti*<sup>2</sup>l/le<sup>2</sup>. Quiet (said of the state of quiescence of a frog's heart when filled with salt solution; this phenomenon may last for over an hour, and the heart-beat may again be restored by supplying the organ with fresh blood). [K, 19.]

**STILLEND** (Ger.), adj. *Sti*<sup>2</sup>l/le<sup>2</sup>nd. 1. Calming, sedative. [A, 521 (a, 48).] 2. Giving suck.

**STILLENDE** (Ger.), n. *Sti*<sup>2</sup>l/le<sup>2</sup>nd-e<sup>2</sup>. A nursing woman.

**STILLICIDIUM** (Lat.), n. n.  $Sti^{2l}li^{2s}(li^{2k})i^{2d}i^{2u}m(u^{4m})$ . From *stilla*, a drop, and *cadere*, to fall. Fr., *stillicide*. Ger., *Tröpfeln*. 1. Effusion of a liquid drop by drop. [a, 48.] 2. The bathing of a part by dropping water on it. [B, 48.]—*S. lacrimale*, *S. lacrimarum*. See *EPIPHORA* (2d def.).—*S. narium*. Of Bidloo, *coryza*. [a, 34.]—*S. sanguinis*. See *STAXIS*.—*S. urinæ*. Ger., *Harnabträufeln*. Dribbling of urine.—*S. uteri*. See *MENSES stilantes*.—*Virulent s.* Of Norman, gonorrhœa. [a, 34.]

**STILLINGIA** (Lat.), n. f.  $Sti^{2l}i^{2n}(i^{2n})ji^{2d}(gi^{2})a^2$ . From *Stillingfleet*, an English botanist. Fr., *stillingie*. Ger., *Stillingie*. 1. A genus of euphorbiaceous shrubs; by Baillon made a section of the genus *Excœcaria*. The *Stillingiee* are a tribe and the *Stillingiee* a division of the *Euphorbiaceæ*. 2. Of the U. S. Ph., the root of *S. silvatica*. [a, 35.]—*Extractum stillingie fluidum* [U. S. Ph.]. A fluid extract made by exhausting 10 grammes of s.-root in No. 40 powder with alcohol of sp. gr. 0.928, and bringing up to 100 c. c. [B, 95 (a, 38).]—*S. sebifera*. Fr., *arbre à suif*. Ger., *chinesischer Talgbaum*. Chinese tallow-tree; cultivated in India and America. The seeds, which yield a fixed oil used externally in medicine and for burning, are thickly coated with a white tallowy substance (stillistearin, or Tangawang fat), said to be nearly pure stearin, used for making candles. [a, 35.]—*S. silvatica*. Queen's-delight (or-root), silver-leaf, yaw-root; the *Excœcaria silvatica*. Its thick sub-cylindrical root, the s. of the U. S. Ph., is used as an alternative and especially in secondary syphilis. [a, 35.]

**STILLISTEARIC ACID**, n.  $Sti^{2l}i^{2st}e-a^{2r}i^{2k}$ . Fr., *acide stillistearique*. Ger., *Stillistearinsäure*. A fatty acid,  $C_{18}H_{32}O_2$ , obtained by saponification of stillistearin. According to Heintz, it is merely a mixture of fatty acids. [B, 93 (a, 14).]

**STILLISTEARIN**, n.  $Sti^{2l}i^{2st}e-a^{2r}i^{2n}$ . Fr., *stillistearine*. Ger., *S.* See under *STILLINGIA sebifera*.

**STILLSTAND** (Ger.), n.  $Sti^{2l}i^{2st}a^{2nd}$ . See *STANDSTILL* and *STASIS*.—*Herzenss'*. See *PERISSYSTOLE*.

**STILLUNG** (Ger.), n.  $Sti^{2l}i^{2un}$ . The act or process of calming, stopping, or stanching, also of sucking. [a, 48.]—*S'*smittel. A sedative. [a, 48.]

**STILOGONIUM** (Lat.), n. n.  $Stil(sti^{2l})o(o^{3})go^{2n}i^{2d}i^{2u}m(u^{4m})$ . From *stilus* (q. v.), and *gonidium* (q. v.). In *Fungi*, a gonidium abjoined from the end of a sterigma on a gonidiophore.

**STILUS** (Lat.), n. m.  $Stil(sti^{2l})u^{2s}(u^{4s})$ . 1. See *PENCIL*. 2. A peduncle, especially of the optic thalamus. [I, 73 (K).]—*S. dilabialis*. Ger., *Pastenstift*. Of Unna, a pencil composed of dextrin, gum-arabic, or tragacanth and some medicament; used in local treatment of skin diseases. [a, 34.]—*S. unguens*. Ger., *Salbenstift*. Of Unna, a pencil composed of rosin, wax, olive-oil, and some medicament; used in skin diseases. [a, 34.]

**STIMATOSIS** (Lat.), n. f.  $Sti^{2m}a^{2t}(a^{2t})o^{2s}i^{2s}$ . Gen., *-os/eos (-is)*. See *STYMATOSIS*.

**STIMMBESCHWERDE** (Ger.), n.  $Sti^{2m}be^{2t}shwe^{2rd}e^2$ . See *PHONOSUS*.

**STIMMBILDUNG** (Ger.), n.  $Sti^{2m}bi^{2ld}un^2$ . See *PRONATION*.

**STIMME** (Ger.), n.  $Sti^{2m}me^2$ . See *VOICE*.—*Flüsters'*. Fr., *voix chuchotée*. In auscultation, the whispered voice. [a, 18.]—*Höhlens'*. See *CELOSTOMIA*.—*Kehlkopfs'*, *Kehls'*. See *LARYNGOPHONY*.—*Kopfs'*. See *FALSETTO*.—*Krugs'*. See *AMPHORIC RESONANCE* (2d def.).—*Meckers'*, *Ziegens'*. See *PARAPHONIA puberum*.

**STIMMFEHLER** (Ger.), n.  $Sti^{2m}fal-e^{2r}$ . See *PARAPHONIA*.

**STIMMI** (Lat.), n. n.  $Sti^{2m}mi(mi^{2l})$ . Gr.,  $\sigma\tau\acute{\iota}\mu\mu\iota$ . See *ANTIMONY*.

**STIMMKRAMPF** (Ger.), n.  $Sti^{2m}kra^{2mpf}$ . See *PHONOSPASM*.

**STIMMLEIDEN** (Ger.), n.  $Sti^{2m}li^{2d}e^{2n}$ . See *PHONOSUS*.

**STIMMLOSIGKEIT** (Ger.), n.  $Sti^{2m}los-i^{2g}-kit$ . Aphonia.—*Cholerische S.* See *CHOLERAPHONE*.

**STIMMRITZE** (Ger.), n.  $Sti^{2m}ri^{2t}se^2$ . See *GLOTTIS*, *True GLOTTIS*, and *RIMA glottidis*.—*Phonischer S'nkrampf*. See *SPASTIC APHONIA*.—*S'ndeckel*. See *EPIGLOTTIS*.—*S'nkrampf*. Spasm of the glottis. [a, 34.]

**STIMULANT**, adj.  $Sti^{2m}u^{2l}nt$ . Fr., s. Ger., *stimulirend*. Stimulating; as a n. (Ger., *Stimulermittel*, *Reizmittel*), an agent that stimulates; colloquially, an alcoholic liquor. Cf. *STIMULUS*.—*Diffusible s.* A s. that, administered by the mouth or hypodermically, acts quickly. [a, 34.]

**STIMULATE**, v. tr.  $Sti^{2m}u^{2l}at$ . Lat., *stimulare*. Fr., *stimuler*. Ger., *stimulieren*, *reizen*. 1. To incite or urge on to increased action. 2. To treat with stimulants. [D.]

**STIMULATING**, adj.  $Sti^{2m}u^{2l}at-i^{2n}2$ . Lat., *stimulant*. Having the power or a tendency to stimulate. [D.]

**STIMULATION**, n.  $Sti^{2m}u^{2l}a-shu^2n$ . Lat., *stimulatio*. Fr., s. Ger., *Reizung*. The act or process or result of stimulating. [a, 48.]—*Intramuscular s.* Of Remak, Duchenne's direct muscular faradization. [a, 34.]—*Latent s.* The period in which the energy of a muscle rises and sinks after instantaneous s. [J. B. Sanderson, "Proc. of the Roy. Soc.," xlviii, 292, p. 14 (a, 34).]—*Terminal labile s.* Stroking the tendinous end of a muscle with the cathode so as to affect the entire length of the muscle, the anode being stationary. [A. L. Ranney, "N. Y. Med. Jour.," July 25, 1885 (a, 34).]—*Unipolar s.* The stimulus to a nerve effected by the application of a single electrode of an induction apparatus. [Landis (K).]

**STIMULOSE**, adj.  $Sti^{2m}u^{2l}os$ . Lat., *stimulosus*. Fr., *stimuleux*. Covered with stinging hairs (stimuli). [a, 35.]

**STIMULUS** (Lat.), n. m.  $Sti^{2m}u^{2l}(u^{4l})u^{2s}(u^{4s})$ . From *στίμω*, a pricking. Fr., *aiguillon* (1st def.). Ger., *S.* (1st def.), *Reiz* (1st def.), *Reizung* (2d def.). 1. An agent or agency that stimulates.

2. The action or result of a stimulant; stimulation. 3. In botany (Ger., *Brennhaar*, *Nesselhaar*, *Brennborste*, *Ahlhorste*, *Brennspitze*), a sting (i. e., a stinging hair). [D, 1; a, 35.]—*Adequate s.* Fr., *s. suffisant*. Ger., *hinlänglicher Reiz*. That special form of s. which excites the terminal filaments of a nerve distributed to an organ of sense. [K, 8.]—*Chemical s.* An irritation of the animal economy or of a separate muscle or nerve, produced by the application of a chemical agent. [K.]—*Heterologous s.* An extrinsic (mechanical, thermal, chemical, electrical) s. that acts upon the nervous elements of the sensory apparatus along their entire course. [a, 34.]—*Homologous s.* See *Adequate s.*—*Infallible s.* A weak s., such as is just sufficient to cause a contraction of a frog's heart if applied at the proper time. [K, 19.]—*Mechanical s.* An irritation of a nerve or muscle brought about by mechanical means, as by pinching or striking. [K.]

**STIMMWECHSEL** (Ger.), n.  $Sti^{2m}ve^{2ch}2s-e^{2l}$ . The change of voice at puberty. [a, 34.]

**STINGING**, adj.  $Sti^{2n}i^{2n}2$ . Lat., *stimulans*. In botany, of a hair, producing pain on penetrating the skin. [a, 35.]

**STINKASANT** (Ger.), n.  $Sti^{2n}k'a^{2z}a^{2nt}$ . See *ASAFETIDA*.—*Ammoniakalischer S'geist*. See *Spiritus ammoniæ fetidus*.—*S'pflaster*. See *Emplastrum asafetide*.

**STINKBAUM** (Ger.), n.  $Sti^{2n}k'ba^{2u}m$ . See *STERCULIA*, *ANAGYRIS fetida*, and *PRUNUS*.

**STINKHOLZ** (Ger.), n.  $Sti^{2n}k'ho^{2ts}$ . The genus *Olar*.

**STINKNASE** (Ger.), n.  $Sti^{2n}k'na^{2z}e^2$ . *Ozæna*. [a, 34.]

**STINKWEED**, n.  $Sti^{2n}k'wed$ . The *Cassia occidentalis*, *Chenopodium anthelminticum*, *Senecio jacobæa*, *Datura stramonium*, *Diploctis muralis*, etc. [a, 35.]

**STINK-WOOD**, n.  $Sti^{2n}k'wu^{2d}$ . The *Oreodaphne bullata*, *Zieria macrophylla*, etc., also their wood. [a, 35.]

**STIPA** (Lat.), n. f.  $Stip(step)^{2a}$ . Fr., *stipe*. Weather-grass; a genus of grasses. The *Stipacæ* (of Kunth, a tribe of the *Gramineæ*) are now made a subtribe (*Stipeæ*) of the *Agrostideæ*. [a, 35.]—*S. calamagrostis*. A species used by the Russians as a diuretic. [a, 35.]—*S. pennata*. Fr., *étiepe-aigrette*, *stipe à panache*. Feather-grass; a well-known ornamental grass. According to some, the freedom of the Tartars around the Volga from pulmonary disease is due to their daily use of the milk of mares fed upon this grass. [B, 185 (a, 35).]—*S. tenacissima*. Esparto-grass; a rush-like grass growing in sandy tracts of the Mediterranean coast; used for making hats, mats, baskets, etc. [a, 35.]

**STIPATE**, adj.  $Stip^{2a}t$ . Lat., *stipatus* (from *stipare*, to press together). 1. Surrounded by parts more or less crowded. 2. Packed, crowded (said of spores, etc.). [a, 35.]

**STIPATIO** (Lat.), n. f.  $Sti^{2p}(step)-a(a^{3})shi^{2t}(ti^{2})o$ . Gen., *-on/is*. From *stipare*, to press together. Fr., *stipation*. An accumulation that forms an obstruction. [L, 50 (a, 48).]—*S. telæ cellulose infantum*. See *SCLEREMA neonatorum*.

**STIPE**, n. *Stip*. See *STIPES*.

**STIPEL**, n.  $Stip^{2e}l$ . Lat., *stipella*, *stipellum*. Fr., *stipelle*. Ger., *Nebenblättchen*. A small slender or secondary stipule, the stipule of a leaflet. S's are single to each leaflet, except to the terminal one, which has two. [a, 35.]

**STIPES** (Lat.), n. m.  $Stip(step)^{2e}(e^{2s})$ . Gen., *stipitis*. Fr., *stipe*. Ger., *Stiel*. The stalk (Ger., *Stunk*) that bears the plexus of *Fungi* or the apothecium of lichens; a leaf-stalk (Ger., *Blattstiel*) in ferns or palms; a stalk-like support (s. *pistilli*) of a pistil or of a gynoecium. [a, 35.]—*S. vaginularis*. Ger., *Scheidenstiel*. The pedicle which in certain mosses (*Sphagnum* and *Andreaea*) carries the vaginula with the fruit above the topmost leaves. [a, 35.]

**STIPIFORM**, adj.  $Sti^{2p}i^{2f}o^{2rm}$ . Lat., *stipiformis* (from *stipes*, a stem, and *forma*, form). Fr., *stipiforme*. Resembling the stem of a palm. [a, 35.]

**STIPITATE**, adj.  $Sti^{2p}i^{2t}at$ . Lat., *stipitatus*. Fr., *stipité*. 1. Provided with a stipes which is neither petiole nor peduncle. 2. Elevated on a stipes. [a, 35.]

**STIPPCHEN** (Ger.), n.  $Sti^{2p}ch^{2e}n$ . An inflamed papule with an inflammatory areola. [G.]

**STIPPENAUSSCHLÄGE** (Ger.), n. pl.  $Sti^{2p}pe^{2n}a^{2u}e-shlag-e^2$ . Eruptions characterized by inflammatory papules with red areolæ. [G, 5.] See *MONOCARPÆ* (1st def.).

**STIPULA** (Lat.), n. f.  $Sti^{2p}(step)^{2u}(u^{4l})a^2$ . Dim. of *stipes*, a stalk. 1. A newly sprouted feather. [L, 343.] 2. A stipule; also, especially in the pl., the amphigastria of the liverworts. [B, 198.]

**STIPULACEOUS**, adj.  $Sti^{2p}u^{2l}a-shu^2s$ . Lat., *stipulaceus*. Fr., *stipulé*. Ger., *nebenblattartig*. Pertaining to or composed of stipules; of *De Candolle*, having scales which are aborted stipules (said of buds). [a, 35.]

**STIPULANEUS**, n.  $Sti^{2p}u^{2l}an-e^{2u}s$ . Lat., *stipulaneus*. Fr., *stipuléen*. Taking the place of stipules. [a, 35.]

**STIPULAR**, adj.  $Sti^{2p}u^{2l}a^{2r}$ . Belonging to a stipule. [a, 35.]

**STIPULATE**, adj.  $Sti^{2p}u^{2l}at$ . Lat., *stipulatus*. Fr., *stipulé*. Ger., *nebenblättrig*. Furnished with stipules. The *Stipulata* are a subclass of the *Filicina* having stipule-like appendages. [a, 35.]

**STIPULE**, n.  $Sti^{2p}u^{2l}$ . Lat., *stipula*. Fr., s. Ger., *Afterblatt*, *Afterblättchen*, *Nebenblatt*. One of the two foliar appendages at the base of the petiole of a leaf; also one of certain other stipular bodies, such as the unicellular tubes on the inner and outer sides of a leaf in the *Characeæ* and the appendage at the point of a leaf in the *Archegoniata*. [a, 35.] See also *STIPULA*.

**STIPULIFEROUS**, adj.  $Sti^{2p}u^{2l}i^{2f}e^{2r}u^{2s}$ . Lat., *stipulifer* (from *stipula*, a stipule, and *ferre*, to bear). Fr., *stipulifère*. Of a petiole, having stipules. [a, 35.]

**STIPULOSUS** (Lat.), adj.  $\text{Sti}^2\text{p-u}^1(\text{u}^1)\text{-os}^1\text{u}^3\text{s(u}^4\text{s)}$ . Fr., *stipuleux*. Furnished with stipules which are comparatively very long or large. [a, 35.]

**STIRN** (Ger.), n. Stern. See **FOREHEAD**.—**S'band**. A head bandage or band.—**S'gend**. The frontal region of the brain. [J, 17 (K).]—**S'lage**. See **Brow**.—**PRESENTATION**.—**S'mittel**. See **EPIPROSIUM**.—**S'schau**. See **METOPSCOPY**.—**S'theil**. See **PARS frontalis ossis frontis**.—**S'wulst**. A frontal convolution. [K.]

**STIRNFORTSATZ** (Ger.), n. Sternfortsatz. See **Frontal process**.—**Seitlicher S.** See **External nasal process**.

**STIRNWINDDUNG** (Ger.), n. Sternwindung. A frontal convolution. [K.]—**Dritte S.**, **Dritte S'gruppe**, **Dritter S'szug**. See **Inferior frontal convolution**.—**Erste S.**, **Erste S'gruppe**, **Erster S'szug**. See **Superior frontal convolution**.—**Mittlere S.**, **Mittlerer S'szug**. See **Middle frontal convolution**.—**Obere S.**, **Oberer S'szug**. See **Superior frontal convolution**.—**Untere S.**, **Unterer S'szug**. See **Inferior frontal convolution**.—**Zweite S.**, **Zweite S'gruppe**, **Zweiter S'szug**. See **Middle frontal convolution**.

**STIROSIS** (Lat.), n. f.  $\text{Sti}^2\text{r(ste}^1\text{r)-os}^1\text{s}^2\text{s}$ . Gen., *-os'eos (-is)*. Gr., *στειρωσις* (from *στερος*, barren). Fr., s. Ger., *S.* See **STERILITY**.

**STIRPS** (Lat.), n. f.  $\text{Stu}^2\text{rps(sti}^2\text{rps)}$ . Gen., *stirp'is*. Fr., *stirpe*. In botany, (1) a race or permanent variety; (2) the aerial stem of a plant. [a, 35.]

**STIRRUP**, n.  $\text{Sti}^2\text{r'u}^3\text{p}$ . See **STAPES**.

**STITCH**, n.  $\text{Sti}^2\text{ch}$ . Fr., *point*. Ger., *Stich*. 1. The product of one complete movement of the needle in the process of sewing; also any variety of sewing (or of surgical suture) produced by the use of a particular kind of such s's. [a, 48.] 2. See **S-pain**.—**Loop s.** See **SUTURE aanse**.—**Royal s.** See **ROYAL SUTURE**.—**S-pain**. A colloquial term for a sharp, sudden pain that comes and goes without apparent cause, appearing in any part of the body. [a, 34.]—**Taylor's s.** See **COBBLER'S SUTURE**.

**STIXIS** (Lat.), n. f.  $\text{Sti}^2\text{x'i}^2\text{s}$ . Gen., *stix'eos (-is)*. Gr., *στιγξ* (from *στιγναι*, to prick). Tattooing. [L, 50 (a, 14).]

**STOBÆA** (Lat.), n. f.  $\text{Sto}^2\text{b-e}^1(\text{a}^2/\text{e}^2)\text{-a}$ . Fr., *stobée*. A genus of the *Compositæ*. [a, 35.]—**S. heterophylla**. A Cape-of-Good-Hope species, considered lithontriptic and used in renal diseases.

**STOCK**, n.  $\text{Sto}^2\text{k}$ . A.-S., *stoc*. Gr., *στόλεχος* (1st def.). Lat., *truncus*, *stirps* (4th def.). Fr., *tronc*. Ger., *Stamm*. 1. The trunk or stem of a plant. 2. The basal persistent portion of a stem from which roots proceed. 3. The portion of a stem into which a scion or graft is inserted. 4. A race or fixed variety. 5. The genus *Matthiola*. 6. The *Trollius europæus*. [a, 35.]

**STOCKFISCHLEBERTHRAN** (Ger.), n.  $\text{Sto}^2\text{k/fi}^2\text{sh-lab'v-e}^2\text{-tra}^3\text{n}$ . The oil of the hake (*Gadus merluccius*). [B.]

**STOCKUNG** (Ger.), n.  $\text{Sto}^2\text{k'un}^2$ . See **STASIS**.

**STEBE** (Lat.), n. f.  $\text{Steb(sto}^2\text{e}^2\text{b)-e}^1(\text{a})$ . Gen., *steb'es*. Fr., *stèbe*. 1. Of Persoon, the genus *Centaurea*. 2. Of Linnæus, a genus of composite shrubs. [a, 35.]—**S. rhinocerotis**. A species used at the Cape of Good Hope as a digestive tonic. [a, 35.]

**STECHAS** (Lat.), n. f.  $\text{Stek(sto}^2\text{e}^2\text{ch)-a}^2\text{s(a}^3\text{s)}$ . Gen., *stech'ados (-adis)*. Gr., *στειχάς*. Sp., *cantueso* [Sp. Ph.] (2d def.). 1. Of Tournefort, the genus *Lavandula*. 2. Of the Fr. Cod., the flowering stalk (herb and flowering tops [Sp. Ph.]) of *Lavandula* s. 3. The *Helichrysum* s. [B, 95 (a, 38); a, 35.]—**Stechadas flores** [Gr. Ph.]. Sp., *cantueso* (*la umidad florida*) [Sp. Ph.]. The flowers of *Lavandula* s. [B, 95 (a, 38).]

**STECHEIOLOGIA** (Lat.), n. f.  $\text{Ste}^2\text{k(sto}^2\text{-e}^2\text{ch}^2)\text{-i}^2(\text{e)-o}^1(\text{o}^3)\text{-loj-}$  ( $\text{lo}^2\text{g}^2\text{)i}^2\text{-a}^3$ . Fr., *stœchiologie*. See **STOICHOLOGY**.

**STECHEIOMETRIA** (Lat.), n. f.  $\text{Ste}^2\text{k(sto}^2\text{-e}^2\text{ch}^2)\text{-i}^2(\text{e)-o}^1(\text{o}^3)\text{-me}^2\text{t'ri}^2\text{-a}^3$ . Fr., *stœchiométrie*. See **STOICHIOMETRY**.

**STECHEION** (Lat.), n. n.  $\text{Ste}^2\text{k(sto}^2\text{-e}^2\text{ch}^2)\text{-i}^2(\text{e)-o}^1\text{n}$ . Gr., *στοιχεῖον*. See **ELEMENT**.

**STOFF** (Ger.), n.  $\text{Sto}^2\text{f}$ . See **MATERIAL** and **MATTER**.—**Ausgeschiedener S.**, **Auswurfs'**. Excretion, waste matter. [K, 16.]—**Einfache Stoffe**. Elements. [B.]—**Krankheits'**. See **MATERIES morbi** (2d def.).—**Riechs'**. Any substance which acts as a stimulus to the olfactory nerves. [Gruenhagen (K).]—**Schmecks'**. Any substance which acts as a stimulus to the nerves of taste. [Gruenhagen (K).]—**S'austausch**. See **S'umsatz**.—**S'bilanz**. The balance of nutrition in the body. [K, 16.]—**S'spender**. The blood considered as the agent in effecting tissue-changes. [K, 16.]—**S'umsatz**. Interchange of material.—**S'wechsel**. 1. See **METABOLISM**. 2. Change of matter. [K.]—**S'wechselbilanz**. The balance or equalization of the tissue-changes in the animal economy.

**STOICHOLOGY**, n.  $\text{Stoik-i}^2\text{-o}^1\text{p'i}^2$ . Lat., *stœchiologia* (from *στοιχεῖον*, an element, and *λόγος*, understanding). Fr., *stœchiologie*. Ger., *Elementenlehre*. The scientific investigation of elements (especially of the chemical elements) or of elementary principles. [a, 48.]

**STOICHIOMETRY**, n.  $\text{Stoik-i}^2\text{-o}^1\text{m'e}^2\text{t'ri}^2$ . Lat., *stœchiometria* (from *στοιχεῖον*, an element, and *μετρέω*, to measure). Fr., *stœchiométrie*. Ger., *Stœchiometrie*, *Elementenmessung*. The determination of the proportions in which elements combine to form compounds. [B, 38, 48 (a, 14).]

**STOLE**, n.  $\text{Stol}$ . See **STOLON**.

**STOLLBEULE** (Ger.), n.  $\text{Stol'boil-e}^2$ . See **SPAVIN**.

**STOLON**, n.  $\text{Stol'o}^1\text{n}$ . From *stolo*, a shoot. Fr., s. Ger., *Sprosser*, *Stengelsprosse*. 1. Any basal branch striking root; in phanerogams, a slender runner piercing the soil; in *Musci*, a shoot running along or beneath the soil and finally turning upward and producing fully-leaved shoots. [a, 35.] 2. A process or structure resembling the s. of a plant. [a, 27.]

**STOLONIFEROUS**, adj.  $\text{Stol-o}^1\text{n-i}^2\text{f'e}^2\text{r-u}^3\text{s}$ . From *stolo*, a shoot, and *ferre*, to bear. Furnished with stolons.

**STOLPERGANG** (Ger.), n.  $\text{Stolp'e}^2\text{r-ga}^3\text{n}^2$ . A stumbling gait.

**STOMA** (Lat.), n. n.  $\text{Stom(sto}^2\text{m)'}^2\text{a}^2$ . Gen., *stom'atos (-atis)*. Fr., *stôme*. Fr., *stomate*. Ger., s. *Mündung*, *Spaltöffnung* (2d def.). 1. A mouth or opening. 2. A breathing pore; one of the organized apertures in the epidermis of plants, most abundant on the lower surface of leaves, consisting each of a pair of cells (guard-cells) between the opposed concave sides of which is a slit forming a medium of communication between an intercellular space within and the air without. [a, 35.] 3. A minute opening in a serous membrane, surrounded by a ring of small cuboidal cells and leading into a lymph-vessel. [J.] 4. See under **STRIGMA** (6th def.).—**False s'ta**. See **PSEUDOSTOMATA**.

**STOMACACE** (Lat.), n. f.  $\text{Sto}^2\text{m-a}^2\text{k(a}^3\text{k'y}^2\text{a}^2\text{s(a}^3\text{k)-e}^1(\text{a})$ . Gen., *-ac'aces*. Gr., *στομακάχης* (from *στόμα*, the mouth, and *κακός*, evil). Fr., s. Ger., *Mundfäule*, *Mundfäulniss*, *Mundkrankheit*. Any severe form of stomatitis.—**S. aphthosa**. See **APHTHÆ**.—**S. gangrenosa**. See **Gangrenous stomatitis**.—**S. universalis**. Of Sauvages, purpura hemorrhagica. [a, 34.]

**STOMACH**, n.  $\text{Stu}^2\text{m'k}$ . Gr., *στόμαχος*. Lat., *stomachus*. Fr., *estomac*. Ger., *Magen*. 1. A somewhat conical hollow viscus, with rounded ends, constituting the largest dilatation of the alimentary canal. It is concave above, convex below, with its larger end (the cardia) directed to the left side and situated higher than its smaller extremity (the fundus). On the left side it connects with the œsophagus, on the right with the duodenum. It lies close beneath the diaphragm, and extends on the right side nearly to the liver and below to a point about midway between the diaphragm and the umbilicus. When moderately distended it is about 12 inches long and about 5 inches wide at its widest part. It consists of four coats, known as the serous, muscular (made up of longitudinal, circular, and oblique fibres), submucous, and mucous, and is provided with glands concerned in digestion. In ruminants the s. proper is the abomasum, or rennet, for in the rumen, reticulum, and omasum the food is merely macerated and, to a certain extent, triturated. The slightly masticated food passes into the rumen and reticulum, where it is thoroughly mixed with the saliva and is macerated and softened. After remaining there for a variable length of time it is regurgitated and again masticated, the animal making one movement of the jaw from right to left or left to right, and then a number of movements in the reverse direction until the food is finely triturated. It next passes into the omasum, being prevented by the œsophageal groove from entering the rumen or reticulum, and then, grasped by the folds of the omasum, it is submitted to further trituration and maceration. Thence it enters the abomasum, where the true digestion takes place. The s's of the lower animals, except ruminants, do not differ very materially from that of man, except in shape and size. In *Carnivora* the s. is relatively large, secreting gastric juice throughout its whole extent, while in *Omnivora* but a smaller proportion of surface secreting the gastric juice is found. The smaller the secreting surface of the s. is in any animal, the greater are the surface and extent of the intestines. Thus, in *Carnivora* the intestines are relatively smaller than in ruminants, etc. For the s. in birds see **PROVENTRICULUS**. [L.] 2. Popularly, the abdomen.—**Honey-comb s.** See **RETICULUM** (3d def.).—**Hour-glass s.** Ger., *sanduhrförmiger Magen*. An hour-glass-shaped distortion of the s. from constriction of its median portion by a band of exudation. [G. Chiarrecchi, "Gazz. degli. ospit.", 1884, p. 101; "Oribl. f. klin. Med.", Mar. 14, 1885, p. 189.]—**S'ache**. See **CARDIALGIA**.—**S.-bucket**. Of Einhorn, a small silver acorn-like vessel to which is attached a silk thread; used to obtain a specimen of the gastric contents. [a, 34.]

**STOMACHAL**, adj.  $\text{Stu}^2\text{m'a}^3\text{k'l}$ . Fr., *stomacal*. See **GASTRIC**.

**STOMACHALGIA** (Lat.), n. f.  $\text{Sto}^2\text{m-a}^2\text{k(a}^3\text{ch}^2)\text{-a}^2\text{l(j(a}^2\text{l)g')-i}^2\text{-a}^3$ . From *στόμαχος*, the stomach, and *άλγος*, pain. See **CARDIALGIA**.

**STOMACHIC**, adj.  $\text{Sto}^2\text{m'a}^3\text{k'i}^2\text{k}$ . Gr., *στομαχικός*. Lat., *stomachicus*. Fr., *stomachique*. 1. Gastric. 2. Acting as a digestive tonic. [a, 17.]

**STOMACHICUM** (Lat.), n. n.  $\text{Sto}^2\text{m-a}^2\text{k(a}^3\text{ch}^2)\text{-i}^2\text{k-u}^3\text{m(u}^4\text{m)}$ . A stomachic remedy. [a, 17.]—**S. Poterii**. See *Cerussa ANTIMONII solaris* and *ANTIMONII diaphoreticum martiale*.

**STOMACH-PUMP**, n.  $\text{Stu}^2\text{m'k-pu}^3\text{m}^2\text{p}$ . See under **PUMP**.

**STOMÆMORRHAGIA** (Lat.), n. f.  $\text{Stom(sto}^2\text{m)-e}^2\text{m(a}^3\text{-e}^2\text{m)-o}^2\text{r-raj(rag'i}^2\text{-a}^3$ . From *στόμα*, the mouth, *αἷμα*, blood, and *ῥήγνυσθαι*, to burst forth. Fr., *stomémorrhagie*. Ger., *Mundblutung*. Hemorrhage from the mouth. [L, 50 (a, 14).]

**STOMATAGIA** (Lat.), n. f.  $\text{Sto}^2\text{m-a}^2\text{k(a}^3\text{b)'}^2\text{-a}^2\text{l(j(a}^2\text{l)g')-i}^2\text{-a}^3$ . From *στόμα*, the mouth, and *άλγος*, pain. Fr., *stomatique*. Ger., *Mundschmerz*. Pain in the mouth. [L, 41 (a, 14).]

**STOMATELCIA** (Lat.), **STOMATELCOSIS** (Lat.), n's f.  $\text{Sto}^2\text{m-a}^2\text{k(a}^3\text{b)'}^2\text{-e}^2\text{l(s(e}^2\text{l)k')-i}^2\text{-a}^3$ .  $\text{-e}^2\text{l(k-os}^1\text{i}^2\text{s)}$ . Gen., *-el'e'ia*, *-os'eos (-is)*. From *στόμα*, the mouth, and *ἄκος*, an ulcer. Fr., *stomatelcie*, *stomatelcosis*. Ulceration of the mouth. [E.]

**STOMATIC**, adj.  $\text{Sto}^2\text{m-a}^2\text{i}^2\text{k}$ . Gr., *στοματικός* (from *στόμα*, the mouth). Lat., *stomaticus*. Fr., *stomatique*. Pertaining to a stoma or mouth; as a n., a medicine for affections of the mouth.

**STOMATITE** (Fr.), n.  $\text{Stom-a}^3\text{t-et}$ . See **STOMATITIS**.—**S. charbonneuse**. See **Gangrenous stomatitis**.—**S. couenneuse**. See **Buccal diphtheria**.—**S. crêmeuse**. See **APHTHÆ**.—**S. des canernes**. A form of stomatitis, probably scorbutic, observed in garibons.—**S. du muguet**. See **APHTHÆ**.—**S. epizootique**. See **Epizootic stomatitis**.

**STOMATITIS** (Lat.), n. f.  $\text{Stom(sto}^2\text{m)-a}^2\text{k(a}^3\text{b)'}^2\text{-i}^2(\text{e)'}^2\text{i}^2\text{s}$ . Gen., *-it'idos (-idis)*. From *στόμα*, the mouth. Fr., *stomatite*. Ger., *Mundentzündung*. Inflammation of the mouth. [D.]—**Aphthous s.** See **APHTHÆ**.—**Catarrhal s.** Inflammatory redness and swell-

ing of the oral mucous membrane without ulceration. [a, 34].—**Corrosive s.** 1. See *Gangrenous s.* 2. S. produced by the action of corrosive substances. [D, 48].—**Diabetic s.** S. caused by diabetes.—**Diphtheritic s.** See *Buccal diphtheria*.—**Epithelial s.** See *Leucoplakia buccalis*.—**Epizootic s.** Of Hardy, aphthae epizooticae. [a, 34].—**Erythematous s.** See *Simple s.*—**Follicular s.** See *APHTHE*.—**Gangrenous s.** S. accompanied by gangrene.—**Mercurial s.** S. due to mercurial poisoning. [a, 34].—**Pseudo-membranous s.** See *Buccal diphtheria*.—**Pultaceous s.** See *APHTHE*.—**Saturnine s.** S. due to lead poisoning. [a, 34].—**Scorbutic s.** S. occurring in and due to scurvy. [a, 34].—**Simple s.** An erythematous inflammation of the mouth, especially of its mucous membrane, which occurs in patches, and may be due to heat, cold, irritation of the teeth, etc. It is also caused at times by gastric derangement. [D, 1.].—**S. aphthosa**, *S. aphthophyta*, *S. crenosa*. See *APHTHE*.—**S. crouposa**. See *Buccal diphtheria*.—**S. epidemica**. An acute infectious s. occurring epidemically. [a, 34].—**S. erythematosa**. See *Simple s.*—**S. exsudativa**. Of Löwenstamm, s. associated with exudation. [a, 34].—**S. exulcerans**. See *Ulcerative s.*—**S. follicularis**, *S. fungosa*. See *APHTHE*.—**S. interptoria**. See *APHTHE tropica*.—**S. leucæmica**. S. caused by leucæmia. [a, 34].—**S. materna**. S. occurring during pregnancy or lactation, due to the enfeeblement of the system incident to those conditions. [a, 34].—**S. membranacea**, *S. membranosa*. See *Buccal diphtheria*.—**S. mercurialis**. See *Mercurial s.*—**S. nodosa**. S. with the formation of small nodes in the buccal mucosa. [a, 34].—**S. parasitica**. See *APHTHE*.—**S. pustulosa acarosa**. Aphthae epizooticae caused by an *Acarus*. [a, 34].—**S. pustulosa contagiosa**. A contagious form of aphthae epizooticae observed in horses. [a, 34].—**S. septica**. S. due to septic infection.—**S. ulcerosa idiopathica**. See *Gangrenous s.*—**S. vesicularis**. See *APHTHE*.—**Toxic s.** S. due to the local application or ingestion of a poison or to the action of a poison generated in the system. [a, 34].—**Ulcerative s.** S. with ulceration.—**Ulcero-membranous s.** Buccal diphtheria with ulceration.—**Vesicular s.** See *APHTHE*.

**STOMATIUM** (Lat.), n. n. Sto<sup>2</sup>m-a(a<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). See STOMA (2d def.).

**STOMATOCACE** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>k'a<sup>2</sup>s(a<sup>2</sup>k)-e(a). Gen., -oc'aces. See STOMACACE.

**STOMATOCATHARSIS** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-ka<sup>2</sup>th(ka<sup>2</sup>th)-a<sup>2</sup>rs'i<sup>2</sup>s. Gen., -ars'eos (-is). From *stóma*, the mouth, and *kátharsis*, a cleansing. Fr., *stomatocatharsie*. Ger., *Mundauwurf*. Salivation. [L, 50 (a, 48).]

**STOMATOCATHARTICUM** (Lat.), n. n. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-ka<sup>2</sup>th(ka<sup>2</sup>th)-a<sup>2</sup>rt'i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m). See STOMOCATHARTICUM.

**STOMATODYNIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-di<sup>2</sup>na(dí<sup>2</sup>n)-y'i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *δύνη*, pain. See STOMATALGIA.

**STOMATOIATRIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-i<sup>2</sup>a<sup>2</sup>-t<sup>2</sup>a<sup>2</sup>t(a<sup>2</sup>t)-ri<sup>2</sup>(re)/a<sup>2</sup>. From *stóma*, the mouth, and *iatría*, medical treatment. The therapeutics of diseases of the mouth. [a, 34].

**STOMATOLOGY**, n. Sto<sup>2</sup>m-a<sup>2</sup>t-o<sup>2</sup>l-o<sup>2</sup>-ji<sup>2</sup>. From *stóma*, the mouth, and *λόγος*, understanding. The pathology, etc., of the mouth. ["N. Y. Med. Jour.," Mar. 17, 1888, p. 290 (a, 48).]

**STOMATOMALACIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-ma<sup>2</sup>l-(ma<sup>2</sup>l)-as(a<sup>2</sup>k)/i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *malacia*, softness. Fr., *stomatomalacie*. A morbid softening of the structures of the mouth. [L, 50 (a, 14).]

**STOMATOMENIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-men(man)/i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *μήν*, a month. Fr., *stomatoméne*. Vicarious menstruation by the mouth. [L, 50 (a, 14).]

**STOMATOMIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-om(o<sup>2</sup>m)/i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *τομή*, a cutting. Incision of a mouth (e. g., the os uteri). [a, 34].

**STOMATOMYCOSIS** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-mi(mu<sup>2</sup>)-kos'i<sup>2</sup>s. Gen., -os'eos (-is). From *stóma*, the mouth, and *μύκης*, a fungus. Any mycotic affection of the mouth.—**S. oïdica**. S. caused by *Oidium albicans*.—**S. sarcinica**. S. caused by *Sarcina*. [a, 34].

**STOMATONECROSIS** (Lat.), **STOMATONOMA** (Lat.), n's f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-ne<sup>2</sup>k-ros'i<sup>2</sup>s, -o<sup>2</sup>n'o<sup>2</sup>m-a<sup>2</sup>. Gen., -ros'eos (-is). From *stóma*, the mouth, and *νέκρωσις*, necrosis, or *νομή*, a corroding ulcer. Fr., *stomatonecrose*, *stomatonomie*. See *Gangrenous stomatitis*.

**STOMATOPANUS** (Lat.), n. m. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-pan-(pa<sup>2</sup>n)/u<sup>2</sup>s(u<sup>2</sup>s). From *stóma*, the mouth, and *panus* (q. v.). Fr., *stomatopane*. Swelling of the glands of the mouth. [L, 50 (a, 14).]

**STOMATOPATHIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-pa<sup>2</sup>th-(pa<sup>2</sup>th)-e<sup>2</sup>s/a<sup>2</sup>. From *stóma*, the mouth, and *πάθος*, disease. Fr., *stomatopathie*. Any disease of the mouth. [a, 34].

**STOMATOPHYMA** (Lat.), n. n. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-fi(fi<sup>2</sup>)/ma<sup>2</sup>. Gen., -phym'atos (-atis). From *stóma*, the mouth, and *φύμα*, a growth. Fr., *stomatophyme*. Ger., *Mundgeschwulst*. Any tumor of the mouth. [L, 50 (a, 14).]

**STOMATOPLASTY**, n. Sto<sup>2</sup>m-a<sup>2</sup>t-o<sup>2</sup>-pla<sup>2</sup>-st-i<sup>2</sup>. From *stóma*, the mouth, and *πλάσσειν*, to mold. Fr., *stomatoplastie*. Ger., *Stomatoplastik*. The plastic surgery of the mouth, also of the os uteri. [E; a, 34].

**STOMATOPOIESIS** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-poi-e(a)/-si<sup>2</sup>s. Gen., -os'eos (-is). From *stóma*, the mouth, and *ποίησις*, production. 1. See STOMATOPLASTY. 2. Any operation for establishing an aperture of communication.

**STOMATOPYRA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>p'i<sup>2</sup>r(u<sup>2</sup>r)/a<sup>2</sup>. From *stóma*, the mouth, and *πύρ*, fire. See *APHTHE*.

**STOMATORRHAGIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>r-raj-(ra<sup>2</sup>j)/i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *ῥήγνυσθαι*, to burst forth. Ger., *Mundblutung*. Hemorrhage from the mouth. [E.]

**STOMATORRHEA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o<sup>2</sup>r-re'(ro<sup>2</sup>/e<sup>2</sup>)-a<sup>2</sup>. From *stóma*, the mouth, and *ῥεῖν*, to flow. Fr., *stomatorrhée*. Ger., *Mundfluss*. Any morbid discharge from the mouth.

**STOMATOSCOPE**, n. Sto<sup>2</sup>m-a<sup>2</sup>t-o-skop. From *stóma*, the mouth, and *σκοπεῖν*, to examine. Fr., s. Ger., *Stomatoskop*. An apparatus for the visual examination of the mouth-cavity.

**STOMATOSEPSIS** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-se<sup>2</sup>ps-(spa<sup>2</sup>s)/i<sup>2</sup>s. Gen., -seps'eos (-is). From *stóma*, the mouth, and *σῆψις*, putrefaction. See *Septic stomatitis*.

**STOMATOSIS** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-os'i<sup>2</sup>s. Gen., -os'eos (-is). From *stóma*, the mouth. Any disease of the mouth.

**STOMATOSPASMUS** (Lat.), n. m. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-spa<sup>2</sup>z-(spa<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). From *stóma*, the mouth, and *σπασμός*, a spasm. Fr., *stomatospasme*. See TRISMUS.

**STOMATOTYPHUS** (Lat.), n. m. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-o(o<sup>2</sup>)-tif-(tu<sup>2</sup>f)/u<sup>2</sup>s(u<sup>2</sup>s). From *stóma*, the mouth, and *τύφος*, typhus. Fr., s. Ger., *Mundtyphus*. Of Eisenmann, a form of typhus ushered in by lesions of the mouth. [A, 322.]

**STOMATURIA** (Lat.), n. f. Sto<sup>2</sup>m-a<sup>2</sup>t(a<sup>2</sup>t)-u<sup>2</sup>r(ur)/i<sup>2</sup>a<sup>2</sup>. From *stóma*, the mouth, and *ὄνυρ*, urine. Fr., *stomaturie*. Metastasis of the urine to the mouth. [L, 50 (a, 14).]

**STOMENCEPHALUS** (Lat.), n. m. Sto<sup>2</sup>m-e<sup>2</sup>n(e<sup>2</sup>n<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)/-a<sup>2</sup>l(a<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From *stóma*, the mouth, and *ἐγκεφαλος*, the brain. See STOMOCEPHALUS.

**STOMOCATHARTERIUM** (Lat.), **STOMOCATHARTICUM** (Lat.), n's n. Sto<sup>2</sup>m-o(o<sup>2</sup>)-ka<sup>2</sup>th(ka<sup>2</sup>th)-a<sup>2</sup>rt-e(a)/ri<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m), -a<sup>2</sup>rt'i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m). From *stóma*, the mouth, and *καθαρτήριος*, or *καθαρκτικός*, purgative. Fr., *stomocathartique*. A mouth-cleansing medicine. [L, 50 (a, 48).]

**STOMOCEPHALUS** (Lat.), n. m. Sto<sup>2</sup>m-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)/a<sup>2</sup>l-(a<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From *stóma*, the mouth, and *κεφαλή*, the head. Fr., *stomocephale*. A cyclocephalus in which the upper portion of the face resembles that of a rhinocephalus, while in the lower portion of the face the jaws are rudimentary. There is more or less complete absence of the buccal cavity, with a tuberosity or proboscis-like formation where the mouth should be. [Geoffroy St. Hilaire.]

**STOMODEUM** (Lat.), n. n. Stom(sto<sup>2</sup>m)-o<sup>2</sup>-d-e'(e<sup>2</sup>/e<sup>2</sup>)-u<sup>2</sup>m(u<sup>2</sup>m). Ger., *Kopfdarm*, *Mundbucht*, *Mundöffnung*, *primitive Mundhöhle*. The primitive mouth of the embryo, being the common cavity of the mouth, the nose, and the pharynx. [A, 5.]

**STOMOMANICON** (Lat.), n. n. Stom(sto<sup>2</sup>m)-o(o<sup>2</sup>)-ma<sup>2</sup>n-(ma<sup>2</sup>n)/i<sup>2</sup>k-o<sup>2</sup>n. See PLATYSMA myoides.

**STOMOSCHISIS** (Lat.), n. f. Sto<sup>2</sup>m-o<sup>2</sup>sk(o<sup>2</sup>sch<sup>2</sup>/i<sup>2</sup>s)-i<sup>2</sup>s. Gen., -schis'eos (-osch'isis). From *stóma*, the mouth, and *σχίζω*, a cleaving. Fr., *stomoschisie*. Fissure of some oral structure, especially cleft palate. [L, 50 (a, 14).]

**STOMOTICUS** (Lat.), adj. Sto<sup>2</sup>m-o<sup>2</sup>t(ot)/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). From *stóma*, the mouth. Pertaining to the mouth or to inoculation.

**STOMOTOSYRINX** (Lat.), n. f. Sto<sup>2</sup>m-o<sup>2</sup>t(ot)-o(o<sup>2</sup>)-si<sup>2</sup>r(su<sup>2</sup>r)/-i<sup>2</sup>n'x. Gen., -ing'os (-ing'is). From *stóma*, the mouth, *ὄς*, the ear, and *σύνιξ*, a tube. See *Eustachian tube*.

**STOMURIA** (Lat.), n. f. Sto<sup>2</sup>m-u<sup>2</sup>r(ur)/i<sup>2</sup>a<sup>2</sup>. See STOMATURIA.

**STONE**, n. Sto<sup>2</sup>n. Gr., λίθος. Lat., *lapis*. Fr., *pierre*. Ger., *Stein*. 1. An aggregated mass of more or less firmly cohesive mineral matter, especially of siliceous matter. 2. A calculus; also the condition of being affected with vesical calculi. [a, 48.] 3. See PUTAMEN (2d def.).—**Blue s.** See COPPER sulphate.—**Gall-s.** See BILIARY CALCULUS.—**Livers'.** A mixture of heavy spar (barium sulphate) and bitumen. [a, 35].—**Philosopher's s.** Lat., *lapis philosophicus*, *lapis philosophorum*. Fr., *pierre philosophale*. Ger., *Stein der Weisen*. A hypothetical substance sought after by the alchemists as a panacea and a restorer of youth, also as an agent for transmuting baser matter into the precious metals. [a, 48].—**S.-crusher**. See LITHOTRITE.—**S.-oil**. See PETROLEUM.—**Sun-s.** See LAPIS solis.

**STONECROP**, n. Sto<sup>2</sup>n'kro<sup>2</sup>p. The genus *Sedum*, especially *Sedum acre*. [a, 35.]

**STONE-POX**, n. Sto<sup>2</sup>n'po<sup>2</sup>x. Ger., *Steinpocken*. 1. Varicella solidescens. 2. Variola vaccina atrophica. 3. Acne. [G.]

**STONEWORT**, n. Sto<sup>2</sup>n'wu<sup>2</sup>rt. See CHARA (2d def.).

**STOOL**, n. Stul. Gr., κοπράκη (2d def.), ἀποβόλη (2d def.), κοιλία (2d def.). Lat., *dejectio* (2d def.), *feces* (3d def.). Fr., *garde-robe* (1st def.), *selle*. Ger., *Stuhl*, *Stuhlgang* (2d def.). 1. A seat or chair, especially one arranged for evacuation of the bowels. 2. The discharge of feces. 3. The matter evacuated from the bowels. 4. A plant used for propagation by having its branches bent down into the ground. [a, 35].—**Bilious s's.** Discharges in bilious diarrhoea, and also after the purgative use of calomel. When bile is in abundance in the s's their color is yellowish or yellowish-brown; this becomes darker after exposure to the air. If the alimentary tube is in a decidedly acid condition the bilious s's are green. [D, 25.].—**Caddy s's.** The evacuations in yellow fever, which resemble fine, dark, sandy mud. [D, 1.].—**Fatty s's.** S's in which fat is present, observed in diseases of the pancreas.—**Mucous s's.** S's consisting entirely or partly of mucus; observed in certain intestinal inflammations. [a, 34].—**Rice-water s's.** Watery s's of serum containing detached epithelium and liquid feces, resembling rice-water; observed in cholera.

**STOPCOCK**, n. Sto<sup>2</sup>p'ko<sup>2</sup>k. Fr., *robinet*. Ger., *Hahn*. A key for regulating the flow of liquid or gas from a reservoir. [a, 48.]

**STOPPEND** (Ger.), adj. Sto<sup>2</sup>p'f'e<sup>2</sup>nd. 1. Constipating. 2. Styp-tic. [L, 521 (a, 48).]

**STOPFWACHS** (Ger.), n. Sto<sup>2</sup>p'f'va<sup>2</sup>ch<sup>2</sup>s. See PROPOLIS.

**STOPPAGE**, n. Sto<sup>2</sup>p'e<sup>2</sup>z. A colloquialism for the obstruction of some natural discharge. [a, 34.]

**STOPPING**, n. Sto<sup>2</sup>p<sup>1</sup>/n. The operation of plugging a dental cavity. [a, 34.]

**STORAX** (Lat.), n. m. and f. Stor(sto<sup>2</sup>r)/a<sup>2</sup>x(a<sup>2</sup>x). Gen., stor'-acia. Fr., s. sec (1st def.). Ger., fester S. (1st def.). 1. True s., a fragrant solid resin, somewhat like benzoin, obtained from the stem of *Styrax officinalis*. It was highly esteemed by the ancients, but does not now occur in commerce. [a, 35.] 2. See *Liquid s.*—**Amgydaloid s.** Lat., *styrax amygdaloides*. Fr., s. amygdaloïde. Ger., Mandels'. A variety with a vanilla-like odor, consisting of dry, brittle masses composed chiefly of yellowish, agglutinated tears; produced, according to some, by the *Styrax officinalis*; according to others, identical with amygdaloid benzoin. [a, 35.]—**Balsamum storacis**. 1. See S. (1st def.). 2. See *Liquid s.* 3. The balsam of *Liquidambar altingiana*. [a, 35.]—**Liquid s.** Fr., *styrax liquide* (ou purifié). Ger., flüssiger S., gemeiner S. Sp., *estorax liquido* [Sp. Ph.]. A half-fluid, opaque, viscid, grayish-brown resin, of pungent aromatic taste and a pleasant balsam-like smell, obtained from the bark [Norw. Ph., Swed. Ph., Austr. Ph.] (the branches [Gr. Ph.], the inner bark [U. S. Ph., Br. Ph., Ger. Ph., Roum. Ph.]) of *Liquidambar orientalis*. The purified s. of the Br. Ph. is translucent and of a yellow-brown color. The Fr. Cod. recognizes two grades of s., one of which, the s. purifié, is purified by melting and straining; and several other ph's order that the s. be purified before use. In its recent state it smells of bitumen or naphthalin. It is soluble in an equal weight of alcohol, is melted by a moderate degree of heat, and at a higher temperature takes fire and burns with a white flame. It contains storsin, styracin, and several other compound ethers, about 0.4 per cent. of an essential oil, small proportions of a fragrant substance (vanillin) and benzoic acid, and a hydrocarbon which exists both as a liquid (styröl) and as a solid (metastyrol). Liquid s. is stimulant and expectorant, but is now rarely used, except, mixed with linseed oil, as an application in scabies and as an ingredient of the compound tincture of benzoin. [B, 5, 180 (a, 35); B, 95 (a, 38).]—**Liquid s. plant.** See *LIQUIDAMBAR orientale*.—**Pilule storacis**. Fr., pilules d'opium balsamiques. A pill-mass consisting essentially of 15 parts of s. with 5 each of opium and saffron or with 7 each of extract of opium, mastic, oilbanum, and benzoin, 11 of licorice-juice, and 4 of saffron, worked up with oil of amber. [B, 119 (a, 38).]—**Prepared s.** See *Liquid s.*—**Resina storacis**, Solid s. See S. (1st def.).—**S.-bark**. The foliaceous, brown, fragrant bark remaining after the expression of liquid storax; formerly common in European pharmacy as *cortex thymianatis*. [a, 35.]—**S. in grains**. Lat., *styrax in granis*. Fr., s. en larmes. Ger., körniger S. A variety, not now found in commerce, consisting of soft, adhesive tears as large as a pea. [a, 35.]—**S. laurica**. According to some, liquid s.; according to others, the resin of *Styrax officinalis*. [a, 35.]—**S.-plant**. See *STYRAX* (1st def.).—**S. von Bogotä** (Ger.). See *STYRAX bogotensis*.—**S. vulgaris**. See *Liquid s.*

**STORESIN**, n. Sto<sup>2</sup>r/e<sup>2</sup>s/i<sup>2</sup>n. A substance, C<sub>26</sub>H<sub>50</sub>O<sub>9</sub>, forming an important constituent of liquid storax and occurring in two isomeric forms, both of them colorless and amorphous. [a, 35; B, 5, 270 (a, 38).]

**STORKBILL**, **STORK'S-BILL**, n's. Sto<sup>2</sup>r'k/bi<sup>2</sup>l, sto<sup>2</sup>r'kz/bi<sup>2</sup>l. See *PELAGONIUM*, *GERANIUM maculatum*, and *ERODIUM cicutarium*.

**STÖRUNG** (Ger.), n. Stu<sup>2</sup>r/un<sup>2</sup>. See DERANGEMENT.—**Geistess'**. See *Mental aberration*.—**S. des organischen Baues**. See *DISORGANIZATION*.—**S. entwicklung**. See *CENOGENESIS*.

**STOSS** (Ger.), n. Sto<sup>2</sup>s. See SHOCK (2d def.).—**Herzspitzens'**. See *Apeze-beat*.—**Herzs'**. See *Heart-beat*.

**STÖSEL** (Ger.), n. Stu<sup>2</sup>s/se<sup>2</sup>l. See *PESTLE*.

**STÖSSER** (Ger.), n. Stu<sup>2</sup>s/se<sup>2</sup>r. A thruster or pusher. [A, 315 (a, 48).]—**Schlunds'**. See *PROBANG*.

**STOTTERN** (Ger.), n. Sto<sup>2</sup>t/te<sup>2</sup>rn. See *STUTTERING*.

**STOTTERNHEIM** (Ger.), n. Sto<sup>2</sup>t/te<sup>2</sup>rn-him. A place in Saxe-Weimar where there is a saline spring. [L, 30, 57 (a, 14).]

**STOUT**, n. Stu<sup>2</sup>u<sup>2</sup>t. A strong variety of porter.

**STOVE**, n. Stov. Fr., poêle. Ger., Ofen. A hollow stand (generally closed) within which fuel is burned for heating purposes. [a, 48.]—**Salt-water s.** Ger., Salzwaasserofen. A s. for boiling water that has had its boiling point raised by the addition of common salt or some other saline substance, for the purpose of securing a high temperature for the destruction of micro organisms. [Dobrowslawin, "Vratsch," No. 32, 1885; "St. Petersburg. med. Wochenschrift," Jan. 4 (16), 1886, p. 5.]

**STRABISMUS** (Lat.), n. m. Stra<sup>2</sup>b(stra<sup>2</sup>b)-i<sup>2</sup>l-i<sup>2</sup>s/mu<sup>2</sup>s(mu<sup>2</sup>s). See *STRABISMUS*.

**STRABISMIC**, adj. Stra<sup>2</sup>b-i<sup>2</sup>s/mi<sup>2</sup>k. Fr., louchant (1st def.), strabique (2d def.), louche (2d def.). Ger., strabitisch, schielend (2d def.). 1. Defining to strabismus. 2. Affected with strabismus.

**STRABISMOMETER**, n. Strab-i<sup>2</sup>s-mo<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *στραβισμός*, a squinting, and *μέτρον*, a measure. An instrument for measuring the amount or degree of deviation from the normal position in a squinting eye. [F.]—**Galezowski's binocular s.** A s. consisting of a graduated horizontal bar, on which slide two needles which, when placed opposite the centres of the cornea, indicate by means of a scale on the bar the degree of deviation. The transverse bar is held on a level with the eyelids, the handle of the instrument upward and the fork of the bar against the root of the nose. [F.]—**Laurence's s.** A s. consisting of an ivory plate molded to the conformation of the lower lid, having a scale of lines and half-lines on its border. The plate is applied to the border of the lower lid of the squinting eye. [F.]

**STRABISMUS** (Lat.), n. m. Stra<sup>2</sup>b(stra<sup>2</sup>b)-i<sup>2</sup>z(i<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). Gr., *στραβισμός*. Fr., strabisme. Ger., S., Strabosität, Schielen. Squinting; an inability to bring the visual axes of both eyes to bear simultaneously on one point, the axis of vision of one eye always de-

viating in a certain direction from the object. It may be the result of over-action, or faulty insertion, weakness, or of paralysis of a muscle. [F.]—**Absolute latent s. divergens**. S. in which the latent divergence is present for all distances, though more marked for the near point. [F.]—**Apparent s.** Convergent or divergent s. in which neither eye moves when the other is closed; due to retinal incongruence. [a, 34.]—**Concomitant s.** S. in which the movements of the squinting eye accompany those of the normal one. When the affected eye is used for fixation, the associated deviation of the eye generally used for fixation is equal to the usual deviation of the squinting eye. [F.]—**Convergent s.** That variety of s. in which the one eye deviates inward toward the nose, so that its visual axis, when prolonged, crosses that of the other eye in front of the point of fixation. [F.]—**Divergent s.** S. in which one eye deviates outward toward the temple, so that the optic axes never meet, but continually diverge from one another if prolonged. [F.]—**Downward s.** See *S. deorsum vergens*.—**Dynamic s.** A tendency or inclination to convergence or divergence, which, under ordinary circumstances, is overcome in the interest of binocular single vision, but which can be detected by the help of vertically refracting prisms. [F.] See *INSUFFICIENCY of an ocular muscle* and *HETEROPHORIA*.—**External s.** See *Divergent s.*—**Intermittent s.** Of Noyes, s. in which there are periods during which the axes of the eyes are normal. [a, 34.]—**Internal s.** See *Convergent s.*—**Latent s. convergens**, **Latent s. divergens**. See *Dynamic s.*—**Monolateral s.** See *Unilateral s.*—**Paralytic s.** S. due to paralysis of an ocular muscle. It is distinguished from ordinary or concomitant s. by the fact that the deviation occurs only when the eye is turned in the direction in which the paralyzed muscle would turn the eye, and that this deviation, instead of being constant, increases more and more as the eye is turned in this direction. Later on, a further deviation occurs from spastic contracture of the antagonist of the paralyzed muscle. [B.]—**Periodic s.** S. observed in hypermetropia or myopia, occurring only when accommodation is made for near points, but not when fixation is made for distance. [B; a, 34.]—**Relative latent s. divergens**. Exophoria in which the latent divergence is only present in near vision, while for all other distances, even under the covering hand, the axes of the eyes are parallel. [F.]—**S. adnatus**. Congenital s.; rarely observed. [a, 34.]—**S. alternans**. Concomitant s. in which sometimes one eye deviates, sometimes the other. [a, 34.]—**S. convergens**. See *Convergent s.*—**S. convergens inconstans**, **S. convergens periodicus**. A periodic convergent s. [B.]—**S. convergens spasticus**. A form of periodic convergent squint so called from the sudden, spasmodic appearance of the deviation. [F.]—**S. deorsum vergens**. S. in which the squinting eye turns downward below the point of fixation of the other eye. [F.]—**S. divergens**, **S. externus**. See *Divergent s.*—**S. incongruens**. Of von Graefe, s. due to incongruity of the retina. [Stellwag (a, 34).]—**S. internus**. See *Convergent s.*—**S. muscularis**. S. due to muscular action. [a, 34.]—**S. necessarius**. Of Cullen, s. caused by some change in the form or tissues of the eye. [a, 34.]—**S. paralyticus**. See *Paralytic s.*—**S. periodicus**. See *Periodic s.*—**S. spasticus**. S. due to spastic contraction of an ocular muscle; occurring either as a symptom of epilepsy or other central nervous affection, or due to the contracture of the antagonist of a paralyzed muscle. [B.]—**S. supernus**, **S. sursumvergens**, **Upward s.** S. in which the squinting eye turns upward beyond the point of fixation of the other eye. [F.]—**Unilateral s.** S. in which the transfer of the squint from one eye to the other does not occur spontaneously, but is artificially induced by covering the eye ordinarily employed in fixation. [F.]

**STRABOMETER**, n. Stra<sup>2</sup>b-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *στραβός*, oblique, and *μέτρον*, a measure. Fr., strabomètre. Ger., S. See *STRABISMOMETER*.

**STRABOSITAS** (Lat.), n. f. Stra<sup>2</sup>b(stra<sup>2</sup>b)-o<sup>2</sup>s(os)/i<sup>2</sup>t-a<sup>2</sup>s(a<sup>2</sup>s). Gen., -at'is. From *στραβός*, oblique. See *STRABISMUS*.

**STRABOTOMY**, n. Stra<sup>2</sup>b-o<sup>2</sup>t/om-i<sup>2</sup>. From *στραβός*, oblique, and *τομή*, a cutting. Fr., strabotomie. Ger., Strabotomie. The operation for the cure of squint. It consists in dividing the conjunctiva over the line of insertion of the tendon of the contracted muscle, opening the sheath more or less extensively with scissors, passing a strabismus-hook beneath the tendon of the muscle, separating it from the underlying eyeball, and dividing it with scissors close to the line of implantation in the sclerotic. [F.]

**STRAFF** (Ger.), adj. Stra<sup>2</sup>f. Stretched, extended; in botany, strict. [L, 31; a, 35.]

**STRAGULA** (Lat.), **STRAGULUM** (Lat.), n's f. and n. Stra<sup>2</sup>g-(stra<sup>2</sup>g'u<sup>2</sup>l(u<sup>2</sup>l)-a<sup>2</sup>, -u<sup>2</sup>m(u<sup>2</sup>l'm). From *sternere*, to spread out. Fr., stragule. A glumella. [a, 35.]

**STRAHL** (Ger.), n. Stra<sup>2</sup>l. See *RAY* (1st def.), *BARBULE* (2d def.), and *FROG* (2d def.).—**Flossens'**. See *Fin-ray*.—**Kleinhauts'en**. See *Branchiostegal bones*.—**Marks'**. See *Medullary ray*.—**Marks'en der Nieren**. See *Medullary radii*.—**S'enbrechung**. See *REFRACTION*.—**S'enbündel** [Frommann]. A bundle of interlacing nerve-fibres in the posterior columns of the cord in the vicinity of the sensory nerve-roots. [I, 6 (K).]—**S'enkörper**. See *Ciliary body*.—**S'enpizil**. See *ACTINOMYCES*.—**S'en-somme**. See *CORONA radiata*.

**STRAHLEND** (Ger.), adj. Stra<sup>2</sup>l'e<sup>2</sup>nd. See *RADIATE* (2d def.) and *RADIATIFORM*.

**STRAHLUNG** (Ger.), n. Stra<sup>2</sup>l/un<sup>2</sup>. See *RADIATION*.—**Marks'**, **Periphereische S.** [Tiedemann]. See *CORONA radiata* (2d def.).—**S. des Balkens**. Those fibres at the extremities of the corpus callosum which are prolonged into the cerebral lobes. [K.]—**S. des hinteren Längsbündels**. The radiation of the posterior longitudinal fibres of the tegmentum into the cortex cerebri. [K.]

**STRAIN**, n. Stran. From *stringere*, to draw tight. The action or effect of bringing to bear on a structure an amount of force sufficient to endanger or impair its integrity, or of throwing on an

organ too great or too long—continued an amount of work.—**Cardiac s.** Cardiac irritability due to severe or protracted exercise or labor. [a. 34.]

**STRAIT**, n. *Strat.* Gr., στενωπία. Lat., angustia. Fr., détroit. Ger., Enge. A contracted passage. [a. 48.]—**Inferior s. of the pelvis.** Fr., détroit inférieur du bassin. The lower contracted portion of the pelvic canal; bounded in front by the lower extremity of the symphysis pubis, behind by the tip of the coccyx, and on each side by the lower border of the ischium.—**Superior s. of the pelvis.** Fr., détroit supérieur du bassin. The brim, or inlet, of the pelvis; the upper boundary of the true pelvis.

**STRAMOINE** (Fr.), n. *Strat*<sup>m</sup>-mwa<sup>n</sup>. See STRAMONIUM; of the Fr. Cod., see *Datura stramonium*.—**Alcoolature de s.** See *Tinctura stramonii ex herba recente*.—**Cigarettes de s.** See *Cigarettes stramonii*.—**Emplâtre d'extrait de s.** [Fr. Cod.]. A plaster consisting of 18 parts of extract of stramonium-seeds, 2 of purified elemi, and 4 of compound lead plaster. [B. 95 (a. 38).]—**Extrait de s. (feuille).** See *Extractum stramonii*.—**Huile de s.** See *Oleum stramonii*.—**Poudre de s.** Stramonium-leaves dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.]; or sifted through a 1,600-mesh sieve [Russ. Ph.] (leaving one quarter residue [Swed. Ph.]). [B. 95 (a. 38).]—**Sirap de s.** [Fr. Cod.]. A mixture of 3 parts of tincture of stramonium-leaves and 37 of syrup. [B. 95 (a. 38).] Cf. *Sirap de Datura*.—**S. (semence).** See STRAMONIUM-seed.—**Teinture de s.** See *Tinctura stramonii* (1st def.).

**STRAMONIN**, n. *Strat*<sup>m</sup>-o<sup>n</sup>-i<sup>n</sup>. Fr., stramoine. Ger., S. A substance obtained from *Datura stramonium*; occurring as small white crystals. [B. 270 (a. 38).]

**STRAMONIUM** (Lat.), n. n. *Strat*<sup>m</sup>(*strat*<sup>m</sup>)-on<sup>i</sup>-u<sup>m</sup>(*u*<sup>m</sup>). Fr., stramoine, pomme épineuse (3d def.). Ger., Dornapfel (3d def.). *Stechapfel* (3d def.). 1. Of Tournefort, the genus *Datura*. 2. Of Baillon, a section of *Datura*. 3. The *Datura* s. (see *S-leaves* and *S-seed*). 4. Of the Austr. Ph., Hung. Ph., and Netherl. Ph., s-leaves. [a. 35.]—**Candelæ stramonii.** Candles designed for the administration of s. by inhalation, made of 150 parts of pulverized s-leaves, 70 of potassium nitrate, and 3 of balsam of Peru. [B. 270.]—**Cigarettes stramonii** [Belg. Ph.], **Cigarettes stramonii**. Fr., cigarettes de stramoine [Fr. Cod.]. Cigarettes containing each 1 gramme of the leaves of s. [B. 95 (a. 38).]—**Cigarettes stramonii composites.** Sp., cigarros de estramonio compuestos [Sp. Ph.]. Cigarettes containing each 1 gramme of a mixture of 3 grammes of the leaves of s. and 1 gramme each of the leaves of belladonna and *Tussilago farfara*. [B. 95 (a. 38).]—**Emplastrum stramonii** [Belg. Ph.]. A plaster consisting of 14 parts of Burgundy-pitch plaster, 2 of oil of s., and 4 of extract of s-leaves. [B. 95 (a. 38).]—**Extractum stramonii**. Fr., extrait de stramoine. Ger., Stechapfelsamenextrakt. An extract made from the seeds [U. S. Ph., Br. Ph., Finn. Ph.] of s., or from the leaves [Ger. Ph. (1st ed.)], Belg. Ph., Dan. Ph., Gr. Ph., Swiss Ph.], or from either [Russ. Ph., Netherl. Ph., Fr. Cod.]. [B. 95.]—**Extractum stramonii alcoholicum.** An alcoholic extract made from the dried leaves of s. [B. 119 (a. 38).]—**Extractum stramonii fluidum** [U. S. Ph.]. An extract made by treating 100 grammes of s-seed in No. 40 powder with a mixture of 3 parts of alcohol and 1 part of water in a percolator till exhausted, reserving 90 c. c., evaporating the rest to a soft extract, mixing the two, and bringing up to 100 with the menstruum. [B. 95 (a. 38).]—**Extractum stramonii foliorum.** Extract of s-leaves. [B. 95.]—**Extractum stramonii seminis (seu seminum).** Extract of s-seeds. [B. 95.]—**Extractum stramonii spirituosum** [Netherl. Ph.]. Alcoholic extract of s-leaves. [B. 95.]—**Folia stramonii.** See *S-leaves*.—**Fotus stramonii.** Sp., fomentación de estramonio. A poultice made by boiling 35 parts of s-leaves in water enough to make 1,000 [Belg. Ph. (1st ed.)]; or by treating 15 parts of s-leaves with 520 of water [Sp. Ph.]. [B. 95 (a. 38).]—**Herbastramonii.** See *S-leaves*.—**Infusum stramonii** [Russ. Ph.]. An infusion made by boiling 18 parts of s-leaves five minutes in water enough to make 3,000. [B. 95 (a. 38).]—**Oleum stramonii.** Fr., huile de datura. Sp., aceite de estramonio [Sp. Ph.]. A preparation made by boiling s-leaves with twice as much olive-oil until the moisture is dissipated, expressing, and filtering. [B. 95 (a. 38).]—**Oleum stramonii compositum.** Sp., aceite de estramonio compuesto [Sp. Ph.]. A preparation made by boiling 115 parts each of the leaves of hyoscyamus, tobacco, *Solanum nigrum*, and s., and 230 each of belladonna and poppy leaves, with 1,725 of olive-oil until the moisture is dissipated, expressing, adding 29 parts each of the flowering tops of wormwood, *Balsamita succulea*, hypericum, hyssop, lavender, sweet marjoram, crisped mint, rosemary, rue, sage, and thyme, and of elder-flowers, digesting for four days, straining, expressing, and, when settled, filtering. [B. 95 (a. 38).] See also **BALSAMUM tramquillans**.—**Semen (seu semina) stramonii.** See *S-seed*.—**S. fatidum.** The *Datura* s. [a. 35.]—**S-leaves.** Lat., *stramonii folia* [U. S. Ph., Br. Ph.], *folia stramonii* [Ger. Ph.], *herba stramonii*, Fr., feuilles de stramoine [Fr. Cod.]. Ger., Stechapfelblätter, Stechnussblätter, Dornapfelblätter. Thorn-apple-leaves; the leaves of *Datura* s. [a. 35.]—**S-seed.** Lat., *stramonii semen* [U. S. Ph. (seu semina) [Br. Ph.], *semen stramonii* [Ger. Ph.], *s. semina* [Hung. Ph. (1st def.)], Netherl. Ph.], Fr., semence (ou graines) de stramoine, stramoine (semence) [Fr. Cod.]. Ger., Tolkörner, Stechapfelsamen, Igelkolbensamen, Nagelbänsamen. The seeds of *Datura* s. [a. 35.]—**S. spinosum, S. vulgare, S. vulgatum.** The *Datura* s. [a. 35.]—**Tinctura seminis stramonii.** See *Tinctura stramonii* (2d def.).—**Tinctura stramonii.** Fr., teinture de stramoine [Fr. Cod.] (1st def.). Ger., Stechapfelsamentinktur. 1. A tincture made by macerating s-leaves with five times as much 60-per-cent. alcohol for three days [Belg. Ph.] (ten days [Fr. Cod.]). 2. Of the U. S. Ph., Br. Ph., Ger. Ph. (1st ed.), Dan. Ph., Swiss Ph., Hung. Ph. (1st ed.), and Swed. Ph., a tincture made from powdered s-seed by treating in a percolator with alcohol of sp. gr. 0.928 [U. S. Ph.], 0.920 [Br. Ph.], or by macerating or digesting it for some days with from five to ten times as much dilute alcohol. [B. 95 (a. 38).]—**Tinctura stramonii**

*ætherea.* Fr., teinture éthérée de datura. A preparation made by treating s-seed with four times as much ether for a week, and filtering. [B. 119 (a. 38).]—**Tinctura stramonii ex herba recente.** Fr., alcoolature de stramoine. A preparation made by macerating fresh s-leaves with an equal amount of 90-per-cent. alcohol for ten days [Fr. Cod.] of 92-per-cent. alcohol for three days [Belg. Ph.], expressing, and filtering. [B. 95 (a. 38).]—**Tinctura stramonii seminum.** See *Tinctura stramonii* (2d def.).—**Unguentum stramonii** [U. S. Ph.]. An ointment made by boiling 60 parts of s-leaves with 168 of lard till the moisture is consumed, expressing, and adding 2 parts of yellow wax for each 12 of the mixture. [B. 119 (a. 38).]—**Vinum stramonii.** A preparation made by treating 6 parts of s-seed with 24 of Malaga wine and 3 of alcohol for some days, and filtering. [B. 119 (a. 38).]

**STRANG** (Ger.), n. *Strat*<sup>n</sup>. A cord. [a. 17.]—**Burdach-scher S.** See *Cuneate Funiculus*.—**Follicularstränge.** See *Lymphoid Cords*.—**Goll'scher Keils, Goll'scher S.** See *Column of Goll*.—**Grenzs.** See *Great ganglionic cord*.—**Harnstränge.** See *Superior false ligaments of the urinary bladder*.—**Hinterer Rückenmarks, Hinterer weisser S., Hinters.** See *Posterior white column*.—**Hülsenstränge.** See *Funiculi siliquæ*.—**Keils.** See *Cuneate Funiculus*.—**Knorpels.** A cartilaginous cord (e. g., the notochord).—**Markstränge.** See *Lymphoid Cords*.—**Medialer Keils, Medialer S.** See *Cuneate Funiculus*.—**Olivenkerns.** See *Fasciculus nuclei olive*.—**Quintusstränge.** Of Meynert, groups of nerve-fibres which arise from the trigeminal nuclei and run downward through the medulla. [I (K).]—**Rückenmarkseitens.** See *Lateral column*.—**Rückenmarksstränge.** See *Columns of the spinal cord*.—**Rückens.** See *Spinal cord*.—**Runder S.** See *Restiform body*.—**Samens.** See *Spermatic cord*.—**Segmentalstränge.** See *Tubuliferous tissue*.—**Seitens, Seitlicher S.** See *Lateral column*.—**Vorderstränge.** See *Anterior columns of the spinal cord*.—**Zarter S.** See *Column of Goll*.

**STRANGALIS** (Lat.), n. f. *Strat*<sup>n</sup>g(*strat*<sup>n</sup>g)-a<sup>l</sup>(a<sup>l</sup>)-i<sup>s</sup>. Gr., στραγγαλις. An induration, especially in a woman's breast.

**STRANGLES**, n. *Strat*<sup>n</sup>g's. Ger., Strangel, Streng. In the horse, a febrile disease generally attacking young animals and terminating in the formation of an abscess or abscesses in the areolar tissue of the submaxillary space. The symptoms of choking give rise to this name. [a. 34.]—**Bastard s.** An acute suppurative inflammation of the lymphatics of the submaxillary region and sometimes of the salivary glands, with a tendency to suppurative inflammation of the lymphatic system of other parts. [a. 34.]

**STRANGULATE**, adj. *Strat*<sup>n</sup>g'u<sup>l</sup>-at. In botany, irregularly contracted and expanded. [a. 35.]

**STRANGULATED**, adj. *Strat*<sup>n</sup>g'u<sup>l</sup>-at-e<sup>d</sup>. Fr., strangulé. Ger., strangulirt. In a state of strangulation.

**STRANGULATIO** (Lat.), n. f. *Strat*<sup>n</sup>g(*strat*<sup>n</sup>g)-u<sup>l</sup>(u<sup>l</sup>)-a-(a<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., -on'i. See **STRANGULATION**.—**S. uteri.** An old term for hysteria. [A. 42.]

**STRANGULATION**, n. *Strat*<sup>n</sup>g-u<sup>l</sup>-a'shu<sup>n</sup>. Gr., στρυγμός (1st def.), νίξ (2d def.). Lat., *strangulatio* (from *strangulare*, to choke), *strangulismus*. Fr., s., étranglement. Ger., Erdrückung. 1. The act of choking; the state of being asphyxiated by choking. 2. A constriction; the state of being constricted so as to endanger the life of the part shut off by the stricture. [E.]—**Internal s.** Interference with the normal functions of an organ or part by means of mechanical pressure, e. g., such as may be brought to bear in twists of the intestines and by twisting the pedicle of a tumor. [D. 47.]—**Intrasaccular s.** Fr., étranglement intrasacculaire. S. of a hernia by a constriction situated within the sac.

**STRANGURIA** (Lat.), n. f. *Strat*<sup>n</sup>g(*strat*<sup>n</sup>g)-u<sup>r</sup>(ur)-i<sup>a</sup>. See **STRANGURY**.—**S. cruenta.** See **CYSTORRHAGIA**.

**STRANGURY**, n. *Strat*<sup>n</sup>g'u<sup>r</sup>-i<sup>s</sup>. Gr., στραγγουρία (from *στράγγε*, a drop, and *οὐρον*, urine). Lat., *stranguria*. Fr., strangurie. Ger., Harnbeschwerde, Harnzwang, Strangurie. Urination by painful, spasmodic effort. [a. 48.]

**STRAPPER**, n. *Strat*<sup>p</sup>-u<sup>r</sup>. An apparatus for binding up a part by means of strips of flexible material. [a. 48.]—**Miliano's ready s.** A suspensory bandage of webbing fitted with tapes for drawing it tightly around the scrotum. [E.]

**STRAPPING**, n. *Strat*<sup>p</sup>-i<sup>n</sup>. 1. The process of applying straps; specifically, that of subjecting a part to compression or giving it support by the methodical application of strips of adhesive plaster. 2. Strips of adhesive plaster, also any material for use as straps.

**STRATHPEFER**, n. *Strat*<sup>h</sup>-pe<sup>2</sup>f-u<sup>r</sup>. A place in Ross-shire, Scotland, where there is a chalybeate and sulphurous spring. [L. 49, 57 (a. 14).]

**STRATIFICATION**, n. *Strat*<sup>t</sup>-i<sup>2</sup>-ka'shu<sup>n</sup>. From *stratum*, a layer, and *facere*, to make. The condition of being stratified; the arrangement of the elements of a body in layers. [a. 35.]

**STRATIOTES** (Lat.), n. m. *Strat*<sup>t</sup>(*strat*<sup>t</sup>)-i<sup>2</sup>-ot'e<sup>2</sup>as. Gen., -ot'u. Gr., στρατιώτης. Fr., stratiote. Ger., Wasserfeder, Wasserhecher, Krebshecher. Water-soldier; a genus of the *Stratiotæ*, or *Stratiotidæ* (a tribe of the *Hydrocharitæ*). [a. 35.]—**S. aloides.** Fr., s. à feuilles d'aloès. Water-horseleek (or aloe, or soldier, or sengreen), knight's pondwort, soldiers' yarrow, wading pondweed; used by the ancients in erysipelas and as a vulnerary. The leaves are emollient and refrigerant, and in India are applied to hæmorrhoids. [a. 35.]

**STRATUM** (Lat.), n. n. *Strat*<sup>t</sup>(*strat*<sup>t</sup>)-u<sup>m</sup>(u<sup>m</sup>). From *sternere*, to spread out. Fr., strate, couche. Ger., S., Schicht. See **LAYER** (1st def.).—**External molecular s.** A thin layer of fibrillar, with intervening granular matter, connected with the lateral branches of Müller's fibres. [L. 31, 332, 352.]—**Flesh-s.** See **PARIETAL MESOBLAST**.—**Granular s.** See *S. granulosum*.—**Intermediate s. of**

the blastoderm. See MESOBLAST (1st def.).—**Interolivary s.** Of Spitzka, a tract of fibres which extends between the internal accessory olivary body, the rhaphé, and the pyramidal tract; surmised by him to be continuous with the columns of Goll and Burdach in the spinal cord. ["Med. Record," Oct. 18, 1884, p. 421 (K).]—**Kernels** (Ger.). See *S. granulosum*.—**Ligamenti sacrococcygei postici longi s. profundum** [Barkow]. See LIGAMENTUM SACROCOCYGEUM POSTICUM.—**Ligamentum sacrococcygei postici longi s. superficiale**. See LIGAMENTUM SACROCOCYGEUM POSTICUM SUPERFICIALE.—**Ligneous s.** Lat., *s. ligneum*. Fr., *couche ligneuse*. One of the layers (observed on cross-section of the trunk of a tree as annual rings) forming the woody, solid portion of a dicotyledonous plant. [a, 35.]—**Medullary s.** Lat., *s. medullare*. Ger., *Markschicht*. In the stratified thallus of lichens, a colorless layer developed upon the hypothallus. It consists sometimes of simple or branched filaments, sometimes of molecular granulations intermixed with crystals of lime, and sometimes of variously shaped tissues containing gonidia. [a, 35.]—**Mucous s.** See HYPOBLAST (1st def.), LAMELLA MUCOSA, and RETE MUCOSUM.—**Serous s.**, **Skin-s.** See EPIDERMIS.—**S. adiposum**. A layer of subcutaneous tissue containing fat. [L, 351.]—**S. arymembranosum**. See THYREO-ARYTENOIDES SUPERIOR MEDIALIS.—**S. arysyndesmicum**. See SYNDESMO-ARYTENOIDES.—**S. bacillatum retine**. See BACILLARY LAYER OF THE RETINA.—**S. bacillorum**. See BACILLARY LAYER.—**S. basale**. See under *S. corneum* (epidermidis).—**S. Bowmani**. 1. See BOWMAN'S LAYER.—**S. cellularum pyramidalium**. 1. See CLAUSTRAL FORMATION. 2. The fifth (according to some, the sixth) layer of the hippocampus major, made up of pyramidal ganglion cells. [L, 332.]—**S. cellulosum (placentae)**. The cellular layer of the maternal placenta, as distinguished from the s. spongiosum.—**S. cellulosum of the cochlea**. The cellular layer found in the spiral canal of the cochlea, which brings about the connection of the nerve-bundles entering the cochlea with those in the lamina spiralis. [F, 32.]—**Strata cerebelli primaria**. The principal laminae, or folia, of the cerebellum. [I, 3 (K).]—**Strata cerebelli secundaria** [Gordon]. The secondary laminae of the cerebellum. [I, 3 (K).]—**S. cerebelli tertiaria** [Gordon]. One of the smaller subdivisions of the cerebellar laminae. [I, 3 (K).]—**S. choriocapillare**. See CHORIOCAPILLARIS.—**S. ciliare**. The portion of the orbicularis palpebrarum that is situated along the margin of the lid. [L, 332.]—**S. cinereum**. The second layer of gray matter in the anterior corpora quadrigemina, sometimes described as the nucleus. It is composed largely of neuroglia, containing numbers of small ganglion cells. [I, 17 (K).]—**S. complexum et profundum pontis**. Of Edinger, those fibres from the pes that dip in between the fibres of the crusts. [a, 34.]—**S. complexum pontis**. See *S. superficiale pontis*.—**S. conjunctivum extra peritoneum**. The continuation of the peritoneum in the region of the uterus. [L, 115 (a, 50).]—**S. convolutum**. An important layer of large pyramidal cells seen in a section through the hippocampus major. It is prolonged into the pes hippocampi, its free border forming the point of the uncus. [I, 11 (K).]—**S. corneum (epidermidis)**. Fr., *couche corne* (ou corneenne). Ger., *eigentliche Epidermis*, *Hornschicht*. The true epidermis; the corneous or most superficial layer of the epidermis, consisting of transparent flattened cells, closely packed together and devoid both of nuclei and of granules. Unna divided the s. corneum into four layers, according to their different color reactions under perosmic acid, etc. They are the (1) superficial (Ger., *Endschicht*), (2) middle, (3) superficial basement (*s. superbasale*), and (4) basement (*s. basale*) layers. The fourth, the s. lucidum of Oehl, is subdivided into two layers, the first of which is the thicker and denser. [G.]—**S. corticale**. 1. See Cerebral cortex. 2. Any one of the layers of the bark of plants. 3. In a stratified thallus, a layer of pseudo-parenchyma forming the upper surface in crustaceous lichens, the upper and lower surfaces in some foliaceous lichens, or the entire external surface in filamentose and fruticulose lichens. [a, 35.]—**S. cutaneum**. The external dermic layer of the membrana tympani. [L.]—**S. cylindricum**. Ger., *Cylinderschicht*. The layer of columnar cells in the rete mucosum next the corium. [J.]—**S. cylindrorum**. See BACILLARY LAYER OF THE RETINA.—**S. dentatum**. See *S. spinosum*.—**S. epitrichiale** [Kerbert]. The special outer or ectal layer of the embryonic epidermis in vertebrates; a kind of envelope inclosing the whole body, and not supposed to take part in the formation of appendages, except, perhaps, feathers. In some animals it is composed of from two to five layers of cells; typically, however, it is supposed to consist of a single layer of very large polygonal cells. In birds and mammals it is shed before or after birth, and is never renewed. In animals which molt it is renewed after birth and is present throughout life. [J, 23; Kerbert, "Arch. f. mikr. Anat.," Bd. xlii, p. 205; Jeffries, "Proc. of the Bost. Soc. of Nat. Hist.," xxii, p. 208; Minot, "Proc. of the Am. Assoc. for the Adv. of Sci.," xxxv, 1885 (J).]—**S. externum orbicularis criss**. The subcutaneous portion of the orbicularis oris. [L.]—**S. externum ovuli Graafiani**. See THECA FOLLICULI.—**S. fibrillose**. Ger., *Nervenfaserschicht*, *Opticusfaserschicht*. The innermost s. of the retina, made up of fibres of the optic nerve consisting of axis-cylinders only. [L.]—**S. gangliosum (retinae)**. A layer of multipolar, nucleated ganglion cells external to the expansion of the optic nerve. [L, 31, 142, 332.]—**S. gelatinosum**. The fourth layer in the olfactory bulb, consisting of large ganglion-cells with branching processes. [I, 17 (K).]—**S. germinativum**. See GERMINAL SPOT.—**S. globulosum retinae**. See *S. gangliosum*.—**S. glomerulosum**. Fr., *zone de papilles*. Ger., *Knäuelschicht*. The second layer of the olfactory lobe, counting from the ventral side. It is between the s. olfactorium and the s. gelatinosum, and is characterized by the olfactory glomeruli (see GLOMERULI OF OLFACTORIUM). [J, 10, 30, 35.]—**S. gonimideum**. Ger., *Brutschicht*. In lichens, a greenish s. situated immediately beneath the cortical s. and consisting of gonidial granules (gonidia). [a, 35.]—**S. granulosum**. Fr., *couche rouillee*. Ger., *Körnerschicht*, *Zellenschicht*, *Zellenzone*, *Kernels*, *rostfarbene Schicht*. A layer of very small cells or of cells containing many granules, such as (1) the layer of minute cells in the cerebellum between the cells of Purkinje and the medullary substance; (2) a layer of minute ganglion-cells imbedded in a mass of medullated nerve-fibres, found in the olfactory lobe between the medullary ring and the s. gelatinosum; (3) the s. of small cells in the cerebral cortex between the formation of the cornu Ammonis and the claustral formation; (4) the s. granulosum epidermidis. [J, 10, 31, 35.]—**S. granulosum epidermidis**. Ger., *Körnerschicht*, *Zellenschicht*. A layer of lozenge-shaped or trapezoid-shaped cells containing numerous coarse roundish granules of eleidin that strongly refract light and render the epidermis more or less opaque. It covers the rete mucosum, and is itself covered by the s. lucidum. [J.]—**S. granulosum (retinae) externum**. Ger., *äussere Körnerschicht*, *Schicht der Nervenaustritte*. A layer of several strata of oval nuclei contained in a reticulated matrix immediately internal to the membrana limitans externa, which have processes connected with a retinal rod or cone. [L, 31, 332, 351.]—**S. granulosum (retinae) internum**. See INTERNAL GRANULE LAYER.—**S. horizontale**. That portion of the arcolar fibres which covers the surface of the anterior pyramids immediately adjacent to the anterior median fissure. [I, 6 (K).]—**S. horizontale superius**. See *S. musculare superius urethrae*.—**S. inferius constrictoris urethrae**. See GUTHRIE'S MUSCLE.—**S. intermedium**. Ger., *Zwischenschicht* (1st def.). 1. Of Meynert, a band of nerve-fibres in the substantia nigra. \* [I, 17 (K).] 2. The mesoderm. 3. See *S. lucidum*.—**S. intermedium pedunculii**. See *S. intermedium* (1st def.).—**S. intermedium thalami**. One of the subdivisions of the subthalamic regions. [L.]—**S. internum circulare**. See *S. musculare circulare urethrae*.—**S. internum orbicularis oris**. The deep portion of the orbicularis oris. [L.]—**S. laciniosum**, **S. lacunosum** [Meynert]. A layer of loose nerve-fibres and lymph-spaces seen in a section made through the hippocampus major, continuous with the s. radiatum. [I, 28 (K).]—**S. lemnisci (tegimenti)**. See INFERIOR LEMNISCUS.—**S. ligneum**. See Ligneous s.—**S. lucidum**. Of Oehl, a translucent layer of the epidermis, consisting of from four to six layers of clear transparent cells, with indefinite outlines and traces of a nucleus. It forms the deeper portion of the s. corneum proper, and separates it from the s. granulosum. [G; J, 80, 81, 32.]—**S. malpighianum**, **S. Malpighii**. See RETE MUCOSUM.—**S. marginale** [Meynert]. A thin medullary lamina of nerve-substance on the upper free surface of the fascia dentata. [I, 17 (K).]—**S. medianum** [Arnold]. A layer of nerve-fibres which pass horizontally through the spinal cord, connecting the anterior and posterior extremities of the arcolar fibres. [I, 6 (K).]—**S. medianum horizontale**. See *S. horizontale*.—**S. medianum horizontale pontis Varolii**. The rhaphé of the pons Varolii. [L.]—**S. medium cutis**. See CORIUM (1st def.).—**S. medullare**. See Medullary s., *S. fibrosum*, and *S. olfactorium*.—**S. medullare medium**. See *S. lacunosum*.—**S. moleculare**. Ger., *zellenfreier Rindensaum* (3d def.). 1. Any layer appearing to be composed of minute granules without definite structure. 2. A thin layer of finely reticulated neuroglia, devoid of nerve-cells, between the s. lacunosum and the superficial medullary lamina in the hippocampus major. [J, 10, 35.] 3. The second layer of the cerebral cortex, consisting mainly of neuroglia and fine nerve-fibres, with but few ganglion-cells. [I, 17 (K).]—**S. mortification** [Weed]. The outermost layer of epidermis, consisting of the flat, dead epithelia. [L, 31.]—**S. mucosum (epidermidis)**. See RETE MUCOSUM.—**S. musculare circulare urethrae**. Muscular fibres beneath the constrictor urethrae, surrounding the membranous portion of the urethra. [L, 142, 332.]—**S. musculare linguae longitudinale**. See LINGUALIS inferior.—**S. musculare linguae perpendiculare**. Vertical muscular fibres in the tongue. [L, 332.]—**S. musculare linguae transversum**. See TRANSVERSUS linguae.—**S. musculare transversum urethrae inferius**. See TRANSVERSUS perinaei profundus.—**S. musculare urethrae** (see TRANSVERSUS) superius. Muscular fibres embracing the prostate, continuous with the s. musculare circulare urethrae. [L, 332.]—**S. nigrum**. See LOCUS niger.—**S. of Oehl**. See *S. lucidum*.—**S. of Remak**. A narrow layer of medullated nerve-fibres just beneath the first layer of the cortex cerebri. [J, 1 (K).]—**S. of visual cells**. A retinal layer, subdivided into the bacillary layer, the membrana limitans externa, and the internal granule layer. [L, 31.]—**S. olfactorium**. Ger., *Nervensfaserschicht*. The ventral layer of the olfactory bulb, consisting of olfactory nerve-fibres. [L, 332.]—**S. opticum**. The third layer of fine nerve-fibres in the corpora quadrigemina. [I, 17 (K).]—**S. orbitale**. See ORBICULARIS oculi, *pars orbitalis*.—**S. oriens**. Scattered fusiform cells that are representations of the cells of the fifth layer of the cerebral cortex, forming, according to Obersteiner, the sixth layer of the cornu Ammonis. [a, 34.]—**S. palpebrale**. See ORBICULARIS oculi, *pars palpebralis*.—**S. profundum pontis**. Deep transverse fibres of the pons Varolii. [L.]—**S. proligerum**. Fr., *couche prolifère*. 1. The discus proligerus, including the cumulus proligerus. [A, 45.] 2. See MEMBRANA granulosa.—**S. radiatum**. Of Kupfer, one of the deep layers of the hippocampus major, consisting of radiating nerve-fibres. [I, 28 (K).]—**S. reticulare**. See RETICULAR FORMATION.—**S. reticulare cutis**. See CORIUM (1st def.) and cf. RETICULAR LAYER OF THE CORIUM.—**S. reticulatum**. See RETICULAR FORMATION.—**S. semilunare (cochleae)**. See LIGAMENTUM spirale.—**S. spinosum**. Ger., *Stachelschicht*. A layer of prickle-cells. [J.]—**S. spinosum epidermidis**. The rete mucosum, especially the portion of it made up of prickle cells. [L.]—**S. spongiosum (placentae)**. The spongy layer of the maternal placenta.—**S. striatum**. A layer of nerve-fibres forming the inner lamina of the hippocampal gyrus. [J, 6 (K).]—**S. subpapillare**. See *S. vasculosum cutis*.—**S. subthalamium**. See SUBTHALAMIC REGION.—**S. superbasale**. See under *S. corneum*.—**S. superficiale pontis**. Ger., *oberflächliche Brückenfasern*. Transverse bundles of fibres upon the ventral surface of the pons Varolii. [L.]—**S. superius constrictoris urethrae**. See

**Schicht**. A layer of very small cells or of cells containing many granules, such as (1) the layer of minute cells in the cerebellum between the cells of Purkinje and the medullary substance; (2) a layer of minute ganglion-cells imbedded in a mass of medullated nerve-fibres, found in the olfactory lobe between the medullary ring and the s. gelatinosum; (3) the s. of small cells in the cerebral cortex between the formation of the cornu Ammonis and the claustral formation; (4) the s. granulosum epidermidis. [J, 10, 31, 35.]—**S. granulosum epidermidis**. Ger., *Körnerschicht*, *Zellenschicht*. A layer of lozenge-shaped or trapezoid-shaped cells containing numerous coarse roundish granules of eleidin that strongly refract light and render the epidermis more or less opaque. It covers the rete mucosum, and is itself covered by the s. lucidum. [J.]—**S. granulosum (retinae) externum**. Ger., *äussere Körnerschicht*, *Schicht der Nervenaustritte*. A layer of several strata of oval nuclei contained in a reticulated matrix immediately internal to the membrana limitans externa, which have processes connected with a retinal rod or cone. [L, 31, 332, 351.]—**S. granulosum (retinae) internum**. See INTERNAL GRANULE LAYER.—**S. horizontale**. That portion of the arcolar fibres which covers the surface of the anterior pyramids immediately adjacent to the anterior median fissure. [I, 6 (K).]—**S. horizontale superius**. See *S. musculare superius urethrae*.—**S. inferius constrictoris urethrae**. See GUTHRIE'S MUSCLE.—**S. intermedium**. Ger., *Zwischenschicht* (1st def.). 1. Of Meynert, a band of nerve-fibres in the substantia nigra. \* [I, 17 (K).] 2. The mesoderm. 3. See *S. lucidum*.—**S. intermedium pedunculii**. See *S. intermedium* (1st def.).—**S. intermedium thalami**. One of the subdivisions of the subthalamic regions. [L.]—**S. internum circulare**. See *S. musculare circulare urethrae*.—**S. internum orbicularis oris**. The deep portion of the orbicularis oris. [L.]—**S. laciniosum**, **S. lacunosum** [Meynert]. A layer of loose nerve-fibres and lymph-spaces seen in a section made through the hippocampus major, continuous with the s. radiatum. [I, 28 (K).]—**S. lemnisci (tegimenti)**. See INFERIOR LEMNISCUS.—**S. ligneum**. See Ligneous s.—**S. lucidum**. Of Oehl, a translucent layer of the epidermis, consisting of from four to six layers of clear transparent cells, with indefinite outlines and traces of a nucleus. It forms the deeper portion of the s. corneum proper, and separates it from the s. granulosum. [G; J, 80, 81, 32.]—**S. malpighianum**, **S. Malpighii**. See RETE MUCOSUM.—**S. marginale** [Meynert]. A thin medullary lamina of nerve-substance on the upper free surface of the fascia dentata. [I, 17 (K).]—**S. medianum** [Arnold]. A layer of nerve-fibres which pass horizontally through the spinal cord, connecting the anterior and posterior extremities of the arcolar fibres. [I, 6 (K).]—**S. medianum horizontale**. See *S. horizontale*.—**S. medianum horizontale pontis Varolii**. The rhaphé of the pons Varolii. [L.]—**S. medium cutis**. See CORIUM (1st def.).—**S. medullare**. See Medullary s., *S. fibrosum*, and *S. olfactorium*.—**S. medullare medium**. See *S. lacunosum*.—**S. moleculare**. Ger., *zellenfreier Rindensaum* (3d def.). 1. Any layer appearing to be composed of minute granules without definite structure. 2. A thin layer of finely reticulated neuroglia, devoid of nerve-cells, between the s. lacunosum and the superficial medullary lamina in the hippocampus major. [J, 10, 35.] 3. The second layer of the cerebral cortex, consisting mainly of neuroglia and fine nerve-fibres, with but few ganglion-cells. [I, 17 (K).]—**S. mortification** [Weed]. The outermost layer of epidermis, consisting of the flat, dead epithelia. [L, 31.]—**S. mucosum (epidermidis)**. See RETE MUCOSUM.—**S. musculare circulare urethrae**. Muscular fibres beneath the constrictor urethrae, surrounding the membranous portion of the urethra. [L, 142, 332.]—**S. musculare linguae longitudinale**. See LINGUALIS inferior.—**S. musculare linguae perpendiculare**. Vertical muscular fibres in the tongue. [L, 332.]—**S. musculare linguae transversum**. See TRANSVERSUS linguae.—**S. musculare transversum urethrae inferius**. See TRANSVERSUS perinaei profundus.—**S. musculare urethrae** (see TRANSVERSUS) superius. Muscular fibres embracing the prostate, continuous with the s. musculare circulare urethrae. [L, 332.]—**S. nigrum**. See LOCUS niger.—**S. of Oehl**. See *S. lucidum*.—**S. of Remak**. A narrow layer of medullated nerve-fibres just beneath the first layer of the cortex cerebri. [J, 1 (K).]—**S. of visual cells**. A retinal layer, subdivided into the bacillary layer, the membrana limitans externa, and the internal granule layer. [L, 31.]—**S. olfactorium**. Ger., *Nervensfaserschicht*. The ventral layer of the olfactory bulb, consisting of olfactory nerve-fibres. [L, 332.]—**S. opticum**. The third layer of fine nerve-fibres in the corpora quadrigemina. [I, 17 (K).]—**S. orbitale**. See ORBICULARIS oculi, *pars orbitalis*.—**S. oriens**. Scattered fusiform cells that are representations of the cells of the fifth layer of the cerebral cortex, forming, according to Obersteiner, the sixth layer of the cornu Ammonis. [a, 34.]—**S. palpebrale**. See ORBICULARIS oculi, *pars palpebralis*.—**S. profundum pontis**. Deep transverse fibres of the pons Varolii. [L.]—**S. proligerum**. Fr., *couche prolifère*. 1. The discus proligerus, including the cumulus proligerus. [A, 45.] 2. See MEMBRANA granulosa.—**S. radiatum**. Of Kupfer, one of the deep layers of the hippocampus major, consisting of radiating nerve-fibres. [I, 28 (K).]—**S. reticulare**. See RETICULAR FORMATION.—**S. reticulare cutis**. See CORIUM (1st def.) and cf. RETICULAR LAYER OF THE CORIUM.—**S. reticulatum**. See RETICULAR FORMATION.—**S. semilunare (cochleae)**. See LIGAMENTUM spirale.—**S. spinosum**. Ger., *Stachelschicht*. A layer of prickle-cells. [J.]—**S. spinosum epidermidis**. The rete mucosum, especially the portion of it made up of prickle cells. [L.]—**S. spongiosum (placentae)**. The spongy layer of the maternal placenta.—**S. striatum**. A layer of nerve-fibres forming the inner lamina of the hippocampal gyrus. [J, 6 (K).]—**S. subpapillare**. See *S. vasculosum cutis*.—**S. subthalamium**. See SUBTHALAMIC REGION.—**S. superbasale**. See under *S. corneum*.—**S. superficiale pontis**. Ger., *oberflächliche Brückenfasern*. Transverse bundles of fibres upon the ventral surface of the pons Varolii. [L.]—**S. superius constrictoris urethrae**. See

*S. musculare superius urethrae*.—*S. supravasculare*. See *S. uteri supravasculare*.—*S. thyreo-ary-epiglotticum*. See *DEPRESSOR epiglottidis*.—*S. thyreomembranosum*. See *THYREO-EPIGLOTTICUS*.—*S. transversale*, *S. transversum*. See *Archi-form FIBRES*.—*S. transversum urethrale*. See *S. musculare superius urethrae*.—*S. uteri infravasculare*. The portion of the inner muscular layer of the uterus internal to the s. vasculare. [L. 332.]—*S. uteri submucosum*. The portion of the inner muscular layer of the uterus immediately beneath the mucous membrane. [L. 332.]—*S. uteri subserosum*. The outer muscular layer of the uterus. [L. 332.]—*S. uteri supravasculare*. The portion of the inner muscular layer of the uterus consisting principally of longitudinal fibres. [L. 332.]—*S. (uteri) vasculare*. The middle portion of the inner muscular layer of the uterus, made of interlacing fibres and blood-vessels. [L. 332.]—*S. vasculosonerveum*. See *S. fibrilloseum*.—*S. vasculosum*. See *TUNICA vasculosa*.—*S. vasculosum cutis*. That portion of the corium just beneath the papillae, occupied by a network of blood-vessels which run parallel to the surface and from which vascular loops are distributed to the papillae. [G.]—*S. zonale*. Ger., *Gürtelschicht* (3d def.). 1. Of Arnold, the layer formed by the annular arrangement of the arciform fibres around each half of the spinal cord. 2. A layer of reticular substance in the subthalamie tegmental region; it consists of bundles of white fibres which extend from the crura. [I. 6, 23 (K).]—*S. zonale corporis quadrigemini*. A thin layer of white nervous tissue upon the outer surface of the corpus quadrigemini. [L. 332.]—*S. zonale corporis striati*. A thin layer of intercrossing nerve-fibres and bundles on the free surface of the striatum and callosum. [J. 67.]—*S. zonale thalami*. See *S. zonale* (2d def.).—*Vascular s.* See *Visceral MESOBLAST*.

**STRAUCH** (Ger.), n. *Stra*'<sup>3</sup>*u*'<sup>4</sup>*ch*<sup>2</sup>. See *SHRUB*.

**STRAUSS** (Ger.), n. *Stra*'<sup>3</sup>*u*'<sup>4</sup>*s*. See *THYRSE* and *STRUTHIO camelus*.

**STRAVADIUM** (Lat.), n. n. *Stra*'<sup>3</sup>(*stra*'<sup>3</sup>)-*vad*'(wa'<sup>3</sup>rdy)'<sup>12</sup>-u<sup>3</sup>m-(u<sup>4</sup>m). Fr., *stravadié*. The genus *Barringtonia*. [a, 35.]

**STRAWBERRY**, n. *Stra*'<sup>3</sup>*be*<sup>2</sup>*r*-i<sup>2</sup>. The genus *Fragaria*, especially the *Fragaria vesca*; also the fruit of that and other species. [a, 35.]

**STREAK**, n. *Strek*. Lat., *stria*. Fr., *strie*, *ligne*. Ger., *Streif*, *Streifen*, *Rinne*. A line or stripe. [a, 48.]—**Abdominal s's.** See under *Linear atrophy of the skin*.—**Germinal s.** See *Primitive s.*—**Medullary s.** See *Medullary groove*.—**Primitive s.** Lat., *nota primitiva*. Fr., *ligne primitive* (ou *axiale*). Ger., *Primitivstreif*, *Primitivstreifen*, *Azenstreifen* [His]. Syn.: *axial plate*, *primitive trace*. In embryology, a temporary structure consisting of a sickle-shaped opacity (which becomes a strap-like thickening) of the germinal disc of the blastoderm, starting from that side of the disc which afterward becomes the narrow end, and gradually extending to or beyond the centre of the transparent area; a linear or strap-like mass of cells formed by direct proliferation from the lower (inner) cells of the epiblast, constituting the origin of the mesoblast. It is the first indication of the lineaments of the future embryo. Supposed by some writers to be the vestige of a blastopore. [A. 5.]—**Purkinje's elliptical light-s's.** An appearance seen by Purkinje while looking at a glowing sponge in darkness. When the image of the sponge lay on the inner side of the point of fixation, there appeared two horns running transversely outward from the margin of the illuminating image, with the convexities upward and downward, so as to inclose an ellipse between the object and the entrance of the optic nerve. [Graefe u. Saemisch (F).]

**STREAMING**, n. *Strem*'<sup>12</sup>*n*<sup>2</sup>. The passage to and fro of currents in protoplasm. [L, 121.]

**STREAMLESS**, adj. *Strem*'<sup>12</sup>*le*<sup>3</sup>*s*. Ger., *stromlos*. Devoid of electrical currents (said of fresh, intact muscles, which do not manifest the active phenomena of dying muscles). [Landois (K).] Cf. *Difference THEORY*.

**STREBEN** (Ger.), n. *Strab*'<sup>2</sup>*e**n*. See *NISUS*.

**STREBLOSIS** (Lat.), n. f. *Stre*'<sup>2</sup>*b*-los'i<sup>2</sup>*s*. Gen., -los'eos (-is). Gr., *στρεβλωσις* (from *στρεβλός*, twisted). See *DISLOCATION*.

**STREBLUS** (Lat.), n. m. *Stre*'<sup>2</sup>*b*-lu's'i<sup>2</sup>*u*'<sup>4</sup>*s*. From *στρεβλός*, twisted. Fr., *strebilus*. A genus of the *Urticaceae*. The *Streblice* are a tribe of the *Moroidae*. [a, 35.]—*S. asper*. Ger., *Schweifbeere*. A tropical Asiatic tree or shrub. The root is used in epilepsy and inflammatory swellings, and is applied to boils and, in fevers, to the whole body. The juice is astringent and antiseptic. [a, 35.]

**STRECKBETT** (Ger.), n. *Stre*'<sup>2</sup>*k*-be't. An extension-bed. [a, 48.]

**STRECKBEWEGUNG** (Ger.), n. *Stre*'<sup>2</sup>*k*-be'v-ag-un<sup>2</sup>. Extension. [L.]

**STRECKER** (Ger.), n. *Stre*'<sup>2</sup>*k*-e'r. See *EXTENSOR*.—**Acusserer S. des Vorarmes**. See *HUMERO-OLECRANUS externus*.—**Acusserer Unterschenkel's.** See *VASTUS externus*.—**Daumens'.** An extensor muscle of the thumb. [L.]—**Dicker S. des Vorarmes**. **STRECKFLÄCHE** (Ger.), n. *Stre*'<sup>2</sup>*k*-flach<sup>2</sup>-e<sup>2</sup>. The surface of the tibia from which the extensor muscles arise. [L.]

**STRECKMUSKEL** (Ger.), n. *Stre*'<sup>2</sup>*k*'*mus*-e<sup>2</sup>*l*. See *EXTENSOR*.—**Gemeinschaftlicher langer S. der Fusszehen**. See *EXTENSOR digitorum pedis longus*.—**Kleiner S. des Vorderarmes**. See *ANCONÆUS* (3d def.).—**Kurzer gemeinschaftlicher S.** See *EXTENSOR digitorum pedis brevis*.—**S. der Zehen**. See *EXTENSOR digitorum pedis*.—**S. des Fusses**. See *EXTENSOR pedis*; of Theile and Henle, see *GASTROCNEMIUS*.

**STRECKUNG** (Ger.), n. *Stre*'<sup>2</sup>*k*-u<sup>2</sup>*n*<sup>2</sup>. Extension. [L.]

**STREICHEN** (Ger.), n. *Strich*'<sup>3</sup>*e**n*. Stroking or friction movements in massage. [L, 57 (a, 14).]

**STREIF** (Ger.), n. *Strif*. See *STREIFEN*.

**STREIFEN** (Ger.), n. *Strif*'<sup>2</sup>*e**n*. A stripe, streak, or stria. [A. 521.]—**Baillarger'sche S.** The gray laminae, separated by layers of white nerve-substance, into which the cerebral cortex is divisible; best seen in a vertical section of the superior frontal convolution. [I, 17 (K).] Cf. *Vicq d'Azyr'sche S.*—**Gürtels'.** See *ZONE*.—**Grenzs'.** 1. See *TENIA semicircularis*. 2. As a pl., see *CORPUS fimbriatum*.—**Horns'.** See *TENIA semicircularis* and *LAMINA cornea* (1st def.).—**Hörs'.** See *Acoustic STRIE*.—**Knorpels'.** A streak of cartilage. [L.]—**Lancisi'scher S.** See *STRIE longitudinales mediales*.—**Marks'.** See the major list.—**Medianer Sehnnens'.** See *LINEA alba* (1st def.).—**Primitive's.** See *Primitive STREAK*.—**Riechs'.** See *STRIA olfactoria*.—**Schwangerschafts'.** See *STRIE gravidarum*.—**Vicq d'Azyr'sche S.** The white laminae in the cerebral cortex which separate the layers of gray matter. [I, 1 (K).] Cf. *Baillarger'sche S.*—**Weisslicher S. des Schlundkopfs**. See *RHAPHÉ of the pharynx*.

**STREIFENHÜGEL** (Ger.), n. *Strif*'<sup>2</sup>*e**n*-hu'<sup>2</sup>*g*-e<sup>2</sup>*l*. See *CORPUS striatum*.—**S. Brückenbahn**, **S. Brückensystem**. The system of nerve-fibres connecting the pons Varolii and the corpora striata. [I, 27 (K).]—**S'kopf**. See *CAPUT corporis striati*.

**STREIFFARN** (Ger.), n. *Strif*'<sup>2</sup>*fa*'*r**n*. See *ASPLENIUM*.

**STREIFIG** (Ger.), adj. *Strif*'<sup>2</sup>*i**g*. See *STRIAE*.

**STREIFKRAUTWURZEL** (Ger.), n. *Strif*'<sup>2</sup>*k**ra*'*u*'<sup>4</sup>*t*-wur'ts-e<sup>2</sup>*l*. The root of *Rumex crispus*, *Rumex obtusifolius*, and related species. [a, 35.]

**STREIFSCHUSS** (Ger.), n. *Strif*'<sup>2</sup>*sh**us*. A grazing gunshot wound. [A. 521 (a, 48).]—**Lufts'.** A contusion ascribed to the wind of a shot. [E.]

**STREIFWURZ** (Ger.), n. *Strif*'<sup>2</sup>*v**ur**t**s*. The *Rumex crispus*.

**STREMA** (Lat.), n. n. *Stre*'<sup>2</sup>*m*'*ma*<sup>3</sup>. Gen., *strem*'*ma**to*<sup>3</sup>-*atis*. Gr., *στρέμμα* (from *στρέφειν*, to twist). See *SPRAIN*.

**STRENGEL** (Ger.), n. *Stre*'<sup>2</sup>*n*<sup>2</sup>-e<sup>2</sup>*l*. See *STRANGLES*.

**STRENGFLÜSSIG** (Ger.), n. *Stre*'<sup>2</sup>*n*<sup>2</sup>-flü's-si'<sup>2</sup>*g*. See *REFRACTORY*.

**STRÉPHÉNOPODIE** (Fr.), n. *Stra*-fa'<sup>3</sup>*n*<sup>2</sup>-do-po-de. From *στρέφειν*, to turn, *ἔνδον*, inward, and *πῶς*, the foot. Of Duval, varus.

**STRÉPHOPODIE** (Fr.), n. *Stra*-fo-po-de. Of Duval, any lateral deviation of the foot constituting a deformity. [“Rev. de Chir.” June, 1882, p. 443.]

**STREPHOTOME**, n. *Stre*'<sup>2</sup>*f*'*o*-tom. From *στρέφειν*, to turn, and *τέμνειν*, to cut. An instrument resembling a corkscrew. The spiral shaft is flattened, and has an eye near its point. The handle may be detached. It is used for maintaining invagination of the sac of an inguinal hernia, and at the same time approximating the tendinous structures which it transfixes in its screw-like passage, for the cure of the hernia. [W. D. Spanton, “Ann. of Anat. and Surg.,” Oct., 1882, p. 155.]

**STREPITOSUS** (Lat.), adj. *Stre*'<sup>2</sup>*p*-i't<sup>2</sup>-os'u's(-u's). Noisy, strident. See *ANGINA strepitosa*.

**STREPITUS** (Lat.), n. m. *Stre*'<sup>2</sup>*p*'*i*<sup>2</sup>-u's(-u's). Gen., *strep*'*it**us*. From *strepere*, to make a noise. A noise, a sound. [L., 50 (a, 14).]—**S. aurium**. See *TINNITUS aurium*.—**S. corlaciens**. A sound like the creaking of leather heard on auscultation. [A, 319 (a, 34).]—**S. uterinus**. See *Uterine SOUFFLE*.

**STREPSIS** (Lat.), n. f. *Streps'is*. Gen., *streps'eos* (-ia). Gr., *στρεψις*. See Torsion.

**STREPTOCOCCUS** (Lat.), n. m. *Strept'o-coc'us* (k'us) (ku's). From *στρεπτός*, twisted, and *κόκκος*, a kernel. Fr., *streptocoque*. Ger., *S.* Of Billroth, a micrococcus forming with other micrococci chaplet-like chains. In Saccardo's system, it is distinguished as a genus from *Micrococcus*, not only by the moniliform threads, but especially by the presence of arthrospores instead of endospores. [a, 238, 316 (a, 35).]—**Bonome's s.** A s. obtained from the exudations of the cerebro-spinal meninges and from hemorrhagic extravasations in the lungs in cases of epidemic cerebro-spinal meningitis. It does not grow upon blood-serum or readily upon any artificial culture medium, and soon loses its pathogenic power when cultivated through a few successive generations. [a, 35].—**S. acidilactici.** Of Grotenfeld, a spherical or oval coccus, from 0.5 to 1  $\mu$  long and  $\frac{1}{2}$  to  $\frac{3}{4}$  of a  $\mu$  thick; a non-liquefying s. forming spherical white colonies on gelatin plates. It is found in coagulated milk in Finland. [a, 34].—**S. aethiobius.** A species occurring in human urine. The spheres are 1.25 to 2  $\mu$  in diameter, and form chains composed of from 3 to 10 cocci. It liquefies gelatin. On gelatin plates, after two days, small white points appear, which somewhat slowly become disc-shaped and of a dark-gray color. [a, 35].—**S. albus.** Of Maschek, an aerobic liquefying s. growing in flat circular colonies; found in Freiburg water. [a, 34].—**S. alvearis.** See *Cryptococcus alveareus*.—**S. ambratus.** A species found in the exudations of the lungs, pus from the nose, and other secretions of sucking calves infected with a form of pneumonia (*pneumonitis vitulorum lactantium*). It consists of more or less elongated filaments composed of colorless, spherical cocci 1  $\mu$  in diameter. In gelatin cultures it forms club-shaped colonies. Its inoculations are innocuous to rabbits and guinea-pigs, but reproduce the pneumonia in calves. [a, 35].—**S. aphthicola.** A species occurring among the epidermic cells and blood-globules and in the milk of domestic animals with the foot-and-mouth disease (formerly supposed to be caused by *Saccharomyces alicans*). The filaments are composed of pale, globular cocci 2  $\mu$  in diameter. [a, 35].—**S. articulorum.** Ger., *S. bei Diptherie*. The micrococcus of diphtheria; a species composed of spherical cocci from 0.3 to 1  $\mu$  in diameter, arranged in chains, often very long, containing each 100 or more cocci. It occurs on and in the diseased mucous membrane in various forms of diphtheria, but, according to its discoverer, Loeffler, is an accidental accompaniment, and not the cause of the disease, although it may produce local or general complications. On gelatin plates, which it does not liquefy, it forms small, light-grayish, hyaline colonies, with small curly lines (chains of cocci) at the border. It is pathogenic to mice, proving fatal in more than one half of the cases in which subcutaneous inoculations or injections of the cultivations are made. If the cultivations are injected into the veins of rabbits, suppuration of the joints is produced in from four to six days, and in the majority of cases death gradually ensues. Guinea-pigs are not affected. [a, 35].—**S. bombycis.** An organism consisting of oval cocci having a maximum length of 1.5  $\mu$ , single or united in straight or curved chains of from 2 to 8; found in great numbers in the juices of the stomach and intestines of silkworms having an infectious disease in which the larva after death becomes soft and finally filled with gases and a blackish-brown putrid fluid. It is not positively ascertained that this s. is the exciting agent of the malady, as other bacteria accompany it. [a, 35].—**S. brevis.** Of von Lingelsheim, an aerobic and facultative anaerobic, non-liquefying s. growing more rapidly in the usual culture media than *S. pyogenes*. It occurs solitary, in pairs, or in short chains. At the end of twenty-four hours it forms punctiform colonies on gelatin plates; in gelatin stick cultures after three or four days a funnel-like cavity forms near the surface, that finally extends downward for a distance of 4 to 5 mm. It is obtained from normal human saliva. [a, 34].—**S. cadaveris.** Of Sternberg, an aerobic and facultative anaerobic, non-liquefying s. growing in a decidedly acid medium at ordinary temperatures. It occurs in short chains and has a diameter of 0.5  $\mu$ . It was found in the liver of a person that had died of yellow fever. [a, 34].—**S. Charrini.** Fr., *microbe de la septicémie consecutive au charbon*. A species found by Charrin in the blood of all the viscera, in the urine, and in the faeces of rabbits which had died of anthrax. The filaments are composed of spherical or oval hyaline cocci (as many as 20 in some of the chains). Subcutaneous inoculations kill rabbits in from 18 to 48 hours, producing oedema at the point of injection and great swelling of the spleen. Sparrows and sometimes cats are also affected; dogs and fowls are not. [a, 35].—**S. cinnabareus.** A species consisting of short chains of spherical cocci, often found on old cultivations. The colonies grow very slowly, forming in about eight days on gelatin, without liquefying it, a knob-like elevation of a cinnabar color. [a, 35].—**S. coli gracilis.** See *S. gracilis*.—**S. conglomeratus.** A s. occurring in masses made up of chains of cocci and forming firm white scales at the bottom of the tube of a bouillon culture. It is very pathogenic for mice. It is obtained from scarlet-fever patients. [a, 34].—**S. coronatus.** A species obtained from cultures of air at Göttingen, Germany. The cocci are spherical, about 1  $\mu$  in diameter, and united in short chains or sometimes in zoogloea. In gelatin, which it liquefies, this s. forms after two days whitish-yellow points surrounded by a depressed zone. [a, 35].—**S. coryzae contagiosa equorum.** See *Schuetzia equi*.—**S. desdens.** A s. observed in cultures at Göttingen, Germany, occurring as very small, spherical cocci united in short chains. After two days the colonies are punctiform and whitish-yellow; they somewhat slowly become disc-shaped, ovate, with one margin often sinuous, and granular superficially. It softens gelatin at first, and eventually liquefies it. [a, 35].—**S. diptheriticus.** See *S. articulorum*.—**S. endocarditicus.** One of the micro-organisms found in ulcerative endocarditis and other diseased states of the heart. It occurs as spherical cocci, 0.5 to 1  $\mu$  in diameter, arranged in chains often accumulated compactly in large heaps. [a, 35.] Cf. *Bacilli of endocarditis*.—**S. equi.** See

*Schuetzia equi*.—**S. erysipelatis, S. erysipelatos.** The exciting agent of erysipelas. It occurs as very minute cocci, 0.3 to 0.4  $\mu$  in diameter, hardly distinguished from *S. pyogenes* except that in stroke cultivations the colonies are more opaque and whitish and show at the periphery numerous projecting chains which give to the cultivation a dendritic appearance. The organism occurs, however, only in erysipelas, while *S. pyogenes* is present in about half of all forms of suppuration. Inoculations of pure cultivations in man and animals produce erysipelas without suppuration; such inoculations have been made with good therapeutic results on patients suffering from malignant tumors, which have improved or entirely disappeared after recovery from the induced attack of erysipelas. [a, 35].—**S. fermenti.** A species consisting of spherical cocci, 0.2  $\mu$  in diameter, arranged chiefly in the form of chains, found in wine and various other saccharine liquids, which it converts into a thick, tenacious mass by developing a form of gum called by Bechamp *viscose*. [a, 35].—**S. flexuosus.** A s. found in the buccal cavity and in pus in cases of erysipelas. It forms in bouillon cultivations long serpentine chains with a non-coherent sediment. After division the cells are circular or oval. [Cf. Tribl. f. Bakt. u. Parasit., Apr. 16, 1892, p. 509 (a, 50).]—**S. giganteus urethrae.** Of Lustgarten, a spherical coccus, 0.8 to 1  $\mu$  in diameter, occurring in chains often united in thick tangled masses. It is aerobic and forms elongated drop-like colonies on gelatin plates; found in the normal urethra. [a, 34].—**S. gracilis.** A non-pathogenic species consisting of spherical cocci often arranged in the form of the letter S, found in the intestines and excrement of carnivorous animals and also of new born children. It rapidly liquefies gelatin plates, forming very small dark colonies with well-defined borders. [a, 35].—**S. haematofusus.** A s. found in putrefying blood, etc. It occurs as spherical cocci, 0.7 to 0.8  $\mu$  in diameter, rather loosely united in long flexuose chains. [a, 35].—**S. havaniensis.** Of Sternberg, a micrococcus from 0.6 to 0.9  $\mu$  in diameter, occurring in long chains of cocci in pairs. It was found in the vomit of a yellow-fever patient. [a, 34].—**S. hydrophoborum.** Ger., *S. bei Rabies*. A common organism in the brain of rabid animals. The cocci are spherical, from 0.5 to 0.7  $\mu$  in diameter, and are arranged in very short chains. In the lowest layer of agar-agar it slowly forms whitish points at the temperature of the body. In gelatin, which it liquefies, the colonies grow very slowly, forming heaps which are dense in the middle and loose at the periphery of the cultivation. [a, 35].—**S. influenzae.** A s. consisting of numerous filaments composed of very small, globular, hyaline cocci from 0.5 to 0.8  $\mu$  in diameter; found in the blood and exudations of horses and asses affected with influenza. [a, 35].—**S. insectorum.** A s. occurring as oval cocci 0.7 to 1  $\mu$  long by 0.55  $\mu$  wide, disposed in necklace-shaped filaments, frequently aggregated in zoogloea. It has been observed in the digestive apparatus of the *Blissus leucopertum* when affected with a peculiar infectious disease. [a, 35].—**S. Kochii.** A species found in the blood, especially in the capillary vessels, of rabbits and mice infected with septicemia from an injection of an infusion of putrid flesh. The cocci, which are oval, from 0.8 to 1  $\mu$  long, and collected in masses, adhere laterally to the blood-corpuscles. [a, 35].—**S. Krausei.** See *S. pyogenes*.—**S. lacteus.** A species found on gelatin cultivations and in the dust of sleeping apartments. It occurs as spherical cocci, about 0.5  $\mu$  in diameter, in chains of from 4 to 16, forming minute, milky-white, rounded drops, which on drying change into white crusts. [a, 35].—**S. lanceolatus Pasteuri.** Of Gamaleia, the *Micrococcus Pasteuri*. [a, 34].—**S. liquefaciens.** Of Sternberg, an aerobic and facultative anaerobic liquefying s. obtained from the liver and intestines of yellow-fever patients; not pathogenic to rabbits or guinea-pigs. [a, 34].—**S. longus.** Of von Lingelsheim, the *S. pyogenes*. [a, 34].—**S. Lucæ.** A s. found by De Luca in simple chancres, occurring in very minute cocci arranged in chains, which often form zoogloea masses. The colonies in cultures are of a bright-yellowish color. Inoculations with the cultivations induce the typical soft chancre. [a, 35].—**S. malignus.** The *S. pyogenes malignus* of Flüge, who cultivated it from necrotic emboli in a leucocythemic spleen. The minute cocci, which are not distinguishable from *S. erysipelatos* and *S. pyogenes*, form on gelatin plates (which they do not liquefy) and in puncture cultivations colonies similar to those of *S. erysipelatos* and *S. pyogenes*, except that they are slightly smaller and grow more slowly. Subcutaneous inoculations with small quantities of the cultivations are fatal to mice in from three to five days. Inoculation of the ear of a rabbit produces at first an erysipelas like that from *S. erysipelatos* or *S. pyogenes*, but also in two or three days a general infection which results in death on the fourth day. [a, 35].—**S. Manfredii.** Of Trevisan, a s. occurring in the sputum of patients with lobar pneumonia. The hyaline, ellipsoid cocci (1 by 0.4 to 0.8  $\mu$  in diameters) are disposed in more or less elongated chains. Dogs, rabbits, and guinea-pigs, when inoculated, show the characteristic symptoms of the disease and usually die. [a, 35.] Cf. *Micrococci of pneumonia*.—**S. margaritaceus.** A s. found in putrid blood and other fluids; somewhat large, spherical cocci, rather loosely united into chains of from 10 to 20. [a, 35].—**S. meningitidis.** A species consisting of globoso-ovoid cocci in long tortuous chains, found by Bonome in the intrameningeal exudations of cerebro-spinal meningitis and in pulmonary hemorrhagic foci. It differs from *S. erysipelatos* in being evolved neither in blood-serum nor in gelatin. It is pathogenic to mice, rabbits, guinea-pigs, and dogs, but not to pigeons. [a, 35].—**S. merdarius.** Fr., *streptocoque des selles*. A s. found in human and animal faeces, consisting of very small, slightly curved cocci, forming on gelatin plates, which it does not liquefy, rounded, granular colonies of a deep-brown color. [a, 35].—**S. morbillosus.** An anaerobic species occurring in young persons, dogs, and hogs affected with measles as spherical cocci, from 1.2 to 1.5  $\mu$  in diameter, mostly solitary, sometimes loosely united in short chains. It forms on potatoes, at a temperature of from 27° to 35° C., milky-white, prominent, subhemispherical colonies. [a, 35].—**S. murisepticus.** Of von Lingelsheim, a variety of *S. longus* that grows scantily on ox serum and is especially virulent when inoculated in mice. [a, 34].—**S. Nocardii.** A

s. occurring in the milk of cows affected with contagious mammitis as oval cocci, from 1 to 1.2  $\mu$  long, arranged in irregular elongated chains. The milk becomes viscid and yellow, and soon coagulates, showing an acid reaction, and, if mixed with the milk of a healthy cow, coagulates that also. Inoculations of the cultivations induce the disease in cows and goats. [a, 35.]—*S. nomæ*. Fr., *micrococcus du nomæ*. Spherical cocci, from 0.3 to 0.4  $\mu$  in diameter, in closely associated chains, occurring in the liquid of the peripheric edema of gangrenous stomatitis following infectious diseases, especially measles and pertussis in children. [a, 35.]—*S. ochroleucus*. A species found in human urine; spherical, mobile cocci, from 0.2 to 0.8  $\mu$  in diameter, forming on the surface of gelatin colonies of a sulphur color. In cultures on coagulated albumin it lives half an hour at a temperature of 100° C. On the same medium or in a saccharine infusion it develops arthrospores from 1.6 to 1.78  $\mu$  in diameter. It shows an ultimate acid reaction in inorganic or saccharine infusions. In the presence of urea and in other media, even in an acid medium, the reaction is alkaline. [a, 35.]—*S. pernicius* (*psittacorum*). An imperfectly known species found as cocci in short chains, usually in zoogloea masses, in the eyes, kidneys, etc., of parrots infected with a very contagious and fatal disease (*mycosis psittacorum*) in which nodules are formed on the surface of the lungs, spleen, kidneys, etc. [a, 35.]—*S. phosphoreus*. See *Micrococcus Pflügeri*.—*S. pneumoniae*. See *S. pyogenes*.—*S. putrefaciens*. A micro-organism frequent in various putrefying substances; spherical cocci, from 0.2 to 0.3  $\mu$  in diameter, forming short moniliform threads. [a, 35.]—*S. pyogenes*. See Plate III, Fig. 9. Ger., *Eiterkettenococcus*. A s. occurring as spherical cocci, about 1  $\mu$  in diameter, united in fours, fives, or even groups up to twenties (Saccardo) in filaments (chains), which are often united in delicate loops and form larger heaps. Sometimes there is a difference in the size of the cocci composing a chain. Diplococci are also often observed. On gelatin plates, which it does not liquefy, it forms punctiform colonies spreading out on the surface and appearing in the earlier stages of growth, under a low power of the microscope, as yellow spots of regular contour, and afterward as darker, nearly brown spots with chains, sometimes looped, projecting here and there at the borders. In punctures in gelatin, minute, whitish, nearly transparent colonies are developed, and appear as a delicate layer along the track of the puncture. On agar-agar the cultivations are thickest in the middle, thinning gradually in the form of a terrace toward the periphery, where at irregular intervals colonies occur in punctiform masses. A similar growth takes place on solidified blood-serum. The organism does not appear to develop on potatoes. Subcutaneous inoculations and intravenous injections of the cultivations have in the majority of cases no effect on healthy animals. Inoculations on the ears of rabbits cause usually only a temporary redness and swelling. This s. is common in human pus, especially in lymphangitis and peritonitis, and, according to Flügge, is the only species developed in cultivations from pus in acute inflammatory gangrene. Though it generally induces less rapid supuration and destruction of tissue than *S. pyogenes*, "it can penetrate farther into the tissue and infiltrate it before supuration and destruction" (Flügge). It is pathogenic for mice and rabbits. [a, 35.]—*S. radiatus*. A species occurring in cultivations, so called from the radial arrangement of the threads in the colonies in gelatin. It is less than 1  $\mu$  in diameter, is sometimes arranged in chains, but often in small masses. [a, 35.]—*S. Rindfleischii*. A s. consisting of colorless cocci in chains, found in the capillaries in mycosis fungoides and by some regarded as its specific cause. [a, 35.]—*S. rubiginosus*. Of Edington, a coccus, having a diameter of 0.4  $\mu$ , that grows as yellow points beneath, but as white points upon the surface of gelatin; not pathogenic to rabbits, guinea-pigs or pigs; obtained from the cast-off epidermis and from the blood of scarlatina patients. [a, 34.]—*S. saprogenes*. A s. found in putrefied substances, especially in blood; spherical cocci, 1.3 to 1.5  $\mu$  in diameter, closely united in short chains. [a, 35.]—*S. scarlatinae*. See *S. rubiginosus*.—*S. Seiferti*. A s. (not to be confounded with *S. influenzae*) found in the sputum and nasal secretions of persons affected with influenza. It occurs as oval, colorless cocci, 1.5 to 2  $\mu$  long by 1  $\mu$  broad, in long filaments collected into very numerous glomerules. According to Seifert, it is never found in pneumonia, laryngitis, or pertussis. [a, 35.]—*S. septicus*. A s. found in impure earth, not distinguishable under the microscope from *S. pyogenes*, though it has never been observed in man. It forms chains less readily than the latter species, and grows more slowly in cultivations. On gelatin, which it does not liquefy, the colonies (as fine points) do not become visible till after three or four days, and in puncture cultivations not till the fifth or sixth day. Subcutaneous inoculations of minute quantities of the cultivations are fatal to mice in from two to three days. Inoculation on the ear of rabbits sets up a redness, followed by general infection, and death in two or three days. Accumulations of cocci are found in the internal organs of the dead animals, sometimes obstructing the vessels and forming necrotic foci. [a, 35.]—*S. septo-pyemicus*. A s. consisting of spherical cocci, from 0.7 to 0.8  $\mu$  in diameter, found in the saliva of persons affected with erysipelas of the throat. On gelatin plates, which it does not liquefy, it slowly forms oval, yellowish-gray colonies, coarsely cut at the border. [a, 35.]—*S. suspectus*. A s. said to be common in northern Italy in the blood and spleen of cattle affected with hematuria. It forms filaments composed of colorless, spherical cocci, about 1  $\mu$  in diameter. [a, 35.]—*S. toxicatus*. A s. found in macerations of the poison oak (*Rhus toxicodendron*); spherical cocci, 0.5  $\mu$  in diameter, in chains. Inflammation produced by the poison of the plant has been ascribed to this. [a, 35.]—*S. ureæ*. Fr., *toride ammoniacale*. Ger., *Harnstoffmicrococcus*. Harnpitz. A s. consisting of spherical cocci, 0.8  $\mu$  to 1  $\mu$  in diameter, in short chains. It occurs in urine, inducing ammoniacal fermentation. [a, 35.] Cf. *Bacillus ureæ*.—*S. varicellæ*. A s. found in the blood and fresh lymph of the vesicles of chicken-pox; spherical cocci, more than twice as large as *S. variolæ*, and rarely loosely united in short chains. [a, 35.]—*S. vari-*

*olæ*. Spherical cocci, 0.5  $\mu$  in diameter, usually loosely united in chains, found in the blood and in the fresh lymph of the vesicles in variola. On potatoes, at a temperature between 22° and 35° C., this s. forms prominent hemispherical yellowish colonies. [a, 35.]—*S. vermiformis*. Of Maschek, an aerobic liquefying s. that shows a slow, vermiform progressive movement. Upon gelatin plates it forms yellowish-white colonies that sink into the gelatin as liquefaction occurs. Found by Tils in Freiburg water. [a, 34.]—*S. violaceus*. A s. accidentally found on boiled potatoes; short, ovoid cocci, in chains, forming bluish-violet droplets running together to form larger spots 6 mm. or less broad. [a, 35.]—*S. Weissii*. See *SCHUETZIA Weissii*.—*S. zythi*. A s. always found in malt liquors having a peculiar odor and acidity; colorless, spherical cocci, 1.2 to 1.5  $\mu$  in diameter, in chains. [a, 35.]

**STREPTOPUS** (Lat.), n. n. Stre<sup>pt</sup>o(o)<sup>3</sup>-pu<sup>s</sup>(pus). From *streptos*, twisted, and *pous*, the foot. Fr., *streptope*. Twisted foot (or stalk); a genus of the *Liliaceæ*. [a, 35.]—*S. amplexicaulis*, *S. amplexifolius*, *S. distortus*. Fr., *laurier Alexandrien des Alpes*. The *ibiza pisa* of Dioscorides; an herb of southern and central Europe, Canada, and the middle United States. The refrigerant, mildly astringent leaves are used in gargles, and the young root is eaten as a salad. [a, 35.]

**STREPTOTHRIX** (Lat.), n. f. Stre<sup>pt</sup>o<sup>3</sup>th-ri<sup>x</sup>. Gen., -o<sup>3</sup>-ri-chos(-o<sup>3</sup>-richis). From *streptos*, twisted, and *thrix*, the hair. A genus of hyphomycetous *Fungi*. [a, 35.]—*S. de Cohn*, *S. Foersteri*. An organism, consisting of fine colorless filaments, found by Cohn in the concretions in the lacrymal ducts. The threads are usually straight, sometimes twisted, and rarely distinctly branched. Its mode of growth and its botanical position are, according to Flügge, unknown. [a, 35.]

**STRETCHER**, n. Stre<sup>ch</sup>u<sup>r</sup>. Fr., *brancard*. Ger., *Tragbahr*. 1. A hand-litter. 2. An extension apparatus. [a, 17.]—*Ambulance* s. A portable folding s. that may be carried in an ambulance. [a, 34.]—*Hospital* s. A folding, rigid, or wheeled hand s. used for transportation of the sick in the hospital. [a, 34.]—*Primary* s. See *Ambulance* s.—*Secondary* s. See *Hospital* s.

**STREPULVER** (Ger.), n. Stro<sup>i</sup>pulv-er. Dusting powder, sometimes called lycopodium powder. [G; a, 35.]

**STRIA** (Lat.), n. f. Stri<sup>3</sup>(stri<sup>3</sup>)/a<sup>3</sup>. Fr., *strie*. Ger., *Streif*, *Streifen*. A fine line (e. g., a delicate groove, ridge, or streak of color; especially one of a number of such lines when they are parallel). [a, 35.]—*Acoustic striae*, *Auditory striae*. Lat., *striae acusticae*. Fr., *stries auditives*. Ger., *Hörstreifen*. A series of transverse white lines on the floor of the fourth ventricle at its lower part. They arise near the median line and extend outward, uniting with the auditory nerve-roots. [J, 29 (K).]—*Brown parallel striae* (Retzius). See *Colored lines of the enamel*.—*Medullary striae*. See *Auditory striae*.—*Meningitic s.* See *Cerebral maculae*.—*Striae acusticae*. See *Auditory striae*.—*S. alba tubercis*. A bundle of fibres, about 1 mm. broad, stretching quite superficially from the corpus mamillare over the tuber cinereum and disappearing beneath the chiasm some 4 or 5 mm. from the mesal border of the crista. It turns outward beneath the optic tract to the fornix, of which it should be regarded as a detached fasciculus. [a, 34.]—*S. anæsthetica*. Of E. Veiel, neurodermatophia. [L, 57 (a, 34).]—*Striae atrophicae* (cutis). See *Linear atrophy of the skin*.—*Striae ciliares*. An old term for the furrows between the ciliary processes. [F.]—*S. cornea*. See *Tænia semicircularis*.—*Striae corporis callosi externa*. See *Striae longitudinales laterales*.—*Striae cutis*. See *Linear atrophy of the skin*.—*Striae externa*. See *Striae longitudinales laterales*.—*S. germinativa*. See *Genital ridge*.—*Striae gravidarum*. Ger., *Schwangerschaftsstreifen*. Lineæ albicantes due to pregnancy (see under *Linear atrophy of the skin*).—*Striae Lancisii*. See *Striae longitudinales mediales*.—*S. laterales*. See *S. olfactoria lateralis*.—*Striae li-bere*. See *Striae longitudinales mediales*.—*Striae longitudinales cordis*. Nearly vertical muscular fibres in the upper half of the posterior longitudinal furrow of the heart. [L, 31.]—*Striae longitudinales corporis callosi*. See *Striae longitudinales Lancisii*.—*Striae longitudinales interna*. See *Striae longitudinales mediales*.—*Striae longitudinales Lancisii* (sen libere, sen mediales). The nerves of Lancisii; antero-posterior white fibres on the upper surface of the corpus callosum on each side of the raphe, continuous with the peduncles of the septum lucidum. [L, 332.]—*Striae longitudinales laterales*. Longitudinal white fibres near the margins of the corpus callosum parallel to the striae longitudinales mediales. [L.]—*Striae medullares* (ventriculi quarti). See *Auditory striae*.—*S. medullares ascendens*. Ger., *Klangstab, aufsteigender Markstreifen*. A white s. at the upper part of the floor of the fourth ventricle, regarded as an accessory motor root of the trigeminal nerve or of the auditory nerve. [L.]—*S. medullaris thalami*. An oblique furrow on the upper surface of the optic thalamus. [L, 17 (K).]—*Striae oblecta*. See *Striae longitudinales laterales*.—*Striae of Heidenhain*. See *Rods of Heidenhain*.—*Striae of Retzius*. Brown stripes parallel to the edge of a tooth, probably indicating the formation of the layers of enamel. [L, 351.]—*S. olfactoria*. Ger., *Riechstreifen*. One of the roots of the olfactory nerve. [J, 17 (K).]—*S. olfactoria lateralis*. The external root of the olfactory nerve. [L.]—*S. olfactoria medialis*. The internal root of the olfactory nerve. [L.]—*S. pinealis*. The anterior peduncle of the pineal gland. [a, 34.]—*S. semicircularis*, *Striae semilunares*. See *Tænia semicircularis*.—*Striae tectæ*. See *Striae longitudinales laterales*.—*S. terminalis*. See *Tænia semicircularis*.—*Striae transversales* (Willisii). Transverse ridges upon the upper surface of the corpus callosum marking the general direction of its fibres. [L.]—*S. vasculares*. The concave surface of the membranous cochlear canal where it is connected with the spiral ligament of the cochlea. [L, 332.]

**STRIATE**, **STRIATED**, adj's. Stri<sup>3</sup>at, -at-e<sup>3</sup>d. Lat., *striatus*. Fr., *strié*. Ger., *gestreift*. Striped, streaked, marked with striae.

**STRIATION**, n. Stri-a'shu'n. 1. The state of being striate. 2. A striated structure. [a, 17, 35.]—S's of Heidenhain. See ROPS of Heidenhain.

**STRIATUM** (Lat.), n. n. Stri(stri²)-at(a²t)/u³m(u⁴m). From *striare*, to furrow. Of Wilder, the corpus striatum. [J, 80 (K).]

**STRIBLING SPRINGS**, n. Stri²b/li²n². A place in Augusta County, Virginia, where there are mineral springs. [a, 14.]

**STRICKFÖRMIG** (Ger.), adj. Stri²k/fu²rm-i²g. See RESTIFORM.

**STRICT**, adj. Stri²kt. Lat., *strictus* (from *stringere*, to draw tight). Fr., *roide*. Ger., *straff* (1st def.). 1. Of stems, etc., more or less rigid. 2. Very upright or straight. The *Strictæ* of Scopoli are a tribe of plants comprising three gentes, the first including genera (*Circeæ*, *Ludwigia*, etc.) with dry fruit, the second genera (*Protium*, *Ribes*, etc.) with succulent fruit, and the third genera (*Hedera*, *Aralia*, etc.) related to the *Umbelliferae*. [a, 35.]

**STRICTURA** (Lat.), n. f. Stri²kt-u²r(un)/a². See STRICTURE.—S. *præputii*. See PHIMOSIS.

**STRICTURE**, n. Stri²kt/u²r. Lat., *strictura* (from *stringere*, to draw tight), *angustia*. Fr., s. *rétrécissement*. Ger., *Striktur*, *Zusammenschnürung*, *Verengerung*. A contracted part of a narrow tube or passage. [E.]—*Cicatricial s.* A s. due to cicatricial contraction. [a, 34.]—*Impassable s.* Fr., *rétrécissement infranchissable*. A s. in which the passage is so tortuous and contracted that a filiform bougie can not be passed through it. [a, 34.]—*Peilvie-Inlet s.* [Lahs]. See *Band's RING*.—*Spasmodic s.* A s. due to muscular spasm and not to organic change. [E.]—S. of the rectum. Lat., *strictura* (see *angustatio*) *intestini recti*. Ger., *Aftersperre*. A decrease in the calibre of the rectum, due to the growth of new tissue or to cicatricial contraction. [E.]

**STRICTURE-CUTTER, STRICTUROTOME**, n's. Stri²kt/-u²r-ku²t/u²r, -u²r-o-tom. From *strictura*, a stricture, and *τέμνειν*, to cut. An instrument for incising a stricture. [a, 34.]

**STRICTUROTOMY**, n. Stri²kt-u²r-o²t/om-i². Fr., *stricturotomie*. The division of a stricture by a cutting operation. [Chibret, "Rec. d'ophth.," June, 1882, p. 321.] See URETHROTOMY.

**STRIDOR** (Lat.), n. m. Strid(stred)/o²r. Gen., -or'is. From *stridere*, to make a creaking sound. Fr., *strideur*. Ger., *Schall*. A harsh, shrill sound. [D.]—*Congenital laryngeal s.* Of Suckling, s. produced by spasmodic muscular contraction of the larynx in very young infants. ["Edin. Med. Jour.," xxxviii, p. 205 (a, 34).]—*Inspiratory s.* The shrill sound heard in inspiration when the glottis is spasmodically closed or nearly closed. [D.]—*Laryngeal s.* S. produced by temporary or permanent laryngeal stenosis. [a, 34.]—*S. dentium*. See ARABOS and BRYGMUS.—*S. serraticus*. Fr., *bruit serratique*. A sound like that produced in sharpening a saw, sometimes heard after tracheotomy, in expiration, as the air traverses the tracheotomy tube. [D, 72.]

**STRIDULOUS**, adj. Stri²d/u²l-u²s. Lat., *stridulus*. Fr., *stridulant*, *striduleux*. Ger., *knisternd*. Harsh, shrill, or creaking (said of the respiration). [D.]

**STRIE** (Fr.), n. Stre. See STRIA.—S's of Frommann. See Frommann's LINES.—S. *internédiaire*. See HENSEN'S DISC.—S. *obscure*. See DARK DISC.—S. *optique*. See OPTIC TRACT.

**STRIEGELHAARIG** (Ger.), **STRIEGELIG** (Ger.), adj's. Strig'e²l/-ha²r-i²g, -e²l-i²g. See STRIGOSE.

**STRIEME** (Ger.), n. Strem'e². Written also *Striemen*. A stripe, a wheal. See VIBEX (1st def.) and VITTA (3d def.).—*Rückens'n*. See VITTE dorsales.

**STRIGA** (Lat.), n. f. Strig(stri²g)/a². From *stringere*, to draw tight. Fr., s. Ger., *Striegel*, *Striegelhaar*. In botany, a rigid, sharp-pointed, and appressed hair or bristle. [a, 35.]

**STRIGIL**, n. Stri²j/i²l. Gr., *στρίγγις*, *στρίγγιστρον*. Lat., *strigilis* (from *stringere*, to strip off). A scraper used by the ancient bathers. [A, 312 (a, 30).] See under ROMAN BATH.

**STRIGILATION** (Fr.), n. Strezh-el-a²-s-e-o²n². Friction by means of a brush, etc., in massage. [A, 385 (a, 48).]

**STRIGMENTUM** (Lat.), n. n. Stri²g-me²nt/u³m(u⁴m). From *stringere*, to strip off. Literally, that which is scratched or scraped off; filth or dirt scraped off, especially from the skin after a bath or athletic exercise. [B, 70.]—S. *capitis*. See PITIRIASIS.

**STRIGOSE, STRIGOUS**, adj's. Strig-os', -u²s. Lat., *strigosus* (from *striga* [q. v.]). Fr., *strigueux*. Ger., *striegelig*, *striegelhaarig*. Covered with strigæ. [a, 35.]

**STRIKTUR** (Ger.), n. Stri²kt-u²r. See STRICTURE.

**STRING-HALT**, n. Stri²n²/ha²lt. See SPRING-HALT.

**STRIOLA** (Lat.), n. f. Stri(stri²)/o²l-a². Dim. of *stria*, a furrow. Fr., *strieole*. Ger., *Striefchen*. A very delicate stria. [a, 35.]

**STRIOLATED**, adj. Stri²o²l-at-e²d. Lat., *striolatus*. Fr., *striolé*. Marked with striolæ. [B, 38 (a, 14).]

**STROBILA** (Lat.), n. f. Stro²b-i²l(e)/a². From *σπρόβιλος*, a pine-cone. An adult tape-worm with its generative segments or proglottides. [B, 28 (a, 27).]

**STROBILACEOUS**, adj. Stro²b-i²l-a'shu²s. Lat., *strobilaceus*. Fr., *strobilacé*. 1. See STROBILIFORM. 2. Pertaining to a strobile; belonging to or having the characters of the *Strobilaceæ* (of Reichenbach, the *Coniferae*). [a, 35.]

**STROBILE**, n. Strob'i²l. Gr., *σπρόβιλος*. Lat., *strobilus*. Fr., s. Ger., *Zapfen*, *Fruchtzapfen*, *Zapfenfrucht*. A cone (2d def.) of a pine or fir; also the fruit of the hop. [a, 35.]

**STROBOSCOPE**, n. Stro²b'o²skop. From *σπρόβος*, a whirling round, and *σκοπεῖν*, to examine. Ger., *Stroboskop*. See ZOETROPE.

**STROKE**, n. Strok. Ger., *πληγή*. Lat., *ictus*. Fr., *coup*. Ger., *Schlag*. 1. A blow. 2. A sudden attack of disease, especially of

paralysis or apoplexy. [a, 48.]—*Heat s.* See HYPERTYREXIA and INSULATION (2d def.).—*Paralytic s.*, S. of apoplexy. See APOPLEXY.

**STROM** (Ger.), n. Stro²m. See CURRENT.—*Drucks'*. Lit., pressure stream; of Niemeyer, the current produced in a blood-vessel just beyond the point at which an artificial stenosis has been produced. [K, 16.]—*Haupts'*. See PRIMARY CURRENT.—*Hauts'*. See CUTANEOUS CURRENT.—*Nebens'*. See FARADAIC CURRENT.—*Neigungss'*. Of Dubois-Reymond, the natural current in a muscle-rhombus which has its positive pole at or near one of the obtuse angles, the neighborhood of the adjacent acute angle being positive. [K, 16.]—*Nervens'*. See NERVE-CURRENT.—*Schleimhauts'*. Of Rosenthal, a natural electrical current existing in the mucous membrane lining the alimentary canal. [K, 16.]—*S'geber*. See ELECTRODE.—*S'ühr*. See RHEOMETER (2d def.).—*S'wechsler*, *S'wender*. See RHEOTROPE.

**STROMA** (Lat.), n. n. Strom'a². Gen., *stro²matus* (-atis). Gr., *στρώμα* (from *σπρυνναι*, to spread). Fr., s. Ger., *S. Grundgewebe*. 1. The tissue or combination of tissues forming the principal mass of an organ and serving as a kind of matrix or support for its special anatomical elements. According to Littré, the term should be applied to a covering and not to the supporting framework of an organ. 2. The connective-tissue framework of serous membranes exclusive of the endothelium. 3. The cell-body of nucleated red blood-corpuscles, or, in mammalian red blood-corpuscles, the entire mass of the corpuscle exclusive of the coloring matter. [J, 30, 32, 35.] 4. A body, variously shaped, composed of compactly arranged hyphal tissue, bearing the perithecium in pyrenomycetous *Fungi*. [a, 35.]—S. *Histi*. See HILUM of the ovary.

**STROMBIDÆ** (Lat.), n. f. pl. Stro²mb'i²d-e(a²-e²). Ger., *Flügeltschnecken*. See under STROMBUS.

**STROMBUS** (Lat.), n. m. Stro²mb'u²s(u⁴s). Gr., *σπρόμβος* (from *σπρέειν*, to twist). 1. Anything twisted up. 2. A spiral snail-shell. [A, 312 (a, 21).] 3. A genus of the *Strombidae*, or wing-shells, which are a family of gastropodous molluscs. [a, 48.]—S. *lentiginosus*. Ger., *fleckige Flügeltschnecke*, *Sommersprossen*. A species the operculum of which, with that of *Murex inflatus*, etc., was formerly official as *unguis odoratus*, *biatta byzantina*, etc. [a, 35.]

**STRONGYLUS** (Lat.), n. m. Stro²n(stro²n²)/i²l(u⁴l)-u²s(u⁴s). From *στρογγύλος*, round. Fr., *strongle*, *strongyle*. A genus of entozoic worms. The *Strongylidæ* of Dujardin are an order of the *Nematoda*.—S. *armatus* (minor). See SCLEROSTOMA *equinum*.—S. *bronchialis*. A yellowish viviparous worm, from  $\frac{3}{4}$  to  $\frac{5}{8}$  inch broad, the male being  $\frac{1}{2}$  inch long and the female of double that length. It has been found occasionally in the lungs and bronchial glands of man. [L.]—S. *cernuus*. See SCLEROSTOMA *hypostomum*.—S. *duodenalis*. See SCLEROSTOMA *duodenale*.—S. *elongatus*. A species found in the trachea and bronchi of the hog. [L, 18.]—S. *equinus*. See SCLEROSTOMA *equinum*.—S. *filaria*. A species found in the trachea and bronchi of the sheep, goat, and other ruminants. [L, 17.]—S. *gigas*. See EUSTRONGYLUS *gigas*.—S. *hypostomus*. See SCLEROSTOMA *hypostomum*.—S. *longevaginatus*. A species found in the kidney and urinary ducts of man, and once in the parenchyma of the lung of a child. [Diesing (L, 17); L, 57 (a, 50).]—S. *lupi*. See SPIROPTERA *anguinolenta*.—S. *micrurus*, *S. micurus*. A species the immature form of which is found in the lungs of young sheep and calves, producing hoose. [L.]—S. *ovinus*. See S. *contortus*.—S. *quadridentatus*. See SCLEROSTOMA *duodenale*.—S. *renalis*. See EUSTRONGYLUS *gigas*.

**STRONTIA** (Lat.), n. f. Stro²n'shi²(t²i)-a². Fr., *strontiane*. Ger., *Strontian*. Strontium oxide, SrO; a grayish or whitish, porous substance, analogous in structure and chemical properties to lime. [B.]

**STRONTIUM** (Lat.), n. n. Stro²n'shi²(t²i)-u²m(u⁴m). A bivalent element allied to calcium, found in various minerals and in some mineral waters. It is a yellow metal, rather harder than lead and readily malleable. Sp. gr., 2.5; atomic weight, 87.2; symbol, Sr. [B, 3.] Several of its salts are antiseptic. [a, 50.]—*Ammonium s. arsenate*. The compound  $2\text{Sr}(\text{NH}_4)\text{AsO}_4 \cdot \text{H}_2\text{O}$ . [B, 2.]—*S. acetate*. A compound of s. and acetic acid; crystallizing in different forms according to the amount of water which the crystals contain, and having respectively the formulæ  $2\text{Sr}(\text{C}_2\text{H}_3\text{O}_2)_2 \cdot \text{H}_2\text{O}$  and  $\text{Sr}(\text{C}_2\text{H}_3\text{O}_2)_2 \cdot 2\text{H}_2\text{O}$ . [B, 2.]—*S. acrylate*. The compound  $\text{Sr}(\text{C}_2\text{H}_3\text{O}_2)_2$ . [B.]—*S. antimonate*. The compound  $\text{Sr}(\text{SbO}_2)_2 \cdot 6\text{H}_2\text{O}$ . [B, 2.]—*S. arsenate*. A compound of s. and arsenic acid. The monohydric s. arsenate,  $\text{Sr.HAsO}_4$ , is known. [B, 2.]—*S. arsenite*. See *S. metarsenite*.—*S. carbonate*. A substance,  $\text{SrCO}_3$ , occurring in nature as the mineral strontianite and also prepared artificially. [B, 3.]—*S. chloride*. A body,  $\text{SrCl}_2 \cdot 6\text{H}_2\text{O}$ , forming long, acicular, efflorescent crystals which, on heating, lose their water of crystallization and are reduced to a white powder. [B, 3.]—*S. cyanide*. A substance,  $\text{Sr}(\text{CN})_2$ , prepared by the decomposition of s. ferrocyanide or by the action of hydrocyanic acid on s. hydrate. It is very readily decomposed by the action of carbonic acid. [B.]—*S. ferrocyanide*. A substance,  $\text{Sr}_2\text{Fe}(\text{C}_2\text{N}_3)_2 \cdot 15\text{H}_2\text{O}$ , produced by the action of s. hydrate on a ferrocyanide of a heavy metal, like copper. [B.]—*S. gallate*. A substance,  $(\text{C}_2\text{H}_3\text{O}_2)_2\text{Sr} + 4\text{H}_2\text{O}$ , occurring in acicular crystals. [B, 46 (a, 14).]—*S. hydroxide*. A white pulverulent substance,  $\text{Sr}(\text{OH})_2$ . [B, 3.]—*S. lactate*. A compound of s. and lactic acid; a diuretic. [a, 50.]—*S. metarsenite*. The compound  $\text{Sr}(\text{AsO}_2)_2 \cdot 4\text{H}_2\text{O}$ . [B, 2.]—*S. nitrate*. A crystalline substance,  $\text{Sr}(\text{NO}_3)_2$ , or  $\text{Sr}(\text{NO}_3)_2 \cdot 4\text{H}_2\text{O}$ . [B, 3.]—*S. oxalate*. The compound  $\text{SrC}_2\text{O}_4$ . [B, 4.]—*S. oxide*. See STRONTIA.—*S. pyrothioarsenate*. Neutral s. sulpharsenate,  $\text{Sr}_2\text{As}_2\text{S}_7$ . [B, 2.]—*S. sulpharsenate*. See *S. pyrothioarsenate* and *S. thioarsenate*.—*S. sulphate*. The compound  $\text{SrSO}_4$ , occurring in nature as the mineral celestine. It forms large, rhombic, light-blue crystals. [B, 3.]—*S. thioarsenate*. Basic s. sulpharsenate, a whitish powder,  $\text{Sr}_3(\text{AsS}_2)_2$ . [B, 2.] See also *S. pyrothioarsenate*.

**STROPHANTHEIN**, n. *Stro<sup>2</sup>f.anth'e-i<sup>2</sup>n*. A substance insoluble in water, formed along with sugar by the decomposition of strophanthin by weak acids. [B.]

**STROPHANTHIN, STROPHANTIN**, n's. *Stro<sup>2</sup>f-a<sup>2</sup>nth'i<sup>2</sup>n*, -a<sup>2</sup>nt'i<sup>2</sup>n. Fr., *strophantine, strophanthine*. Ger., *S*. A crystallizable glucoside,  $C_{29}O_{34}H_{10}$ , very bitter and feebly acid, obtained from the seeds, leaves, and bark of *Strophanthus hispidus*. By boiling with dilute acids, it is converted into sugar and strophanthin. It acts, like digitalin, as a cardiac tonic and a diuretic. [E.]

**STROPHANTHUS** (Lat.), n. m. *Stro<sup>2</sup>f-a<sup>2</sup>nth(a<sup>2</sup>nth)'u<sup>2</sup>s(u<sup>2</sup>s)*. From *στροφος*, a twisted cord, and *άνθος*, a flower. Fr., *strophante*. A genus of the *Apocynaceae*. [a, 35.]—*S. hispidus*. A Gaboon species identified by some with *S. kombé*. The seeds contain strophanthin, and probably do not differ in properties from those of *S. kombé*. [a, 35.]—*S. kambé, S. kombé*. A weedy climber of Gaboon, where the seeds and those of other species are used as an arrow-poison (*kombé inée*, or *onage*), which acts directly on the heart muscle. They contain strophanthin (the active principle) and ineine. The tincture is used as a heart tonic, like digitalis, though more stimulant and less permanent in its effects. It is considered superior to digitalis as a diuretic, and is recommended in renal complaints with secondary heart-failure. [a, 35.]—*S. seed*. Lat., *semen strophanthi*. The seed of several species of *S*. Those of *S. kombé* are from 1½ to 2½ cm. in length and from 4 to 5 mm. in breadth, and have a keel-shaped ridge on each of the flattened sides, one much more prominent than the other. They are covered with appressed silky hairs, varying in color from grayish-green to brown. Those of *S. hispidus* are brown. Another sort, known as white *s*-seed, are more densely covered with nearly white hairs. [a, 35.]

**STROPHIOLE**, n. *Stro<sup>2</sup>f'i<sup>2</sup>ol*. Gr., *στροφίον* (dim. of *στροφος*, a twisted band). Lat., *strophiola, stropholum*. Fr., *s*. Ger., *Nabeldecke*. See **APPENDIX Funicularis** and **CARUNCLE** (2d def.).

**STROPHIUM** (Lat.), n. n. *Stro<sup>2</sup>f(i<sup>2</sup>)'i<sup>2</sup>u<sup>2</sup>m(u<sup>2</sup>m)*. Gr., *στροφίον* (dim. of *στροφος*, a band). 1. A bandage. 2. See **STROPHIOLE**.

**STROPHOCEPHALIA** (Lat.), n. f. *Stro<sup>2</sup>f-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-al(a<sup>2</sup>)'i<sup>2</sup>u<sup>2</sup>*. From *στροφος*, a twisted band, and *κεφαλή*, the head. The condition of a strophocephalus. [a, 34.]

**STROPHOCEPHALUS** (Lat.), n. m. *Stro<sup>2</sup>f-o(o<sup>2</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>2</sup>l(a<sup>2</sup>)'i<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s)*. Of Geoffroy St.-Hilaire. A rare form of monster having ectopia of the different organs and parts forming the head and face. [a, 34.]

**STROPHULUS** (Lat.), n. m. *Stro<sup>2</sup>f'u<sup>2</sup>(u<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s)*. Probably from *strophus* (q. v.), since *s*. has often been ascribed to gastric disorders. Fr., *strophule, dartre poussée, poussée, ébullition, taches de lait*. Ger., *rothes Ausfahren, Schalknötchen, Hitzblätchen, Wiebeln*. Gum-rash, red-gum, gown, red-gown, tooth-rash, milk-spots, lichen of infants; an obsolescent term for certain papular, erythematous, and eczematous skin eruptions in infants, usually of an avanescent character. [G.]—*S. albidus*. Ger., *weisse Gesänte*. White-gum. The affection described by Willan and others under this name does not correspond to the other varieties of *s*, but rather to milium. [G, 28.]—*S. candidus*. "Pallid-gown"; *s*. in which the papules are pale-red or whitish and usually of larger size than in the ordinary forms; probably a form of urticaria. [G, 28.] Cf. *URTICARIA papulosa*.—*S. confertus*. Rank red-gum; a variety in which the papular lesions are closely packed together or aggregated in clusters. [G, 28.]—*S. dentitionis*. See **TOOTH-RASH**.—*S. intertrictus*. A form in which the pimples are distributed over the surface so as to give it a mottled appearance, most commonly on the face, neck, hands, and arms. [G, 28.]—*S. juvenalis*. A variety affecting young persons; the lichen simplex of Willan. [G, 5.]—*S. neonatorum*. The *s*. of new-born children. Fuchs describes the following varieties: *albidus, intertrictus, and lenticularis (candidus)*. [G, 6.] See *S. albidus*, etc.—*S. pruriginosus*. A form of eruption consisting of rather large, disseminated papules, some of a red color and accompanied with erythema, others not differing in hue from the surrounding skin, which occasion intense itching, especially at night, and show little black crusts on their summits. The disease occurs in infants and young persons, affecting especially the upper portions of the body, less frequently the legs. Its duration varies from a few days to several months. [G, 51.]—*S. simple* (Fr.). Of Hardy. The ordinary forms, except *s. pruriginosus*. [G, 51.]—*S. volutatus*. "Wildfire rash"; an obsolete term for an ephemeral eruption in infants, sometimes erythematous and sometimes vesicular. [G, 28.]

**STROPHOS** (Lat.), n. m. *Stro<sup>2</sup>f'o<sup>2</sup>s*. Gr., *στροφος* (from *στροφή*, to twist). See **VOLVULUS**.

**STROTZEN** (Ger.), n. *Stro<sup>2</sup>t'ze<sup>2</sup>n*. Turgescence. [A, 521 (a, 48).]

**STROYL**, n. Stroll. The *Triticum repens*. [A, 505 (a, 21).]

**STRUCTURAL**, adj. *Stru<sup>2</sup>kt'u<sup>2</sup>r-l*. From *struere*, to build. Pertaining to or affecting structure (cf. *S*. DISEASE. [a, 48].

**STRUMA** (Lat.), n. f. *Stru<sup>2</sup>m(strum)'a<sup>2</sup>*. Fr., *strume* (2d def.). Ger., *S. Kropf* (2d def.). 1. Scrofula. 2. Goitre. [E.] 3. In botany, a cushion-like swelling or protuberance. [a, 35.]—*S. amyloid*. See **AMYLOID DEGENERATION**.—*S. aneurysmatica*. See **ANEURYSMAL GOITRE**.—*S. colloid*. See **Colloid goitre**.—*S. congenita*. See **CONGENITAL GOITRE**.—*S. cystica* (parenchymatosa). See **Cystic goitre**.—*S. cystica pulsans*. See **Pulsating goitre** (2d def.).—*S. fibrosa*. See **Fibroid goitre**.—*S. follicularis*. Ger., *Drüsenkropf*. See **Follicular goitre**.—*S. gangliosa*. See **Ganglionic goitre**.—*S. gelatinosa*. See **Colloid goitre**.—*S. hyperplastica*. 1. See **GOITRE**. 2. Goitre in which the gland becomes tattooed and nodular. [L, 57 (a, 50).]—*S. hyperplastica aneurysmatica*. See **ANEURYSMAL GOITRE**.—*S. hyperplastica fibrosa*. See **Fibroid goitre**.—*S. hyperplastica follicularis*. See **Follicular goitre**.—*S. hyperplastica varicosa*. Goitre with dilated veins.—*S. hyperplastica vascularis*. A vascular goitre in which there is

hyperplasia of the connective tissue. [a, 34.]—*S. hypertrophica simplex*. Simple hyperplasia of the thyroid gland. [a, 34.]—*S. intrathoracica*. A goitre occupying the anterior mediastinum. [a, 34.]—*S. intrauterina congenita*. Of Spiegelberg, a simple parenchymatous hyperplasia of the thyroid gland in the newborn; to be distinguished from the transitory enlargement caused by the fact of a face presentation. [A, 15.]—*Strumae lipomatodes aberratae renis*. Of Grawitz, small fatty tumors having a connective-tissue network, found beneath the renal capsule. [Jour. de l'anat. et de la phys., 1891, p. 454 (a, 31).]—*Strumae lipomatodes suprarenales*. Neoplasms resembling strumae lipomatodes aberratae renis found within the suprarenal capsule. [a, 34.]—*S. lymphatica*. Of Walther, see **LYMPHATIC GOITRE**.—*S. maligna*. Cancer of the thyroid gland. [Braun, "Ctbl. f. Chir.," July 22, 1882, Beilage, p. 42.]—*S. mollis*. See **SOFT GOITRE**.—*S. ossea, S. petrosa*. See **Calcareous goitre**.—*S. pulsans*. See **Pulsating goitre**.—*S. varicosa*. See **Varicose goitre**.—*S. vascularis aneurysmatica*. See **Aneurysmal goitre**.—*S. vasculosa*. See **Pulsating goitre**.

**STRUMATOMIE** (Ger.), **STRUMECTOMIE** (Ger.), n's. *Strum-a<sup>2</sup>-tom-e'*, -e<sup>2</sup>k-tom-e'. Excision of the thyroid gland. [B.]

**STRUMIPRIVUS** (Lat.), adj. *Stru<sup>2</sup>m(strum)-i<sup>2</sup>-pri(pre)'v'u<sup>2</sup>s(wu<sup>2</sup>s)*. From *struma* (q. v.), and *privus*, deprived of. Fr., *strumipriva*. Deprived of the thyroid gland; of a morbid condition, due to loss of the thyroid gland (cf. **CACHEXIA strumipriva** and **MYXEDEMA**).

**STRUMITIS** (Lat.), n. f. *Stru<sup>2</sup>m(strum)-i(e)'ti<sup>2</sup>s*. Gen., -*ti<sup>2</sup>'idos (-idis)*. See **THYREOITIS**.

**STRUMODERMA** (Lat.), n. n. *Stru<sup>2</sup>m(strum)-o(o<sup>2</sup>)-du<sup>2</sup>'rin(-de<sup>2</sup>rm)'a<sup>2</sup>*. Gen., -*derm-atu(-atis)*. From *struma* (q. v.), and *derma*, the skin. See **SCROFULODERMA**.

**STRUMOSIS** (Lat.), n. f. *Stru<sup>2</sup>m(strum)-os'i<sup>2</sup>s*. Gen., -*os'eos (-is)*. From *struma* (q. v.). See **STRUMOSITAS**.

**STRUMOSITAS** (Lat.), n. f. *Stru<sup>2</sup>m(strum)-o<sup>2</sup>s(os)'i<sup>2</sup>t-a<sup>2</sup>s(a<sup>2</sup>s)*. Gen., -*at'is*. From *struma* (q. v.). Fr., *strumosité*. The goitrous or the scrofulous diathesis. [a, 34.]

**STRUMOUS**, adj. *Stru<sup>2</sup>m'u<sup>2</sup>s*. Lat., *strumous* (from *struma* [q. v.], Fr., *strumeux*. Ger., *strumös, kropfig*. Pertaining to, affected with, or of the nature of struma. [D.]

**STRUMPFIA** (Lat.), n. f. *Strumpf'i<sup>2</sup>a<sup>2</sup>*. Fr., *strumpfie*. A genus of the *Rubiaceae*. [a, 35.]—*S. maritima*. Fr., *faux romarin*. A West Indian shrub. The stimulant and tonic flowers and leaves are used for snake-bites and as a febrifuge. [a, 35.]

**STRUPPIG** (Ger.), adj. *Strup'pi<sup>2</sup>g*. See **HIRSTUTE**.

**STRUTHIN**, n. *Stru<sup>2</sup>th'i<sup>2</sup>n*. Fr., *struthine*. See **SAPONIN**.

**STRUTHIO** (Lat.), n. m. *Stru<sup>2</sup>th(struth)'i<sup>2</sup>-o*. Gen., -*on'is*. Gr., *στρουθίων*. The ostrich. [A, 312 (a, 21).]—*S. camelus*. Written also *struthiocamelus*. Gr., *στρουθιοκάμηλος*. Ger., *Strauss, Vogelstrauß*. The African ostrich. The shells of its eggs, *testa ovorum struthionis* (Ger., *Straussierschalen*), were formerly official. [a, 35, 39.]

**STRUTHIOPTERIS** (Lat.) n. f. *Stru<sup>2</sup>th(struth)-i<sup>2</sup>-o<sup>2</sup>pt'e<sup>2</sup>r-i<sup>2</sup>s*. Gen., -*pter'idis (-idis)*, -*pter'eos*. From *στρουθίων*, the ostrich, and *πτέρις*, a kind of fern. Fr., *struthioptère, struthiopteris*. A genus of ferns. The *Struthiopterides* are a section of the *Polypodiaceae*. [a, 35.]—*S. germanica*. Ostrich-fern; a species growing in Canada and in the northern United States. [a, 35.]

**STRUTHIUM** (Lat.), n. n. *Stru<sup>2</sup>th(stru<sup>2</sup>th)'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m)*. Gr., *στρουθίων*. The genus *Gypsophila* of the ancients, see **GYPHOPHILA** s. [a, 35.]

**STRYCHNÉ** (Fr.), adj. 1. Containing strychnine. 2. Consisting in the use of strychnine (said of a course of medication).

**STRYCHNIA** (Lat.), n. f. *Stri<sup>2</sup>k(stru<sup>2</sup>ch<sup>2</sup>)'ni<sup>2</sup>a<sup>2</sup>*. See **STRYCHNINE**.—**STRYCHNINE sulphas**. See **STRYCHNINE sulphate**.

**STRYCHNIC ACID**, n. *Stri<sup>2</sup>k'ni<sup>2</sup>k*. Fr., *acide strychnique*. See **IGABURIC ACID**.

**STRYCHNINA** (Lat.), n. f. *Stri<sup>2</sup>k(stru<sup>2</sup>ch<sup>2</sup>)'ni<sup>2</sup>(nen)'a<sup>2</sup>*. See **STRYCHNINE**.—**Granula strychnine** (Belg. Ph., Fr. Cod.). Fr., *granules de strychnine* [Fr. Cod.]. Pellets made of strychnine incorporated with sugar or milk-sugar and gum arabic, tragacanth, or honey, and containing each 1 milligramme of the drug. [B, 95 (a, 38).]—**Liquor strychnine hydrochloratis** [Br. Ph.]. A preparation made by dissolving 2 parts (by measure) of pure strychnine crystals in a mixture of 4 parts of hydrochloric acid of sp. gr. 1.052 and 48 of water, and adding 48 of alcohol of sp. gr. 0.838 and 98 of water. [B, 95 (a, 38).]—**Pilule strychnine**. A mass of 5 centigrammes of strychnine and 96 of confection of rose, divided into 12 pills. [B, 119 (a, 38).]—**Strychnine sulphas, Sulphas strychnine**. See **STRYCHNINE sulphate**.

**STRYCHNINE**, n. *Stri<sup>2</sup>k'nen*. Lat., *strychnina* [U. S. Ph., Br. Ph., Belg. Ph., Dan. Ph., Swed. Ph.], *strychninum* [Ger. Ph. (1sted.), Austr. Ph., Gr. Ph., Hung. Ph. (1sted.), Netherl. Ph., Russ. Ph., Swiss Ph.], *strychnia* [U. S. Ph., 1870], Fr., *s*. [Fr. Cod.], Gr., *Strychnin, It., stricinina*. Sp., *estrícinica* [Sp. Ph.]. An alkaloid,  $C_{21}H_{22}N_2O_2$ , obtained from the seeds of *Strychnos nuxvomica*, occurring as small, four-sided prisms or rectangular octahedra or as a crystalline powder, having neither color nor odor, but an exceedingly bitter and persistent taste. [B, 95 (a, 38).]—**Alcoolé de s**. (Fr.). See **Tinctura strychnini**.—**Azotate de s**. (Fr.). See **S. nitrate**.—**Granules de s**. (Fr.). See **Granula strychnini**.—**Pilules de s**. (Fr.). See **Pilule strychnine**.—**Sirap de sulfate de s**. [Fr. Cod.] [Fr.]. Sp., *jarabe de sulfato estrícnico* [Sp. Ph.]. A solution of 5 centigrammes of *s*. sulphate in 4 grammes [Fr. Cod.] (the necessary amount [Sp. Ph.]) of water, mixed with 195 grammes [Fr. Cod.] (200 [Sp. Ph.]) of syrup. [B, 95 (a, 38).]—**S**. hydrate. A substance,  $C_{21}H_{22}N_2O + H_2O$ , obtained as a white precipitate by boiling *s*. in a solution of caustic soda with alcohol,

evaporating, and directing a jet of carbonic-acid gas upon the residuum after dissolving it in water. [<sup>14</sup> Am. Jour. of Pharm., Nov., 1888, p. 504 (a, 50).]—**S. nitrate**. Lat., *nitras strychnini* [Netherl. Ph.] (see *strychnicus* [Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph.]), *strychninum nitricum* [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (2d ed.), Russ. Ph.], Fr., *azotate de s.* [Fr. Cod.], Ger., *Strychninitrat* [Ger. Ph.], A compound of s. and nitric acid,  $C_{21}H_{22}N_2O_9 \cdot NHO_3$ . [B, 95 (a, 38).]—**S. plant**. See *STRYCHNOS nuc vomica*.—**S. sesquioxide**. The compound  $(C_{21}H_{22}N_2O_9)_2O_3$ . [B, 10.]—**S. sulphate**. Lat., *strychnine sulphas* [U. S. Ph.], *strychninum sulfuricum* [Gr. Ph., Russ. Ph.], *sulphas strychnine* [Belg. Ph.], Fr., *sulfate de s.* [Fr. Cod.], Sp., *sulfato estricnico* [Sp. Ph.]. A substance,  $(C_{21}H_{22}N_2O_9)_2SH_2O_4 + 7H_2O$ , occurring as colorless, transparent, prismatic or acicular crystals, or as a white, crystalline powder, having no odor but a very bitter taste. S. sulphate is the s. salt usually employed in medicine. It is soluble in 10 [U. S. Ph., Roum. Ph.] (40 [Gr. Ph.], 42 [Russ. Ph.]) parts of cold water, in 1 part [Russ. Ph.] (2 parts [U. S. Ph.]) of boiling water or boiling alcohol, in 60 [U. S. Ph.] (80 [Gr. Ph.], 82 [Russ. Ph.]) parts of cold alcohol, is insoluble in ether, and melts at 135° C., losing 14.1 per cent. of its water of crystallization [U. S. Ph.], [B, 95 (a, 38).]—**Teinture de s.** (Fr.). See *Tinctura STRYCHNINI*.

**STRYCHNINIC ACID**, n. *Stri'k-ni'ni'k*. Fr., *acide strychnique*. A substance produced by the oxidation of strychnine, occurring in colorless needles, of acid reaction, and forming crystallizable salts. [B, 93 (a, 14).]

**STRYCHNINUM** [Ger. Ph. (1st ed.), Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (1st ed.), Netherl. Ph., Russ. Ph.] (Lat., n. *Stri'k'-stru'ch2-ni(nen)'u3m(u4m)*). See *STRYCHNINE*.—**Nitras strychnini**. S. *nitricum*. See *STRYCHNINE nitrate*.—**S. sulfuricum**. See *STRYCHNINE sulphate*.—**Tinctura strychnini**. A tincture made with 16 centigrammes of strychnine and 30 grammes of 36-per-cent. alcohol. [B, 119 (a, 38).]

**STRYCHNISATION** (Fr.), n. *Strek-ne-za3-se-o'n2*. The state of being under the influence of strychnine.

**STRYCHNISM**, n. *Stri'k-nizm*. Lat., *strychnismus*. Fr., *strychnisme*. Of M. Hall, the associated phenomena produced by the administration of large doses of strychnine. [a, 34.]

**STRYCHNIUM** (Lat.), n. *Stri'k(stru'ch2)'ni2-u3m(u4m)*. A univalent radicle,  $C_{21}H_{22}N_2O_9$ , bearing the same relation to strychnine that ammonium bears to ammonia. The addition compounds of strychnine with acids may be regarded as substitution compounds of s. with acids. [B, 2.]

**STRYCHNOL**, n. *Stri'k'no2l*. See *STRYCHNINE hydrate*.

**STRYCHNOMANIA** (Lat.), n. f. *Stri'k(stru'ch2)'no(no3)-man(ma'ny)'i2-a2*. From *στρονυχος*, nightshade, and *μανια*, madness. Ger., *Strychnomanie*. An old term for the delirium resulting from eating belladonna. [A, 540 (a, 34).]

**STRYCHNOS** (Lat.), n. f. *Stri'k(stru'ch2)'no2s*. Gr., *στρονυχος*. Fr., s., *vomitique*. Ger., s., *Krähenaugenbaum*. A genus of the Loganiaceae. The *Strychnaceae* are an order of the *Hypanthae*, consisting of *S.*; the *Strychnaceae* are a family of plants comprising *S.*, *Fagraea*, etc.; the *Strychnae* (Fr., *strychnées*) are an order of the *Corolliflorae*, now included in the *Loganiaceae*; and the *Strychnideae* are a family of the *Jasminariaceae* consisting of the *Carisseae* and *Strychnae*. [a, 35.]—**Aqua strychni Rademacheri**. See *Aqua NUCUM VOMICARUM*.—**Extractum strychni**. See *Extractum NUCIS VOMICAE*.—**Extractum strychni aquosum** [Ger. Ph., 1st ed., Russ. Ph.]. Syn.: *extractum nucis vomicae aquosum* [Gr. Ph., Swiss Ph.]. An aqueous extract made from the seed of *S. nux vomica* by exhaustion with boiling (hot [Swiss Ph.]) water and evaporation to dryness (thickness [Gr. Ph.]). [B, 95 (a, 38).]—**Extractum strychni fluidum**. See *Extractum NUCIS VOMICAE fluidum*.—**Extractum strychni siccum**. See *Extractum NUCIS VOMICAE spirituosum pulveratum*.—**Extractum strychni spirituosum**. See *Extractum NUCIS VOMICAE*.—**Extractum strychni spirituosum cum dextrino**. See *Extractum NUCIS VOMICAE spirituosum pulveratum*.—**Semen (seu semina) strychni**. See *NUX VOMICA*.—**Semen strychni pulveratum**. The dried, powdered, and sifted seeds of *S. nux vomica*. [B, 95 (a, 38).]—**S. axillaris**. An East Indian species. The leaves are used for ulcers and the poisonous seeds for fevers. [a, 35.]—**S. bicirrhosa**. An East Indian species. The bitter root is used in abdominal pains and rheumatic affections of the joints, and the fruit-pulp in flatulent colic. [a, 35.]—**S. brachiata**. The *comida de venado* of Peru; probably poisonous, though its fruits are said to be eaten by certain animals. [a, 35.]—**S. castelneana**. A species growing on the upper Amazon, furnishing an ingredient of curare. [a, 35.]—**S. cogens**. A British Guiana species yielding a constituent of curare. [a, 35.]—**S. colubrina**. Fr., *bois (ou racine) de couleuvre*. Ger., *Schlangeholzbaum*. The snakewood of the East Indies, where the wood (*lignum colubrinum* [seu *serpentarium officinale*, seu *serpentum*, seu *mungos*]), especially that of the root, is used for snake-bites, as a febrifuge and anthelmintic, and in certain skin diseases. The bark and wood are said to contain respectively nearly 1 and 6 per cent. of mixed alkaloids (strychnine and brucine). [a, 35.]—**S. crevauxiana**, **S. Crevauxii**. A species found in French Guiana, where it is used in the preparation of curare. [a, 35.]—**S. gaultheriana**. The *hoang-nan* (or *hang*) of the Chinese, who use the poisonous bark in leprosy and hydrophobia. [a, 35.]—**S. Gubleri**. A species found on the upper Orinoco; used in making curare. [a, 35.]—**S. ignatia**, **S. Ignatii**. Fr., s. *de Saint-Ignace*. Ger., *bitterer Ignatiusbaum*. St. Ignatius's bean; a tree indigenous to the Philippine Islands. The hard, bony, inodorous, bitter seeds, the *ignatia* of the U. S. Ph., which have the same properties as *nux vomica*, contain 1.2 per cent. of strychnine and 0.5 per cent. of brucine, combined, according to Caldwell, with igasuric acid. [a, 35.]—**S. innocua**. Fr., s. *non nuisible*. An Egyptian and Senegal species said not to be poisonous. The acidulous pulp of the fruit is eaten. [a, 35.]—**S. ligustrina**. A tree of the Eastern Archi-

pelago, yielding a *lignum colubrinum* used like that of *S. colubrina*. It is thought to be the source of *bidara laut* (of the Indian bazaars), the wood of which contains 2.26 per cent. of brucine without strychnine. [a, 35.]—**S. minor**. A Malabar species. The fruit is used externally in mania. The root is used in diarrhoea and colic and externally in rheumatism. [a, 35.]—**S. muricata**. Ger., *stachel-früchtiger Krähenaugenbaum*. A species of Timor and neighboring islands, yielding a *lignum colubrinum*. All parts, especially the fruit, are bitter. The root is used as a febrifuge. [a, 35.] Cf. *S. ligustrina*.—**S. nux vomica**. Fr., *noix vomique*. Ger., *dichter Krähenaugenbaum*, *gemeiner Brechneussbaum*. The source of *nux vomica*; a tree indigenous to the East Indies, Indian Archipelago, etc., and found also in northern Australia. The bitter wood and root are used as a febrifuge and in snake-bites. The bark, false angustura-bark, official in the Sp. Ph. as *angustura falsa*, contains brucine. In the East Indies it is the chief ingredient in medicated oils applied to obstinate eruptions, such as those of leprosy and syphilis. The leaves are used externally in paralysis and rheumatism. [B, 95; a, 35.]—**S. potatorium**. Fr., s. *des buveurs*. Clearing (or water-filter) nut of the East Indies; a species that is not poisonous. The nut is rubbed on the inside of vessels to clarify foul water. The fruit is emetic and antidyenteric. The seeds are used in gonorrhoea and diabetes, and, pulverized and mixed with honey, are applied to boils to hasten suppuration. [a, 35.]—**S. pseudo-china**. Fr., *faux quina*. Brazilian copalchi-plant. The bark, which is said to contain extractive, resin, gum, an acid, and a nitrogenous body, but neither strychnine nor brucine, is used in Brazil, under the names of *quina de campo* and *quina de mendanha*, as a substitute for cinchona. [a, 35.]—**S. sameni** (Ger.). See *NUX VOMICA*.—**S. Schomburgkii**. A species of British Guiana, where it enters into the composition of curare. [a, 35.]—**S. spinosa**. Fr., s. *épineux*. Ger., *dorniger Krähenaugenbaum*. A Madagascar tree. The berries are used to prepare a vinous, mildly laxative beverage. The unripe fruit is bitter and poisonous. [a, 35.]—**S. tieute**. Fr., *upas tieuté*. Ger., *javanischer Krähenaugenbaum*, *Tschettik*. The most poisonous species, a Javanese shrub. The root-bark contains strychnine and is used to prepare an arrow-poison known as *upas tieute* (not to be confounded with the *upas antiar* of the *Antiaris toxicaria*). The dry seeds are said to contain strychnine and a trace of brucine. [a, 35.]—**S. toxicaria**, **S. toxifera**. A tree indigenous to British Guiana and the upper regions of the Orinoco and Amazon. The bark is used as an ingredient of curare. [a, 35.]—**S. yapurensis**. A poisonous species of the upper Amazon, believed to enter into the composition of curare. [a, 35.]—**Tinctura strychni**. See *Tinctura NUCIS VOMICAE*.—**Tinctura strychni aetherea** [Ger. Ph., 1st ed., Russ. Ph.]. A preparation made by macerating the coarsely powdered seeds of *S. nux vomica* with ten times as much spiritus aetheris for 8 days (5 days [Russ. Ph.]). [B, 95 (a, 38).]—**Tinctura strychni Rademacheri** [Russ. Ph.]. See *Tinctura NUCUM VOMICARUM Rademacheri*.

**STRYPHODENDRON** (Lat.), n. n. *Stri'f(stru'f)-no(no3)-den2'ro2n*. From *στροφόνος*, harsh, and *δένδρον*, a tree. Fr., s. A genus of leguminous trees of the *Adenanthereae*. [a, 35.]—**S. barbatimão**. The *barbatimão* of Brazil, where the bark, which is highly astringent, is used in wounds, burns, and even hernias. [a, 35.]—**S. jurema**. A species furnishing a bark (see *Jurema* BARK) similar in properties to that of *S. barbatimão*. Baillon identifies it with *Acacia niopo*. [a, 35.]—**S. polyphyllum**. The *angico* of Brazil, by some authors identified with *S. barbatimão*. It yields a translucent, brownish-red gum, which is used as a pectoral. [<sup>14</sup> Proc. of the Am. Pharm. Assoc., xxxi (a, 50); a, 35.]

**STRYPHONUS** (Lat.), adj. *Stri'f(stru'f)'nu3s(nu4s)*. Gr., *στρονφόνος* (from *στροφόν*, to contract). See *ASTRINGENT*.

**STUBITZA**, n. A place in Agram County, Croatia, where there are warm gaseous and alkaline springs. [a, 14.]

**STUBNYA**, n. A place in Thuróc County, Hungary, where there are warm alkaline and sulphurous springs. [L, 30, 57 (a, 14).]

**STÜCK** (Ger.), n. *Stu'k*. A piece, a part, a fragment. [L, 46 (a, 21).]—**Scheibenförmiges S. des Schläfenbeins**. See *Quadrato-jugal BONE* (1st def.) and *Metapterygoid BONE*.—**S'chen**. See *FRUSTULE*.

**STUFENJAHR** (Ger.), n. *Stuf'e2n-ya2r*. See *CLIMACTERIUM*.

**STUFFED**, adj. *Stu3ft*. Of the stem of a *Fungus*, filled with a spongy mass. [a, 35.]

**STUHL** (Ger.), n. *Strul*. See *CHAIR* and *STOOL*.—**S'ausleerung**, **S'entleerung**, **S'gang**. See *DEFECATION* (2d def.).—**S'verstopfung**. See *OBSTIPATION*.—**S'zäpfchen**. See *SUPPOSITORY*.

**STUMM** (Ger.), adj. *Stum*. See *DUMB*.

**STUMMEL** (Ger.), n. *Stum'me2l*. See *STUMP*.

**STUMP**, n. *Stu3mp*. Fr., *moignon*. Ger., *Stumpf*, *Stummel*. The part that is left after a portion of an organ has been removed by amputation or otherwise. [a, 48.]—**Conical s.** A troublesome condition, the result of insufficient flap, of sloughing, or of retraction of muscles, by which the bone is left after an amputation to be covered by granulation tissue. In a s. of this sort the cicatrix possesses very little vitality and is constantly liable to ulceration. The remedy is reamputation. [E.]

**STUMPSICHTIG** (Ger.), adj. *Stumpf'zi'ch2t'i2g*. See *AMBLYOPIC*.

**STUPA** (Lat.), n. f. *Stu3p(stup)'a2*. Gr., *στόν*, Fr., *étoupe*. Ger., *Werg*. 1. A tuft or mat of long hairs; tow. 2. A web consisting of simple or branched filaments forming the medullary stratum of the thallus of some lichens. [a, 35.]—**S. piceis liquida**. Tow impregnated with fresh tar; used as an antiseptic dressing.

**STUPACEOUS**, adj. *Stu3p-a'shu3s*. Lat., *stupaceus*. Resembling stupa; tow-like. [a, 35.]

**STUPE**, n. *Stu3p*. From *stupa*, tow. Flax or cloth dipped in a liquid to be applied in fomentation. [a, 48.]

**STUPEFACIENT**, adj. *Stu*<sup>p</sup>-e<sup>2</sup>-fa<sup>2</sup>/sh<sup>2</sup>nt. Gr., *ναρκωτικός*. Lat., *narcoticus*. Fr., *stupéfiant*. Ger., *betäubend*. Producing stupor.

**STUPEFACTION**, n. *Stu*<sup>p</sup>-e<sup>2</sup>-fa<sup>2</sup>k/shu<sup>2</sup>n. From *stupefacere*, to make numb. Gr., *ναρκωσις*. Fr., *stupéfaction*. Ger., *Betäubung*. 1. The act of making or becoming stupefied or insensible. 2. Stupor, narcosis. [D.]

**STUPEMANIA** (Lat.), n. f. *Stu*<sup>p</sup>(*stu*<sup>p</sup>)-e<sup>2</sup>-man(*ma*n<sup>2</sup>)/i<sup>2</sup>a<sup>2</sup>. From *stupor*, numbness, and *mania*, madness. Mental stupor. [a, 34.]

**STUPHA** (Lat.), n. f. *Stu*<sup>p</sup>(*stuf*)/a<sup>2</sup>. Gr., *στυπή*. See *STUPA*, *STUPE*, and *Sweat BATH*.

**STUPOR** (Lat.), n. m. *Stu*<sup>p</sup>(*stup*)/o<sup>2</sup>r. Gen., -or<sup>2</sup>is. Gr., *νάρκη*, *νάρκωσις*. Fr., *stupeur*. Ger., *S. Benommenheit, Betäubung*. A state of apathy with drowsiness.—**Anergic s.** Of Clouston, acute dementia. [a, 34.]—**Delusional s.** See *MELANCHOLIA with s.*—**Digitorum s. a gelu.** See *ONGLEE*.—**Epileptic s.** S. following an attack of epilepsy. [D, 36.]—**Lethargic s.** See *TRANCE*.—**Post-convulsive s.** S. following a convulsion, especially an epileptic convulsion. [D, 36.]—**S. a pressione.** Of Sauvages, apoplectic s. [a, 34.]—**S. formicans.** Of Sauvages, fornication. [a, 34.]—**S. melancholicus.** See *MELANCHOLIA with s.*—**S. miliaris.** Paræsthesia of the fingers and toes occurring before the eruption of military fever. [a, 34.]—**S. vigilans.** See *CATALEPSY*.

**STUPEOROUS**, adj. *Stu*<sup>p</sup>/o<sup>2</sup>r-u<sup>2</sup>a. 1. In a state of stupor. 2. Attended with stupor.

**STUPOSE**, adj. *Stu*<sup>p</sup>/o<sup>2</sup>s. Lat., *stuposus* (from *stupa*, tow). Fr., *stupeux*. Ger., *wergig*. Having a stupa (in either sense). [a, 35.]

**STUPPA** (Lat.), n. f. *Stu*<sup>p</sup>(*stup*)/pa<sup>2</sup>. See *STUPA*.

**STUPPEUS** (Lat.), adj. *Stu*<sup>p</sup>(*stup*)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). See *STUPACEOUS*.

**STUPRATION**, n. *Stu*<sup>p</sup>-ra<sup>2</sup>/shu<sup>2</sup>n. Lat., *stuprum*. Fr., *stupre*. See *RAPE*.

**STURDY**, n. *Stu*<sup>2</sup>rd/i<sup>2</sup>. See *GID*.

**STURGEON**, n. *Stu*<sup>2</sup>rg<sup>2</sup>/j<sup>2</sup>n. Fr., *esturgeon*. Ger., *Stör*. See *ACIPENSER*.

**STURMEISENHUT, STURMHUT** (Ger.), n's. *Sturm*/iz-e<sup>2</sup>n-hut, *sturm*/hut. See *ACONITE*.

**STURZGEBURT** (Ger.), n. *Sturts*/ge<sup>2</sup>-burt. Sudden, unexpected delivery; sometimes while the mother is standing. [L, 57 (a, 14).]

**STUTTERING**, n. *Stu*<sup>2</sup>t<sup>2</sup>/u<sup>2</sup>r-i<sup>2</sup>n<sup>2</sup>. Gr., *τραυλισμός*. Lat., *balbuties*. Fr., *balbutie, bégaiement*. Ger., *Stottern, Stammeln*. A defect in speech in which there is a spasmodic repetition of the same syllable. [a, 34.]—**Aphasic s.** The s. of aphasic persons. It is more or less spasmodic in characters. [D, 18.]

**STÜTZE** (Ger.), n. *Stu*<sup>2</sup>t<sup>2</sup>/s-e<sup>2</sup>. See *FULCRUM*.

**STÜTZGEWEBE** (Ger.), n. *Stu*<sup>2</sup>t<sup>2</sup>/s/ge<sup>2</sup>-vab-e<sup>2</sup>. Supporting tissue, usually connective tissue. [J.]

**STY**, n. *Sti*. See *HORDEOLUM*.

**STYERIC ACID**, n. *Sti*<sup>2</sup>s-e<sup>2</sup>r/i<sup>2</sup>k. Fr., *acide stérique*. Ger., *Steyrinsäure*. Phenylglyceric acid; an acid, C<sub>8</sub>H<sub>6</sub>CH(OH)CH(OH)CO.OH, crystallizing from ether as shining plates, melting and decomposing at about 144° C. [B, 3 (a, 38).]

**STYERIN**, n. *Sti*<sup>2</sup>s-e<sup>2</sup>r-o<sup>2</sup>. Fr., *stycérine*. Ger., *S.* A triatomic alcohol, C<sub>9</sub>H<sub>12</sub>O<sub>3</sub> = C<sub>3</sub>H<sub>4</sub>(C<sub>2</sub>H<sub>5</sub>)<sub>2</sub>(OH)<sub>3</sub>, of the aromatic series, derived from glycerin. It forms a light-yellow, gummy, bitter mass. [B, 93 (a, 14).]

**STYEROL**, n. *Sti*<sup>2</sup>s-e<sup>2</sup>r-o<sup>2</sup>. Fr., *stycérol*. Phenylglycerol; a substance, C<sub>9</sub>H<sub>8</sub>CH(OH)CH(OH)CH<sub>2</sub>OH, occurring as a bitter, gum-like mass decomposing when heated. [B, 3 (a, 38).]

**STYLAGRA** (Lat.), n. f. *Stil*(*stu*<sup>2</sup>l)/a<sup>2</sup>g(a<sup>2</sup>g)-ra<sup>2</sup>. From *stýlos*, a pillar, and *άγρα*, a seizure. Ger., *Stielzange*. See *ANTHOCORYNUS*.

**STYLATE**, adj. *Stil*/at. Having a persistent style. [a, 35.]

**STYLE**, n. *Stil*. Gr., *στύλος*. Lat., *stylus*. Fr., *s.* Ger., *Griffel*. 1. The stalk of the stigma; the usually attenuated part of a pistil or carpel, inclosing one or more canals usually filled with thin-walled cellular tissue, connecting the ovary with the stigma. [a, 35.] 2. See *STYLET*.—**Apical s.** A s. arising from the top of the ovary. [a, 35.]—**Basilar s.** Basilar s. A s. attached to the base of the ovary. [a, 35.]—**Lacrymal s.** A stylet made of lead or flexible silver, usually solid, though sometimes tubular, which is introduced through the lacrymal canaliculus and sac into the nasal duct. It is intended to be worn for a length of time in order to maintain the calibre of the duct after a stricture has been divided. [F.]—**Lateral s.** A s. inserted on one side of the ovary. [a, 35.]

**STYLET**, n. *Stil*-e<sup>2</sup>t<sup>2</sup>. From *stylus*, a pointed instrument. Fr., *s. stiel, stilette*. Ger., *Stilet*. 1. A probe. 2. A wire or slender rod passed through a trocar or catheter, for purposes of perforation or of stiffening. [a, 48.]

**STYLIUM** (Lat.), n. n. *Stil*(*stu*<sup>2</sup>l)-i<sup>2</sup>d/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *stýlos*, a pillar. Ger., *Fadenstielchen* (1st def.). 1. In certain *Fungi* (*Podaricini*), a column, formed by the stipe, traversing the peridium. 2. Of Loureiro, the genus *Markea*. 3. Of Swartz, the principal genus of the styliaceae (*Styliaceae*, *Styliaceae*, or *Styliaceae*, an order of monopetalous dicotyledonous plants of the cohort *Campanulales*, chiefly Australian herbs. [a, 35.]

**STYLIN**, adj. *Stil*/i<sup>2</sup>n. Lat., *stylinus*. Pertaining to the style. [a, 34.]

**STYLISCUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-i<sup>2</sup>sk/n<sup>2</sup>s(u<sup>2</sup>s). Gr., *στυλίσκος* (dim. of *stýlos*, a pillar). Fr., *stylisque*. Ger., *Stielchen*. 1. See *COLUMELLA* (5th def.). 2. The channel leading into the ovary of a flower from the stigma through the style. [a, 35.]

**STYLO-AURICULARIS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)/'o(o<sup>2</sup>)-a<sup>2</sup>r-(u<sup>2</sup>-u<sup>2</sup>r)-i<sup>2</sup>k-u<sup>2</sup>l(u<sup>2</sup>l)-a<sup>2</sup>a<sup>2</sup>/ri<sup>2</sup>s. From *stýlos* (see *STYLOID*) and *auricula*, the external ear. An anomalous muscle which arises from the styloid process of the temporal bone, and is inserted into the cartilage of the external auditory meatus. [L, 332.]

**STYLOCERATOHYOIDEUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)/'o(o<sup>2</sup>)-se<sup>2</sup>r(ke<sup>2</sup>r)/a<sup>2</sup>t(a<sup>2</sup>t-o(o<sup>2</sup>)-i<sup>2</sup>d(hu<sup>2</sup>)-o(o<sup>2</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *stýlos* (see *STYLOID*), *κέρας*, a horn, and *υοειδής*, hyoid. Fr., *stylocérato-hyoïdien*. See *STYLOHYOID*.

**STYLOCHONDROHYODES** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)/'o(o<sup>2</sup>)-ko<sup>2</sup>nd(ch<sup>2</sup>o<sup>2</sup>nd)/ro(ro<sup>2</sup>)-hi(hu<sup>2</sup>)-od(e<sup>2</sup>z/as). From *stýlos* (see *STYLOID*), *χόνδρος*, cartilage, and *υοειδής*, hyoid. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the lesser cornu of the hyoid bone. [L, 332.]

**STYLOCORYNA** (Lat.), n. f. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-ko<sup>2</sup>r/i<sup>2</sup>n(u<sup>2</sup>n)-a<sup>2</sup>. From *stýlos*, a pillar, and *κόρυνη*, a club. A genus of the *Rubiaceae*. [a, 35.]—**S. Rheedii**. A Malabar tree. The root-bark is used as an emmenagogue and to expel the placenta, and the astringent unripe fruit in diarrhoea, dysentery, etc. [a, 35.]

**STYLO-GLOSSAL**, adj. *Stil*-o-glo<sup>2</sup>s/s'l. From *stýlos* (see *STYLOID*), and *γλῶσσα*, the tongue. Pertaining to the styloid process of the temporal bone and to the tongue. [a, 48.]

**STYLOGLOSSUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-glo<sup>2</sup>s(glos)/su<sup>2</sup>s-(su<sup>2</sup>s). Fr., *stylo-glosse*. Ger., *Griffelzungenmuskel*. A muscle which arises from the styloid process of the temporal bone and the stylomaxillary ligament and is inserted into the side and lower surface of the tongue nearly to its tip. [L, 31, 142, 332.]

**STYLOHYAL**, adj. *Stil*-o-hi<sup>2</sup>/l. See *STYLO-HYOID*.

**STYLO-HYOID**, adj. *Stil*-o-hi<sup>2</sup>oid. From *stýlos* (see *STYLOID*), and *υοειδής*, hyoid. Fr., *stylo-hyoïdien*. Pertaining to the styloid process of the temporal bone and to the hyoid bone. [a, 48.]

**STYLOHYOIDEUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-hi(hu<sup>2</sup>)-o(o<sup>2</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Fr., *stylo-hyoïdien*. Ger., *Griffelhörnchenmuskel, Griffelzungenbeinmuskel*. A muscle which arises from the styloid process of the temporal bone and is inserted into the body or great cornu of the hyoid bone. [L.]—**S. accessorius**, **S. alter**, **S. minor**, **S. novus**, **S. profundus**, **S. secundus**. See *STYLOCHONDROHYODES*.

**STYLO-HYOÏDIEN** (Fr.), adj. *Ste*-lo-e-o-e-de-a<sup>2</sup>n<sup>2</sup>. Stylo-hyoid; as a n., the stylo-hyoid muscle. [a, 17.]

**STYLOID**, adj. *Stil*oid. From *stýlos*, a pillar, and *είδος*, resemblance. Lat., *styloideus*, *graphioides*. Fr., *styloïde*. Ger., *stielförmig*. Resembling a style or pointed instrument (said of certain osseous processes). [a, 48.]

**STYLOÏDE** (Fr.), adj. *Ste*-lo-ed. Styloid; as a n., a styloid process or bone. [A, 385 (a, 48).]—**S. de l'os hyoïde** [Agassiz]. See *Stylo-hyal* NONE.

**STYLOLARYNGEUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-ia<sup>2</sup>r(la<sup>2</sup>r)-i<sup>2</sup>n(u<sup>2</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From *stýlos* (see *STYLOID*), and *λάρυγξ*, the larynx. See *PHARYNGOEPIGLOTTICUS*.

**STYLOMASTOID**, adj. *Stil*-o-ma<sup>2</sup>stoid. For deriv., see *STYLOID* and *MASTOID*. Ger., *stylo mastoïdisch*. Pertaining to the styloid and mastoid processes of the temporal bone. [a, 48.]

**STYLOMAXILLARIS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-ma<sup>2</sup>x-(ma<sup>2</sup>x)-i<sup>2</sup>l-la(la<sup>2</sup>)/ri<sup>2</sup>s. Fr., *stylo-maxillaire*. 1. See *DIGASTRICUS* (2d def.). 2. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the stylo-maxillary ligament. [L.]

**STYLO-MAXILLARY**, adj. *Stil*-o-ma<sup>2</sup>x/i<sup>2</sup>l-a-ri<sup>2</sup>. From *stýlos* (see *STYLOID*), and *maxilla* (q. v.). Pertaining to the styloid process of the temporal bone and to the jaw. [a, 48.]

**STYLOPHARYNGEUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-fa<sup>2</sup>r(fa<sup>2</sup>r)-i<sup>2</sup>n(u<sup>2</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From *stýlos* (see *STYLOID*), and *φάρυγξ*, the pharynx. Fr., *stylo-pharyngien*. Ger., *Griffelschlundkopfmuskel* (1st def.), *oberer Zungenbeinastmuskel des Schlundkopfes* (2d def.). 1. A muscle which arises from the base of the styloid process of the temporal bone and is inserted into the side of the pharynx, the margin of the glottis, and the pharyngo-epiglottidean ligament. [L, 31, 142, 332.] 2. A muscle of the lower animals arising from the styloid bone and inserted into the side of the pharynx, of which it is a constrictor. [L.]—**S. internus**. An anomalous duplication of the s. [L, 332.]

**STYLOPHARYNGOLARYNGEUS** (Lat.), n. m. *Stil*(*stu*<sup>2</sup>l)/'o(o<sup>2</sup>)-fa<sup>2</sup>r(fa<sup>2</sup>r)-i<sup>2</sup>ng<sup>2</sup>'o(o<sup>2</sup>)-la<sup>2</sup>r(la<sup>2</sup>r)-i<sup>2</sup>n(u<sup>2</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From *stýlos* (see *STYLOID*), *φάρυγξ*, the pharynx, and *λάρυγξ*, the larynx. See *STYLOPHARYNGEUS* (1st def.).

**STYLOPODIUM** (Lat.), n. n. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-pod(po<sup>2</sup>d)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *stýlos*, a pillar, and *πους*, the foot. Fr., *stylo-pode*. Ger., *Griffel fuss, Griffelpolster*. A disc-like enlargement at the base of some styles. [a, 35.]

**STYLOSANTHES** (Lat.), n. f. *Stil*(*stu*<sup>2</sup>l)-os-a<sup>2</sup>nth(a<sup>2</sup>nth)/ez(as). From *stýlos*, a pillar, and *άνθος*, a flower. A genus of the *Leguminosae*. The *Stylosanthes* are a subtribe of the *Hedyarææ*. [a, 35.]—**S. procumbens**, **S. viscosa**. A laxative and diuretic species found in Brazil. [a, 35.]

**STYLOSPORE**, n. *Stil*-o-spor. From *stýlos*, a pillar, and *σπόρος*, a seed. Fr., *s.* A spore borne upon a filament; as in lichens, a colorless, usually oblong, body abjoined from a sterigma in a special conceptacle (pycnide). [a, 35.]

**STYLO-STAPHYLIN** (Fr.), adj. *Ste*-lo-sta<sup>2</sup>-fo-la<sup>2</sup>n<sup>2</sup>. Pertaining to the styloid process of the temporal bone and to the velum of the palate. [a, 48.]

**STYLOSTEGIUM** (Lat.), n. n. *Stil*(*stu*<sup>2</sup>l)-o(o<sup>2</sup>)-ste(je<sup>2</sup>steg<sup>2</sup>)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *stýlos*, a pillar, and *στέγος*, a house. Ger., *Griffeldeckel*. See *GYNOSTEGIUM*.

**STYLOSTEMON**, n. Stil-o-stem'o'n. From *στυλος*, a pillar, and *στέμων*, a thread. Of Münch, a stamen inserted on the style. [a, 35.]

**STYLOSTEMUS** (Lat.), adj. Stil(stu)<sup>st</sup>-o-(o<sup>3</sup>)-stem(stam)/u's (u's). From *στυλος*, a pillar, and *στέμων*, a thread. Fr., *stylostème*. Ger., *griffelstaudfädig*. Having a style and stamens; of Desvieux, hermaphrodite. [a, 35.]

**STYLOSTEOPHYTUM** (Lat.), n. n. Stil(stu)<sup>st</sup>-o-(o<sup>3</sup>)-st-e<sup>2</sup>-o<sup>2</sup>f/<sup>2</sup>t-(u't)-u'm(u'm). From *στυλος*, a pillar, *στέων*, a bone, and *φύτον*, a plant. A style-shaped exostosis. [L, 50 (a, 48).]

**STYLOSTIXIS** (Lat.), n. f. Stil(stu)<sup>st</sup>-o-(o<sup>3</sup>)-sti<sup>2</sup>x/<sup>1</sup>is. Gen., -stir'eos (-is). From *στυλος*, a pillar, and *στίξ*, a pricking. See ACUPUNCTURE.

**STYLOSUS** (Lat.), adj. Stil(stu)<sup>st</sup>-os/u's(u's). Having very long or numerous styles. [a, 35.]

**STYLO-THYRO-PHARYNGIEN** (Fr.), n. Ste-lo-te-ro-fa<sup>n</sup>-r<sup>n</sup>2-zhe-a<sup>n</sup>2. See STYLOPHARYNGEUS.

**STYLOTONSILLARIS** (Lat.), n. m. Stil(stu)<sup>st</sup>-o-(o<sup>3</sup>)-to<sup>2</sup>ns-(lens)-i<sup>2</sup>-la(la)<sup>3</sup>/ri<sup>2</sup>s. From *στυλος* (see STYLOID), and *tonsilla*, a tonsil. Of Luschka, fibres of the stylopharyngeus that are inserted into the fibrous covering of the tonsil. [L, 332.]

**STYMA** (Lat.), n. n. Stim(stu)<sup>m</sup>/a<sup>3</sup>. Gen., *stym'atos* (-atis). Gr., *στυμα* (from *στένν*, to erect). Fr., *styme*. See PRIAPISM.

**STYMATOSIS** (Lat.), n. f. Stim(stu)<sup>m</sup>-a<sup>2</sup>-(a<sup>3</sup>t)-os/<sup>1</sup>is. Gen., -os'eos (-is). From *στυμα*, priapism. Ger., *Harnröhrenblutung*. Haemorrhage from the penis, especially when associated with priapism. [L, 50 (a, 14); a, 34.]—*S. prostatica*. Ger., *Vorsteherdrüsenharnröhrenblutung*. S. originating in the prostate. [L, 50 (a, 14).]—*S. seminalis*. S. originating in the seminal vesicles. [L, 50 (a, 14).]—*S. testicularis*. S. originating in the testicles. [L, 50 (a, 14).]

**STYPHAGE** (Fr.), n. Ste-fa<sup>2</sup>zh. 1. A process for modifying the action of an energetic external revulsive (or refrigerant) by interposing some textile substance. ["Sem. méd.," 1887, p. 419 (a, 18).] 2. Of Bailey, local refrigeration by the application of pledgets of lint steeped in methyl chloride. ["Lancet," Mar. 10, 1888, p. 489 (a, 50).]

**STYPHELIA** (Lat.), n. f. Sti<sup>2</sup>f(stu)<sup>f</sup>-el(e<sup>2</sup>l)<sup>2</sup>/i<sup>2</sup>a<sup>2</sup>. From *στυφελός*, rough. Fr., *styphélie*. A genus of the *Stypeliaceae* or *Stypeliaceae* (a division of the *Eparideae*). [a, 35.]—*S. humifusa*. See *ASTROLOMA humifusum*.

**STYPHNIC ACID**, n. Sti<sup>2</sup>f(ni)<sup>2</sup>k. Fr., *acide styphnique*. Ger., *Styphninsäure*. Trinitroresorcinol, C<sub>6</sub>H<sub>3</sub>(NO<sub>2</sub>)<sub>3</sub>(OH)<sub>3</sub>, crystallizing from dilute alcohol as large, sulphur-yellow hexagons. [B, 3 (a, 38).]

**STYPSIS** (Lat.), n. f. Sti<sup>2</sup>ps(stu)<sup>p</sup>/i<sup>2</sup>s. Gen., *styps'eos* (-is). Gr., *στυψις* (from *στέφνν*, to contract). Fr., s. 1. The application or the action of a styptic. [a, 17.] 2. See CONSTIPATION.

**STYPTERIA** (Lat.), n. f. Sti<sup>2</sup>pt(stu)<sup>pt</sup>-e(a)/ri<sup>2</sup>a<sup>2</sup>. Gr., *στυπτερία*. See ALUM.—*S. ægyptia*. Egyptian alum; the best sort of alum known to the ancients. It was recommended by Hippocrates as an application to painful swellings of the gums, and, mixed with goose-grease, made into a pessary with wool; and applied to the os uteri with a view of promoting fecundity. It is uncertain whether this was a true alum or an iron sulphate. It was made from a stone called chalcitis (χαλκίτης), thought by some to be rock-alum. [B, 115, 200.]

**STYPTIC**, adj. Sti<sup>2</sup>pt/<sup>1</sup>2k. Gr., *στυπτικός*. Lat., *stypticus*. Fr., *styptique*. Ger., *styptisch*. Astringent, hæmostatic; as a n., a remedy which arrests hæmorrhage by its local astringent action or by coagulating the blood. [a, 17.]—Eaton's s. French brandy highly impregnated with calcined green vitriol. [L, 84.]—Pagliari's s. See *AQUA hæmostatica*.

**STYRACIFLUUS** (Lat.), n. f. Sti<sup>2</sup>r(stu)<sup>r</sup>-a<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>f/<sup>1</sup>u<sup>2</sup>a<sup>2</sup>. Fr., *styracifluus*. Ger., *Styracifluss*. Astringent, hæmostatic; as a n., a remedy which arrests hæmorrhage by its local astringent action or by coagulating the blood. [a, 17.]—Eaton's s. French brandy highly impregnated with calcined green vitriol. [L, 84.]—Pagliari's s. See *AQUA hæmostatica*.

**STYRACIN**, n. Sti<sup>2</sup>r/a<sup>2</sup>s-i<sup>2</sup>n. Fr., *styracine*. Ger., *S. Cinnyl* cinnamate, C<sub>15</sub>H<sub>14</sub>O<sub>2</sub>(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>; the chief constituent of liquid storax, occurring as brilliant white bundles of crystals. [B, 3 (a, 38).]

**STYRACOL**, n. Sti<sup>2</sup>r/a<sup>2</sup>k-o<sup>2</sup>l. The cinnamic ether of guaiaicol. It has been recommended as an antiseptic and as a remedy in pulmonary tuberculosis and in chronic gastric, intestinal, and vesical catarrh. [Squibb, "Ephemeris," etc., Feb., 1893.]

**STYRACONE**, n. Sti<sup>2</sup>r/a<sup>2</sup>k-on. Fr., s. See CINNAMIC alcohol.

**STYRAX** (Lat.), n. m. and f. Stir(stu)<sup>r</sup>/a<sup>2</sup>x(a<sup>3</sup>x). Gen., *styr'acos* (-acis). Gr., *στυράξ*. Fr., *aliboufier* (1st def.), *aligoufier* (1st def.). Ger., *Storaxbaum* (1st def.). 1. A genus of plants forming, with *Symplocos*, *Halesia*, etc., an order (the *Styracaceae* [Fr., *styracées*] or *storaxworts*) of gamopetalous dicotyledons, of the cohort *Ebenales*. The *Styracaceae* (Fr., *styracées*) are: Of Sprengel and others, the *Styracaceae*; of Wood and others, a tribe of the latter. The *Styracaceae* are: Of Humboldt, Bonpland, and Kunth, the *Styracaceae*; of Bartling, a class including the orders *Styracaceae*, *Ebenaceae*, and *Sapotaceae*. The *Styracaceae* are: Of Nees and Martins, the *Styracaceae*; of Spach, the *Styracaceae* of Bartling. [a, 35.] 2. Of the U. S. Ph., see *LIQUID STORAX*. 3. See *STORAX* (1st def.).—*Emplastrum styracis compositum*. Sp., *emplastro de estoraque compuesto* [Sp. Ph.]. A plaster consisting of 690 parts of yellow wax, 1,035 of turpentine, 100 each of ladanum and mastic, 80 each of liquid storax and benzoin, 518 of oilbalm, 130 of pimenta, and 7 each of the oils of mint and wormwood. [B, 95 (a, 38).]—*Linimentum styracis* [Swiss Ph.]. A liniment consisting of 30 parts of liquid storax dissolved in 10 of alcohol, strained, and mixed with 5 of oil of sesame. [B, 95 (a, 38).]—*Liquid s.* See *LIQUID STORAX*.—*Onguent de s.* (Fr.). See *Unguentum styracis*.—*Pilule styracis* *baibaice* [Swed. Ph.]. Sp., *píldoras de estoraque opiadas* [Sp. Ph.]. A pill-mass consisting of 2 grammes of powdered opium, 4

of s., and 6 of powdered licorice [Swed. Ph.] (or of 1 gramme of extract of opium, 10 grammes of s., and the necessary amount of powdered licorice [Sp. Ph.]), divided into 100 pills. [B, 95 (a, 38).]—*Sapo styracis*. Ger., *Styraxeife*. A mixture of 100 parts of liquid storax, 250 of common soap, and 16 of balsam of Peru. [B, 108 (a, 14).]—*Solid s.* See *STORAX* (1st def.).—*Styracis benzoini balsamum*. See BENZOIN.—*S. alba*, *S. albus*. 1. White balsam of Peru. [B.] 2. A translucent, yellowish-red variety of storax, not now found in commerce. [B, 180 (a, 35); B, 200.]—*S. alcoal* (Fr.). See CINNAMIC alcohol.—*S. americana*. A shrub found in the southern United States and in the West Indies; said to yield an aromatic stimulant resin. [a, 35.]—*S. aureus*. Fr., *aliboufier doré*. A Brazilian species yielding a fragrant balsam resembling storax. [a, 35.]—*S. benzoïn*. Fr., *aliboufier* (ou *aligoufier*) *officinal*, *alibousier*. Ger., *gebräuchlicher Benzoëbaum*. The gum-benzoin shrub or tree; indigenous to Sumatra, Java, Borneo, Laos, and Siam. It is the source of benzoin. [a, 35.]—*S. bogotensis*. Ger., *Storax von Bogotä*. A balsamic product of an undetermined tree, probably a species of *S.*, growing in Bogotä. [a, 35.]—*S. calanitis*. Fr., *storax calamite*, *storax en pains* (2d def.). 1. Of the Gr. Ph., a variety of storax, probably produced by *S. officinalis*, consisting of dry brittle masses of yellowish agglutinated tears having the odor of vanilla; not now found in commerce. 2. A modern product found in the shops as a coarse dark powder mixed with a few friable lumps, said to be prepared at Trieste, Venice, and Marseilles by mixing coarsely powdered storax-bark with liquid storax. Sometimes common sawdust is used in place of the storax-bark, and sometimes oilbalm, honey, and earthy substances are added. [a, 35.]—*S. ferrugineus*. Fr., *aliboufier ferrugineux*. A Brazilian species said to yield a product similar to that of *S. officinalis*. [a, 35.]—*S. in graminis*. See *STORAX in grains*.—*S. liquida*. See *LIQUID STORAX*.—*S. liquida folio minore*. Of Ray, probably the *Liquidambra formosana*. [a, 35.]—*S. liquide* (Fr.). *S. liquidus* (*orientalis*). See *LIQUID STORAX*.—*S. officinalis*. Fr., *aliboufier officinal*, *alibousier*. Ger., *gebräuchlicher* (oder *officinaler*) *Storaxbaum*. The *styracis* of Dioscorides; a tall bush or small tree growing in countries on the Mediterranean, yielding storax and perhaps amygdaloid storax. [a, 35.]—*S. preparatus*. See *LIQUID STORAX*.—*S. punctatus*. A *Veragua* species. After the tree is cut down and allowed to remain several years on the ground, a gum-resin is collected from it and used as frankincense. [a, 35.]—*S. purifé* (Fr.). See *LIQUID STORAX*.—*S. reticulatus*. A Brazilian species yielding a fragrant storax-like balsam. [a, 35.]—*S. seife* (Ger.). See *SAPO styracis*.—*S. subenticulata*. A species found in southwestern Sumatra, where it is known by the same name (*kajoe keminjau*) as the *S. benzoïn*; possibly the source of a variety of benzoin known as *Penang benjamin* (storax-smelling benjamin). [a, 35.]—*Unguentum cum styrace* [Fr. Cod.]. *Unguentum styracis* [Gr. Ph., Swiss Ph.] (*compositum* [Belg. Ph.]). Fr., *onguent de s.* [Fr. Cod.]. Sp., *unguento de estoraque* [Sp. Ph.]. An ointment consisting of 150 [Fr. Cod.] [149 [Belg. Ph.], 120 [Sp. Ph., Gr. Ph.]] parts each of s., yellow wax, and elemi, with 270 of colophony and 225 of olive-oil [Fr. Cod.] [with 319 of larch turpentine and 284 of olive-oil [Belg. Ph.], with 240 each of colophony and olive-oil and 90 of mutton suet [Gr. Ph.], with 240 of colophony and 180 of walnut-oil [Sp. Ph.]; or of 300 parts of s. with 100 of yellow wax, 50 each of colophony and elemi, and 400 of olive-oil [Swiss Ph.]. [B, 95 (a, 38).]

**STYROGENIN**, n. Sti<sup>2</sup>r-o<sup>2</sup>/i<sup>2</sup>2n. A crystalline compound, C<sub>26</sub>H<sub>40</sub>O<sub>2</sub>, produced by the action of sulphuric acid on storax. [Mylius, "Pharm. Ctrbl.", 1882, p. 79; "Am. Jour. of Pharm.," July, 1882, p. 370 (B).]

**STYROL**, **STYROLENE**, n's. Stir'o<sup>2</sup>l, -en. Fr., *styrolène*. Ger., *Styrol*. Cinnamene obtained from liquid storax; a very refractive aromatic liquid, boiling at 144.5° C. [B, 3 (a, 38).]—*Styrolene alcohol*. Phenylglycol; a crystalline substance, C<sub>6</sub>H<sub>5</sub>·CH(OH)CH<sub>2</sub>OH. [B, 3 (a, 38).]

**STYROLIC ACID**, n. Sti<sup>2</sup>r-o<sup>2</sup>/i<sup>2</sup>2k. Fr., *acide styrolique*. See CINNAMIC acid.

**STYRONE**, n. Stir'on. Fr., s. Ger., *Styron*. 1. See CINNAMIC alcohol. 2. An antiseptic compound of storax and balsam of Peru. ["N. Y. Med. Jour.," June 11, 1892, p. 666 (a, 50).]

**STYRONYL**, n. Sti<sup>2</sup>r-o<sup>2</sup>n-i<sup>2</sup>l. 1. See PHENETHYL. 2. Phenyl-allyl, C<sub>6</sub>H<sub>5</sub>·CH·CH<sub>2</sub>, the triatomic radicle of cinnamic alcohol. [B, 3 (a, 14).] Cf. CINNYL.—*S. alcohol*. See CINNAMIC alcohol and PHENETHYL alcohol.—*S. chloride*. A liquid, C(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>·CH<sub>2</sub>·Cl. [B, 4.]

**STYRYL**, n. Sti<sup>2</sup>r/i<sup>2</sup>l. Fr., *styrile*. Ger., *S.* See STYRONYL.—*S. alcohol*. See STYRONYL alcohol.—*S. ether*. The compound (C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>O. [B, 4.]

**STYRYLIC ACID**, n. Sti<sup>2</sup>r-i<sup>2</sup>/i<sup>2</sup>2k. Fr., *acide styrylique*. See CINNAMIC alcohol.

**STYSIS** (Lat.), n. f. Sti<sup>2</sup>sis(stu)<sup>s</sup>/i<sup>2</sup>s. Gen., *stys'eos* (-is). From *στένν*, to erect. See PRIAPISM.

**SUÆDA** (Lat.), n. f. Su<sup>2</sup>-ed'(swa<sup>2</sup>e<sup>2</sup>d)-a<sup>2</sup>. Fr., *suæda*. A genus of chenopodiaceous herbs and shrubs. The *Suædeæ* and the *Suædineæ* are a subdivision (tribe) of the *Spiralobæ*. [a, 35.]—*S. fruticosa*. Shrubby saltwort of Arabia, Persia, Egypt, Senegal, Europe, and California; burned for barilla. [a, 35.]—*S. maritima*. Fr., *blanchette*, *blanquette*. Sea-blithe, sea-side goosefoot, white glasswort; growing in Europe and Siberia; used to prepare soda and as salad. [a, 35.]—*S. maxima*, *S. salsa*. Soda-yielding species growing in Russia and on the Mediterranean coasts. [a, 35.]—*S. setigera*. A species found on the southern coasts of Spain and France; used in the preparation of a superior soda (*barilla fina* or *d'Alicante*). [a, 35.]

**SUAVEOLENS** (Lat.), adj. Swa<sup>2</sup>(swa<sup>2</sup>)-ve(we<sup>2</sup>)o<sup>2</sup>-e<sup>2</sup>nz(anz). Gen., -ent'is. From *suavis*, sweet, and *olere*, to smell. See FRAGRANT.

**SUBACETAS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{s}(\text{a}^3\text{k})\text{-et}(\text{at})^2\text{a}^2\text{s}(\text{a}^2\text{s})$ . Gen., *at'is*. See **SUBACETATE**.—**Aqua subacetatis plumbici**. See **Liquor PLUMBI subacetatis dilutus**.—**Ceratum cum subacetate plumbico**. See **Ceratum PLUMBI subacetatis**.—**Liquor subacetatis plumbici**. See **Liquor PLUMBI subacetatis**.—**Solutio subacetatis ferri**. See **Liquor FERRI acetatis**.—**Solutio subacetatis plumbici**. See **Liquor PLUMBI subacetatis**.—**Solutio subacetatis plumbici diluta**. See **Liquor PLUMBI subacetatis dilutus**.—**S. cupricus**. See **COPPER subacetate**.—**S. plumbicus**. See **LEAD subacetate**.—**S. plumbicus liquidus**. See **Liquor PLUMBI subacetatis**.—**Unguentum subacetatis plumbici**. See **Unguentum PLUMBI**.

**SUBACETATE**, n.  $\text{Su}^3\text{b-a}^2\text{s}^2\text{e}^2\text{t-at}$ . Lat., *subacetas*. Fr., *sous-acétate*. A basic acetate. [B.]—**Cupric s.** See **COPPER subacetate**.

**SUBACROMIAL**, adj.  $\text{Su}^3\text{b-a}^2\text{k-rom}^2\text{i}^2\text{-l}$ . From *sub*, under, and *acromion*, the acromion. Fr., *sous-acromial*. Situated below the acromion. [a, 48.]

**SUBACROMIOTROCHITERIUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{k}(\text{a}^2\text{k})\text{-rom}^2\text{i}^2\text{-o}(\text{o})\text{-trok}(\text{tro}^2\text{ch}^2\text{t}^2\text{-it-e-a})^2\text{ri}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . For deriv., see **SUB-\*, ACROMION**, and **TROCHITER**. See **INFRA-SPINATUS**.

**SUBACUTE**, adj.  $\text{Su}^3\text{b-a}^2\text{k-u}^2\text{t'}$ . From *sub*, somewhat, and *acutus*, sharpened. Fr., *subaigu*. Ger., *halbheitzig*. Of disease, showing symptoms less pronounced than in the acute type. [a, 34.]

**SUBALARIS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{l}(\text{a}^2\text{l})\text{-a}(\text{a}^2\text{r})^2\text{ri}^2\text{s}$ . Fr., *subalaire*. From *sub*, under, and *ala*, a wing. Situated below the axilla. [a, 48.]

**SUBALBUMINIZATION**, n.  $\text{Su}^3\text{b-a}^2\text{l-bu}^2\text{m-i}^2\text{n-i}^2\text{z-a}^2\text{'shu}^2\text{n}$ . From *sub*, under, and *albumin* (q. v.). Fr., *subalbuminisation*. Diminution in the quantity of contained albumin. [B, 146.]

**SUBANAL**, adj.  $\text{Su}^3\text{b-a}^2\text{n}^2\text{l}$ . Situated below the anus. [a, 48.]

**SUBANCONÆUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{n}^2\text{s}(\text{a}^2\text{n}^2\text{s})\text{-ko}^2\text{n}(\text{kon})\text{-e}^2(\text{a}^2\text{c}^2\text{e})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *sub*, under, and *anconæus* (q. v.). Fr., *sous-anconé*. Scattered muscular fibres extending between the lower posterior surface of the humerus and the capsule of the elbow. [L.]

**SUBAPICULARIS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{p}(\text{a}^2\text{p})\text{-i}^2\text{k-u}^2\text{l}(\text{u}^2\text{l})\text{-a}(\text{a}^2\text{r})^2\text{ri}^2\text{s}$ . From *sub*, under, and *apex* (q. v.). Fr., *sous-apiculaire*. Of the arista of grasses, inserted immediately under the apex of the pale. [a, 35.]

**SUBARACHNOID**, adj.  $\text{Su}^3\text{b-a}^2\text{r-a}^2\text{k-noid}$ . Fr., *sous-arachnoïdien*. Situated beneath the arachnoid membrane. [a, 48.]

**SUBARBORESCENT**, adj.  $\text{Su}^3\text{b-a}^2\text{r-b-o}^2\text{r-e}^2\text{s}^2\text{e}^2\text{nt}$ . Lat., *sub-arborescens* (from *sub*, somewhat, and *arborescere*, to grow to be a tree). Somewhat tree-like in appearance. [a, 35.]

**SUBAREOLAR**, adj.  $\text{Su}^3\text{b-a}^2\text{r-e}^2\text{o-lar}^2\text{s}$ . Lat., *subareolaris*. Fr., *sous-aréolaire*. Situated beneath the areola of the nipple.

**SUBASTRAGALAR**, adj.  $\text{Su}^3\text{b-a}^2\text{s-tra}^2\text{g}^2\text{al-a}^2\text{r}$ . Pertaining to what is below the astragalus (cf. **S. AMPUTATION**). [a, 48.]

**SUBASTRINGENT**, adj.  $\text{Su}^3\text{b-a}^2\text{s-tri}^2\text{n}^2\text{'jnt}$ . From *sub*, somewhat, and *astringere*, to draw close. Slightly astringent.

**SUBATLOIDEUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{t}(\text{a}^2\text{t})\text{-lo}(\text{lo}^2\text{a})^2\text{i}^2\text{-d}(\text{ed})^2\text{e}^2\text{u}^2\text{s}(\text{u}^2\text{s})$ . See **INFRA-ATLOIDEUS**.

**SUBAXIAL**, adj.  $\text{Su}^3\text{b-a}^2\text{x}^2\text{i}^2\text{-l}$ . Situated below the axis.

**SUBAXILLARY**, adj.  $\text{Su}^3\text{b-a}^2\text{x}^2\text{i}^2\text{-l-a}^2\text{ri}^2\text{s}$ . Lat., *subaxillaris*. Fr., *sous-axillaire*. 1. Situated beneath the axilla. [a, 17.] 2. See **INFRA-AXILLARIS**.

**SUBAXOIDEUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-a}^2\text{x}(\text{a}^2\text{x})\text{-o}(\text{o})^2\text{i}^2\text{-d}(\text{ed})^2\text{e}^2\text{u}^2\text{s}(\text{u}^2\text{s})$ . See **INFRA-AXOIDEUS**.

**SUBBASAL**, adj.  $\text{Su}^3\text{b-ba}^2\text{s}^2\text{-l}$ . Situated near the base. [L.]

**SUBBRACHYCEPHALIC**, adj.  $\text{Su}^3\text{b-bra}^2\text{k-i}^2\text{-se}^2\text{f-a}^2\text{r}^2\text{i}^2\text{k}$ . From *sub*, somewhat, *brachy*, short, and *cephalic*, the head. Slightly brachycephalic; having the length-breadth index between 78 and 79. [L, 332.]

**SUBCÆCAL**, adj.  $\text{Su}^3\text{b-se}^2\text{k}^2\text{-l}$ . Situated below the cæcum. [a, 48.]

**SUBCARBONAS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-ka}^2\text{r-b-on}^2(\text{a}^2\text{s}^2\text{s})$ . Gen., *at'is*. See **SUBCARBONATE**.—**S. ammonicus**. Ammonium sesquicarbonate. [B, 119 (a, 38).] See under **AMMONIUM carbonate**.—**S. ferroso-ferricus**. See **IRON carbonate**.—**S. kalicus**. See **POTASSIUM carbonate**.

**SUBCARBONATE**, n.  $\text{Su}^3\text{b-ka}^2\text{r-b-o}^2\text{n-at}$ . Lat., *subcarbonas*. Fr., *sous-carbonate*. 1. As formerly used, a normal carbonate (as distinguished from a bicarbonate). 2. A neutral or basic carbonate, so called because it contains with relation to its basic constituent loss of the carbonic acid radicle than the normal carbonate. [B.]

**SUBCARBONIC**, adj.  $\text{Su}^3\text{b-ka}^2\text{r-b-o}^2\text{n-i}^2\text{k}$ . Lat., *subcarbonicus*. Containing a smaller amount of carbon than normal carbonic compounds; of basic carbonates, containing a smaller relative amount of the carbonic acid radicle than the normal carbonates. [B.]

**SUBCARBONICUS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-ka}^2\text{r-b-o}^2\text{n-i}^2\text{k-u}^2\text{s}(\text{u}^2\text{s})$ . Subcarbonic, containing a subcarbonate; with the name of a base, the subcarbonate of the base. [B.]

**SUBCAUDAL**, adj.  $\text{Su}^3\text{b-ka}^2\text{'d-l}$ . From *sub*, under, and *cauda*, the tail. Situated under the tail or cauda (said in embryology of a rudimentary prolongation of the intestine below the anus).

**SUBCENTRAL**, adj.  $\text{Su}^3\text{b-se}^2\text{nt-r}^2\text{-l}$ . From *sub*, somewhat, and *centrum*, the centre. Nearly central. [a, 27.]

**SUBCEREBELLAR**, adj.  $\text{Su}^3\text{b-se}^2\text{r-e}^2\text{-be}^2\text{r}^2\text{a}^2\text{r}$ . Situated below the cerebellum. [a, 48.]

**SUBCEREBRAL**, adj.  $\text{Su}^3\text{b-se}^2\text{r-e}^2\text{-br}^2\text{-l}$ . Situated below the cerebrum. [a, 48.]

**SUBCHLORIDE**, **SUBCHLORURET**, n's.  $\text{Su}^3\text{b-klor}^2\text{i}^2\text{-d}(\text{id})\text{-u}^2\text{r-e}^2\text{t}$ . Lat., *subchloridum*. Fr., *sous-hydrochlorure*. A chloride

containing less chlorine than another compound considered as the normal chloride; as sometimes used, an oxychloride. [B.]

**SUBCHORIONIC**, adj.  $\text{Su}^3\text{b-kor-i}^2\text{-o}^2\text{n-i}^2\text{k}$ . Situated beneath the chorion. [a, 48.]

**SUBCLASS**, n.  $\text{Su}^3\text{b-kla}^2\text{s}$ . A grade immediately subordinate to a class and of higher rank than an order or cohort. [a, 35.]

**SUBCLAVIAL**, **SUBCLAVIAN**, **SUBCLAVICULAR**, adj's.  $\text{Su}^3\text{b-klav}^2\text{i}^2\text{-l}$ ,  $\text{-n}$ ,  $\text{-kla}^2\text{v-i}^2\text{k-u}^2\text{l-a}^2\text{r}$ . Lat., *subclavius*. Fr., *sous-clavier*, *sous-claviculaire*. Situated beneath the clavicle. [L, 343.]

**SUBCLAVIUS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-kla}(\text{kla}^2\text{s})^2\text{vi}^2\text{(wi}^2\text{)-u}^2\text{s}(\text{u}^2\text{s})$ . Subclavian; as a n. m. (Fr., *sous-clavier*; Ger., *Schlüsselbein-muskel*, *Unterschlüsselbeinmuskel*), a muscle which arises from a groove on the lower surface of the clavicle and is inserted into the first costal cartilage; also, of Bardeleben, a rare muscle, arising from the clavicle and inserted into the superficial fascia of the pectoralis major. [L, 332].—**S. posticus**. See **STERNOSCAPULARIS** (1st def.).

**SUBCONJUNCTIVAL**, adj.  $\text{Su}^3\text{b-ko}^2\text{n-ju}^2\text{n-kt-i}^2\text{-v}^2\text{l}$ . Lat., *subconjunctivalis*. Situated beneath the conjunctiva. [a, 48.]

**SUBCONTINUAL**, **SUBCONTINUOUS**, adj's.  $\text{Su}^3\text{b-ko}^2\text{n-ti}^2\text{n}^2\text{-u}^2\text{s}$ . From *sub*, somewhat, and *continuum*, uninterrupted. Ger., *halbanhaltend*. Continuous except for slight interruptions.

**SUBCORDATE**, adj.  $\text{Su}^3\text{b-ko}^2\text{rd-at}$ . From *sub*, somewhat, and *cor*, the heart. Nearly heart-shaped. [a, 35.]

**SUBCOSTAL**, adj.  $\text{Su}^3\text{b-ko}^2\text{s-t}^2\text{-l}$ . Lat., *subcostalis* (from *sub*, under, and *costa*, a rib). Fr., *sous-costal*. Situated beneath the ribs or beneath a rib. [a, 48.]

**SUBCOTYLEDONARY**, adj.  $\text{Su}^3\text{b-ko}^2\text{t-i}^2\text{-ed-o}^2\text{n-a-ri}^2\text{s}$ . Situated beneath the cotyledons (said of the connective tissue of the uterine mucous membrane situated beneath the maternal cotyledons of the placenta).

**SUBCRANIAL**, adj.  $\text{Su}^3\text{b-kran}^2\text{i}^2\text{-l}$ . Situated below the skull (cf. **S. PLATES**). [a, 48.]

**SUBCREPITANT**, adj.  $\text{Su}^3\text{b-kre}^2\text{p-i}^2\text{-t}^2\text{-nt}$ . From *sub*, somewhat, and *crepitare*, to crackle. Fr., *sous-crepitant*. Indistinctly crepitant, crackling. [D.]

**SUBCRUENTUS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-kru}^2\text{(kru}^2\text{)-e}^2\text{nt-u}^2\text{s}(\text{u}^2\text{s})$ . From *sub*, somewhat, and *cruentus*, stained with blood. Somewhat like blood in color. [A, 325 (a, 48).]

**SUBCRUREUS** (Lat.), **SUBCRURALIS** (Lat.), n's n.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-kru}^2\text{(kru}^2\text{)-re}^2(\text{ra}^2\text{e}^2\text{a})\text{-u}^2\text{s}(\text{u}^2\text{s})$ ,  $\text{-rul}(\text{ra}^2\text{l})\text{i}^2\text{-s}$ . From *sub*, under, and *crura*, the leg. Fr., *sous-crural*. Ger., *unterer Schenkelmuskel*, *Kniegelenkspanner*. A small muscle lying beneath the cruræus and inserted into the capsule of the knee joint. [L.]

**SUBCULTURE**, n.  $\text{Su}^3\text{b-ku}^2\text{l-tu}^2\text{-r}$ . From *sub*, under, and *cultura*, cultivation. Of Buchanan, a continued cultivation of a virulent microphyte. ["Præctitioner," Mar., 1869, p. 232.]

**SUBCUNEUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-ku}^2\text{n}(\text{ku}^2\text{n})^2\text{e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *sub*, under, and *cuneus*, a wedge. Ger., *Unterzwinkel*. A small group of cerebral convolutions on the lower surface of the occipital lobe, in front of the third occipital convolution, continuous with the gyrus fornicatus. [J, 6 (K).]

**SUBCURRENS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-ku}^2\text{r}(\text{ku}^2\text{r})^2\text{re}^2\text{nz}(\text{rans})$ . Gen., *-ren'tis*. From *succurrere*, to run under. See **SUCCUBOUS**.

**SUBCUTANEOUS**, adj.  $\text{Su}^3\text{b-ku}^2\text{t-an}^2\text{-e}^2\text{-u}^2\text{s}$ . Lat., *subcutaneus* (from *sub*, under, and *cutis*, the skin). Fr., *sous-cutané*. Ger., *subcutan*. 1. Situated immediately beneath the skin. [G.] 2. Of an injection, thrown under the skin.

**SUBCUTANEUS** (Lat.), adj.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-ku}^2\text{t}(\text{ku}^2\text{t})\text{-an}(\text{a}^2\text{n})^2\text{e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Subcutaneous; as a n., a subcutaneous muscle. [a, 17.]—**S. colli**. See **PLATYSMA myoides**.—**S. nuchæ**. A muscle arising from the lower surface of the occipital bone and blending with the upper portion of the fascia of the back. [L, 332.]

**SUBCUTICULAR**, adj.  $\text{Su}^3\text{b-ku}^2\text{t-i}^2\text{k-u}^2\text{l-a}^2\text{r}$ . See **SUBEPIDERMIC**.

**SUBDELIRIUM** (Lat.), n. n.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-de}^2\text{l}(\text{dal})\text{-i}^2\text{er}^2(\text{er})^2\text{i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . From *sub*, under, and *delirium*, madness. Fr., *subdelirium*. A mild delirium in which the attention of the patient may be aroused for a longer or shorter interval. [a, 34.]

**SUBDENTAL**, adj.  $\text{Su}^3\text{b-de}^2\text{n-t}^2\text{-l}$ . From *sub*, under, and *dens*, a tooth. Situated below the teeth. [a, 48.]

**SUBDERMAL**, adj.  $\text{Su}^3\text{b-du}^2\text{r-m}^2\text{-l}$ . From *sub*, under, and *δέρμα*, the skin. See **SUBCUTANEOUS**.

**SUBDIROTTIC**, adj.  $\text{Su}^3\text{b-di-kro}^2\text{t-i}^2\text{k}$ . For deriv., see **Sub-\*** and **DIROTTIC**. Obscurely dirotic. [a, 34.]

**SUBDIVIDED**, adj.  $\text{Su}^3\text{b-di}^2\text{-vid-e}^2\text{-d}$ . Lat., *subdivisus* (from *sub*, under, and *dividere*, to divide). Fr., *subdivisé*. Divided again, having secondary divisions. [a, 35.]

**SUBDOLICHOCEPHALIC**, adj.  $\text{Su}^3\text{b-do}^2\text{l-i}^2\text{k-o-a}^2\text{e}^2\text{-f-a}^2\text{i}^2\text{k}$ . From *sub*, somewhat, *δολύχης*, long, and *κεφαλή*, the head. Fr., *subdolichocéphale*. Having the length-breadth index between 75 and 77.9. ["Arch. f. Anthropol." xx, p. 310 (a, 32); L.]

**SUBDORSO-ATLOIDEUS** (Lat.), n. m.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-do}^2\text{rs-o}(\text{o})^2\text{-a}^2\text{t}(\text{a}^2\text{t})\text{-i}^2\text{do}^2\text{-i}^2\text{k-e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *sub*, under, *dorsum*, the back, *ἀτλας*, the atlas, and *εἶδος*, resemblance. See **LOSARUS colli**.

**SUBDURAL**, adj.  $\text{Su}^3\text{b-du}^2\text{r-a}^2\text{-l}$ . From *sub*, under, and *dura* (q. v.). Fr., *sous-dure-ménie*. Situated beneath the dura. [a, 18.]

**SUBECTOPIC**, adj.  $\text{Su}^3\text{b-e}^2\text{k-to}^2\text{p-i}^2\text{k}$ . From *sub*, somewhat, and *ἐκτός*, out of place. Moderately displaced.

**SUBENCEPHALON** (Lat.), n. n.  $\text{Su}^3\text{b}(\text{su}^4\text{b})\text{-e}^2\text{n}(\text{e}^2\text{n})^2\text{-se}^2\text{f}(\text{ke}^2\text{f})^2\text{a}^2\text{l-a}^2\text{l-i}^2\text{-o}^2\text{n}$ . From *sub*, under, and *ἐνκεφαλος*, the brain. Ger., *Unterhirn*. The medulla oblongata, pons Varolii, and corpora quadrigemina. [L, 332.]

**SUBENDOTHELIAL**, adj. Su<sup>b</sup>-e<sup>nd</sup>-o<sup>thel</sup>-i<sup>l</sup>. Fr., *sous-endothelial*. Situated beneath an endothelium. [J.]

**SUBEPINEUSCLEROTIC** (Ger.), n. Zub-e<sup>2</sup>p-e<sup>2</sup>n-du<sup>m</sup>-sklar-oz-e<sup>2</sup>. Scleroderm beneath the ependyma. [a, 34.]

**SUBEPIDERMAL, SUBEPIDERMIC**, adj's. Su<sup>b</sup>-e<sup>2</sup>p-i<sup>2</sup>-du<sup>m</sup>-m<sup>1</sup>, -m<sup>2</sup>k. Fr., *sous-épidermique*. Situated beneath the epidermis. [a, 48.]

**SUBEPINEUX** (Fr.), adj. Su<sup>b</sup>-ap-en-u<sup>2</sup>. See INFRASPINOUS.

**SUBEPITHELIAL, SUBEPITHELIAN**, adj's. Su<sup>b</sup>-e<sup>2</sup>p-i<sup>2</sup>-thel-i<sup>2</sup>-l, -n. Situated beneath the epithelium.

**SUBER** (Lat.), n. n. (1st def.), m. (2d def.). Su<sup>b</sup>(sub)/u<sup>2</sup>r(e<sup>2</sup>r). Gen., *sub'eris*. 1. See Cork (1st def.). 2. A tree that yields cork.—**Cortex suberis**. See S. (1st def.).—**S. primus**. See QUERCUS s.—**S. secundus**. See QUERCUS ilex.

**SUBERAMIC ACID**, n. Su<sup>b</sup>-e<sup>2</sup>r-a<sup>2</sup>m-i<sup>2</sup>k. Fr., *acide suberamique*. A substance, C<sub>26</sub>H<sub>42</sub>(CO.OH)(CO.NH<sub>2</sub>), formed by the action of heat on ammonium suberate. [B, 93 (a, 14).]

**SUBERANILIC ACID**, n. Su<sup>b</sup>-e<sup>2</sup>r-a<sup>2</sup>n-i<sup>2</sup>l-i<sup>2</sup>k. Fr., *acide suberanic*. Ger., *Suberanisäure*. A crystallizable substance, C<sub>26</sub>H<sub>42</sub>(CO.OH)(CO.NH.C<sub>6</sub>H<sub>5</sub>), found in the alcoholic solution from which suberanilide has been precipitated; an oily liquid which solidifies when cold. [B, 93 (a, 14).]

**SUBERANILIDE**, n. Su<sup>b</sup>-e<sup>2</sup>r-a<sup>2</sup>n-i<sup>2</sup>l-i<sup>2</sup>d(id). Fr., *subérani-lide*. A substance, C<sub>26</sub>H<sub>42</sub>(CO.NH.C<sub>6</sub>H<sub>5</sub>), produced by the action of aniline on suberic acid under the influence of heat. It forms microscopic crystals. [B, 93 (a, 14).]

**SUBERIC**, adj. Su<sup>b</sup>-e<sup>2</sup>r-i<sup>2</sup>k. Derived from cork. [B.]—**S. acid**. Fr., *acide subérique*. Ger., *Subersäure, Suberylsäure, Korksäure*. A dibasic acid, C<sub>26</sub>H<sub>42</sub>(CO.OH)<sub>2</sub> = C<sub>6</sub>H<sub>14</sub>O<sub>4</sub>, obtained from cork by prolonged boiling with nitric acid or by the saponification of castor-oil and other oils and fats. It occurs as long acicular or irregular tabular crystals. [B; 3 (a, 38).]

**SUBERICERIN**, n. Su<sup>b</sup>-e<sup>2</sup>r-i<sup>2</sup>s-er-i<sup>2</sup>n. Fr., *subéricérine*. Cerin obtained from cork. [B, 93 (a, 14).]

**SUBERIFICATION**, n. Su<sup>b</sup>-e<sup>2</sup>r-i<sup>2</sup>-fi<sup>2</sup>-ka<sup>2</sup>-shu<sup>2</sup>n. See CUTINIZATION.

**SUBERIMIDE**, n. Su<sup>b</sup>-e<sup>2</sup>r-i<sup>2</sup>m-i<sup>2</sup>d(id). Fr., *subérimide*. Of Arppe, a white crystalline powder obtained by heating suberic acid to 170° C. [B, 93 (a, 14).]

**SUBERIN**, n. Su<sup>b</sup>-e<sup>2</sup>r-i<sup>2</sup>n. Fr., *subérine*. Ger., *Korkstoff*. A modification of cellulose obtained from cork, resembling (according to some, identical with) cutin; used as a dusting powder. [B, 93 (a, 14); a, 35.]

**SUBERONE**, n. Su<sup>b</sup>-e<sup>2</sup>r-on. Fr., *subérone*. A ketone, C<sub>26</sub>H<sub>42</sub>O, derived from suberic acid; a liquid of the odor of pepper-mint. [B, 2, 3, 93 (a, 38).]

**SUBEROSE, SUBEROUS**, adj's. Su<sup>b</sup>-e<sup>2</sup>r-os, -u<sup>2</sup>s. Lat., *suberosus*. Fr., *subéreux*. Ger., *korkig, korkartig*. Resembling cork, having a corky texture. [a, 35.]

**SUBETH** (Ar.), n. See COMA.

**SUBFAMILY**, n. -Su<sup>b</sup>-fa<sup>2</sup>m-i<sup>2</sup>-l<sup>2</sup>. From *sub*, under, and *familia*, a family. Ger., *Subfamilie, Unterfamilie*. A group immediately subordinate to a family. [a, 48.]

**SUBFLAVUS** (Lat.), adj. Su<sup>b</sup>(sub)-fla<sup>2</sup>(fla<sup>2</sup>)/vu<sup>2</sup>s(vu<sup>2</sup>s). From *sub*-, somewhat, and *flavus*, yellow. Yellowish. [a, 35.]

**SUBFLUORIDE**, n. Su<sup>b</sup>-flu<sup>2</sup>-o<sup>2</sup>r-i<sup>2</sup>d(id). A fluoride containing a smaller amount of fluorine than the ordinary fluoride. [B, 2.]

**SUBFRIGIDUS** (Lat.), adj. Su<sup>b</sup>(sub)-fri<sup>2</sup>j(freg)/i<sup>2</sup>d-u<sup>2</sup>s(u<sup>2</sup>s). From *sub*-, somewhat, and *frigidus*, cold. See CHILLY.

**SUBFRONTAL**, adj. Su<sup>b</sup>-fru<sup>2</sup>n-t<sup>2</sup>l. From *sub*, under, and *frons*, the forehead. Situated below the frontal bone. [a, 48.]

**SUBGENUS** (Lat.), n. n. Su<sup>b</sup>(sub)-ge<sup>2</sup>n-u<sup>2</sup>s(u<sup>2</sup>s); in Eng., *sub-gen'u<sup>2</sup>s*. Gen., *-gen'eris*. Fr., *sous-genre*. Ger., *Untergattung*. A group nearly as important as a genus and immediately subordinate to it, comprising a section or sections of species. [a, 35.]

**SUBGERMINAL**, adj. Su<sup>b</sup>-ju<sup>2</sup>m-i<sup>2</sup>-n<sup>2</sup>l. From *sub*, under, and *germen*, a germ. Situated beneath a germinal structure.

**SUBGLENOID**, adj. Su<sup>b</sup>-glen-oid. Fr., *sous-glénoïdien*. See INFRAGLENOID.

**SUBGLENOIDALIS** (Lat.), n. m. Su<sup>b</sup>(sub)-gle<sup>2</sup>n(glan)-o(o<sup>2</sup>)-i<sup>2</sup>d(ed)-al(a<sup>2</sup>l)/i<sup>2</sup>s. See SUBSCAPULARIS minor.

**SUBGLOTTIC**, adj. Su<sup>b</sup>-glo<sup>2</sup>t-i<sup>2</sup>k. See INFRAGLOTTIC.

**SUBGRONDATION** (Fr.), n. Su<sup>b</sup>-gro<sup>2</sup>n<sup>2</sup>d-a<sup>2</sup>-se-o<sup>2</sup>n<sup>2</sup>. An old term for a fracture of the skull. [L, 41 (a, 14).]

**SUBHEPATIC**, adj. Su<sup>b</sup>-he<sup>2</sup>p-a<sup>2</sup>-t-i<sup>2</sup>k. From *sub*, under, and *hep*, the liver. Fr., *sous-hépatique*. Beneath, on the lower surface of, or in the lower portion of the liver. [L, 41 (a, 14).]

**SUBHYDROCHLORAS** (Lat.), **SUBHYDROCHLORETUM** (Lat.), n's m. and n. Su<sup>b</sup>(sub)-hid(hu<sup>2</sup>d)-ro(ro<sup>2</sup>)-klor(ch<sup>2</sup>lor)-a<sup>2</sup>s(a<sup>2</sup>s), -klor(ch<sup>2</sup>lor)-et(at)/u<sup>2</sup>m(u<sup>2</sup>m). Gen., *-at'is, -et'i*. See SUBCHLORIDE.

**SUBHYDROSULPHATE**, n. Su<sup>b</sup>-hid-ro-sul<sup>2</sup>f(at). Lat., *subhydrosulphas*. Fr., *sous-hydro-sulfate*. A compound of a base with a smaller amount of hydrogen sulphide than the base can take up; also a subsulphide or oxysulphide. [B.]

**SUBHYOID**, adj. Su<sup>b</sup>-hi<sup>2</sup>-oid. Fr., *sous-hyôidien*. See INFRAPHYOID.

**SUB-ICTERIC**, adj. Su<sup>b</sup>-i<sup>2</sup>k-te<sup>2</sup>r-i<sup>2</sup>k. From *sub*-, somewhat, and *icterus*, jaundice. Fr., *subictérique*. Pertaining to icterus in a modified form or degree. [B.]

**SUBICULUM** (Lat.), n. n. Su<sup>b</sup>(sub)-i<sup>2</sup>k-u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). Dim. of *suber*, a support. Fr., *subicule*. Ger., *Unterlage* (1st def.),

*Fadenboden* (1st def.). 1. The filamentous mycelium of certain *Fungi*. [a, 35.] 2. See *Uncinate gyrus*.—**S. cornu Ammonis** [Burdach]. See *Uncinate gyrus*.

**SUBINFLAMMATION**, n. Su<sup>b</sup>-i<sup>2</sup>n-fla<sup>2</sup>m-a<sup>2</sup>-shu<sup>2</sup>n. Lat., *subinflammatio* (from *sub*-, somewhat, and *inflammatio*, inflammation). Fr., s. Ger., *gelinde Entzündung*. A slight inflammation of slow progress. [a, 34.]

**SUBINTESTINAL**, adj. Su<sup>b</sup>-i<sup>2</sup>n-te<sup>2</sup>st-i<sup>2</sup>-n<sup>2</sup>l. From *sub*, under, and *intestinum*, a gut. Situated below the intestine. [a, 48.]

**SUBINTRANT**, adj. Su<sup>b</sup>-i<sup>2</sup>n-tr<sup>2</sup>-nt. Lat., *subintrans* (from *subintrare*, to go into secretly). Fr., s. Ger., *vorhereintretend, zwischeneintretend*. Of a fever, having a second paroxysm begin before the first has wholly subsided. [L, 41 (a, 14).]

**SUBINVOLUTION**, n. Su<sup>b</sup>-i<sup>2</sup>n-vo<sup>2</sup>-l-u<sup>2</sup>-sh'n. Lat., *subinvolutio* (from *sub*-, defectively, and *involutio*, a rolling up). Defective involution (as of the uterus). [a, 48.]—**Menstrual s.** S. of the endometrium after menstruation. [M. P. Jacobi, "Am. Jour. of Obstet.," Sept., 1885, p. 915.]

**SUBIODIDE**, n. Su<sup>b</sup>-i<sup>2</sup>-od-i<sup>2</sup>d(id). A compound of an element or radicle with iodine, containing a smaller proportionate amount of iodine than the ordinary iodide; also, as sometimes used, on oxyiodide. [B.]

**SUBIRATS** (Sp.), n. Su<sup>b</sup>-e-ra<sup>2</sup>s. A place in Barcelona, Spain, where there are hot sulphurous springs. [L, 49 (a, 14).]

**SUBJECT**, n. Su<sup>b</sup>-je<sup>2</sup>-kt. From *subjicere*, to throw under. 1. An individual subjected to observation, treatment, or experiment. 2. A cadaver used for dissection. [a, 17.]

**SUBJECTIVE**, adj. Su<sup>b</sup>-je<sup>2</sup>-kt-i<sup>2</sup>v. Lat., *subjectivus*. Fr., *subjectif*. Ger., *subjektiv*. Of symptoms, discernible by the patient, but not patent to physical examination (cf. OBJECTIVE).

**SUBKINGDOM**, n. Su<sup>b</sup>-ki<sup>2</sup>n<sup>2</sup>-du<sup>2</sup>m. A series, a division of a kingdom. In botany there are two, phanerogams and cryptogams. [a, 35.] Cf. PHYLUM and CLASSIFICATION.

**SUBLACRYMAL** [G. St.-Hilaire] (Fr.), n. Su<sup>b</sup>-la<sup>2</sup>-kre-ma<sup>2</sup>l. See *Sphenial bone*.

**SUBLATIO** (Lat.), n. f. Su<sup>b</sup>(sub)-la<sup>2</sup>(la<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *-on'is*. From *sublatum*, the supine of *tolle*, to lift up. Removal. [a, 48.]—**S. cataractæ**. See *Depressio cataractæ*.—**S. chorioideæ**. Subchorioid dropsy. [a, 34.]—**S. retinæ**. Detachment of the retina. [a, 34.]

**SUBLIGACULUM** (Lat.), n. n. Su<sup>b</sup>(sub)-li<sup>2</sup>-g-a<sup>2</sup>-k(a<sup>2</sup>k)/u<sup>2</sup>-u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). From *sub*, under, and *ligare*, to bind. See TRUSS.

**SUBLIGATOR** (Lat.), n. m. Su<sup>b</sup>(sub)-li<sup>2</sup>-g-at(a<sup>2</sup>t)/o<sup>2</sup>r. From *subligare*, to tie below. See HYPODESMEUS.

**SUBLIGATURA** (Lat.), n. f. Su<sup>b</sup>(sub)-li<sup>2</sup>-g-a<sup>2</sup>-t(a<sup>2</sup>t)-u<sup>2</sup>r(ur)/a<sup>2</sup>. See TRUSS.

**SUBLIGNEOUS**, adj. Su<sup>b</sup>-li<sup>2</sup>-g-ne<sup>2</sup>-u<sup>2</sup>s. Lat., *sublignosus* (from *sub*, under, and *lignum*, wood). Fr., *sous-ligneux*. Of plants, woody at the base and herbaceous at the top. [a, 35.]

**SUBLIMAT** (Ger.), n. Zub-lem-a<sup>2</sup>t. See *SUBLIMATE* and *Corrosive SUBLIMATE*.—**S'albuminat**. See *HYDRARGYRUM bichloratum albuminatum*.—**S'holzwohle**. Wood-wool impregnated with corrosive sublimate.—**S'räucherung**. Fumigation with corrosive sublimate. [B, 108 (a, 14).]—**S'seide**. Silk for sutures made aseptic by boiling for 15 minutes in a 1-to-500 solution of corrosive sublimate. [B, 108 (a, 14).]—**S'seife**. Castile soap containing 1 per cent. of corrosive sublimate. [B, 108 (a, 14).]

**SUBLIMATE**, n. Su<sup>b</sup>-li<sup>2</sup>m-at. Lat., *sublimatum, sublimatus*. Fr., s., *sublimé*. Ger., *Sublimat*. 1. In sublimation, that portion of a substance which volatilizes and subsequently condenses and assumes the solid form. 2. Any substance usually obtained by sublimation. [B.]—**Corrosive s.** Fr., *sublimé (corrosif)* [Fr. Cod.]. Ger., *ätzendes Quecksilbersublimat, Sublimat*. Mercury bichloride; so called on account of its acid properties and its preparation by sublimation. [B.]—**Corrosive-s. gauze**. Gauze impregnated with a preparation made by dissolving 1 part of mercury bichloride in 100 parts of alcohol, and adding 150 of distilled water, 50 of glycerin, and a little fuchsine. ["Proc. of the Am. Pharm. Assoc.," xxxv (a, 14).]

**SUBLIMATION**, n. Su<sup>b</sup>-li<sup>2</sup>m-a<sup>2</sup>-shu<sup>2</sup>n. Lat., *sublimatio* (from *sublimare*, to lift up on high). Fr., s. Ger., *S., Sublimierung*. The act or process of vaporization of a solid body by means of heat, with subsequent reconcondensation in a purified but essentially unaltered form. [B.]

**SUBLIMATUM** (Lat.), n. n. Su<sup>b</sup>(sub)-li<sup>2</sup>m(lem)-at(a<sup>2</sup>t)/u<sup>2</sup>m(u<sup>2</sup>m). See *SUBLIMATE*.—**Liquor sublimati corrosivi**. See *Liquor HYDRARGYRI perchloridi*.—**S. dulce**. See *MERCURY chloride*.

**SUBLIMATUS** (Lat.), n. m. Su<sup>b</sup>(sub)-li<sup>2</sup>m(lem)-at(a<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s). See *SUBLIMATE*.—**S. corrosivus**. See *MERCURY bichloride*.

**SUBLIME**, v. tr. and intr. Su<sup>b</sup>-lim'. From *sublimare*, to raise on high. Fr., *sublimer*. Ger., *sublimiren*. 1. To subject to sublimation. 2. To undergo sublimation. [B.]

**SUBLIME** (Fr.), n. Su<sup>b</sup>-lem. See *SUBLIMIS*.—**S. des doigts**. See *FLEXOR sublimis digitorum*.

**SUBLIMÉ** (Fr.), adj. Su<sup>b</sup>-le-ma. See *SUBLIMED*; as a n., see *SUBLIMATE* and *Corrosive SUBLIMATE*.—**Emulsion de s. corrosif**. An emulsion consisting of 32 centigrammes of corrosive sublimate, 4 grammes of ether, 150 grammes of peppermint water, 30 grammes of syrup of marsh-mallow, and the yolks of two eggs. [B, 119 (a, 38).]—**Ethéroïde de s. corrosif**. See *Æther mercurialis*.—**Pommade de s. corrosif**. See *Formade de Cirillo*.—**Solution aqueuse de s. corrosif**. See *Liquor mercurialis*.—**S. corrosif**. See *MERCURY bichloride*.—**S. doux**. See *MERCURY chloride*.—**Trochisques de s. corrosif**. See *Trochisci muratis oxygenati HYDRARGYRI*.

**SUBLIMIRUNG** (Ger.), n. Zub-lem-er'un<sup>2</sup>. See **SUBLIMATION**.

**SUBLIMIS** (Lat.), adj. Su<sup>2</sup>b(su<sup>4</sup>b)-lim(lem)/i<sup>2</sup>s. Lit., elevated; superficial; as a n. (Fr., *sublime*), a superficial muscle. [C.]—**S. phalangorum**. See **EPITROCHLOPHALANGIUS** and **FLEXOR sublimis digitorum**.

**SUBLINGUAL**, adj. Su<sup>2</sup>b-li<sup>2</sup>n<sup>2</sup>/gw<sup>1</sup>. Fr., *sous-lingual*. Situated beneath the tongue. [C.]

**SUBLOBULAR**, adj. Su<sup>2</sup>b-lo<sup>2</sup>b'u<sup>1</sup>l-a<sup>2</sup>r. Fr., *sublobé* (1st def.), *sous-lobulaire* (2d def.). 1. Indistinctly lobular. 2. Situated beneath a lobule.

**SUBLUMBAR**, adj. Su<sup>2</sup>b-lu<sup>2</sup>mb'a<sup>2</sup>r. From *sub*, under, and *lumbus*, a loin. Fr., *sous-lombaire*. Situated under the loins. [a, 48.]

**SUBLUMBO-ILIACUS** (Lat.), **SUBLUMBOPUBIALIS** (Lat.), n's. m. Su<sup>2</sup>b(su<sup>4</sup>b)-lu<sup>2</sup>mb(lu<sup>4</sup>mb)'o(o<sup>2</sup>)-i<sup>2</sup>l(i<sup>2</sup>)-i<sup>2</sup>l(i<sup>2</sup>)/a<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>s(u<sup>2</sup>s), -pu<sup>2</sup>b(pub)-i<sup>2</sup>l-al(a<sup>2</sup>l)/i<sup>2</sup>s. For deriv., see **Sub**, **LUMBUS**, **ILIACUS**, and **PUBES**. See **Psoas parvus**.

**SUBLUMBOTIBIALIS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-lu<sup>2</sup>mb(lu<sup>4</sup>mb)'o(o<sup>2</sup>)-ti<sup>2</sup>b(t<sup>2</sup>b)-i<sup>2</sup>l-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *sub*, under, *lumbus* (q. v.), and *tibia* (q. v.). See **Long adductor of the leg**.

**SUBLUMBOTROCHANTINEUS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-lu<sup>2</sup>mb(lu<sup>4</sup>mb)'o(o<sup>2</sup>)-trok(tro<sup>2</sup>ch<sup>2</sup>)-a<sup>2</sup>nt(a<sup>2</sup>nt)-i<sup>2</sup>n'e<sup>2</sup>u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, under, *lumbus* (q. v.), and **trochantin** (see **TROCHANTER**). See **Psoas magnus**.

**SUBLUXATION**, n. Su<sup>2</sup>b-lu<sup>2</sup>x-a'shu<sup>2</sup>n. Lat., *subluxatio* (from *sub*, somewhat, and *luxare*, to dislocate). Fr., s. Ger., *S. Gelenk-distorsion*. A partial dislocation of a bone. [E; L, 30, 41 (a, 14).]

**SUBMALLÉAL** [G. St. Hilaire] (Fr.), n. Su<sup>2</sup>b-ma<sup>2</sup>-la-a<sup>2</sup>l. The articular bone in fishes. [L, 14.]

**SUBMAMMARY**, adj. Su<sup>2</sup>b-ma<sup>2</sup>m'ar-i<sup>2</sup>. Ger., *submamär*. See **INFRA-MAMMARY**.

**SUBMARGINAL**, adj. Su<sup>2</sup>b-ma<sup>2</sup>rj'i<sup>2</sup>-n<sup>1</sup>. From *sub*, under, and *margo*, a margin. Situated near the border. [a, 35.]

**SUBMATITÉ** (Fr.), n. Su<sup>2</sup>b-ma<sup>2</sup>-te-ta. Dullness on percussion. [D, 51.]

**SUBMAXILLARY**, adj. Su<sup>2</sup>b-ma<sup>2</sup>x'i<sup>2</sup>l-a-r'i<sup>2</sup>. From *sub*, under, and *maxilla*, the jaw. Fr., *sous-maxillaire*. Ger., *submaxillär*. Situated beneath the jaw; as a n., the inferior mandible in birds. [L, 343.]

**SUBMAXILLOCUTANEUS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-ma<sup>2</sup>x-(ma<sup>2</sup>x)'i<sup>2</sup>l-lo(1o<sup>2</sup>)-ku<sup>2</sup>t(ku<sup>4</sup>t)-an(a<sup>2</sup>n)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, under, *maxilla* (q. v.), and *cutis* (q. v.). Fr., *sous-maxillo-cutané*. See **PLATYSMA myodes**.

**SUBMAXILLOLABIALIS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-ma<sup>2</sup>x-(ma<sup>2</sup>x)'i<sup>2</sup>l-lo(1o<sup>2</sup>)-lab(la<sup>2</sup>b)-i<sup>2</sup>l-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *sub*, under, *maxilla*, the jaw, and *labium*, the lip. Fr., *sous-maxillo-labial*. See **DEPRESSOR anguli oris**.

**SUBMEDIAL**, adj. Su<sup>2</sup>b-med'i<sup>2</sup>-l. From *sub*, under, and *medius*, middle. Situated beneath the middle of a structure.

**SUBMENTAL**, adj. Su<sup>2</sup>b-me<sup>2</sup>n't<sup>1</sup>. Fr., *sous-mental*. Ger., s. Situated beneath the chin. [C.]

**SUBMERGÉ** (Fr.), adj. Su<sup>2</sup>b-me<sup>2</sup>r-zha. Submerged, drowned. **SUBMERGED**, **SUBMERSE**, adj's. Su<sup>2</sup>b-mu<sup>2</sup>rjd', -mu<sup>2</sup>rst'. Lat., *submersus*. Fr., *submergé*. Ger., *untergetaucht*. 'Sunk beneath the surface of a liquid; of plants, growing beneath the surface of water. [a, 35.]

**SUBMETALLIC**, adj. Su<sup>2</sup>b-me<sup>2</sup>t-a<sup>2</sup>l/i<sup>2</sup>k. From *sub*, somewhat, and *metallum*, a metal. Somewhat metallic. [B.]

**SUBMICROSCOPIC**, adj. Su<sup>2</sup>b-mi<sup>2</sup>k-ro<sup>2</sup>s-ko<sup>2</sup>p/i<sup>2</sup>k. From *sub*, under, *μικρός*, small, and *σκοπεῖν*, to examine. Nearly microscopic; requiring a weak lens for its proper discernment. [B; L, 41 (a, 14).]

**SUBMISSIO** (Lat.), n. f. Su<sup>2</sup>b(su<sup>4</sup>b)-mi<sup>2</sup>s'shi<sup>2</sup>(si<sup>2</sup>)-o. Gen., -on/i<sup>2</sup>s. From *submittere*, to place under. A lowering. [A, 312 (a, 48).]—**S. cordis**. Cardiac systole. [L, 50 (a, 48).]

**SUBMORPHOUS**, adj. Su<sup>2</sup>b-mo<sup>2</sup>rf'u<sup>2</sup>s. From *sub*, under, and *μορφή*, form. Intermediate in structure between a crystal and an amorphous body said of small, rounded bodies having on section a concentrically laminated and radiated appearance, occurring when an insoluble crystalline salt is thrown down in a colloidal medium, and due to the union, molecule by molecule, of the crystal with the colloid. [B, 11.]

**SUBMUCOSA** (Lat.), n. f. Su<sup>2</sup>b(su<sup>4</sup>b)-mu<sup>2</sup>k(muk)-o<sup>2</sup>s'a<sup>2</sup>. The areolar tissue immediately beneath a mucous membrane. [L.]

**SUBMUCOUS**, adj. Su<sup>2</sup>b-mu<sup>2</sup>k'u<sup>2</sup>s. From *sub*, under, and *mucosus*, mucous. Situated immediately beneath the mucous membrane. [L.]

**SUBMURIAS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-mu<sup>2</sup>(mu<sup>4</sup>)/ri<sup>2</sup>-a<sup>2</sup>s(a<sup>2</sup>s). Gen., -at/i<sup>2</sup>s. A subchloride or oxychloride. [B.]—**S. ammoniaco-hydrargyricus**. See **Ammoniated MERCURY**.

**SUBNASAL**, adj. Su<sup>2</sup>b-na<sup>2</sup>s'l. From *sub*, under, and *nasus*, the nose. Situated below the nose. [a, 48.]

**SUBNITRAS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-ni<sup>2</sup>t-ra<sup>2</sup>s(ra<sup>2</sup>s). Gen., -rat/i<sup>2</sup>s. See **SUBNITRATE**.—**S. bismuthicus**. See **BISMUTH SUBNITRATE**.—**S. hydrargyricus**. See **MERCURY SUBNITRATE**.—**Tabellæ canabinæ bismuthicæ**. See **TROCHISCI BISMUTHI**.—**Unguentum subnitratis hydrargyrici**. See **Unguentum HYDRARGYRI OZIDI RUBRI**.

**SUBNITRATE**, n. Su<sup>2</sup>b-nit'rat. Lat., *subnitratis*. Fr., *sous-azotate*, *sous-nitrate*. A basic nitrate. [B.]

**SUBNORMAL**, adj. Su<sup>2</sup>b-no<sup>2</sup>r'm'l. From *sub*, under, and *norma*, a rule. Slightly less than normal. [a, 48.]

**SUBNUCLEUS** [Spitzka] (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-nu<sup>2</sup>(nu<sup>4</sup>)/kle<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, under, and *nucleus*, a nucleus. One of the

parts into which the larger collections of nerve-cells are divided by the passage of delicate intersecting fasciculi through them. [“Med. Record,” Oct. 11, 1884, p. 421 (K).]

**SUBOCCIPITAL**, adj. Su<sup>2</sup>b-o<sup>2</sup>k-si<sup>2</sup>p'i<sup>2</sup>-t'l. Lat., *suboccipitalis*. See **INFRA-OCCIPITAL**.

**SUBOCCIPITALIS** (Lat.), adj. Su<sup>2</sup>b(su<sup>4</sup>b)-o<sup>2</sup>k-si<sup>2</sup>p(ki<sup>2</sup>p)-i<sup>2</sup>t-a-(a<sup>2</sup>)/i<sup>2</sup>s. See **INFRA-OCCIPITAL**; as a n., in the m., an anomalous muscle which arises from the external occipital protuberance and is inserted into the superior curved line or blends with the posterior portion of the insertion of the sterno-cleido-mastoideus. [L, 332.]

**SUBOCCIPITO-BREGMATIC**, adj. Su<sup>2</sup>b-o<sup>2</sup>k-si<sup>2</sup>p'i<sup>2</sup>-t-o-bre<sup>2</sup>-g-ma<sup>2</sup>t'i<sup>2</sup>k. For deriv., see **Sub**, **OCCIPUT**, and **BREGMA**. Extending between the inferior occipital region and the bregma. [L.]

**SUBOCULARE** (Lat.), n. n. Su<sup>2</sup>b(su<sup>4</sup>b)-o<sup>2</sup>k-u<sup>2</sup>l(u<sup>4</sup>l)-a<sup>2</sup>(a<sup>2</sup>r)/e<sup>2</sup>(e<sup>2</sup>). From *sub*, under, and *oculus*, the eye. See **MALAR BONE**.

**SUBORBITAL**, **SUBORBITAR**, **SUBORBITARY**, adj's. Su<sup>2</sup>b-o<sup>2</sup>rb'i<sup>2</sup>-t'l, -ta<sup>2</sup>r, -ta<sup>2</sup>-ri<sup>2</sup>. From *sub*, under, and *orbitis*, the orbit. See **INFRA-ORBITAL**.

**SUBORDER**, n. Su<sup>2</sup>b-o<sup>2</sup>rd'u<sup>2</sup>r. Lat., *subordo*. Ger., *Unterordnung*. A group immediately subordinate to an order. [a, 35.]

**SUBOXIDE**, n. Su<sup>2</sup>b-o<sup>2</sup>x'i<sup>2</sup>a<sup>2</sup>(id). Lat., *suboxidum*, *suboxydum*. Fr., *suboxyde*, *sous-oxide*, *sous-oxyde*. Ger., *Suboxyd*. An oxide which contains less oxygen than the ordinary oxide. [B.]

**SUBPARALYTIC**, adj. Su<sup>2</sup>b-pa<sup>2</sup>r-a<sup>2</sup>-li<sup>2</sup>t'i<sup>2</sup>k. From *sub*, somewhat, and **παρὰλυτικός**, paralytic. Slightly paralytic. [a, 34.]

**SUBPARIETAL**, adj. Su<sup>2</sup>b-pa<sup>2</sup>r-i<sup>2</sup>e<sup>2</sup>-t'l. From *sub*, under, and *paries*, a wall. Situated below the parietal bone, convolution, or fissure. [a, 48.]

**SUBPATELLAR**, adj. Su<sup>2</sup>b-pa<sup>2</sup>t-e<sup>2</sup>l-a<sup>2</sup>r. From *sub*, under, and *patella* (q. v.). Situated below the patella. [a, 48.]

**SUBPECTORAL**, adj. Su<sup>2</sup>b-pe<sup>2</sup>kt'o<sup>2</sup>-r'l. From *sub*, under, and *pectus*, the chest. Placed below the chest or breast.

**SUBPEDUNCULAR**, **SUBPEDUNCULATE**, adj's. Su<sup>2</sup>b-pe<sup>2</sup>d-u<sup>2</sup>n<sup>2</sup>k'u<sup>2</sup>l-a<sup>2</sup>r, -at. From *sub*, under, and *pedunculus*, a foot-stalk. Fr., *subpédiculé* (1st def.), *sous-pédiculaire* (2d def.). 1. Indistinctly pedunculate. 2. Situated beneath a peduncle.

**SUBPERICARDIAL**, adj. Su<sup>2</sup>b-pe<sup>2</sup>r-i<sup>2</sup>-ka<sup>2</sup>rd'i<sup>2</sup>-l. From *sub*, under, and *pericardium* (q. v.). Fr., *sous-pericardique*. Situated beneath the pericardium. [L, 41 (a, 14).]

**SUBPERIOSTEAL**, adj. Su<sup>2</sup>b-pe<sup>2</sup>r-i<sup>2</sup>o<sup>2</sup>-st'e<sup>2</sup>-l. From *sub*, under, and *periosteum* (q. v.). Fr., *sous-périoste*. Beneath the periosteum. [a, 48.]

**SUBPERITONEAL**, adj. Su<sup>2</sup>b-pe<sup>2</sup>r-i<sup>2</sup>o<sup>2</sup>-n'e<sup>2</sup>-l. From *sub*, under, and *peritonæum* (q. v.). Fr., *sous-péritonéal*. Ger., *subperitonäal*. Situated beneath the peritonæum. [L, 41 (a, 14).]

**SUBPETIOLAR**, adj. Su<sup>2</sup>b-pe<sup>2</sup>t'i<sup>2</sup>o-la<sup>2</sup>r. Lat., *subpetiolaris*. Fr., *sous-pétioilaire*. Ger., *unterblattstielländig*. Situated under the petiole. [a, 35.] See **S. BVD**.

**SUBPHOSPHORICUS** (Lat.), adj. Su<sup>2</sup>b(su<sup>4</sup>b)-fo<sup>2</sup>s(fo<sup>4</sup>)-fo<sup>2</sup>r'-i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Of the Gr. Ph., containing a dihydric phosphate; with the name of a base, the dihydric phosphate of the base. [B.]

**SUBPHRENIC**, adj. Su<sup>2</sup>b-fre<sup>2</sup>n'i<sup>2</sup>k. From *sub*, under, and **φρήν**, the diaphragm. Situated beneath the diaphragm. [a, 34.]

**SUBLACENTA** (Lat.), n. f. Su<sup>2</sup>b(su<sup>4</sup>b)-pla<sup>2</sup>s(pla<sup>4</sup>k)-e<sup>2</sup>nt'a<sup>2</sup>. From *sub*, under, and *placenta* (q. v.). See **DECIDUA vera**.

**SUBPLEURAL**, adj. Su<sup>2</sup>b-plu<sup>2</sup>r'l. From *sub*, under, and **πλευρά** (see **PLEURA**). Situated beneath the pleura. [L.]

**SUBPONTINE**, adj. Su<sup>2</sup>b-po<sup>2</sup>nt'i<sup>2</sup>n. From *sub*, under, and *pons*, a bridge. Situated below the pons Varolii. [a, 48.]

**SUBPOPLITEUS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-pop-li<sup>2</sup>-te(a)/u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, below, and *poplitis*, the ham. See **POPLITEUS**.

**SUBPUBIC**, adj. Su<sup>2</sup>b-pu<sup>2</sup>b'i<sup>2</sup>k. From *sub*, under, and *pubes* (q. v.). Fr., *sous-pubien*. Situated below the pubic arch. [C.]

**SUBPUBIOFEMORALIS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-pu<sup>2</sup>b(pub)'i<sup>2</sup>-i<sup>2</sup>o(o<sup>2</sup>)-fe<sup>2</sup>m-o<sup>2</sup>r-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *sub*, under, *pubes* (q. v.), and *femur* (q. v.). See **ADDUCTOR femoris brevis**.

**SUBPUBIOPROSTATICUS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-pu<sup>2</sup>b(pub)'i<sup>2</sup>-i<sup>2</sup>o(o<sup>2</sup>)-pro<sup>2</sup>s-ta<sup>2</sup>t(i<sup>2</sup>)/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, under, *pubes* (q. v.), and *prostate*, the prostate. See **Compressor prostate**.

**SUBPUBIOTIBIALIS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-pu<sup>2</sup>b(pub)'i<sup>2</sup>-i<sup>2</sup>o(o<sup>2</sup>)-ti<sup>2</sup>b(t<sup>2</sup>b)-i<sup>2</sup>-al(a<sup>2</sup>l)/i<sup>2</sup>s. From *sub*, under, *pubes* (q. v.), and *tibia* (q. v.). See **Short adductor of the leg**.

**SUBPUBIOTROCHANTERITIS** (Lat.), n. m. Su<sup>2</sup>b(su<sup>4</sup>b)-pu<sup>2</sup>b(pub)'i<sup>2</sup>-i<sup>2</sup>o(o<sup>2</sup>)-trok(tro<sup>2</sup>ch<sup>2</sup>)-a<sup>2</sup>nt(a<sup>2</sup>nt)-e-a<sup>2</sup>/ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, under, *pubes* (q. v.), and **trochantin**, a trochanter. A subpubic muscle attached to a femoral trochanter.—**S. externus**. See **Obturator externus**.—**S. internus**. See **Obturator internus**.

**SUBRAMOSE**, adj. Su<sup>2</sup>b-ra<sup>2</sup>m'os. From *sub*, somewhat, and *ramosus*, full of boughs. Slightly branching. [a, 35.]

**SUBREGULARIFLORUS** (Lat.), adj. Su<sup>2</sup>b(su<sup>4</sup>b)-re<sup>2</sup>(rag)-u<sup>2</sup>l(u<sup>4</sup>l)-a<sup>2</sup>u<sup>2</sup>-flor'u<sup>2</sup>s(u<sup>2</sup>s). From *sub*, somewhat, *regularis*, regular, and *flos*, a flower. Fr., *subréguliflore*. Of the calathidium and disc, composed of flowers in which the corollas are nearly regular. [a, 35.]

**SUBRETINAL**, adj. Su<sup>2</sup>b-re<sup>2</sup>t'i<sup>2</sup>-n'l. From *sub*, under, and *retina*, the retina. Fr., *sous-rétinien*. Situated beneath the retina.

**SUBRUPEAL** [G. St. Hilaire] (Fr.), n. Su<sup>2</sup>b-ru<sup>2</sup>-pa-a<sup>2</sup>l. The articular bone of the crocodile. [L, 14.]

**SUBSALT**, n. Su<sup>2</sup>b-sa<sup>2</sup>t'l. Fr., *sous-sel*. See **BASIC SALT**.

**SUBSCAPULAR**, adj. Su<sup>2</sup>b-ska<sup>2</sup>p'u<sup>2</sup>l-a<sup>2</sup>r. Lat., *subscapularis*. Situated beneath or on the anterior aspect of the scapula.

**SUBSCAPULARIS** (Lat.), adj. *Su<sup>b</sup>(su<sup>b</sup>)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>1</sup>)-ar(a<sup>2</sup>r)<sup>1</sup>²s*. See **SUBSCAPULAR**; as a n. (Fr., *sous-scapulaire*; Ger., *Unterschulterblattmuskel*), a muscle arising from nearly the whole of the ventral surface of the scapula and inserted into the lesser tuberosity of the humerus. [L.]—**S. minor**. An anomalous muscle arising from the margin of the scapula and inserted into the capsule of the scapulo-humeral articulation, or into the humerus. [L. 31, 332.]

**SUBSCAPULO-CAPSULARIS** (Lat.), n. m. *Su<sup>b</sup>(su<sup>b</sup>)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-ka<sup>2</sup>ps(ka<sup>2</sup>ps)-u<sup>2</sup>l(u<sup>1</sup>)-a(a<sup>2</sup>)/r<sup>1</sup>²s*. From *sub*, under, *scapula* (q. v.), and *capsula*, a capsule. See **SUBSCAPULARIS minor**.

**SUBSCAPULOHUMERALIS** (Lat.), n. m. *Su<sup>b</sup>(su<sup>b</sup>)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-hu<sup>2</sup>m(hu<sup>2</sup>m)-e<sup>2</sup>r-al(a<sup>2</sup>l)<sup>1</sup>²s*. From *sub*, under, *scapula* (q. v.), and *humerus* (q. v.). See **SUBSCAPULARIS minor**.

**SUBSCAPULOHYOIDEUS** (Lat.), n. m. *Su<sup>b</sup>(su<sup>b</sup>)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-hi(hu<sup>2</sup>)-o(o<sup>2</sup>)-i<sup>2</sup>d(ed)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s)*. From *sub*, under, *scapula* (q. v.), and *hōiōs*, hyoid. Of Percival, see **OMOHYOIDEUS** (2d def.).

**SUBSCAPULOTROCHINEUS** (Lat.), n. m. *Su<sup>b</sup>(su<sup>b</sup>)-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>1</sup>)-o(o<sup>2</sup>)-tro<sup>2</sup>ch(tro<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>n(e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s))*. From *sub*, under, *scapula* (q. v.), and *τροχός*, a runner. See **SUBSCAPULARIS**.

**SUBSCRIPTIO** (Lat.), n. f. *Su<sup>b</sup>(su<sup>b</sup>)-skri<sup>2</sup>p(skrip)/shi<sup>2</sup>(ti<sup>2</sup>)-o*. Gen., -*on*is. From *scribere*, to write underneath. In a prescription, the directions to the pharmacist, showing how the ingredients are to be compounded and prepared. [B. 10.]

**SUBSECTION**, n. *Su<sup>b</sup>-se<sup>2</sup>k/shu<sup>2</sup>n*. Lat., *subsectio* (from *sub*, under, and *secare*, to divide). A group immediately subordinate to a section. [a. 35.]

**SUBSEROUS**, adj. *Su<sup>b</sup>-ser<sup>2</sup>u<sup>2</sup>s*. From *sub*, under, and *serum* (q. v.). Fr., *sous-séreux*. Situated beneath a serous membrane. [L. 56 (a. 43).]

**SUBSESSILE**, adj. *Su<sup>b</sup>-se<sup>2</sup>s<sup>2</sup>/i<sup>2</sup>l*. Lat., *subsessilis* (from *sub*, somewhat, and *sessilis*, sessile). Fr., s. Having a very short support or stalk; nearly sessile. [a. 35.]

**SUBSPECIES** (Lat.), n. f. *Su<sup>b</sup>(su<sup>b</sup>)-spe(spe<sup>2</sup>)/si<sup>2</sup>(ki<sup>2</sup>)-ez(as)*; in Eng., *sub-species*. Gen., -*es*. From *sub*, under, and *species* (q. v.). A variety having such decided characteristics as nearly to have the characters of a distinct species. [a. 35.]

**SUBSTANCE**, n. *Su<sup>b</sup>-st<sup>2</sup>n<sup>2</sup>s*. Gr., *οὐσία*, *oûsia*. Lat., *substantia* (from *substare*, to be present). Fr., s. Ger., *Substanz*. 1. That of which anything is composed or of which it consists. [a. 48.] 2. In histology, a general term for tissue, etc. [J.]—**Adamantine s.** See **ENAMEL**.—**Adenoid s.** See **ADENOID TISSUE**.—**Alibis s.** That portion of the chyme that is destined for the nourishment of the body. [L. 42.]—**Alimentary s.** An article of food in the crude form as supplied by Nature. [K. 14.]—**Basis-s.** (Heitzmann). 1. See **Ground-s.** (1st def.). 2. In connective tissue, etc., the entire s., except protoplasmic bodies or cells. [J. 26.]—**Bony basis-s.** See **OSSEOUS BASIS-s.**—**Cancellated (or cancellous) osseous s.** See **SPONGY BONE-s.**—**Cartilaginous basis-s.** Of Heitzmann, chondrin. [J. 26.]—**Cell-s.** See **PROTOPLASM**.—**Central gelatinous s.** See **SUBSTANTIA GELATINOSA**.—**Chondrogenous basis-s.** See **CHONDRIN**.—**Cineritious s.** See **ALA CINEREA** and **LAMINA CINEREA**.—**Compact osseous s.** Ger., *dichte Knochensubstanz*. The more compact tissue found in long bones and forming the superficial portion of flat or short bones. [L. 332.]—**Conglobate gland s.** The adenoid tissue of conglobate glands. [J.]—**Connective s.** See **CONNECTIVE TISSUE**.—**Contractile s.** 1. Any living s. or tissue capable of contraction (e. g., undifferentiated protoplasm, muscular tissue, cilia, etc.). [J. 2] The contractile portion of a muscle fibre (i. e., that within the sarcolemma). [L. 332.] 3. See **Dark disc**.—**Corks s.** Cutin. [a. 35.]—**Cortical s. of a hair.** The bundles of fibres cemented together which constitutes the larger portion of a hair. In colored hairs they contain pigment granules. [L.]—**Cortical s. of the kidney.** The portion of the kidney immediately beneath its fibrous covering. It is of a light crimson-brown color and about two lines in thickness, sends numerous processes (columns of Bertini) between the pyramids, and contains the Malpighian corpuscles and the terminals of the renal artery. [L.]—**Cortical s. of the suprarenal capsule.** The s. forming the external and greater portion of the suprarenal capsule. It consists of a fibrous stroma containing column-like groups of polyedral cells. [L.]—**Fibrinoplastic s.** Paraglobulin. [B.]—**Fibrous basis-s.** Of Heitzmann, the fibrous or laminated s. of striated or fibrous connective tissue, yielding glue or a glue-like body on being boiled. [J. 26.]—**Fused ganglion-cell s.** See **NEUROGLIA**.—**Gelatinous central s.** See **SUBSTANTIA GELATINOSA CENTRALIS**.—**Gelatinous ganglion-cell s.** See **NEUROGLIA**.—**Gelatinous s.** See **SUBSTANTIA GELATINOSA**.—**Gelatinous s. of Rolandi.** See **SUBSTANTIA GELATINOSA ROLANDI**.—**Germinal s.** See **GERM PLASMA**.—**Ground s.** Fr., *s. intercellulaire*. Ger., *Grundsubstanz*, *Zwischensubstanz* (1st def.), *Kittsubstanz* (1st def.). 1. The homogeneous s. or matrix in which the structural elements (cells and fibres) are imbedded, or which cements them together. Cf. **Cell-cement**. 2. The homogeneous hyaline material in the substance of cells in which is imbedded the network of protoplasm. [J.] See **PLASM**, **line s.** See **STROMA**.—**Horny s.** See **CORNEOUS TISSUE**.—**Hyaline s.** See **OBLASTEMA (1st def.).—**Hyaloid s.** See **CORPUS**.—**Ground-s.** (1st def.).—**ular s.** 1. See **CYTOBLASTEMA (1st def.). 2. **terglobular s.** Of (.).—**Interfibrillar s.** See **ENCHYLEMA**.—**Inconstant irregular cavity, zermak, the s. of dentin** which appears to it is most marked next the *as* when a cross-section is dried in the air. s. See **Ground-s.** (1st def.).—**cementum.** [J. 30, 35.]—**Intermediate osseous s.** Osseous tissue between *and* **Lateral disc**.—**Interstitial osseotential s.** See **ACHROMATIN** on the lamellæ of bone. [L. 332.]—**Intertubular s.** The homogen. **CYTOCHYLEMA**, and **ENCHYLEMA**.—the dental canals are situated *in* the matrix of dentin in which [L. 351.]—**Intervertebral s.******

See **Intervertebral CARTILAGES**.—**Isotrope s.** See **Lateral disc**.—**Living s.** See **PROTOPLASM**.—**Medullary s.** Lat., *tela medullaris*. Fr., *tissu médullaire*. Ger., *Markgewebe*. 1. The s. forming the medulla of a part, as of bone; the tissue forming the medullary in contradistinction to the cortical part of an organ, as of the kidney. [G.] 3. In botany, pith. [a. 35.]—**Medullary s. of hair.** The hair-pith. [L.] See under **HAIR**.—**Medullary s. of the kidney.** The portion of the kidney internal to and denser and more distinctly striated than the cortical s. It consists mainly of the pyramids of Ferrein and the papillæ. [L.]—**Medullary s. of the suprarenal capsules.** The internal portion of the suprarenal capsules. It consists of a reticular fibrous stroma inclosing irregularly shaped cells and venous capillaries. [L.]—**Middle perforated s.** See **Posterior perforated space**.—**Molecular (ganglion-cell) s.** See **NEUROGLIA**.—**Mucoid basis-s.** **Myxomatous basis-s.** Of Heitzmann, the non-glue-yielding, translucent s. which distinguishes the form of connective tissue called by him myxomatous or mucoid. [J. 26.]—**Nervous s.** See **Nervous tissue**.—**Nuclear s.** See **CHROMATIN** and **NUCLEOPLASM**.—**Nucleoplasmic s.** See **Nucleoplasmic body**.—**Osseous basis-s.** Of Heitzmann, "a dense, opaque, glue-yielding s. of striated or laminated appearance, infiltrated with lime salts" which serves to distinguish bone. [J. 26.]—**Osseous s. of a tooth.** See **DENTIN**.—**Osteogenic s.** See **OSTEOGEN**.—**Osteoid s.** See **CEMENT** (2d def.).—**Parietal s.** Of Remak, the matrix of cartilage. [J. 35.]—**Proteic s.** See **PROTEID**.—**Reticular s.** See **Reticular formation**.—**Reticular s. of bone.** See **Spongy bone s.**—**Reticulated white s.** Lat., *substantia reticularis alba*. A reticulated layer of white nervous tissue on the anterior half of the uncinate gyrus. [L. 31, 142.]—**Roland's gelatinous s.** See **SUBSTANTIA GELATINOSA ROLANDI**.—**Sarcoid s.** See **SARCOIDE**.—**Secondary s.** See **Lateral disc**.—**Solid nutritive s's.** Solid materials (e. g., eggs, slices of potatoes and of carrots, gelatin, gelose, and gelatinized blood-serum) used in bacteriological cultures. [L. 164 (a. 27).]—**Spongy bone (or osseous) s.** Bone tissue containing numerous cavities, giving it a cancellated appearance; found in the articular ends of long bones and in the interior of the short and flat bones. [B. 1, 332.]—**Spongy s. of the nerve-centres.** See **NEUROGLIA**.—**S. amorphe** (Fr.). See **ACHROMATIN**.—**S. blanche perforée de Vieq d'Azay** (Fr.). See **ESPACE PERFORÉ LATÉRAL**.—**S. cellulaire** (Fr.). Cellular tissue. [a. 35.]—**S. cendrée** (Fr.). See **LAMINA CINEREA**.—**S. centrale** (Fr.). The central gray matter of the brain. [J. 36 (K).]—**S. conjonctive** (Fr.). See **CONNECTIVE TISSUE**.—**S. criblée antérieure** (Fr.). See **Anterior perforated space**.—**S. criblée postérieure** (Fr.). See **Posterior perforated space**. [I. 39.]—**S. de soutien** (Fr.). See **CONNECTIVE TISSUE**.—**S. éburnée** (Fr.). See **DENTIN**.—**S. émailée** (Fr.). See **ENAMEL**.—**S. gélatineuse centrale** (Fr.). See **SUBSTANTIA GELATINOSA**.—**S. herbacée** (Fr.). Cellular tissue. [a. 35.]—**S. noire** (de Sömmerring) (Fr.). See **LOCUS NIGER**.—**S. perforée antérieure** (Fr.). See **Anterior perforated space**.—**S. perforée médiane** (Fr.). See **Posterior perforated space**.—**S. perforée médiane antérieure** (Fr.). See **Anterior perforated space**.—**S. perforée (médiane) moyenne (ou postérieure)** (Fr.). See **Posterior perforated space**.—**S. rhomboïdale** (Fr.). See **CORPUS DENTATUM**.—**S. striée** (Fr.). See **ENAMEL**.—**S. ternaire** (Fr.). A non-nitrogenous principle composed of three elements. [a. 18.]—**S. tubuleuse** (Fr.). See **DENTIN**.—**S. vitrée** (Fr.). See **ENAMEL**.—**Supporting s.** Ger., *Stützsubstanz*. A supporting tissue or s. (e. g., neuroglia, connective tissue, etc.). [J.]—**Ventricular gray s.** Ger., *grauer Boden*. Of Meynert, the gray matter immediately adjacent to one of the ventricles of the brain; also the floor of the fourth ventricle. [J. 31 (K).]—**Vitreous s.** See **ENAMEL**.—**White s. of Schwann**. The medullary sheath of a nerve. [L.]

**SUBSTANTIA** (Lat.), n. f. *Su<sup>b</sup>(su<sup>b</sup>)-sta<sup>2</sup>n(sta<sup>2</sup>n)/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>*. See **SUBSTANCE**.—**S. adamantina.** See **ENAMEL**.—**S. antica media.** See **Anterior perforated space**.—**S. callosa, S. candida.** The medullary cerebral substance. [I. 3 (K).]—**S. cinerea.** Gray nervous matter. [L.]—**S. cinerea gelatinosa.** See **S. gelatinosa**.—**S. cineritia.** The gray substance of the brain. [I. 3 (K).]—**S. conjunctoria.** See **CONNECTIVE TISSUE**.—**S. corticalis (cerebri).** The cortex cerebri. [L.]—**S. corticalis lentis.** The peripheral portion or cortex of the lens, as distinct from the nucleus. [F.]—**S. corticalis pili.** See **Cortical substance of a hair**.—**S. corticalis renis.** See **Cortical substance of the kidney**.—**S. cribrosa lateralis.** See **Anterior perforated space**.—**S. cribrosa media.** See **LAMINA CINEREA**.—**S. dentalis ossea.** The cement of a tooth. [L.]—**S. dentalis tubulosa.** See **DENTIN**.—**S. dentis.** The tissue forming the teeth (enamel, cement, and dentin). [J.]—**S. dentis propria** (seu tubulosa), **S. eburnea.** See **DENTIN**.—**S. ferruginea.** 1. See **S. grisea**. 2. The gray substance of the locus cereuleus. [J. 6 (K).]—**S. ferruginea Arnoldii.** See **S. ferruginea** (2d def.).—**S. ferruginea superior.** See **NUCLEUS OF THE TEGMENTUM**.—**S. fibrosa pili.** See **Cortical substance of a hair**.—**S. filamentosa.** See **ENAMEL**.—**S. flava.** Ger., *gelbe Substanz*. The yellow nerve substance of the brain. [J. 3 (K).]—**S. fundamentalis dentis.** See **Intertubular substance**.—**S. fusca.** See **S. nigra**.—**S. gelatinosa.** Neuroglia having a transparent, jelly-like appearance when fresh. [J.]—**S. gelatinosa centralis.** Ger., *centrales Höhlengrau*, *grauer Centralhorn*, *Ringcommissur*. Syn.: *central ependymal thread*, *gray central nucleus*. The hollow, cylindrical or ellipsoidal mass of neuroglia surrounding the central canal of the myel and forming a kind of membrane upon which rests the epithelium of the central canal. It is composed of an amorphous substance, granules, fine fibres, and a few neuroglia cells, and in the fresh state appears translucent like jelly. [J. 10, 21, 30.]—**S. gelatinosa columna posterioris, S. gelatinosa Rolandi.** Neuroglia of a peculiarly transparent appearance found in the tip of the posterior gray cornu in the myel. It is supposed to contain very few true nerve-elements. [J. 10, 30, 32.]—**S. glandulosa.** Of Viessens, the gray substance of the cortex cerebri. [I. 3 (K).]—**S. glomerulosa.** The cortical substance of the kidney. [J. 16.]—**S. grisea.** The central gray nervous matter of the spinal cord. [J. 6 (K).]—**S. hepatitis brunnea** (seu corti-

**calis**. The outer and darker-colored portion of the liver. [L.]—**S. hepatis flava** (seu **medullaris**). The yellowish or deeper substance of the liver in contradistinction to the brown or cortical substance. [L. 50 (a. 50).]—**S. innominata**. Of Reil, see **ANSA** of Reil. —**S. hyalina**. See **CYTOLASTEMA** (1st def.).—**S. intermedia**. Of Sömmerring, the layer of nerve-substance in the cerebellum interposed between the central and cortical gray zones. [I. 3 (K).]—**S. intertubularis dentis**. See **Intertubular SUBSTANCE**.—**S. lentis corticalis**. The cortex of the lens. [L.]—**S. lienis pulposa** (seu **rubra**, seu **vasculosa**). See **Splenic PULP**.—**S. medullaris**. See **Medullary SUBSTANCE**.—**S. medullaris pili**. The hair-pith (see under **HAIR**).—**S. medullaris renis**. See **Medullary SUBSTANCE** of the kidney.—**S. nigra Sömmerringii**. See **LOCUS niger**.—**S. ochracea**. See **Yellow NUCLEUS** of the corpus striatum. —**S. opaca**. Of Leydig, see **PROTOPLASM**.—**S. ossea**. See **DENTIN**.—**S. ossium compacta**. See **Compact osseous SUBSTANCE**.—**S. ossium corticalis**. Ger., **Knockenrinde**. The more condensed layer forming the outer surface of bone. [L. 332.]—**S. osteoidea**. See **CEMENT** (2d def.).—**S. parenchymatosa**. See **PARENCHYMA**.—**S. perforata anterior** (seu **antica**). See **Anterior perforated SPACE**.—**S. perforata cinerea**. See **Posterior perforated SPACE**.—**S. perforata lateralis**. See **Anterior perforated SPACE**.—**S. perforata media** (seu **posterior**). See **Posterior perforated SPACE**.—**S. primaria**. Of Stenson, the medullary substance of the central nervous system. [I. 3 (K).]—**S. propria corneae**. The parenchyma or true tissue of the cornea. [L.]—**S. propria dentis**. See **DENTIN**.—**S. propria of the membrana tympani**.—**S. pulposa dentis**. See **Dental PULP**.—**S. pulposa lienis**. See **Splenic PULP**.—**S. renis cineritia** (seu **fibrosa**, seu **glandulosa**, seu **interna**, seu **medullaris**, seu **tubulosa**). See **Medullary SUBSTANCE** of the kidney.—**S. renis corticalis** (externa, seu **glandulosa**, seu **rubicunda**). The cortical substance of the kidney. [L. 7.]—**S. reticularis**. See **Reticular FORMATION**.—**S. reticularis alba**. See **Reticulated white SUBSTANCE**.—**S. Rolandi**. See **S. gelatinosa Rolandi**.—**S. rubra** (lienis). See **Splenic PULP**.—**S. secundaria**. Of Carus, the gray matter of the cortex cerebri. [I. 3 (K).]—**S. Sömmerringii**. See **LOCUS niger**.—**S. striata**. See **ENAMEL**.—**S. subalbida**. See **ENAMEL**.—**S. vitrea ossis**. See **Compact osseous SUBSTANCE**.

**SUBSTANZ** (Ger.), n. **Zub-sta<sup>nts</sup>**. See **SUBSTANCE**.—**Braune S.** Of Gordon, the gray matter of the brain. [J. 3 (K).]—**Centrale S. des Aquädukt**. The gray matter surrounding the aqueduct of Sylvius. [I. 17 (K).]—**Dichte Knochen<sup>s</sup>**. Compact osseous substance. [L.]—**Conglobirte S.** See **Adenoid TISSUE**.—**Gallerts<sup>s</sup>**. See **Gelatinous TISSUE**.—**Geförnte S.** See **Formed MATERIAL**.—**Gelatinöse S.** See **SUBSTANTIA gelatinosa**. [I. 6.]—**Gelbe S.** See **SUBSTANTIA flava**.—**Graue gelatinöse S.** A thin layer of nerve-cells and neuroglia on the dorsal aspect of the olfactory bulb. [I. 17 (K).]—**Kerns<sup>s</sup>**. See **Nuclear SUBSTANCE**.—**Knochengrunds<sup>s</sup>**. The ground substance of bone. [J.]—**Knochen<sup>s</sup>**. Osseous tissue. [L.]—**Mittlere durchlöcherzte S.** See **Posterior perforated SPACE**.—**Mutter-S.** That substance which is supposed to give rise to the active principle of the digestive fluids. [K. 16.] Cf. **PEPSINOGEN** and **ZYMOCEN**.—**Periphere graue S.** See **STRATUM cinereum**.—**Punkts<sup>s</sup>**. See **NEUROSPONGIUM**.—**Rindige S.** Cortical substance. [L.]—**Rostfarbige S.**—**Rothbraune S.**—**Rothgelbgraue S.** See **ALA cinerea**.—**Schwammige Knochen<sup>s</sup>**, **Schwammige S.** See **Spongy osseous SUBSTANCE**.—**Sömmerring'sche S.** See **LOCUS niger**.—**Spongiose Knochen<sup>s</sup>**. See **Spongy osseous SUBSTANCE**.—**Stützs<sup>s</sup>**. See **Supporting SUBSTANCE**.—**Inseln**. The masses of interstitial tissue intervening between the blood-vessels of the germinal area of the ovum. [A. 8.]—**Vordere durchlöcherzte S.** See **Anterior perforated SPACE**.—**Weisse reticuläre S.** See **FORMATIO reticularis alba**.—**Zwischens<sup>s</sup>**. See **MATRIX** (2d def.).

**SUBSTERNAL**, adj. **Su<sup>b</sup>-stu<sup>r</sup>n'al**. See **INFRASTERNAL**.

**SUBSTITUTION**, n. **Su<sup>b</sup>-sti<sup>t</sup>-u<sup>2</sup>-shu<sup>2</sup>n**. Lat., *substitutio* (from *substituere*, to substitute). 1. In chemistry, the process of replacing one or more atoms in a molecule by other atoms or molecules. [B.] 2. In physiology and pathology, compensatory or vicarious action; a manifestation of disease in alternation with another and especially a nervous disorder; of French writers, replacement of the tissue of an organ by an inflammatory product. [Edinb. Med. Jour., Apr. 1888, p. 895 (a. 17).]—**S. parenchymatense** (Fr.). Of Luton, the process of producing local artificial inflammation by subcutaneous injections of common salt or silver-nitrate solution. [L. 57 (a. 14).]—**S. product**. In chemistry, a product of the reaction of two bodies in which a molecule of the one replaces a portion of the molecule of the other. [B.]

**SUBSTRATUM** (Lat.), adj. **Su<sup>b</sup>(su<sup>b</sup>)-strat**(strat<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). From *substernere*, to spread beneath. Ger., *untergebreitet*. Spread under; so placed beneath another part as to form a substratum. [a. 35.]

**SUBSULFAS** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-sul<sup>2</sup>f**(sul<sup>2</sup>f)/a<sup>2</sup>s(a<sup>2</sup>s). (Gen., *fat<sup>is</sup>*). See **SUBSULPHATE**.—**S. hydrargyricus**. See **Mercury subsulphate**.

**SUBSULFUREUS** (Lat.), adj. **Su<sup>b</sup>(su<sup>b</sup>)-sul<sup>2</sup>f**(sul<sup>2</sup>f)/u<sup>2</sup>r(u<sup>2</sup>r). Gen., *u<sup>2</sup>r(u<sup>2</sup>r)s*. Hyposulphurous; with the name of a base, the hyposulphite (thiosulphate) of the base. [B.]

**SUBSULPHAS** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-sul<sup>2</sup>f**(sul<sup>2</sup>f)/a<sup>2</sup>s(a<sup>2</sup>s). Gen., *phat<sup>is</sup>*. See **SUBSULPHATE**.—**Philus subsulphatis ammonico-cuprile**. See **Philus ammoniacetici cuprile**.—**S. chinensis**. See **QUININE sulphate**.—**S. cinchonide**. See **CINCHONINE sulphate**.—**S. cinchonidide**. See **CINCHONIDINE sulphate**.—**S. quininus**. See **QUININE sulphate**.—**S. quinidide**. See **QUINIDINE sulphate**.

**SUBSULPHATE**, n. **Su<sup>b</sup>-sul<sup>2</sup>f**/at. Lat., *subsulfas*, *subsulphas*. Fr., *sousulfate*. A basic sulphate. [B.]

**SUBSULPHIDE**, n. **Su<sup>b</sup>-sul<sup>2</sup>f**/i<sup>2</sup>d(i<sup>2</sup>d). A sulphide which contains a relatively smaller amount of sulphur than an ordinary sulphide. [B.]

**SUBSULTUS** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-sul<sup>2</sup>t**(sul<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s). From *subsultare*, to leap up. Fr., *soubresaut*. Ger., *Hüpfen*. A jerking or twitching. [a. 17.]—**S. tendinum**. Ger., *Sehnenhüpfen*. Trembling of the tendons caused by involuntary twitchings of the muscles, especially of the face and arms. [D. 1.]

**SUBTEGMEN** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-te<sup>2</sup>g**/me<sup>2</sup>n. Gen., *-teg<sup>2</sup>-minis*. From *subtexere*, to weave under. Weft. [A. 312 (a. 48).]—**S. fornicis**. The layer of nerve-fibres in the fornix cerebri under the superficial bundles of longitudinal fibres. [I. 3 (K).]

**SUBTEMPORAL**, adj. **Su<sup>b</sup>-te<sup>2</sup>mp**/o<sup>2</sup>r'l. See **INFRATEMPORAL**.

**SUBTERCUTANEUS** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-tu<sup>2</sup>r**(te<sup>2</sup>r)-ku<sup>2</sup>t-(ku<sup>2</sup>t)-an(a<sup>2</sup>n)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *subter*, beneath, and *cutis*, the skin. See **PLATYSMA myodes**.

**SUBTERRANEUS**, adj. **Su<sup>b</sup>-te<sup>2</sup>r**-an<sup>2</sup>/e<sup>2</sup>-u<sup>2</sup>s. Lat., *subterraneus* (from *sub*, under, and *terra*, the earth). Fr., *souterré*, *souterrain*. Ger., *unterirdisch*. Growing beneath the surface of the soil. [a. 35.]

**SUBTHALAMIC**, adj. **Su<sup>b</sup>-tha<sup>2</sup>l**/a<sup>2</sup>m/i<sup>2</sup>k. From *sub*, under, and *thalamus* (q. v.). Situated below the optic thalamus. [a. 48.]

**SUBTHALAMICUM** (Lat.), n. n. **Su<sup>b</sup>(su<sup>b</sup>)-tha<sup>2</sup>l**(tha<sup>2</sup>l)-a<sup>2</sup>m-(a<sup>2</sup>m)/i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m). See **Subthalamus NUCLEUS**.

**SUBTHORACIC**, adj. **Su<sup>b</sup>-tho<sup>2</sup>r**-a<sup>2</sup>s/i<sup>2</sup>k. See **INFRAThoracic**.

**SUBTHYREOIDEUS** (Lat.), n. m. **Su<sup>b</sup>(su<sup>b</sup>)-thir**(thu<sup>2</sup>r)-e<sup>2</sup>. o(o<sup>2</sup>)-i<sup>2</sup>d(e<sup>2</sup>)/e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). For deriv., see *Sub-* and *THYREOID*. An anomalous bundle of muscular fibres uniting the thyreo-arytenoid inferior and lateralis. [L. 332.]

**SUBTRIBE**, n. **Su<sup>b</sup>-trib**. Lat., *subtribus* (from *sub*, under, and *tribus*, a tribe). A group ranking between the tribe and the genus. [a. 35.]

**SUBTROCHANTERIC**, adj. **Su<sup>b</sup>-trok**-a<sup>2</sup>nt-e<sup>2</sup>r/i<sup>2</sup>k. Fr., *sous-trochanterien*. See **INFRAtrochanteric**.

**SUBTROCHLEAR**, adj. **Su<sup>b</sup>-tro<sup>2</sup>k**/le<sup>2</sup>a-a<sup>2</sup>r. See **INFRAtrochlear**.

**SUBTROPICAL**, adj. **Su<sup>b</sup>-tro<sup>2</sup>p**/i<sup>2</sup>-k'l. From *sub*, near to, and *τροπικός*, of the solstice. Of plants, growing in countries approximating to the tropics in climatic conditions. [a. 35.]

**SUBULA** (Lat.), n. f. **Su<sup>b</sup>(sub)-u<sup>2</sup>l**(u<sup>2</sup>l)-a<sup>2</sup>. Ger., *Priemspitze*. One of the prickles, formed by the hymenium, covering the lower surface of the pileus in certain *Fungi* (*Hydnum*). [a. 35.]

**SUBULATE**, adj. **Su<sup>b</sup>-u<sup>2</sup>l**-at. Lat., *subulatus* (from *subula*, an awl). Fr., *subulé*. Ger., *pfiemernartig*, *pfiernig*. Awl-shaped, styloid. [L. 221.]

**SUBULIFORM**, adj. **Su<sup>b</sup>-u<sup>2</sup>l**/i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *subuliformis* (from *subula*, an awl, and *forma*, form). Subulate, styloid (said of solid bodies). [a. 35.]

**SUBULOSE**, adj. **Su<sup>b</sup>-u<sup>2</sup>l**-os. Lat., *subulosus*. Ger., *pfiernspitzig*. Covered with or consisting of subulæ. [a. 35.]

**SUBUNGUAL**, **SUBUNGUAL**, adj's. **Su<sup>b</sup>-u<sup>2</sup>n**/g<sup>2</sup>w'l-g<sup>2</sup>w'i<sup>2</sup>-l. From *sub*, under, and *unguis*, a hoof. Fr., *sous-unguéal*, *sous-ongulaire*. Situated beneath a nail. [a. 48.]

**SUBVAGINAL**, adj. **Su<sup>b</sup>-va<sup>2</sup>j**/i<sup>2</sup>-n'l. See **INFRAVAGINAL**.

**SUBVARIETY**, n. **Su<sup>b</sup>-va<sup>2</sup>r**-i<sup>2</sup>e<sup>2</sup>-i<sup>2</sup>. Lat., *subvarietas*. Ger., *Unterspielart*. One of the more or less divergent groups into which some varieties may be divided. [a. 35.]

**SUBVERTEBRA** (Lat.), n. f. **Su<sup>b</sup>(su<sup>b</sup>)-vu<sup>2</sup>rt**(we<sup>2</sup>rt)/e<sup>2</sup>b-ra<sup>2</sup>. From *sub*, under, and *vertebra* (q. v.). See **SACRUM**.

**SUBVOLA** (Lat.), n. f. **Su<sup>b</sup>(su<sup>b</sup>)-vo<sup>2</sup>l**(wo<sup>2</sup>l)-a<sup>2</sup>. 1. The space between the second and fifth fingers. [L. 50 (a. 14).] 2. See **HYPOthenar**.

**SUBVOMÉRAL** [G. St.-Hilaire] (Fr.), n. **Su<sup>b</sup>-vo**-ma-ra<sup>2</sup>. The splenic bone in fishes. [L. 14.]

**SUBZONAL**, adj. **Su<sup>b</sup>-zo<sup>2</sup>n'l**. From *sub*, under, and *ζώνη*, a belt. Situated beneath the zona pellucida. [L.]

**SUBZYGOMATIC**, adj. **Su<sup>b</sup>-zi<sup>2</sup>g**-o<sup>2</sup>m-a<sup>2</sup>t/i<sup>2</sup>k. From *sub*, below, and *ζύγμα*, a bolt. Fr., *sous-zygomatique*. Situated below the zygoma. [L. 41 (a. 14).]

**SUC** (Fr.), n. **Su<sup>2</sup>k**. 1. Juice, sap. 2. See **Succus** (2d def.).—**Extrait de s.** An extract made by condensing a fruit juice. [L. 41 (a. 14).]—**Sirap** of s. d'herbes. See **Sirap laxatif d'Amusat**.—**S. antiscorbutique**. See **Succus antiscorbuticus**.—**S. cancéreux**. See **CANCER juice**.—**S. cellulaire**. See **CELL-fluid**.—**S. de la liqueur végétale**. Of the alchemists, grape-juice. [L. 41 (a. 14).]—**S. entérique**. See **Intestinal juice**.—**S. gastrique**. See **Gastric juice**.—**S. s huileux fixes**. Vegetable juices containing fixed oils. [L. 49 (a. 14).]—**S. lacté**. See **CHYLE**.—**S. nourricier**. See **Nutrient juice**.—**S. nucléolaire**. See **ACHROMATIN**.—**S. pancréatique**. See **Pancreatic juice**.—**S. pylorique**. See **Succus pyloricus**.—**S. stomacal**. See **Gastric juice**.—**S. s sucrés**. Saccharine vegetable juices, such as those of the sugar cane, beet-root, maple, etc. [L. 41 (a. 14).]—**S. s végétaux** [Fr. Cod.]. Juices prepared from the green part, especially the fresh leaves, or from the fruit of various vegetable substance. [B. 95 (a. 38).]

**SUCCADE** (Ger.), n. **Zuk**-ka<sup>2</sup>d<sup>2</sup>. See **CITRONNAT**.

**SUCCEDANEUM** (Lat.), n. n. **Su<sup>2</sup>ksu<sup>2</sup>k**-se<sup>2</sup>d(kad)-an(a<sup>2</sup>n)/e<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *succedaneus*, substituted. Fr., *succédané*. Ger., *stellvertretendes Mittel*, *Surrogat*. A substitute. [L. 49, 50 (a. 43).]

**SUCCEDANEUS** (Lat.), adj.  $Su^3k(su^4k)-se^2d(kad)-an(a^3n)^{e2}$ .  $u^3s(u^4s)$ . From *succedere*, to succeed. Fr., *succédané*. Ger., *allmähig* (1st def.), *stellvertretend* (2d def.). 1. Taking place by degrees or through a long period of time. 2. Vicarious. [a, 35.]

**SUCCENTURIATUS** (Lat.), adj.  $Su^3k(su^4k)-se^2nt(ke^3nt)-u^3r$ .  $(u^3r)^2-i^2-at(a^3t)/u^3s(u^4s)$ . From *succenturiare*, to receive as a recruit or substitute. Fr., *succenturié*. 1. Substituted. 2. Accessory (see *PLACENTA succenturiata*); as a n., an accessory muscle. —S. recti. Of Sylvius, see *PYRAMIDALIS abdominis*.

**SUCCESSIVE**, adj.  $Su^3k-se^2s/i^2v$ . Lat., *successivus* (from *succedere*, to follow). Fr., *successif*. Ger., *nachfolgend*. In botany, developed first after another similar part or organ. [a, 35.]

**SUCCHOLATA** (Lat.), n. f.  $Su^3k(su^4k)-ko^2l(ch^2o^2l)-at(a^3t)^{a3}$ . See *CHOCOLATE*.

**SUCCIN** (Fr.), n.  $Su^3k-sa^2n^2$ . See *AMBRA flava*. —**Alcoolé de s.** See *Tinctura succini* (1st def.). —**Baume de s.** See *Balsam of AMBER*. —**Épypère de s. ammoniacale**. See *Spiritus ammoniac cum succino*. —**Éthérolé de s.** See *Tinctura succini* (2d def.). —**Huile (volatile) de s.** See *Oleum succini* (2d def.). —**Poudre de s.** See *Succinum pulveratum*. —**Sel volatil de s.** See *Succinic acid*. —**S. noir**. See *AMBRA nigra*. —**Teinture (alcoolique) de s.** See *Tinctura succini* (1st def.). —**Teinture éthérée de s.** See *Tinctura succini* (2d def.).

**SUCCINAMIC ACID**, n.  $Su^3k-si^2n-a^2m/i^2k$ . Fr., *acide succinamique*. Ger., *Succinaminsäure*. A monobasic acid,  $C_4H_5NO_3$ , occurring as large tabular crystals of agreeable acid taste. [B, 3 (a, 38); B, 4.]

**SUCCINAMIDE**, n.  $Su^3k-si^2n-a^2m-i^2d(id)$ . Fr., s. Ger., *Succinamid*. The compound  $C_4H_5N_2O_3$ . [B, 3 (a, 38).]

**SUCCINANILIC ACID**, n.  $Su^3k-si^2n-a^2n-i^2l/i^2k$ . Fr., *acide succinanilique*. An acid,  $C_{10}H_{11}NO_3 = C_6H_4O_2(NH.C_6H_5)(OH)$ . [B, 93 (a, 14).]

**SUCCINANILIDE**, n.  $Su^3k-si^2n-a^2n-i^2l-i^2d(id)$ . Fr., s. Ger., *Succinanilid*. A substance,  $C_{14}H_{15}N_2O_2 = C_6H_4O_2(NH.C_6H_5)_2$ , obtained by heating a mixture of succinic acid and aniline or by the action of aniline on succinyl chloride. [B, 93 (a, 14).]

**SUCCINAS** (Lat.), n. m.  $Su^3k(su^4k)/si^2n(ki^2n)-a^2s(a^3s)$ . Gen., *-at's*. See *SUCCINATE*. —**Liquor succinatis ammonici (pyroaleis)**, **Solutio succinatis ammonici pyro-animalis**, **Spiritus succinatis ammonici**. See *Liquor AMMONII succinici*.

**SUCCINATE**, n.  $Su^3k/si^2n-at$ . Lat., *succinas*. Fr., s. Ger., *Succinat*, *Bernsteinsalz*. A salt of succinic acid. [B.]

**SUCCINATED**, adj.  $Su^3k/si^2n-at-e^2d$ . Lat., *succinatus* (from *succinum*, amber). Fr., *succiné*. Combined, mixed with, or containing amber or succinic acid. [B, 92; L, 56.]

**SUCCINCTUM** (Lat.), **SUCCINCTURA** (Lat.), n's n. and f.  $Su^3k(su^4k)-si^2n^2kt(ken^2kt)/u^3m(u^4m)$ ,  $-si^2n^2kt(ken^2kt)-u^3r(ur)^{a2}$ . From *succingere*, to gird below. See *DIAPHRAGM* (1st def.).

**SUCCINIC**, adj.  $Su^3k-si^2n/i^2k$ . Lat., *succinicus* (from *succinum*, amber). Fr., *succinique*. Derived from or contained in amber. [B.] —**S. acid**. Lat., *acidum succinicum*. Fr., *acide succinique*. Ger., *Bernsteinsäure*, *Succinsäure*. An acid,  $C_4H_4(COOH)_2 = C_4H_4O_4$ , obtained by the dry distillation of amber, from the products of fermentation of sugar and of malic and tartaric acids, and from fossil wood, and occurring in the spleen and acinous glands and in the urine after the ingestion of a considerable quantity of fruit. It forms monoclinic tabular or prismatic crystals of slightly acid taste. [B; B, 3 (a, 38).] —**S. aldehyde**. Fr., *succinaldéhyde*. A colorless liquid,  $C_4H_4O_3$ , derived from succinic acid. [B, 4.] —**S. anhydride**. Fr., *anhydride succinique*. Ger., *Bernsteinsäureanhydrid*, *Succinanhydrid*. A colorless crystalline body,  $C_4H_4O_3$ . [B, 4.]

**SUCCINIFER** (Lat.), adj.  $Su^3k(su^4k)-si^2n(ki^2n)-i^2-fu^3r(fr)^{e2r}$ . From *succinum*, amber, and *ferre*, to bear. Productive of amber.

**SUCCINIMIDE**, n.  $Su^3k-si^2n/i^2m-i^2d(id)$ . A substance,  $C_4H_5NO_3$ , occurring as transparent crystals. [B, 3 (a, 38).]

**SUCCININ**, n.  $Su^3k/si^2n-i^2n$ . 1. A dark-brown substance,  $C_6H_5-C_6H_4-OH$ , obtained by heating equal parts of succinic acid and glycerin to about 230° C. 2. The part of amber which is insoluble in most solvents. [B, 270 (a, 38).]

**SUCCINIT** (Ger.), n. Zuk-tsen-et'. Amber. [a, 35.]

**SUCCINONE**, n.  $Su^3k/si^2n-on$ . A brown, oily liquid of empyreumatic odor, obtained in the dry distillation of calcium succinate. [B, 38, 93 (a, 14).]

**SUCCINUM** (Lat.), n. n.  $Su^3k(su^4k)/si^2n(ki^2n)-u^3m(u^4m)$ . From *succus*, juice. Fr., *succin*, *karaké*, *ambre jaune* [Fr. Cod.]. Ger., *Bernstein*. Sp., *succino*, *ambar amarillo* [Sp. Ph.]. Amber. See *AMBRA flava*. —**Acidum succini**. See *SUCCINIC acid*. —**Æthereolum succini**. See *Oleum succini* (2d def.). —**Alcohol cum succino**. See *Tinctura succini* (1st def.). —**Balsamum succini**. Ger., *Bernsteinbalsam*. See *Balsam of AMBER*. —**Essentia succini**. See *Tinctura succini* (1st def.). —**Oleosaccharum succini**. Ger., *Bernsteinölzucker*. A mixture of two drops of oil of amber with 4 grammes of sugar, triturated together. [B, 119 (a, 38).] —**Oleum succini**. Fr., *huile (volatile) de succin*, *oléole de succin* (2d def.). Ger., *Bernsteinöl*, *Ambröl*. 1. Of the Pruss. Ph., 6th ed., crude oil of amber, a thick, brown oil, of strong, disagreeable bituminous odor, produced by the dry distillation of amber. 2. Of the U. S. Ph. and Swiss Ph., rectified oil of amber, a nearly or quite colorless, thin oil, becoming thick and dark with time and having a penetrating, fiery odor and taste. It is a crude mixture of two separate oils formed at different stages in the distillation, and is obtained by repeated distillation and the addition of water. It is a local irritant, and in large doses toxic. It is used as an excitant and antispasmodic, in flatulent dyspepsia, globus hystericus, and

hiccuph, and externally in rheumatism, convulsions, earache, and toothache. [A, 1; B, 95 (a, 38); L, 57 (a, 50); W. Murrell, "Brit. Med. Jour.," Apr. 1, 1893 ("N. Y. Med. Jour.," Apr. 15, 1893, p. 417).] —**Oleum succini æthereum** (seu *depuratum*). See *Oleum succini* (2d def.). —**Oleum succini crudum**. See *Oleum succini* (1st def.). —**Oleum succini empyreumaticum**. See *Oleum succini* (2d def.). —**Oleum succini empyreumaticum cum crudum**. See *Oleum succini* (1st def.). —**Oleum succini oxydatum**. See *Artificial MUSK*. —**Oleum succini pyrogenæum**. See *Oleum succini* (1st def.). —**Oleum succini rectificatum**. See *Oleum succini* (2d def.). —**Pilule de succino**. A pill-mass consisting of 10 parts of Socotrine aloes with 6 of amber, 4 of mastic, and 1 part of round birthwort, made up with tincture of amber and sometimes with 3 parts of agaric lozenges; or of 6 parts of aloes, 3 of amber, 2 each of birthwort and agaric, made up with syrup of betonica. [B, 119 (a, 38).] —**Potestates succini**. An obsolete preparation of amber, sal ammoniac, and antimonial wine. [L, 94.] —**Pyrooleum succini**. See *Oleum succini* (2d def.). —**Pyrooleum succini crudum**. See *Oleum succini* (1st def.). —**Pyrooleum succini rectificatum**. See *Oleum succini* (2d def.). —**Rasura succini**. Very small fragments of amber (*ambra flava*), amber shavings. [a, 35.] —**Resina succini balsamica**. See *Artificial MUSK*. —**Sal succini** (volatile). See *SUCCINIC acid*. —**S. album et citrinum**. S. electricum. See *AMBRA flava*. —**S. factitium**. See *Factitious AMBER*. —**S. flavum**. See *AMBRA flava*. —**S. griseum**. See *AMBRA grisea*. —**S. marinum**. *Spermacti*. [a, 35.] —**S. oxygenatum**. See *Artificial MUSK*. —**S. pulveratum**. Fr., *poudre de succin*. Amber triturated in an iron mortar and sifted through a No. 100 silk sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).] —**Tinctura succini**. Fr., *teinture de succin* [Fr. Cod.] (1st def.). Ger., *Bernsteintinctur*, *Bernsteinessenz*, *Bernsteintinctur*. 1. Of the Gr. Ph. and Netherl. Ph., a tincture made by digesting or macerating powdered amber with four times as much alcohol of sp. gr. 0.820 to 0.830 [Gr. Ph.], with eight times as much alcohol of sp. gr. 0.829 [Netherl. Ph.], with ten times as much 80-per-cent. alcohol [Fr. Cod.]. 2. Of the Swed. Ph., a preparation made by macerating powdered amber with five times as much spiritus ætheris for five days. [B, 95, 119 (a, 38).] —**Tinctura succini ætherea**. See *Tinctura succini* (2d def.). —**Tinctura succini alcalisata**. Ger., *alkalische Bernsteintinctur*. A mixture of 12 parts of amber and 3 of aqueous solution of potassium carbonate with 48 of alcohol, filtered after some days. —**Tinctura succini alcoholica**. See *Tinctura succini* (1st def.). —**Tinctura succini aromatica** [Swed. Ph.]. A solution of 1 part each of the oils of cloves, cassia, lavender, and mace in 100 parts of ethereal tincture of amber. [B, 95 (a, 38).] —**Tinctura succini balsamica**. An alcoholic solution of artificial musk (see *Tinctura MOSCHI artificialis*). [a, 38.] —**Trochisci succini**. Ger., *Bernsteintafelchen*. Troches containing opium, amber, and other ingredients. [B, 48.]

**SUCCINURIC ACID**, n.  $Su^3k-si^2n-u^3r/i^2k$ . Fr., *acide succinurique*. Ger., *Succinursäure*. A body,  $C_6H_5N_2O_4$ , forming lamellar crystals. [B, 4.]

**SUCCINYL**, n.  $Su^3k/si^2n-i^2l$ . Fr., *succinyle*. The radicle of succinic acid, not yet isolated. [B, 4.] —**S. chloride**. A substance,  $C_4H_4O_3.Cl_2$ , obtained by distilling succinic acid with phosphorus perchloride; a fuming oil of highly refractive power and of suffocating smell, crystallizing at 0° C. and boiling at 190° C. [B, 48, 93 (a, 14).] —**S. diamide**. See *SUCCINAMIDE*.

**SUCCISA** (Lat.), n. f.  $Su^3k(su^4k)-sis(kes)^{a2}$ . 1. The *Scabiosa s.* 2. Of Mönch, the genus *Scabiosa*. [a, 35.]

**SUCCISE**, adj.  $Su^3k-sis'$ . Lat., *succius* (from *succidere*, to cut away below). Fr., *succis*. In botany, having the appearance of being broken or cut off at the lower end. [a, 35.]

**SUCCISTEARIN**, n.  $Su^3k-si^2-ste^2a^2r-i^2n$ . Fr., *succistéarène*. 1. The white crystalline portion of a waxy substance obtained by the dry distillation of amber; inodorous and insipid. 2. Improperly, idrialin. [B, 93 (a, 14).]

**SUCCORY**, n.  $Su^3k-o^2r-i^2$ . See *CHICORY*. —**Wild s.** See *SAB-BATIA angularis*. —**Yellow s.** See *CATANACHE lutea*.

**SUCCOSE**, adj.  $Su^3k-os$ . Lat., *succosus* (from *succus*, juice). Ger., *saftvoll*. See *SUCCULENT*.

**SUCCUBA** (Lat.), n. f.  $Su^3k(su^4k)/ku^2b(ku^4b)-a^2$ . From *succubare*, to lie under. Fr., *succube*. See under *INCUBUS* (1st def.).

**SUCCUBOUS**, adj.  $Su^3k/u^2b-u^3s$ . Lat., *succubus*. Ger., *unterschlächtig*. Having the anterior margin of each leaf passing under the posterior margin of the leaf immediately succeeding it on the branch. [a, 35.] Cf. *INCUBOUS*.

**SUCCUBUS** (Lat.), n. m.  $Su^3k(su^4k)/ku^2b(ku^4b)-u^3s(u^4s)$ . Nightmare with the hallucination of the presence of a succuba.

**SUCCULENT**, adj.  $Su^3k/u^3s-i^2nt$ . Lat., *succulentus* (from *succus*, juice). Fr., s. Ger., *saftig*. Juicy, abounding in juice. The *Succulentæ* are: Of Linnæus, an order comprising *Cactus*, *Mesembryanthemum*, *Sedum*, etc.; of Ventenat, the *Crassulaceæ*.

**SUCCUS** (Lat.), n. m.  $Su^3k(su^4k)/ku^2s(ku^4s)$ . From *sugere*, to suck. Fr., *suc*. Ger., *Saft*. 1. A juice. 2. A pharmacopœial preparation made by squeezing out the juice from green plants and adding enough alcohol to preserve it. [D, 6.] —**Aqua succorum vegetabilium vulneraria**. See *Aqua pontificalis*. —**Åter s.** See *ATRABILIS*. —**S. antiscorbuticus**. Fr., *suc antiscorbutique*. Sp., *zumo antiacorbótico* [Sp. Ph.]. 1. A preparation made by crushing equal parts of the leaves of *Nasturtium officinale*, *Menyanthes trifoliata*, and either *Cochlearia officinalis* or *Lepidium latifolium* and radix armoracia, expressing, adding a little water to the residue, repeating the process, mixing the two liquids, and filtering when settled. [B, 95 (a, 38).] —**S. carnis**. See *MEAT JUICE*. —**S. cyrenaisicus antiquorum**. See *ASA-FETIDA*. —**S. entericus**. See *Intestinal JUICE*. —**S. gastricus**. See *Gastric JUICE*. —**S. hispanicus**. Licorice (extract). [a, 35.] —**S. insipissatus**. An old name for a pharmaceutical preparation made by inspiss-

sating a vegetable juice till it had attained a solid consistence. Preparations of this class are now included under the head of extracts. [B. 5.]—*S. japonicus*. Catechu. [B. 119 (a. 38).]—*S. lacteus*. See *Vegetable MILK*.—*S. nervus*. See *Nervous FLUID*.—*S. osseus*. In ancient surgery, a hypothetical juice of the bone which was supposed to coagulate to form the callus of a uniting fracture. [L. 57 (a. 14).]—*S. pancreaticus*. See *Pancreatic JUICE*.—*S. pyloricus*. An alkaline fluid secreted by the pyloric end of the stomach; said by Klemensiewicz to convert starch into sugar. [K. 10.]—*S. thebaicus*. See *Opium*.

**SUCCUSSIO**, n. *Su<sup>3</sup>k-uk'sh'u<sup>3</sup>n*. Lat., *succussio* (from *succutere*, to shake, to jolt). Fr., *s.* Ger., *S.*, *Rütteln*. A method of physical examination to ascertain the presence of fluid in a cavity, performed by shaking the individual from side to side. [a. 34.]

**SUCHER** (Ger.), n. *Zuch<sup>2</sup>e<sup>r</sup>*. See *PROBE*.

**SUCHNADEL** (Ger.), n. *Zuch<sup>2</sup>na<sup>3</sup>d-e<sup>2</sup>l*. See *Exploring NEEDLE*.

**SUCHRÖHRCHEN** (Ger.), n. *Zuch<sup>2</sup>ru<sup>3</sup>r-ch<sup>2</sup>e<sup>2</sup>n*. An exploring tube.

**SUCHT** (Ger.), n. *Zuch<sup>2</sup>t*. Disease, especially chronic disease. [A. 321 (a. 48).]—*Ackerbaus<sup>2</sup>*. See *AGROMANIA*.—*Bleichs<sup>2</sup>*. See *CHLOROSIS*.—*Bleichs<sup>2</sup> mit Schwinds<sup>2</sup>*. See *CHLOROPHTHISIS*.—*Fetts<sup>2</sup>*. See *ADIPOSIS*.—*Fress<sup>2</sup>*. See *BULIMIA*.—*Galls<sup>2</sup>*. See *ATRAABILIS*.—*Gähns<sup>2</sup>*. An inclination to yawn frequently. [a. 34.]—*Gelbs<sup>2</sup>*. Jaundice.—*Grillens<sup>2</sup>*. See *HYPOCHONDRIASIS*.—*Kleins<sup>2</sup>*. See *PTYRIASIS*.—*Manns<sup>2</sup>*. See *NYMPHOMANIA*.—*Misels<sup>2</sup>*. Leprosy. [a. 34.]—*Reises<sup>2</sup>*. See *ECDEMIOMANIA*.—*Ripps<sup>2</sup>*. See *HYPOCHONDRIASIS*.—*Rückens<sup>2</sup>*. See *RHACHITIS*.—*Schwarzs<sup>2</sup>*. See *MELANISM*.—*Schweiss<sup>2</sup>*. See *MILIARIA* (1st def.).—*Staars<sup>2</sup>*. See *CATALEPSY*.—*Stehls<sup>2</sup>*. See *CLEPTOMANIA*.—*Steifs<sup>2</sup>*. See *CATALEPSY*.—*Sticks<sup>2</sup>*. See *ATELECTASIS pulmonum*.—*Stiers<sup>2</sup>*. Cattle plague. [L. 80.]—*Tanzs<sup>2</sup>*. See *Epidemic CHOREA*.—*Tobs<sup>2</sup>*. See *HYPERPHRENIA* and *MANIA*.—*Wachschlafs<sup>2</sup>*. See *COMA-vigil*.—*Wassers<sup>2</sup>*. See the major list.—*Zweifels<sup>2</sup>*. See *FOLIE du doute*.

**SÜCHTIG** (Ger.), adj. *Zu<sup>3</sup>ch<sup>2</sup>t'ig*. 1. Diseased or causing disease; in this sense only used in compound words. 2. Inclined to ulceration. [L. 30 (a. 14).]

**SUCKER**, n. *Su<sup>3</sup>uk'u<sup>3</sup>r*. Fr., *sucoir* (1st def.). Ger., *Sauger* (1st def.). 1. See *HAUSTORIUM*. 2. In botany, an ascending branch from an underground stem. [a. 35.]

**SUCON** (Fr.), n. *Su<sup>3</sup>-so<sup>3</sup>n<sup>2</sup>*. See *SUGGILLATION*.

**SUCRATE**, n. *Su<sup>3</sup>k'rat*. Sometimes improperly called *saccharate*. A compound of saccharose (sucrose) with a base. [B. 9.]

**SUCRE** (Fr.), n. *Su<sup>3</sup>kr<sup>2</sup>*. See *SUGAR* and *SACCHARUM*.—*Eau-de-vie de s.* See *ROM*.—*Poudre de s.* [Fr. Cod.] Very white sugar crushed in a marble mortar, dried, powdered, and sifted through a No. 140 silk sieve. [B. 95 (a. 38).]—*Poudre de s. de lait* [Fr. Cod.] Sugar of milk coarsely powdered in a marble mortar, dried in the oven, powdered more finely, and sifted through a No. 140 silk sieve. [B. 113 (a. 38).]—*Sirap de s. (a froid)*. See *SYRUPUS*.—*S. à la vanille* [Fr. Cod.] See *Poudre de VANILLE sucrée*.—*S. anthelmintique*. See *HYDRARGYRUM saccharatum*.—*S. brut*. See *Brown SUGAR*.—*S. de diabète*. See *Diabetic SUGAR*.—*S. de fruits*. See *Grape SUGAR*.—*S. de gland*. See *QUECITE*.—*S. de goudron*. *S. de houille*. See *SACCHARIN*.—*S. de lait*. See *Milk SUGAR*.—*S. de raisins*. See *Grape SUGAR*.—*S. de réglisse*. See *GLYCYRRHIZIN*.—*S. des boutiques*. The *Saccharum officinarum*. [a. 35.]—*S. des urines*. See *GLUCOSE*.—*S. en pains*. See *Cane SUGAR*.—*S. ferrugineux*. A compound of 20 parts of sugar and 1 part of gelatinous ferric hydrate. [B. 93 (a. 14).]—*S. mercuriel*. See *HYDRARGYRUM saccharatum*.—*S. mercuriel composé*. See *SACCHARUM mercuriale compositum*.—*S. noir*. See *Extractum GLYCYRRHIZÆ*.—*S. urinaire*. See *GLUCOSE*.—*S. vermifuge*. See *HYDRARGYRUM saccharatum*.—*S. violet*. See *SACCHARUM violaceum*.

**SUCRÉ** (Fr.), adj. *Su<sup>3</sup>-kra*. Sweetened with sugar.

**SUCROCARBONATE**, n. *Su<sup>3</sup>k-ro-ka<sup>2</sup>rb'o<sup>3</sup>n-at*. A combination of a carbonate with sucrose. [B.]

**SUCROSE**, n. *Su<sup>3</sup>k'ros*. Ger., *S.* See *SACCHAROSE*.

**SUCTION**, n. *Su<sup>3</sup>k'shu<sup>3</sup>n*. Lat., *suctio* (from *sugere*, to suck). Fr., *s.* Ger., *Saugen*. The process of sucking. [a. 48.]—*S. of cataract*. Lat., *suctio lentis*. See *Teale's operation by s.* under *CATARACT EXTRACTION*.

**SUCTORIAL**, adj. *Su<sup>3</sup>kt-or'ial*. From *sugere*, to suck. Adapted for sucking. [a. 27.]

**SUCTUS** (Lat.), n. m. *Su<sup>3</sup>kt(sukt)'us* (n's) (u's). Gen., *suct'us*. See *SUCTIO*.—*S. voluptabilis*. Ger., *Wonnesaugen*. Pleasurable sucking; of Vogel, the addition of children to sucking their fingers, toes, arms, etc. Such children in middle and southern Germany are called *Daumenlutscher* or *Ludler*. [D. 29.]

**SUDAMEN** (Lat.), n. n. *Su<sup>3</sup>d(sud)-a(a)'me<sup>3</sup>n*. Gen., *-am'inis*. From *sudare*, to perspire. Commonly used in the plural, *sudamina* (q. v.).

**SUDAMINA** (Lat.), n. n. pl. of *sudamen*. *Su<sup>3</sup>d(sud)-a(a)'m(a'my'-i)n-a*. Vesicles produced by sweat retained beneath the cuticle in consequence of occlusion of the orifices of the sweat ducts. [G.] See *MILIARIA crystallina*.—*S. alba*. See *MILIARIA alba*.—*S. balneum*. The s. of bathers. [G.] See *MILIARIA rubra*.—*S. crystallina*. See *MILIARIA crystallina*.—*S. maligna*. See *MILIARIA* (1st def.).—*S. rubra*. See *MILIARIA rubra*.

**SUDARIUM** (Lat.), n. n. *Su<sup>3</sup>d(sud)-a(a)'r'um* (u'm) (u'm). See *SUDATORIUM*.

**SUDATIO** (Lat.), n. f. *Su<sup>3</sup>d(sud)-a(a)'sh'it'io* (ti'o). Gen., *-on'is*. See *SUDATION*.—*S. morbosus*. See *HYPERHIDROSIS*.

**SUDATION**, n. *Su<sup>3</sup>d-a'shu<sup>3</sup>n*. Lat., *sudatio* (from *sudare*, to perspire). Cf. *HDROSIS* and *EPIDROSIS*.

**SUDATORIUS** (Lat.), adj. *Su<sup>3</sup>d(sud)-a(a)'t(a't)-or'is* (u's) (u's). From *sudare*, to perspire. Fr., *sudatoire*. Sudatory, pertaining to perspiration; as a n., in the f., *sudatoria*, see *EPIDROSIS*; as a n., in the n., *sudatorium*, a hot-air bath, a sweating-room.

**SUDOLORRHEA** (Lat.), n. f. *Su<sup>3</sup>d(sud)-o<sup>3</sup>l-o<sup>3</sup>r-re'* (ro'2'e<sup>2</sup>)-a<sup>3</sup>. From *sudare*, to perspire, *oleum*, oil, and *rho<sup>3</sup>a*, a flow. Of Piffard, eczema seborrhoicum. [G.]

**SUDOR** (Lat.), n. m. *Su<sup>3</sup>d(sud)'o<sup>3</sup>r*. Gen., *-or'is*. Fr., *sueur*. Ger., *Schweiss*. Sweat.—*S. anglicus*. 1. The sweating sickle. 2. See *MILIARIA* (1st def.).—*S. arenosus*. See *URIDROSIS crystallina*.—*S. cruentus*. See *HÆMATIDROSIS*.—*S. cruentus e catamenii suppressis*. See *MENIDROSIS*.—*S. febrilis criticus*. See *EPIDROSIS febrilis*.—*S. lacteus*. See *GALACTIDROSIS*.—*S. miliaris*. See *MILIARIA* (1st def.).—*S. nocturnus*. See *NIGHT-SWEAT*.—*S. sabulosus*. See *URIDROSIS crystallina*.—*S. sanguineus*. See *HÆMATIDROSIS*.—*S. urinosus*. See *URIDROSIS*.—*Sudoris nullitas* (see *privatio*). See *ANDROSIS*.

**SUDORALIS** (Lat.), adj. *Su<sup>3</sup>d(sud)-e<sup>3</sup>r(or)-al(a)'l* (i's). From *sudor*, sweat. Fr., *sudoral*. Pertaining to perspiration.

**SUDORIC ACID**, n. *Su<sup>3</sup>d-o<sup>3</sup>r'ik*. Fr., *acide sudorique*. See *HDROTIC acid*.

**SUDORIFEROUS**, adj. *Su<sup>3</sup>d-o<sup>3</sup>r-i<sup>2</sup>f'e<sup>2</sup>r-u<sup>3</sup>s*. From *sudor*, sweat, and *ferre*, to bear. Fr., *sudorifique*. Conveying perspiration. [G.] Cf. *SUDORIPAROUS*.

**SUDORIFIC**, adj. *Su<sup>3</sup>d-o<sup>3</sup>r-i<sup>2</sup>f'ik*. From *sudor*, sweat, and *facere*, to make. Fr., *sudorifique*. Ger., *schweisstreibend*. Producing perspiration. [a. 48.]

**SUDORIPAROUS**, adj. *Su<sup>3</sup>d-o<sup>3</sup>r-i<sup>2</sup>p'a<sup>3</sup>r-u<sup>3</sup>s*. Lat., *sudoriparus* (from *sudor*, sweat, and *parere*, to produce). Fr., *sudoripare*. Ger., *schweisserzeugend*. Producing or secreting sweat.

**SUET**, n. *Su<sup>3</sup>e<sup>2</sup>t*. Gr., *στέαρ*. Lat., *sebum*, *sebum*. Fr., *suif*. Ger., *Talg*. The hard fat obtained from the inside of the abdomen of any ruminant. [a. 17.] Cf. *SEBUM* and *SEVUM*.—*Beef s.* See *SEBUM bovinum*.—*Mutton s.* See *SEBUM* (1st def.).—*Prepared s.* Lat., *sebum preparatum*. Fr., *suif préparé*. Ger., *gereinigter Talg*. S. purified for pharmaceutical purposes. [B.]

**SUETTE** (Fr.), n. *Su<sup>3</sup>e<sup>2</sup>t*. See *SWEATING FEVER* (1st def.) and *MILIARIA* (1st def.).—*S. anglaise*. See *SUDOR anglicus*.—*S. de Picardie*, *S. miliaire (moderne)*, *S. militaire*, *S. millet*. See *MILIARIA* (1st def.).

**SUEUR** (Fr.), n. *Su<sup>3</sup>-u<sup>3</sup>r*. Sweat.—*S. d'Angleterre*. See *SUDOR anglicus*.—*S. de sang*. See *HÆMATIDROSIS*.—*S. rentrée*. Suppressed perspiration.—*S. urineuse*. See *URIDROSIS*.

**SUFFERSURE** (Lat.), n. f. pl. *Su<sup>3</sup>f(su<sup>3</sup>f)-fu<sup>3</sup>r'fe<sup>3</sup>r-su<sup>3</sup>r* (sur'e(a<sup>3</sup>-e<sup>2</sup>)). From *suffervere*, to boil gently. The exanthemata.

**SUFFUMENTUM** (Lat.), n. n. *Su<sup>3</sup>f(su<sup>3</sup>f)-f'i<sup>2</sup>(fe)-me<sup>3</sup>nt'u<sup>3</sup>m* (u'm). From *suffire*, to fumigate. See *FUMIGATION* (2d def.).

**SUFFITUS** (Lat.), n. m. *Su<sup>3</sup>f(su<sup>3</sup>f)-fit(fet)'u<sup>3</sup>s* (u's). Gen., *-fit'us*. From *suffire*, to fumigate. See *FUMIGATION* (2d def.).—*S. oxymuriaticus*. See *FUMIGATION CHLORI*.

**SUFFOCATIO** (Lat.), n. f. *Su<sup>3</sup>f(su<sup>3</sup>f)-fo<sup>3</sup>k(fok)-a(a)'shi<sup>2</sup>(ti'o)*. Gen., *-on'is*. See *ASPHYXIA* (2d def.).—*S. hysterica*. See *GLOBUS hystericus*.—*S. matricis*. An old term for hysteria. [A. 42; B. 117.]—*S. stridula*. See *CROUP*.

**SUFFOCATION**, n. *Su<sup>3</sup>f-fo<sup>3</sup>k-a'shu<sup>3</sup>n*. Lat., *suffocatio* (from *suffocare*, to choke). Fr., *s.* Ger., *Erstickung*. See *ASPHYXIA* (2d def.).—*Stridulous laryngic*. See *LARYNGISMUS stridulus*.—*S. of the womb*. See *SUFFOCATIO*.

**SUFFRAGO** (Lat.), n. f. *Su<sup>3</sup>f(su<sup>3</sup>f)-frag(fra'g'o)*. Gen., *-frag'itis*. 1. See *HOCK* (3d def.). 2. The tibiotarsal joint of a bird. [L. 341 (a. 27).]

**SUFFRUTESCENT**, adj. *Su<sup>3</sup>f-fru<sup>3</sup>t-e<sup>2</sup>s'e<sup>2</sup>nt*. Lat., *suffrutescens*. Fr., *s.* Ger., *halbstrauchig*. Somewhat shrubby, less woody than an undershrub. [a. 35.]

**SUFFRUTEX** (Lat.), n. m. *Su<sup>3</sup>f(su<sup>3</sup>f)-fru<sup>3</sup>t(fru'it)-e<sup>2</sup>x*. Gen., *-frut'icis*. From *sub*, under, and *frutex*, a shrub. See *UNDERSHRUB*.

**SUFFRUTICOSE**, adj. *Su<sup>3</sup>f-fru<sup>3</sup>t'it'kos*. Lat., *suffruticosus*. Ger., *halbstrauchig*, *standig*. Low in stature and shrubby at the base; having the habit of an undershrub. [a. 35.]

**SUFFULCIENS** (Lat.), **SUFFULTORIUS** (Lat.), **SUFFULTUS** (Lat.), adj's. *Su<sup>3</sup>f(su<sup>3</sup>f)-fu<sup>3</sup>l(fu'li)'si<sup>2</sup>(ki'o<sup>2</sup>)-i<sup>2</sup>zans* (i's), *-fu<sup>3</sup>l(fu'li)-or'is* (i's), *-fu<sup>3</sup>l(fu'li)'t'us* (u's). Gen., *-ult'is*, *-tor'is*, *-fult'is*. Fr., *appuyé*. Ger., *stützend*, *unterstützend*. Serving as a support for another part or organ. [a. 35.] Cf. *FULCRATE*.

**SUFFUMIGATIO** (Lat.), n. f. *Su<sup>3</sup>f(su<sup>3</sup>f)-fu<sup>3</sup>m(fum)-i<sup>2</sup>g-a(a)'sh'it'io* (ti'o). Gen., *-on'is*. See *FUMIGATION* (2d def.).—*S. guytoniana*. See *FUMIGATION CHLORI*.—*S. sulfurosa*. See *FUMIGATION à l'ACIDE SULFUREUX*.

**SUFFUSIO** (Lat.), n. f. *Su<sup>3</sup>f(su<sup>3</sup>f)-fu<sup>3</sup>(fu)'zhi<sup>2</sup>(si'o)*. Gen., *-on'is*. From *suffundere*, to pour over. Gr., *ὑψυχσις*. 1. See *SUFFUSION*. 2. An old term for cataract. [Lahoulbene, "Union méd." Mar. 19, 1885, p. 469.]—*Fellis s.*, *S. auriginosa*, *S. bilis*. See *JAUNDICE*.—*S. colorans*. See *CHROMATOPSIA*.—*S. dimidians*. See *HEMIOPIA*.—*S. exclamans*. See *OXYOPSIA*.—*S. fellis*. Jaundice.—*S. lentis* (crystallina). See *CATARACT*.—*S. multiplians*. See *DIPLOPIA* and *AMBLYOPSIA*.—*S. myodes*. See *METAMORPHOSIA*.—*S. nigra*. See *AMBLYOPSIA*.—*S. oculorum*. An old term for an opacity in the eye, especially in the crystalline lens. [F.]—*S. sanguinis*. See *ECHYMOSIS*.

**SUFFUSION**, n. *Su<sup>3</sup>f-fu<sup>3</sup>zhu<sup>3</sup>n*. Lat., *suffusio*. Fr., *s.* Ger., *Ergiessung*. 1. The act or process of overspreading or the state of being overspread (e. g., by a film or by moisture); also, that which overspreads. [a. 48.] 2. See *SEGREGATION* (1st def.).

**SUGAR**, n. Shu<sup>4</sup>-g'r. Gr., *σάκχαρον*. Lat., *saccharum*. Fr., *sucre*. Ger., *Zucker*. It., *zucchero*. Sp., *azúcar*. A name at first applied only to cane s. and beet s.; subsequently to any sweet crystalline substance, and more definitely to a class of chemical compounds of the general composition  $C_nH_{2n}O_n$  (see SACCHAROSE and GLUCOSE). [B.]—**Acid s. of milk**. Mucic acid. [B.]—**Acorn s.** See QUERCITE.—**Arabin s.** See ARABINOSE.—**Barley s.** See under SACCHAROSE.—**Beet s.** Fr., *sucre de betterave*. Ger., *Rübenzucker*. Saccharose obtained from species of *Beta*, especially from *Beta vulgaris*. [B.]—**Brown s.** Cane s. not entirely freed from impurities and coloring matters; obtained in the first stages of the process of manufacture of s. from s.-cane juice. [B.]—**Burnt s.** Caramel. [B.]—**Cane s.** Lat., *saccharum (purificatum)*. Fr., *sucre de canne*. Ger., *Rohrzucker*. Sp., *azúcar de caña*. S. obtained from the juice of *Saccharum officinarum*. [B.]—**Cellulose s.** S. derived from cellulose; identical with glucose. [Fleischig, "Ztschr. f. phys. Chem.," xii, p. 525 (B).]—**Chestnut s., Diabetic s.** Glucose. [B., 2.]—**Ferment s.** S. formed from starch, glycogen, and other carbohydrates by the action of the animal ferments. It was at one time held to be identical with glucose, but is now considered by some to be a different body, probably maltose. [B., 12; Kratschmer and Seegen, "Wien. med. Wchnsch.," Feb. 19, 26, Mar. 5, Apr. 2, 9, 1881 (B).] Cf. INVERTIN.—**Fruit s.** See LEVULOSE.—**Granular s.** Glucose. [B., 2.]—**Grape s.** Fr., *sucre de raisin*. Ger., *Trauben Zucker*. Glucose, especially when obtained in the solid form. [B.]—**Gum s.** See ARABINOSE.—**Honey s.** Glucose. [B., 2.]—**Invert s.** Fr., *sucre inverté*. Ger., *Invertzucker*. A product of the prolonged action of heat upon a solution of cane s. It is a mixture of dextrose and levulose, and receives its name because its solution rotates the plane of polarization to the left, while the solution of cane s. from which it is produced rotates that plane to the right. [B.]—**Jaggery s.** See JAGGERY.—**Liver s.** Glucose; so called because it is the form of s. elaborated in the liver from glycogen. [B.]—**Manna s.** Ger., *Mannazucker*. See MANNITE.—**Maple s.** Fr., *sucre d'érable*. Ger., *Ahornzucker*. S. obtained from *Acer saccharinum*. It is identical with saccharose, but contains a certain amount of coloring matter. [B., 5.]—**Milk s.** Lat., *saccharum lactis*, *lactis saccharum*. Fr., *sucre de lait*. Ger., *Milchzucker*. See LACTOSE.—**Muscle s.** See INOSITE.—**Nest s.** See under *Larinus nidificans*.—**Oil s.** See ELAEOSACCHARUM.—**Open-pan s.** S. prepared by concentration of the cane-juice in vessels under the ordinary atmospheric pressure. [B., 5.]—**Palm s.** See JAGGERY.—**Pectin s.** See ARABINOSE.—**Rag s.** Glucose. [B., 2.]—**Refined s.** Fr., *sucre raffiné*. Ger., *Hutzucker*, *Raffinade*. White s.; cane s. purified and deprived of coloring matter. [B.]—**Starch s.** See GLUCOSE.—**S. candy.** Ger., *Candizucker*. See ROCK CANDY.—**S. of lead.** See LEAD ACETATE.—**S. of milk.** See LACTOSE.—**S. of urine.** Glucose. [B., 2.]—**S. pods.** Carob beans. [B.]—**Uncrystallizable s.** See LEVULOSE.—**Vacuum-pan s.** S. prepared by concentration of the cane-juice under a pressure much less than that of the atmosphere; effected by the employment of closed vessels in which a partial vacuum can be produced by exhaustion of the air. [B., 5.]—**White s.** See Refined s.

**SUGAR-CANE**, n. Shu<sup>4</sup>-g'r-kan. The *Saccharum officinarum* and other species of *Saccharum*. [a, 35.]—**Chinese s.-c.** The *Sorghum vulgare*. [a, 35.]—**Common s.-c.** The *Saccharum officinarum*.

**SUGGESTIBLE** (Fr.), adj. Su<sup>6</sup>-g-zhe<sup>2</sup>s-te-bl'. Of hypnotized persons, subject to the power of suggestion. ["N. Y. Med. Jour.," June 11, 1887, p. 659 (a, 50).]

**SUGGESTION**, n. Su<sup>2</sup>-g-je<sup>2</sup>st'yu'n. Lat., *suggestio* (from *suggerere*, to excite). Fr., s. Ger., *s. Eingebung*. 1. The act of suggesting. 2. The thing suggested. 3. See *Hypnotic s.*—**Hypnotic s.** Fr., s. *hypnotique*. The process by which a hypnotized person is made to accept a hint or statement, although it may be unfounded, and to act accordingly.

**SUGILLATION**, n. Su<sup>2</sup>-g-jil<sup>2</sup>-a'shu'n. More correctly, *sigillation*. Lat., *sigillatio* (from *sigillare*, to beat black and blue). Fr., s. *suçon*. Ger., *s. Blutunterlaufung*. A black-and-blue mark, as of a bruise. [G, 49.] See VIBEX and LIVOR EMORTUALIS.

**SUGGRUNDIUM** (Lat.), n. Su<sup>2</sup>-g(su<sup>4</sup>)-gru<sup>2</sup>nd(gru<sup>4</sup>nd)'i<sup>2</sup>. u<sup>3</sup>m(u<sup>4</sup>m). Fr., s. The lower border of a roof, the eaves. [A, 312.]—**S. oculi.** See SUPERCILIARY RIDGE.

**SUGILLATION**, n. Su<sup>2</sup>-g-jil<sup>2</sup>-a'shu'n. A preferable form of *sigillation* (q. v.).

**SUICIDAL**, adj. Su<sup>2</sup>-i<sup>2</sup>-si'd'l. Ger., *selbstmörderisch*. Characterized by a tendency to suicide. [D, 1.]

**SUICIDE**, n. Su<sup>2</sup>-i<sup>2</sup>-sid. From *sui*, of himself, and *cadere*, to kill. Gr., *αὐτοκτείνω* (1st def.), *αὐτοκτενία* (2d def.). Fr., s. Ger., *Selbstmörder* (1st def.), *Selbstmord* (2d def.). 1. One who takes his own life. 2. The act of self-murder. [D, 1.]

**SUIE** (Fr.), n. Swe. See SOOT.—**Collyre de s.** A solution of 40 centigrammes of extract of soot and 4 drops of lemon-juice in 125 grammes of infusion of red roses; used for ophthalmia neonatorum. [B, 38, 92 (a, 14).]—**Crystal de s.** See *Fuligo splendens*.—**Eau de s., Essence de s.** See *Tinctura FULIGINIS alcalina*.—**Extrait de s.** See *Extractum FULIGINIS*.—**Infusion de s.** See *Tinctura FULIGINIS alcalina*.

**SUIF** (Fr.), n. Swef. See SUET.—**Savon de s.** Tallow soap. [B.]—**S. de boeuf.** Beef suet. [B.]—**S. de mouton.** See SEVUM (1st def.).—**S. de veau.** Veal suet. [B.]

**SUILLA** (Lat.), n. f. Su<sup>2</sup>(su<sup>4</sup>)-i<sup>2</sup>l'a<sup>3</sup>. From *sus*, a hog. See SCROFULA.

**SUILLUS** (Lat.), adj. Su<sup>2</sup>(su<sup>4</sup>)-i<sup>2</sup>l'lu's(lu's). From *sus*, a hog. Obtained from the hog (see ADEPS s.); as a n. m., see BOLETUS.

**SUINT** (Fr.), n. Swa<sup>2</sup>n<sup>2</sup>. The sweat of sheep. It contains about one third of its weight of alkaline potassium salts, and is a source of the potash of commerce (which is obtained from the s. by wash-

ing the sheep), also of a fatty matter (see LANOLIN). [B.] Cf. ESYPUM.

**SUINTEMENT** (Fr.), n. Swa<sup>2</sup>n<sup>2</sup>-t'-ma<sup>3</sup>n<sup>2</sup>. See ÉCOULEMENT.—**S. par le mamelon.** See GALACTORRHEA.

**SUITES DE COUCHES** (Fr.), n. pl. Swet d'kush. See Puerperal PERIOD.

**SULCATE**, adj. Su<sup>2</sup>lk'at. Lat., *sulcatus* (from *sulcare*, to furrow). Fr., *sillonné*. Ger., *gefurcht*. Grooved, furrowed. [a, 25.]

**SULCATURE** (Fr.), n. Su<sup>2</sup>lk'-ka<sup>3</sup>-tu'r. A mark or furrow produced by pressure or erosion. [A, 385 (a, 48).]

**SULCULUS** (Lat.), n. m. Su<sup>2</sup>lk(su<sup>4</sup>lk')u<sup>2</sup>l(u<sup>4</sup>l)-u<sup>3</sup>s(u<sup>4</sup>s). Dim. of *sulcus*, a furrow. Fr., *sulcule*. A small furrow or sulcus. [L, 50 (a, 14).]—**S. labii superioris.** See *SULCUS nasolabialis*.

**SULCUS** (Lat.), n. m. Su<sup>2</sup>lk(su<sup>4</sup>lk')u<sup>2</sup>s(u<sup>4</sup>s). Gr., *ὄλκος* (from *ὄλκω*, to draw). Fr., *sillon*. Ger., *Furche*, *Rinne*. A groove or furrow; a fissure, especially of the cerebrum. [C.]—**Anterior occipital s.** A s. separating the central fissure from the first occipital gyrus, connecting with the parietal fissure. [a, 34.]—**Anterior s. of Reil.** See *Pre-insular s.*—**Antero-temporal s.** See *Parallel fissure*.—**Ascending frontal s.** See *Precentral fissure*.—**Central s.** See *Central fissure*.—**Cerebral sulci.** See *Secondary fissures* (2d def.) and *Fissure of the cerebrum*.—**Ciliary sulci.** See *Striae ciliares*.—**Crucial s.** See *Cruciate fissure*.—**External perpendicular s.** See *Occipital fissure* (2d def.).—**External s. of Reil.** A fissure separating the insula from the precentral, postcentral, and subfrontal gyri. [J; L.]—**Fronto-marginal s.** Of Wernicke, a small longitudinal fissure on the ventral surface of the frontal lobe, which separates the orbital and frontal lobes. [I, 17 (K).]—**Inferior frontal s.** Lat., *s. frontalis inferior*. Fr., *scissure frontale inférieure*. Ger., *untere Stirnfurche*. See *Subfrontal fissure*.—**Inferior occipital s.** See *Inferior occipital fissure*.—**Inferior temporo-sphenoidal s.** See *Meditemporal fissure*.—**Infero-frontal s.** See *Subfrontal fissure*.—**Infra-insular s.** A fissure separating the insula from the temporo-sphenoidal lobe. [L, 14.]—**Infra-orbital s.** See *Sub-orbital fissure*.—**Intermediate temporal s.** See *Meditemporal fissure*.—**Intraparietal s.** See *Parietal fissure*.—**Lateral olivary s.** See *S. olivæ externus*.—**Middle temporo-sphenoidal s.** An unimportant fissure parallel to and below the parallel fissure. [L, 14.]—**Occipito-parietal s.** See *Occipital fissure* (2d def.).—**Occipito-temporal s.** See *Collateral fissure*.—**Oculomotor s.** See *Oculomotor furrow*.—**Olfactory s.** See *Olfactory fissure*.—**Orbital s.** See *Orbital fissure*.—**Paramedian s.** See *Sillon médian postérieur intermédiaire*.—**Parietal s.** See *Parietal fissure*.—**Peduncular s.** Fr., *sillon circonferentiel (ou circulaire)*. A transverse s. which commences close to the middle peduncle of the cerebellum around the outer border of which it passes backward. [L, 31, 142.]—**Postcentral s.** See *Postcentral fissure*.—**Posterior s. of Reil.** See *Infra-insular s.*—**Postero-parietal s.** See *Central fissure*.—**Postero-temporal s.** See *Collateral fissure*.—**Postfrontal s.** See *Cruciate fissure*.—**Precentral s.** See *Precentral fissure*.—**Pre-insular s.** A fissure in front of the insula and separating it from the posterior orbital convolution. [L, 142.]—**Primitive sulci.** See *Primitive fissures* (2d def.).—**Secondary sulci.** See *Secondary fissures*.—**Straight s.** See *Olfactory fissure*.—**Subparietal s.** A shallow depression or inconstant fissure which is a continuation upward and outward of the callosal-marginal fissure. [a, 34.]—**S. ad aqueductum vestibuli.** See *Fossula sulciformis*.—**S. alaris.** The furrow just above the ala nasi. [a, 34.]—**S. alveolaris anterior.** See *Anterior dental canal*.—**S. alveolaris posterior.** The s. between the gums and the inside of the cheek. [a, 34.]—**S. alveolo-lingualis.** The s. between the gums and the mucous membrane of the tongue. [a, 34.]—**S. anterior corporum candicantium.** A furrow between the corpora albicantia and the tuber cinereum. [L, 7.]—**S. antero-temporalis** [Huxley]. See *Supertemporal fissure*.—**S. anabrachii radialis.** A s. on the radial side of the forearm, between the pronator and flexor muscles and the supinator longus. [a, 34.]—**S. anabrachii ulnaris.** A s. on the ulnar side of the forearm, between the flexor sublimis digitorum and the flexor carpi ulnaris. [a, 34.]—**S. articus.** A depression on the median surface of the left lung for the descending aorta. [L, 332.]—**S. arcuatus.** Of Arnold, an embryonic fissure to which the s. corporis callosi corresponds. [a, 34.]—**S. arcuatus præcuneus.** An inconstant fissure on the mesal surface of the cerebral hemisphere, between the parietal gyrus and the gyrus fornicatus. [L, 332.]—**S. arterie occipitalis.** A groove on the inner side of the internal aspect of the mastoid process of the temporal bone, which lodges the occipital artery. [L, 332.]—**S. arterie subclaviæ.** See *S. subclaviæ* (1st and 2d defs.).—**Sulci arteriosi.** Ger., *Arterienfurchen*. Furrows on the ental surfaces of the cranial bones for lodging arteries. [L, 31.]—**S. articulationis primæ manus.** A transverse furrow in the palm, seen in flexion, over the articulations between the two rows of carpal bones. [L, 332.]—**S. articulationis secundæ manus.** A transverse furrow in the palm of the hand, seen in flexion, extending from the level of the upper margin of the pisiform bone to the upper end of the first carpal bone. [L, 332.]—**S. atrioven-tricularis.** See *Auriculo-ventricular groove*.—**S. auris anterior.** See *Incisura tragus-helicis*.—**S. auris posterior.** See *Incisura aethelica*.—**S. basilaris (pontis).** The antero-posterior groove on the lower median surface of the pons Varolii. [I, 3 (K).]—**S. basilaris ossis occipitalis.** A shallow depression in the occipital bone at the side of the clivus Blumenbachii. [L, 332.]—**S. bicipitalis.** See *Bicipital groove*.—**S. bicipitalis internus.** A furrow between the brachialis internus and the anconeus tertius. [L.]—**S. cæcus.** See *Foramen cæcum posterius*.—**S. calcanei.** A furrow separating the two posterior articular surfaces of the sustentaculum tali. [L, 332.]—**S. calcarinus.** See *Calvarine fissure*.—**S. callosomarginalis.** See *Supercallosal fissure* (1st def.).—**S. callosus.** See *Callosal fissure*.—**S. caroticotympanicus (ossis temporis).** A groove leading into the canalis caroticotympanicus. [L.]

—*S. caroticus*. See *Carotid groove*.—*Sulci carotidei*. Depressions on each side of the larynx. [L. 31.]—*S. centrals*. See *Central fissure*.—*S. centralis insulae* [Gulberg]. The transinsular fissure; a fissure following the same general direction as the central fissure, which divides the insula into two parts. ["*Anthrop.*" 1891, p. 715 (L).]—*S. centralis modiolii*. A shallow groove on the free margin of the lamina spiralis ossea. [L. 31.]—*S. centralis Rolandi*. See *Central fissure*.—*S. cerebelli curvatus*. A fissure separating the biventral lobe of the cerebellum from the amygdala. [L.]—*S. cerebelli dividens anterior*. See *S. cerebelli superior anterior*.—*S. cerebelli dividens posterior*. See *S. cerebelli superior posterior*.—*S. cerebelli horizontalis*. See *Peduncular s.*—*S. cerebelli inferior*. A fissure between the posterior inferior lobe and the slender lobe of the cerebellum. [L. 3 (K).]—*S. cerebelli inferior anterior*. A s. beginning in the s. flocculi and extending across the inferior surface of the cerebellum to the s. longitudinalis inferior. [a. 34.]—*S. cerebelli inferior externus*. A fissure between the biventral lobe and the posterior inferior lobe of the cerebellum. [L. 3 (K).]—*S. cerebelli inferior posterior*. A s. commencing in the s. superior posterior and extending across the inferior surface of the cerebellum to the s. horizontalis magnus. [a. 34.]—*S. cerebelli peduncularis* (seu superior). See *Peduncular s.*—*S. cerebelli superior anterior*. A s. beginning on the middle peduncle of the cerebellum and crossing the vermis to join the s. on the opposite side. [a. 34.]—*S. cerebelli superior posterior*. A s. beginning in the peduncular s., a little in front of the postero-external angle of the cerebellum, and crossing the upper surface, where it almost reaches the s. horizontalis as the latter passes on to the vermis. [a. 34.]—*S. cerebelli magnus*. See *Great longitudinal fissure of the brain*.—*S. cerebri*. See *Fissure of the cerebrum*.—*S. cerebri cruciformis*. See *Orbital fissure*.—*S. chiasmatis*. See *Optic groove*.—*S. chorioideus*. A longitudinal fissure on the upper surface of the optic thalamus. [L. 17 (K).]—*Sulci ciliares*. See *Striae ciliares*.—*S. cinguli*. A s. separating the gyrus cinguli and the corpus callosum. [L. 332.]—*S. circularis (cordis)*. See *Auriculo-ventricular groove*.—*S. circularis Reilii*. Fr. *rigole de l'insula*. A s. which separates the insula from the adjacent portions of the brain. [L. 17 (K).]—*S. collateralis*. See *Collateral fissure*.—*S. collateralis anterior medullae spinalis*. See *Antero-lateral groove*.—*S. collateralis cerebri*. See *Collateral fissure*.—*S. collateralis inferior*. See *Fissura cerebelli longitudinalis*.—*S. collateralis posterior*. See *Postero-lateral groove*.—*S. collateralis postremus*. See *S. intermedius posterior*.—*Sulci condyloidei*. See *Fossae condyloideae*.—*S. coronalis (cordis)*. See *Auriculo-ventricular groove*.—*S. coronaris glandis*. See *S. glandis*.—*S. corporis callosi*. See *Callosal fissure*.—*S. corporum quadrigeminorum frontalis*. See *S. corporum quadrigeminorum transversus*.—*S. corporum quadrigeminorum longitudinalis*. A longitudinal fissure separating the two anterior tubercles of the corpora quadrigemina. [L. 7 (a. 50).]—*S. corporum quadrigeminorum posterior*. A transverse fissure found behind the two posterior tubercles of the corpora quadrigemina. [L. 7 (a. 50).]—*S. corporum quadrigeminorum transversus*. A transverse s. crossing the median fissure at right angles and separating the anterior from the posterior tubercles of the corpora quadrigemina. [a. 34.]—*S. costalis inferior*. See *Inferior costal fossa*.—*S. costalis superior*. See *Superior costal fossa*.—*S. cruciatus* (seu cruciformis). See *Cruciate fissure*.—*Sulci cubitales*. Sulci on the anterior surface of the forearm, one on either side of the biceps tendon. [a. 34.]—*S. deltoideopectoralis*. A furrow indicating the demarcation between the deltoideus and pectoralis major muscles. [L.]—*S. dentatus*. See *Hippocampal fissure*.—*S. digitalis*. Ger. *Fingerfurche*. A furrow of the palm of the hand.—*S. digitalis anterior*. Ger. *vordere Fingerfurche*. The furrow in the palm of the hand that runs from the root of the index finger to the ulnar border. [L. 30 (a. 14).]—*S. digitalis posterior*. Ger. *hintere Fingerfurche*. A furrow running from the radial to the ulnar border of the hand, caused by the general flexion of the fingers. [L. 30 (a. 14).]—*S. digitatus*. Fr. *sillon digité*. A furrow on the floor of the descending cornu of the lateral ventricle of the brain, separating the collateral eminence from the hippocampus major. [L. 41 (a. 14).]—*S. ethmoidalis*. A groove on the posterior surface of the nasal bone. [L.]—*S. flexoris hallucis longus*. Ger. *Rinne des Calcaneus*. See *Incisura astragali*.—*S. flocculi*. A s. separating the flocculus and the middle lobe of the cerebellum. [a. 34.]—*S. fornicatus inferior*. The callosal and hippocampal fissures taken as one. [L.]—*S. fornicatus superior*. See *Supercallosal fissure* (1st def.).—*S. foveae rhomboidealis longitudinalis* (seu medius). See *Fissura fossae rhomboidealis longitudinalis medius*.—*S. frontalis*. See *Frontal fissure* and *S. longitudinalis ossis frontis*.—*S. frontalis inferior*. See *Subfrontal fissure*.—*S. frontalis secundus*. See *Medifrontal fissure*.—*S. frontalis superior*. See *Superfrontal fissure*.—*S. frontolateralis*. See *Lateral fissure*.—*S. frontomarginalis*. See *Fronto-marginal s.*.—*S. frontoparietalis internus*. See *Callosal-marginal fissure*.—*S. glandis*. Ger. *Eichelfurche*. The furrow behind the glans penis. [L.]—*S. gracilis cerebelli*. See *S. cerebelli inferior posterior*.—*S. habene* (Wilder). *S. habenule*. A small fissure on the upper surface of the optic thalamus, which extends from the trigonum habenule obliquely forward and inward, terminating at the stria medullaris. [L. 17 (K).]—*S. hamuli pterygoidei*. A groove in the hamular process of the sphenoid bone for the tendon of the tensor palati. [L.]—*S. hepatis intermedius*. See *Transverse fissure of the liver*.—*S. hippocampi*. See *Hippocampal fissure*.—*S. horizontalis aortae*. A furrow marking the boundary of the elevation of the right coronary artery above the surface of the heart. *S. horizontalis cordis*. See *Auriculo-ventricular groove*.—*S. horizontalis magnus*. See *Calcarine fissure*.—*S. horizontalis Reilii*. See *Peduncular s.*—*S. horizontalis tibiae*. A groove on the head of the tibia behind the internal articular surface. [L. 332.]—*S. iliacus*. A s. over which the

psaos tendon emerges from the pelvis. [a. 34.]—*S. inferior lateralis*. See *S. cerebelli inferior externus*.—*S. inferior medialis*. A fissure separating the tonsilla cerebelli and the restiform body. [L. 332.]—*S. infra-insularis*. See *Infra-insular s.*.—*S. infranates*. See *Fold of the buttock*.—*S. infra-orbitalis*. See *Infra-orbital groove*.—*S. infrapalpebralis*. The furrow beneath the lower eyelid. [L. 332.]—*S. inguinalis*. See *Fold of the groin*.—*S. insulae primus*. The principal fissure in the insula. [L. 9 (K).]—*S. interarticularis calcanei*. See *S. calcanei*.—*S. interarticularis calcanei accessorius*. A groove on the os calcis between the two anterior surfaces which articulate with the astragalus. [L. 332.]—*S. interarticularis tali*. See *S. tali*.—*S. interarticularis tali accessorius* (seu anterior). A furrow between the two articular surfaces (when they exist) on the astragalus which articulate with the os calcis. [L. 332.]—*S. interbrachialis*. A continuation of the transverse furrow separating the brachia conjunctiva. [a. 34.]—*S. intercruralis lateralis*. Of Wilder, a small furrow in the brain of the cat, behind and to the side of the posterior perforated space. [L. 60 (K).]—*S. intercruralis mesalis*. Of Wilder, a small mesal fissure in the brain of the cat, just behind the posterior perforated space. [J. 80 (K).]—*S. interhelicem et anthelicem*. See *Scaphoid fossa* (1st def.).—*S. interinsularis*. See *Transinsular fissure*.—*S. intermedius*. 1. Of Jensen, a fissure between the upper end of the Sylvian fissure and the posterior extremity of the superfrontal fissure. 2. Of His, a transverse depression on the ventral side of the primitive thalamencephalon (its thalamic segment). [L. 17, 87 (K).] 3. See *Transverse fissure of the liver*.—*S. intermedius anterior*. See *Anterior median fissure of the spinal cord*.—*S. intermedius posterior* (seu posticus). The posterior longitudinal fissure of the spinal cord. [L. 6 (K).]—*S. internus olivae*. See *S. olivae internus*.—*S. interpapillaris*. A furrow between the rows of papillae of the skin. [L.]—*S. interparietalis*. See *Parietal fissure*.—*S. intertubercularis (humeri)*. See *Bicipital groove*.—*S. intraparietalis*. See *Parietal fissure*.—*S. Jacobsonii*. A small groove on the promontory of the middle ear that lodges branches of the tympanic plexus (Jacobson's nerve). [a. 34.]—*S. jugularis*. A groove for the lateral sinus on the upper surface of the jugular process of the occipital bone. [L. 332.]—*S. lacrimalis*. 1. See *Lacrymal groove*. 2. A depression in the lacrymal bone aiding in the formation of the lacrymal groove; also a similar depression in the nasal process of the superior maxilla. 3. A groove on the superior maxilla continuous with the nasal end of the nasal duct. [L. 332.]—*S. laminae modiolii*. See *S. centralis modiolii*.—*S. lateralis anterior*. See *Antero-lateral fissure*.—*S. lateralis circularis* (seu communis). See *Peduncular s.*—*S. lateralis dorsalis*. See *Postero-lateral groove*.—*S. lateralis magnus*. See *Peduncular s.*—*S. lateralis medullae spinalis*. See *Antero-lateral groove*.—*S. lateralis mesencephali*. A small lateral groove on the upper surface of the crus cerebri. [L. 17 (K).]—*S. lateralis posterior*. See *Postero-lateral groove*.—*S. lateralis ventralis*. See *Antero-lateral groove*.—*S. ligamenti spiralis*. A furrow between the lamina spiralis and the ligamentum spirale. [L. 31.]—*S. limitans*. Of Wilder, the fissure between the corpus striatum and the optic thalamus. [L. 80 (K).]—*S. lobi olfactorii*. See *Olfactory fissure*.—*Sulci longitudinales cordis*. See *Longitudinal grooves of the heart*.—*S. longitudinalis*. 1. See *Olfactory fissure*. 2. One of the longitudinal grooves of the heart. [L.]—*S. longitudinalis corporum candicantium*. A fissure separating the two corpora albicantia. [L. 7.]—*S. longitudinalis externus*. The external of the two anterior limbs of the orbital fissure. [L. 17 (K).]—*S. longitudinalis fossae rhomboideae*. See *Fissura fossae rhomboidealis longitudinalis medius*.—*S. longitudinalis medianus ventriculi quarti*. A longitudinal s. running along the centre of the floor of the fourth ventricle. [a. 34.]—*S. longitudinalis medius*. The inner of the two anterior limbs of the orbital fissure. [L. 17 (K).]—*S. longitudinalis mesencephali*. A s. between the brachium corporum quadrigeminorum, the velum medullare anterius, and the pedunculus cerebri. [a. 34.]—*S. longitudinalis ossis frontis*. A furrow on the inner surface of the frontal bone for the superior longitudinal sinus. [L.]—*S. longitudinalis ossis occipitis*. A furrow on the inner surface of the tabular portion of the occipital bone for the reception of the superior longitudinal sinus. [L. 332.]—*S. longitudinalis ossis parietalis*. A furrow on the upper margin of the parietal bone which, with a similar one on the opposite bone, lodges the superior longitudinal sinus. [L. 31.]—*S. longitudinalis posterior*. See *Posterior median fissure of the spinal cord*.—*S. longitudinalis substantiae perforatae mediae*. See *S. basilaris*.—*S. longitudinalis superior*. See *Intercerebral fissure*.—*S. longitudinalis superior cerebelli*. A s. separating the superior vermis from the lateral lobes of the cerebellum. [a. 34.]—*S. longitudinalis ventriculi cerebelli*. Of Gordon, see *Fissura fossae rhomboidealis longitudinalis medius*.—*S. magnus*. See *Calcarine fissure*.—*S. magnus (cerebelli) horizontalis*. See *Peduncular s.*—*S. malleolaris*. A furrow in the anterior and upper part of the tympanic ring the terminal points of the boundary of which are the spine tympanica, and which finally becomes the posterior boundary of the petrotympanic fissure. [F.]—*S. malleoli (externi) lateralis*. A shallow furrow behind the external malleolus. [L.]—*S. malleoli interni* (seu medialis). A shallow furrow behind the internal malleolus. [L.]—*S. marginalis foraminis magni*. An anomalous furrow along the posterior margin of the foramen magnum. [L.]—*S. medialis frontoparietalis*. See *Callosal-marginal fissure* and *Central fissure*.—*S. medianus anterior medullae spinalis*. See *Anterior median fissure of the spinal cord*.—*S. medianus fossae rhomboideae*. See *Fissura fossae rhomboidealis longitudinalis medius*.—*S. medianus longitudinalis sinus rhomboidealis*. See *S. longitudinalis medianus ventriculi quarti*.—*S. medianus maxillae inferioris*. A vertical furrow upon the outer surface of the inferior maxilla in the middle line. [L. 332.]—*S. medianus posterior medullae spinalis*. See *Posterior median fissure of the spinal cord*.

—*S. medius substantiæ perforatæ anterioris*. A fissure extending between the anterior perforated space and the rostrum of the corpus callosum. [L.]—*S. medullæ oblongatæ*. See *Basilar groove*.—*S. medullæ oblongatæ cæcus*. A depression between the pons Varolii and the anterior extremities of the olivary bodies. [L, 7 (a, 50).]—*S. medullæ oblongatæ decussatorius*. The upper part of the ventral median fissure of the medulla oblongata, where it is interrupted by the decussation of the pyramids. [L, 7.]—*S. medullæ spinalis intermedius anterior*. Fr., *sillon intermédiaire antérieur*. An ill-defined furrow between the ventral and ventro-lateral fissures of the spinal cord. [L, 7.]—*S. medullæ spinalis intermedius posterior*. See *Postero-intermediary fissure*.—*S. medullæ spinalis lateralis*. See *Antero-lateral groove*.—*Sulci meningei*. Furrows for blood-vessels on the ental surface of the cranial bones. [L.]—*S. mentalis*. Fr., *sillon du menton*. Ger., *Kinnrinne*. The furrow separating the lower lip from the prominence of the chin. [L, 41 (a, 14).]—*S. mentolabialis*. A transverse depression between the lower lip and the chin. [L, 32.]—*Sulci minores pontis*. See *Sulci transversarii pontis*.—*S. Monroi*. A furrow (also called *auxil*) on the mesal aspect of the thalamus between the foramen of Monro and the aqueduct and ventrad of the mediodorsal commissure; regarded by His and Minot as the boundary between the "dorsal and ventral zones of His." [L, 110.]—*S. muscularis flexoris longi hallucis*. See *Incisura astragali*.—*S. muscularis tympani*. See *Canalis pro tensore tympani*.—*S. musculi peronei longi*. A vertical groove lined with cartilage on the outer border of the cuboid bone, for the tendon of the peroneus longus. [L.]—*S. musculous (ossis temporis)*. See *Canalis pro tensore tympani*.—*S. mylo-hyoideus*. See *Mylo-hyoid groove*.—*S. nasalis posterior*. A shallow depression behind the posterior pillar of the fauces. [L.]—*S. nasolabialis*. The transverse groove between the nose and the upper lip. [L.]—*S. nasopalatinus*. The furrow for the nasopalatine nerve on the side of the vomer. [L, 31.]—*S. navicularis*. See *Fossa navicularis*.—*S. nervi petrosi profundus minoris (ossis temporis)*. A groove in the petrous portion of the temporal bone, lodging the nervus petrosus profundus minor. [L.]—*Sulci obliqui pontis*. See *Sulci transversarii pontis*.—*S. obturatorius (ossis coxae)*. See *Incisura obturatoria*.—*S. occipitalis anterior*. Of Wernicke, a small vertical fissure in the anterior part of the occipital lobe. [L, 17 (K).]—*S. occipitalis (longitudinalis) inferior (seu medius)*. See *Inferior occipital fissure*.—*S. occipitalis superior (seu transversus)*. See *Transverse occipital fissure*.—*S. occipito-interparietalis*. See *Occipito-parietalis*.—*S. occipito-temporalis inferior*. See *Inferior occipital fissure*.—*S. occipito-temporalis superior*. See *Collateral fissure*.—*S. occipito-temporalis lateralis*. Of Fowler, see *Collateral fissure*.—*S. oculomotorius*. See *Oculomotor furrow*.—*S. of Monro*. See *S. Monroi*.—*S. of the corpus callosum*. See *Callosal fissure*.—*S. olfactorius*. See *Olfactory fissure*.—*S. olivæ externus*. A furrow on the outer side of the olivary body. [L, 7.]—*S. olivæ internus*. A fissure, lying to the inner side of the olivary body, from which arise the roots of the hypoglossal nerve. [L, 6 (K).]—*S. opticus*. See *Optic groove*.—*S. orbitalis (cerebri)*. See *Orbital fissure*.—*S. orbitalis lateralis*. See *Subfrontal fissure*.—*S. orbitalis medialis*. See *Olfactory fissure*.—*S. orbitopalpebralis inferior*. The depression below the margin of the lower lid. [L.]—*S. orbitopalpebralis superior*. The depression immediately below the upper margin of the orbit. [L.]—*S. ossis carpalis primi*. A groove on the ulnar palmar side of the trapezium, for the tendon of the flexor carpi radialis. [L, 332.]—*S. ossis cuboidi*. See *S. musculi peronei longi*.—*S. ossis multanguli*. See *S. ossis carpalis primi*.—*S. ossis navicularis*. A shallow groove on the plantar surface of the scaphoid bone. [L, 332.]—*S. ossis tarsalis quarti*. See *S. musculi peronei longi*.—*S. palatinus medianus*. An anomalous furrow over the intermaxillary suture. [L, 332.]—*S. palpebromalaris*. See *Oculozygomatic line*.—*S. paracentralis*. See under *Paracentral fissure*.—*S. paramedian dorsalis*. See *Postero-intermediary fissure*.—*S. parapyramidalis*. A s. forming an acute angle with the anterior fissure at the hinder end of the medulla oblongata and extending forward as far as the border of the pons Varolii. [a, 34.]—*S. parietalis*. See *Parietal fissure*.—*S. parietofrontalis*. See *Central fissure*.—*S. parieto-occipitalis*. See *Occipital fissure* (2d def.).—*S. peduncularis* [Wilder]. See *Oculomotor furrow*.—*S. pedunculi lateralis*. The s. separating the crista pedunculi from the tegmentum. [a, 34.]—*S. pedunculi medialis*. See *Oculomotor furrow*.—*S. peronei*. See *S. musculi peronei longi*.—*S. perpendicularis*. See *Anterior occipital s.*—*S. perpendicularis externus*. See *Fissura perpendicularis externa*.—*S. petrosquamosus*. A furrow over the petrosquamosal fissure. [L.]—*S. petrosus inferior ossis temporis*. See *Groove for the inferior petrosal sinus*.—*S. petrosus superficialis ossis temporis*. A groove on the anterior surface of the petrous portion of the temporal bone, running forward from the hiatus Fallopii. [L, 332.]—*S. petrosus superior*. See *Groove for the superior petrosal sinus* and *Groove for the superior longitudinal sinus*.—*S. pharyngeus lateralis*. See *Fossa laryngopharyngea*.—*S. pinnalis*. See *S. alaris*.—*S. pollicis*. A s. between the thenar eminence and the palm. [a, 34.]—*S. pontis basilaris*. See *S. basilaris*.—*S. postcentralis*. See *Postcentral fissure*.—*S. postolivaris*. See *S. olivæ externus*.—*S. postrolandicus*. See *Postcentral fissure*.—*S. preauricularis (ossis coxae)*. See *Fossa preauricularis*.—*S. præcentralis*. See *Precentral s.*—*S. præcentralis inferior*. 1. The portion of the precentral fissure below the middle frontal convolution. [L, 332.] 2. See *Precentral fissure*.—*S. præcentralis superior*. The portion of the precentral fissure above the middle frontal convolution. [L, 332.]—*S. præcuneal fissure*.—*S. præinsularis*. See *Pre-insular s.*—*S. præoccipitalis*. See *Anterior occipital s.*—*S. prærolandicus*. See *Precentral fissure*.—*S. presylvian*. In certain *Carnivora*,

a fissure lying anterior to the fissure of Sylvius. [J, 17 (K).] Cf. *Presylvian fissure*.—*S. promontorii*. See *S. Jacobsonii*.—*S. pro tuba eustachiana*. See *Groove for the Eustachian tube*.—*S. pterygoideus*. See *Pterygopalatinus*. Ger., *Flügelgelenkgrube*. A term applied indifferently to a groove on the anterior surface of the pterygoid process of the sphenoid bone, one upon the superior maxilla, or one on the nasal portion of the palate bone, all of which form the pterygo-palatine canal. [L.]—*S. pulmonalis*. Ger., *Lungenfurche*. The depression on either side of the vertebral column formed by the backward curvature of the ribs. [L, 31.]—*S. radialis humeri*. See *Musculo-spiral groove*.—*S. radio-ulnaris*. A groove on the anterior surface of the wrist at the lower ends of the radius and ulna, seen only in flexion. [L, 332.]—*S. rami auricularis (vagi)*. A furrow in the jugular fossa for the auricular branch of the pneumogastric nerve. [L, 31.]—*S. rectus*. See *Olfactory fissure*.—*S. retroglandularis*. See *S. glandis*.—*S. Rolandi*. See *S. rolandica*. See *Central fissure*.—*S. rolandicus anterior*. See *Precentral fissure*.—*S. sagittalis*. The combined sulci longitudinales of the os frontis, os occipitis, and os parietale. [L.]—*S. sclerae*. See *Scleroticæ*. Ger., *Scleratinne*. A depression of the anterior margin of the sclera at its junction with the cornea. [L, 332.]—*S. sigmoideus*. See *Fossa sigmoidea ossis temporalis* and *Cavernous groove*.—*S. sinus petrosi superioris*. See *S. petrosus superior*.—*S. sinus transversus*. See *Fossa sigmoidea ossis temporalis*.—*S. spheno-ethmoidalis*. A groove at the articulation of the sphenoid and ethmoid bones. [a, 34.]—*S. spiralis (cochleæ)*. The groove between the labium tympanicum and labium vestibulare. [L, 31.]—*S. spiralis externus*. See *Ligamenti spiralis*.—*S. spiralis internus*. See *S. spiralis*.—*S. stapedis*. A slight concavity on the outer surface of the crus of the stapes. [L, 7.]—*S. subclaviæ*. See *S. subclaviæ* (1st and 2d def.).—*S. subclavius*. 1. A groove on the first rib in which the subclavian artery rests, close to the tubercle for the insertion of the scalenus anticus. 2. A furrow on the apex of the lung formed by the subclavian artery. 3. A depression in the clavicle into which the subclavius muscle is inserted. [L, 31.]—*S. subfrontalis*. 1. Of Pansch, a small fissure on the mesal surface of the frontal lobe in the *Carnivora*. [L, 17 (K).] 2. See *Subfrontal fissure*.—*S. subparietalis*. Of Broca, a small fissure which forms the lower boundary of the præcuneus. [L, 17 (K).]—*S. subpinealis*. A transverse s. behind and below the pineal gland, crossing the upper surface of the optic thalamus. [L, 17 (K).]—*S. substantiæ perforatæ medii longitudinalis*. See *S. basilaris*.—*S. supercentralis*. See *Supercentral fissure*.—*S. superior anterior*. See *S. cerebelli superior anterior*.—*S. superior cerebelli*. See *Peduncular s.*—*S. superior posterior*. See *S. cerebelli superior posterior*.—*S. supracallosus*. See *Callosal marginal fissure*.—*S. supra-insularis*. See *Externals of Reil*.—*S. supra-orbitalis*. Of Schwabbe, a s. arising from the callosal-marginal fissure at the point where it turns around the genu, and running horizontally forward to the anterior extremity of the frontal lobe. [J, 17 (K).]—*S. supra-orbitalis longitudinalis*. An anomalous longitudinal furrow replacing a missing orbital fissure. [L, 332.]—*S. supra-orbitalis transversus*. An anomalous fissure replacing the transverse element of the orbital fissure. [L, 332.]—*S. suprasylvius*. See *Supersylvian fissure*.—*S. tali*. A deep furrow on the lower surface of the astragalus, dividing its articular surface into two portions. [L.]—*S. temporalis inferior* [Ecker]. See *Collateral fissure*.—*S. temporalis intermedius*. Of Jensen, a s. extending between the upper end of the Sylvian fissure and the posterior extremity of the superfrontal fissure. [J, 17 (K).]—*S. temporalis medius (seu secundus)*. A s. between the middle and inferior temporal convolutions. [a, 34.]—*S. temporalis primus*. See *Supertemporal fissure*.—*S. temporalis superior*. See *Supertemporal fissure* and *Parallel fissure*.—*S. temporalis transversus*. Of Schwabbe, any one of certain secondary sulci in the parietal lobe which have a general direction transverse to the Sylvian fissure. [L, 17 (K).]—*Sulci tertiaril*. Those secondary fissures that are subject to individual variations in number and direction. [a, 34.]—*S. tractus olfactorii*. See *Olfactory fissure*.—*S. transversalis*. See *Peduncular s.*—*Sulci transversarii pontis*. Certain isolated transverse fissures on the inferior surface of the pons Varolii. [L, 7 (a, 50).]—*S. transversus*. See *Orbital fissure*.—*S. transversus ossis occipitis*. The groove in the occipital bone for the lateral sinus. [L, 31.]—*S. transversus ossis parietalis*. A broad flat groove on the inner surface of the postero-inferior angle of the parietal bone for the lateral sinus. [L, 332.]—*S. transversus ossis temporis*. See *Fossa sigmoidea ossis temporalis*.—*S. triradiatus*. See *Orbital fissure*.—*S. tubæ (Eustachii)*. See *S. tubarius*. See *Groove for the Eustachian tube*.—*S. tympanicus*. Ger., *Paukenring*. The groove-like furrow in the bony tympanic ring for the reception of the margin of the tympanic membrane. It exists on the perfect temporal bone only to the extent of the part taken by the tympanic ring in the formation of that bone. In the region of the Rivian segment it is wanting altogether. [F, 32.]—*S. ulnaris (humeri)*. The groove on the posterior surface of the internal condyle of the humerus for the ulnar nerve. [L.]—*S. vena cava*. An anomalous furrow on the right lung for the vena cava superior. [L, 332.]—*Sulci venosi*. See *Cranial sinuses*.—*S. ventriculi cerebelli (seu quarti)*. See *Fissura fossæ rhomboidalis longitudinalis media*.—*S. vermicularis*. A s. separating the vermis from a lobe of the cerebellum. [a, 34.]—*Sulci vertebrales*. Ger., *Wirbel-furchen*. The grooves seen on either side of the spinous processes of the vertebrae when viewed from behind. [L, 14.]—*S. vertebrales lateralis atlantis*. See *Sinus atlantis*.—*S. vomeris*. See *Incisura vomeris*.—*Superior frontal s.* See *Superfrontal fissure*.—*Superior temporo-sphenoidal s.* See *Parallel fissure*.—*Supero-frontal s.* See *Superfrontal fissure*.—*Transverse s.* See *Cruciate fissure*.—*Triradiate s.* See *Orbital fissure*.

**SULFACÉTAMIDE** (Fr.). n.  $\text{Su}^1\text{-fa}^2\text{-sa-ta}^3\text{-med}$ . See **SULPHACETAMIDE**. For various words in *Sulf*, not here given, see the corresponding forms in *Sulph*.

**SULFAMMON** (Fr.), n.  $\text{Su}^1\text{-fa}^3\text{-mo}^2\text{n}^2$ . See **SULPHAMIC ACID**.

**SULFANTIMONIAS** (Lat.), n. m.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-a}^2\text{nt}(\text{a}^2\text{nt})\text{-i}^2\text{mon}^1\text{-a}^2\text{s}(\text{a}^2\text{s})$ . Gen., *-at'is*. A thioantimonate. [B.]—**S. sesquicalicus**. Potassium thioantimonate. [B.]

**SULFANTIMONITE** (Fr.), n.  $\text{Su}^1\text{-fa}^3\text{n}^2\text{-te-mo-net}$ . A thioantimonite, also a thioantimonate. [B, 119.]

**SULFARSÉNATE** (Fr.), n.  $\text{Su}^1\text{-fa}^3\text{-sa-ne-a}^2\text{t}$ . See **SULPHARSENATE**.

**SULFARSENITE** (Fr.), n.  $\text{Su}^1\text{-fa}^3\text{-sa-net}$ . See **SULPHARSENITE**.—**S. calcicus**. See **Liquor probatorius wirttembergicus**.

**SULFAS** [Fr. Cod.] (Lat.), n. m.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-a}^2\text{s}(\text{a}^2\text{s})$ . Gen., *-fat'is*. See **SULPHATE**, and for subheadings not here given, see under **SULPHAS**.—**Collyrium cum sulfate zincico**. See **Collyre au sulfate de zinc**.—**Collyrium cum sulfate zincico ex Sanchez**. A collyrium made by dissolving 2 parts of zinc sulphate in 500 of water, adding 4 of powdered Florentine iris-root, macerating for 8 days, and filtering. [A, 447 (a, 21).]—**Liquor sulfatis ferri**. See **Liquor ferri tersulphatis**.—**S. aluminicus**. Aluminium sulphate. [B.]—**S. aluminopotassicus**. Potassium alum; ordinary alum. [B.]—**S. aluminopotassicus desiccatus**. See **Alumen exsiccatum**.—**S. cadmicus**. See **CADMIUM sulphate**.—**S. cupro-ammonicus**. See **Copper ammoniosulphate**.—**S. eserinus**. See **ESERINE sulphate**.—**S. hydrargyricus**. See **MERCURY sulphate** (2d def.).—**S. potassicus**. Normal potassium sulphate. [B.]—**S. quiniacus**. **S. quiniacus**. Quinine bisulphate. [B.]—**S. strychnicus**. **S. strychnicus**. See **STRYCHNINE sulphate**.—**Syrupus cum sulfate quiniaco**. See **Sirup de sulfate de quinine**.—**Syrupus cum sulfate strychnico**. See **Sirup de sulfate de strychnine**.

**SULFAT** (Ger.), n.  $\text{Zulf-a}^2\text{t}$ . See **SULPHATE**.

**SULFATE** (Fr.), n.  $\text{Su}^1\text{-fa}^2\text{t}$ . See **SULPHATE**.—**S. acide**. An acid sulphate. [B.]—**S. aluminico-potassique**. Potash alum. See **ALUM**.—**S. ammonico-ferrique**. See **IRON and ammonium sulphate** (2d def.).—**S. antimonique**. Antimony sulphate. [B, 119.]—**S. barytique**. Barium sulphate. [B, 119 (a, 35).]—**S. basique**. A basic sulphate. [B.]—**S. biquinique**. See **QUININE sulphate**.—**S. cuprico-ammonique trisbasique**. See **Copper ammoniosulphate**.—**S. ferreux**. See **IRON sulphate** (1st def.) and **FERRI sulphas**.—**S. ferreux desséché**. See **FERRI sulphas exsiccatus**.—**S. ferreux du commerce**. See **FERRUM sulphuricum crudum**.—**S. ferreux officinal**. See under **FERRI sulphas**.—**S. ferreux précipité**. See **FERRI sulphas precipitatus**.—**S. ferrique**. See **IRON sulphate** (2d def.).—**S. ferrique ammoniacal**. See **IRON and ammonium sulphate** (2d def.).—**S. ferrique liquide**. See **Liquor ferri tersulphatis**.—**S. mercurique**. See **MERCURY sulphate** (2d def.).—**S. mercurique basique**, **S. trimercurique**. See **MERCURY subsulphate**.

**SULPHYDANTOÏNE** (Fr.), n.  $\text{Su}^1\text{-fe-dra}^2\text{n}^2\text{-to-en}$ . See **THIOHYDANTOIN**.

**SULPHYDRATE** (Fr.), n.  $\text{Su}^1\text{-fe-dra}^2\text{t}$ . See **SULPHYDRATE**.—**S. ammonique**. Ammonium hydrosulphide. [B, 119 (a, 38).]—**S. persulfuré**. See **Liquor fumans Beguin**.

**SULPHYDROMÈTRE** (Fr.), n.  $\text{Su}^1\text{-fe-dro-me}^2\text{tr}$ . A device for testing the amount of sulphureted hydrogen in the air of an inhalation chamber; consisting of papers impregnated with a solution of a salt of lead, arranged with other papers so tinted as to serve as a gauge of the blackening of the former by the sulphur compound; proposed by Isoard as a means of regulating patients' stay in these chambers. [*Id* "Nouv. rem.," Oct. 1, 1885, p. 297.]

**SULFID** (Ger.), n.  $\text{Zulf-ed}$ . A sulphide (used generally in composition and applied to those sulphides which act as acids). [B.] Cf. **SULFURET**.—**Antimoniges S.** [Berzelius]. Antimony tersulphide. [B.]—**Arseniges S.** [Berzelius]. Arsenic trisulphide. [B.]—**Unterarseniges S.** Arsenic disulphide. [B.]

**SULFIDE** (Fr.), n.  $\text{Su}^1\text{-fed}$ . See **SULPHIDE**.—**S. antimonieux**. Antimony pentasulphide. [B, 119.]—**S. arsénieux**. Orpiment. [B, 119.]—**S. carbonique**. See **CARBON disulphide**.—**S. hydrique**. See **HYDROSULPHURIC ACID**.—**S. hyparsénieux**. Realgar. [B, 119.]—**S. hypoantimonieux**. Antimony trisulphide. [B, 119.]

**SULFIS** (Lat.), n. m.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-i}^2\text{s}$ . Gen., *-fit'is*. See **SULPHITE**.—**S. kalicus**. See **POTASSIUM sulphite**.—**S. natrius**. See **SODIUM sulphite**.—**S. potassicus**. See **POTASSIUM sulphite**.—**S. sodicus**. See **SODIUM sulphite**.

**SULFIT** (Ger.), **SULFITE** (Fr.), n's.  $\text{Zulf-et}$ ,  $\text{su}^1\text{-fet}$ . See **SULPHITE**.

**SULFOETHYLICUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-o}(\text{o}^2)\text{-e}^2\text{th}(\text{a}^2\text{-e}^2\text{th})\text{-i}^2\text{u}(\text{u}^2)\text{-i}^2\text{k}(\text{u}^2\text{u}^2\text{s})$ . Sulphovinic (ethylsulphuric); with the name of a base, the ethylsulphate of the base. [B, 95.]

**SULFOBENZOLÈNE** (Fr.), n.  $\text{Su}^1\text{-fo-ba}^3\text{n}^2\text{-zo-le}^2\text{n}$ . See **SULPHOBENZOLINE**.

**SULFOCARBOLICUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-o}(\text{o}^2)\text{-ka}^3\text{rb-o}^2\text{yl-i}^2\text{k}(\text{u}^2\text{u}^2\text{s})$ . Sulphocarbolic; with the name of a base, the sulphocarbolic of the base. [B.]

**SULFOCARBOMÈTRE** (Fr.), n.  $\text{Su}^1\text{-fo-ka}^3\text{rb-ho-me}^2\text{tr}$ . An instrument for estimating the amount of carbon disulphide contained in the alkaline sulphocarbonates. [Géiss and Thommeret-Géiss, "Compt. rend. de l'acad. des sci.," xvi, p. 967 (B).]

**SULFODIPHTHÉROSE** (Fr.), **SULFOMUCOSE** (Fr.), n's.  $\text{Su}^1\text{-fo-de}^2\text{f-ta-roz}$ ,  $\text{mu}^3\text{-koz}$ . See **BARÈGIN**.

**SULFONALUM** (Lat.), n. n.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-o}^2\text{n}^2(\text{a}^2\text{l})\text{-u}^2\text{m}(\text{u}^2\text{m})$ . See **SULFONAL**.

**SULFONAPHIDE** (Fr.), n.  $\text{Su}^1\text{-fo-na}^2\text{f-ted}$ . See **SULPHONAPHTHALENE**.

**SULFONTERNSTEINSÄURE** (Ger.), n.  $\text{Zulf-on-be}^3\text{rn-stin-zoier-e}^2$ . Sulphonsuccinic acid. [B.]

**SULFONSÄUREBENZOL** (Ger.), n.  $\text{Zulf-on-zoier-e}^2\text{-be}^2\text{n-tso}^2\text{l}$ . Benzenesulphonic acid. [B.]

**SULFONZIMMITSÄURE** (Ger.), n.  $\text{Zulf-on-tsi}^2\text{mt-zoier-e}$ . Sulphocinnamic acid. [B.]

**SULFOPHENAS** (Lat.), n. m.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-o}(\text{o}^2)\text{-fen}(\text{fan})\text{-a}^2\text{s}(\text{a}^2\text{s})$ . Fr., *sulphophénate*. Gen., *-at'is*. See **SULPHOCARBOLATE**.

**SULFOPHÉNATE** (Fr.), adj.  $\text{Su}^1\text{-fo-fa-nek}$ . Sulphocarbolic. [B.]

**SULFOSEL** (Fr.), n.  $\text{Su}^1\text{-fo-se}^2\text{l}$ . See **SULPHOSALT**.

**SULFOXYSMUS** (Lat.), n. m.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-o}^2\text{x-i}^2\text{z}(\text{u}^2\text{z})\text{-mu}^3\text{s}(\text{mu}^3\text{s})$ . Poisoning with sulphuric acid. [A, 326 (a, 21).]

**SULFUR** (Lat.), n. n.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})$ . Gen., *sulfuris*. See **SULPHUR**.—**Hepar sulfuris**. See **POTASSA sulphurata** (1st def.).—**Hepar sulfuris calcareum**. Calcium sulphide; calx sulphurata. [B, 270.]—**Ioduretum sulfuris**. Sulphur iodide. [a, 38.]—**Pastilla sulfuris**. See **Tabella sulfuris**.—**S. depuratum**. Washed sulphur. [B.]—**S. jodatum**. See **Sulphur iodide**.—**S. lotum**. Washed sulphur. [B, 95 (a, 38).]—**S. præcipitatum**. Precipitated sulphur. [B.]—**S. sublimatum**. 1. Of the Ger. Ph., Finn. Ph., Hung. Ph., 2d ed., and Russ. Ph., sublimed sulphur. 2. Of the Austr. Ph., washed sulphur. [B, 95 (a, 38).]—**S. sublimatum elotum** [Finn. Ph., Russ. Ph.] (see *et lotum* [Fr. Cod.], *seu lotum* [Hung. Ph., 2d ed.]). Washed sulphur. [B, 95 (a, 38).]—**Tabellæ cum sulfure**, **Trochisci sulfuris**. See **Tabella sulfuris**.—**Unguentum sulfuris compositum**. See **Unguentum sulfuris compositum**.

**SULFURATION** (Fr.), n.  $\text{Su}^1\text{-fu}^2\text{-ra}^3\text{-se-o}^2\text{n}^2$ . Fumigation and disinfection with sulphur. [a, 18.] Cf. *Fumigation à l'acide sulfureux*.

**SULFURATUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-at}(\text{a}^2\text{t})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Sulphureted; with the name of a base, the sulphide of the base.

**SULFURE** (Fr.), n.  $\text{Su}^1\text{-fu}^2\text{r}$ . See **SULPHIDE**.—**S. ammonique**. Liqueur fumans Boylei. [B, 119 (a, 38).]—**S. antimonique**. An antimony sulphide, especially antimony trisulphide. [B, 119.]—**S. cuivreux**. See **Æs combustum**.—**S. ferreux**. See **IRON monosulphide**.—**S. mercurique**. See **RED MERCURY sulphide**.—**S. plombique**. Lead sulphide. [B, 119 (a, 38).]

**SULFURÉ** (Fr.), adj.  $\text{Su}^1\text{-fu}^2\text{-ra}$ . See **SULPHURATED**.

**SULFURÉE** (Fr.), n.  $\text{Su}^1\text{-fu}^2\text{-ra}$ . Sulphurea; thiourea. [B.]

**SULFURET** (Ger.), n.  $\text{Zulf-ur-e}^2\text{t}$ . A sulphide, more particularly a lower or basic sulphide. [B.] Cf. **SULFID**.

**SULFURETUM** (Lat.), n. n.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-et}(\text{at})\text{-u}^2\text{m}(\text{u}^2\text{m})$ . See **SULPHIDE** and cf. **SULPHURETUM**.—**S. arsenicosum**. See **ARSENIC trisulphide**.—**S. carbonicum**. See **CARBON disulphide**.—**S. hydrargyricum**. See **RED MERCURY sulphide**.—**S. natrium**, **S. sodicum**. Sodium monosulphide. [B.]—**S. stibicum**. See **ANTIMONY sulphide**.—**S. stibicum auratum**. See **ANTIMONY pentasulphide**.

**SULFUREUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Sulphur-yellow. [a, 35.]

**SULFUREUX** (Fr.), adj.  $\text{Su}^1\text{-fu}^2\text{-ru}^2\text{é}$ . See **SULPHUREOUS**.

**SULFURICUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-i}^2\text{k}(\text{u}^2\text{k})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Sulphuric; with the name of a base, the sulphate of the base. [B.]

**SULFUROSUS** (Lat.), adj.  $\text{Su}^1\text{lf}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-os}(\text{u}^2\text{s})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Sulphurous; with the name of a base, the sulphite of that base. [B.]

**SULPHACETAMIDE**, n.  $\text{Su}^1\text{lf-a}^2\text{s-e}^2\text{t-a}^2\text{m-i}^2\text{d}(\text{id})$ . Fr., *sulfacetamide*. A substance,  $\text{C}_8\text{H}_9\text{N}_2\text{O}_3$ , obtained by adding an alcoholic solution of ammonium sulphide to an alcoholic solution of chloracetamide. [B, 93 (a, 14).]

**SULPHACETIC ACID**, n.  $\text{Su}^1\text{lf-a}^2\text{s-e}^2\text{t}(\text{et})\text{-i}^2\text{k}(\text{u}^2\text{k})$ . Fr., *acide sulfacétique*. See **SULPHONACETIC ACID**.

**SULPHACETYLIC ACID**, n.  $\text{Su}^1\text{lf-a}^2\text{s-e}^2\text{t-i}^2\text{p}^1\text{-i}^2\text{k}(\text{u}^2\text{k})$ . See **ETHIONIC anhydride**.

**SULPHALDEHYDE**, n.  $\text{Su}^1\text{-fa}^2\text{l-de}^2\text{-hid}$ . Fr., *sulfaldéhyde*. See **THIOALDEHYDE**.

**SULPHAMETHYLANE**, n.  $\text{Su}^1\text{-fa}^2\text{-me}^2\text{th-i}^2\text{p}^1\text{-an}$ . Fr., *sulfaméthylane*. A substance,  $\text{SO}^1\text{NH}_2$ , obtained by passing a current of dry ammonia gas over methyl sulphate. [B, 93 (a, 14).]

**SULPHAMIC ACID**, n.  $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{k}(\text{u}^2\text{k})$ . Fr., *acide sulfamique*, *sulfammon*. Ger., *Sulfamidssäure*. A substance,  $\text{SO}_2\text{NH}_2$ , not yet isolated, but existing in neutral ammonium sulphate. [B, 93 (a, 14).] See also **AMIC ACIDS**.

**SULPHAMIDE**, n.  $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{d}(\text{id})$ . Fr., *sulfamide*. Ger., *Sulfamid*, *schwefelsaures Amid*. An old name for ammonium sulphate. [B, 93 (a, 14).]

**SULPHAMINEBARBITURIC ACID**, n.  $\text{Su}^1\text{-fa}^2\text{-m-en-ba}^3\text{rb-i}^2\text{p}^1\text{-i}^2\text{k}(\text{u}^2\text{k})$ . See **THIOURIC ACID**.

**SULPHAMINEBENZOIC ACID**, n.  $\text{Su}^1\text{-fa}^2\text{-m-en-be}^2\text{nz-o}^2\text{-i}^2\text{k}(\text{u}^2\text{k})$ . Ger., *Sulfaminbenzoesäure*. One of the products formed in the excretion of saccharin, found in the urine. [E. Salkowski, "Ctblbl. f. d. med. Wissensch.," April 23, 1887, p. 307 (B).]

**SULPHAMINOL**, n.  $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{p}^1\text{-o}^2\text{l}$ . Ger., *Sulfaminol*. Thioxydiphenylamine; a substance,  $\text{C}_{12}\text{H}_9\text{N}_2\text{SO}_2 = \text{NH} : (\text{C}_6\text{H}_4)_2\text{OH}_2$ ; S, forming a yellowish, tasteless, and odorless powder, insoluble in water, soluble in solutions of the alkalis. In the liquids of the animal organism it decomposes with the evolution presumably of sulphur and phenol. According to Moritz, it acts like iodoform in diminishing suppuration. ["Ann. d. chim. e. d. pharmacol.," July, 1890, p. 44 (B).]

**SULPHAMYLIC ACID**, n.  $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{p}^1\text{-i}^2\text{k}(\text{u}^2\text{k})$ . See **AMYL sulphate**.

**SULPHANILIC ACID**, n.  $\text{Su}^{\text{3lf-a}^2\text{n-i}^2\text{l}^2\text{k}}$ . Fr., *acide sulfanilique* (ou *sulfanilique*). Ger., *Sulfanilsäure*, *Sulfonanilsäure*. Paramidobenzenesulphonic acid (see under AMIDOBENZENE-SULPHONIC ACID). It is slightly soluble in water, and is used internally to prevent iodism. [B; Ehrlich, "Pharm. Rundsch." ("Am. Jour. of Pharm.," May, 1886); "N. Y. Med. Jour.," May 22, 1886, p. 524 (a, 50).]

**SULPHANTIMONIC ACID**, n.  $\text{Su}^{\text{3lf-a}^2\text{n-ti}^2\text{-mo}^2\text{n}^2\text{k}}$ . Fr., *acide sulfantimonique*. Ger., *Sulfantimonsäure*. See THIOANTIMONIC ACID.—**Anhydrous s. a.** See ANTIMONY PENTASULPHIDE.

**SULPHANTIMONIOUS ACID**, n.  $\text{Su}^{\text{3lf-a}^2\text{n-ti}^2\text{-mon}^2\text{i}^2\text{-u}^2\text{s}}$ . Antimony tetrasulphide. [B.]

**SULPHANTIMONIOUS ANHYDRIDE**, n. Antimony trisulphide. [B. 159.]

**SULPHANTIMONITE**, n.  $\text{Su}^{\text{3lf-a}^2\text{n-ti}^2\text{m}^2\text{o}^2\text{n-it}}$ . See THIOANTIMONITE.

**SULPHARSENATE**, n.  $\text{Su}^{\text{3lf-a}^3\text{rs-e}^2\text{n-at}}$ . Fr., *sulfarséniate*. See THIOARSENATE.—**Basic s.** See *Tribasic s.*—**Diammonic s.** See AMMONIUM THIOARSENATE.—**Dibasic s's.** Of Watts, a class of salts now known as the pyrothioarsenates. [B.]—**Monammonic s.** See AMMONIUM THIOARSENATE.—**Monobasic s's.** Of Watts, a class of salts now known as metathioarsenates. [B.]—**Neutral s.** See *Dibasic s.*—**Triammonic s.** See AMMONIUM THIOARSENATE.—**Tribasic s's.** Of Watts, the class of salts known now as the thioarsenates or orthothioarsenates. [B.]

**SULPHARSENIC ACID**, n.  $\text{Su}^{\text{3lf-a}^3\text{rs-e}^2\text{n}^2\text{i}^2\text{k}}$ . Fr., *acide sulfarsénique*. Ger., *Sulfarsensäure*. An improper term for arsenic pentasulphide; properly thioarsenic acid (q. v.). [B.]

**SULPHARSENIOS ACID**, n.  $\text{Su}^{\text{3lf-a}^3\text{rs-e}^2\text{n}^2\text{i}^2\text{-u}^2\text{s}}$ . Fr., *acide sulfarsénieux*. Ger., *Sulfarsensäure*. An improper term for arsenic trisulphide; properly thioarsenous acid (q. v.). [B.]

**SULPHARSENITE**, n.  $\text{Su}^{\text{3lf-a}^3\text{rs-e}^2\text{n-it}}$ . See THIOARSENITE.

**SULPHAS** (Lat.), n. m.  $\text{Su}^{\text{3lf}^2\text{(su}^{\text{3lf}}\text{)}^2\text{a}^2\text{s(a}^2\text{s)}}$ . Gen., *phat'is*. See SULPHATE and cf. subheadings under SULFAS.—**Liquor sulphatis magnesiæ carbonicæ**. See *Liquor magnesiæ carbonatæ*.—**Solutio sulphatis atropinæ** [Norw. Ph.]. A solution of 1 part of atropine sulphate in 200 parts of distilled water. [B. 95.] Cf. *Liquor atropinæ sulphatis*.—**Solutio sulphatis ferri**. See *Liquor ferri tersulphatis*.—**Solutio sulphatis magnesiæ carbonicæ**. See *Liquor magnesiæ carbonatæ*.—**S. æthylicus acidus cum alcohole**. See *MIXTURA sulphurica acidæ*.—**S. aluminarius**. See MAGNESIUM sulphate.—**S. manganosus**. See MANGANESE sulphate (1st def.).—**S. mercurius**. See MERCURY sulphate (2d def.).—**S. morphiæ**. See MORPHINE sulphate.—**S. natrius**. See SODIUM sulphate.—**S. natrius siccatus** (seu siccus). See Dried sodium sulphate.—**S. quiniæ**. See QUININE sulphate.—**S. sodicus**. See SODIUM sulphate.—**S. stibicus**. Antimony sulphate. [B.]—**S. superammoniacus-cupreus** (seu cupricus). See COPPER ammoniosulphate.—**S. zincicus**. See ZINC sulphate.

**SULPHATE**, n.  $\text{Su}^{\text{3lf-at}}$ . Lat., *sulphas* (cf. SULPHURICUS). Fr., *sulfate*. Ger., *Sulfat*, *schwefelsaures Salz*. A salt of sulphuric acid (cf. *Normal s.* and *Acid s.*).—**Acid s.** A salt of sulphuric acid in which only one atom of hydrogen in the molecule of the acid is replaced by a metal or radicle. The general formula of the acid s's is  $\text{R}_n(\text{HSO}_3)_n$ , where  $\text{R}_n$  is a radicle whose combining power is n. [B.]—**Basic s.** A compound of a s. with an oxide or hydroxide. [B.]—**Dimetallic s.** A normal s. so called because two atoms of a univalent metal are required to replace completely the hydrogen of the acid. [B.]—**Ferrous s.** See IRON sulphate (1st def.).—**Monohydric s.** See *Acid s.*—**Normal s.** A s. in which all of the hydrogen of the acid is replaced by a metal or radicle. The general formula of these s's is  $\text{R}_2\text{SO}_4$ ,  $\text{R}'\text{SO}_4$ , or  $\text{R}_3(\text{SO}_4)_3$ . [B.]—**Test solution of ferrous s.** A freshly prepared solution of ferrous s. in ten times [U. S. Ph., Br. Ph.] (twice [Ger. Ph.]) as much water. [B. 81 (a, 38).]

**SULPHAZOTIC ACID**, n.  $\text{Su}^{\text{3lf-a}^2\text{z-o}^2\text{t}^2\text{i}^2\text{k}}$ . See HYDROXYLAMINEDISULPHAZOTIC ACID.

**SULPHAZOTIZED**, adj.  $\text{Su}^{\text{3lf-a}^2\text{z-o-tizd}}$ . Fr., *sulfazoté*. Containing sulphur and nitrogen. [A. 385 (a, 48).]

**SULPHETHERIN**, n.  $\text{Su}^{\text{3lf-e}^2\text{th-e}^2\text{r-i}^2\text{n}}$ . Of Löwig and Weidmann, ethylene sulphide. [B. 3 (a, 38).]

**SULPHETHIONIC ACID**, n.  $\text{Su}^{\text{3lf-e}^2\text{th-i}^2\text{-o}^2\text{n}^2\text{i}^2\text{k}}$ . See ETHIONIC ANHYDRIDE.

**SULPHETHYLSULPHURIC ACID**, n.  $\text{Su}^{\text{3lf-e}^2\text{th-i}^2\text{-su}^{\text{3lf}}\text{-u}^2\text{r}^2\text{i}^2\text{k}}$ . See ETHYLSULPHONIC ACID.

**SULPHHYDRATE**, n.  $\text{Su}^{\text{3lf-hid}^2\text{-rat}}$ . See SULPHYDRATE.

**SULPHIDE**, n.  $\text{Su}^{\text{3lf-i}^2\text{d}^2\text{(id)}}$ . Lat., *sulphidum*, *sulphuretum* (cf. SULPHURATUS). Fr., *sulfure*, *sulfide*. Ger., *Sulphid*, *Schwefel*. A compound consisting of an element or radicle united directly with sulphur. [B.]—**Arsenious s.** See ARSENIC trisulphide.

**SULPHIDUM** (Lat.), n. n.  $\text{Su}^{\text{3lf}^2\text{(su}^{\text{3lf}}\text{)}^2\text{i}^2\text{d-u}^2\text{m(u}^2\text{m)}}$ . See SULPHIDE.—**S. stibicum**. Antimony pentasulphide. [B.]—**S. stibiosum**. Antimony tetrasulphide. [B.]

**SULPHINDIGOTATE**, n.  $\text{Su}^{\text{3lf-i}^2\text{n}^2\text{-di}^2\text{s-go}^2\text{t-at}}$ . Fr., *céruléo-sulfate*. A salt of sulphindigotic acid. [a. 17.]

**SULPHINDIGOTIC ACID**, **SULPHINDYLIC ACID**, n's.  $\text{Su}^{\text{3lf-i}^2\text{n-d}^2\text{i}^2\text{-go}^2\text{t}^2\text{i}^2\text{k}}$ ,  $\text{-i}^2\text{nd-i}^2\text{u}^2\text{i}^2\text{k}}$ . An acid,  $\text{C}_{14}\text{H}_8\text{N}_2\text{O}_9(\text{SO}_3\text{H})_2$ , occurring as an amorphous blue mass produced by the action of sulphuric acid upon indigo. [B. 4 (a, 38).]

**SULPHINE**, n.  $\text{Su}^{\text{3lf-en}}$ . Ger., *Sulfin*. Any one of a class of radicles, analogous to the amines, in which sulphur is present as a quadrivalent body. Such rad'cles have the composition  $-\text{R}'' : \text{S} :$  or  $-\text{S}-\text{R}'''$ , in which  $\text{R}''$  and  $\text{R}'''$  represent respectively bivalent and trivalent single radicles or combinations of radicles. [B.]

**SULPHINIC ACIDS**, n. pl.  $\text{Su}^{\text{3lf-i}^2\text{n}^2\text{i}^2\text{k}}$ . Ger., *Sulfinsäuren*. Monobasic acids, which may be regarded as derived from sulphurous acid by the replacement of one molecule of hydroxyl in the latter by a univalent radicle. Formula,  $\text{H.R.S.O}_3$ . [B.]

**SULPHIODIDE**, n.  $\text{Su}^{\text{3lf-i}^2\text{o-d}^2\text{i}^2\text{d}^2\text{(id)}}$ . A compound of sulphur and iodine with the same base. [B.]

**SULPHIS** (Lat.), n. m.  $\text{Su}^{\text{3lf}^2\text{(su}^{\text{3lf}}\text{)}^2\text{i}^2\text{s}}$ . Gen., *phit'is*. See SULPHITE.—**S. calcicus**. See CALCIUM sulphite.—**S. magnescius**. See MAGNESIUM sulphite.—**S. natrius**, **S. sodicus**. See SODIUM sulphite.—**S. stibicus**. Antimony sulphite. [B.]

**SULPHITE**, n.  $\text{Su}^{\text{3lf-it}}$ . Lat., *sulphis*. Fr., *sulfite*. Ger., *Sulfit*. A salt of sulphurous acid. In the normal s's all the hydrogen of the acid is replaced by a metal or radicle; in the acid s's only one atom of hydrogen is so replaced. [B.]

**SULPHMETHYLATE**, n.  $\text{Su}^{\text{3lf-me}^2\text{th}^2\text{-i}^2\text{at}}$ . See THIOMETHYLATE.

**SULPHOACETIC ACID**, n.  $\text{Su}^{\text{3lf-o-a}^2\text{s-et(e}^2\text{t)}^2\text{i}^2\text{k}}$ . See SULPHONACETIC ACID.

**SULPHOARSENITE**, n.  $\text{Su}^{\text{3lf-o-a}^3\text{rs-e}^2\text{n-it}}$ . See THIOARSENITE, and for various words in *Sulpho-* not here given, see the corresponding forms in *Thio-*.

**SULPHO-AZOTIZED**, adj.  $\text{Su}^{\text{3lf-o-a}^2\text{z-o}^2\text{t-izd}}$ . See SULPHAZOTIZED.

**SULPHOBACTERIA** (Lat.), n. n. pl.  $\text{Su}^{\text{3lf}^2\text{(su}^{\text{3lf}}\text{)}^2\text{o(o}^2\text{s)}^2\text{-ba}^2\text{kt-(ka}^2\text{kt)-e(a}^2\text{)}^2\text{r}^2\text{i}^2\text{-a}^2\text{s}}$ . For deriv., see SULPHUR and BACTERIUM. Fr., *sulfobactéries*. See *Schwefelbacterien*.

**SULPHOBASE**, n.  $\text{Su}^{\text{3lf-o-bas}}$ . See *Sulpho-base*.

**SULPHOBENZENIC ACID**, n.  $\text{Su}^{\text{3lf-o-be}^2\text{nz-e}^2\text{n}^2\text{i}^2\text{k}}$ . Benzenesulphonic acid. [B.]

**SULPHOBENZIDE**, n.  $\text{Su}^{\text{3lf-o-be}^2\text{nz-i}^2\text{d}^2\text{(id)}}$ . Fr., *sulfobenzide*. Ger., *Sulfobenzid*. See DIPHENYLSULPHONE.

**SULPHOBENZIDIC ACID**, n.  $\text{Su}^{\text{3lf-o-be}^2\text{nz-i}^2\text{d}^2\text{i}^2\text{k}}$ . See DIPHENYLSULPHONIC ACID.

**SULPHOBENZOIC ACID**, n.  $\text{Su}^{\text{3lf-o-be}^2\text{nz-o}^2\text{i}^2\text{k}}$ . Fr., *acide sulfobenzoïque*. Ger., *Sulfobenzoësäure*. An acid,  $\text{C}_6\text{H}_5\text{SO}_3\text{H}$  =  $\text{C}_6\text{H}_4(\text{CO}_2\text{OH})$ , known in three isomeric forms: *Orthos* acid, monoclinic tabular crystals; *metas* acid, a colorless crystalline mass; and *paras* acid, acicular crystals. [B. 3 (a, 38).]

**SULPHOBENZOLIC ACID**, n.  $\text{Su}^{\text{3lf-o-be}^2\text{n-z-o}^2\text{z-i}^2\text{k}}$ . Fr., *acide sulfobenzoïque*. Benzenesulphonic acid. [B.]

**SULPHOBROMIDE**, n.  $\text{Su}^{\text{3lf-o-brom}^2\text{i}^2\text{d}^2\text{(id)}}$ . A compound of sulphur and bromine with the same base. [B. 2.]

**SULPHOBUTYLIC ACID**, n.  $\text{Su}^{\text{3lf-o-bu}^2\text{-t}^2\text{i}^2\text{l}^2\text{i}^2\text{k}}$ . Fr., *acide sulfobutylique*. See BUTYL sulfate.

**SULPHOCAMPHIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{mf}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocamphique*. See SULPHOCAMPHIC ACID.

**SULPHOCAMPHORIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{m-f-o}^2\text{r}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocamphorique*. Ger., *Sulfocampfersäure*. Of Walter, sulphocamphylic acid.

**SULPHOCAMPHYLIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{m-fi}^2\text{l}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocamphylique*. A strong dibasic acid,  $\text{C}_6\text{H}_{16}\text{SO}_6 + 2\text{H}_2\text{O}$ , occurring as hexagonal asymmetric prisms. [B. 3 (a, 38).]

**SULPHOCARBAMIDE**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-a}^2\text{m-i}^2\text{d}^2\text{(id)}}$ . Fr., *sulfocarbamide*. Ger., *Sulfocarbamid*. See THIOUREA.

**SULPHOCARBANILIDE**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-a}^2\text{m-i}^2\text{l}^2\text{-i}^2\text{d}^2\text{(id)}}$ . Fr., *sulfocarbaniide*. See DIPHENYLTHIOUREA.

**SULPHOCARBOL**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-o}^2\text{l}}$ . See ASEPTOL.

**SULPHOCARBOLATE**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-o}^2\text{l-at}}$ . Lat., *sulphocarbolas*. Fr., *sulfophénate*. Ger., *phenylschwefelsaures Salz*. A salt of sulphocarbolic acid. [B.]

**SULPHOCARBOLIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-o}^2\text{l}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocarbolique* (ou *sulfo-phénique*). See PHENOLSULPHURIC ACID.

**SULPHOCARBONIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-o}^2\text{n}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocarbonique*. 1. Thiocarbonic acid. 2. Carbon dioxide.

**SULPHOCARBOVINIC ACID**, n.  $\text{Su}^{\text{3lf-o-ka}^2\text{rb-o-vin}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocarbovinique*. See XANTHIC ACID.

**SULPHOCHLORIDE**, n.  $\text{Su}^{\text{3lf-o-klor}^2\text{i}^2\text{d}^2\text{(id)}}$ . Fr., *sulfochlorure*. A compound of sulphur and chlorine with the same base. [B.]

**SULPHOCRESYLIC ACID**, n.  $\text{Su}^{\text{3lf-o-kre}^2\text{s-i}^2\text{l}^2\text{i}^2\text{k}}$ . Fr., *acide sulfocresylique*. Ger., *Kresylschwefelsäure*. A monobasic acid,  $\text{C}_6\text{H}_5(\text{CH}_3)\text{OH.SO}_3\text{H}$ . [B.]

**SULPHOCUMINIC ACID**, n.  $\text{Su}^3\text{lf-o-ku}^2\text{-mi}^2\text{n}^1\text{i}^2\text{k}$ . Fr. *acide sulfocuminique*. An acid,  $\text{SO}(\text{O.C}_6\text{H}_4)_2(\text{OH})$ , obtained by the action of sulphuric acid on cumene; known only in its salts.

**SULPHOCYANHYDRIC ACID**, **SULPHOCYANIC ACID**, n's.  $\text{Su}^3\text{lf-o-si-a}^2\text{n-hid}^1\text{'ri}^2\text{k}$ , -a<sup>2</sup>n<sup>1</sup>i<sup>2</sup>k. See THIOCYANIC ACID.

**SULPHOCYANIC ANHYDRIDE**, n. See CYANOGEN sulphide.

**SULPHOCYANIDE**, n.  $\text{Su}^3\text{lf-o-si-a}^2\text{n-i}^2\text{d}(\text{id})$ . See THIOCYANIDE.

**SULPHOCYANOGEN**, n.  $\text{Su}^3\text{lf-o-si-a}^2\text{n'o-j}^2\text{e}^2\text{n}$ . A hypothetical radicle, CNS, of thiocyanic acid. [B. 93 (a, 14).]

**SULPHOCYMENIC ACID**, n.  $\text{Su}^3\text{lf-o-si-me}^2\text{n}^1\text{i}^2\text{k}$ . An acid,  $\text{C}_6\text{H}_5(\text{SO}_2\text{OH})(\text{CH}_3)(\text{C}_6\text{H}_5)$ , derived from cymene. [B.]

**SULPHODIAZOBENZENE**, n.  $\text{Su}^3\text{lf-o-di-a}^2\text{z-o-be}^2\text{nz'en}$ . See DIAZOBENZENESULPHONIC ACID.

**SULPHOËSSIGSÄURE** (Ger.), n.  $\text{Zulf-o-e-s'si}^2\text{g-zoir-e}^2$ . See SULPHOACETIC ACID.

**SULPHOFORM**, n.  $\text{Su}^3\text{lf-o-fo}^2\text{rm}$ . Fr. *sulfoforme*. Ger. *Sulfoform*. A yellowish crystalline substance,  $(\text{CH}_3)_2\text{S}_2$ , obtained by heating iodoform with sulphur in a closed vessel. [B. 93 (a, 14).]

**SULPHOGLUCIC ACID**, n.  $\text{Su}^3\text{lf-o-glu}^2\text{'si}^2\text{k}$ . Fr. *acide sulfoglycique* (ou *sulfoglycosique*, ou *sulfosaccharique*). Dextrose sulphuric acid; an unstable body,  $\text{C}_{12}\text{H}_{24}\text{O}_{12}\cdot\text{SO}_3$ , formed by dissolving glucose (dextrose) in concentrated sulphuric acid. [B. 4, 9, 93.]

**SULPHOGLYCERIC ACID**, n.  $\text{Su}^3\text{lf-o-gli}^2\text{'s-e}^2\text{r}^1\text{i}^2\text{k}$ . Fr. *acide sulfoglycérique*. See GLYCERINSULPHURIC ACID.

**SULPHOGLYCOLLIC ACID**, n.  $\text{Su}^3\text{lf-o-gli}^2\text{'k-o}^2\text{l}^1\text{i}^2\text{k}$ . Fr. *acide sulfoglycollique*. Basic ethylene sulphate. [B.]

**SULPHOHYDRAS** (Lat.), n. m.  $\text{Su}^3\text{lf}(\text{su}^3\text{lf})\text{-o}(\text{o}^2)\text{-hid}(\text{hu}^2\text{d})\text{'ra-s}(\text{ra}^2\text{s})$ . Ger. -rat<sup>1</sup>is. A hydrosulphide. [B. 95.]

**SULPHOLEIC ACID**, **SULPHOLINIC ACID**, n's.  $\text{Su}^3\text{lf-o-l-e}^2\text{'i}^2\text{k}$ , -l-in<sup>1</sup>i<sup>2</sup>k. Fr. *acide sulfoléique*. An acid obtained by the action of sulphuric acid on vegetable oils. When concentrated it is a yellowish liquid with a neutral reaction. It possesses remarkable properties as a solvent, and has been recommended as a substitute for vaseline, oleic acid, glycerin, etc., for external use. [Therap. Gaz., "Nov.", 1889, p. 763 (a, 50).]

**SULPHOMANNITIC ACID**, n.  $\text{Su}^3\text{lf-o-ma}^2\text{n-i}^2\text{t}^1\text{i}^2\text{k}$ . Fr. *acide sulfomannitique*. A substance obtained by treating the product of the reaction of sulphuric acid on mannite with barium carbonate. [B. 88 (a, 14).]

**SULPHONACETIC ACID**, n.  $\text{Su}^3\text{lf-on-a}^2\text{s-et}(\text{e}^2\text{t})^1\text{i}^2\text{k}$ . Fr. *acide sulfo-acétique* (ou *sulfo-acétique*). Ger. *Sulfonacetsäure*, *Sulfoëssigsäure*. A dibasic acid,  $\text{C}_2\text{H}_4\text{SO}_6$ , obtained by the action of sulphur anhydride on hot acetic acid. [B. 4; B. 3 (a, 14, 38).]

**SULPHONAL**, n.  $\text{Su}^3\text{lf-o-n}^1\text{l}$ . Ger. *Sulfonal*. Diethylsulphonedimethylmethane,  $\text{C}_7\text{H}_{16}\text{S}_2\text{O}_4 = \text{C}_2\text{H}_5\text{SO}_2\text{C}(\text{CH}_3)_2\text{SO}_2\text{C}_2\text{H}_5$ , occurring as colorless prismatic crystals. It is odorless and nearly or quite tasteless, and has decided hypnotic qualities. [B. 270 (a, 38); "Am. Jour. of Pharm.," June, 1888, p. 273; "N. Y. Med. Jour.," July 7, 1888, p. 9.]

**SULPHONE**, n.  $\text{Su}^3\text{lf-on}$ . 1. A bivalent radicle,  $(\text{SO}_2)''$ , in which the sulphur is a hexad,  $\text{S}^{\text{VI}} = \text{O}$ . 2. A compound of s. (1st def.) in which both free valences are satisfied by radicles containing carbon. [B. 3; B. 270 (a, 38).]

**SULPHONIC ACIDS**, n. pl. Fr. *acides sulfoniques*. Ger. *Sulfonsäuren*. See SULPHONIC ACIDS.

**SULPHOPHENATE**, n.  $\text{Su}^3\text{lf-o-fe}^2\text{n'at}$ . Lat., *sulphophenas*. Fr. *sulphophénate*. See SULPHOCARBOLATE.

**SULPHOPHÉNOL** (Fr.), n.  $\text{Su}^3\text{lf-o-fa-nol}$ . See ASEPTOL.

**SULPHOPHENOLIC ACID**, n.  $\text{Su}^3\text{lf-o-fe}^2\text{n-o}^2\text{l}^1\text{i}^2\text{k}$ . Phenol-sulphonic acid. [B. 2.]

**SULPHOPURPURIC ACID**, n.  $\text{Su}^3\text{lf-o-pu}^2\text{'r-pu}^2\text{'ri}^2\text{k}$ . Fr. *acide sulfopurpurique* (ou *sulfopurprique*). Ger. *Phinicienschwefelsäure*, *Purpurischwefelsäure*, *Phiniciensulphuric acid*,  $\text{C}_{16}\text{H}_9\text{N}_7\text{O}_2(\text{SO}_2\text{H})$ , a reddish-purple powder. [B. 93, 270 (a, 38).]

**SULPHOQUINIC ACID**, n.  $\text{Su}^3\text{lf-o-ki}^2\text{w}^1\text{i}^2\text{n}^1\text{i}^2\text{k}$ . See QUININE-sulphuric acid.

**SULPHOSALICYLIC ACID**, n.  $\text{Su}^3\text{lf-o-sa}^2\text{l-i}^2\text{s-i}^2\text{l}^1\text{i}^2\text{k}$ . Fr. *acide sulfosalicylique*. Ger. *Sulfosalicylsäure*. An acid,  $\text{C}_6\text{H}_4(\text{SO}_2\text{H})(\text{OH})(\text{CO}_2\text{H}) = \text{C}_6\text{H}_4\text{SO}_6$ , occurring as long, thin, hygroscopic, acicular crystals. [B. 3, 93 (a, 14, 38).]

**SULPHO-SALT**, n.  $\text{Su}^3\text{lf-o-sa}^2\text{lt}$ . Fr. *sulfosel*. A salt in which sulphur replaces an equivalent amount of oxygen. Designated by the prefix *sulpho-* or *thio-*. [B.]

**SULPHOSINAPIC ACID**, n.  $\text{Su}^3\text{lf-o-si}^2\text{n-a}^2\text{p}^1\text{i}^2\text{k}$ . Fr. *acide sulfosinapique*. Ger. *Sulfosensäure*. See ALLYLIDITHIOCARBAMIC ACID.

**SULPHOSTIBIAS** (Lat.), n. f.  $\text{Su}^3\text{lf}(\text{su}^3\text{lf})\text{-o}(\text{o}^2)\text{-stib}^1\text{'i}^2\text{s}^1\text{'i}^2\text{s}$  (a<sup>2</sup>s). Ger. -at<sup>1</sup>is. See THIOANTIMONATE. [B.]—S. *calcicus*. See CALCIUM THIOANTIMONATE.—S. *natricus* cum aqua. See SODIUM THIOANTIMONATE.

**SULPHOSULPHATE**, n.  $\text{Su}^3\text{lf-o-su}^3\text{lf'at}$ . A thiosulphate. [B.]

**SULPHOSULPHURIC**, adj.  $\text{Su}^3\text{lf-o-su}^3\text{lf-i}^2\text{'r}^1\text{i}^2\text{k}$ . See THIOSULPHURIC.

**SULPHOVINATE**, n.  $\text{Su}^3\text{lf-o-vin'at}$ . Fr. *sulfovinat*. A salt of sulphovinic acid. [a, 14.]

**SULPHOVINIC**, adj.  $\text{Su}^3\text{lf-o-vin}^1\text{'i}^2\text{k}$ . Produced by the action of sulphuric acid upon wine or alcohol. [B.]—S. *acid*. See under ETHYL sulphate.

**SULPHOXAMIDE**, n.  $\text{Su}^3\text{lf-o-x'a}^2\text{m-i}^2\text{d}(\text{id})$ . See CYANOGEN disulphhydrate.

**SULPHOXIARSENIC ACID**, n.  $\text{Su}^3\text{lf-o-x-i}^2\text{-a}^2\text{rs-e}^2\text{n}^1\text{i}^2\text{k}$ . See ARSENIC oxydisulphide.

**SULPHOXYBENZOIC ACID**, n.  $\text{Su}^3\text{lf-o-x-i}^2\text{-be}^2\text{nz-o}^1\text{'i}^2\text{k}$ . Benzoic acid in which one atom of hydrogen is replaced by hydroxyl and another by the radicle  $\text{SO}_2\text{OH}$ . *Orthos' acid* is sulphosalicylic acid (q. v.). *Paras' acid* is also known. [B.]

**SULPHOXYMETHYLIC ACID**, n.  $\text{Su}^3\text{lf-o-x-i}^2\text{-meth-i}^2\text{l}^1\text{i}^2\text{k}$ . Fr. *acide sulfoxy-méthylique*. A very stable substance,  $\text{CH}_3\text{OH}\cdot\text{SO}_3\text{H}$ , isomeric with methylsulphuric acid. [B. 93 (a, 14).]

**SULPHUME**, n.  $\text{Su}^3\text{lf-u}^2\text{m}$ . A proprietary name for a preparation which is "little else than an aqueous solution of some of the higher sulphides of sodium and potassium saturated with sulphur." [Squibb, "Ephemeris," etc., Feb., 1893, p. 63.]

**SULPHUR** (Lat.), n. n.  $\text{Su}^3\text{lf}(\text{su}^3\text{lf})\text{u}^2\text{r}(\text{u}^2\text{r})$ . Gen. *sulph'uris*. Gr. *θειον*. Fr. *soufre*. Ger. *Schwefel*. It., *zolfo*. Sp., *azufre*. Written also *sulfur*. 1. A non-metallic element occurring in nature both free and combined. As obtained in nature it forms yellow transparent rhombic crystals, insoluble in water, and only slightly soluble in alcohol or ether, but very soluble in carbon disulphide, in benzene, in petroleum, and in oil of turpentine. It has a slight taste, and on rubbing acquires a peculiar odor. The sp. gr. of this variety of s. is 2.05, and it melts at 114.5° C. to form a clear yellow liquid. When this liquid is cooled till a crust has formed over its surface, and the underlying liquid is poured off, the s. lining the sides of the vessel recrystallizes in long, thin, transparent, monoclinic prisms, constituting *monoclinic s.*, which has a sp. gr. of 1.96 and melts at 120° C. The s. of commerce (cf. *S. caballinum*) is obtained by fusing native s., and this in turn is purified by sublimation, condensing to form flowers of s. When s. is heated to over 200° C., the molten substance becomes dark and viscid (cf. *Plastic s.*), but the viscosity diminishes on subsequently increasing the temperature. S. unites directly with many elements and radicles to form the sulphides. In combination with oxygen it enters into the formation of sulphurous, sulphuric, hyposulphurous, thiosulphuric, dithionic, trithionic, and pentathionic acids, as well as of the salts of these acids. In composition it acts usually as a bivalent radicle, and the compounds so formed have a marked analogy to the compounds of oxygen. In other cases s. acts as a quadrivalent and sexvalent radicle. Atomic weight, 31.98; symbol, S. [B. 3, 5.] See also *Insoluble s.*, *Roll s.*, and *Washed s.* 2. Of Paracelsus, the combustible part of the human body. [H.]—**Acidum sulphuris volatile**. See ANTIMONIUM clyssus.—**Alcohol of s.**, **Alcohol sulphuris**. 1. Carbon disulphide. [B. 81, 97.] 2. Flowers of s. in fine powder. [Sir H. Davy (B. 39).]—**Alkaline s. ointment**. See *Unguentum sulphuris alkalinum*.—**Astrum sulphuris**. See *Sulphuris ASTRUM*.—**Balsam of s.** Lat., *balsamum sulphuris*. Fr., *baume de soufre*. A solution of s. in linseed-oil. [B.]—**Balsamum sulphuris anisatum**. A solution of s. in oil of aniseed. [B. 119.]—**Balsamum sulphuris Rulandi**. A solution of s. in linseed-oil or nut-oil. [L. 45.]—**Balsamum sulphuris simplex**. A preparation made by digesting flowers of s. with from four to ten times as much almond-oil, nut-oil, or olive-oil, and straining; or by digesting 2 parts of flowers of s., 18 of oil of poppy, and 6 of wine for eight days, and boiling till the moisture is dissipated. [B. 119 (a, 38).]—**Balsamum sulphuris terebinthinatum**. See *OLEUM TEREBINTHINÆ sulfuratum*.—**Beguin's volatile spirit of s.** See *LIQUOR fumans Boyllii*.—**Ceratum sulphure**. See *CERAT soufre* and cf. *Unguentum sulphuris*.—**Confectio** (seu *Electuarium*) **sulphuris** [Br. Ph.]. Fr., *électuaire de soufre, opiat de soufre*. Ger., *Schwefellutwerge*. A preparation made by rubbing together 4 oz. of sublimed s., 1 oz. of acid potassium tartrate in powder, 4 fl. oz. of syrup of orange-peel, and 18 grains of powdered tragacanth. [B. 81 (a, 21); B. 95.]—**Emplastrum sulphuris**. A plaster made by melting together 3 parts of flowers of s., 12 of olive-oil, and 15 of yellow wax, and adding 30 of myrrh; or by melting together 3 parts each of oleum terebinthinæ sulphuratum, yellow wax, and colophony, and adding 9 of myrrh. [B. 119 (a, 38).]—**Flores sulphuris**. See *Flores of s.*—**Flores sulphuris loti**. See *Washed s.*—**Flowers of s.** Fr., *fleurs de soufre*. Ger., *Schwefelblumen*. Sublimed s. obtained in the form of light powdery flakes. [B.]—**Glyceritum cum sulphure** [Fr. Cod., 1866]. Fr., *glycéré de soufre*. A preparation made by thoroughly mixing 1 part of sublimed and washed sulphur with 4 parts of glycerinum amyli. [B. 113 (a, 14).]—**Golden s.** See *S. auratum*.—**Hepar sulphuris**. See *POTASSA sulphurata* (1st def.).—**Hepar sulphuris volatile**. See *LIQUOR fumans Boyllii*.—**Insoluble s.** A modification of s., being that portion of sublimed s. which is insoluble in carbon disulphide. [B.]—**Iodetum sulphuris cum sulphure**, **Ioduretum sulphuris**. See *S. iodide*.—**Lac sulphuris**. See *Precipitated s.*—**Liver of s.** See *POTASSA sulphurata*.—**Magisterium sulphuris**, **Magistery of s.**, **Milk of s.** Lat., *lac sulphuris*. Ger., *Schwefelmilch*. See *Precipitated s.*—**Monoclinic s.** See under *S.*—**Oil of s.** 1. Sulphurous acid obtained by concentrating spirit of s. 2. *Liquor fumans Boyllii*. [B. 97, 98.]—**Oleum sulphuris**. 1. See *ANTIMONIUM clyssus*. 2. Of Beguin, see *LIQUOR fumans Boyllii*.—**Pilule e ammoniaco cum sulphure stibato**. Fr., *pilules pectorales*. Two-grain pills containing 1 part of antimony pentasulphide made up with 8 parts of gum ammoniac and 8 parts of licorice [Bruns. Ph., 1777], or with 6 parts of gum ammoniac, 6 of extract of senega, and 3 of powdered senega [Hamb. Ph., 1835]. [B. 119.]—**Plastic s.** S. obtained by rapidly cooling the melted s. heated to above 200° C. It forms a tenacious, transparent, semi-solid mass so elastic that it can be drawn out into threads. [B.]—**Precipitated s.** Lat., *s. precipitatum* [U. S. Ph. Br. Ph.], *lac sulphuris*, *sulfur præcipitatum* [Ger. Ph. Fr. Cod.]. Fr., *soufre précipité*. Ger., *präcipitirter Schwefel*, *Schwefelniederschlag*. S. obtained as a whitish amorphous powder, devoid of taste and odor, by precipitation of a solution of s. in milk of lime with hydrochloric acid. [B.]—**Pulvis ex sulphure stibato**

**rubro.** See *PULVIS kermesinus*.—**Pure liquid s.** See *SULPHURE*.—**Roll s.** Lat. *s. in baculis*. Fr. *soufre sublimé* [Fr. Cod.] (ou en canon). Ger. *Stangenschwefel*. Sublimed s. fused and cast into rolls. [B.]—**Ruby s.** See *ARSENIC disulphide*.—**Spirit of s.** Sulphurous acid obtained by burning sulphur and dissolving the fumes in water. [B, 97.] Cf. *Spiritus sulphuris*.—**Spiritus sulphuris (per campanam).** See *ANTIMONY clyssus*.—**Spiritus sulphuris volatiliss.** See *Liquor fumans Boylei*.—**Stick s.** See *Roll s.*—**Sublimed s.** Lat. *sulphur sublimatum* [U. S. Ph.]. S. obtained by sublimation in the form of a light microcrystalline powder; usually melted after sublimation and cast into rolls. [B.]—**S. antimoniatus fuscum.** See *ANTIMONY tersulphuretum precipitatum*.—**S. auratum.** Antimony pentasulphide. [B.]—**S. auratum liquidum.** See *Tinctura ANTIMONII saponata*.—**S. auratum saponatum.** See *Sapo ANTIMONII*.—**S. balsam.** See *Balsam of s.*—**S. bromide.** See *BROMINE disulphide*.—**S. caballinum.** Ger. *Rosenschwefel*. Crude s. powdered. The commercial article frequently consists of gray earth mixed with a little flowers of s. [B, 270 (a, 38)].—**S. carburet.** See *CARBON disulphide*.—**S. chloride.** See *S. monochloride*, *S. dichloride*, and *S. tetrachloride*.—**S. depuratum.** See *Washed s.*—**S. dichloride.** A substance,  $\text{SCl}_2$ , occurring as a dark-colored unstable liquid. [B, 3.]—**S. dioxide.** Fr. *dioxyde de soufre*. Sulphurous oxide, sulphurous anhydride; a colorless gas,  $\text{SO}_2$ , of suffocating and irritating odor, formed by the combustion of sulphur and by the action of certain metals on sulphuric acid. It may be condensed into a liquid boiling at  $-8^\circ\text{C}$ , and has also been obtained in the solid form. Water dissolves 80 times its volume of the gas at  $0^\circ\text{C}$ . and 40 times its volume at  $20^\circ\text{C}$ , the solution having an acid reaction and containing sulphurous acid. S. dioxide has a strong affinity for the oxygen of water, decomposing the latter with evolution of hydrogen; and, owing to the energy with which the nascent hydrogen combines with organic substances, s. dioxide in the presence of moisture acts as a powerful bleaching and disinfecting agent. [B, 3.]—**S. diphosphide.** A highly inflammable, yellow liquid,  $\text{SP}_2$ , which fumes when exposed to the air and has a very disagreeable odor. [B, 3.]—**S. diselenide.** A yellow substance,  $\text{SeS}_2$ . [B.]—**S. embryonatum.** Antimony pentasulphide. [B, 200.]—**S. fluoride.** A compound of s. and fluorine; a colorless fuming gas which possesses the property of etching glass. [B.]—**S. griseum.** See *S. caballinum*.—**S. hexiodide.** A crystalline substance,  $\text{SI}_6$ . [B, 3.]—**S. hydride.** A compound of s. and hydrogen. Two are known: sulphureted hydrogen,  $\text{H}_2\text{S}$ , and hydrogen persulphide,  $\text{H}_2\text{S}_2$  (see these under HYDROGEN). [B.]—**S. in baculis.** See *Roll s.*—**S. iodide.** Lat. *sulphuris iodium*. A compound of s. and iodine. Two s. iodides are known: *S. moniodide*, *s. subiodide*, the iodide of s. of the various pharmacopœias,  $\text{S}_2\text{I}_2$  (also known as iodine disulphide), a dark-gray crystalline substance; and *s. hexiodide*. [B.]—**Sulphuris flores.** See *Flowers of s.*—**S. lotum.** See *Washed s.*—**S. lozenge.** Of Garrod, a lozenge containing 5 grains of s. and 1 grain of cream of tartar; used in hepatic colic, hæmorrhoids, and rectal hæmorrhage. [N. Y. Med. Jour., July 13, 1889, p. 47 (a, 50)].—**S. monochloride.** A substance,  $\text{S}_2\text{Cl}_2$ , forming a dark-yellowish oily liquid which readily dissolves s. [B, 3.]—**S. moniodide.** See *S. iodide*.—**S. ointment.** See *Unguentum sulphuris*.—**S. oxide.** See *S. dioxide*, *S. trioxide*, and *S. sesquioxide*.—**S. oxytetrachloride.** A substance,  $\text{S}_2\text{O}_4\text{Cl}_4$ , occurring as a white crystalline body, of very pungent, irritating odor. It readily decomposes under the action of heat or of moisture. [B, 3.]—**S. phosphide.** See *S. tetrachloride* and *S. diphosphide*, and cf. *PHOSPHORUS sulphide*.—**S. precipitatum.** See *Precipitated s.*—**S. purgans universale.** See *PANACRA antimoniatis*.—**S. rubrum.** Kermes mineral. [B, 119.]—**S. sesquioxide.** A crystalline substance,  $\text{S}_2\text{O}_3$ , of a bluish-green color. [B, 3.]—**S. stibiatum aurantiacum.** Antimony pentasulphide. [B, 48.]—**S. stibiatum rubrum.** See *ANTIMONY trisulphide*.—**S. subchloride.** See *S. monochloride*.—**S. subiodide.** See *S. iodide*.—**S. sublimatum.** 1. Of the U. S. Ph., Netherl. Ph., Norw. Ph., and Swed. Ph., sublimed s. 2. Of the Br. Ph. and Dan. Ph., washed s. [B, 95 (a, 38)].—**S. sublimatum clotum.** See *Washed s.*—**S. sublimatum venale.** See *Sublimed s.*—**S. tetrachloride.** An unstable yellowish-brown liquid,  $\text{SCl}_4$ . [B, 3.]—**S. tetrachloride.** A colorless, transparent, highly inflammable, oily liquid,  $\text{SP}_4$ , which fumes when exposed to the air, and has the odor of phosphorus. It may also be obtained in a solid form. [B, 3.]—**S. trioxide.** Sulphuric anhydride; a substance,  $\text{SO}_3$ , which under ordinary circumstances forms transparent prismatic crystals melting at  $16^\circ\text{C}$ . and boiling at  $46^\circ\text{C}$ , but may also be obtained in the form of acicular crystals melting at  $50^\circ\text{C}$ . It is very hygroscopic, absorbing water from the atmosphere with the evolution of white fumes, and when thrown into water combines with it energetically, forming sulphuric acid. [B, 3.]—**S. venale.** See *Roll s.*—**S. vivum.** Native s. [A, 325 (a, 48)].—**Tabletæ sulphuris.** Fr. *tablettes de soufre*. Sp. *tabletas de azufre*. Ten-centigramme lozenges consisting of 100 parts of washed s. with 900 of sugar, 10 of tragacanth, and 90 of orange-flower water [Fr. Cod., Swiss Ph.], or with 892 of sugar, 8 of tragacanth, and enough water [Belg. Ph.]; or 125-milligramme lozenges consisting of 124 parts of washed s., 75 of sugar, and enough tragacanth and rose-water [Sp. Ph.]. [B, 95 (a, 38)].—**Unguentum sulphuris.** Fr. *pommade de soufre*. Ger. *Schwefelsalbe*. Sp. *pomada de azufre*. An ointment consisting of 3 parts of sublimed s. mixed with 7 of benzoated lard [U. S. Ph.]; or of 2 of sublimed s. mixed with 8 of benzoated lard [Br. Ph.]; or of 1 part of washed s. mixed with 1 of sweet-almond-oil and 8 parts of benzoated lard (if for veterinary use, 1 part of sublimed s. mixed with 3 parts of lard) [Fr. Cod.]. The Fr. Cod. has also an ointment called *pommade au soufre précipité*, in which precipitated s. takes the place of the washed s. in the formula just given. The Belg. and Swiss preparations consist of 6 parts of washed s. with 21 of lard and 3 of olive-oil [Belg. Ph.]; (40 of lard and 4 of olive-oil [Swiss Ph.]). The other ph's direct the use of washed s. mixed with from two to four times as much lard; the older ph's ordered flowers of s. in the same proportions, and sometimes a little oil of bergamot.

[B, 95, 119 (a, 38)].—**Unguentum sulphuris alkalinum** [U. S. Ph.]. Fr. *pommade antipsorique* [Fr. Cod.]. Sp. *pomada anti-psórica* [Sp. Ph.]. Helmerich's ointment; a preparation consisting of 20 parts of washed s. and 10 of potassium carbonate rubbed up with 5 of water and mixed with 65 of benzoated lard [U. S. Ph.]. The Fr. and Sp. Ph's order 10 parts each of potassium carbonate, water, and olive-oil, 20 of washed s., and 70 of lard; and the Belg. Ph. orders 174 parts of washed s., 87 of potassium carbonate, 44 of water, and 695 of lard. [B, 95 (a, 38)].—**Unguentum sulphuris compositum.** An ointment of 30 parts of washed s. (sublimed s. [Norw. Ph., Swed. Ph., Finn. Mil. Ph.]) with 20 of prepared chalk, 60 each of lard and potash soap, and 30 of tar [Austr. Ph., Norw. Ph., Swed. Ph., Finn. Mil. Ph.] (with 20 each of prepared chalk and yellow wax, 40 of lard, 60 of potash soap, and 30 of tar [Hung. Ph.]; with 240 of lard [Ger. Ph.], or 195 of lard and 45 of olive-oil [Swiss Ph.], or 210 of lard and 30 of laurel-berries [Russ. Ph.] and 30 of zinc sulphate [Ger. Ph., Swiss Ph., Russ. Ph.]); or consisting of 32 parts of sublimed s., 16 of zinc sulphate, and 144 of lard [Netherl. Ph.]. [B, 95 (a, 38)].—**Unguentum sulphuris iodidi** [Br. Ph.]. An ointment of 5 parts of s. iodide, 15 of solid paraffin, and 55 of petrolatum. [B, 95 (a, 38)].—**Vegetable s.** See *Lycoperidium* (2d def.).—**Virgin s.** Native s. forming transparent crystalline masses. [B, 3.]—**Volcanic s.** Native s. forming opaque crystalline masses found in the volcanic districts of Sicily. [B, 3.]—**Washed s.** Lat. *s. lotum* [U. S. Ph.], *sulphur depuratum* [Ger. Ph.], *sulphur lotum* [Fr. Cod.]. Fr. *soufre sublimé lavé*. Ger. *gereinigter Schwefel*. Sublimed s. freed from traces of sulphuric acid, etc., by washing with dilute ammonia water. [B.]

**SULPHURARIA** (Lat.), n. n. pl.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-a}(\text{a}^3)\text{-ri}^2\text{-a}^2$ . Fr. *sulfuraires*. Filamentous *Algae*, of the *Cyanophyceæ* (including *Beggiatoa*, *Oscillaria*, *Ulothrix*, etc.), that grow in sulphurous springs and partly constitute baregin. [B, 93 (a, 14)].

**SULPHURATED**, adj.  $\text{Su}^2\text{lf}(\text{u}^2\text{r})\text{-at-e}^2\text{d}$ . Lat. *sulphuratus*. Fr. *sulfuré*. Ger. *geschwefelt*, *schwefelig*. Containing or combined with sulphur. [a, 38.]

**SULPHURATO-STIBIATUS** (Lat.), adj.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-at}(\text{a}^2\text{t})^2\text{-o}(\text{o}^3)\text{-st}^2\text{b}^2\text{-i}^2\text{a}(\text{a}^2\text{t})^2\text{-u}^2\text{s}(\text{u}^4\text{s})$ . Combined with sulphur and containing antimony. [B.]

**SULPHURATO-TEREBINTHINATUS** (Lat.), adj.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-at}(\text{a}^2\text{t})^2\text{-o}(\text{o}^3)\text{-te}^2\text{r-e}^2\text{b}^2\text{i}^2\text{n}^2\text{th-i}^2\text{n}^2\text{-at}(\text{a}^2\text{t})^2\text{-u}^2\text{s}(\text{u}^4\text{s})$ . Containing sulphur and turpentine. [B.]

**SULPHURATUM** (Lat.), n. n.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-at}(\text{a}^2\text{t})^2\text{-u}^2\text{m}(\text{u}^4\text{m})$ . A sulphide. [B.]

**SULPHURATUS** (Lat.), adj.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-at}(\text{a}^2\text{t})^2\text{-u}^2\text{s}(\text{u}^4\text{s})$ . Sulphurated; with the name of a base, the sulphide of that base.

**SULPHUREA** (Lat.), n. f.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-e}(\text{a})^2\text{a}^2$ . See *THIOUREA*.

**SULPHUREO-ACIDUS** (Lat.), adj.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-e}^2\text{-o}(\text{o}^3)\text{-a}^2\text{s}(\text{a}^2\text{k})\text{-i}^2\text{d-u}^2\text{s}(\text{u}^4\text{s})$ . Acid and containing sulphur. [B.]

**SULPHURET**, n.  $\text{Su}^2\text{lf}(\text{u}^2\text{r})\text{-e}^2\text{t}$ . See *SULPHIDE*.

**SULPHURETED**, adj.  $\text{Su}^2\text{lf}(\text{u}^2\text{r})\text{-e}^2\text{-e}^2\text{d}$ . Combined with sulphur. [B.]

**SULPHURETUM** (Lat.), n. n.  $\text{Su}^2\text{lf}(\text{su}^4\text{lf})\text{-u}^2\text{r}(\text{u}^4\text{r})\text{-et}(\text{at})^2\text{-u}^2\text{m}(\text{u}^4\text{m})$ . See *SULPHIDE*.—**S. calcicum.** See *CALX sulphurata*.—**S. ferrosium.** Iron monosulphide obtained by melting sulphur in a vessel and stirring it with an iron rod heated to white heat [Swed. Ph.]; or by heating a bar of iron to white heat, applying sulphur, allowing the product to drop into water, and drying [Finn. Ph.]. [B, 95 (a, 38)].—**S. hydrargyricum.** See *RED MERCURY sulphide*.—**S. hydrargyricum et sulphidum stibiosum.** See *ÆTHIOPS antimoniatis*.—**S. hydrargyricum et sulphur.** See *RED MERCURY sulphide*.—**S. hydrargyricum nigrum.** See *BLACK MERCURY sulphide*.—**S. hydrargyricum rubrum** (see *sublimatum*). See *RED MERCURY sulphide*.—**S. stibico-hydrargyricum.** See *MERCURY and antimony sulphide*.—**Unguentum sulphureti calcici.** A mixture of calcium sulphide with eight times as much lard. [B, 95 (a, 38)].

**SULPHURIC**, adj.  $\text{Su}^2\text{lf}(\text{u}^2\text{r})\text{-i}^2\text{k}$ . Lat. *sulphuricus*, *sulfuricus*. Fr. *sulfurique*. Containing sulphur combined with three atoms of oxygen. [B.]—**S. anhydride.** The anhydride of s. acid; sulphur trioxide. [B.]—**S. ether.** See *ETHYL ETHER*.

**SULPHURIC ACID**, n.  $\text{Su}^2\text{lf}(\text{u}^2\text{r})\text{-i}^2\text{k}$ . Lat. *acidum sulphuricum* (see *sulfuricum*). Fr. *acide sulfurique* (ou *vitrifique*). Ger. *Schwefelsäure*. Oil of vitriol. The name was originally applied to sulphur trioxide ( $\text{SO}_3$ ), still sometimes called anhydrous s. a., but is now given to the compound,  $\text{H}_2\text{SO}_4$ , of this substance with water. When obtained perfectly pure and free from water, by strongly cooling the distilled acid, s. a. forms crystals, melting at  $105^\circ\text{C}$ , and after fusion remaining liquid even when cooled below  $0^\circ\text{C}$ . As ordinarily obtained by distillation, it contains about 2 per cent. of water. It is a colorless, oily liquid, of strongly acid reaction, powerfully corrosive, and fuming when raised to a temperature of  $30^\circ\text{C}$ . It has a strong affinity for water, absorbing it from the atmosphere and from solids, with considerable evolution of heat. When hot, the strong acid attacks many metals (silver, mercury, copper, lead, tin, bismuth, and antimony), but does not affect gold or platinum. The dilute acid dissolves zinc, iron, manganese, etc. S. a. also combines with many organic radicles. In forming compounds with metals or radicles, s. a. acts as a powerful dibasic acid, producing a series of sulphates. *Commercial s. a.* (Lat. *acidum sulphuricum crudum* [Ger. Ph.]; Fr. *acide sulfurique du commerce* [Fr. Cod.]) contains various impurities, chiefly lead sulphate and other sulphates, arsenic, traces of other elements, various oxides of nitrogen, and an excess of water. *Official s. a.* (Lat. *acidum sulphuricum* [U. S. Ph., Br. Ph.], *acidum sulfuricum* [Ger. Ph.]; Fr. *acide sulfurique officinal*; Ger. *reine Schwefelsäure*) is distilled from the commercial acid, and contains not less than 96 per cent. [U. S. Ph.] (96.8 per cent. [Br. Ph.], 94 to 97 per cent. [Ger. Ph.]) of the pure acid. The Fr. preparation is repre-

sented as nearly absolutely pure, but is probably of about the strength of the Br. s. a. The sp. gr. of these several preparations is 1.843 (Br. Ph., Fr. Cod.), and not below 1.840 [U. S. Ph.]. [B.]—**ANHYDROUS S. a.** See SULPHUR trioxide.—**Aromatic s. a.** See ACIDUM SULPHURICUM aromaticum.—**Dilute s. a.** Lat., *acidum sulphuricum* (seu *sulfuricum* [Ger. Ph., Fr. Cod.]) *dilutum* [U. S. Ph., Br. Ph.]. Fr., *acide sulfurique diluë* [Fr. Cod.]. Ger., *verdünnte Schwefelsäure*. A solution of pure s. a. in water. The U. S. and Fr. preparations contain about 9.8 per cent. of the pure anhydrous acid (10 per cent. of the official acid), the Br. preparation contains 14.5 per cent. of the pure acid (about 15 per cent. of the official acid), and the Ger. preparation about 16 per cent. of the pure acid. The sp. gr. of the U. S. and Fr. preparations is 1.067, that of the Br. preparation 1.094. [B.]—**English s. a.** Ordinary s. a.; so called to distinguish it from the Nordhausen s. a. [B.]—**Fuming s. a.** Nordhausen s. a. Ger., *Nordhäuser Schwefelsäure*, *Vitriölöl*. Fuming s. a., Nordhausen oil of vitriol; a substance prepared at Nordhausen, in the Hartz Mountains, Germany, by roasting ferrous sulphate. It is a thick, oily liquid, colorless when pure, but usually brownish from a slight admixture of organic matter. It consists essentially of ordinary s. a. containing a variable amount of dissolved sulphur trioxide, and it owes its name of fuming s. a. to the fact that this trioxide readily volatilizes and forms dense white fumes on coming into contact with the aqueous vapor of the air. [B.]—**S.-a. beer.** Lat., *cerevisia acidul sulphurici*, *cerevisia antioctica*. 1. Treacle beer or other mild beer with the addition of a drachm of concentrated s. a. to every gallon. 2. A beer made by mixing 14 lbs. of treacle,  $\frac{1}{2}$  lb. of bruised ginger,  $\frac{1}{4}$  oz. of coriander, 12 $\frac{1}{2}$  gallons of water, and 1 pint of yeast, and adding  $\frac{1}{4}$  oz. of s. a. mixed with 12 oz. of water and  $\frac{1}{4}$  oz. of sodium bicarbonate. [B. 199.]

**SULPHURICUS** (Lat.), adj. Su<sup>1</sup>lf(su<sup>1</sup>lf)-u<sup>2</sup>r(u<sup>4</sup>r)<sup>1</sup>k-u<sup>2</sup>s(u<sup>4</sup>s). Containing sulphuric acid, with the name of a base, the sulphate of that base.

**SULPHUROCARBOLIC ACID**, n. Su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r-o-ka<sup>3</sup>rb-o<sup>1</sup>/i<sup>2</sup>k. A combination of sulphuric and carbolic acids. [a. 48.] Cf. PHENOLSULPHONIC ACID and ASEPTOL.—**Red s. a.** Of Laplace, a mixture of equal parts of 25-per-cent. red carbolic acid and red sulphuric acid; a black, thick fluid, very soluble in water, and an energetic antiseptic. [“N. Y. Med. Jour.” May 4, 1889, p. 500 (a. 50).]

**SULPHUROUS**, adj. Su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r-u<sup>2</sup>s. Lat., *sulphureus, sulfureus*. Fr., *sulfureux*. Ger., *schweflig*. Resembling sulphur; containing sulphur as a quadrivalent radicle. [B.]—**S. anhydride**, **S. oxide**. See SULPHUR dioxide.

**SULPHUROUS ACID**, n. Su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r-u<sup>2</sup>s. Lat., *acidum sulphureum* (seu *sulfureum*). Fr., *acide sulfureux*. Ger., *Schwefligsäure*. A name formerly applied to sulphur dioxide, or sulphurous anhydride, SO<sub>2</sub>, but now applied to the compound of this substance with water, H<sub>2</sub>SO<sub>3</sub>. This is known only in the form of an aqueous solution, which is prepared by passing into water the gas evolved by the action of wood-charcoal on sulphuric acid. A saturated aqueous solution contains rather less than 20 per cent. by weight (69 parts by volume) of the gas at 0° C., and a little more than 10 per cent. by weight (about 36 parts by volume) at 20° C. The official solution of the U. S. Ph. contains about 3.5 per cent. of the gas, and has a sp. gr. of 1.022; that of the Br. Ph. has a sp. gr. of 1.04 and contains 7.5 per cent. of the gas. The solution is a colorless liquid of sulphurous odor, acid sulphurous taste, and strongly acid reaction. In composition s. a. acts as a dibasic acid, forming salts called sulphites. [B.]—**Anhydrous s. a.**, **S.-a. gas**. Sulphur dioxide. [B.]

**SULPHUR SPRING**, n. Su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r. A place in Inyo County, California, where there is a gaseous and sulphurous spring. [Anderson (a. 14).]

**SULPHURYL**, n. Su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r-i<sup>2</sup>l. A bivalent radicle, SO<sub>2</sub><sup>1</sup>, contained in sulphuric acid, which may be regarded as s. dihydrate (dihydroxide), SO<sub>2</sub>(OH)<sub>2</sub>. [B.]—**S. bromide**. A white crystalline substance, SO<sub>2</sub>Br<sub>2</sub>. [B. 3.]—**S. chloride**. A colorless liquid, SO<sub>2</sub>Cl<sub>2</sub>, of pungent odor, emitting fumes when exposed to the air, and decomposing on coming into contact with water. [B. 3; B. 270 (a. 36).]—**S. hydroxychloride**. Chlorosulphonic acid; so called because it may be regarded as s. combined with a molecule of hydroxyl and an atom of chlorine. [B.]

**SULPHYDRATE**, n. Su<sup>1</sup>lf<sup>1</sup>/id<sup>1</sup>/rat. 1. See HYDROSULPHIDE. 2. A compound of a metal or radicle with the univalent radicle (SH)<sup>1</sup>; so called because such compounds were regarded as salts of sulphuric acid. [B.]

**SULPHIDRIC ACID**, n. Su<sup>1</sup>lf<sup>1</sup>/id<sup>1</sup>/i<sup>2</sup>l. Lat., *acidum sulphydricum* [Fr. Cod.]. Fr., *acide sulfhydrique*. Ger., *Schwefelwasserstoffäure*. Sulphureted hydrogen, especially in aqueous solution. [B.]

**SULPHYDRIN**, n. Su<sup>1</sup>lf<sup>1</sup>/id<sup>1</sup>/i<sup>2</sup>n. A compound of glycerin in which sulphydryl replaces hydroxyl. *Monosulphydryn* (glyceryl thiodioxyhydrate), C<sub>3</sub>H<sub>7</sub>(SH)(OH)<sub>2</sub>, is a thick, colorless liquid which when warmed emits an exceedingly disagreeable odor. *Disulphydryn* (q. v.) and *trisulphydryn* (thioglycerin), C<sub>3</sub>H<sub>7</sub>(SH)<sub>3</sub>, are also liquids. [B. 4.]

**SULPHYDRYL**, n. Sulf<sup>1</sup>/id<sup>1</sup>/i<sup>2</sup>l. A univalent radicle, SH<sup>1</sup>. [B.]

**SULPHYOSULFURIC**, adj. Su<sup>1</sup>lf<sup>1</sup>/ip-o-su<sup>1</sup>lf<sup>1</sup>/u<sup>2</sup>r-i<sup>2</sup>l. See THIONIC.

**SULZ** (Ger.), n. Zults. 1. A place in the Black Forest district, Germany, where there is a saline spring. 2. A place in Eisenburg County, Hungary, where there is a gaseous and saline spring. [a. 14.]

**SULZA** (Ger.), n. Zults<sup>1</sup>. A place in Saxe-Weimar, Germany, where there are bromine and iodine springs. [a. 14.]

**SULZBACH** (Ger.), n. Zults<sup>1</sup>/ba<sup>2</sup>ch<sup>2</sup>. 1. A place in Baden, Germany, where there is a gaseous and saline spring. 2. A place in Alsace-Lorraine where there are gaseous and ferruginous springs.

**SULZBAD** (Ger.), n. Zults<sup>1</sup>/ba<sup>2</sup>d. A place in Alsace-Lorraine where there are gaseous and saline springs. [L. 37, 49 (a. 14).]

**SULZBRUNN** (Ger.), n. Zults<sup>1</sup>/brun. A climatic resort in Suabia where there are gaseous and saline springs. [L. 30, 57 (a. 14).]

**SULZBURG** (Ger.), n. Zults<sup>1</sup>/burg. A place in Baden, Germany, where there is a saline spring. [L. 30, 37 (a. 14).]

**SULZE** (Ger.), **SÜLZE** (Ger.), n's. Zults<sup>1</sup>/e<sup>2</sup>, zu<sup>1</sup>lts<sup>1</sup>/e<sup>2</sup>. See GELATINA (2d def.).—**Wharton'sche S.** See GELATIN of Wharton.

**SULZMATT** (Ger.), n. Zults<sup>1</sup>/ma<sup>2</sup>t. A place in Alsace-Lorraine where there are gaseous and alkaline springs. [L. 49, 57 (a. 14).]

**SUMAC**, n. Su<sup>2</sup>m<sup>1</sup>/a<sup>2</sup>k. Lat., s. Fr., s. See SUMACH.—**Extrait liquide de fruit de s.** (Fr.). See *Extractum rhois glabrae fluidum* (under RHUS).—**Folia et bacca** (seu *semina*) s. See under RHUS coriaria.—**S. à la gale** (Fr.). See RHUS toxicodendron.—**S. des corroyeurs** (Fr.). See RHUS coriaria.—**S. pernicleux** (Fr.). See RHUS perniciosus.

**SUMACH**, n. Su<sup>2</sup>m<sup>1</sup>/a<sup>2</sup>k. Lat., s., *sumac, sumachus*. Fr., *sumac*. Ger., s. See RHUS (2d def.).—**American s.** See CÆSALPINIA coriaria and RHUS typhina.—**Dwarf s.** See RHUS pumila.—**Gifts** (Ger.). **Poison s.** See RHUS toxicodendron and RHUS venenata.—**Scarlet s.** See RHUS glabra.—**Sweet s.** See RHUS aromatica.

**SUMBUL**, n. (treated as Lat. in the ph's). Sum<sup>1</sup>/bul. From Ar. s., an ear or spike. Fr., *racine de s. samboul*. Ger., *Sauvrel, Moschuswurzel*. Of the U. S. Ph. musk-root (the root of *Ferula s.*), found in commerce in light, spongy transverse sections, having a pleasant musk-like smell and a bitter balsamic taste; used chiefly as an antispasmodic and nervine. It contains a soft, translucent balsamic resin, soluble in ether; a volatile oil having the taste of peppermint; another resin soluble in alcohol; a bitter substance soluble in water and alcohol; angelic acid accompanied by a small amount of valerianic acid; wax; gum; and starch. S. is also the name of various other fragrant roots or rhizomes, especially Indian nard. [a. 35].—**Bombay s.** The root of *Dorema ammoniacum*. [a. 24].—**Tinctura s.** A tincture made by macerating 1 part of s. in No. 30 powder for a day with alcohol, then treating in a percolator with alcohol enough to make 10 parts of filtered percolate [U. S. Ph.]; by macerating 2 $\frac{1}{2}$  oz. of s. in No. 40 powder for two days with alcohol, then treating in a percolator with enough more alcohol to obtain 20 fl. oz. of filtrate [Br. Ph.]; or by macerating s. with five times as much 70-per-cent. alcohol for five days [Russ. Ph.]. [B. 95 (a. 38).]—**Racine de s.** (Fr.). **Radix s.**, **s. radix**. See S.

**SUMBULIC ACID**, n. Sum<sup>1</sup>/bul<sup>1</sup>/i<sup>2</sup>k. Fr., *acide sumbulique*. Ger., *Sumbulsäure*. See ANGELIC acid.

**SUMBULINE**, n. Sum<sup>1</sup>/bul<sup>1</sup>/i<sup>2</sup>n. Fr., s. Ger., *Sumbutin*. An alkaloid obtained from sumbul; a whitish, semi-transparent, amber-like mass. [B. 18; B. 93 (a. 14).]

**SUMBULOLIC ACID**, n. Sum<sup>1</sup>/bul<sup>1</sup>/o<sup>1</sup>/i<sup>2</sup>k. Fr., *acide sumbulolique*. Ger., *Sumbuloläure*. See ANGELIC acid.

**SUMEN** (Lat.), n. n. Su<sup>2</sup>m<sup>1</sup>(sum)<sup>1</sup>/e<sup>2</sup>n. Gen., sum<sup>1</sup>/inis. See HYPOGASTRIUM (1st def.).

**SUMMATION**, n. Su<sup>2</sup>m<sup>1</sup>/a<sup>2</sup>/shu<sup>2</sup>n. From *summare*, to sum up. Fr., *summation*. Ger., s., *Summierung*. The production of tetanic contraction in a muscle by the combination of a number of single contractions. [K.]

**SUMMEN** (Ger.), n. Zum<sup>1</sup>/me<sup>2</sup>n. A buzzing or tingling.

**SUMMITAS** (Lat.), n. f. Su<sup>2</sup>m<sup>1</sup>(su<sup>1</sup>m<sup>1</sup>)/mi<sup>2</sup>t-a<sup>2</sup>/s(a<sup>3</sup>s). Gen., -at<sup>1</sup>/is. A top or flowering top of a plant. [a. 35].—**Summitates acetariæ**. The flowering tops of *Artemisia dracunculus*. [a. 35.]

**SUMMIT MINERAL SPRING**, n. Su<sup>2</sup>m<sup>1</sup>/i<sup>2</sup>t. An alkaline spring at Harrison, Cumberland County, Maine. [A. 363 (a. 21).]

**SUMMIT SODA SPRINGS**, n. Chalybeate springs in Placer County, California. [A. 363 (a. 21).]

**SUMMUS** (Lat.), adj., superl. of *superus*. Su<sup>2</sup>m<sup>1</sup>(su<sup>1</sup>m<sup>1</sup>)/mu<sup>2</sup>s-(mu<sup>4</sup>s). Highest; as a n., the uppermost muscle of a group (cf. ARMI s.).

**SUMPFBEERE** (Ger.), n. Zumpf<sup>1</sup>/bar<sup>2</sup>-e<sup>2</sup>. The *Vaccinium oxycoccus* and *Vaccinium uliginosum*. [B. 48 (a. 14); a. 35.]

**SUMPFBEWOHNEND**, **SUMPFIG** (Ger.), adj. Zumpf<sup>1</sup>/be<sup>2</sup>-von-e<sup>2</sup>nd, -ig. See PALUDOSE.

**SUMPFPOREST** (Ger.), n. Zumpf<sup>1</sup>/po<sup>2</sup>rst. See *Sedum palustre*.

**SUMPFSCHEIRM** (Ger.), n. Zumpf<sup>1</sup>/sherm. The genus *Helosciadium*. [a. 35.]

**SUMPFILGE** (Ger.), n. Zumpf<sup>1</sup>/zi<sup>2</sup>lg-e<sup>2</sup>. The genus *Thyssetium*. [a. 35.]

**SUMPFWURZ** (Ger.), n. Zumpf<sup>1</sup>/vurts. The genus *Epipactis*.

**SUMPFZIEST** (Ger.), n. Zumpf<sup>1</sup>/tsest. See *Stachys palustris*.

**SUNBURN**, n. Su<sup>2</sup>n<sup>1</sup>/bu<sup>2</sup>rn. A popular term for chloasma calorium and for erythema calorium. [G.]

**SUNFLOWER**, n. Su<sup>2</sup>n<sup>1</sup>/flu<sup>2</sup>-u<sup>4</sup>/r. The genus *Helianthus*, especially *Helianthus annuus*, also the *Chrysanthemum segetum*, *Inula helenium*, *Calendula officinalis*, etc. [a. 35].—**S.-oil**. See under *HELIANTHUS annuus* and *HELIANTHUS perennis*.

**SUN-ROSE**, n. Su<sup>2</sup>n<sup>1</sup>/roz. See *HELIANTHEMUM* (1st def.).

**SUNSTROKE**, n. Su<sup>2</sup>n<sup>1</sup>/stro<sup>2</sup>k. Lat., *insolatio*. Fr., *coup de soleil*. Ger., *Sonnenstich*. A morbid state due to exposure to great solar heat. It is usually of sudden onset, though it may be preceded by dizziness or a sensation of fullness in the head. In mild attacks there are faintness, syncope, nausea, and vomiting, marked muscular weakness, rapid and feeble pulse, and pyrexia. In severe cases there are loss of consciousness, a tense and irregular pulse, quickened or stertorous respiration, hyperpyrexia, and death from interference with the medullary centres. [a. 34.] Cf. INSOLATION.

**SUPELLECTILE DIOGENIS** (Lat.), n. n.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-e}^2\text{l-}1\text{e}^2\text{kt}^1\text{1}^2\text{-e}^2\text{a}^1\text{di}(\text{de})\text{-o}^2\text{j}(\text{o}^2\text{g})\text{e}^2\text{n-i}^2\text{s}$ . Gen., *-lect'ilis*. The palm of the hand. [A, 322 (a, 21).]

**SUPERABDUCTION**, n.  $\text{Su}^2\text{p-u}^2\text{r-a}^2\text{b-du}^2\text{k'shu}^2\text{n}$ . From *super*, in excess, and *abductio*, abduction. Excessive abduction. [a, 34.] For various words in *Super-*, not here given, see the corresponding forms in *Supra-*.

**SUPERALIMENTATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-a}^2\text{l-i}^2\text{-me}^2\text{nt-a'shu}^2\text{n}$ . From *super*, in excess, and *alimentum*, nourishment. Fr., *suralimentation*. Ger., *Übernahrung*. Of Debove, see *Forced Alim-entation* (2d def.).

**SUPERAXILLARE** (Fr.), adj.  $\text{Su}^2\text{p-e}^2\text{r-a}^2\text{x-el-la}^2\text{r}$ . See *SUPRA-AXILLARY*.

**SUPERBINE**, n.  $\text{Su}^2\text{p-u}^2\text{r-b'en}$ . Ger., *Superbin*. A poisonous, amorphous alkaloid,  $\text{C}_{52}\text{H}_{80}\text{N}_2\text{O}_{17}$ , obtained from the bulb of *Gloriosa superba*. [B, 270 (a, 38).]

**SUPERBUS** (Lat.), adj.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r-b}(\text{e}^2\text{rb})/\text{u}^2\text{s}(\text{u}^4\text{s})$ . From *super*, above. Fr., *superbe*. Proud, haughty; as a n. m., of Leber, the rectus oculi superior muscle, so called because its action gives the face a haughty expression. [L, 41 (a, 14).]

**SUPERCARBONAS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-ka}^2\text{r-b-on'a}^2\text{s}(\text{a}^2\text{s})$ . Gen., *-at'is*. See *SUPERCARBONATE*.—*Liquor ammonii carbonatis ammoniaci pyrooleosi*.—*Solutio supercarbonatis natrii*. See *Liquor sodæ effervescentes*.—*S. ammonicus*. Ammonium sesquicarbonate. See under *AMMONIUM carbonate*.—*S. ammonicus pyrooleosus*. See *AMMONIUM carbonicum pyrooleosum*.

**SUPERCARBONATE**, n.  $\text{Su}^2\text{p-u}^2\text{r-ka}^2\text{r-b'o}^2\text{n-at}$ . Lat., *supercarbonas*. Fr., *surcarbonate*. See *BICARBONATE*.

**SUPERCHELORIDUM** (Lat.), n. n.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-klor-}(\text{ch}^2\text{lor})/\text{i}^2\text{d-u}^2\text{m}(\text{u}^4\text{m})$ . See *PERCHLORIDE*.

**SUPERCILIARIS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-si}^2\text{l}(\text{ki}^2\text{l})/\text{i}^2\text{-ar}(\text{a}^2\text{r})/\text{i}^2\text{s}$ . Fr., *surcilier*. See *CORRUGATOR supercilii*.

**SUPERCILIUM** (Lat.), n. n.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-si}^2\text{l}(\text{ki}^2\text{l})/\text{i}^2\text{-u}^2\text{m}(\text{u}^4\text{m})$ . From *super*, above, and *cilium*, an eyelid or eyelash. Fr., *surcil*. Ger., *Augenbraue*. The eyebrow; an arched eminence of integument which surmounts the upper border of the orbit and supports numerous short, thick hairs, directed obliquely to the surface. It consists of thickened integument connected beneath with the orbicularis palpebrarum, corrugator supercilii, and occipitofrontalis. [F.]—*S. acetabuli*. The lip or elevated margin of the acetabulum. [L.]

**SUPERCOSTALES** (Lat.), n. m. pl.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-ko}^2\text{st-al}(\text{a}^2\text{l})/\text{e}^2\text{z}(\text{a}^2\text{s})$ . From *super*, above, and *costa*, a rib. See *TRANSVERSOCOSTALES*.

**SUPERDISTENTIO**, n.  $\text{Su}^2\text{p-u}^2\text{r-di}^2\text{s-te}^2\text{n'shu}^2\text{n}$ . From *super*, in excess, and *distentio*, a stretching out. Excessive distention. [a, 34.]

**SUPEREXTENSION**, n.  $\text{Su}^2\text{p-u}^2\text{r-e}^2\text{x-te}^2\text{n'shu}^2\text{n}$ . From *super*, in excess, and *extensio*, a stretching. Excessive extension. [a, 34.]

**SUPER-FAMILY**, n.  $\text{Su}^2\text{p-u}^2\text{r-fa}^2\text{m'i}^2\text{-li}^2$ . From *super*, above, and *familia*, a family. A group containing one or more families, yet not of ordinal rank. [L, 343.]

**SUPERFECUNDATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-fe}^2\text{k-u}^2\text{-nd-a'shu}^2\text{n}$ . Lat., *superfecundatio* (from *super*, in excess, and *fœcundare*, to make fruitful). Fr., *superfécundation*, *super-impregnation*. Ger., *Uberschwängerung*. The fecundation of more than one ovule of the same ovulation as the result of separate acts of coitus with one or more males. [A, 61.] Cf. *SUPERFETATION*.

**SUPERFIBRINATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-fi}^2\text{b-ri}^2\text{-n'a'shu}^2\text{n}$ . From *super*, in excess, and *fibrina*, fibrin. See *HYPERINOSIS* (2d def.).

**SUPERFICIALIS** (Lat.), adj.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-fi}^2\text{s}(\text{fi}^2\text{k})/\text{i}^2\text{-al}(\text{a}^2\text{l})/\text{i}^2\text{s}$ . Superficial; as a n., in the m. or f., an organ situated on or close to the surface. [a, 48.]—*S. colli*. See *PLATYSMA myoides*.—*S. costarum*. See *LUMBOCOSTALIS*, n.

**SUPERFICIES** (Lat.), n. f.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-fi}^2\text{s}(\text{fi}^2\text{k})/\text{i}^2\text{-ez}(\text{a}^2\text{s})$ . Gen., *-e'i*. From *super*, above, and *facies*, a face. Fr., *superficie*. See *SURFACE*.—*S. articularis arytaenoides*. The surface upon the cricoid cartilage for articulation with the arytenoid cartilage. [L, 34.]—*S. articularis externa*. See *S. articularis thyroidea*.—*S. articularis fibularis (lateralis)*. A rounded or triangular articular surface on the tibia for articulation with the fibula. [L.]—*S. articularis superior*. See *S. articularis arytaenoides*.—*S. articularis thyroidea*. A depression on the cricoid cartilage for articulation with the thyroid cartilage. [L, 31.]—*S. auricularis*. Fr., *face (ou facette) auriculaire*. 1. The ear-shaped area by which the sacrum articulates with the ilium. 2. The corresponding area of the ilium.—*S. cardiaca*. The inner surface of the lung. [L.]—*S. convexa*. *S. costalis*. The outer surface of the lung. [L.]—*S. diaphragmatica*. The lower surface of the lung. [L.]—*S. externa*. See *S. convexa*.—*S. inferior*. See *S. diaphragmatica*.—*S. mediastinalis*. See *S. cardiaca*.—*S. lunata (ossis coxae)*. That part of the acetabulum that is covered with cartilage. [L, 31 (a, 50).]—*S. lunata radii*. The sigmoid cavity of the radius. [L.]—*S. peronea*. See *S. articularis lateralis*.—*S. petro-occipitalis (ossis temporis)*. The deepened surface covered with cartilage, between the pyramidal portion of the temporal bone and the occipital bone. [L.]—*S. symphyseos pubis*. The surface of the horizontal ramus of the os pubis where it unites with its fellow of the opposite side in the symphysis. [L, 332.]

**SUPERFLEXIO**, n.  $\text{Su}^2\text{p-u}^2\text{r-fe}^2\text{k'shu}^2\text{n}$ . From *super*, in excess, and *flexio*, a bending. Excessive flexion. [a, 34.]

**SUPERFETATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-fe}^2\text{t-a'shu}^2\text{n}$ . Written also, *superfœtation*. Lat., *superfœtatio* (from *super*, in excess, and *fœtus* [q. v.]). Fr., *superfœtation*. Ger., *Ueberfruchtung*, *Nachempf-*

*ängniss*. The supposed fecundation (now held to be impossible) of an ovule proceeding from one ovulation while a fecundated ovum proceeding from a previous ovulation is still in course of utero-gestation. [A, 61.] Cf. *SUPERFECUNDATION*.

**SUPERFUSIO** (Lat.), n. f.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-fu}^2(\text{fu})/\text{zhi}^2\text{-}(\text{si}^2)\text{-o}$ . Gen., *-on'is*. From *super*, in excess, and *fusio*, a pouring out. See *SUFFUSION*.—*Fellis* S. Jaundice.

**SUPERGENUAL**, adj.  $\text{Su}^2\text{p-u}^2\text{r-je}^2\text{n'u}^2\text{-l}$ . Lat., *supergenualis* (from *super*, above, and *genu*, the knee). Situated above the knee. [a, 48.]

**SUPÉRIEUR** (Fr.), adj.  $\text{Su}^2\text{p-a-re-u}^2\text{r}$ . See *SUPERIOR*.—*S. de l'oreille*. See *ATTOLLENS aurem*.

**SUPERIMPOSED**, adj.  $\text{Su}^2\text{p-u}^2\text{r-i}^2\text{m-pozd'}$ . Lat., *superimpositus* (from *superimponere*, to place upon). Fr., *surimposé*. Ger., *überinandergestellt*. Placed one above the other. [a, 35.]

**SUPERINVOLUTION**, n.  $\text{Su}^2\text{p-u}^2\text{r-i}^2\text{n-vo}^2\text{l-u}^2\text{-shu}^2\text{n}$ . From *super*, in excess, and *involutio*, a rolling up. See *HYPERINVOLUTION*.

**SUPERIOR**, adj.  $\text{Su}^2\text{p-er'i}^2\text{-o}^2\text{r}$ . Lat., *s.* (comp. of *superus*) [1st def.], *superus* (2d and 3d def's). Fr., *supère*, *supérieur*. Ger., *obere* (1st def.), *oberständig* (2d def.). 1. Situated on the upper portion of a part or organ; situated on the side next the axis. 2. Placed above another organ; of floral organs, epigynous; of an ovary, not at all adherent to the calyx. [a, 35.] 3. As a Lat. n. m., a muscle occupying a relatively high position. [a, 48.]—*Half-a*. Lat., *semisuperius*. Ger., *halbobersständig*. Partially superior (said of the floral whorls when the ovary is half-inferior). [a, 35.]—*S. auriculæ*, *S. auris*. See *ATTOLLENS aurem*.—*S. mallei*. See *LAXATOR tympani minor*.

**SUPERLACTATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-la}^2\text{kt-a'shu}^2\text{n}$ . From *super*, in excess, and *lactare*, to give suck. Excessive lactation.

**SUPERLIGAMEN** (Lat.), n. n.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-li}^2\text{g-a}(\text{a}^2\text{g})/\text{me}^2\text{n}$ . Gen., *-am'nis*. From *super*, above, and *ligare*, to bind. See *EPIDESMUS*.

**SUPERLIGULA** (Lat.), n. f.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-li}^2\text{g'u}^2\text{l}(\text{u}^4\text{l})\text{-a}^2$ . From *super*, above, and *ligula* (q. v.). See *EPIGLOTTIS* (1st def.).

**SUPERMAXILLOLABIALIS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-ma}^2\text{x}(\text{ma}^2\text{x})/\text{i}^2\text{l}^2/\text{lo}(\text{lo}^2)\text{-lab}(\text{lab}^2\text{b})/\text{i}^2\text{-al}(\text{a}^2\text{l})/\text{i}^2\text{s}$ . From *super*, above, *maxilla*, the jaw, and *labium*, the lip. Fr., *surmaxillo-labial*, *sus-maxillo-labial*. The analogue of the levator labii superioris proprius of man found in most of the lower mammals. [L.]

**SUPERMAXILLONASALIS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-ma}^2\text{x}(\text{ma}^2\text{x})/\text{i}^2\text{l}^2/\text{lo}(\text{lo}^2)\text{-na}^2\text{s}(\text{na}^2\text{s})\text{-al}(\text{a}^2\text{l})/\text{i}^2\text{s}$ . From *super*, above, *maxilla*, the jaw, and *nasus*, the nose. Fr., *sus-maxillo-nasal*. Ger., *grosser (oder pyramidenförmiger) Kiefer der Nase*. Connected with the nose and upper jaw; as a n., a muscle so connected. [L.]—*S. magnus*. 1. See *DILATOR naris lateralis*. 2. The analogue of the levator anguli oris in man found in most of the lower mammals. [L.]—*S. parvus*. A small muscle of the lower mammals, arising from the supermaxillary bone or the internal face of the supernasolabialis, and inserted into the skin of the false nostril and into the inferior turbinated bone. It dilates the nostril. [L, 13.]

**SUPERNASOLABIALIS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-nas}(\text{na}^2\text{s})/\text{o}(\text{o}^2)\text{-lab}(\text{lab}^2\text{b})/\text{i}^2\text{-al}(\text{a}^2\text{l})/\text{i}^2\text{s}$ . From *super*, above, *nasus*, the nose, and *labium*, the lip. Fr., *sus-naso-labial*. The analogue of the levator labii superioris alaeque nasi of man found in most of the lower mammals. [L.]

**SUPERNIDATION**, n.  $\text{Su}^2\text{p-u}^2\text{r-ni}^2\text{d-a'shu}^2\text{n}$ . From *super*, in excess, and *nidus*, a nest. See *HYPERNIDATION*.

**SUPERNUTRITION**, n.  $\text{Su}^2\text{p-u}^2\text{r-nu}^2\text{t-ri}^2\text{-shu}^2\text{n}$ . From *super*, in excess, and *nutrire*, to nourish. See *HYPERTROPHY*.

**SUPER-ORDER**, n.  $\text{Su}^2\text{p-u}^2\text{r-o}^2\text{rd'u}^2\text{r}$ . From *super*, above, and *ordo*, an order. A group containing one or more orders, yet not of the taxonomic rank of a class. [L, 343.]

**SUPEROXALAS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-o}^2\text{x-a}^2\text{l}(\text{a}^2\text{l})\text{-a}^2\text{s}(\text{a}^2\text{s})$ . Gen., *-at'is*. See *SUPEROXALATE*.—*S. calicus*, *S. potassicus*. See *POTASSIUM binoxalate*.

**SUPEROXALATE**, n.  $\text{Su}^2\text{p-u}^2\text{r-o}^2\text{x-a}^2\text{l-at}$ . Lat., *superoxalas*. Fr., *suroxalate*. An acid oxalate. [B.]

**SUPEROXIDIZED**, adj.  $\text{Su}^2\text{p-u}^2\text{r-o}^2\text{x-i}^2\text{d-izd}$ . Fr., *sur-oxy-géné*. Containing an excess of oxygen (said of certain bodies which contain more oxygen united with other elements than the ordinary combining capacities of those elements will allow of). [C. A. Cameron, "Dublin Jour. of Med. Sci.," June, 1882 (B).]

**SUPEROXYDUM** (Lat.), n. n.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-o}^2\text{x-i}^2\text{d}(\text{u}^4\text{d})\text{-u}^2\text{m}(\text{u}^4\text{m})$ . Fr., *sur-oxyde*. See *PEROXIDE*.—*S. manganicum*. See *MANGANESE dioxide*.—*S. plumbosum*. See *Red LEAD oxide*.

**SUPEROXYGENATED**, adj.  $\text{Su}^2\text{p-u}^2\text{r-o}^2\text{x-i}^2\text{-je}^2\text{n-at-e}^2\text{d}$ . See *SUPEROXIDIZED*.

**SUPERPHOSPHATE**, n.  $\text{Su}^2\text{p-u}^2\text{r-fo}^2\text{s'fat}$ . A dihydric phosphate. [B.]

**SUPERPOSED**, adj.  $\text{Su}^2\text{p-u}^2\text{r-pozd'}$ . Lat., *superpositus* (from *superponere*, to place over). Fr., *superposé*, *surposé*. Ger., *obenstehend*, *darübergestellt*. Placed above another; of a member of a flower, placed vertically over another member. [a, 35.]

**SUPERPOSITION**, n.  $\text{Su}^2\text{p-u}^2\text{r-po}^2\text{z-i}^2\text{-shu}^2\text{n}$ . Lat., *superpositio* (from *superponere*, to place over). Ger., *Uebergreifen*. 1. See *CHEVACHEMENT*. 2. The opposition of successive flower-whorls normally alternate. [a, 35.]

**SUPERPUBIOFEMORALIS** (Lat.), n. m.  $\text{Su}^2\text{p}(\text{su}^4\text{p})\text{-u}^2\text{r}(\text{e}^2\text{r})\text{-pu}^2\text{b}(\text{pub})/\text{i}^2\text{-o}(\text{o}^2)\text{-fe}^2\text{m-o}^2\text{r-al}(\text{a}^2\text{l})/\text{i}^2\text{s}$ . From *super*, above, *pubes* (q. v.), and *femur* (q. v.). Fr., *sus-pubio-fémoral*. In solipeds, a muscle representing the pectineus and adductor femoris brevis of man. [L, 13.]

**SUPERSALT**, n.  $Su^2p^2u^2r-sa^4lt$ . From *super*, in excess, and *salt*, salt. Fr., *sursel*. A salt containing an excess of acid.

**SUPERSATURATED**, adj.  $Su^2p^2u^2r-sa^2t^2u^2r-at-e^2d$ . From *super*, in excess, and *saturare*, to saturate. Fr., *sursaturé*. More than saturated (said of certain solutions, e. g., a solution of sodium sulphate, which contain, as the result of dissolving by heat and subsequent cooling, more of a given substance than they are capable of dissolving at an ordinary temperature). [a, 35.]

**SUPERSATURATION**, n.  $Su^2p^2u^2r-sa^2t^2u^2r-a^2shu^2n$ . From *super*, in excess, and *saturatio*, a filling. Fr., *sursaturation*. The process or state of being supersaturated. [a, 35.]

**SUPERSECRECTION**, n.  $Su^2p^2u^2r-se-kre^2shu^2n$ . From *super*, in excess, and *secrevere*, to separate. Fr., *supersécrétion*. Excessive secretion. [a, 34.]

**SUPERSPINALIS** (Lat.), n. m.  $Su^2p^2is(u^2p)^2u^2r(e^2r)^2sp-in(spen)^2al(a^2s)^2i^2s$ . From *super*, above, and *spina*, the spine. See SPINALIS cervicis.—S. *collis*. See S.

**SUPERSPINATUS** (Lat.), n. m.  $Su^2p^2(su^2p)^2u^2r(e^2r)^2sp-in(spen)^2at(a^2t)^2u^2s(u^2s)$ . From *super*, above, and *spina*, the spine. A muscle of solidipes and other domesticated animals, arising from the cartilaginous prolongation of the scapula and the subscapular fossa, and attached by two heads, one going to the external tubercle and the other to the internal tuberosity of the humerus. It is an extensor of the humerus, and has no exact analogue in man. [L, 13.]

**SUPERSTIBIAS** (Lat.), n. m.  $Su^2p^2(su^2p)^2u^2r(e^2r)^2sti^2b^2i^2a^2s$  (a<sup>2</sup>s). Gen., -at<sup>2</sup>i<sup>2</sup>s. An acid antimonate. [B.]—S. *potassicus*. 1. Potassium antimonate. [B, 92.] 2. Of the Fr. Cod., see ANTIMONIUM diaphoreticum lotum.

**SUPERTESSION**, n.  $Su^2p^2u^2r-te^2n^2shu^2n$ . From *super*, in excess, and *tensio*, a stretching. Excessive tension. [a, 34.]

**SUPERVACUATION**, n.  $Su^2p^2u^2r-va^2k-u^2a^2shu^2n$ . From *super*, in excess, and *vacuare*, to make empty. See HYPERCRISIS (1st def.).

**SUPERVOLUTE, SUPERVOLUTIVE**, adj<sup>2</sup>s.  $Su^2p^2u^2r-vo^2l-u^2t^2$ , -vo<sup>2</sup>l<sup>2</sup>u<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>v. Lat., *supervolutus, supervolutivus* (from *volvare*, to roll over). Fr., *supervolutif*. Ger., *übergerollt, überwandlergerollt*. Of plaits, convolute. [a, 35.] See S. *æstivation*.

**SUPERVOMITUS** (Lat.), n. m.  $Su^2p^2(su^2p)^2u^2r(e^2r)^2vo^2m$  (wo<sup>2</sup>m)<sup>2</sup>i<sup>2</sup>t<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Gen., -vom<sup>2</sup>it<sup>2</sup>us(u<sup>2</sup>s). From *super*, in excess, and *vomit*, a vomiting. See HYPEREMESIS.

**SUPIER** (Fr.), n.  $Su^2p-pe-a$ . See SAMBUCUS niger.

**SUPINATION**, n.  $Su^2p^2i^2n-a^2shu^2n$ . Gr., *ὑπέρστροφος*. Lat., *supinatio* (from *supinare*, to bend backward). Fr., s. Ger., *Zurück-drehung*. 1. That posture of the body in which, while it is recumbent, the face looks upward; of the hand, that posture in which the palm is directed upward. 2. The act of assuming or producing such a posture.

**SUPINATOR** (Lat.), n. m.  $Su^2p^2(su^2p)^2i^2n(en)^2at(a^2t)^2o^2r$ . Gen., -or<sup>2</sup>i<sup>2</sup>s. Fr., *supinateur*. Ger., *Rücklingsmuskel, Rückwärtsdreher, Rückwärtsender*. A muscle that effects or assists in supination of the forearm. [L, 343.]—S. *brevis*. See S. *radii brevis*.—S. *brevis accessorius*. See BRACHIOFASCIALIS.—S. *longus*. See S. *radii longus*.—S. *longus accessorius*. An offshoot of the s. longus inserted independently into the radius or occasionally into the ulna. [L, 332.]—S. *radii brevis*. Ger., *kurzer Rückwärts-dreher*. A muscle which arises from the outer and lower portion of the ulna and the adjacent ligaments and, after passing around the upper portion of the radius, is inserted into the outer and palmar surfaces of that bone in its middle third. [L, 31, 142, 332.]—S. *radii longus*. Fr., *élevateur épicondylo-radial*. Ger., *langer Rückwärtsender, Armspeichenmuskel*. A muscle arising from the external supracondylar ridge of the humerus and inserted into the lower end of the radius near the styloid process. [L, 31, 142, 332.]—S. *superior*. See Biceps FLEXOR cubiti.

**SUPINE**, adj.  $Su^2p-in^2$ . Gr., *ὑπνός*. Lat., *supinus*. Ger., *rücklingsgelegt*. 1. Of a part or organ, lying flat with face upward. 2. Procumbent. [a, 35.]

**SUPPLÉANCE** (Fr.), n.  $Su^2p-pla-a^2n^2s$ . Performance of the function of an organ by a different organ. [a, 18.]

**SUPPORT**, n.  $Su^2p-port^2$ . From *sub*, under, and *portare*, to carry. Gr., *ὑποστάσις*. Lat., *sustentamentum*. Fr., *soutien*. Ger., *Erhaltung, Unterstützung*. 1. The act of holding anything up in its place. 2. Anything acting as a supporter. [a, 48.]—S. of the *perineum*. Fr., *soutien du périnée*. Ger., *Unterstützung des Dammes oder des Mittelfleisches*. The act or process of supporting the perineum with the hand during the expulsion of the foetal head, to prevent or moderate its laceration.

**SUPPORTER**, n.  $Su^2p-port^2u^2r$ . Lat., *sustentator*. Fr., *souteneur*. That by means of which anything is supported or held up in its place. [a, 48.]—Abdominal s. See Abdominal BELT.—Hypogastric s. See Hypogastric BELT.—Pile s., Prolapsus ani s. A pad worn over the anus and strapped over the perineum and around the waist. [E.]—Trousseau's pile s. A pear-shaped plug with a handle, which is passed into the rectum. [E.]

**SUPPOSITOR**, n.  $Su^2p-po^2z^2i^2t-o^2r$ . From *supponere*, to place under. An instrument for putting suppositories high into the rectum. [A. B. Taylor, "Am. Jour. of Pharm.," xxxiii, p. 202 (B).]

**SUPPOSITORY**, n.  $Su^2p-po^2z^2i^2t-o^2r$ . Gr., *πρόσος*. Lat., *suppositorium, suppositorius*. Fr., *suppositoire*. Ger., *Suppositorium, Stuhlzapfen, Stechpille*. A preparation designed for introduction into the rectum, urethra, vagina, etc., consisting of a medicinal substance incorporated with an absorbable solid excipient which softens at the temperature of the body. This is usually cacao butter (with soap or tallow [Fr. Cod.] or with a mixture of beef tallow and wax [Russ. Ph.]). The s. is generally molded into a conical (sometimes a cylindrical or spherical) shape. [B, 5, 95]

(a, 38).]—Mercurial suppositories. See Suppositoria HYDRARGYRI.

**SUPPRESSION**, n.  $Su^2p-pre^2sh-u^2n$ . Gr., *ὑπόστασις* (3d def.). Lat., *suppressio* (from *supprimere*, to press down). Fr., s. 1. In botany, the non-appearance of organs normally present. [a, 35.] 2. Repression of the outward manifestations of a morbid condition. 3. The discontinuance of the formation of discharges, especially of secretions or of the menses. [A, 326 (a, 21).]—S. of the menses. 1. That variety of amenorrhœa in which menstruation, after having once been established, ceases from some other cause than impregnation or the climacteric. 2. Suspension of menstruation from pregnancy.—S. of urine. A condition in which the secretion of urine is interfered with in consequence of renal disorder. [a, 34.]

**SUPPRESSION** (Fr.), n.  $Su^2p-pre^2s-e-o^2n^2$ . 1. See SUPPRESSION (Eng.). 2. The discontinuance of the use of a therapeutical measure.

**SUPPURATING**, adj.  $Su^2p^2u^2r-at-i^2n^2$ . Lat., *suppurans*. Fr., *suppurant*. Ger., *eiternd*. See PURULENT.

**SUPPURATION**, n.  $Su^2p^2u^2r-a^2shu^2n$ . Gr., *ἐμπύον, ἐμπύημα, ἐμπύσις*. Lat., *suppuratio* (from *suppurare*, to form pus). Fr., s. Ger., *Eiterung*. The process by which the leucocytes and embryonal cells of an inflammatory product are converted into pus corpuscles. [a, 34.]—Blue s. S. caused by the *Bacillus pyocyaneus*. [a, 34.]—Follicular s. S. limited to a mucous follicle. [a, 34.]—Orange s. Fr., s. *orangée*. Of Verneuil, s. in which the pus is orange-colored. [a, 34.]

**SUPPURATIVE**, adj.  $Su^2p^2u^2r-at-i^2v$ . Lat., *suppurans*. Fr., *suppuratif*. Ger., *eiterig, suppurativ*. 1. Pertaining to suppuration. 2. See PURULENT. 3. Promoting suppuration. [a, 17.]

**SUPRA-ACROMIAL**, adj.  $Su^2p-ra^2-a^2k-rom^2i^2$ . From *supra*, above, and *acromion* (q. v.). Situated above the acromion.

**SUPRA-ACROMIO-TROCHITERIUS** [Gihard] (Lat.), n. m.  $Su^2p(sup)^2ra^2-a^2k(ak)^2-rom^2i^2-o(oi)^2-trok(tro^2ch)^2i^2-e(a)^2i^2-u^2s(u^2s)$ . For deriv., see *Supra*—s, *ACROMION*, and *TROCHITER*. See SPERSPINATUS.

**SUPRA-AURICULAR**, adj.  $Su^2p-ra^2-a^2r-i^2k-u^2l-a^2r$ . From *supra*, above, and *auricula*, the external ear. Ger., s.-a. Situated above the ear. [a, 48.]

**SUPRA-AXILLARY**, adj.  $Su^2p-ra^2-a^2x^2i^2l-ar-i^2$ . Lat., *supra-axillaris* (from *supra*, above, and *axilla* [q. v.]). Fr., *suraxillaire, supraaxillaire*. Ger., *oberwinkelständig*. Situated above the upper angle formed by the leaf with the stem. [a, 35.]

**SUPRACHORIOIDAL**, adj.  $Su^2p-ra^2-kor-i^2o-i^2d^2l$ . From *supra*, above, and *χοριοειδής* (see CHORIOID). Situated above the chorioid plexus or the chorioid. [a, 48.]

**SUPRACHORIOIDEA** (Lat.), n. f.  $Su^2p(sup)^2ra^2-kor(ch^2o)^2r-i^2o(o)^2-i^2d(ed)^2e^2a^2$ . See LAMINA s.

**SUPRACILIARBOGEN** (Ger.), n.  $Zup-ra^2-tsel-e-a^2r^2bog-e^2n$ . See SUPRACILIARY RIDGES.

**SUPRACILIARY**, adj.  $Su^2p-ra^2-si^2l-i^2ar-i^2$ . From *supra*, above, and *cilium*, the eyelid. Fr., *sourcilier*. Ger., *supraciliar*. Situated above the eyebrows.

**SUPRACLAVICLE**, n.  $Su^2p-ra^2-klav^2i^2k-l$ . From *supra*, above, and *clavicula*, the clavicle. See SUPRACLAVICULAR BONE.

**SUPRACLAVICULAR**, adj.  $Su^2p-ra^2-klav^2i^2k-u^2l-a^2r$ . Lat., *supraclavicularis*. Fr., *sus-claviculaire*. Situated above the clavicle. [L, 41 (a, 14).]

**SUPRACLAVICULARIS** (Lat.), adj.  $Su^2p(sup)^2ra^2-klav^2i^2k-u^2l-a^2r$  (klav^2i^2k-u^2l-a^2r) (u^2l-a^2r) (u^2l-a^2r) (u^2l-a^2r). See SUPRACLAVICULAR; as a n., see STERNOCALVICULARIS superior.—S. *medialis*, s. *medius*. See STERNOCALVICULARIS superior.—S. *proprius*. An anomalous muscle extending between the sternal and scapular extremities of the clavicle. [L, 332.]

**SUPRA-COMPOUND**, adj.  $Su^2p-ra^2-ko^2m-pu^2u^2nd$ . Lat., *supracompositus* (from *supra*, above, and *componere*, to put together). Fr., *surcomposé*. Of a compound leaf, having the petiole divided several times. [a, 35.] Cf. SUPRA-DECOMPOUND and DECOMPOSITE.

**SUPRACONDYLAR, SUPRACONDYLAR**, adj<sup>2</sup>s.  $Su^2p-ra^2-ko^2nd^2i^2a^2r$ . -old. From *supra*, above, *κόνδυλος*, a knuckle, and *είδος*, resemblance. Above the condyles.

**SUPRACONSTRICTOR** [Cones] (Lat.), n. m.  $Su^2p(sup)^2ra^2-ko^2n(en)^2stri^2kt(strek)^2o^2r$ . Gen., -or<sup>2</sup>i<sup>2</sup>s. From *supra*, above, and *constringere*, to draw together. See Superior CONSTRICTOR of the pharynx.

**SUPRACOSTAL**, adj.  $Su^2p-ra^2-ko^2s^2t^2l$ . Lat., *supracostalis* (from *supra*, above, and *costa*, a rib). Fr., *surcostal*. Situated above the ribs or above a rib. [a, 48.]

**SUPRACOSTALIS** (Lat.), adj.  $Su^2p(sup)^2ra^2-ko^2s^2t^2al(a^2l)^2i^2s$ . See SUPRACOSTAL; as a n., in the pl., *supracostales*, see LEVATORES costarum breves and LEVATORES costarum longi.—S. *profundus*. An anomalous muscle extending from the outer surface of one rib to that of one some distance below it. [L, 332.]

**SUPRA-DECOMPOUND, SUPRA-DECOMPOSITE**, adj<sup>2</sup>s.  $Su^2p-ra^2-de-ko^2m-pu^2u^2nd$ , -po^2z^2i^2t. Lat., *supra-decompositus* (from *supra*, above, *de*, from, and *componere*, to put together). Fr., *surdécomposé*. Ger., *vielfach-zusammengesetzt*. Of a decomposed leaf, having an indefinite number of subdivisions.

**SUPRADIAPHRAGMATIC**, adj.  $Su^2p-ra^2-di-a^2-franz^2g-ma^2t^2$  (i<sup>2</sup>k). From *supra*, above, and *diaphragma*, the diaphragm. Fr., *supradiaphragmatique*. Situated above the diaphragm. [L, 13.]

**SUPRA-FASTIGIATE**, adj.  $Su^2p-ra^2-fa^2st-i^2g^2i^2a^2t$ . Lat., *suprafastigiatus* (from *supra*, above, and *fastigium*, the top of a gable). Ger., *überipfelft*. Of a corymbose inflorescence, having the lower branches projecting not only beyond the upper branches, but beyond the apex of the primary axis. [a, 35.]

**SUPRAFOLIACEOUS**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-fol-i<sup>2</sup>-a'shu<sup>2</sup>s. Lat., *suprafoliaceus* (from *supra*, above, and *folium*, a leaf). Situated above a leaf. [a, 35.]

**SUPRAFOLIAR**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-fol-i<sup>2</sup>-a'r. From *supra*, above, and *folium*, a leaf. Growing upon a leaf. [a, 35.]

**SUPRAGENUAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-je<sup>2</sup>n<sup>2</sup>-l. From *supra*, above, and *genu*, the knee. Situated above the knee. [a, 48.]

**SUPRAGLENOID**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-glen<sup>2</sup>-oid. From *supra*, above, and *γληνοειδής* (see *GLENOID*). Situated above the glenoid cavity. [a, 48.]

**SUPRAGLUTEAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-glu<sup>2</sup>-te<sup>2</sup>-a'l. From *supra*, above, and *γλῦτός*, the rump. Situated above the gluteal region.

**SUPRAHYOID**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-hi<sup>2</sup>-oid. From *supra*, above, and *ὑοειδής*, hyoid. Fr., *suprahyoïdien*. Situated above the hyoid bone. [C.]

**SUPRA-INGUINAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-i<sup>2</sup>n<sup>2</sup>-gwi<sup>2</sup>-n'l. From *supra*, above, and *inguen*, the groin. Situated above the groin. [a, 48.]

**SUPRALABIALIS** [Coes] (Lat.), n. m. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-lab-(la<sup>2</sup>b)-i<sup>2</sup>-a(al<sup>2</sup>)/i<sup>2</sup>s. From *supra*, above, and *labium*, the lip. See *LEVATOR labii superioris proprius*.

**SUPRAMARGINAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-ma<sup>2</sup>-rj<sup>2</sup>-i<sup>2</sup>n'l. From *supra*, above, and *margo*, a margin. Situated above an edge or margin (said of a cerebral convolution or fissure). [L.]

**SUPRAMAXILLARY**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-ma<sup>2</sup>-x<sup>2</sup>-i<sup>2</sup>l-ar-i<sup>2</sup>. From *supra*, above, and *maxilla*, the jaw. Fr., *supra-maxillaire*. Ger., *supramaxillar*. Pertaining to the superior maxilla. [L, 41 (a, 14).]

**SUPRA-OBLIQUUS** [Coes] (Lat.), n. m. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-o<sup>2</sup>b-li-(le<sup>2</sup>)/kwu<sup>2</sup>s(kwu<sup>2</sup>s). From *supra*, above, and *obliquus*, slanting. See *OBLIQUUS oculi superior*.

**SUPRA-OCCIPITAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-o<sup>2</sup>k-si<sup>2</sup>p-i<sup>2</sup>-t'l. From *supra*, above, and *occiput* (q. v.). Situated above the occipital bone; as a n., the lower portion of the tabular part of the parietal bone. [C.]

**SUPRA-OMPHALODYMIA** (Lat.), n. f. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-o<sup>2</sup>mf-a<sup>2</sup>l(a<sup>2</sup>l)-o(o<sup>2</sup>)-di<sup>2</sup>m(du<sup>2</sup>m)/i<sup>2</sup>-a<sup>2</sup>. From *supra*, above, *ὀμφαλός*, the navel, and *δίδυμος*, twin. See *THEORACAPAGIA*.

**SUPRA-ORBITAL**, **SUPRA-ORBITAR**, adj's. Su<sup>2</sup>p-ra<sup>3</sup>-o<sup>2</sup>rb-i<sup>2</sup>-t'l, -ta<sup>2</sup>-r. Lat., *supraorbitalis* (from *supra*, above, and *orbita*, the orbit). Fr., *supra-orbitaire*. Situated above the orbit. [C.]

**SUPRAPONTINE**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-po<sup>2</sup>nt-i<sup>2</sup>n. From *supra*, above, and *pons*, a bridge. Situated above the pons Varolii. [a, 48.]

**SUPRAPUBIC**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-pu<sup>2</sup>b-i<sup>2</sup>k. From *supra*, above, and *pubes* (q. v.). Fr., *supra-pubien*. Situated above the pubes, affecting parts so situated. [a, 48.]

**SUPRAECTUS** [Coes] (Lat.), n. m. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-re<sup>2</sup>-kt-(rakt<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). From *supra*, above, and *rectus*, straight. See *RECTUS oculi superior*.

**SUPRARENAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-re<sup>2</sup>-n'l. Lat., *suprarenalis* (from *supra*, above, and *ren*, the kidney). Fr., *surrénal*. 1. Situated above the kidney. 2. Pertaining to the s. capsule; as a n., the s. capsule.

**SUPRARYGLOTTIDEUS** [Coes] (Lat.), n. m. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-r(a<sup>2</sup>r)-i<sup>2</sup>(u<sup>2</sup>)-glo<sup>2</sup>t(glot)-ti<sup>2</sup>d'e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *supra*, above, *ἀρίτεια*, a pitcher, *γλωττίς*, the glottis, and *εἶδος*, resemblance. See *ARYTENO-EPIGLOTTIDEUS superior*.

**SUPRASCAPULA** (Lat.), n. n. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>2</sup>l)-a<sup>2</sup>. From *supra*, above, and *scapula*, the shoulder. Of Gegenbaur, the portion of the upper posterior portion of the scapula which arises from the centres of ossification distinct from those of the main portion of the bone. [L.]

**SUPRASCAPULAR**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-ska<sup>2</sup>p-u<sup>2</sup>l-a<sup>2</sup>-r. From *supra*, above, and *scapula* (q. v.). Fr., *supra-scapulaire*. Situated above the scapula. [C.]

**SUPRASCAPULARIS** (Lat.), adj. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-ska<sup>2</sup>p(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>2</sup>l)-a(al<sup>2</sup>)/i<sup>2</sup>s. See *SUPRASCAPULAR*; as a n., see *SUPRASPINATUS*.

**SUPRASERRATUS** [Coes] (Lat.), n. m. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-se<sup>2</sup>-r-rat(rat<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). From *supra*, above, and *serra*, a saw. See *SERRATUS posticus superior*.

**SUPRASPINAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-spi<sup>2</sup>-n'l. Lat., *supraspinalis* (from *supra*, above, and *spina*, a spine). Fr., *sur-épineux*. Situated above or upon a spine or spinous process. [C.]

**SUPRASPINATUS** (Lat.), adj. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-spi<sup>2</sup>n(spi<sup>2</sup>n)-at-(a<sup>2</sup>t)/u<sup>2</sup>s(u<sup>2</sup>s). From *supra*, above, and *spina*, a spine. Supraspinal; as a n. (Ger., *Obergrätenmuskel*), a muscle which arises from the surface of the supraspinous fossa of the scapula and is inserted into the great tuberosity of the humerus. [L, 332.]

**SUPRASPINOUS**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-spi<sup>2</sup>-n'u<sup>2</sup>s. See *SUPRASPINAL*.

**SUPRASTERNAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-stu<sup>2</sup>-r<sup>2</sup>-n'l. Lat., *suprasternalis* (from *supra*, above, and *sternum* [q. v.]). Situated above the sternum. [a, 48.]

**SUPRASTERNALIS** (Lat.), adj. Su<sup>2</sup>p(sup)-ra<sup>3</sup>-stu<sup>2</sup>r<sup>2</sup>n(ste<sup>2</sup>r<sup>2</sup>n)-al(a<sup>2</sup>l)/i<sup>2</sup>s. See *SUPRASTERNAL*; as a n., see *STERNALIS*.

**SUPRATROCHLEAR**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-tro<sup>2</sup>k<sup>2</sup>'le<sup>2</sup>-a'r. From *supra*, above, and *trochlea* (q. v.). Situated above the trochlea.

**SUPRAVAGINAL**, adj. Su<sup>2</sup>p-ra<sup>3</sup>-va<sup>2</sup>-j<sup>2</sup>-i<sup>2</sup>-n'l. From *supra*, above, and *vagina* (q. v.). Fr., *supra-vaginal*. Situated above the vagina, affecting parts so situated. [a, 48.]

**SURA** (Lat.), n. f. Su<sup>2</sup>r(sur)-a<sup>2</sup>. 1. An old name for the calf of the leg. [L, 50 (a, 14).] 2. See *FIBULA*.

**SURAL**, adj. Su<sup>2</sup>r'l. Lat., *suralis* (from *sura* [q. v.]). Fr., s. Pertaining to the sura. [C.]

**SURALES** (Lat.), n. m. pl. Su<sup>2</sup>r(sur)-al(a<sup>2</sup>l)/ez(e<sup>2</sup>s). See *TURCIPS surce*.

**SURANAL** (Fr.), adj. Su<sup>2</sup>-a<sup>2</sup>-na<sup>2</sup>l. Above the anus.

**SURBANDE** (Fr.), n. Su<sup>2</sup>-r-ba<sup>2</sup>nd. An outer bandage to sustain a dressing. [L, 41 (a, 14).]

**SURCILIER** (Fr.), n. Su<sup>2</sup>-r-se-le-a. See *CORRUGATOR supercilii*.

**SURCINGLE**, n. Su<sup>2</sup>-r'si<sup>2</sup>n<sup>2</sup>-g'l. For deriv., see *Sur-*, and *CINGULUM*. The slender, loop-like prolongation of the corpus striatum described by Dalton as "running forward in the roof of the inferior horn of the ventricle, to reach the amygdala at the base of the brain." [I, 23 (K).]

**SURCULATION**, n. Su<sup>2</sup>-rk-u<sup>2</sup>-a'sh'n. From *surculus*, a sprout. Fr., s. Propagation by grafts or suckers. [a, 35.]

**SURCULOSE**, adj. Su<sup>2</sup>-rk-u<sup>2</sup>l-os. Producing suckers (surculi). [Gray (a, 35).]

**SURCULUS** (Lat.), n. m. Su<sup>2</sup>-rk(su<sup>2</sup>-rk)/u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). Ger., *Pfropfreis* (1st def.), *Moosstengel* (3d def.). *Strünken* (3d def.). 1. A graft. 2. A sucker. 3. The stem of a moss or of a liverwort; also the creeping stem of a lycopod. [a, 35.]—**S. transversus**. A band of fibres that connects the two branches into which the processus medullaris divides after reaching the corpus striatum.

**SURCURRENT**, adj. Su<sup>2</sup>-r-ku<sup>2</sup>-r'nt. For deriv., see *Sur-*, and *currere*, to run. Running up upon a part (cf. *DECURRENT*). [a, 48.]

**SURDI-MUTISME** (Fr.), **SURDI-MUTITÉ** (Fr.), n's. Su<sup>2</sup>-r-de-mu<sup>2</sup>-tezim', -e-ta. See *DEAF-mutism*.

**SURDITAS** (Lat.), n. f. Su<sup>2</sup>-rd(su<sup>2</sup>-rd)/i<sup>2</sup>t-a<sup>2</sup>s(a<sup>2</sup>s). Gen., -lat'/is. From *surdus*, deaf. Fr., *surdité*. See *DEAFNESS*.

**SURDITÉ** (Fr.), n. Su<sup>2</sup>-rd-et-a. See *DEAFNESS*.—**S. paradoxale**. See *PARACUSIS Willisii*.—**S. verbale**. See *Word-DEAFNESS*.

**SURDOMUTITAS** (Lat.), n. f. Su<sup>2</sup>-rd(su<sup>2</sup>-rd)-o(o<sup>2</sup>)-mu<sup>2</sup>t(mut)/i<sup>2</sup>t-a<sup>2</sup>s(a<sup>2</sup>s). Gen., -lat'/is. From *surdus*, deaf, and *mutitas*, dumbness. Fr., *surdo-mutité*. Ger., *Taubstummheit*. Deaf-mutism.

**SURDUS** (Lat.), adj. Su<sup>2</sup>-rd(su<sup>2</sup>-rd)/u<sup>2</sup>s(u<sup>2</sup>s). Fr., *sourd*. See *DEAF*.

**SUREAU** (Fr.), n. Su<sup>2</sup>-r-o. See *SAMBUCUS* and *Fructus SAMBUCI*.—**Eau de s.**, **Eau distillée (de fleurs) de s.** See *Aqua SAMBUCI*.

—**Écorce de s.** See *ELDER-bark*.—**Éléolé de s.** See *Oleum SAMBUCI*.—**Fleurs de s.** See *ELDER-flowers*.—**Fomentation avec la fleur de s.** Sp., *fomentación de flor de saúco*. A preparation made by pouring upon 30 grammes of elder-flowers enough boiling water to make a litre of infusion, to be filtered after standing an hour [Fr. Cod.]; or by pouring 345 parts of water upon 5 of elder-flowers and straining [Sp. Ph.]. [B, 95 (a, 38).]—**Grand s.** See *SAMBUCUS nigra*.—**Huile de s.** See *Oleum SAMBUCI*.—**Mellite de s.** See *DIAMORON*.—**Miel de s.** See *Mel SAMBUCI*.—**Petit s.** See *SAMBUCUS ebulus*.—**Pommade de s.** See *Unguentum SAMBUCI*.—**Suc d'écorce de s.** The reddish-brown, sweetish juice of the inner fleshy bark of fresh elder-roots; used as an emeto-cathartic in ascites. [B, 93 (a, 14).]—**Suc de s.** [Fr. Cod.]. Sp., *zumo de fruto de saúco* [Sp. Ph.]. The fermented and filtered juice of elder berries. Cf. *Succus SAMBUCI insipissatus*.—**S. à grappes**. See *SAMBUCUS racemosa*.—**S. commun.** See *SAMBUCUS nigra*.—**S. d'eau**. The *Viburnum opulus*. [a, 35.]—**S. de montagne**. See *SAMBUCUS racemosa*.—**S. du Canada**. See *SAMBUCUS canadensis*.—**S. écorce** [Fr. Cod.]. The inner bark of *Sambucus nigra*. [a, 38.]—**S. en herbe**, **S. hiéble**. See *SAMBUCUS ebulus*.—**Tisane de s.** Sp., *infusión de flor de saúco*. A preparation made by infusing 2 parts of elder-flowers in 400 of boiling water for half an hour [Fr. Cod.] (in 345 of boiling water [Sp. Ph.], and straining. [B, 95 (a, 38).]

**SURELLE** (Fr.), n. Su<sup>2</sup>-r-e<sup>2</sup>l. 1. See *RUMEX acetosa* and *Rumex acetosella*. 2. The *Oxalis acetosella* and other species of *Oxalis*. [a, 35.]

**SURÉPINEUX** (Fr.), adj. Su<sup>2</sup>-r-ap-en-u<sup>2</sup>. See *SUPRASPINOUS*.

**SURETTE** (Fr.), n. Su<sup>2</sup>-r-e<sup>2</sup>t. 1. The *Rumex acetosa*. 2. The *Oxalis acetosella*. [a, 35.]

**SURFACE**, n. Su<sup>2</sup>-r'fas. Gr., *ἐπιφάνεια*. Lat., *superficies*. Fr., s., *superficie*. Ger., *Oberfläche*. The outside or limiting part of a solid body; hence the face or one of the faces of a body. [a, 35, 48.]—**Auricular s. (of the ilium or of the sacrum)**. See *SUPERFICIES auricularis*.—**Demarcation s.** [Hermann]. The cut s. of a muscle, which is electro-negative to the uninnervated portion of the muscle. [Landois (K).]—**Glenoid s.** See *GLENOID CAVITY*.—**Nasal s. (of the superior maxilla)**. The s. of the superior maxilla that is directed toward the nose. [C.]—**Nuclear s.** An imaginary plane passing through the nuclear point, perpendicular to the visual direction. [F.]—**Orbital s. (of the superior maxilla)**. The upper s. of the superior maxilla. [C.]—**Popliteal s. of the femur**. A triangular s. of the femur included between the internal and external supracondylar lines. It forms the floor of the upper part of the popliteal space. [C, 3.]—**Spheno-maxillary s.** The portion of the ala magna of the sphenoid bone that enters into the formation of the sphenomaxillary fossa. [L, 31.]—**Temporal s.** A somewhat flat surface on the parietal bone, bounded by the temporal line.

**SURFEIT**, n. Su<sup>2</sup>-r'fi<sup>2</sup>t. From *super*, above, and *facere*, to make. Gr., *πληθος*, *πλησμονή*. Lat., *satietas*. Fr., *excès de table*. Ger., *Ueberladung*. Excess in eating or drinking; also, the condition of fullness and nausea occasioned thereby. [a, 48.]

**SURGEON**, n. Su<sup>2</sup>-r'ju<sup>2</sup>n. Formerly spelled *chirurgion* or *chirurgion*. Gr., *χειρουργός* (from *χείρ*, the hand, and *ἐργον*, work). Lat., *chirurgus*, *vulnerum medicus*. Fr., *chirurgien*. Ger., *Wundarzt*, *Chirurg*. One who practices surgery.—**S. apothecary**. A medical practitioner that has passed the examinations of the Royal College of Surgeons and the London Apothecaries' Society. [a, 34.]—**S. dentist**. An old term for a s. whose practice was limited to dentistry. [a, 34.]—**Veterinary s.** Fr., *vétérinaire*. Ger., *Thierarzt*. A s. who devotes himself to diseases of the domestic animals. [E.]

**SURGERY**, n. Su<sup>2</sup>rj'e<sup>2</sup>r-i<sup>2</sup>. Gr., χειρουργία. Lat., *chirurgia*. Fr., *chirurgie*. Ger., *Chirurgie*. 1. That department of medicine which deals with operative or manipulative treatment. 2. As used in Great Britain, a place in which a surgeon does minor operations and dispenses medicines.—**Anaplastic s.** See *Plastic s.*—**Antiseptic s.** S. practiced in accordance with antiseptic methods. [D. 87.]—**Conservative s.** S. which looks to the preservation of a part rather than its removal. [E.]—**Military s.** Fr., *chirurgie d'armée*. Ger., *Kriegschirurgie*. The s. which deals especially with the injuries received in war. [E.]—**Minor s.** S. which deals with minor operations and the dressing of wounds. [E.]—**Operative s.** S. which has to do with the performance of operations. [E.]—**Orthopaedic s.** Fr., *orthopédie*. Ger., *Orthopädie*. That branch of s. that deals with the prevention and the mechanical and operative treatment of deformities. [a. 34.]—**Plastic s.** S. which effects the restoration of parts that have been lost or destroyed. [E.]—**Railway s.** The s. of those injured on railroads.—**Subcutaneous s.** S. in which the operation is performed beneath the skin, the instruments being introduced through a small cutaneous incision. [a. 34.]—**Veterinary s.** Fr., *chirurgie vétérinaire*. The s. of the domestic animals. [a. 34.]

**SURGICAL**, adj. Su<sup>2</sup>rj'i<sup>2</sup>k'l. Gr., χειρουργικός. Lat., *chirurgicus*. Fr., *chirurgical*. Ger., *chirurgisch*, *wundärztlich*. Pertaining to, effected by, calling for, or due to surgery; in accordance with the rules of surgery.

**SURHYDROSULFUROHYPOSULFITE** (Fr.), n. Su<sup>2</sup>r-ed-ro-sulf-u<sup>2</sup>r-o-op-o-su<sup>2</sup>lf-et. A compound of hyposulphurous and hydrosulphuric acid containing an excess of sulphur. [B.]

**SURINAMINE**, n. Su<sup>2</sup>r-i<sup>2</sup>n'a<sup>2</sup>m-en. An alkaloid obtained from the bark of *Andira retusa*. [B. 270 (a. 38).]

**SURLANGUE** (Fr.), n. Su<sup>2</sup>r-la<sup>2</sup>n'g. Acute glossitis in domestic animals. [L. 41 (a. 14).]

**SURLARYNGIEN** (Fr.), adj. Su<sup>2</sup>r-la<sup>2</sup>r-a<sup>2</sup>n<sup>2</sup>-zhe-a<sup>2</sup>n<sup>2</sup>. See *EPIARYNGEUS*.

**SURMENAGE** (Fr.), n. Su<sup>2</sup>r-m'na<sup>2</sup>zh. 1. Over-strain; exhaustion from over-exertion. 2. The state of exhaustion observed in domestic animals as the result of tedious parturition. [A. 15.]—**S. intellectuel**. An over-taxed state of the brain in school-children. ["Gaz. hebdomadaire de médecine et de chirurgie," Apr. 30, 1886, p. 285.]

**SURMÈNEMENT** (Fr.), n. Su<sup>2</sup>r-me<sup>2</sup>n-ma<sup>2</sup>n<sup>2</sup>. Over-strain.

**SUROS** (Fr.), n. Su<sup>2</sup>r-o. An exostosis. [L. 41 (a. 14).]

**SUROXIDE** (Fr.), n. Su<sup>2</sup>r-ox-ed. See *PEROXIDE*.—**S. plumbique**. See *Red LEAD oxide*.

**SUROXYGÈNESE** (Fr.), n. Su<sup>2</sup>r-ox-e-zha-ne<sup>2</sup>z. An old term for a disease attributed to a superabundance of oxygen in the system. [L. 41 (a. 14).]

**SURPEAU** (Fr.), n. Su<sup>2</sup>r-po. See *EPIDERMIS*.

**SURPOSÉ** (Fr.), adj. Su<sup>2</sup>r-po-za. See *SUPERPOSED*.

**SURPRISE**, n. Su<sup>2</sup>r-priz'. From *super*, over, and *prehendere*, to lay hold of. The feeling excited by an unexpected occurrence. [a. 48.]—**Cerebral s.** Of Trousseau, the stupor that occurs on the recovery of consciousness after cerebral hæmorrhage. [a. 34.]

**SURRA**, n. In India, a form of anaemia in animals, caused by *Ankylostoma* or some other parasite. [a. 34.]

**SURSEL** (Fr.), n. Su<sup>2</sup>r-se<sup>2</sup>l. See *SUPERSALT*.

**SURSUMDUCTION**, n. Su<sup>2</sup>r-su<sup>2</sup>m-du<sup>2</sup>k'shu<sup>2</sup>n. From *sursum*, upward, and *ducere*, to lead. The degree to which one eye can be carried above the other by voluntary effort; denoted as *right* or *left s.* according as the right or left eye is made the higher. [B.]

**SUS** (Lat.), n. com. Su<sup>2</sup>s(sus). Gen., *su*'is. Gr., *ῥῆς*. The typical genus of the *Suidæ*, or swine family. [a. 48.]—**S. scrofa**. A genus of the *Suidæ*. [L.]—**Vulva suis**. A sow's vulva; used formerly for incontinence of urine. [B. 117.]

**SUS-ACROMIAL** (Fr.), adj. Su<sup>2</sup>z-a<sup>2</sup>k-ro-me-a<sup>2</sup>l. See *SUPRACROMIAL*. For various words in *Sus*, not here given, see the analogous forms under *Supra*, *Super*, *Sur*, and *Hyper*.

**SUSCARIEN** (Fr.), adj. Su<sup>2</sup>ka<sup>2</sup>r-pe-a<sup>2</sup>n<sup>2</sup>. Pertaining to the dorsal surface of the carpus. [L. 41 (a. 14).]

**SUSCEPTIBILITY** (Fr.), n. Su<sup>2</sup>s-se<sup>2</sup>pt-i<sup>2</sup>b-i<sup>2</sup>z-i<sup>2</sup>t-i<sup>2</sup>. From *suscipere*, to hold up. Fr., *susceptibilité*. Ger., *Empfänglichkeit*. 1. The capacity of receiving impressions that determine the production of organic action. 2. The inherent capacity to acquire disease. [a. 34.]

**SUSCEPTIO** (Lat.), n. f. Su<sup>2</sup>s(su<sup>2</sup>s)-se<sup>2</sup>pt(ke<sup>2</sup>p)'shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., -on'is. From *suscipere*, to take up. See *INTUSSUSCEPTION*.

**SUSTINUM** (Lat.), n. n. Su<sup>2</sup>s(sus)'i<sup>2</sup>n-u<sup>2</sup>m(u<sup>2</sup>m). Gr., *συστήνω*. See *CRINOMYRON*.

**SUS-MAXILLO-LABIAL** (Fr.), n. Su<sup>2</sup>s-ma<sup>2</sup>x-e-lo-la<sup>2</sup>-be-a<sup>2</sup>l. See *SUPERMAXILLO-LABIALIS*.—**S. m.-l. grand**. See *LEVATOR labii superioris alaeque nasi*.—**S. m.-l. moyen**. See *LEVATOR labii superioris major*.—**S. m.-l. petit**. See *LEVATOR anguli oris*.

**SUS-MAXILLO-NASAL** (Fr.), n. Su<sup>2</sup>s-max-e-lo-na<sup>2</sup>-sa<sup>2</sup>l. Of CHAUSSIER, see *COMPRESSOR naris*. [A. 313.] Cf. *SUPERMAXILLO-NASALIS*.

**SUS-MÉTACARPO-LATÉRI-PHALANGIENS** (Fr.), n. pl. Su<sup>2</sup>s-ma<sup>2</sup>-ta<sup>2</sup> ka<sup>2</sup>r-po-la<sup>2</sup>-ta-re-fa<sup>2</sup>-la<sup>2</sup>-n<sup>2</sup>-zhe-a<sup>2</sup>n<sup>2</sup>. Of DUMAS, see *INTEROSSEI manus dorsales*.

**SUS-MÉTATARSO-LATÉRI-PHALANGIENS** (Fr.), n. pl. Su<sup>2</sup>s-ma<sup>2</sup>-ta<sup>2</sup>-ta<sup>2</sup>-ro-la<sup>2</sup>-ta-re-fa<sup>2</sup>-la<sup>2</sup>-n<sup>2</sup>-zhe-a<sup>2</sup>n<sup>2</sup>. Of DUMAS, see *INTEROSSEI pedis*.

**SUS-OPTICO-PHÉNI-SCLÉROTICIEN** (Fr.), n. Su<sup>2</sup>z-op-to-ko-fa-ne-skla-ro-te-se-a<sup>2</sup>n<sup>2</sup>. See *RECTUS oculi superior*.

**SUSOTOXINE**, n. Su<sup>2</sup>so-o-to<sup>2</sup>x'en. Of F. G. NOVY, a basic substance, or ptomaine, probably (C<sub>10</sub>H<sub>22</sub>N<sub>2</sub>), obtained from cul-

tivations of the hog-cholera microbe; toxic only in large doses. [a. 34.]

**SUSPENDED**, adj. Su<sup>2</sup>s-pe<sup>2</sup>nd'e<sup>2</sup>d. Lat., *suspensus* (from *suspendere*, to suspend). Fr., *suspendu*. Ger., *aufgehängt* (1st def.). 1. Hanging; of an ovule, hanging from the top of the ovary wall. [a. 35.] 2. Interrupted (cf. *s. ANIMATION*).

**SUSPENSICULUM** (Lat.), n. n. Su<sup>2</sup>s(su<sup>2</sup>s)-pe<sup>2</sup>nd-i<sup>2</sup>k'u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). See *CREMASTER*.

**SUSPENSEUR** (Fr.), n. Su<sup>2</sup>s-pa<sup>2</sup>n<sup>2</sup>s-u<sup>2</sup>r. See *SUSPENSOR*.—**S. du duodénum**. Syn.: *muscle de Trietz*. A thin, flat, trapezoidal muscle, composed of unstriated fibres which arise in the connective tissue around the coeliac axis and terminate in the lower extremity of the duodenum. ["Bull. de la soc. anat.," Feb., 1889, p. 95 (a. 18).]

**SUSPENSION**, n. Su<sup>2</sup>s-pe<sup>2</sup>n'shu<sup>2</sup>n. Lat., *suspensio* (from *suspendere*, to hang). Fr., *s. Ger.*, *s. 1*. The act of diffusing a substance in a state of fine mechanical division through a liquid in which it does not dissolve, and preventing it from settling. [B.] 2. The state of being thus diffused. 3. In orthopaedics, a method of treating painful inflammations of the extremities in which the parts are raised by means of an apparatus and held in an elevated position. [A. 326 (a. 21).] 4. The same procedure applied to the whole body for the purpose of stretching the spinal cord.

**SUSPENSIOIR** (Fr.), n. Su<sup>2</sup>s-pa<sup>2</sup>n<sup>2</sup>-saw<sup>2</sup>r. See *SUSPENSORIUM*.—**S. des mamelles**. See *Breast-BANDAGE*.

**SUSPENSOR** (Lat.), n. m. Su<sup>2</sup>s(su<sup>2</sup>s)-pe<sup>2</sup>ns'o<sup>2</sup>r. From *suspendere*, to hang up. Fr., *suspenseur*. 1. In botany, a chain or elongated mass of cells at the extremity of which is situated the developing embryo. It is formed in the embryo-sac by division of the germ-cell. [a. 35.] 2. A muscle the function of which is to suspend a part. [a. 48.]—**S. testiculi**. See *CREMASTER*.

**SUSPENSORIUM** (Lat.), n. n. Su<sup>2</sup>s(su<sup>2</sup>s)-pe<sup>2</sup>ns(pans)-or'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Fr., *suspensorio*. Ger., *S.* A suspensory structure or apparatus. [a. 17.]—**S. (apicis) dentis epistrophei**. See *Middle ODONTOID LIGAMENT*.—**S. hepatis**. See *Broad LIGAMENT of the liver*.—**S. incisus**. See *Suspensory LIGAMENT of the incus*.—**S. mallei**. See *Superior LIGAMENT of the malleus*.—**S. mammae**. See *Breast-BANDAGE*.—**S. testis**. See *CREMASTER*.—**S. vesicæ**. See *Superior false LIGAMENT of the urinary bladder*.

**SUSPENSORIUS** (Lat.), adj. Su<sup>2</sup>s(su<sup>2</sup>s)-pe<sup>2</sup>ns(pans)-or'i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Suspensory; as a n., see *SUSPENSORIUM*.—**S. hepatis**. See *Broad LIGAMENT of the liver*.—**S. testis**. See *CREMASTER*.

**SUSPENSORY**, adj. Su<sup>2</sup>s-pe<sup>2</sup>ns'or-i<sup>2</sup>. Lat., *suspensorius* (from *suspendere*, to hang up). Suspending, sustaining; as a n. (Fr., *suspensoir*), a supporting bandage for the scrotum. [a. 17.]

**SUSPENSUM** (Lat.), n. n. Su<sup>2</sup>s(su<sup>2</sup>s)-pe<sup>2</sup>ns(pans)'u<sup>2</sup>m(u<sup>2</sup>m). From *suspendere*, to hang up. In pharmacy, a liquid holding an insoluble medicinal substance in suspension.

**SUSPIRATION**, n. Su<sup>2</sup>s-pi<sup>2</sup>r-a<sup>2</sup>shu<sup>2</sup>n. Lat., *aspiratio*, *suspiratus* (from *aspirare*, to draw a deep breath). See *SIGHING*. n.

**SUSPIRIOSUS** (Lat.), adj. Su<sup>2</sup>s(su<sup>2</sup>s)-pi<sup>2</sup>r-i<sup>2</sup>-os'u<sup>2</sup>s(u<sup>2</sup>s). Sighing.

**SUSPIRIUM** (Lat.), n. n. Su<sup>2</sup>s(su<sup>2</sup>s)-pi<sup>2</sup>r(peri)'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *aspirare*, to draw a deep breath. See *SIGH*.

**SUS-PUBIO-FÉMORAL** (Fr.), n. Su<sup>2</sup>-pu<sup>2</sup>-be-o-fa-mo-ra<sup>2</sup>l. See *SUPERPUBIOFEMORALIS*.

**SUS-SCAPULO-TROCHITÉRIEN** (Fr.), adj. Su<sup>2</sup>-ska<sup>2</sup> pu<sup>2</sup>-lo-tro-ke-ta-re-a<sup>2</sup>n<sup>2</sup>. Pertaining to or connected with the dorsal surface of the scapula and a tuberosity of the humerus; as a n., a muscle so connected. [L.]—**S.-s.-t. grand**. See *INFRASPINATUS*.—**S.-s.-t. petit**. See *SUPRASPINATUS*.

**SUSSESEN** (Ger.), n. Zu<sup>2</sup>s'e<sup>2</sup>sa-se<sup>2</sup>n. See *GLYCYPHAGIA*.

**SÜSSHOLZ** (Ger.), n. Zu<sup>2</sup>s'ho<sup>2</sup>lts. See *LICORICE* and *GLYCYRRHIZA* (1st def.).—**Flüssiges S'extract**. See *Extractum GLYCYRRHIZÆ fluidum*.—**Igelfruchtiges S.** See *GLYCYRRHIZA echinata*.—**Indisches S.** See *ABRUS precatorius*.—**Russisches S.** [Ger. Ph.] See *Radix GLYCYRRHIZÆ*.—**Spanische S'wurzel**. See *GLYCYRRHIZA* (2d def.).—**S'waff**. See *Extractum GLYCYRRHIZÆ*.—**S'wurzel**. See *GLYCYRRHIZA* (2d def.) and *Radix GLYCYRRHIZÆ*.—**S'wurzelzsyrop**. See *Syrupus LIQUIRITÆ*.—**S'zucker**. See *GLYCYRRHIZIN*.

**SÜSHÜLSENBAUM** (Ger.), n. Su<sup>2</sup>s-hu<sup>2</sup>l'z'e<sup>2</sup>n-ba<sup>2</sup>-um. The genus *Prosopis*. [a. 35.]

**SUS-SPINI-SCAPULO-TROCHITÉRIEN** (Fr.), n. Su<sup>2</sup>-spe-ne-ska<sup>2</sup>-pu<sup>2</sup>-lo-tro-ke-ta-re-a<sup>2</sup>n<sup>2</sup>. See *SUPRASPINATUS*.

**SUSTENTACULAR**, adj. Su<sup>2</sup>s-te<sup>2</sup>nt-a<sup>2</sup>k'u<sup>2</sup>l(u<sup>2</sup>l)-a<sup>2</sup>r. Supporting, connective. [J.]

**SUSTENTACULUM** (Lat.), n. n. Su<sup>2</sup>s(su<sup>2</sup>s)-te<sup>2</sup>nt-at'a<sup>2</sup>k'u<sup>2</sup>l(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). See *SUPPORT* and *ALIMENT*.—**S. lienis**. See *Costocolic LIGAMENT*.

**SUSTENTATOR** (Lat.), n. m. Su<sup>2</sup>s(su<sup>2</sup>s)-te<sup>2</sup>nt-at'a<sup>2</sup>l(u<sup>2</sup>l)-o<sup>2</sup>r. Ger., -or'is. From *sustentare*, to hold up. See *SUPPORTER*.—**S. ciltoridis**, **S. penis**. See *ISCHIO-Cavernosus*.—**S. tunicae muscosæ**. See *CORRUGATOR cutis ani*.

**SUSUM** (Lat.), n. n. Sus'n(u<sup>2</sup>m)-u<sup>2</sup>. Fr., *s.* A genus of the *Flagellariæ*. [a. 35.]—**S. anthelminticum**. A Java species having an anthelmintic root. [a. 35.]

**SUSUMBER**, n. Su<sup>2</sup>s'u<sup>2</sup>mb-u<sup>2</sup>r. The *Solanum bacciferum*. The berries are poisonous. [a. 35.]

**SUSURRUS** (Lat.), n. m. Su<sup>2</sup>s(su<sup>2</sup>s)-u<sup>2</sup>r(u<sup>2</sup>r)'ru<sup>2</sup>s(ru<sup>2</sup>s). See *MURMUR*.—**Muscular s.** See *BRUIT musculaire*.—**S. aurium**. See *TINNITUS aurium*.

**SUTELA** (Lat.), n. f. Su<sup>2</sup>t(sut)-el(al)a<sup>2</sup>. From *suere*, to sew. See *SUTURE*.

**SUTORIUS** (Lat.), n. m. Su<sup>2</sup>t(sut)-or/<sup>1</sup>2-u<sup>3</sup>s(u<sup>4</sup>s). From *sutor*, a shoemaker. See **SARTORIUS**.

**SUTUR** (Ger.), n. Zut-ur'. See **SUTURE**.—**Schuppens'**. See **Squamosal SUTURE**.

**SUTURA** (Lat.), n. f. Su<sup>2</sup>t(sut)-u<sup>2</sup>r(ur)/a<sup>2</sup>. See **SUTURE**.—**S. abdominalis**. See **GASTRORRHAPHY** (1st def.).—**S. articularis**. See **CORONAL SUTURE**.—**S. bimaxillaris**. See **Intermaxillary SUTURE**.—**S. binasalis**. See **Intermaxillary SUTURE**.—**S. biparietalis**. See **Sagittal SUTURE**.—**S. bregmatomastoidea**. See **Occipito-mastoid SUTURE**.—**S. bursae**. See **S. scroli**.—**S. chirurgica**. See **SUTURE** (2d def.).—**S. circumvoluta**. See **Twisted SUTURE**.—**S. clavata**. See **Quilled SUTURE**.—**S. coronalis**. See **Coronal SUTURE**.—**S. corporis callosi**. See **STRIA longitudinalis medialis**.—**S. cruenta**. Fr., *suture sanglante*. Ger., *blutige Suture*. 1. The closure of a wound by sutures actually passed through the tissues, as distinguished from the dry suture. 2. Suture after refreshing the surfaces that are to be brought together (e. g., the borders of a fistulous opening).—**S. cutanea**. See **Palatine RHAPHY**.—**S. dentata**. See **Dentated SUTURE**.—**S. dorsalis**. See **Dorsal SUTURE**.—**S. ethmoideomaxillaris**. The articulation between the ethmoid bone and the superior maxilla. [L.]—**S. externa corporis callosi**. See **STRIA longitudinalis laterales**.—**S. harmonialis**. See **HARMONY** (1st def.).—**S. imperfecta** Weberi. See **S. longitudinalis imperfecta**.—**S. incisiva**. See **Incisor FISSURE**.—**S. infra-orbitalis (longitudinalis)**. See **Infra-orbital SUTURE**.—**S. infra-orbitalis transversa**. In young subjects, the remains of a furrow separating the lower border of the orbit from the rest of the superior maxilla. [L.]—**S. interparietalis**. See **Sagittal SUTURE**.—**S. interseissa**. See **Interrupted SUTURE** and **Button SUTURE**.—**S. jugalis**. See **Sagittal SUTURE**.—**S. lacrimomaxillaris**. The suture between the lacrimal bone and the superior maxilla. [L.]—**S. lambdoidea**. See **Lambdoid SUTURE**.—**S. lepidoides**. See **Squamo-parietal SUTURE**.—**S. limbosa**. Ger., *Saumnaht*. A variety of articulation by suture in which the bones are beveled at their line of junction.—**S. longitudinalis**. See **Sagittal SUTURE**.—**S. longitudinalis imperfecta**. A groove upon the outer surface of the frontal process of the superior maxilla in front of the lacrimal crest, usually lodging a small vein. [L.]—**S. mastoidea**. See **Occipito-mastoid SUTURE**.—**S. mendosa**. See **False SUTURE**.—**S. naso-frontalis**. See **Fronto-nasal SUTURE**.—**S. nodosa**. See **Interrupted SUTURE** and **Button SUTURE**.—**S. notha**. See **False SUTURE**.—**S. obelaea**. See **Sagittal SUTURE**.—**S. occipitalis**. See **Lambdoid SUTURE**.—**S. occipitis transversa**. A transverse or oblique fissure between the superior and inferior part of the tabular portion of the occipital bone, found in infants until the third or fourth year. [L. 57 (a. 50).]—**S. occipito-mastoidea**. See **Occipito-mastoid SUTURE**.—**S. palatina (longitudinalis)**. See **Palatine SUTURE**.—**S. palatina transversa**. See **Palatine transverse SUTURE**.—**S. parietomastoidea**. See **Parieto-mastoid SUTURE**.—**S. parietotemporalis**. See **Temporo-parietal SUTURE**.—**S. peltionum**. See **Glover's SUTURE**.—**S. petrobasilaris**. **S. petrososquamosa**. A suture on the upper wall of the tympanic cavity in the infant, formed by the meeting of the roof of the tympanic cavity with the inner lamella of the squamous portion of the temporal bone. In the adult it is firmly closed. [F.] Cf. **Petro-squamosal SUTURE**.—**S. petrosphenobasilaris**. See **FISSURA petrobasilaris**.—**S. petrososquamosa**. A suture on the upper wall of the tympanic cavity with the inner lamella of the squamous portion of the temporal bone. In the adult it is firmly closed. [F.] Cf. **Petro-squamosal SUTURE**.—**S. petrosphenobasilaris**. See **FISSURA petrobasilaris**.—**S. pinnata**. See **Quilled SUTURE**.—**S. prone**. See **Lambdoid SUTURE**.—**S. punctata**. See **Bertrandi's s.**—**S. puppis**. See **Coronal SUTURE**.—**S. recta**. **S. rhabdoides**. See **Sagittal SUTURE**.—**S. scroli**. The raphe of the scrotum. [L. 349.]—**S. sicca**. See **Dry s.**—**S. serrata**. See **Serrated SUTURE**.—**S. sinuosa**. See **True SUTURE**.—**S. spheno-ethmoidalis**. See **Ethmo-sphenoidal SUTURE**.—**S. sphenofrontalis**. See **Fronto-sphenoidal SUTURE**.—**S. sphenozygomatica**. The suture between the ala magna of the sphenoid bone and the malar bone. [L. 31.]—**S. spuria**. See **False SUTURE**.—**S. squamosa**. See **Squamo-parietal SUTURE** and **False SUTURE**.—**S. ventralis**. See **Ventral SUTURE**.—**S. vera**. See **True SUTURE**.—**S. wormiana anterior**. In the foetus, the upper part of the lambdoid suture. [L. 332.]—**S. wormiana posterior**. See **S. occipitis transversa**.—**S. zygomaticofrontalis**. See **Fronto-malar SUTURE**.—**S. zygomaticomaxillaris**. The suture between the malar bone and the superior maxilla. [L.]—**S. zygomaticosphenoidalis**. See **S. sphenozygomatica**.

**SUTURAL**, adj. Su<sup>2</sup>t-u<sup>2</sup>r'l. Lat., *suturalis* (from *sutura*, a suture). Fr., *s. Ger., nahtständig*. Pertaining to a suture or taking place along a suture. [a. 35.]

**SUTURATUS** (Lat.), adj. Su<sup>2</sup>t(sut)-u<sup>2</sup>r(ur)-at(a<sup>2</sup>t)/u<sup>3</sup>s(u<sup>4</sup>s). Ger., *benähtet*. Provided with a suture or with sutures. [a. 35.]

**SUTURE**, n. Su<sup>2</sup>t-u<sup>2</sup>r. Gr., *ῥαφή*. Lat., *sutura* (from *suere*, to sew), *sutela*, *rhaphie*. Fr., *s., engrenure*. Ger., *Sutur*, *Suture* (1st def.), *Naht*, *Verbindung* (2d def.). 1. That variety of synarthrosis in which the bones are articulated by their edges, generally by means of serrations; a dovetail joint. 2. The procedure of stitching parts together, particularly the lips of a wound. 3. The thread or other like material, together with the method of inserting it, in the operation of stitching parts together. 4. In botany, a line of junction or of opening; a seam, especially of a capsule or pod. [a. 35.]—**Antiseptic s.** See **Antiseptic LIGATURE**.—**Appollito's s.** An intestinal s. made with a double-threaded needle, the first stitch being passed from within outward and the first longitudinal running stitch being made in the opposite side parallel with the line of the wound. The needle is then carried to the opposite side and a similar longitudinal stitch made, and so on back and forth. [R. P. Harris, "Med. News," Aug. 28, 1886, p. 236 (a. 34).]—**Baseball s.** A continuous s. all around a wound, in the case of the intestine penetrating the entire intestinal coat. ["Med. Record," Nov. 5, 1892, p. 551 (a. 34).]—**Basilar s.** The s. between the occipital bone and the body of the sphenoid bone. [L. 172.]—**Béclard's s.** A modification of Bertrandi's s. in which the needle is

threaded with both a black and a white thread, so that, when it is removed, the threads are pulled in opposite directions. [Morris (A. 631).]—**Bertrandi's s.** Fr., *s. à points passés*. A continuous s. passed "through and through," as in basting.—**Bifrontal s.** See **Coronal s.**—**Biparietal s.** See **Sagittal s.**—**Buried s's.** Ger., *versenkte Nähte*. S's (2d def.) that are completely covered by skin and do not involve that structure at all. [a. 34.]—**Button s.** Ger., *Knopfnah*. A modification of the quilled s. in which buttons are used instead of quills. [E.]—**Circular s.** Fr., *s. circulaire*. Ger., *circuläre Naht*. A s. applied to the entire circumference of a divided organ (e. g., the intestine). [a. 34.]—**Circumvolut s.** See **Twisted s.**—**Clamp s.** Ger., *Klammernaht*. A modification of the quilled s. in which two pieces of perforated lead or silver are used, through which the wire s's are passed. [E.]—**Clavate s.** Ger., *Flockennaht*. See **Quilled s.**—**Coaptation s.** Ger., *Vereinigungsnah*. A uniting or coapting s., as distinguished from a s. intended to relieve tension. Cf. **Relief s.**—**Cobbler's s.** A form of s. in which a double-threaded needle is passed through both lips of a wound and one end of the thread is caught, pulled through the needle, and withdrawn; when the needle is passed back in taking a second stitch the remaining thread is removed from the needle and the thread left on the opposite side is inserted and the needle withdrawn. [a. 34.]—**Compound s.** See **Quilled s.**—**Continuous s.** The closure of a wound by means of one continuous thread, usually by transfixing first one lip and then the other, alternately, from within outward.—**Coronal s.** Lat., *sutura coronalis*. Fr., *s. coronale* (ou *fronto-pariétale*). Ger., *Kranznaht*, *Kronennaht*. The s. between the frontal and parietal bones. [L.]—**Cranial s's.** The s's between the bones of the skull. [L.]—**Cuneal s.** See **Fronto-sphenoidal s.**—**Czerny-Lembert s.** An intestinal s. in which the Czerny s. is employed to unite the mucous and the Lembert s. to unite the peritoneal coat. [a. 34.]—**Czerny's s.** An intestinal s. in which the thread passes through the mucous membrane alone, so as to bring that membrane and the connective tissue upon which it rests together. [a. 34.]—**Dentated s.** **Dentate s.** Ger., *Zahnnah*. An articulation by s. into the formation of which long and tooth-like processes and deep indentations enter.—**Dorsal s.** The somewhat prominent line or ridge, corresponding to the midrib of the carapace, opposite to the ventral s. [a. 35.]—**Double s. de l'utérus** (Fr.). See **Sänger's s.**—**Duverger's s.** A variety of the s. des quatre maîtres in which a piece of prepared calf's trachea was used as the supporting body.—**Dry s.** Ger., *Trockennaht*. The application of adhesive plaster to each side of a wound and the subsequent stitching of the edges of the plasters together. [a. 34.]—**Ethmoïdo-frontal s.** The s. between the ethmoid and frontal bones. [L.]—**Ethmo-lacrimal s.** The s. between the ethmoid and lacrimal bones. [L.]—**Ethmo-sphenoidal s.** The s. between the ethmoid and sphenoid bones. [L.]—**False s.** Lat., *sutura notha*. Fr., *fausse s.* Ger., *falsche Naht*. Any form of s. (1st def.) in which the bones do not interlock by serrations.—**Figure-of-eight s.** See **Twisted s.**—**Frontal s.** Lat., *sutura frontalis*. Fr., *s. frontale*. Ger., *Stirnnah*. An occasional s. in the frontal bone continued forward from the sagittal s. to the root of the nose. [L.]—**Fronto-ethmoidal s.** See **Ethmoïdo-frontal s.**—**Fronto-lacrimal s.** The s. between the frontal and lacrimal bones. [C. 3.]—**Fronto-malar s.** Ger., *Stirnbeinwangenbeinnah*. The s. between the frontal and malar bones. [L.]—**Fronto-maxillary s.** The s. between the frontal bone and the superior

CONTINUOUS SUTURE.

CROSS SUTURE.

DOUBLE-NEEDED SUTURE.

maxilla. [C. 3.]—**Fronto-nasal s.** Ger., *Stirnnasennaht*. The s. between the frontal and nasal bones. [C. 3.]—**Fronto-parietal s.** See **Coronal s.**—**Fronto-sphenoidal s.** Lat., *sutura spheno-frontalis*. Ger., *Keilnah*. The s. between the frontal bone and the ala of the sphenoid bone. [L. 332.]—**Fronto-temporal s.** The s. between the frontal and temporal bones. [L.]—**Furrier's s.** See **Glover's s.**—**Gely's s.** A continuous s. for wounds of the intestine, made with a thread having a needle at each end, so that a succession of cross-stitches may be made to extend from one end of the wound to the other. [E. 4.]—**Glover's s.** Ger., *Kürschner-nah*. A continuous s. in which the needle is, after each stitch, passed through the loop of the preceding stitch. [a. 34.]—**Grande s.** (Fr.). See **Sagittal s.**—**Grooved s.** See **SCHINDLEIS**.—**Hare-lip s.** Ger., *Hasenschartennaht*. See **Twisted s.**—**Harmonic s.** See **HARMONY** (1st def.).—**Implanted s.** A s. formed by implanting pins opposite each other on the two sides of a wound, and approximating the lips by winding thread or other similar material about the pins.—**Incisor s.** See **Incisor FISSURE**.—**India-rubber s.** A

variety of the twisted s. in which rubber rings are used instead of the figure-of-eight turns of silk, etc.—**Infra-orbital s.** An anomalous s. in the orbit following the course of the infra-orbital canal. [L. 332.]—**Inner s.** See *Ventral s.*—**Intermaxillary s.** The s. between the superior maxillae. [L.]—**Internasal s.** The s. between the nasal bones. [L.]—**Interparietal s.** See *Sagittal s.*—**Interrupted s.** Fr., *s. à points séparés, s. entrecoupée*. Ger., *Knopfnah*. A s. formed by single stitches inserted separately, the needle being usually passed through one lip from without inward, and through the other from within outward.—**Jobert's s.** 1. An interrupted s. used for uniting the cut ends of a divided intestine, the upper being invaginated into the lower. [E.] 2. A form of intestinal s. with inversion of the peritoneal coat. 3. A form of s. for complete division of the intestine in which a fold of omentum is interposed between the edges of the wound, which are united around it by Ledran's s. [Morris (A. 63).]—**Jugal s.** See *Sagittal s.*—**Knotted s.** See *Interrupted s.*—**Lambda s., Lambdoidal s., Lambdoid s.** Ger., *Lambdanaht, Hinterhauptsnaht*. The s. between the parietal bones and the two superior borders of the occipital bone. [C.]—**Lapeyronie's s.** A modification of Palfyn's s., in which the thread is passed through the mesentery and then attached to the skin. [Morris (A. 63).]—**Lead-plate s.** A s. consisting of a wire that is attached at each end to lead plates, about an inch in diameter, placed some distance from the edges of a wound. [“Med. Rec.” Oct. 26, 1889, p. 449 (a. 34).]—**Ledran's s.** A form of interrupted s. applied to wounds of the intestine. The threads, having all been introduced, were twisted together on each side of the wound, so as to pucker it, and then attached to the skin. [Morris (A. 63).]—**Lembert's s.** A

INTERRUPTED SUTURE.

method of uniting a divided intestine by means of s's so inserted as to invert the edges of the gut when traction is made, so that the serous surfaces are brought together.—**Lepidoid s.** See *Squamo-parietal s.*—**Littre's s.** Ligation of the inferior end of the intestine in cases of gangrene, in order to obliterate it, and the attachment of the upper end to the inguinal ring so as to form an artificial anus. [a. 34.]—**Longitudinal s.** See *Sagittal s.*—**Loop s.** See *Interrupted s.*—**Malo-maxillary s.** See *Sutura zygomaticomaxillaris*.—**Masto-occipital s.** See *Occipito-mastoid s.*—**Masto-parietal s.** See *Parieto-mastoid s.*—**Mattress s.** Ger., *Matratzennaht*. A continuous s. in which a stitch is taken with a needle, the thread is tied, and then the needle is inserted upon the same side as that from which it emerged and passed in the opposite direction through both lips of the wound, the direction of the needle being reversed at each stitch. [“Med. Rec.” Oct. 26, 1889, p. 449 (a. 34).]—**Maxillo-lacrimal s.** The s. between the superior maxilla and the lacrymal bone. [L.]—**Maxillo-premaxillary s.** A s. between the premaxillary portion of the superior maxilla and the rest of the bone. [L. 153.]—**Medio-frontal s.** See *Frontal s.*—**Metallic plate s.** See *Button s.*—**Metallic s.** S. (2d def.) with wire.—**Metopic s.** See *Frontal s.*—**Naso-maxillary s.** The s. between the nasal bone and the superior maxilla. [L.]—**Nerve s.** The union of the divided ends of a nerve by fine thread or catgut's s. [a. 34.]—**Neurocentral s.** The cartilaginous interval separating the portion of the bodies of the dorsal vertebrae posterior to the points of the articulation of the ribs from the main portion. [L. 142.]—**Noose s.** See *Interrupted s.*—**Occipital s.** See *Lambdoidal s.*—**Occipito-mastoid s.** Ger., *Warzenaht*. The s. between the occipital bone and the mastoid portion of the temporal bone. [C.]—**Occipito-parietal s.** See *Lambdoidal s.*—**Outer s.** See *Dorsal s.*—**Palatine s.** Ger., *Gaumennaht*. A s. between the palate bones. [L.]—**Palatine transverse s.** A s. between the palate processes of the palate bone and the superior maxilla. [L. 332.]—**Palfyn's s.** That variety of interrupted s. of a partially divided intestine in which a loop is passed at the middle of the wound, and the threads are fixed to the skin with plaster, thus approximating the bowel to the external wound. [Morris (A. 63).]—**Pancoast's s.** See *Plastic s.*—**Parietal s.** See *Sagittal s.*—**Parieto-mastoid s.** The s. between the parietal bone and the mastoid portion of the temporal bone. [C.]—**Petro-occipital s.** The s. between the petrous portion of the temporal bone and the occipital bone. [L.]—**Petro-sphenoidal s.** The s. between the petrous portion of the temporal bone and the ala magna of the sphenoid bone. [L.]—**Pin s.** See *Twisted s.*—**Plastic s.** A form of s. devised by J. Pancoast, and so named by him, for use in his method of increasing the chances of union in superficial wounds by enlarging the extent of the surfaces approximated. A groove is formed along one lip of the wound, on its cut surface, and the other lip is beveled in such a manner that it will fit into the groove. The thread is passed from without inward through (1) the outer lip of the groove, (2) the beveled lip, (3) the deep lip of the groove; then, forming a loop on the deep surface of the grooved lip, it is passed through the same structures again, traversing them at a different place and in inverse order. The two free ends are then tied over a

LEMBERT-CZERNY SUTURE.

small roll of adhesive plaster laid on the cutaneous surface of the grooved lip.—**Quilled s., Quill s.** Lat., *sutura clavata*. Fr., *s. enchevilée, s. emplumée, s. empenée*. Ger., *Balkennaht, Keilfingennaht, Knopfpfennennaht, Zapfennaht*. An interrupted s. in which a double thread is passed deep into the tissues, even quite below the bottom of the wound, the needle being so withdrawn as to leave a loop hanging from one lip and the two free ends of the thread from the other. A quill, or, more commonly, a piece of bougie is passed through the loops, which are tightened upon it, and the free ends of each separate thread are then tied together over a second quill. The object is to bring the deep parts into firm coaptation.—**Ramdohr's s.** An intestinal s. in which the upper portion of the intestine is invaginated into the lower and the peritoneal surfaces are stitched together. [a. 34.]—**Rat-tail s's.** S. material made from fine fibres obtained from the rat's tail. [“Med. News,” Dec. 5, 1891, p. 660 (a. 34).]—**Relief s.** Ger., *Entspannungnaht*. A row of supplementary s's including the tissues to the extent of 1 or 1½ inch on each side of a fistula or a deep wound, for the purpose of lessening the strain on the coaptation s's. [a. 57.]—**Reybard's s.** An intestinal s. by means of thin oval wooden plates having threads and needles attached. The plates, placed within the intestine, served to keep the latter in apposition with the abdominal parietes, through which the needle and thread were passed. [a. 34.]—**Rigal's s.** India-rubber s., so called because first practiced by Rigal. [a. 34.]—**Royal s.** Fr., *point royal*. Ger., *königlicher Stich*. Syn.: *royal stitch*. An old operation for the cure of femoral hernia, consisting of ligation of the sac close to the ring. [a. 34.]—**Sabatier's s.** A variety of the s. des quatre maîtres in which a piece of card or of St. John's wort, smeared with oil of turpentine or varnished, was used for the supporting body. [Morris (A. 63).]—**Sagittal s.** Fr., *grande s.* Ger., *Pfeilnaht*. The s. between the upper margins of the parietal bones. [L.]—**Singer's s.** In the Cesarean operation, the insertion of eight or ten deep s's of soft silver wire through the incised uterine peritonæum and muscle in such a manner as to invert the serous surfaces and approximate them, after which twenty or more superficial s's are passed through the peritonæum alone. [a. 34.]—**Scaly s.** See *Squamous s.*—**Seminiferous s.** See *Ventral s.*—**Sero-serous button s.** See *Sänger's s.*—**Sero-serous s.** Fr., *s. séro-séreuse*. Ger., *symperitoneale Naht*. The s. of two peritoneal surfaces to each other. [A. 32.]—**Serrated s.** Ger., *Sägeennaht*. An articulation by s. in which the bones are interlocked by small projections and indentations that are fine and delicate as compared

PIN SUTURES.

with those of the dentated s.—**Shotted s.** A form of s. in which both ends of a wire are passed through a perforated shot that is then compressed tightly over them. [a. 34.]—**Spheno-malar s.** See *Sutura sphenozygomatica*.—**Spheno-parietal s.** The s. between the parietal bone and the ala magna of the sphenoid bone. [L.]—**Spheno-petrous s.** See *Petro-sphenoidal s.*—**Spheno-squamous s.** See *Squamo-sphenoidal s.*—**Spheno-temporal s.** The s. between the sphenoid and temporal bones. [L. 88 (a. 50).]—**Spiral s.** See *Glover's s.*—**Spiroidal s.** A spiral continuous s. for wounds of the intestine. [Morris (A. 63).]—**Squamo-parietal s., Squamosal s.** Fr., *s. écailleuse*. Ger., *Schuppennaht, Schilfenschuppennaht*. The s. between the parietal bone and the squamous portion of the temporal bone. [L.]—**Squamo-sphenoidal s.** The s. between the squamous portion of the temporal bone and the great wing of the sphenoid bone. [L.]—**Squamous s.** See *Squamo-parietal s.*—**Staple s.** A sharpened wire shaped like a staple that is passed through both lips of a wound and then bent back. [a. 34.]—**Subcuticular s.** A buried continuous catgut s. in which the needle is passed horizontally beneath the epidermis into the cutis vera, emerging at the angle of the wound, then in a similar manner passed through the cutis vera of the opposite side of the wound, and so on until the other angle of the wound is reached. [“Brit. Med. Jour.” Feb. 22, 1890, p. 414 (a. 34).]—**Sunk s's.** See *Buried s's.*—**Superficial s.** 1. See *HARMONY* (1st def.). 2. A stitch passed merely through the skin to secure nice coaptation of the edges of a wound, in contradistinction to deep s's.—**S. à anse** (Fr.). Ger., *Schlingennaht*. A form of interrupted s. in which the ends of the threads are collected and tied in a single knot, instead of each being tied separately. [E.] Cf. *Ledran's s.*—**S. à épinges** (Fr.). Ger., *Etagennaht*. See *Interrupted s.*—**S. à plaques** (Fr.). See *Button s.*—**S. à plaques latérales** (Fr.). See *Quilled s.*—**S. à points passés** (Fr.). See *Bertrand's s.*—**S. à points séparés** (Fr.). See *Interrupted s.*—**S. by harmony.** See *HARMONY* (1st def.).—**S. continue en spirale** (Fr.). See *Glover's s.*—**S. canaliculaire** (Fr.). See *Fronto-sphenoidal s.*—**S. des quatre maîtres** (Fr.). A method of uniting a divided intestine practiced in the thirteenth century by four monks of Paris.

A hollow cylinder (of wood, or of the windpipe or dried intestine of an animal) was introduced into the intestine so as to support it, and the edges of the wound were stitched together over it. [Morris (A. 63).]

—**S. empennée** (Fr.). **S. emplumée** (Fr.). **S. enchevillée** (Fr.). See **Quilled s.**—**S. en surjet** (Fr.). That form of continuous s. in which the thread is carried back after the last insertion and tied to the other end, left long for the purpose. —**S. entortillée** (Fr.). See **Twisted s.**—**S. entrecoupée** (Fr.). See **Interrupted s.** and **Button s.**—**S. of the four masters**. See **S. des quatre maîtres**—**S. par cellules**. An anatomical s. such as that of the ethmoid with the adjacent bones. [A. 301 (a. 34).]—**S. par harmonie** (Fr.). See **HARMONY** (1st def.).—**S. perdue** (Fr.). See **Buried s.**—**S. primo-secondaire** (Fr.). Of Rohmer, the insertion of s's in a wound at the time of the operation, tamponing the wound, and fastening the s's from twelve to forty-eight hours later. ["Union méd." June 19, 1888, p. 928 (a. 34).]—**S. saignée** (Fr.). See **Sutura cruenta**.—**S. sèche de Goyrand** (Fr.). A form of dry s. in which a strip of cloth saturated with collodion is placed on each side of the long axis of a wound, each strip having attached to it strings which, when tied together, approximate the edges of the wound. [a. 34.]—**S. sèche de Mazier**. A modification of the s. sèche de Goyrand in which the edges of the strips are stitched together. [a. 34.]—**S. séro-sérueuse**. See **Sero-serous s.**—**S. twister**. An instrument used to twist together the ends of a wire s. [a. 34.]—**Symphitono-neal s.** Sero-serous s. of the peritoneum. —**Temporo-occipital s.** See **Occipito-mastoid s.**—**Temporo-parietal s.** The s. between the temporal and parietal bones, made up of the squamosal and parieto-mastoid s's. [L.]—**Transverse (frontal) s.** See **Coronal s.**—**Triangular s. of Simon**. A form of s. for closing lacerations of the perineum involving the sphincter and in which separate sets of s's are inserted in the rectal mucous membrane, the vaginal mucous membrane, and the skin. —**True s.** Lat., *sutura vera*. Fr., *vraie s.* Ger., *ächte Naht*. That form of s. (1st def.) in which the bones actually interlock by indentations and projections. See **Serrated s.** and **Dentated s.**—**Twisted s.** Fr., *s. entortillée*. A s. in which pins are passed through the opposite lips of a wound, at right angles to the direction of the wound, and thread, floss, or other like material is wound about the pins, crossing them first at one end and then at the other in a figure-of-eight fashion, thus holding the lips of the wound firmly together. —**Uninterrupted s.** See **Continuous s.**—**Uterine s.** See **HYSTERORRHAPHY** (1st def.). —**Utero-parietal s.** Of Pilloro, suturing of the uterus to the internal surface of the abdominal wall after the Cesarean operation. ["Gaz. des hôp." 1864, p. 595 (a. 34).]—**Ventral s.** The inner s. on which the ovules are normally borne; the line of juncture of the edges of the carpel or adjacent carpels. [a. 35.]—**Viscero-parietal s.** The operation of stitching a wounded organ (like the uterus after the Cesarean operation) to the abdominal incision. —**Wölfer's internal s.** An interrupted s. for the intestines in which three fourths of the threads are tied with the knot free in the lumen of the bowel and the rest with the knot outside. ["Med. Rec." Oct. 26, 1889, p. 449 (a. 34).]—**Zygomatic s.** A s. between the zygomatic process of the superior maxilla and the temporal bone. [L.]

**SUTURE**, v. tr. Su<sup>2</sup>t/ur. To sew up a wound.

**SWAB-STICK**, n. Swob'stīk. A shaft one end of which is to be wrapped with cotton, for making applications of medicinal substances. It may be plain or notched at the end.

**SWALLOW**, n. Swol'o. See **HIRUNDO**.—**Chinese s's' nests**. The gelatinous, edible nests of *Hirundo esculenta*, formed of a secretion from the mouth of the bird. [B. 19 (a. 35).]

**SWALLOWING**, n. Swol'o-<sup>2</sup>n<sup>2</sup>. See **DEGLUTITION**.

**SWALLOWWORT**, n. Swol'o-wu<sup>2</sup>rt. See **ASCLEPIAS** (2d def.) and **CHELIDONIUM** (1st def.).

**SWAMPWOOD**, n. Swa'mp/wu<sup>2</sup>d. See **DIRCA palustris** and **CEPHALANTHUS occidentalis**.

**SWARTZIA** (Lat.), n. f. Swa<sup>2</sup>rts/i<sup>2</sup>a<sup>2</sup>. From *Swartz*, a Swedish botanist. Fr., *swartzie*. A genus of the *Leguminosae*. The *Swartzieae* are a tribe of the *Papilionaceae*. [a. 35.]—**S. tomentosa**. A tree of the forests of Guiana, furnishing a bitter, sudorific bark (panococo-bark) which exudes a reddish sap hardening into a dark resin. The flowers are antispasmodic. [a. 35.]

**SWEAT**, n. Swe<sup>2</sup>t. A.-S., *swēat*. Gr., ἵδρως. Lat., *sudor*. Fr., *sueur*. Ger., *Schweis*. 1. The product of secretion from the perspiratory glands, perspiration (3d def.); a clear, colorless, acid, and, when first secreted, odorless liquid, the chief constituents of which are water, chlorides (especially sodium chloride), fatty substances, and urea. 2. In popular language, sensible perspiration. —**Bloody s.** See **HÆMATIDROSIS**. —**Blue s.** Perspiration communicating a bluish or green tint to the underclothing. [L. 41 (a. 14).]—**Cold s.** Lat., *epidrosis diaphoretica* (seu *synoptica*). Perspiration accompanied with a sensation of cold, as in syncope. —**Colored s.** See **CHROMIDROSIS** and **BLEPHARO-CHROMIDROSIS**. —**Critical s.** See **EPIDROSIS febrilis**. —**Diaphoretic s.** See **Cold s.**—**Night-s.** See the major list. —**S. house**. An inclosed space containing means for subjecting an inmate to the sudorific effect of steam. [a. 34.]—**Syncopeal s.** See **Cold s.**

**SWEATING**, n. Swe<sup>2</sup>t/i<sup>2</sup>n<sup>2</sup>. See **PERSPIRATION** (1st def.). —**Morbid s.** See **EPIDROSIS**. —**Unilateral s.** Lat., *transpiratio unilateralis, hemidiaphoresis*. S. upon one lateral half of the body; usually due to nervous disease.

**SWEET CHALYBEATE SPRINGS**, n. Sweet ka<sup>2</sup>l-i<sup>2</sup>b'e<sup>2</sup>a. A place in Alleghany County, Virginia, where there are chalybeate springs. [Anderson (a. 14).]

**SWEET SPRINGS**, n. Sweet. 1. A place in Monroe County, Virginia, where there are sulphurous springs. [L. 80, 57 (a. 14).] 2. Mineral springs in Saline County, Missouri. [A. 363 (a. 21).]

**SWEET WILLIAM**, n. Sweet wi<sup>2</sup>l'y'm. See **DIANTHUS barbatus** and **CHEIRANTHUS cheiri**.

**SWEET-WOOD**, n. Swet/wu<sup>2</sup>d. The *Croton eleuteria* and certain other plants. [a. 35.]—**White s.-w.** See **NECTANDRA leucantha** and **NECTANDRA sanguinea**.

**SWELLING**, n. Swe<sup>2</sup>i<sup>2</sup>n<sup>2</sup>. Gr., ὄγκος, ὄψμα. Lat., *tumiditas*. Fr., *gonflement*. Ger., *Geschwulst*. A traumatic, inflammatory, or other morbid enlargement. [a. 34.]—**Albuminous s.** See **Cloudy s.**—**Blennorrhagic s. of the knee**. See **GONORRHEAL RHEUMATISM**.—**Cloudy s.** Fr., *tumefaction trouble*. Ger., *trübe Schwellung*. Of Virchow, a s. of cells due to nutritive irritation; they increase in bulk while the added material is not properly assimilated, but deposited in visible albuminous granules. [a. 34.]—**Dorsal s.** See **MEDULLARY RIDGES**.—**Embryonic s.** Ger., *Keimwulst* [Kölliker], *Randwulst* [Götze], *Keimwall* [His]. A thickening of that portion of the blastoderm that forms the margin of the blastopore. [A. 5.]—**Glassy s.** Of Weber, amyloid degeneration and degeneration of muscular fibres, etc. [B. 34.]—**Lacteal s.**, **Lactiferous s.** [Cooper]. A s. of the breast from obstruction of the lactiferous ducts. [a. 34.]—**White s.** See **FUNGUS ARTERITIS** and **SPINA ventosa**.

**SWERTIA** (Lat.), n. f. Swe<sup>2</sup>rt/i<sup>2</sup>a<sup>2</sup>. From *Swert*, an herbalist. Fr., *swertie*. A genus of herbs, of the *Swertiae*, which are a tribe of the *Gentianaceae*. [a. 35.]—**S. alata**. A Himalayan species said to be the source of a false chirata devoid of bitter properties. [a. 35.]—**S. angustifolia**. The *Agathotes angustifolia*. It furnishes a chirata inferior in bitterness to the true chirata. [a. 35.]—**S. chirata**, **S. chirayta**. True chiratta, the *Agathotes chirayta*; an herb furnishing the chirata of the U. S. Ph., a pure, bitter tonic consisting chiefly of the dried stems with portions of the root attached. The drug is recommended in gouty and other forms of indigestion; it does not constipate; it is a cholagogue; and it checks acidity of the stomach. In India it is also used, especially along with the seeds of *Cesalpinia bonducella*, as a febrifuge. [a. 35.]—**S. difformis**. See *FRASERA Walteri*.—**S. elegans**, *The salaras* of India. The bitter stems are tonic and febrifuge. [a. 35.]—**S. multiflora**. An East Indian species substituted for chirata. The root is especially used. [a. 35.]—**S. perennis**. Fr., *s. vivace*. Marsh felwort (or gentian) of Europe. The leaves are used like those of *Pleurogyne rotata*. [a. 35.]—**S. rotata**. Fr., *s. en roue*. See *PLEUROGYNE rotata*.

**SWIETENIA** (Lat.), n. f. Swet-an/i<sup>2</sup>a<sup>2</sup>. From *van Swieten*, an Austrian physician. Fr., *swieténie*. A genus of trees, of the *Swietenae* or *Swieteniceae*, which are a tribe of the *Meliaceae*. [a. 35.]—**Cortex swieteniceae**. See under *S. mahagoni*.—**S. chloroxylon**. See *CHLOROXYLON s.*—**S. febrifuga**. See *SOYMDA febrifuga*.—**S. mahagoni**, **S. mahagoni**. Fr., *cajao*; a *bous*, *cèdre des Antilles*. Ger., *Mahagonibaum*. The mahogany-tree of Central America and the West Indies. The bitter, astringent bark, *cortex mahagoni* (seu *swieteniceae*, seu *ligni mahagoni*), contains catechin, and was formerly used in dysentery and as a febrifuge. The seeds yield a purgative fixed oil (caraba-oil). [a. 35.]—**S. senegalensis**. See *KHAYA senegalensis*.—**S. soymda**. See *SOYMDA febrifuga*.—**S. sureni**. See *CEBRELA febrifuga* (1st def.).

**SWIMMERET**, n. pl. Swi<sup>2</sup>m'er<sup>2</sup>e<sup>2</sup>t. One of the limbs of the *Crustacea*, which are adapted for swimming. [B. 28 (a. 27).]

**SWINEBREAD**, n. Swin'bre<sup>2</sup>d. The *Tuber cibarium*. [a. 35.]

**SWINE-POX**, n. Swin'po<sup>2</sup>x. Lat., *variolae suillae*. Ger., *Schweinepocken*. 1. A disease peculiar to swine, characterized by hard inflammatory tubercles on the legs and thighs. 2. Varicella, especially varicella globata. [D. 1.]

**SWING**, n. Swi<sup>2</sup>n<sup>2</sup>. A seat suspended so as to admit of a to-and-fro motion. [a. 48.]—**Salter's s.** An apparatus for treating fractures of the lower extremity. It consists of a cradle attached by support to wheels that run along a horizontal rod on an iron framework. [a. 34.]

**SWOLLEN**, adj. Swol'in. Gr., ἐμφυσῶμενος. Lat., *inflatus*. Fr., *gonflé*. Ger., *geschwollen*. Affected with swelling. [D.]

**SWOON**, n. Swun. Gr., λειροθυμία. Lat., *animi deliquium*. Fr., *défaillance, évanouissement*. Ger., *Ohnmacht*. The act of swooning; syncope. [a. 34.]

**SWOONING**, n. Swun/i<sup>2</sup>n<sup>2</sup>. See **SYNCOPE**.

**SYAGRUS** (Lat.), n. f. Si(su<sup>2</sup>)a<sup>2</sup>g(a<sup>2</sup>g)-ru<sup>2</sup>s(ru<sup>2</sup>s). See *Cocos* (1st def.).

**SYCAMORE**, n. Si<sup>2</sup>k(a<sup>2</sup>)-mor. From σύκον, a fig, and μωρα, the mulberry. Fr., *sycomore*. 1. The *Acer pseudo-platanus*. [a. 35.] 2. See *FICUS sycomoros*.—**American s.** See *PLATANUS occidentalis*.

**SYCACARPUS** (Lat.), n. m. Si<sup>2</sup>k(su<sup>2</sup>)k-a<sup>2</sup>-ka<sup>2</sup>rp'u<sup>2</sup>s(u<sup>2</sup>s). From σύκον, a fig, and καρπός, fruit. A genus of *Meliaceae*, referred to *Guarea*. [a. 35.]—**S. Rusbyi**. An undetermined species of *Guarea*; a Bolivian tree yielding cocillafia (q. v., in Supplement). [a. 35.]

**SYCE** (Lat.), **SYCEA** (Lat.), n's f. Si(su<sup>2</sup>)k'e(a), si<sup>2</sup>s(su<sup>2</sup>)k'e<sup>2</sup>a<sup>2</sup>. Gr., συκή, συκέα. See *FICUS* (2d def.).

**SYCÉPHALIE** (Fr.), n. Se-sa-fa<sup>2</sup>-le. Of Geoffroy St.-Hilaire, a form of double monstrosity in which there are two bodies, distinct below the umbilicus and surmounted by two more or less incomplete heads intimately united. [L. 41, 49 (a. 14).]

**SYCHNOCARPOUS**, adj. Si<sup>2</sup>k-no-ka<sup>2</sup>rp'u<sup>2</sup>s. From συκρός, frequent, and καρπός, fruit. Capable of fruiting many times without perishing. [a. 35.]

**SYCHNURESIS** (Lat.), n. f. Si<sup>2</sup>k(su<sup>2</sup>)ch<sup>2</sup>-nu<sup>2</sup>r(nur)-e(a)/si<sup>2</sup>s. Gen., -es'cos (-is). From συκρός, frequent, and οὐρησις, urination. Fr., *sychnurie*. Morbid frequency of urination. [A. 385 (a. 48).]

**SYCITES** (Lat.), n. m. Si<sup>2</sup>s(su<sup>2</sup>)k(-it)(et)/ez(as). Gen., -it'u (-æ). Gr., συκίτης (from σύκον, a fig). See *CATORCHITES*.

**SYCCOCERYL ALCOHOL**, **SYCCOCERYL HYDRATE**, n's. Sik-os-er'i<sup>2</sup>l. An aromatic monatomic alcohol, C<sub>18</sub>H<sub>36</sub>O (or C<sub>18</sub>H<sub>36</sub>O = C<sub>18</sub>H<sub>36</sub>.OH); a natural crystalline acetic ether found in the resin

of *Ficus rubiginosa*, and occurring as thin crystals which melt at 90° C. [B, 2; B, 3, 270 (a, 38).]

**SYOCERYLIC ACID**, n. Sik<sup>o</sup>-e<sup>2</sup>-i<sup>2</sup>ik. Fr., *acide syocérylique*. Ger., *Syocerylsäure*. A dark-yellow resinous substance, C<sub>15</sub>H<sub>20</sub>O<sub>4</sub>. [B, 38, 93 (a, 14).]

**SYCOMA** (Lat.), n. n. Sik<sup>o</sup>(su<sup>k</sup>)-om<sup>a</sup>. Gen., -om<sup>a</sup>atos (-atis). Gr., *σύνωμα* (from *σύνω*, a fig). See **FIGUS** (1st def.).

**SYCOMORE**, n. Sik<sup>o</sup>-o-mor. See **SYCOMORE**.

**SYCON** (Lat.), n. n. Sik<sup>o</sup>(su<sup>k</sup>)-o<sup>2</sup>n. Gr., *σύνων*. 1. A fig. 2. A large wart on the eyelids. 3. The pudenda muliebria.

**SYCONE** (Lat.), **SYCONIUM** (Lat.), **SYCONUS** (Lat.), n's f., n., and m. Sik<sup>o</sup>(su<sup>k</sup>)-o<sup>2</sup>n-e(a). Sik<sup>o</sup>(su<sup>k</sup>)-on<sup>2</sup>-u<sup>m</sup>(u<sup>m</sup>), Sik<sup>o</sup>(su<sup>k</sup>)-o<sup>2</sup>n-u<sup>s</sup>(u<sup>s</sup>). From *σύνων*, a fig. Fr., *sycone*, *endophrise*. Ger., *Feigenfrucht*. A fleshy hollow receptacle containing achænum-like fruits. [a, 35.]

**SYCORRHETIN**, n. Sik-or-ret<sup>2</sup>n. From *σύνων*, a fig, and *ρῆτιν*, resin. Fr., *syccorrhétine*. A colorless, amorphous substance found in the resin of *Ficus rubiginosa*. [B, 270 (a, 38).]

**SYCOSIS** (Lat.), n. f. Sik<sup>o</sup>(su<sup>k</sup>)-os<sup>2</sup>is. Gen., -os<sup>2</sup>eos (-is). From *σύνων*, a fig. Fr., *sycose*, *s. non-parasitaire* (3d def.), *dartre pustuleuse*, *mentagie* (3d def.). Ger., *Feigwarzenkrankheit*, *Bartfinne*, *Bartflechte*, *Kieferaussatz* (all 3d def.). 1. See **FIGUS** (1st def.). 2. A fungous ulcer. [E.] 3. Cocogenic or schizomycetous s.; a chronic follicular inflammation of the skin, affecting regions covered by the coarser hairs, most commonly the bearded portion of the face, and probably due to microbic infection of the hair follicles. It is characterized by an eruption of pustules, papules, or tubercles occupying the sites of hair follicles and sometimes attended with the formation of adherent crusts. This affection has generally been known as non-parasitic s. in contradistinction to parasitic s. But the two forms are better distinguished as schizomycetous s. and hyphomycetous s. [G.]—**Bacillogenic s.** Of Tommasoli, a variety of so-called "non-parasitic" s.; said to be due to an organism called *Bacillus sycosiferus fetidus*. In the one case observed the clinical appearances did not differ from those of ordinary cocogenic s. of a mild type. [Crocker (G).]—**Cocogenic s.**, **Cocogenous s.** Of Unna, the so-called "non-parasitic" s., which is now known to be due to the presence of organisms belonging to the *Schizomyces*, while the so-called "parasitic" form, being due to parasites of the nature of *Hyphomyces*, is termed hyphogenic s.—**Hypertrophic s.** See **Keloid s.**—**Hyphogenic s.**, **Hyphomycetous s.** Of Unna, *s. parasitaria*. [G.] See **Cocogenic s.**—**Keloid s.** Of Milton, a follicular inflammation affecting especially the bearded parts of the face, followed by cicatricial or keloid atrophy and destruction of the hair follicles. The disease has been regarded as identical in its nature with the dermatitis papillaris capillitii of Kaposi. [G.]—**Lupoid s.** See **Keloid s.**—**Non-parasitic s.** See **S.** (3d def.).—**Parasitic s.** See **S. parasitaria**.—**Schizomycetous s.**, **Schizomycetous s.** See **Cocogenic s.**—**S. barbie**. S. of the beard. [G.]—**S. capillitii**. 1. See **DERMATITIS papillaris capillitii**. 2. S. of the scalp. See **Kerion**. 3. Pustular eczema of the scalp. [G, 10, 28.]—**S. contagiosa**. See **S. parasitaria**.—**S. frambesiformis**. See **DERMATITIS papillaris capillitii**.—**S. lupoides** (Fr.). See **FOLLICULITIS deculens** (3d def.).—**S. mentagie**. See **S. barbie**.—**S. non-parasitaria**. See **S.** (3d def.).—**S. palpebræ marginalis**. S. apparently confined to the edge of the eyelid. [F.]—**S. parasitaria**. **S. parasitica**. Barber's itch; a parasitic disease due to the presence of the *Trichophyton tonsurans* in the hairs and hair follicles; occurring most commonly in the region occupied by the beard (ringworm of the beard), though the same disease may affect other regions covered by coarse hair (cf. **KERION**). There is a superficial form, like ordinary ringworm, characterized by the production of red, scaly patches, and there is a deeper process with the formation of pustular or tuberculous patches, sometimes exuding or covered by crusts, and often attended with the formation of abscesses. The hairs within the areas affected become dry and lustreless, sometimes break off, or more commonly are loosened in their follicles, drop out, or when plucked out offer little resistance. The affection is distinguished from ordinary s. by its frequent resemblance, at the beginning, to ringworm in other situations; by the fact that in the parasitic form the hairs are affected primarily, while in the common form they are affected secondarily; and by the more rapid extension and severer course of the former, together with a greater tendency to the production of abscesses or prominent fleshy elevations. [G.]—**S. tarsal**. See **PALPEBRAL CONJUNCTIVITIS**.—**S. vulgaris**. See **S.** (3d def.).

**SYCUM** (Lat.), n. n. Sik<sup>o</sup>(su<sup>k</sup>)-u<sup>m</sup>(u<sup>m</sup>). Gr., *σύνων*. See **FIGUS** (1st def.).

**SYDERATIO** (Lat.), n. f. Sid<sup>o</sup>(su<sup>d</sup>)-e<sup>2</sup>-r-a(a<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., -on<sup>2</sup>is. See **SIDERATIO**.

**SYGGNOSCISM**, n. Si<sup>2</sup>g-j<sup>2</sup>g<sup>2</sup>-no<sup>2</sup>s-si<sup>2</sup>zm. An erroneous formation for *Syngnoscism*. From *συγγνώσκω*, to agree with. Of Hammond, hypnotism; strictly one of its phenomena, consisting in a complete sympathy on the part of the patient with the operator. [D.]

**SYLLABLE-STUMBLING**, n. Si<sup>2</sup>l<sup>2</sup>-a<sup>2</sup>-b<sup>2</sup>-stu<sup>2</sup>mb<sup>2</sup>-li<sup>2</sup>n<sup>2</sup>. Dysphasia by elision of one or more syllables of a word. [a, 34.]

**SYLLEPSIOLOGY**, n. Si<sup>2</sup>l<sup>2</sup>-e<sup>2</sup>ps-i<sup>2</sup>-o<sup>2</sup>-li<sup>2</sup>. Lat., *syllapsiologia* (from *σύνληψις*, conception, and *λόγος*, understanding). Fr., *syllapsiologie*. The physiology of conception. [L, 50 (a, 14).]

**SYLLEPSIS** (Lat.), n. f. Si<sup>2</sup>l<sup>2</sup>(su<sup>l</sup>)-le<sup>2</sup>ps-laps<sup>2</sup>is. Gen., -le<sup>2</sup>ps-eos (-is). Gr., *σύνληψις* (from *σύνλαμβάνειν*, to conceive). Fr., *s.* See **CONCEPTION**.

**SYLVACROL**, n. Si<sup>2</sup>l<sup>2</sup>-v<sup>2</sup>-a<sup>2</sup>-k-ro<sup>2</sup>. Of Eberhardt, a soft, yellow, very acid resin obtained from *Stillingia root*. [a, 35.]

**SYLVAN**, n. Si<sup>2</sup>l<sup>2</sup>-v<sup>2</sup>-n. See **METHYLETROL**.

**SYLVANES** (Fr.), n. Sel-vā<sup>2</sup>n. A place in the department of the Aveyron, France, where there is a mineral spring. [a, 14.]

**SYLVATICUS** (Lat.), **SYLVESTRIS** (Lat.), adj's. Si<sup>2</sup>l<sup>2</sup>(su<sup>l</sup>)-va<sup>2</sup>t(wa<sup>2</sup>t)<sup>2</sup>ik-u<sup>s</sup>(u<sup>s</sup>), -ve<sup>2</sup>st(wē<sup>2</sup>st)<sup>2</sup>ri<sup>2</sup>s. See **SILVESTRIS**.

**SYLVIAN**, adj. Si<sup>2</sup>l<sup>2</sup>-v<sup>2</sup>-i<sup>2</sup>-n. Fr., *sylvien*. Investigated by or named from J. Sylvius (originally Du Bois), a French physician.

**SYLVIC ACID**, n. Si<sup>2</sup>l<sup>2</sup>-vi<sup>2</sup>ik. Fr., *acide sylvique* (ou *pyromarique*). Ger., *Sylveinsäure*. 1. A substance, C<sub>20</sub>H<sub>30</sub>O<sub>4</sub>, forming, according to Unverdorben, the chief ingredient of colophony and crystallizing from alcohol as prisms. [a, 38.] 2. See **ABIETIC ACID**.

**SYLVINES**, n. Si<sup>2</sup>l<sup>2</sup>-ven<sup>2</sup>. Ger., *Sylvin*. Native potassium chlorides occurring in salt mines in regular crystals. [B, 270 (a, 48).]

**SYMBIOSIS** (Lat.), n. f. Si<sup>2</sup>m(su<sup>m</sup>)-bi<sup>2</sup>-os<sup>2</sup>is. Gen., -os<sup>2</sup>eos (-is). Gr., *συνβίωσις* (from *συνβιών*, to live with). Fr., *symbiose*. Ger., *Symbiose*. The normal association of dissimilar organisms, on account of their being mutually serviceable. [B; a, 35.] Cf. **COMMENSALISM**.

**SYMBLEPHARON** (Lat.), n. n. Si<sup>2</sup>m(su<sup>m</sup>)-ble<sup>2</sup>-a<sup>2</sup>-r(a<sup>2</sup>)-o<sup>2</sup>n. From *σύν*, with, and *βλέφαρον*, the eyelid. Fr., *symbépharon*. Ger., *S. Augenlidverwachsung*. Adhesion between the bulbar and palpebral conjunctivæ, and occasionally between the latter and the cornea; the result of injuries or burns. [F.] Cf. **ANKYLOBLEPHARON**.

**S. anterior**. S. of the anterior part of the conjunctival sac. In which the cicatricial bands stretch like a bridge between the lid and the eyeballs, permitting the passage of a sound between the lid and the globe. [A, 319 (a, 84).]—**S. posterior**. S. involving the posterior (peripheral) part of the conjunctival sac (the fold of transition). [B.]—**S. totale**. S. affecting the whole extent of the lid. [B.]

**SYMBLEPHAROSIS** (Lat.), n. f. Si<sup>2</sup>m(su<sup>m</sup>)-ble<sup>2</sup>-a<sup>2</sup>-r(a<sup>2</sup>)-os<sup>2</sup>is. Gen., -os<sup>2</sup>eos (-is). From *σύν*, with, and *βλέφαρον*, an eyelid. Adhesion of the eyelids to each other or to the eyeball. [F.] Cf. **ANKYLOBLEPHARON** and **SYMBLEPHARON**.

**SYMBOL**, n. Si<sup>2</sup>m-bu<sup>2</sup>l. Gr., *σύμβολον* (from *συνβάλλειν*, to compare). In chemistry, a letter or combination of letters used to designate the atom of an element. Thus, O is the s. of oxygen, denoting one atom of it. [B.]

**SYMMELIA** (Lat.), n. f. Si<sup>2</sup>m(su<sup>m</sup>)-mel(mē<sup>2</sup>l)<sup>2</sup>-i<sup>2</sup>-a<sup>2</sup>. From *σύν*, with, and *μέλος*, a limb. Fr., *symélie*. Ger., *Symmelie*. A monstrosity in which the lower extremities are completely or almost completely united. [a, 34.]

**SYMMELUS** (Lat.), n. m. Si<sup>2</sup>m(su<sup>m</sup>)-mē<sup>2</sup>-l-u<sup>s</sup>. A monster exhibiting symmelia. [B.]

**SYMMETRICAL**, adj. Si<sup>2</sup>m-me<sup>2</sup>-t<sup>2</sup>-ri<sup>2</sup>-k<sup>2</sup>l. Gr., *συμμετρικός* (from *σύν*, with, and *μέτρον*, a measure). 1. Having the parts disposed in some regular order relatively to each other or relatively to an imaginary axis or medial plane in the organism. [a, 48.] 2. Of a flower, having the same number of members in the calyx, corolla, and androecium; also, according to recent German botanists, capable of division into "halves each of which is an exact reflex image of the other." [a, 35.] 3. Of a trisubstituted benzene compound, having all three of the replacing radicles attached to alternate atoms of carbon. [B.]—**Doubly s.** Of a flower, capable of being divided vertically into similar halves in two or more planes. [a, 35.]—**Simply s.** Of Sachs, see **MONOSYMMETRICAL**.

**SYMMETRY**, n. Si<sup>2</sup>m-me<sup>2</sup>-t<sup>2</sup>-ri<sup>2</sup>. Gr., *συμμετρία*. The condition of being symmetrical. [a, 35.]—**Antero-posterior s.** In zoology, the condition of having the anterior and posterior extremities corresponding symmetrically to each other. [L, 196.]—**Bilateral s.** In zoology, the condition of having the body or any part divisible into symmetrical halves. [L, 196.]

**SYMPASMA** (Lat.), n. n. Si<sup>2</sup>m(su<sup>m</sup>)-pa<sup>2</sup>-z(pa<sup>2</sup>s)<sup>2</sup>-ma<sup>2</sup>. Gen., -pas<sup>2</sup>-mātos (-is). Gr., *σύνπασμα* (from *συνπάσσειν*, to besprinkle). See **CATAPASM**.

**SYMPATHEONEURITIS** (Lat.), n. f. Si<sup>2</sup>m(su<sup>m</sup>)-pa<sup>2</sup>-th-(pa<sup>2</sup>th)-e<sup>2</sup>-o<sup>2</sup>(o<sup>2</sup>)-nu<sup>2</sup>-r-it(e<sup>2</sup>)<sup>2</sup>is. Gen., -it<sup>2</sup>-idus (-is). For deriv., see **SYMPATHY** and **NEURITIS**. Inflammation of the sympathetic nerve.

**SYMPATHETIC**, adj. Si<sup>2</sup>m-pa<sup>2</sup>-th-e<sup>2</sup>-t<sup>2</sup>ik. Gr., *συμπαθής*, *συμπαθητικός*. Lat., *sympatheticus*, *sympathicus*. Fr., *sympathique*. Ger., *sympathetisch*, *sympathisch*. Having sympathy with something else, due to sympathy, maintaining or promoting sympathy; pertaining to the sympathetic nerve; as a n., the s. nerve. [a, 17, 48.]—**Great s.** See **S. NERVE**.

**SYMPATHETICUS** (Lat.), adj. and n. m. Si<sup>2</sup>m(su<sup>m</sup>)-pa<sup>2</sup>-th-(pa<sup>2</sup>th)-e<sup>2</sup>t(at<sup>2</sup>ik-u<sup>s</sup>su<sup>s</sup>). See **SYMPATHETIC**.—**S. minor**. See **Facial NERVE**.

**SYMPATHETIPLEX** [Cones], n. Si<sup>2</sup>m-pa<sup>2</sup>-th-e<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>-ple<sup>2</sup>x. From *συμπαθητικός*, sympathetic, and *plexus* (q. v.). A plexus of the sympathetic nerve. [Med. Record, July 30, 1887 (L).]

**SYMPATHICUS** (Lat.), adj. and n. m. Si<sup>2</sup>m(su<sup>m</sup>)-pa<sup>2</sup>-th-(pa<sup>2</sup>th)<sup>2</sup>ik-u<sup>s</sup>su<sup>s</sup>. See **SYMPATHETIC**.

**SYMPATHIKOASTHENIE** (Ger.), n. Zu<sup>2</sup>m-pa<sup>2</sup>-th-ek-o-a<sup>2</sup>-sten-e<sup>2</sup>. Acute neurasthenia of the sympathetic nervous system, especially those of the digestive and reproductive organs. [Averbeck, Dtsch. Med.-Ztg., Apr. 8, 1886, p. 313 (a, 34).]

**SYMPATHY**, n. Si<sup>2</sup>m-pa<sup>2</sup>-th-i<sup>2</sup>. Gr., *συμπάθεια*. Fr., *sympathie*. Ger., *Sympathie*, *Gleichgefühl*. That relation of different parts of the system in virtue of which one part becomes diseased or disordered in consequence of disease or disorder existing in some other part, not because of actual extension of the morbid process.

**SYMPEPSIS** (Lat.), n. f. Si<sup>2</sup>m(su<sup>m</sup>)-pe<sup>2</sup>-ps<sup>2</sup>is. Gen., -peps<sup>2</sup>-eos (-is). Gr., *σύνπεψις* (from *συνάπτειν*, to soften by heat). Fr., *sympépsis*. 1. See **COCTION** and **DIGESTION**. 2. The ripening of an abscess. [L, 50 (a, 14).]

**SYMPETALICUS** (Lat.), adj. Si<sup>2</sup>m(su<sup>m</sup>)-pe<sup>2</sup>-a<sup>2</sup>(a<sup>2</sup>l)<sup>2</sup>-i<sup>2</sup>ik-u<sup>s</sup>su<sup>s</sup>. From *σύν*, with, and *πέταλον*, a leaf. Fr., *sympétalique*. Having the stamens growing to the petals so that the corolla appears to be monopetalous. [a, 35.]

**SYMPETALOUS**, adj.  $\text{Si}^2\text{m-pe}^2\text{t/a}^2\text{-u}^3\text{s}$ . Lat. *sympetalus*. Fr., *sympétalé*. See GAMOPETALOUS. The *Sympetaleæ* are the Gamopetaleæ. [a, 35.]

**SYMPEXION** (Fr.), n.  $\text{Sa}^2\text{n}^2\text{-pe}^2\text{x-e-o}^2\text{n}^2$ . A concrement.

**SYMPEXIS** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})\text{-pe}^2\text{x}(\text{pax})/\text{i}^2\text{s}$ . Gen., -*ex'-eos* (-is). Gr., *σύνπexis* (from *σύνπexivnai*, to put together). Fr., *symplexion*. See CONCRETION.

**SYMPHORA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fo}^2\text{r-a}^2$ . Gr., *σύνφορα* (from *σύνφορεν*, to bring together). See CONGESTION.

**SYMPHOREMA** (Lat.), n. n.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fo}^2\text{r-em}(\text{am})/\text{a}^2$ . Gen., -*em'atos* (-atis). Gr., *σύνφορημα*. Fr., *symphorème*. The condition of being congested. [L, 50 (a, 48).]

**SYMPHORESIS** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fo}^2\text{r-e}(\text{a})/\text{si}^2\text{s}$ . Gen., -*es'eos* (-is). Gr., *σύνφορησις*. Fr., *symphorèse*. See CONGESTION.

**SYMPHORETICUS** (Lat.), adj.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fo}^2\text{r-e}^2\text{t}(\text{at})/\text{i}^2\text{k-u}^2\text{s}(\text{u}^4\text{s})$ . Caused by congestion. [L, 50 (a, 14).]

**SYMPHORICARPUUS** (Lat.), n. m.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fo}^2\text{r-i}^2\text{k-a}^2\text{rp-u}^2\text{s}(\text{u}^4\text{s})$ . From *σύνφορεν*, to bear together, and *καρπός*, fruit. Fr., *symphorine*, *symphoricarpe*. Ger., *Petersstrauch*. A genus of caprifoliaceous shrubs, of the *Lonicereæ*; snow-berry. [L, 35.]—*S. vulgaris*. Fr., *arbutusier de l'Amérique*. Ger., *gemeiner Petersstrauch*. Coral-berry, Indian currant; a shrub found in the central and southern parts of the United States. The root and branches are used as a febrifuge. [a, 35.]

**SYMPHYCARPEUS** (Lat.), adj.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2(\text{fu}^6)\text{-k-a}^2\text{rp-e}^2\text{u}^2\text{s}(\text{u}^4\text{s})$ . From *σύνφυς*, growing together, and *καρπός*, fruit. Ger., *sympyikarpisch*. See SYNCARPOUS.

**SYMPHYSE** (Fr., Ger.), n's.  $\text{Sa}^2\text{n}^2\text{-fez}$ ,  $\text{zu}^6\text{m-fu}^2\text{z-e}^2$ . See SYMPHYSIS.—*S. cardiacæ* (Fr.). See *Cardiacsympphysis*.—*S. uteriparietale* (Fr.). Of Sogond, see HYSTEROPEXIA.

**SYMPHYSEOTOMY**, n.  $\text{Si}^2\text{m-fi}^2\text{s-e-o}^2\text{t/o}^2\text{m-i}^2$ . See SYMPHYSIS-IOTOMY.

**SYMPHYSION** (Lat.), n. n.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{s}(\text{fu}^6)/\text{i}^2\text{-o}^2\text{n}$ . From *σύνφυσις*, a growing together. Of Török, the superior portion of the symphysis menti. [a, 34.]

**SYMPHYSIOTOMY**, n.  $\text{Si}^2\text{m-fi}^2\text{s-i}^2\text{-o}^2\text{t/o}^2\text{m-i}^2$ . Lat., *sympphysiotomia*, *sympphysiotomia* (from *σύνφυσις* [see SYMPHYSIS], and *τομή*, a cutting). Fr., *sympphysiotomie*. Ger., *Sympphysiotomie*, *Sympphysiotomie*. The operation of cutting through a symphysis (2d def.), so as to separate the bones that it serves to join.—*Pubic s.* Ger., *Schamfugenschnitt*. The Sigaultian operation, proposed by Sigault in 1768 and soon almost abandoned, but recently revived: division of the pubic symphysis during labor, for the purpose of allowing the ossa innominata to spread apart so as to increase the conjugate diameter of the pelvis in dystocia due to contraction (to not less than 2½ inches). Morisani makes an incision from about 2 inches above the symphysis down to the articulation, and then cuts through the interosseous cartilage from below upward with a bistoury. [A, 15.]

**SYMPHYSIS** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{s}(\text{fu}^6)/\text{i}^2\text{s}$ . Gen., -*phys'-eos*, *symp'ysis*. Gr., *σύνφυσις* (from *σύνφύειν*, to grow together). Fr., *sympphysie*. Ger., *Symphysie*, *Vervachsung*. 1. In general, any sort of articulation of bones. 2. More especially, that one of the three orders of articulation (arthrosis) which includes all joints, whether movable or immovable, in which the bones are held together by some structure interposed between them. As commonly employed, the word refers more particularly to the pelvic joints, especially to that formed by the two pubic bones. 3. The growing together of parts normally distinct. 4. In botany, see COALESCENCE.—*Cardiac s.* Fr., *sympphysie cardiaque*. See CONCRETIO pericardii.—*Pubic s.* Lat., s. (ossium) *pubis*. Fr., *sympphysie pubienne* (ou *du pubis*). Ger., *Schambeinverbindung*, *Schamfuge*, *Schambein-symphysie*. The union of the pubic bones in the middle line. [L, 34.]—*Renal s.* More or less complete fusion of the two kidneys. [a, 34.]—*Sacro-coccygeal s.* See *Sacro-coccygeal articulation*.—*Sacro-iliac s.* See *Sacro-iliac articulation*.—*S. cartilagineæ*. See SYNCHONDROSIS. *S. ligamentosa*. See SYNDESMOSIS.—*S. menti*. *S. of the inferior maxilla*, *S. of the jaw*. Ger., *Unterkieferfuge*, *Kinnnaht*. An anterior median vertical ridge upon the outer surface of the lower jaw indicating the line of union of its two halves. [L, 34.]—*S. (ossium) muscularis*. See SYSSARCOISIS.—*S. (ossium) pubis*. See *Pubic s.*

**SYMPHYSODACTYLIA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{s}(\text{fu}^6)/\text{o}^2\text{-o}^2(\text{o}^2)\text{-da}^2\text{kt}(\text{da}^2\text{kt})/\text{i}^2\text{-u}^2\text{l}^2/\text{i}^2\text{-a}^2$ . From *σύνφύειν*, to grow together, and *δάκτυλος*, a finger. Fr., *sympphysodactylie*. See SYNDACTYLISM.

**SYMPHYOPSIA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{s}(\text{fu}^6)/\text{o}^2\text{ps}/\text{i}^2\text{-a}^2$ . From *σύνφύειν*, a growing together, and *ὄψις*, the eye. Fr., *sympphysopsie*. See CYCLOPIA.

**SYMPHYSOSKELEIA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{s}(\text{fu}^6)/\text{o}^2\text{-o}^2(\text{o}^2)\text{-skel}(\text{ske}^2\text{l})/\text{i}^2\text{-a}^2$ . From *σύνφύειν*, a growing together, and *σκέλος*, the leg. The condition of a symphysis. [a, 34.]

**SYMPHYSOTOMY**, n.  $\text{Si}^2\text{m-fi}^2\text{s-o}^2\text{t/o}^2\text{m-i}^2$ . See SYMPHYSIS-IOTOMY.

**SYMPHYSTEMONOUS**, adj.  $\text{Si}^2\text{m-fi}^2\text{-ste}^2\text{m'o}^2\text{n-u}^2\text{s}$ . From *σύνφυς*, to grow together, and *στέμνω*, a filament. Having united stamens. [a, 35.]

**SYMPHYTOS** (Lat.), adj.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{t}(\text{fu}^6)/\text{o}^2\text{-s}$ . Gr., *σύνφυτος* (from *σύνφύειν*, to grow together). 1. Congenital, innate, natural. 2. Grown together. [A, 311 (a, 21).]

**SYMPHYTUM** (Lat.), n. n.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{fi}^2\text{t}(\text{fu}^6)/\text{u}^2\text{-m}(\text{u}^4\text{m})$ . Gr., *σύνφυτον*. Fr., *consoude*. Ger., *Beinwurz*, *Beinwelle*. A genus of the *Boraginaceæ*; of the ph's *S. officinale*. The *Symphytææ* are a tribe of the *Boraginææ*. [a, 35.]—*Conserva symphyti*. A preparation made by boiling the root of *S. officinale* in water, pounding in a mortar, sifting through a silk sieve, and boiling with twice the amount of sugar. [B, 119 (a, 38).]—*Decoctum symphyti* [Belg. Ph.]. A decoction made by macerating 1 part of the root of *S. officinale* for an hour with water enough to make 80 parts after boiling for a quarter of an hour and straining. [B, 95

(a, 38).]—*Radix symphyti* [Belg. Ph.]. Fr., *consoude* (*grande racine*) [Fr. Cod.]. Sp., *sinfito mayor*, *consouida mayor* [Sp. Ph.]. The root of *S. officinale*. [B, 95 (a, 38).]—*S. maculosum*. See PULMONARIA *officinalis*.—*S. majus*. See *S. officinale*.—*S. medium*. See *AJUGA genevensis*.—*S. minimum*. See *BELLIS perennis*.—*S. minus*. See *PRUNELLA vulgaris*.—*S. officinale*. Fr., *consoude officinale*, *grande consoude* [Fr. Cod.] (ou *consyre*), *herbe à la coupure*, *langue de vache*, *pecton*. Ger., *gebräuchlicher* (oder *gemeiner*) *Beinwurz*, *Wallerwurz*, *Wallerkraut*, *Schwarzwurzkraut*, *Heilwurzel*, *Beinwurzel*. The *σύνφυτον ἔρεπον* of Dioscorides, alum, blackroot, black root, boneset, knitback, common comfrey; a mucilaginous plant of Europe and northern Asia, naturalized in North America. The root, leaves, and flowers, *radix*, *herba*, et *flores consolidæ* (seu *symphyti majoris*), are official, but the root is the part chiefly used. It was formerly reputed a vulnerary, but is now used as a demulcent and pectoral. [a, 35.]—*S. tuberosum*. Tuberous-root comfrey; a European species used like *S. officinale*. [a, 35.]—*Syrupus symphyti*. Fr., *sirop de grande consoude*. A preparation made by macerating 8 parts of the root of *S. officinale* with 45 of cold water for twelve hours, straining, adding 250 parts of syrup, and boiling to a syrup. [B, 119 (a, 38).]

**SYMPIESIS** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{pi}^2(\text{pi}^2)/\text{e}^2\text{s-i}^2\text{s}$ . Gen., -*es'eos* (-eis). Gr., *συνπίεσις*. Fr., *sympièse*. Ger., *Zusammendrücken*. Compression, pressure. [L, 50 (a, 14).]

**SYMPIESOMETER**, **SYMPIEZOMETER**, n's.  $\text{Si}^2\text{m-pi}^2\text{-e}^2\text{-s-o}^2\text{m'e}^2\text{-u}^2\text{r}$ , -*e}^2\text{-o}^2\text{m'e}^2\text{-u}^2\text{r}. Lat., *sympiesometrum* (from *συνπιέζειν*, to compress, and *μέτρον*, a measure). Fr., *sympiezomètre*. Ger., *Luftdruckmesser*. A barometer in which the changes of volume in a quantity of confined air indicate the fluctuations of the atmospheric pressure. [L, 49, 87 (a, 50).]*

**SYMPLAST**, n.  $\text{Si}^2\text{m-pla}^2\text{st}$ . From *σύν*, with, and *πλάσσειν*, to mold. Fr., *symplaste*. See PLASMODIUM.

**SYMPLOCARPUS** (Lat.), n. m.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{plo}^2(\text{plo}^2)\text{-k-a}^2\text{rp-u}^2\text{s}(\text{u}^4\text{s})$ . From *σύνπλοκος*, entwined, and *καρπός*, fruit. Fr., *symplocarpe*. Ger., *Fackkolben*. A genus of the *Aroideæ*. [a, 35.]—*S. foetidus*. Ger., *stinkender Fackkolben*. Skunk- (or meadow-, or polecat-) cabbage (or weed) of North America, the *dracunculium* of the U. S. Ph., 1870. Its disgusting odor, due to an extremely volatile oil, is dissipated by heat. The rhizome, including the radicles, *radix symplocarpi* (seu *dracuntii*), is stimulant, antispasmodic, and narcotic, and is used in chronic catarrh, rheumatism, chorea, hysteria, and dropsy. The acrid seeds are used in dropsy and rheumatism. The leaves are applied to ulcers. [a, 35.]

**SYMPLICIA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{plo}^2(\text{plo}^2)/\text{si}^2(\text{ki}^2)/\text{a}^2$ . From *σύν*, with, and *πλοκή*, a twining. Fr., *symplocie*. Ger., *Verflechtung*. A morbid intertwining of parts. [L, 50 (a, 14).]

**SYMPLICIUM** (Lat.), n. n.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{plo}^2(\text{plo}^2)/\text{si}^2(\text{ki}^2)/\text{u}^2\text{-m}(\text{u}^4\text{m})$ . Fr., *symplocion*. The sporangium of a fern. [a, 35.]

**SYMPLOCOS** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{plo}^2\text{k-o}^2\text{-s}$ . From *σύνπλοκος*, interwoven. Fr., *symploque*. A genus of trees and shrubs giving name to a tribe (the *Symploceæ*, or *Symplocineæ*) of the *Styracaceæ*, at first considered as a distinct order. [a, 35.]—*S. alstonia*. Fr., *la de Santa Fé* (ou *de Bogotà*). A shrub of New Granada with leaves resembling tea leaves, for which they are substituted in South America. They are considered diaphoretic and stomachic. [a, 35.]—*S. racemosa*. An East Indian tree. The bark (lodh or lotur bark) is used as a mild astringent and in menorrhagia. [a, 35.]—*S. tinctoria*. Ger., *Süssblatt*. Horse-sugar, sweet-leaf of the southern United States; a tree with a bitter aromatic root used as a digestive and alterative. [a, 35.]

**SYMPODIA** (Lat.), n. f.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{pod}(\text{po}^2\text{d})/\text{i}^2\text{-a}^2$ . From *σύν*, with, and *πῶς*, the foot. Ger., *Sympodie*, *Sirenenbildung*. The condition of a sympus.

**SYMPODIUM** (Lat.), n. n.  $\text{Si}^2\text{m}(\text{su}^6\text{m})/\text{pod}(\text{po}^2\text{d})/\text{i}^2\text{-u}^2\text{m}(\text{u}^4\text{m})$ . Fr., *s.* A stem, resembling a simple axis, composed of a series of axes arising successively as branches one from the other. [a, 35.] Cf. MONOPodium.

**SYMPTOM**, n.  $\text{Si}^2\text{m-pt}^2\text{m}$ . Gr., *σύμπτωμα* (from *συνπίπτειν*, to fall together). Fr., *symptôme*. Ger., *S.* Any perceptible change in the body or its functions which may be taken as an indication of the nature, situation, severity, etc., of a morbid process. See also SIGN.—Argyll Robertson. See Robertson s.—Brach's s. See Romberg's sign.—Chevostek s. In tetany, an increase of the mechanical excitability of the nerves elicited by stroking or pinching a muscle. [a, 34.]—Direct s. A s. that depends directly upon the disease. [D, 3.]—Graefe's s. See Von Graefe's s.—Guyon's s. Renal ballotement.—Indirect s. A s. which is the indirect consequence of the disease.—Labyrinthine s's. A group or complex of s's supposed to be due to some disease of the internal ear and characterized by irritative phenomena, such as subjective sensations of hearing, hyperæsthesia acustica, giddiness, staggering, or vomiting, and by paralytic phenomena, such as diminution of the sharpness of hearing or total deafness. [F, 32.]—Negatively pathognomonic s. A s. which seldom or never occurs in a certain disease, and consequently, if present, shows that the case is not one of that disease.—Parrot's s. Dilatation of the pupil on pinching the skin; observed in meningitis.—Passive s. See Statical s.—Pathognomonic s. A s. which undeniably indicates the existence of a certain disease. [D, 3.]—Physical s's. See Physical signs.—Robertson s. Immobility of the pupil under the stimulus of light, associated with normal reaction to accommodative movements.—Romberg's s. See Romberg's sign.—Rosenbach's s. Abolition of the abdominal reflex.—Statical s. A s. which indicates only a condition localized in an organ. [D, 3.]—Sympathetic s's. S's which appear with the essential ones, but for the presence of which no cause can be assigned except that of sympathy.—Von Graefe's s. Dissociation of the movements of the globe of the eye and those of the upper lid.—Westphal's s. See Westphal's sign.—Wintrich's percussion s. Ger., *Schallwechsel*. The

change produced in the percussion note over a pulmonary cavity by the opening and shutting of the patient's mouth (the sound being rendered higher and louder when the mouth is open). A free communication between the cavity and the mouth is necessary to the production of this phenomenon. ["Wien. med. Wochenschr.," July 6, 1889 (a, 18).]

**SYMPTOMATIATRIA** (Lat.), n. f. Si<sup>2</sup>mp(su<sup>6</sup>mp)-to<sup>2</sup>m(tom)-a<sup>2</sup>t(a<sup>2</sup>t)-i<sup>2</sup>a<sup>2</sup>(a<sup>2</sup>t)-ri(re)/a<sup>2</sup>. From *σύμπτωμα*, a symptom, and *ιατρεία*, medical treatment. Symptomatic treatment; of Leonhardi, homeopathy. [L, 50 (a, 14).]

**SYMPTOMATIC, SYMPTOMATICAL**, adj's. Si<sup>2</sup>mp-to<sup>2</sup>m-a<sup>2</sup>t(i<sup>2</sup>k, -a<sup>2</sup>t)/i<sup>2</sup>-k'l. Gr., *συμπτωματικός*. Fr., *symptomatique*. Ger., *symptomatisch*. According to or pertaining to symptoms; of the nature of a symptom. [D, 20.]

**SYMPTOMATOGRAPHY, SYMPTOMATOLOGY**, n's. Si<sup>2</sup>mp-to<sup>2</sup>m-a<sup>2</sup>t-o<sup>2</sup>g/ra<sup>2</sup>f-i, -o<sup>2</sup>l'o-j'i<sup>2</sup>. From *σύμπτωμα*, a symptom, and *γράφειν*, to write, or *λόγος*, understanding. Fr., *symptomato-graphie, symptomatologie*. Ger., *Symptomatologie, Krankheits-fällebeschreibung, Krankheitszeichenlehre*. The science or study of symptoms.

**SYMPTÔME** (Fr.), n. Sa<sup>2</sup>n<sup>2</sup>p-tom. See SYMPTOM.—S's *procéduriers*. Of Lacassagne, such cerebral symptoms as develop in a person, usually an employee injured at his work or the victim of some accident, who is seeking indemnity for the real or supposed injury. These apparently morbid phenomena are most noticeable while the legal process (Fr., *procédure*) is pending, and usually disappear promptly when the indemnity claimed is awarded. ["Sem. méd.," Aug. 21, 1889, p. 305 (a, 18).]

**SYMPTOSIS** (Lat.), n. f. Si<sup>2</sup>m(su<sup>6</sup>m)-ptos/i's. Gen., -*tos/eos* (-is). Gr., *σύμπτωσις* (from *σύνπτειν*, to fall together). Fr., *synapse*. 1. See COLLAPSE. 2. Rapid emaciation. [L, 41, 50 (a, 14).]

**SYMPUS** (Lat.), n. m. Si<sup>2</sup>m(su<sup>6</sup>m)-pu's(pus). From *σύν*, with, and *πούς*, the foot. A monster in which the lower extremities are more or less completely united. [a, 34.]—S. *dipus*. A s. in which there is no trace of the feet. [a, 34.]—S. *monopus*. A s. in which there are two distinct feet. [a, 34.]—S. *monopus*. A s. in which there is but one distinct foot. [a, 34.]

**SYNACMY**, n. Si<sup>2</sup>n-a<sup>2</sup>k/mi<sup>2</sup>. From *σύν*, with, and *ἀκμή*, maturity. See SYNANTHESIS.

**SYNACTIC**, adj. Si<sup>2</sup>n-a<sup>2</sup>kt/i<sup>2</sup>k. Gr., *συνακτικός* (from *συνάγειν*, to bring together). Lat., *synacticus*. Fr., *synactique*. Ger., *sammelnd, anhäufend*. Accumulative; condensing. [L, 50 (a, 48).]

**SYNADELPHUS** (Lat.), n. m. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>l'f/u's(u's). From *σύν*, with, and *ἀδελφός*, a brother. Fr., *synadelphus*. Of Geoffroy St.-Hilaire, a monster having one head and one trunk, but eight distinct limbs, instead of the normal four. [L, 41, 49 (a, 14).]

**SYNEREMA** (Lat.), n. n. Si<sup>2</sup>n(su<sup>6</sup>n)-e<sup>2</sup>r(a<sup>2</sup>e-r)-em(am)/a<sup>2</sup>. Gen., -*em/atos* (-atis). From *συναίρειν*, to bring together. See CORRUPTION.

**SYNAGOGE** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>g(a<sup>2</sup>g)-o<sup>2</sup>j'e(ga). Gen., -*og/ea*. Gr., *συναγωγή* (from *σύνάγειν*, to bring together). See CONTRACTION.

**SYNALGIA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>l'j(a<sup>2</sup>l'j)/i<sup>2</sup>-a<sup>2</sup>. From *συνάλγειν*, to share in suffering. Fr., *syalgie*. Of Fromental, sympathetic pain.

**SYNANASTOMOSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>n(a<sup>2</sup>n)-a<sup>2</sup>st(a<sup>2</sup>st)-o<sup>2</sup>m(u'm). Gen., -*os/eos* (-is). For deriv., see *Syn-* and *ANASTOMOSIS*. Fr., *synanastomose*. Ger., *Synanastomose*. Of Galen, the anastomosis of several vessels. [L, 50 (a, 14).]

**SYNANCHE** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>n<sup>2</sup>k(a<sup>2</sup>n<sup>2</sup>ch<sup>2</sup>e/a). Gen., -*anch/ea*. Gr., *συνάγχη* (from *σύν*, with, and *ἄγχειν*, to strangle). Fr., *synancie*. See CYNANCHE.

**SYNGEUM** (Lat.), n. n. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>n(a<sup>2</sup>n)-j'l'(ge<sup>2</sup>/i<sup>2</sup>-u'm(u'm). From *σύν*, with, and *ἄγγειον*, a vessel. A compound sporangium; a sorus formed of sporangia growing together.

**SYNTHÉE** (Lat.), n. f. pl. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>nth(a<sup>2</sup>nth)-e<sup>2</sup>e(-e<sup>2</sup>a<sup>2</sup>). From *σύν*, with, and *ἄνθος*, a flower. Fr., *synthées*. Of Viviani, plants the flowers and leaves of which are developed simultaneously. [a, 35.]

**SYNANTHEMA** (Lat.), n. n. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>nth(a<sup>2</sup>nth)-em(am)/a<sup>2</sup>. Gen., -*em/atos* (-atis). From *συνανθεῖν*, to blossom together. Ger., *Synantheme*. A cluster of efflorescences on the skin. [G.]

**SYNANTHERÉE** (Lat.), **SYNANTHERÉE** (Lat.), n's f. pl. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>nth(a<sup>2</sup>nth)-er(ar)/e<sup>2</sup>a<sup>2</sup>-e<sup>2</sup>, -er(ar)/e<sup>2</sup>e(-e<sup>2</sup>a<sup>2</sup>-e<sup>2</sup>). Fr., *synanthérées*. The Composite. [a, 35.]

**SYNANTHEROUS**, adj. Si<sup>2</sup>n-a<sup>2</sup>nth-er/u's. From *syn-*, with, and *anthera*, an anther. Lat., *synantherous, synanthericus*. Fr., *synanthérique*. Ger., *verwachsendartig*. Having the stamens confluent by their anthers. The *Synantheria* are a class so characterized. [a, 35.]

**SYNANTHESIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>nth(a<sup>2</sup>nth)-e(a)/s/i's. Gen., -*es/eos* (-is). From *συνανθεῖν*, to blossom together. The simultaneous ripening of the stamens and pistils of a flower. [a, 35.]

**SYNANTHE** (Fr.), n. Sen-a<sup>2</sup>n<sup>2</sup>-te. The abnormal union of two or more flowers. [a, 35.]

**SYNANTHOCARPOUS**, adj. Si<sup>2</sup>n-a<sup>2</sup>nth-o-ka<sup>2</sup>rp/u's. Lat., *synanthocarpus* (from *σύν*, with, *ἄνθος*, a flower, and *καρπός*, a fruit). Fr., *synanthocarpe*. Of a fruit, resulting from the aggregation of a number of flowers into one mass, as in the cone. [a, 35.]

**SYNANTHIROSE**, n. Si<sup>2</sup>n-a<sup>2</sup>nth/ros. Ger., *S*. A carbohydrate, C<sub>12</sub>H<sub>22</sub>O<sub>11</sub>, found in *Helianthus tuberosus* and other Composite. [B, 4.]

**SYNAPHYMENTIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>ph(a<sup>2</sup>ph)-i(u's)-me<sup>2</sup>n-i(u's). Gen., -*i/idos* (-idis). From *συνάφει*, connection, and *μνῆρ*, a membrane. An old term for conjunctivitis.

**SYNAPTASE**, n. Si<sup>2</sup>n-a<sup>2</sup>p/tas. From *συνάπτειν*, to bind together. See EMULSIN.

**SYNARTHRODIA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>rth-rod/i<sup>2</sup>-a<sup>2</sup>. See SYNARTHROSIS.

**SYNARTHRODIAL**, adj. Si<sup>2</sup>n-a<sup>2</sup>rth-rod/i<sup>2</sup>-l. Fr., *synarthrodial*. Ger., *synarthrodisch*. Having the character of synarthrosis.

**SYNARTHROSIS** (Lat.), **SYNARTHROSIS** (Lat.), n's f. and m. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>rth(a<sup>2</sup>th)-res(ro<sup>2</sup>e<sup>2</sup>s)-i's, -mu's(mu's). Gr., *συνάρθρωσις, συνάρθρωσις* (from *συνάρθρῃν*, to gather together). Fr., *synarthroisme*. See CONGESTION.

**SYNARTHROSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-a<sup>2</sup>rth-ros/i's. Gen., -*thros/eos* (-is). Gr., *συνάρθρωσις* (from *σύν*, with, and *άρθρον*, a joint). Fr., *synarthrose*. Ger., *Synarthrose, Gelenksunbeweglichkeit*. That one of the three orders of articulation (arthrosis) which includes the immovable joints. Its varieties are suture, harmony, and gomphosis. [L, 115.]—**DIARTHRODIAL**. See AMPHIARTHROSIS.

**SYNCAMPE** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-ka<sup>2</sup>mp/ka<sup>2</sup>mp'e(a). Gen., -*camp/eos*. Gr., *συνκαμπή* (from *συνκαμπτεν*, to bend). Fr., *s. a*. Very flexible joint; of Hippocrates, the elbow joint. [L, 50 (a, 14).]

**SYNCANTHUS** (Lat.), n. m. Si<sup>2</sup>n(su<sup>6</sup>n)-ka<sup>2</sup>nth(ka<sup>2</sup>nth)/u's(-u's). From *σύν*, with, and *κανθός*, a canthus. An old term for an abnormal adhesion between the ocular conjunctiva and the orbital margin. [F.]

**SYNCARP**, n. Si<sup>2</sup>n/ka<sup>2</sup>rp. Lat., *syncarpium* (from *σύν*, with, and *καρπός*, fruit). Fr., *syncarpe*. Ger., *Knuelbeere* (1st def.), *Fruchthausen* (1st def.). 1. See COLLECTIVE FRUIT. 2. See AGGREGATED FRUITS (2d def.).

**SYNCARPOUS**, adj. Si<sup>2</sup>n-ka<sup>2</sup>rp/u's. Fr., *syncarpé*. Of a pistil or fruit, made up of two or more united carpels. The *Syncarpe* of Lindley are a cohort of the *Polypetalæ* consisting of the *Malvales, Meliales, Rhamnales, Euphorbiales, and Silenales*. [a, 35.]

**SYNCARPY**, n. Si<sup>2</sup>n/ka<sup>2</sup>rp-i<sup>2</sup>. The accidental adhesion of several fruits. [a, 35.]

**SYNCAUSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-ka<sup>2</sup>s'(ka<sup>2</sup>s'/u's)-i's. Gen., -*caus/eos* (-is). Gr., *σύνκαυσις* (from *συνκαίειν*, to burn up). Fr., *s. Combustion*. [A, 322, 325 (a, 48).]

**SYNCEPHALUS** (Lat.), n. m. Si<sup>2</sup>n(su<sup>6</sup>n)-se<sup>2</sup>f(ke<sup>2</sup>f)/a<sup>2</sup>(a<sup>2</sup>l)-u's(u's). From *σύν*, with, and *κεφαλή*, the head. Fr., *syncéphalien*. Of Veit, that variety of the cephalothoracopagus in which the heads are united. [a, 34.]

**SYNCHEILIA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-kil'(ch<sup>2</sup>e<sup>2</sup>/i<sup>2</sup>l)-i<sup>2</sup>-a<sup>2</sup>. From *σύν*, with, and *χείλος*, a lip. Labial atresia. [a, 34.]

**SYNCHITON** (Lat.), n. m. Si<sup>2</sup>n(su<sup>6</sup>n)-kit(ch<sup>2</sup>et)/o<sup>2</sup>n(on). Gen., -*on/os* (-is). From *σύν*, with, and *χίτων*, a tunic. Fr., *s. See CONJUNCTIVA*.

**SYNCHITONITIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-kit(ch<sup>2</sup>et)-o<sup>2</sup>n-i(e)/i<sup>2</sup>a. Gen., -*i/idos* (-idis). See CONJUNCTIVITIS.

**SYNCHONDROSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-ko<sup>2</sup>nd(ch<sup>2</sup>e<sup>2</sup>/o<sup>2</sup>nd)-ros/i's. Gen., -*os/eos* (-is). Gr., *συνχόνδρωσις* (from *σύν*, with, and *χόνδρος*, cartilage). Fr., *synchondrose*. Ger., *Synchondrose, Knorpelband, Knorpelverbindung, Knorpelverfugung*. That variety of symphysis in which the bones are articulated by means of cartilage interposed between them.—**PUBIC s.** See PUBIC SYMPHYSIS.—

**Sacro-iliac s.** See SACRO-ILIAC ARTICULATION. As Luschka has shown it to be a movable joint, the use of the term should be given up.—**S. arycorniculata, S. arysantoriniana**. The s. between the arytoid cartilages and the cartilages of Santorini. [L, 332.]—**S. intersphenoidalis**. The foetal s. between the basisphenoid and presphenoid bones. [L.]—**S. pubis**. See PUBIC SYMPHYSIS.—

**S. sacrococcygea**. The s. between the sacrum and the coccyx. [L.]—**S. sphenobasilaris**. See *S. sphenoccipitalis*.—**S. sphenoidalis**. See *S. intersphenoidalis*.—**S. sphenoccipitalis**. The s. between the basilar process of the occipital bone and the body of the sphenoid bone. [L.]

**SYNCHONDROTOMY**, n. Si<sup>2</sup>n-ko<sup>2</sup>nd-ro<sup>2</sup>t/om-i<sup>2</sup>. From *σύν*, with, *χόνδρος*, cartilage, and *τομή*, a cutting. Fr., *synchondrotomie*. Ger., *Knorpelschnitt*. 1. See SYMPHYSEOTOMY. 2. Section of a synchondrosis. [L, 41, 50 (a, 14).]

**SYNCHRONISM**, n. Si<sup>2</sup>n/kro<sup>2</sup>n-i<sup>2</sup>zm. Gr., *συνχρονισμός* (from *σύν*, with, and *χρόνος*, time). Simultaneousness.

**SYNCHRONOUS**, adj. Si<sup>2</sup>n/kro<sup>2</sup>n-u's. Gr., *σύνχρονος*. Simultaneous.

**SYNCHYSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>6</sup>n)-ki<sup>2</sup>s(ch<sup>2</sup>e<sup>2</sup>/u's)-i's. Gen., -*chys/eos, synch/ysis*. Gr., *σύνχυσις* (from *σύνχυν*, to pour together). Fr., *s. Ger. s.* Commixture, confusion. [A, 311 (a, 48).]—**S. corporis vitrei**. Ger., *Glaskörperanflüssung*. Fluidity or liquefaction of the vitreous humor, a pathological condition found in many diseases of the interior coats of the eyeball. [F.]—**S. scintillans**. Ger., *Flimmers*. A fluid condition of the vitreous humor in which it is filled with crystals of cholesterol that sparkle brilliantly under the ophthalmoscope. [F.]—**S. simplex**. A softened or fluid state of the vitreous humor with small floating opacities; very often a senile change. [F.]

**SYNCHYTECPHLOGIA** (Lat.), **SYNCHYTECPHLOGIO-**IS (Lat.), n's f. Si<sup>2</sup>n(su<sup>6</sup>n)-kit(ch<sup>2</sup>e<sup>2</sup>/u's)-e<sup>2</sup>k-floj(flo<sup>2</sup>g/i<sup>2</sup>-a<sup>2</sup>, -floj(flo<sup>2</sup>g)/o<sup>2</sup>-i's. From *σύνχυν*, to coningle, and *ἐκφλέγειν*, to set on fire. Fr., *synchytologie*. Confluent small-pox. [L, 50 (a, 14).]

**SYNCHYTRIUM** (Lat.), n. n. Si<sup>2</sup>n(su<sup>6</sup>n)-ki<sup>2</sup>t(ch<sup>2</sup>e<sup>2</sup>/u's)/ri<sup>2</sup>-u'm(u'm). From *σύν*, with, and *χυρίον*, a little pot. A genus of the *Chytridae*. [a, 35.]—**S. aureum**. A species forming little orange-red spots on the leaves and stalks of plants. [A, 396 (a, 21).]—**S. miescherinum**. Ger., *Miescher'sche (Raineysche) Schläuche*. Ovoid bodies found in the muscles of many vertebrates (in swine sometimes mistaken for *Trichina*) consisting of a capsule including a granular substance with sickle- or kidney-shaped spores, regarded as belonging to the *Sporozoa*. [Braun (L).]

**SYNCLEISIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klis}^2(\text{kle}^2/\text{i}^2\text{s})\text{-i}^2\text{s}$ . Gen., *-cleis/eos (-is)*. Gr., *συγκλείσις* (from *συγκλείειν*, to shut up). Fr., *syncléise*. See **OCCCLUSION**.

**SYNCCLINAL**, adj.  $\text{Si}^2\text{n-kl}^1\text{n}^1$ . From *συγκλίειν*, to lean together. Fr., *synclitique*. Inclining toward each other.

**SYNCCLISTIC** (Lat.), adj. Ger., *geschlossenförmig*. Of fruits, not dehiscing at maturity. [a, 35.]

**SYNCCLITIC**, adj.  $\text{Si}^2\text{n-kl}^1\text{i}^2/\text{i}^2\text{k}$ . See **SYNCCLINAL**.

**SYNCCLITISM**, n.  $\text{Si}^2\text{n-kl}^1\text{i}^2\text{-i}^2\text{zm}$ . See **Synclitic** MOVEMENT of the fetal head.

**SYNCCLONESIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klo}^2\text{n-e}(\text{a})/\text{si}^2\text{s}$ . Gen., *-es/eos (-is)*. From *συγκλόνειν*, to dash together. Fr., *synclonése*. See **General CONVULSION**.

**SYNCCLONUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klo}^2\text{n-u}^2\text{s}(\text{u}^2\text{s})$ . From *σύν*, with, and *κλόνος*, a violent confused motion. See **General CONVULSION**.—**S. ballismus**. Of J. M. Good, see **PARALYSIS agitans**.—**S. beriberia**, **S. indicus**. See **BERIBERI**.—**S. saltans**. See **CHOREA Sancti Viti**.—**S. tremens**. General tremor. [L, 50 (a, 14).]

**SYNCOPAL**, adj.  $\text{Si}^2\text{n-ko}^2\text{p}^1$ . Pertaining to, affected with, or of the nature of syncope. [D, 36.]

**SYNCOPE** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-ko}^2\text{p-e}(\text{a})$ . Gen., *syn/copes*. Gr., *συνκοπή* (from *συνκλίνειν*, to cut short). Fr., s. Ger., *Synkope*. Fainting; pallor and loss of consciousness from sudden weakness of the heart's action.—**Laryngeal s.** See **Laryngeal VERTIGO**.—**Local s.** Syn.: *suspended life in local surfaces* [Richardson]. Of B. W. Richardson, a sudden and temporary blanching and loss of sensibility in a part, generally one or more of the fingers. ["Asclepiad," Jan., 1885, p. 1.] Cf. **Local ASPHYXIA**.—**S. (cardiaca) anginosa**. See **ANGINA PECTORIS**.

**SYNCOPTIC**, adj.  $\text{Si}^2\text{n-ko}^2\text{p}^1/\text{i}^2\text{k}$ . Gr., *συνκοπτικός*. Lat., *syncopticus*. Pertaining to or causing syncope.

**SYNCOTYLEDONOUS**, adj.  $\text{Si}^2\text{n-ko}^2\text{t}^1\text{-i}^2\text{l-e}^2\text{d}^2/\text{o}^2\text{n-u}^2\text{s}$ . From *σύν*, with, and *κωτύλεδών*, a cavity. See **CONFERRIMATE**.

**SYNCRANIUS** (Lat.), adj.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-kran}(\text{kra}^2\text{n})/\text{i}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *σύν*, with, and *κρανίον*, the skull. Connected with the skull; as a n., the superior maxilla. [L, 50 (a, 14).]

**SYNCRISIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-kri}^2\text{s-i}^2\text{s}$ . Gen., *-cris/eos, syn/crisis*. Gr., *σύνκρισις* (from *συνκρίνειν*, to compound). Fr., *syn-crisis*. In ancient chemistry, the passage of a body from the liquid into the solid state. [B, 35, 75 (a, 14).]

**SYNCRITIC**, adj.  $\text{Si}^2\text{n-kri}^2\text{p}^1/\text{i}^2\text{k}$ . Lat., *syncreticus*. Fr., *syn-critique*. Ger., *verbindend*. Condensing, astringent. [a, 14.]

**SYNCYTIUM** (Lat.), n. n.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-si}^2(\text{ku}^2/\text{shi}^2/\text{ti}^2)\text{-u}^2\text{m}$  (u<sup>2</sup>m). From *σύν*, with, and *κύτος*, a hollow. 1. See **PLASMODIUM**. 2. Of Haeckel, the transparent ectoderm of a calcareous sponge at a time when the nucleated cells have become indistinct. [A, 12.]

**SYNDACTYLE**, adj.  $\text{Si}^2\text{n-da}^2\text{kt}^1/\text{i}^2\text{l}$ . From *σύν*, with, and *δάκτυλος*, a finger. Fr., s. Affected with syndactylism (q. v.). [L.]

**SYNDACTYLISM**, n.  $\text{Si}^2\text{n-da}^2\text{kt}^1/\text{i}^2\text{l-i}^2\text{zm}$ . Lat., *syndactylia* (from *σύν*, with, and *δάκτυλος*, a finger). Fr., *syndactylie*. Ger., *Syndactylie*. A condition in which two or more fingers or toes are coherent for the greater part of their extent. [L, 221.]

**SYNDECTOMY**, n.  $\text{Si}^2\text{n-de}^2\text{kt}^1/\text{om-i}^2$ . From *σύνδεσμος*, a bond, and *ἐκτέμνειν*, to cut out. Fr., *syndectomie*. Ger., *Syndektomie*. See **PERITOMY**.

**SYNDENDRIUM** (Lat.), n. n.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{nd}^1/\text{ri}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$ . From *σύν*, with, and *δένδρον*, a tree. A quadrate disc beneath the umbrella of a *Hydrozoa* suspended by four pillars (dendrostyles) to which are attached the stomatodendra. [L, 147.]

**SYNDESIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-i}^2\text{s}$ . Gen., *-des/eos, synd/esis*. Gr., *σύνδεσις* (from *σύνδεδω*, to bind together). Mechanical union by means of a bandage or of ligaments. [L, 50 (a, 14).]

**SYNDESMECTOPIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-me}^2\text{kt-top}(\text{to}^2\text{p})/\text{i}^2\text{-a}^2$ . From *σύνδεσμος*, a bond, and *ἐκτόπιος*, out of a place. Abnormal position of a ligament. [L, 50 (a, 14).]

**SYNDESMITIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-mi}(\text{me})/\text{ti}^2\text{s}$ . Gen., *-mi/tidos (-idis)*. From *σύνδεσμος*, a bond. Fr., *syndesmitis*. Ger., *S. 1*. See **DESMITIS**. 2. An old term for conjunctivitis. [F.]—**Blepharo-s**. See the major list.

**SYNDESMODIASTASIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2/\text{mo}(\text{mo}^2)\text{-di}(\text{di}^2)\text{-a}^2\text{st}^2(\text{a}^2\text{st})/\text{a}^2\text{s}^2(\text{a}^2\text{s})\text{-i}^2\text{s}$ . Gen., *-as/eos (-ast/asis)*. From *σύνδεσμος*, a bond, and *διάστασις*, separation. Abnormal separation or divergence of ligaments. [L, 50 (a, 14).]

**SYNDESMOGRAPHY, SYNDESMOLOGY**, n's.  $\text{Si}^2\text{n-de}^2\text{s-mo}^2\text{g}^2\text{ra}^2/\text{i}^2\text{-i}^2$ ,  $\text{-mo}^2/\text{o-j}^2\text{i}^2$ . Lat., *syndesmographia, syndesmologia* (from *σύνδεσμος*, a bond, and *γράφειν*, to write, or λόγος, understanding). Fr., *syndesmographie, syndesmologie*. See **DESMOLOGY** (1st def.).

**SYNDESMOM** (Ger.), n.  $\text{Zu}^2\text{n-de}^2\text{s-mom}^1$ . A neoplasm in which there is a large amount of connective-tissue formation. [A, 319 (a, 34).]

**SYNDESMOPATHIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-mo}(\text{mo}^2)\text{-pa}^2\text{thi}^2\text{pa}^2\text{th}^2\text{-i}^2(\text{e})/\text{a}^2$ . From *σύνδεσμος*, a bond, and *πάθος*, disease. See **DESMOPATHY**.

**SYNDESMOPHARYNGEUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2/\text{mo}(\text{mo}^2)\text{-fa}^2\text{r}(\text{fa}^2\text{r})\text{-i}^2\text{n}(\text{u}^2\text{n})\text{-je}^2(\text{ge}^2)\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *σύνδεσμος*, a bond, and *φάρυγξ*, the pharynx. Fr., *syndesmo-pharyngien*. A fasciculus of the constrictor pharyngis medius arising from the body of the hyoid bone and the thyreo-hyoid ligament. [L.]

**SYNDESMOSIS** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-mos}^2/\text{i}^2\text{s}$ . Gen., *-os/eos (-is)*. Fr., *syndesmose*. Ger., *S. Bandgelenk, Bandbeinigung*. That variety of articulation by symphysis in which the bones are united by ligaments.—**S. basilaris**. The articulation of the pe-

trous portion of the temporal bone with the basilar process of the temporal bone and the body of the sphenoid bone. [L, 332].—**S. petro-occipitalis**. The occipital portion of the s. basilaris. [L, 31.]

**SYNDESMO-THYREOIDEUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-mo}(\text{mo}^2)\text{-thir}(\text{thu})\text{r}^2\text{-e}^2\text{o}(\text{o}^2)\text{-i}^2\text{d}(\text{ed})/\text{e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *σύνδεσμος*, a bond, and *θυρεοειδής*, thyreoid. An anomalous form of the subthyreoides. [L, 332.]

**SYNDESMOTOMY**, n.  $\text{Si}^2\text{n-de}^2\text{s-mo}^2/\text{om-i}^2$ . From *σύνδεσμος*, a bond, and *τομή*, a cutting. Fr., *syndesmotomie*. Ger., *Geenbandzertrennung*. Section or dissection of a ligament.

**SYNDESMUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s-mu}^2\text{s}(\text{mu}^2\text{s})$ . Gr., *σύνδεσμος*. See **BANDAGE** and **LIGAMENT**.

**SYNDROME** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-dro}^2\text{m-e}(\text{a})$ . Gen., *synd/-romes*. Gr., *σύνδρομη*. Fr., s. 1. A concomitant symptom, especially the concurrence of several symptoms not indicating a disease with well-determined anatomical lesions, as in fever, epilepsy, and senescentness. 2. Any well-defined complex of symptoms; the totality of symptoms characterizing a disease. [D; a, 18.]

**SYNDYASMUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-di}(\text{du}^2)\text{-a}^2\text{z}(\text{a}^2\text{s})/\text{mu}^2\text{s}(\text{mu}^2\text{s})$ . Gr., *σύνδυασμός* (from *σύν*, with, and *δύαμις*, to couple). Fr., *syndiasme*. Of Hippocrates, copulation. [L, 50 (a, 14).]

**SYNECHES** (Lat.), adj.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{k}(\text{e}^2\text{ch}^2)\text{-ez}(\text{as})$ . Gr., *συνεχής* (from *συνέχειν*, to hold together). Continuous; as a n., see **Continued FEVER**.—**S. Gortzei**. See **AMPEHERINA**.

**SYNECHIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{k}(\text{e}^2\text{ch}^2)\text{-i}^2(\text{e})/\text{a}^2$ . Gr., *συνέχεια* (from *συνέχειν*, to hold together). Fr., *synéchie*. Ger., *Synechie*. Continuity, union, adhesion. [L, 41, 50 (a, 14).]—**Anterior s.** Adhesion of the iris to the posterior surface of the cornea. [F.]—**Posterior s.** Adhesion of the posterior surface of the iris, usually the sphincter margin, to the anterior capsule of the lens. [F.]—**S. of the pericardium**. Union of the parietal and visceral layers of the pericardium by adhesive inflammation. [D, 70.]

**SYNECHOTOMY**, n.  $\text{Si}^2\text{n-e}^2\text{k-o}^2\text{i}^2/\text{om-i}^2$ . From *συνεχής*, continuous, and *τομή*, a cutting. Fr., *synéctomie*. Ger., *Synechotomie*. The loosening or detachment of adherent parts of the membrana tympani from the inner wall of the tympanum by means of little rounded knives. [F.]

**SYNECTENTEROTOME**, n.  $\text{Si}^2\text{n-e}^2\text{kt-e}^2\text{n-te}^2\text{r-o-to-m}$ . Lat., *synectenterotomus* (from *συνέχειν*, to confine, *έντερον*, an intestine, and *τομή*, a cutting). Fr., *synectenterotome*. Ger., *Synectenterotom*. A variety of Dupuytren's enterotome invented by Delpech.

**SYNEDERAL, SYNEDEROUS**, adj's.  $\text{Si}^2\text{n-ed}^2/\text{r}^1\text{-ru}^2\text{s}$ . From *σύν*, with, and *ἐδρα*, a seat. Growing on the angle of a stem. [a, 35.]

**SYNEDEUONTA** (Lat.), n. n. pl.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{d-ru}^2\text{-o}^2\text{nt}^2/\text{a}^2$ . From *συνεδρεύειν*, to sit together. Accidental and abnormal symptoms. [L, 50 (a, 14).]

**SYNEMA** (Lat.), n. n.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-em}(\text{am})/\text{a}^2$ . Gen., *-em/atos (-atis)*. From *σύν*, with, and *νήμα*, a thread. Fr., *synème*. A column of united stamens; of Richard, that part of the column of orchids that represents the filaments of the stamens. [a, 35.]

**SYNENCEPHALIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})\text{-se}^2\text{f}(\text{ke}^2\text{f})/\text{al}^2(\text{a}^2)/\text{i}^2\text{-a}^2$ . From *σύν*, with, and *ἐνκέφαλος*, the brain. Fr., *synencephalie*. Ger., *Synencephalie*. A form of double monstrosity in which there are two fully developed bodies with only a single head.

**SYNENCEPHALOCLE** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})\text{-se}^2\text{f}(\text{ke}^2\text{f})/\text{a}^2(\text{a}^2)/\text{i}^2\text{-a}^2(\text{a}^2)\text{-o}(\text{o}^2)\text{-se}(\text{ka})/\text{le}(\text{a})$ . In Eng., *synencephalocle*. Ger., *-cel/es*. From *σύν*, with, and *ἐνκέφαλος*, the brain, and *κλήρ*, a tumor. Fr., *synencephalocle*. Of Spring, a foetal encephalocle with adhesions to the placenta, the umbilical cord, or the membranes. [A, 301 (a, 34).]

**SYNENCEPHALUS** (Lat.), n. m.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})\text{-se}^2\text{f}(\text{ke}^2\text{f})/\text{a}^2(\text{a}^2)/\text{i}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$ . From *σύν*, with, and *ἐνκέφαλος*, the brain. Fr., *synencephale*. An individual affected with synencephalia.

**SYNERGIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n-u}^2\text{rj}(\text{e}^2\text{rg})\text{-i}^2(\text{e})/\text{a}^2$ . See **SYNERGY**.

**SYNERGIDE**, n.  $\text{Si}^2\text{n-u}^2\text{rj-i}^2\text{d}$ . Lat., *synergida* (from *συνεργός*, working together). Fr., s. *cellule adjuvante*. Ger., *Hilfszelle*. One of the two naked, nucleated bodies at the upper end of the embryo sac forming with the oosphere the egg-apparatus. [a, 35.]

**SYNERGIST**, adj.  $\text{Si}^2\text{n-u}^2\text{rj-i}^2\text{st}$ . Co-operating; as a n., a muscle that co-operates with another, also a drug that acts like another drug. [L, 115 (a, 48).]

**SYNERGY**, n.  $\text{Si}^2\text{n-u}^2\text{rj-i}^2$ . Gr., *συνέργεια* (from *συνεργείν*, to work together). Fr., *synergie*. Ger., *Synergie*. Fr., *synergie*. Associated activity. [a, 17.]

**SYNESTECOS** (Lat.), adj.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{st-ek}(\text{ak})/\text{o}^2\text{s}(\text{os})$ . From *συνιστάειν*, to set together. Firm, cohesive (adverbially of fæces). [L, 50 (a, 14).]

**SYNEUROSI** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-u}^2\text{r-os}^2/\text{i}^2\text{s}$ . Gen., *-os/eos (-is)*. Fr., *syneurose*. See **SYNEUROSI**.

**SYNGENESIA** (Lat.), n. f.  $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-je}^2\text{n}(\text{ge}^2\text{n})\text{-ez}(\text{e}^2\text{s})/\text{i}^2\text{-n}^2$ . From *σύν*, with, and *γένεσις*, generation. Ger., *Blüthenverein* (2d def.). 1. Of Linnaeus, a class of plants characterized by having the stamens united by their anthers. [a, 35.] 2. Of later taxonomists, *S. polygamia*; *S.* (1st def.) exclusive of the subdivision *Monogamia*. [a, 48].—**S. æqualis**, **S. frustranea**. See under *S. polygamia*.—**S. monogamia**. See *Monogamia*.—**S. necessaria**. See under *S. polygamia*.—**S. polygamia**. Ger., *Blüthenverein, Vereinkolbiges*. *S.* in which the flowers are in heads, comprising five orders: *æqualis*, in which the florets are all hermaphrodite; *superflua*, in which the marginal flowers are pistillate only; *frustranea*, with the marginal flowers neutral, the others perfect; *necessaria*, with the marginal flowers pistillate and fertile, and the central staminate and sterile; and *segregata*, in which each floret has a separate involucre. [a, 35].—**S. segregata**, **S. superflua**. See under *S. polygamia*.

**SYNGENIC**, adj.  $Si^2n\text{-}je^n\text{-}i^2k$ . Gr., *συγγενικός* (from *συγγίγναι*, to be born with). Lat., *syngenicus*. See CONGENITAL.

**SYNGONIUM** (Lat.), n. n.  $Si^2n\text{-}(su^6n^2)\text{-}gon\text{-}(go^2n)/i^2\text{-}u^3m\text{-}(u^6m)$ . From *σύν*, with, and *γίγνεσθαι*, to be born. Fr., *syngonie*. A genus of the *Araceae*. The *Syngonium* of Schott are a subtribe of the *Caladieae*. [a, 35.]—*S. auritum*, S. Plancheri. West Indian five-fingers. The juice is used as an application to the bites of venomous serpents and as a remedy for dropsy. One variety, *S. neglectum*, is found in Mexico. [a, 35.]

**SYNHYMENSIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}him\text{-}(hu^6m)\text{-}e^2ns\text{-}i^2s$ . Gen., *-en'seos (-is)*. See SYNHYMENSIS.

**SYNIDROSIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}i^2d\text{-}(ed)\text{-}ros\text{-}i^2s$ . Gen., *-ros'eos (-is)*. From *σύν*, with, and *ιδρῶς*, perspiration. Perspiration associated with some other condition. [a, 34.]

**SYNIZESIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}i^2z\text{-}(ez)\text{-}e\text{-}(a)/si^2s$ . Gen., *-es'eos (-is)*. Gr., *συνίσις* (from *συνίζειν*, to sit together). Fr., *syni-zése*. Ger., *Augensperre*. See CONOCLEISIS and MYOSIS (1st def.).

**SYNKINESIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n^2)\text{-}ki^2n\text{-}(ken)\text{-}e\text{-}(a)/si^2s$ . Gen., *-es'eos (-is)*. From *σύν*, with, and *κίνησις*, motion. Of Ross, an involuntary movement of a paralyzed part; occurring in conjunctivitis with voluntary movements of other parts. [a, 34.]

**SYNNEUROSIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}nu^2r\text{-}os\text{-}i^2s$ . Gen., *-os'eos (-is)*. From *σύν*, with, and *νεῦρον*, a nerve. Fr., *synneurose*. Ger., *Synneurose*, *Bandneinfiigung*. 1. Of the ancients, any one of various white structures of the body, such as nerves, tendons, ligaments, and aponeuroses. [Plenck (A, 314).] 2. See SYNDESMOSIS.

**SYNOCHA** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2k\text{-}(o^2ch^2)\text{-}a^2$ . Gr., *συνοχή* (from *συνέχειν*, to hold together). See SYNOCHUS.

**SYNOCHORIUM** (Lat.), n. n.  $Si^2n\text{-}(su^6n)\text{-}o^2k\text{-}(o^2ch^2)\text{-}om\text{-}(o^2r)/i^2\text{-}u^3m\text{-}(u^6m)$ . From *συνόχως*, joined together, and *χώριον*, a membrane, Fr., *synochorium*. See DIÆRESIS.

**SYNOCHUS** (Lat.), n. m. and f.  $Si^2n\text{-}(su^6n)\text{-}o^2k\text{-}(o^2ch^2)\text{-}u^3s\text{-}(u^6s)$ . From *συνέχειν*, to hold together. 1. Of Galen, putrid fever. 2. Any fever that lasts a certain time without well-marked remissions or intermissions. [a, 34.]—*S. anniversaria*. A s. that returns on the same date for several years. [a, 34.]—*S. ardens*. Typhoid fever. [a, 34.]—*S. a scabie*. S. caused by scabies. [a, 34.]—*S. biliosa*. Of Galen, s. ardens. [a, 34.]—*S. biliosa*. See Typhoid fever.—*S. dysenteriodes*. Of Sauvages, continued fever with diarrhoea. [a, 34.]—*S. pleuritica*. Of Sauvages, a disease prevalent at one time in Montpellier, in which the symptoms were those of continued fever and pleurodynia. [a, 34.]—*S. putris*. See Typhoid fever.—*S. rheumaticus*. Of Sydenham, a continued fever with general rheumatic pains. [a, 34.]—*S. sanguinea*. Of Galen, typhoid fever. [a, 34.]—*S. scorbutica*. Of Sennertus, s. caused by scurvy. [a, 34.]—*S. spermatica*. Of Sinibaldi, s. attributed to the retention of semen in continent persons. [a, 34.]—*S. sudatoria*. See Sweating sickness.—*S. tarantata*. Of Sauvages, s. that is cured by music. [a, 34.]—*S. variolodes*, S. variolous. See VARIOLA.

**SYNOCILS**, n. pl.  $Si^2n\text{-}o\text{-}si^2lz$ . See PALPOCILES.

**SYNOCREATE**, adj.  $Si^2n\text{-}o^2k\text{-}re^2at$ . From *σύν*, with, and *οἶα*, a sheath. Having the stipules united so as to form a sheath.

**SYNECIOUS, SYNOICIOUS**, adj's.  $Si^2n\text{-}e\text{-}shu^3s\text{-}i^2s$ , *-olk\text{-}u^3s*. Lat., *synoicus* (from *συνοικεῖν*, to dwell together). Fr., *synoïque*. Of cryptogams, having anthridia and archeogonia on the same receptacle. [a, 35.]

**SYNOLCE** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2ls\text{-}(o^2lk)\text{-}e\text{-}(a)$ . Gen., *-olc'es*. Gr., *συνολκή* (from *συνάλλειν*, to draw together). A cramp, especially of the calf of the leg. [L, 50 (a, 14).]

**SYNOPHRYS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2f\text{-}ri^2s\text{-}(ru^6s)$ . Gen., *-oph'ryos (-oph'ryis)*. From *σύν*, with, and *ὄφρυς*, the eyebrow. Union of the eyebrows by their growing continuously across the root of the nose. [F.]

**SYNOPHTHALMIA** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2f\text{-}tha^2l\text{-}(tha^2l)\text{-}i^2m\text{-}i^2a^2$ . See CYCLOPIA (1st def.).

**SYNOPHTHALMUS** (Lat.), n. m.  $Si^2n\text{-}(su^6n)\text{-}o^2f\text{-}tha^2l\text{-}(tha^2l)\text{-}i^2m\text{-}u^3s\text{-}(mu^6s)$ . From *σύν*, with, and *ὀφθαλμός*, the eye. See Cyc ops.

**SYNOPHYTY**, n.  $Si^2n\text{-}o^2f\text{-}i^2t\text{-}i^2$ . From *σύν*, with, and *φυτόν*, a plant. In botany, the union or adhesion of embryos. [a, 35.]

**SYNOQUE** (Fr.), n. Sen-ok. See SYNOCHA.—*S. accompagnée*. Synocha accompanied with a local inflammation as distinguished from simple synocha. [Marrotte, "Union méd.," Jan. 1, 1885, p. 6.]

**SYNORRHIZOUS**, adj.  $Si^2n\text{-}o^2r\text{-}riz\text{-}u^3s$ . Lat., *synorrhizus* (from *σύν*, with, and *ρίζα*, a root). Fr., *synorrhize*. Ger., *verwachsenend*. Having the radicle united or apparently united to the tissue of the albumen, as in the *Synorrhiza* (of Richard, a subdivision of the *Embryonata*, consisting of the *Coniferae* and *Cycadæae*). [a, 35.]

**SYNOSCHEOS** (Lat.), n. m.  $Si^2n\text{-}(su^6n)\text{-}o^2sk\text{-}(o^2sch^2)\text{-}e^2o^2s$ . From *σύν*, with, and *σχῆος*, the scrotum. The condition in which the skin of the penis is adherent to that of the scrotum. [a, 34.]

**SYNSTEOGRAPHY, SYNSTEOLOGY**, n's.  $Si^2n\text{-}o^2st\text{-}e^2o^2g\text{-}ra^2f\text{-}i^2$ , *-o^2l\text{-}o^2j^2*. Lat., *synstoeographia*, *synstoeologia* (from *σύν*, with, and *δέρων*, a bone, and *γράφειν*, to write, or λόγος, understanding). Fr., *synstoeographie*, *synstoeologie*. Ger., *Gelenkbeschreibung*, *Gelenklehre*. See ARTHROLOGY.

**SYNSTEOPHYTUM** (Lat.), n. n.  $Si^2n\text{-}(su^6n)\text{-}o^2t\text{-}e^2o^2f\text{-}i^2t\text{-}(u^3t\text{-}u^3m\text{-}u^6m)$ . From *σύν*, with, and *δέρων*, a bone, and *φυτόν*, a growth. Fr., *synstoeophyte*. See SYNSTOSIS congenita.

**SYNSTEOSIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2st\text{-}e^2o^2s\text{-}i^2s$ . Gen., *-os'eos (-is)*. From *σύν*, with, and *δέρων*, a bone. See SYNSTOSIS.

**SYNSTEOTOMY**, n.  $Si^2n\text{-}o^2st\text{-}e^2o^2t\text{-}om\text{-}i^2$ . Lat., *synstoeotomia* (from *σύν*, with, and *δέρων*, a bone, and *τομή*, a cutting). Incision into a joint. [E.]

**SYNSTOSIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o^2st\text{-}os\text{-}i^2s$ . Gen., *-os'eos (-is)*. From *σύν*, with, and *δέρων*, a bone. This form is more commonly used than *synstoeosis*, and is equally justifiable, since in many of the classical Greek derivatives of *δέρων* the *e* is omitted. Fr., *synstose*. Ger., *Synstose*, *Knochenverwachsung*. 1. That variety of articulation by symphysis in which the bones actually become fused together without the intervention of any other structure. 2. Premature and abnormal obliteration of the cranial sutures as a cause of deformity and irregularity of the skull. [A, 313.]—*S. congenita*. Congenital bony ankylosis.—*S. iliopubica*, *S. pubo-iliaca*. The articulation of the os pubis with the ilium.—*S. pubo-ischiaica*. The articulation of the os pubis with the ischium.

**SYNOTIA** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o\text{-}shi^2\text{-}(ti^2)\text{-}a^2$ . Fr., *synotie*. Ger., *Synotie*. The condition of a synotus. [a, 34.]

**SYNOTUS** (Lat.), n. m.  $Si^2n\text{-}(su^6n)\text{-}ot\text{-}u^3s\text{-}(u^6s)$ . From *σύν*, with, and *ὤς*, the ear. Fr., *synote*. Of I. Geoffroy St.-Hilaire, a monster that has two bodies closely united above a common umbilicus, and an incompletely double head presenting a face on one side and one or two ears on the other. [A, 301 (a, 34).]

**SYNOVETOMY** (Fr.), n. Sen-ov-e^2kt-om-e. The operation of excising a portion of the synovial membrane. [a, 34.]

**SYNOVIA** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o\text{-}vi^2\text{-}(wi^2)\text{-}a^2$ . Fr., *synovie*. Ger., *Gelenkschmiere*, *Gelenksaft*, *Gelenkwasser*. A tenacious, colorless, stringy, alkaline fluid composed of water, sodium chloride, calcium phosphate, much mucin, albumin, and traces of fat, which lubricates a joint. [a, 34.]

**SYNOVIAL**, adj.  $Si^2n\text{-}ov\text{-}i^2\text{-}l$ . 1. Pertaining to or resembling synovia. [C.] 2. Possessed of a s. membrane.

**SYNOVIN**, n.  $Si^2n\text{-}o\text{-}vi^2\text{-}n$ . Fr., *synovine*. Of Hünefeld, mucosin obtained from synovia. [L, 41, 49 (a, 14).]

**SYNOVITE** (Fr.), n. Sen-ov-et. See SYNOVITIS.—*S. à grains riziformes*. Synovitis in which corpora oryzoidea are formed. [a, 34.]—*S. fongueuse d'une gaine tendineuse*. Inflammation of the synovial sheath of a tendon accompanied by the production of fungosities.—*S. podo-sésamoidienne*. See MALADIE naviculaire.—*S. sèche*. See Dry SYNOVITIS.—*S. tuberculeuse des gaines tendineuses*. Tubercular synovitis. [Janin, "Progr. méd.," May 13, 1882, p. 359.]

**SYNOVITIS** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}o\text{-}vi\text{-}(we\text{-}t)\text{-}i^2s$ . Gen., *-it'id'es (-idis)*. Fr., *synovite*. Ger., *S. Gelenkentzündung*, *Gliedraiser-entzündung*. Inflammation of the synovial sac of a joint or of that of a tendinous sheath.—*Chronic purulent s.* See Fungous ARTHRITIS.—*Chronic serous s.* See HYDRARTHROSIS.—*Crepitant s.* See AT.—*Dry s.* S. in which the effusion is so small as to be imperceptible. [A, 520 (a, 29).]—*Exanthematic s.* S. due to the poison of the exanthemata, especially scarlatina and measles; generally mistaken for acute rheumatism. [E.]—*Fibrinous s.* See Dry s.—*Fungous s.* See Fungous ARTHRITIS.—*Gonorrhoeal s.* See Urethral s.—*Metritic s.* S. due to some form of uterine disturbance which causes the absorption of deleterious materials in the blood. [E, 17.]—*S. cartilaginea*, *S. cicatricans*. S. that has resulted in intercartilaginous fibrous ankylosis. [a, 34.]—*S. crouposa*. See S. *serofibrinosa crouposa*. [L, 8, 57, 221.]—*S. diphtheritica*. S. characterized by diphtheritic patches. [M. Schüller (A, 319 [a, 21]).]—*S. fungosa*. See Fungous ARTHRITIS.—*S. gonorrhoea*. See Gonorrhoeal RHEUMATISM.—*S. hyperplastica fungosa*, *S. hyperplastica granulosa*. See Fungous ARTHRITIS.—*S. hyperplastica pannosa*. A form of fungous arthritis in which the hypertrophied synovial membrane sends out processes which creep in over the cartilage as pannus does on the cornea. [A, 520 (a, 29).]—*S. lipomatosa*. S. with fatty degeneration of the neoplastic tissue. [a, 34.]—*S. papillaris*. S. with the formation of small papillae on the diseased membranes. [a, 34.]—*S. prolifera simplex*. S. with the proliferation of fibrinous bands from the membranes of the joint. [a, 34.]—*S. purpuralis*. S. due to septic infection during the puerperium. [a, 34.]—*S. pseudomembranacea*. See S. *diphtheritica*.—*S. purulenta*. S. in which there is purulent degeneration of the synovia. [a, 34.]—*S. pyæmia*. S. due to pyæmic infection. [a, 34.]—*S. rheumatica ankylopoetica*. S. with incipient ankylosis caused by rheumatism. [a, 34.]—*S. scarlatinosa*. S. occurring during scarlet fever and usually affecting several joints. [a, 34.]—*S. septic*. S. caused by septic infection. [a, 34.]—*S. serofibrinosa*. S. in which there is a mixture of sero-fibrinous exudate with the synovia. [a, 34.]—*S. serofibrinosa crouposa*. S. in which a sero-fibrinous deposit forms on the synovial membrane. [a, 34.]—*S. seropurulenta*. S. in which the effusion is sero-purulent. [a, 34.]—*S. serosa*. See ARTHRODEMA and HYDRARTHROSIS.—*S. serosa tuberculosa*. Serosa s. caused by tuberculosis. [a, 34.]—*S. suppurativa granulosa*. Chronic suppurative s. with the formation of granulation tissue. [a, 34.]—*S. vertebralis*. See SPONDYLARTHROSIS.—*Syphilitic s.* S. caused by syphilitic inflammation. [a, 34.]—*Tendinous s.* Inflammation of the synovial sheath of a tendon. [L, 87 (a, 50).]—*Tubercular s.* S. attended by the deposit of tubercle.—*Tubercular tendinous s.* Tuberculosis of the sheath of a tendon. [L, 88 (a, 50).]—*Urethral s.* See Gonorrhoeal RHEUMATISM.

**SYNSEPALOUS**, adj.  $Si^2n\text{-}se^2p\text{-}a^2l\text{-}u^3s$ . See GAMOSEPALOUS.

**SYNSOMATIA** (Lat.), n. f.  $Si^2n\text{-}(su^6n)\text{-}som\text{-}a\text{-}a\text{-}i^2s\text{-}(ti^2)\text{-}a^2$ . From *σύν*, with, and *σῶμα*, the body. Fr., *synsomatie*. Of Winterni, the combination of two or more bodies of the same class (e. g., two acids or two bases). [B, 78 (a, 14).]

**SYNSPERMY**, n.  $Si^2n\text{-}spu^6rm\text{-}i^2$ . From *σύν*, with, and *σπέρμα*, seed. The union of seeds. [a, 35.]

**SYNSPORÉE** (Lat.), n. f. pl.  $Si^2n\text{-}(su^6n)\text{-}spor\text{-}(spo^2r)\text{-}e^2a\text{-}e^2a\text{-}e^2a$ . Fr., *synsporees*. *Algæ* which are reproduced by conjugation; the *Conjugata*. [B, 52.]

**SYNTAGMA** (Lat.), n. n.  $Si^2n\text{-}(su^6n)\text{-}ta^2g\text{-}(ta^2g)\text{-}ma^2$ . Gen., *-tag'matos (-atis)*. (Gr., *σύνταγμα*. Of Pfeiffer, a body composed of tagmata. [a, 35.]

**SYNTASIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)/ta<sup>2</sup>s(ta<sup>2</sup>s)-i<sup>2</sup>s. Gen., -tas'eos, *syn'tasis*. Gr., *σύντασις* (from *συντίειν*, to stretch together). 1. Tension. 2. Of Galen, cohesion. [L, 50 (a, 14, 48).]

**SYNTATIC**, adj. Si<sup>2</sup>n-ta<sup>2</sup>t/i<sup>2</sup>k. Gr., *συντατικός*. Lat., *syntaticus*. Tonic. [L, 50 (a, 14).]

**SYNTAXIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-ta<sup>2</sup>x(ta<sup>2</sup>x)/i<sup>2</sup>s. Gen., -tax'eos (-is). Gr., *σύνταξις* (from *συντάσσειν*, to arrange). Fr., *syntaxe*. Ger., *S.* 1. See ARTICULATION. 2. See TAXIS. 3. Of Galen, the reduction of a dislocation or fracture. [L, 50 (a, 14).] 4. See SUTURE (2d def.).—*S. serrata*. See *Serrated suture*.

**SYNTECOPYRA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-te<sup>2</sup>k(tak)-o<sup>2</sup>p'i<sup>2</sup>r(u<sup>n</sup>)a<sup>2</sup>. From *συντίειν*, to waste away, and *πύρα*, fire. Fr., *syntécopie*. See *Colliquative fever*.

**SYNTENOSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-te<sup>2</sup>n-os/i<sup>2</sup>s. Gen., -os'eos (-is). From *σύν*, with, and *τένω*, a tendon. Fr., *synténose*. 1. See SYNDOSIS. 2. Of Spigel and Bartholin, the syndesmosis of the patella. [L, 41, 50 (a, 14).]

**SYNTERESIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-te<sup>2</sup>r(tar)-e(a)/si<sup>2</sup>s. Gen., -es'eos (-is). Gr., *συντήρησις* (from *συντηρέω*, to preserve closely). Ger., *Bewahren*. Conservation, preservation. [L, 50 (a, 14).]

**SYNTERETICA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-te<sup>2</sup>r(tar)-e<sup>2</sup>t(at)/i<sup>2</sup>k-a<sup>2</sup>. From *συντηρητικός*, preservative. Ger., *Erhaltungskunst*. Of Blancardus, see HYGIENE and PROPHYLAXIS.

**SYNTEXIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-te<sup>2</sup>x(tax)/i<sup>2</sup>s. Gen., -tex'eos (-is). Gr., *σύντηξις* (from *συντίειν*, to waste away). Fr., *syntexie*. See *COLLIQUATION* and *CONSUMPTION*.

**SYNTHENA** (Lat.), n. Of Paracelsus, a kind of epilepsy. [A, 325 (a, 48).]

**SYNTHESIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-the<sup>2</sup>s-i<sup>2</sup>s. Gen., -thes'eos, *syn'thesis*. Gr., *σύνθεσις* (from *συντίθειν*, to place together). Fr., *synthèse*. Ger., *Synthese*. 1. An old term for any operation by which parts were united after division. [E.] 2. The building up of a single complex substance out of two or more substances. [B.]

**SYNTHETICAL**, adj. Si<sup>2</sup>n-the<sup>2</sup>t/i<sup>2</sup>k-l. Gr., *συνθετικός*. Fr., *synthétique*. Ger., *synthetisch*. Pertaining to or obtained by synthesis. [B.]

**SYNTHETISMUS** (Lat.), n. m. Si<sup>2</sup>n(su<sup>n</sup>)-the<sup>2</sup>t-i<sup>2</sup>z(i<sup>2</sup>s)/mu<sup>2</sup>s-(mu<sup>2</sup>s). Gr., *συνθετισμός*. Fr., *synthétisme*. The combination of operations necessary for reducing a fracture. [L, 41, 50 (a, 14).]

**SYNTHORAX** (Lat.), n. m. Si<sup>2</sup>n(su<sup>n</sup>)-thor'a<sup>2</sup>x(a<sup>2</sup>x). Gen., -ac'os (-ac'is). From *σύν*, with, and *θώραξ*, the thorax. See THORACOPAGUS.

**SYNTONIN**, n. Si<sup>2</sup>n-to<sup>2</sup>n-i<sup>2</sup>n. Fr., *syntonine*. Ger., *S.*, *Muskel fibrin*. An acid albumin, especially that obtained from muscular tissue. It forms gelatinous, transparent flakes. [B, 4, 12.]

**SYNTRIMMA** (Lat.), **SYNTRIPSIS** (Lat.), n's n. and f. Si<sup>2</sup>n(su<sup>n</sup>)-tri<sup>2</sup>m/ma<sup>2</sup>, tri<sup>2</sup>ps/i<sup>2</sup>s. Gen., -trim'atos (-atis), -trips'eos (-is). Gr., *σύντριμμα*, *σύντριψις* (from *σύν*, with, and *τριβειν*, to rub). See COMMINUTION.

**SYNTROPHICUS** (Lat.), adj. Si<sup>2</sup>n(su<sup>n</sup>)-tro<sup>2</sup>f/i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *συντροφικός* (from *συντρέφειν*, to feed together). Fr., *syntrophique*. Ger., *methhäuslerisch*. Growing upon other plants without drawing sustenance from them (said of mosses, lichens, etc.). [a, 35.]

**SYNULOSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-u<sup>2</sup>l(u<sup>2</sup>)-os/i<sup>2</sup>s. Gen., -os'eos (-is). Gr., *συνουλωσις* (from *σύν*, with, and *ὠλή*, a cicatrix). See CICATRIZATION.

**SYNYMENSIS** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-i(u<sup>2</sup>)-me<sup>2</sup>ns/i<sup>2</sup>s. Gen., -en'ios (-is). From *σύν*, with, and *ὑμῖν*, a membrane. Ger., *häutige Knochenverbindung*. 1. A connection of bones by membrane, as in the fetal skull. 2. See SYNDOSIS.

**SYNZYGIA** (Lat.), n. f. Si<sup>2</sup>n(su<sup>n</sup>)-zi<sup>2</sup>j(zu<sup>2</sup>g)/i<sup>2</sup>a<sup>2</sup>. From *σύν*, with, and *ζυγόν*, a yoke. Fr., *synzygie*. Of Richard, the point of junction of two opposite cotyledons. [a, 35.]

**SYPHILELCOS** (Lat.), n. n. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-e<sup>2</sup>lk'o<sup>2</sup>s. Gen., -etc'eos. From *siphilis* (q. v.), and *ἔλκος*, an ulcer. A syphilitic ulcer. [L, 50 (a, 14).]

**SYPHILELCOSIS** (Lat.), n. f. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-e<sup>2</sup>lk-os/i<sup>2</sup>s. Gen., -cos'eos (-is). Fr., *siphylécose*. Syphilitic ulceration. [G, 5.]—*S. primaria*. See *Syphilitic chancre*.—*S. secundaria*. Ulceration due to secondary syphilis. [G, 5.]

**SYPHILICOME** (Fr.), n. Se-fe-le-kom. From *siphilis* (q. v.), and *κομείν*, to take care of. A hospital for syphilitic patients. [L, 41 (a, 14).]

**SYPHILID** (Ger.), n. Zu<sup>2</sup>f-el-ed'. See **SYPHILIDE**.—**Fressendes Knotens'**. An ulcerating tubercular syphilide. [G.]—**Grossknotiges S.** See **Gummatous syphiloderma**.—**Hauts'**. See **SYPHILODERMA**.—**Kleinknotchens'**. See **Miliary syphiloderma**.—**Knotens'**. See **Tubercular syphiloderma**.—**Pigments'**. See **Pigmentary syphiloderma**.—**Schuppens'**. See **Papulo-squamous syphiloderma**.

**SYPHILIDE**, n. Si<sup>2</sup>f/i<sup>2</sup>l-i<sup>2</sup>d. Fr., *s.* Ger., *Syphilid*. 1. A cutaneous disease symptomatic of syphilis; a syphilitic disease of the skin. For various subheadings not here given, see the corresponding expressions under **SYPHILODERMA**. [G.] 2. A syphilitic lesion on a mucous membrane, more especially near one of the mucous orifices. [G, 7.]—**Annular s.** See *Circinate papulo-squamous s.*—**Bullous s.** See under **PEMPHIGUS siphiliticus**.—**Circinate papulo-squamous s.** Lat., *siphiloderma papulosquamosum circinatum*. Fr., *s. circinée squameuse* (ou *psoriasiforme*). A squamous s. in which gyrate and circinate patches are formed resembling psoriasis. [G, 84.]—**Corymbiform s.** See *Corymbiform papular syphiloderma*.—**Erythematous s.** See *Syphilitic roseola*.—**Flat papular s.** See *Lenticular papular syphiloderma*.—**Follicular s.** See *Miliary syphiloderma*.—**Gyrate s.** See *Circinate papulo-squamous s.*—**Lichenoid s.** See *Miliary syphiloderma*.—**Macular s.** 1. See *Syphilitic roseola*. 2. Pig-

mentary stains following a syphilitic exanthem. [G.] 3. See **Pigmentary syphiloderma**.—**Maculo-papular s.** See *Papular syphilitic roseola*.—**Marmoraceous pigmentary s.** A form of pigmentary s. occurring usually upon the sides of the neck, in persons of fair skin, and characterized by the appearance of whitish spots due to loss of pigment, while at the periphery of these spots the skin appears darkened, as though the pigment displaced from the central spots had accumulated at the borders. [N. Y. Med. Jour., Feb. 18, 1893, pp. 177, 179 (G).]—**Nodular s.** See *Tubercular syphiloderma*.—**Nummular s.** See *Circinate papulo-squamous s.*—**Orbicular s.** See *Circinate papulo-squamous s.*—**Papular s.** A papular syphilitic eruption affecting either the skin (see *SYPHILODERMA papulosum*) or the mucous membrane. [G.]—**Pustulo-crustaceous s.** See *Pustular syphiloderma*.—**Retiform pigmentary s.** Fr., *s. pigmentaire à dentelles*. A form of pigmentary s. that begins with the production of brown patches on the skin, most commonly of the neck, but also on other parts of the body, and is followed by disappearance of the superpigmentation in spots over the surface of the dark patches, producing a number of white areas which gradually increase in size, giving the part at first a dappled and later a retiform appearance. The disease may resemble vitiligo, but is said to differ from it in the absence of the sharply marked pigmented border that surrounds the leucodermatous spots in vitiligo. [G.]—**Scaling papular s.** See *Papulo-squamous syphiloderma*.—**Scaling papular s. of the palms and soles.** See *Squamous syphiloderma of the palms and soles*.—**Serpiginous tubercular s.** A tubercular s. having a serpiginous arrangement or mode of extension. [a, 34.]—**Subcutaneous circinate s.** Annular syphilitic roseola; so called because the efflorescences are not elevated. [G.]—**S. à forme d'eczéma** (Fr.). A variety of herpes-like syphiloderma in which the efflorescences are minute and very closely aggregated. [G, 84.]—**S. circinée psoriasiforme** (ou *squameuse*) (Fr.). See *Circinate papulo-squamous s.*—**S. cornée** (Fr.). See under *SYPHILIS cutanea cornea*.—**S. cutanée** (Fr.). See *SYPHILODERMA*.—**S. en cocarde** (Fr.). Cockade s.; a variety of circinate papular syphiloderma in which two or more concentric papular rings are formed. [G, 84.]—**S's gommées ulcéraives** [Fournier] (Fr.). See *Ulcerating tubercular syphiloderma*.—**S. granulée des ailes du nez** (Fr.). See under *Framboesiaform papular syphiloderma*.—**S. hypertrophique de la vulve** (Fr.). Hypertrophy of the vulva due to syphilitic infiltration, often taking the form of an indurating oedema. [G.]—**S. muqueuse** (Fr.). Syphilitic lesions on a mucous membrane. [G.]—**S. muqueuse papulo-hypertrophique** (Fr.). See *CONDYLOMA latum*.—**S. papuleuse en nappe** (Fr.). A form of papular syphiloderma in which the papules are closely aggregated together or coalescent so as to form circumscribed reddish patches with a roughened surface resembling the texture of coarse cloth. [G, 85.]—**S. papuleuse humide** (Fr.). Mucous patches of the skin. [G, 85.]—**S. papulo-croûteuse** (Fr.). A papular syphiloderma in which the papules are covered by yellowish, brownish, or grayish friable crusts without ulceration beneath. When the crusts are removed the surface exposed is dry and not excoriated, or but very superficially eroded. Its most common situations are the face (especially the forehead and about the lips and alae nasi) and the parts of the body covered by hair. [G, 85.]—**S. papulo-érosive** (Fr.). See *Mucous patch*.—**S. pigmentaire à dentelles** (Fr.). Of Fournier, see *Retiform pigmentary s.*—**S. pityriasique** (Fr.). A form of papulo-squamous syphiloderma attended with furfuraceous desquamation. [G.]—**S. puro-crustacée ulcéreuse** (Fr.). The deep variety of ethymatous syphiloderma. [G.]—**S. pustulante** (Fr.). See *SYPHILIS pustulans*.—**S. pustuleuse exanthématique** (Fr.). A pustular syphiloderma occurring in an early stage of secondary syphilis and representing a pustular modification of the papular syphiloderma. [G.]—**S. squameuse cornée** (Fr.). See *SYPHILIS cutanea cornea*.—**S. tuberculeuse rongeante** (Fr.). Of Bonhomme, a serpiginous tubercular s. [a, 34.]—**S. tuberculeuse (résolutive)** (Fr.). See *Tubercular syphiloderma*.—**S's tuberculo-croûteuses et tuberculo-ulcéreuses** (Fr.). See *Ulcerating tubercular syphiloderma*.—**S. tuberculo-ulcéraire gangréneuse** (Fr.). Lat., *carbunculus venericus*. A tubercular syphiloderma attended with gangrenous ulceration. A small black slough forms in the centre of the tubercle, extends rapidly, and, on being loosened by the secretions beneath, leaves a deep ulcer with hard, everted edges surrounded by a deep-red areola and discharging a foul secretion. It is said to be most common on the face, the extremities, the shoulders, and the buttocks. [G, 84.]—**Vegetating s.**, **Verrucous s.** See *Framboesiaform papular syphiloderma*.—**Wasting secondary s.** See *Abdominal streaks*.

**SYPHILIDERMIE** (Fr.), n. Se-fe-le-de<sup>2</sup>r-me. See **SYPHILODERMA**.—**S. dyschromatose**. A pigmentary syphiloderma. [a, 34.]

**SYPHILIDIATRIA** (Lat.), n. f. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-i<sup>2</sup>d-i<sup>2</sup>a<sup>2</sup>t(a<sup>2</sup>)/i<sup>2</sup>l(re)/a<sup>2</sup>. From *siphilis* (q. v.), and *iatriā*, medical treatment. Fr., *siphiliatrie*. The therapeutics of syphilis. [L, 50 (a, 14).]

**SYPHILIDOCOTHUS** (Lat.), n. m. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-i<sup>2</sup>d-o<sup>2</sup>k-(o<sup>2</sup>ch<sup>2</sup>)/tu<sup>2</sup>s(thu<sup>2</sup>s). From *siphilis* (q. v.), and *ὄχθος*, a tumor. See *Tubercular syphiloderma*.—**S. confertus**. See *Corymbiform papular syphiloderma*.—**S. disseminatus**. A disseminated tubercular syphiloderma. [G.]—**S. rodens**. An ulcerating tubercular or gummatous syphiloderma. [G.]—**S. serpiginosus**. An ulcerating serpiginous syphiloderma. [G, 5.]

**SYPHILIDOCILINICE** (Lat.), n. f. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-i<sup>2</sup>d-o(o<sup>2</sup>)-kli<sup>2</sup>n-(klen)/i<sup>2</sup>s(i<sup>2</sup>l)-e(a). Gen., -clin'ices. From *siphilis* (q. v.), and *κλινική*, clinical medicine. Clinical instruction in regard to syphilis.

**SYPHILIDOCOLPITIS** (Lat.), n. f. Si<sup>2</sup>f(su<sup>f</sup>)-i<sup>2</sup>l-i<sup>2</sup>d-o(o<sup>2</sup>)-ko<sup>2</sup>l-p(i<sup>2</sup>e)/ti<sup>2</sup>s. Gen., -i<sup>2</sup>l'id-o(-idis). From *siphilis* (q. v.), and *κόλπος*, the vagina. Gonorrhoea in women. [L, 50 (a, 14).]

**SYPHILIDOGRAPHY, SYPHILIDOLOGY**, n's. Si<sup>2</sup>f-i<sup>2</sup>l-i<sup>2</sup>d-o<sup>2</sup>g-ra<sup>2</sup>f-i, -o<sup>2</sup>l'o<sup>2</sup>-i<sup>2</sup>l. Lat., *siphilidographia, siphilidologia* (from *siphilis* [q. v.], and *γράφειν*, to write, or *λόγος*, understanding). The pathology, etc., of syphilis. [a, 48.]

**SYPHILIDOMANIA** (Lat.), n. f. Si<sup>2</sup>f(su<sup>6</sup>f)-i<sup>2</sup>l-i<sup>2</sup>d-o(o<sup>3</sup>)-man-(ma<sup>3</sup>n)/i<sup>2</sup>-a<sup>3</sup>. See **SYPHILOMANIA**.

**SYPHILIDOPHOBIA** (Lat.), n. f. Si<sup>2</sup>f(su<sup>6</sup>f)-i<sup>2</sup>l-i<sup>2</sup>d-o(o<sup>3</sup>)-fob-(fo<sup>3</sup>b)/i<sup>2</sup>-a<sup>3</sup>. See **SYPHILOPHOBIA**.

**SYPHILIDOPHTHALMIA** (Lat.), n. f. Si<sup>2</sup>f(su<sup>6</sup>f)-i<sup>2</sup>l-i<sup>2</sup>d-o<sup>2</sup>f-tha<sup>2</sup>(tha<sup>3</sup>l)/mi<sup>2</sup>-a<sup>3</sup>. Fr., *syphtilidophthalmie*. Syphilitic ophthalmia. [L. 50 (a, 14).]

**SYPHILIGRAPHIE** (Fr.), n. Se-fe-le-gra<sup>3</sup>-fe. See **SYPHILOGRAPHY**.

**SYPHILIMANIE** (Fr.), n. Se-fe-le-ma<sup>3</sup>-ne. See **SYPHILOMANIA**.

**SYPHILIONTHUS** (Lat.), n. m. Si<sup>2</sup>f(su<sup>6</sup>f)-i<sup>2</sup>l-i<sup>2</sup>-o<sup>2</sup>nth/u<sup>3</sup>s(u<sup>4</sup>s). See **SYPHILOJONTHUS**.

**SYPHILOSE** [Piorry] (Fr.), n. Se-fe-le-oz. Any syphilitic disease. [A. 250 (a, 21).]

**SYPHILIS** (Lat.), n. f. Si<sup>2</sup>f(su<sup>6</sup>f)-i<sup>2</sup>l-i<sup>2</sup>s. Gen., -il'idia. This word, introduced into nosology by Sauvages, was originally used to designate the "morbus gallicus" by Fracastori, who, in a Latin poem published at Verona in 1531, represents his hero, *Siphilus*, *Syphitus*, or *Siphylus*, as smitten with the disease for disrespect shown to the gods. It seems to be formed from the personal name, the etymology of which is unknown; neither form nor meaning warrants any derivation from *σύν*, with, or *σῆς*, a swine, and *φιλῆν*, to love. The bad (or specific, or venereal) disease, French pox (or crust, or disease), great pox; a chronic infectious disease of long duration, usually acquired by inoculation of the virus of the disease on an abraded surface (see *SYPHILITIC CHANCERE*), but also congenitally and (by the mother) from a syphilitic foetus. It is especially characterized by cellular infiltrations in the connective tissue of the true skin, the bones, the mucous membranes, the brain and spinal cord and their meninges, and the solid viscera in the form of syphilomata and syphilides, by alopecia syphilitica, and by general cachexia. For its stages, see *Primary s.*, *Secondary s.*, and *Tertiary s.*, also *Incubation of s.* In Young's classification of diseases, *s.* is a genus of the *Epiphymata*. [G. 4, 48.]—**Annulate erythematous s.** See *Annular syphilitic roseola*.—**Benign s.** Fr., *s. tempérée*, *s. mitigée*. *S.* unattended with serious impairment of the general health and having the symptoms usually mild and of short duration. [G.]—**Bullous dermatosis s.** A bullous syphiloderm. [a. 34.]—**Congenital s.** Ger., *Zeugungs*. *S.* that has existed in an individual from birth, either as hereditary *s.* (q. v.), or by having been communicated to the foetus from the mother through the utero-placental circulation during intra-uterine life (intra-uterine or placental *s.*), or by contact with syphilitic lesions in the genital passages of the mother during parturition (*infectio per partum*). [G.]—**Constitutional s.** See *Secondary s.*—**Cutaneous s.** See *SYPHILIDE* (1st def.).—**Desquamative s. of the tongue.** A superficial desquamative disease of the tongue observed in certain children in a foundling asylum. It was believed to be due to inherited *s.*, but was probably exfoliatio areata lingue. [Parrot, "Ann. de dermat. et de syph.", 1881, p. 370 (G.).]—**Dry scaling patch of primary s.** [Otis]. See *Desquamative CHANCERE*.—**Encephalic s.** *S.* of the brain. [D. 1.]—**Equine s.** Fr., *s. équine, dourine, mal de coït*. A specific blood disease in the horse characterized in the early stages by morbid changes in the genito-urinary organs. There are swelling of the genitals, a vaginal or urethral discharge, a pustular eruption on the penis or vulva, a muco-purulent nasal discharge, enlargement of the lymph-glands, and general weakness usually terminating in paralysis of the hind extremities and sometimes in death. The disease usually lasts from three to four months. [a. 34.]—**Erythematous s.** See *SYPHILITIC ROSEOLA*.—**Extra-genital s.** See *S. insontum* (1st def.).—**Fausse s.** (Fr.). See *Simple CHANCERE*.—**Gehirns' (Ger.).** *S.* of the brain.—**Gonorrhoea s.** Urethral chancre with a discharge resembling that of gonorrhoea. [J. Hutchinson, "Brit. Med. Jour.", Jan. 9, 1886, p. 55 (a. 34).]—**Hæmorrhagic s.** See *S. hæmorrhagica neonatorum*.—**Hereditary s.** Lat., *s. hereditaria* (seu *ingenta*, seu *congenita*). Fr., *s. héréditaire* (ou par *conception*). Ger., *Zeugungs*, *Vererbungs*. Properly, *s.* transmitted at the time of conception either through infected semen of the father or an infected ovum of the mother or through both. The term is often used for congenital *s.* [G.]—**Impfs' (Ger.).** See *Vaccination s.*—**Infantile s.** See *Congenital s.* and *Hereditary s.*—**Inherited s.** See *Hereditary s.*—**Intra-uterine s.** See under *Congenital s.*—**Labyrinthine s.** Constitutional *s.* affecting the labyrinth of the internal ear. [F.]—**Latent s.** Any stage of *s.* in which there are no active manifestations of the disease.—**Malignant s.** Fr., *s. grave, s. galopante, s. maligne précoce*. *S.* in which the symptoms are of an unusually grave character and attended with serious injury to the general health, and in which lesions that commonly appertain to an advanced period (see *Tertiary s.*) occur prematurely. More especially it is characterized by the occurrence of extensive infiltrations in various parts of the body, which rapidly undergo degeneration with destruction of the tissues affected. [G.]—**Miliary s.** See *Miliary papular SYPHILODERM*.—**Post-conceptional s.** See *Croc en retour* (1st def.).—**Primary s.** *S.* as it exists in an infected individual during the period intervening between the first appearance of the initial lesion (or syphilitic chancre) and the development of constitutional (secondary) *s.* [G.]—**Pseudo-s.** An antiquated term for certain morbid symptoms resembling syphilis (or the "venereal disease"), but differing from it chiefly in not responding in the same way to mercurial treatment. The term was chiefly in use in the period before syphilis was clearly differentiated from gonorrhoea and the simple (non-infecting) chancre. [G.]—**Secondary s.** *S.* during the period succeeding the second incubation, characterized by generalized manifestations of infection, chiefly in the form of superficial lesions of the skin and mucous membranes, together with various functional disturbances of the nervous and vascular systems, and preceding the occurrence of the symptoms of tertiary *s.* [G.]—**Sequæ of s.** [Hutchinson]. See *Tertiary s.*—**Simple s.** Of Miltou, a form of *s.* supposed to arise

from a chancre and to manifest itself by very slight constitutional symptoms. ["N. Y. Med. Jour.," June 23, 1888, p. 694 (a, 50).]—**S. corymbosa.** See *Corymbiform papular SYPHILODERM*.—**S. by conception.** Fr., *s. conceptionnelle, choc en retour*. *S.* acquired by a pregnant woman through the medium of the utero-placental circulation from a foetus that inherits *s.* from the father. [G.]—**S. cutanea.** See *SYPHILIDE* (1st def.).—**S. cutanea bullosa.** See under *PEMPHIGUS SYPHILITICUS*.—**S. cutanea cornea.** A syphiloderm affecting most commonly the soles of the feet and sometimes also, though to a lesser degree, the palms of the hands; marked by great thickening and roughness of the epidermis in the form of a callus-like or verrucous hypertrophy, sometimes attended with the production of little corneous masses or concretions in the epidermis which can be dug out, leaving little round depressions (*syphilide cornée*). [G.] Cf. *Squamous SYPHILODERM of the palms and soles*.—**S. cutanea maculosa.** See *SYPHILITIC ROSEOLA*.—**S. cutanea miliaris.** See *Miliary papular SYPHILODERM*.—**S. cutanea nodosa.** See *Tubercular SYPHILODERM*.—**S. cutanea papulosa.** See *SYPHILODERMA papulosum*.—**S. cutanea pustulosa.** See *Impetiginous SYPHILODERM*.—**S. cutanea rupiformis.** See *SYPHILITIC RUPIA*.—**S. cutanea squamosa.** See *Papulo-squamous SYPHILODERM*.—**S. cutanea tuberculosa.** See *Tubercular SYPHILODERM*.—**S. cutanea vesiculosa.** See *Vesicular SYPHILODERM*.—**S. décapitée (Fr.).** *S. d'emblée (Fr.).* Constitutional *s.* occurring without previous chancre, as in *s.* by conception. [G.]—**S. exulcerans.** An ulcerating syphilide. [G. 7.]—**S. exulcerans excavata.** A deeply ulcerating syphilide. [G. 7.]—**S. exulcerans fissata.** A syphilide attended with fissures, as about the mucous orifices. [G. 7.]—**S. exulcerans serpigiosa.** An ulcerating serpiginous syphiloderm. [G. 7.]—**S. galopante (Fr.).** *S. grave (Fr.).* See *Malignant s.*—**S. hæmorrhagica neonatorum.** Of Behrend, hæmophilia in new-born children, so called on account of its frequent association with hereditary *s.* ["Med. Chron.," Dec., 1886, p. 239 (a, 50).]—**S. hereditaria.** See *Hereditary s.*—**S. hereditaria tarda.** Hereditary *s.* breaking out during adolescence. [L. 57 (a, 14).]—**S. imperceptible (Fr.).** 1. Of Driday, *s.* without symptoms but manifestly present, inasmuch as the person affected transmits it to the offspring. [G. 2. See *S. by conception*.—*S. indica.* See *FRAMBESIA*.—*S. ingenta.* See *Hereditary s.*—**S. insontum.** 1. *S.* contracted other than by coitus. 2. Of Munk, a variety of radesyge regarded as identical with sibbens (q. v.). [G.]—**S. inveterata.** See *Tertiary s.*—**S. lenticularis.** See *Lenticular papular SYPHILODERM*.—**S. locale** [Langlebert] (Fr.). See *Simple CHANCERE*.—**S. mitigée (Fr.).** See *Benign s.*—**S. modificata** [Behrend]. See *RADESYGGE*.—**S. neonatorum.** See *Hereditary s.*—**S. occulta.** *S.* occurring in individuals that have no history or evidence of primary or secondary lesions. [a. 34.]—**S. œconomica.** Of Bulkley, *s.* transmitted through the incidental contact of social intercourse, such as by pipes, cigars, pins, etc. ["Arch. f. Dermat. u. Syphil.", 1893, p. 307 (a, 50).]—**S. of nurses.** *S.* contracted by nurses in giving suck to syphilitic children. [L. 87 (a, 50).]—**S. of the bones.** See *Gummatous OSTEITIS*.—**S. of the lung.** A rare form of pulmonary fibrosis due to *s.* [a. 34.]—**S. of the nerves.** Inflammation and degeneration of the nerves due to *s.* [a. 34.]—**S. of the spinal meninges.** See *SYPHILITIC MENINGITIS*.—**S. papulosa miliaris.** See *Miliary SYPHILODERM*.—**S. papulosquamosa.** See *Papulo-squamous SYPHILODERM*.—**S. pigmentosa.** See *Pigmentary SYPHILODERM*.—**S. papulosa gyrata.** A syphiloderm with papules grouped in gyrate lines. [G.]—**S. precoc.** See *Malignant s.*—**S. primigenia.** See *Primary s.*—**S. pustulans.** Fr., *syphilide pustulante*. Of Alibert, papular, pustular, and tubercular syphilides. [G. 7.]—**S. pustulans compressa.** Fr., *syphilide pustulante plate, pustules vénériennes plates*. Large flat syphilitic efflorescences occurring in the folds of the anus and upon the thighs of new-born children. [G. 7.]—**S. pustulans cerasiformis.** Fr., *syphilide pustulante cerisee*. A tubercular syphiloderm with clustered tubercles resembling clusters of cherries. [G. 7.]—**S. pustulans crustacea.** See *Ethy-matous SYPHILODERM*.—**S. pustulans lenticularis.** See *Lenticular papular SYPHILODERM*.—**S. pustulans miliaris.** See *Miliary SYPHILODERM*.—**S. pustulans pemphigoides.** See *PEMPHIGUS SYPHILITICUS*.—**S. pustulans racemiformis.** Fr., *syphilide pustulante en grappe*. See *Corymbiform papular SYPHILODERM*.—**S. pustulans scabioides.** A pustular syphiloderm resembling scabies. [G. 7.]—**S. pustulans serpigiosa.** See *Serpiginous SYPHILODERM*.—**S. pustulans squamosa.** See *Papulo-squamous SYPHILODERM*.—**S. pustulans tuberculosa.** See *Tubercular SYPHILODERM*.—**S. pustulans urtica.** See *Papular syphilitic ROSEOLA*.—**S. pustulans varioloides.** See *Varioliform SYPHILODERM*.—**S. technica.** *S.* insontum acquired in following one's vocation, as by physicians or midwives. [a. 34.]—**S. tempérée (Fr.).** See *Benign s.*—**S. universalis.** *S.* affecting the entire organism. [a. 34.]—**S. vaccinale (Fr.).** *S. vaccinata.* See *Vaccination s.*—**S. vegetans.** Fr., *syphilide végétante*. See *CONDYLOMA latum* and *CONDYLOMA acuminatum*.—**S. vegetans condyloma.** *S.* with the formation of large pedunculated growths, probably condylomata acuminata. [G. 7.]—**S. vegetans crista galli.** *S. vegetans frambesia.* See *CONDYLOMA acuminatum*.—**S. vegetans porri-formis.** See *CONDYLOMA latum*.—**S. végétante framboisée (Fr.).** See *CONDYLOMA acuminatum*.—**Tertiary s.** *S.* in an advanced stage, characterized by localized deposits in the connective tissue of various parts of the body, chiefly in the form of syphilomata. It is attended with deep-seated ulceration of the skin or mucous membranes and syphilitic osteitis, together with organic affections of the viscera and of the nerves and blood-vessels. [G.]—**Unitarian doctrine of s.** The doctrine that all chancres are syphilitic. [G.] Cf. *SYPHILITIC CHANCERE* and *Simple CHANCERE*.—**Vaccination s.** Ger., *Impfs*. *S.* acquired by vaccination, either through vaccine virus obtained from a syphilitic subject or through syphilitic contamination of the wound during the operation, as by unclean instruments. The characteristic vaccine pustule is followed by an indurated chancre. [G.]—**Vererbungs' (Ger.).** See *Hereditary s.*—**Visceral s.** Tertiary or congenital *s.* in which the

viscera are especially subject to the inflammatory process. [a, 34.] —Zeugungss' (Ger.). See *Hereditary s.*

**SYPHILISME** (Fr.), n. Sef-el-es-m'. Susceptibility to inoculation with the syphilitic virus. [L, 41 (a, 14).]

**SYPHILISMUS** (Lat.), n. m. Si²f(su²f)-i²l-i²z(i²s)/mu²s(mu²s). See *SYPHILIS*.

**SYPHILITIC**, adj. Si²f-i²l-i²z/i²k. Lat., *sypiliticus*. Fr., *sypilitique*. Ger., *sypilitisch*. 1. Affected with syphilis. 2. Pertaining to or having the nature of syphilis. [G.]

**SYPHILIZATION**, n. Si²f-i²l-i²z-a/sh'n. Fr., *sypilisation*. The act of inoculating the system with the virus of syphilis, or the condition of being thus inoculated. The practice of s., as employed by Sperino, Bidenkap, Boeck, and others, consisted in making multiple inoculations of virus (supposed at the time to be syphilitic, but now known to have been simply inoculable pus from soft venereal sores or from syphilitic chancres that had been irritated and made to suppurate freely), which were continued until the skin ceased to react and no further sores could be produced, when the individual was supposed to be syphilized and to be proof against further syphilitic effects. [G.]

**SYPHILIZED**, adj. Si²f/i²l-izd. Fr., *sypilisé*. Affected with hereditary or constitutional syphilis. [a, 34.] Cf. *SYPHILIZATION*.

**SYPHILOCELIS** (Lat.), n. f. Si²f(su²f)-i²l-o(o²)-sel(kal)/i²s(es). Gen., -cel'idis (-idis). See *Macular* *SYPHILIDE*.

**SYPHILOCOMIE** (Ger.), n. Zu²f-el-o-kom-e'. See *SYPHILICOME*.

**SYPHILODERM**, n. Si²f/i²l-o-du²s-rm. Lat., *sypiloderma* (from *sypilis* [q. v.], and *dēpa*, the skin). See *SYPHILIDE* (1st def.).

—**Aconeform s.**, **Aconeform s.** Lat., *acne sypilitica*, *sypilofonthus lenticularis*. A pustular s. characterized by acuminate, usually discrete pustules, varying in size from that of a pin-head to that of a split pea, affecting especially the sites of the sebaceous follicles, and resembling acne, from which it differs in its more general distribution, in the presence of the characteristic syphilitic infiltrations at the bases of the pustules, in its tendency to more superficial suppuration and to rapid desiccation of the pus (forming little crusts), in the absence of comedones, and in leaving pigmented spots. [Julien (G, 84).] —**Corymbiform papular s.** Lat., *sypiloderma papulosum corymbiforme*. Fr., *sypilide en corymbes*. A papular s. in which the efflorescences are clustered in groups. [G.] —**Ecthyrnatus s.** Lat., *ecthyrna sypiliticum*, *sypilofonthus latus*. Fr., *sypilide ecthyrnateuse*. A pustular s. characterized by large flat pustules of about the size of a finger-nail seated upon a deep-red base and tending rapidly to form dark-colored crusts. A "superficial" variety and a "deep" variety are described. Both occur most commonly on the legs. The superficial form also frequently occurs on the forehead and neck near the border of the hair, and on the back, nates, scrotum, labia majora, etc. Sometimes the efflorescences are disseminated, often clustered in curvilinear or circular forms. The deep variety, which usually belongs to a later period of the disease than the superficial form, occurs as irregularly distributed, roundish pustules which ulcerate and form thick, rough, brownish or greenish-black crusts (see *SYPHILITE RUPIA*) followed by permanent cicatrices. [G.] —**Erythematous s.** See *SYPHILITE ROSEOLA*. —**Frambesiaform papular s.** Fr., *sypilide papuleuse végétante*. A circumscribed papular or tubercular s. in which the surface becomes irregularly elevated, with little warty prominences resembling the surface of a raspberry. The corneous layer of the epidermis has a granular or rugous appearance, and is sometimes covered by a viscid secretion that dries and forms a loosely adherent crust. Its most common situations are the back, the face, especially in the angle of the alæ nasi (the *sypilide granulee des ailes du nez* of Fournier), and the cheeks. [G, 85.] —**Gummatous s.** Fr., *sypilide gommeuse*. Ger., *tieftiegenes grossknotiges Syphilid*. A gummy tumor which, beginning in the subcutaneous connective tissue, tends to involve the true skin gradually. It appears first in the form of a small, deep-seated nodule, which gradually enlarges and approaches nearer the surface, which latter becomes of a dusky-red color, and when softening of the gumma takes place ulceration may occur and be followed by the production of a deeply excavated ulcer, or the tumor may disappear by resolution without perforation of the surface. [G.] —**Herpetiform s.**, **Herpetoid s.** Fr., *sypilide herpétiforme*. A s. consisting of small, millet-sized papular efflorescences surmounted by minute vesicles or pustules, usually closely clustered or arranged in circular or other figures like the groups of herpes. The secretion rapidly dries up, leaving little adherent brownish or yellowish crusts. [G.] —**Impetiginiform s.**, **Impetiginous s.** A form of pustular s. in which small, flat pustules surrounded by a red areola occur in clusters, most commonly about the face or scalp. They soon dry up, forming thick, granular, dark-colored crusts, beneath which there is usually an eroded surface, but slightly depressed, often somewhat elevated. [G.] —**Large flat pustular s.** See *Ecthyrnatus s.* —**Lenticular papular s.** An early syphilitic eruption, usually disseminated over the greater portion of the body, consisting of dark-red or copper-colored, round or oval papules, with a rounded or flat, smooth surface, upon which during the process of involution a thin whitish scale of epidermis is formed. [G.] —**Miliary (papular) s.** An eruption of small, dark-red, acuminate papules situated about the mouths of the hair follicles, frequently clustered, sometimes forming determinate figures; one of the earlier manifestations of secondary syphilis. [G.] —**Miliary pustular s.** See *Herpetiform s.* —**Palmar and plantar s.** See *Squamous s. of the palms and soles*. —**Papular s.** See *SYPHILODERMA papulosum*. —**Papulo-squamous s.** Lat., *sypilolepis*, *psoriasis sypilitica*. Ger., *Schuppensypilid*. Scaling papular sypilide; a modified form of the papular s. in which the efflorescences are covered by whitish, adherent scales and have a certain resemblance to psoriasis. [G.] —**Pigmentary s.** A form of chromatosis of the skin observed in

syphilitic patients and regarded by many as a symptom of syphilis. Its most frequent situation is upon the sides of the neck, and it occurs most commonly in women. It sometimes appears in the form of small spots or macules disseminated over the surface, producing a mottled appearance, or in larger patches of the character of chloasma. Between the pigmented portions the intervening skin may appear either normal or unusually white, as if from deficiency of pigment (see *VITILIGO*). [G.] —**Pustular eczemaform s.** See *Impetiginous s.* —**Pustular s.** See *Ecthyrnatus s.*, *Impetiginous s.*, and *Herpetiform s.* —**Serpiginous s.** A pustular or ulcerating s. that advances in a serpiginous or creeping manner. It may start from a pustule which gradually extends at the periphery while healing at the centre, presenting a ring of dark, greenish crust with ulceration beneath, while the centre is red, darkly pigmented, blanched, and atrophic. Sometimes the advance of the disease is only upon one side, with cicatrization upon the other. Another form, attended with deeper ulceration, usually starts from one of the later cutaneous lesions of syphilis, such as the tubercular, ecthyrnatus, or gummatous s., and the ulceration often assumes a horseshoe or kidney shape, with cicatrization in the centre. [G.] —**Small acuminated pustular s.** See *Herpetiform s.* —**Small flat pustular s.** See *Impetiginous s.* —**Squamous s.** See *Papulo-squamous s.* —**Squamous s. of the palms and soles.** A s. characterized by rough, dry, scaling patches on the palmar and plantar surfaces of the hands and feet. The patches may be roundish, circinate, or horseshoe-shaped, or may occur in irregular curved or gyrate lines, and often manifest a tendency to advance in one direction while healing in the others. The surface is usually most roughened at the periphery, where the process is sharply defined, and is generally marked by a line of ragged, partly detached epidermis. Other parts of the patch may be scaly or smooth, shiny, and somewhat reddened. [G.] Cf. *SYPHILIS cutanea cornea*. —**Tubercular s.** Lat., *sypilis cutanea nodosa* (seu *tuberculosa*), *tubercula sypilitica*. Fr., *sypilide tuberculeuse (résolutive)*. Ger., *Knotensypilid*. A form of cutaneous syphilis usually occurring at an advanced stage of the disease, characterized by circumscribed deep-seated infiltrations involving the entire thickness of the skin. The eruption is commonly confined to particular regions, and is not generally symmetrical. The efflorescences may be grouped in irregular clusters, in the form of rings or curves, or in horseshoe-shaped or kidney-shaped patches. [G.] —**Ulcerating tubercular s.** A tertiary or late manifestation of syphilis in which tubercular lesions, occurring in several more or less isolated patches, undergo ulceration, usually with a tendency to spread in a serpiginous manner and often producing thick, dark crusts. When of long duration it is sometimes called *lupus sypiliticus*. [G.] —**Varicellaform s.** A pustular (sometimes described as vesicular) s. characterized by rounded or globular, millet-sized efflorescences filled with sero-purulent fluid, which rapidly dries up and forms brown crusts. [G.] Cf. *Varicellaform s.* —**Varicellaform s.** A pustular s. in which the efflorescences begin in the form of red spots which turn into pustules, at first acuminated and afterward becoming slightly depressed or umbilicated in the centre, and are followed by greenish-brown crusts beneath which there is usually slight ulceration or erosion. [G.] —**Vesicular s.** Ger., *Blasensypilid*. A s. characterized by the presence of vesicles or vesico-pustules. *Herpetiform s.*, *varicellaform s.*, and *sypilitic eczema* are examples. [G.]

**SYPHILODERMA** (Lat.), n. n. Si²f(su²f)-i²l-o(o²)-du²s-rm (de²rm)/a². Gen., -der'mato(-atis). See *SYPHILIDE*. —**S. erythematotum s.** See *SYPHILITE ROSEOLA*. —**S. erythematotum palmare et plantare.** See *Squamous SYPHILODERM of the palms and soles*. —**S. maculosum.** See *SYPHILITE ROSEOLA*. —**S. papulo-squamous circinatum.** See *Circinate papulo-squamous SYPHILIDE*. —**S. papulosum.** A syphilitic exanthem of the skin occurring in the form of papular efflorescences, and produced by circumscribed cellular infiltrations in the corium. [G.] —**S. pigmentotum.** See *Pigmentary SYPHILODERM*. —**S. pustulum.** See *Pustular SYPHILODERM*. —**S. roseolatum.** See *SYPHILITE ROSEOLA*.

**SYPHILOGRAPHY**, n. Si²f-i²l-o²g²ra²f-i². See *SYPHILIDOGRAHY*.

**SYPHILOID**, adj. Si²f/i²l-oid. Lat., *sypiloides* (from *sypilis* [q. v.], and *ēidos*, resemblance). Relating to or resembling syphilis; as a n., any one of certain epidemic diseases more or less resembling syphilis. [G.] —**Canadian s.** Lat., *radesyge canadensis*. Fr., *mal anglais* (ou des éboulements, ou de chicot). A disease which prevailed in Canada "from 1760 to 1780 and upward," and was probably syphilis, though formerly believed to be an independent form of disease resembling syphilis. [G, 16.] —**Hessian s.** A disease resembling *radesyge*, observed in Hesse, Germany. [G.] —**Jutland s.** A disease resembling *radesyge* that at one time prevailed in Jutland, Denmark. [G.] —**S. of Courland.** A disease resembling *radesyge* observed in Courland, Russia. [G.]

**SYPHILOJONTHUS** (Lat.), n. m. Si²f(su²f)-i²l-o(o²)-jo²nth-(yo²nth)/u²s(u²s). From *sypilis* (q. v.), and *ionthos* (see *IONTHUS*). See *Pustular SYPHILODERM*. —**S. confertus.** See *Impetiginous SYPHILODERM*. —**S. latus.** See *Ecthyrnatus SYPHILODERM*. —**S. lenticularis.** See *Aconeform SYPHILODERM*.

**SYPHILOKELIS** (Lat.), n. f. Si²f(su²f)-i²l-o(o²)-kel(kal)/i²s(es). Gen., -kel'idis (-idis). From *sypilis* (q. v.), and *κῆλξ*, a spot. Fr., *sypilocèle*. See *Macular SYPHILIDE*. —**S. fugax.** See *SYPHILITE ROSEOLA*. —**S. perstans.** A macular sypilide (2d def.); perhaps also the pigmentary sypiloderma (q. v.). [G.]

**SYPHILOLEPIS** (Lat.), n. f. Si²f(su²f)-i²l-o²l(-e²p)-i²s. Gen., -lep'idis (-idis). From *sypilis* (q. v.), and *λερίς*, a scale. See *Papulo-squamous SYPHILODERM*. —**S. exulcerans.** A pustulo-squamous sypiloderma attended with ulceration. [G.] —**S. exulcerans centralis.** A squamous sypiloderma attended with ulceration beneath the scale or crust. [G.] —**S. exulcerans peripherica.** A serpiginous ulcerating sypiloderma. [G.] —**S. guttata.** Papulo-squamous sypiloderma resembling psoriasis guttata. [G, 5.] —**S.**

**palmaria.** See *Squamous SYPHILODERM of the palms and soles.*—**S. palmaria cornea.** See *SYPHILIS cutanea cornea.*—**S. palmaria simplex.** See *Squamous SYPHILODERM of the palms and soles.*—**S. scutellata.** A papulo-squamous syphiloderm resembling psoriasis scutellata. [G, 5.]

**SYPHILOLOGY,** n.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{l-o-j}^2$ . See *SYPHILOLOGY*.

**SYPHILOMA** [Wagner] (Lat.), n. n.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{m}^2\text{a}^3$ . Gen., -*om'atos (-atis)*. Fr., *sypphilome*. Ger., *Sypphilom*. A neoplasm peculiar to syphilis, consisting of an accumulation of small, round cells inclosed in a capsule of new connective tissue. The cellular growth tends to undergo fatty degeneration and atrophy rapidly, with softening and the production of a cheesy substance or mucus-like fluid. Usually the tumor is sharply circumscribed, but it sometimes occurs in the form of a diffuse infiltration. Its most common situations are "the subcutaneous cellular tissue, the skin, in and upon the bones, the liver, the testicles, the brain, the kidneys, and, especially in children, the lungs" (Bäumler). In the periosteum the growth is known as *tophus sypphiliticus*. [G.]—**Chancre-like s.** An ulcerating gummy tumor, usually of the genitals, resembling a chancre. [G.]—**S. of the skin.** See *Gummatous SYPHILODERM*.

**SYPHILOMANIA** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-man}(\text{ma}^3\text{n})\text{-i}^2\text{a}^3$ . From *sypphilis* (q. v.), and *mania*, madness. Fr., *sypphilomanie*. Ger., *Sypphilomanie*. 1. A tendency to attribute diseases to syphilis. 2. A morbid belief that one is affected with syphilis. [L, 41, 50 (a, 14).] Cf. *SYPHILOPHOBIA*.

**SYPHILOMYCES** (Lat.), n. m.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{m}^2\text{i}^2(\text{u}^6)\text{-sez}(\text{kas})$ . Gen., -*es'os (-et'is)*. From *sypphilis* (q. v.), and *μύκης*, a fungus. Condyloma (including both forms). [G.]—**S. morus.** Exuberant condylomata resembling mulberries. [G, 5.]—**S. planus.** See *CONDYLOMA latum*.

**SYPHILONYCHIA** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{n}^2\text{-i}^2\text{k}(\text{u}^6\text{ch}^2)\text{-i}^2\text{a}^3$ . From *sypphilis* (q. v.), and *ὄνυξ*, the nail. See *ONYCHIA sypphilica*.—**S. exulcerans.** Syphilitic onychia with ulceration. [G, 5.]—**S. sicca.** Syphilitic onychia with loss or deformity of the nails, and unattended with ulceration. [G, 5.]

**SYPHILOPEMPHIS** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-pe}^2\text{mf'}$ .  $\text{i}^2\text{s}(\text{es})$ . Gen., -*pemp'h'id'os (-idis)*. From *sypphilis* (q. v.), and *πεμφίς*, a blister. See *PEMPHIGUS sypphiliticus*.—**S. fungosa.** The name given by Fuchs to a case of syphilitic pemphigus in an infant, in which the eruption occurred upon the buttocks, the region of the genitals, the thighs, the abdomen, and the throat, and was followed, after rupture of the bullae, by condylomatous growths. [G, 5.]—**S. vulgaris.** See *PEMPHIGUS sypphiliticus*.

**SYPHILOPEMPHIX** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-pe}^2\text{mf'}$ .  $\text{i}^2\text{x}$ . Gen., -*ig'os (-ig'is)*. From *sypphilis* (q. v.), and *πεμφίξ*, a blister. Fr., *s.* A syphilitic pustule. [L, 50 (a, 14).]

**SYPHILOPHLYSIS** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{f'li}^2\text{s}(\text{u}^6\text{s})\text{-i}^2\text{s}$ . Gen., -*phly's'eos (-oph'lysis)*. From *sypphilis* (q. v.), and *φλύσις*, breaking out. See *Vesicular SYPHILODERM*.

**SYPHILOPHOBIA** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-fob}(\text{fo}^2\text{b})\text{-i}^2\text{a}^3$ . From *sypphilis* (q. v.), and *φόβος*, fear. Fr., *sypphilophobie*. Ger., *Sypphilophobie*. A morbid fear of having syphilis. [a, 18.] Cf. *SYPHILOMANIA* (2d def.).

**SYPHILOPHYMA** (Lat.), n. n.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-fi}(\text{fu}^6)\text{'ma}^3$ . Gen., -*phym'atos (-atis)*. From *sypphilis* (q. v.), and *φύμα*, a growth. Syphiloma of the skin. [G.]—**S. circumscriptum.** Circumscribed gummy infiltration (tumor) of the skin. [G.]—**S. diffusum.** Diffuse syphilitic infiltration of the skin. [G, 5.]

**SYPHILOPSILOMA** (Lat.), n. m.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{ps-i}^2\text{l}(\text{el})\text{-om'atos}$ . Gen., -*om'atos (-atis)*. From *sypphilis* (q. v.), and *ψιλός*, bare. See *ALOPECIA sypphilica*.

**SYPHILOPSYDRAX** (Lat.), n. m.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{ps'id}(\text{u}^6\text{d})\text{-ra}^3\text{xora}^3\text{x}$ . Gen., -*psyd'racos (-acis)*. From *sypphilis* (q. v.), and *ψύδραξ*, a pimple. Ger., *Knötchensypphilid*. A lichenoid syphilitic eruption. [G, 5.] See *Miliary SYPHILODERM* and *Tubercular SYPHILODERM*.—**S. acutus.** See *Miliary SYPHILODERM*.—**S. circumscriptus.** See *Corymbiform papular SYPHILODERM*.—**S. lenticularis.** See *Lenticular papular SYPHILODERM*.

**SYPHILOSCLEROMA** (Lat.), n. n.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2(\text{o}^3)\text{-skle}^3\text{r}$ .  $\text{(sklar)om'atos}$ . Gen., -*om'atos (-atis)*. From *sypphilis* (q. v.), and *σκληρώμα*, an induration. See *Sypilitic CHANCRE*.

**SYPHILOSE** (Fr.), n. Se-fe-loz. Of Mauriac, the assemblage of symptoms which belong to the tertiary stage of syphilis. [G, 93.] **S. cutanée** (Mauriac). Cutaneous syphilis of the tertiary stage, especially gummatous syphilodermata. [G, 93.]

**SYPHILOSIS** (Lat.), n. f.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-i}^2\text{l-o}^2\text{s'is}$ . Gen., -*os'eos (-is)*. From *sypphilis* (q. v.). A syphilitic affection. [G.]—**S. of the hair** [Wilson]. See *TRICHOSYPHILIS*.

**SYPHON,** n.  $\text{Si}^2\text{f'o}^2\text{n}$ . See *SIPHON*.

**SYPHONOMA** (Lat.), n. n.  $\text{Si}^2\text{f}(\text{su}^6\text{f})\text{-o}^2\text{n-om'atos}$ . Gen., -*om'atos (-atis)*. From *σφών*, a tube. See *SIPHONOMA*.

**SYRETON,** n. A malignant ulcer on the face or neck. [Paracelsus (H).]

**SYRIGMOPHONIA** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{g-mo}(\text{mo}^3)\text{-fon'}$ .  $\text{i}^2\text{a}^3$ . From *σyrigμός*, a shrill piping sound, and *φωνή*, the voice. Fr., *syrigmoophonie*. The state of having a whistling or piping voice. [L, 50 (a, 14).]

**SYRIGMUS** (Lat.), n. m.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{g'mu}^3\text{s(mu}^3\text{a)}$ . Gr., *σyrig-mus*. See *TINNITUS aurium*.

**SYRINGA** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g'a}^3$ . From *σῦριγξ*, a tube. Fr., *lilas*. Ger., *Lilak*. S. 1. Lilac, pipe-privet (or tree); a genus of shrubs forming, with *Schrebera* and *Forsythia*, a tribe (the *Syringaceae*) of the *Olacaceae*; also the genus *Philadelphus*. [a, 35.] 2. See *SYRINGE*.—**S. persica.** Ger., *blauer Hollland*. Persian lilac, a species having the properties of *S. vulgaris*. [a, 35.]—**S.**

**vulgaris.** Fr., *lilas commun*, *lilac*, *queue de renard des jardins*. Ger., *gemeiner Lilak*, *blauer* (oder *spanischer*) *Holler* (oder *Hol-lunder*, oder *Flieder*). Syrene, *Syringen*. Common lilac. The fruit capsules (formerly official as *semen lilac*) and the flowers have been used as a tonic and antiperiodic. The wood yields an oil resembling in odor oil of rosewood and oil of sandalwood. [a, 35.]

**SYRINGE,** n.  $\text{Si}^2\text{r'i}^2\text{n}^2\text{g}$ . Gr., *σῦριγξ*. Lat., *syrinx*, *sipho*, *siphunculus*. Fr., *siringue*. Ger., *Spritze*. An instrument consisting usually of a tube terminating in a small orifice and fitted with a piston by the action of which a liquid is first drawn in and then expelled in a stream, as for injecting animal bodies, cleansing wounds, and the like. [A, 301.]—**Blake's middle-ear s.** A s. used for washing out the middle ear, being introduced through a hole in the drum-head. It has a long, slender nozzle which can be bent to correspond to the curve of any external meatus. [F, 39.]—**Buttles's gonorrhoea s.** A hard-rubber s. with long tip and an arrangement over the nozzle for distending the urethra. [E.]—**Catheter s.** A combined catheter and s. for making applications to the bladder or urethra. [E.]—**Clover's s.** An exhausting s. in the form of a bulb of soft rubber attached to a catheter; used for emptying the bladder of fragments after lithotomy. [E.]—**Dieck's caustic s.** A catheter with several fine holes at the tip for making applications to the bladder or urethra. [E.]—**Ear s.** Lat., *otischylta*, *sipho auricularis*. Ger., *Ohrspritze*, *Gehörspritze*. A s. used to inject fluids into the ear. [F.]—**Enema s.** A s. for injecting liquids into the rectum.—**Fountain s.** A s. in which gravity is the propelling force,

1, a rectal syringe; 2, a urethral syringe; 3, a uterine syringe; 4, Bumstead's urethral syringe; 5, a hypodermic syringe.

an elevated rubber bag serving as a reservoir. [E.]—**Hypodermic s.** A small s. with a delicate nozzle terminating in a sharp point, for injecting medicines under the skin.—**Lacrymal s.** See *DACHRYO-SYRINX* (2d def.).—**Pravaz's s.** Ger., *Pravaz'sche Spritze*. A variety of hypodermic s. having externally a nut working on a thread cut about the piston, so that the contained liquid may be extruded drop by drop. [a, 34.]—**Ricord's s.** Fr., *siringue praprique*. A hard-rubber s. for vaginal injections. [L, 41 (a, 14).]—**Van Buren's debris s.** A Davidson's s. with a hard-rubber bulbous tip perforated in many points, for removing debris from the bladder. [E.]—**Wheelock's reverse-flow s.** A s. with a cap over the nozzle to cause a reverse flow of the fluid; a variety of gonorrhoea s. [E.]

**SYRINGEAL,** adj.  $\text{Si}^2\text{r-i}^2\text{n}^2\text{g'e}^2\text{l}$ . Pertaining to the syring.

**SYRINGICUS** (Lat.), adj.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}(\text{i}^2\text{n}^2\text{g})\text{'i}^2\text{k-u}^3\text{s(u}^3\text{s)}$ . See *FISTULOS*.

**SYRINGIN,** n.  $\text{Si}^2\text{r-i}^2\text{n}^2\text{g-i}^2\text{n}$ . Fr., *syringine*. Ger., *S*. A glucoside,  $\text{C}_{10}\text{H}_{12}\text{O}_{10} + \text{H}_2\text{O}$ , obtained from the bark of *Syringa vulgaris* and from *Ligustrum vulgare*. It has been used in malarial disease. [B, 270 (a, 384).]

**SYRINGITIS** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}(\text{i}^2\text{n}^2\text{g})\text{'f(e)ti}^2\text{s}$ . Gen., -*itis (-idis)*. From *σῦριγξ*, a tube. Inflammation of the Eustachian tube. [L, 50 (a, 14).]

**SYRINGO-ADENOME** (Ger.), n. pl.  $\text{Zu}^6\text{r-i}^2\text{n}^2\text{g-o-a}^2\text{d-e}^2\text{n-om'}$ .  $\text{e}^2$ . See *HYDRADENOMES*.

**SYRINGOCYSTADENOMA** (Lat.), n. n.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^6$ )  $\text{-si}^2\text{s}(\text{ku}^6\text{st})\text{-a}^2\text{d}(\text{a}^2\text{d})\text{-e}^2\text{n}^2\text{-om}^2\text{-a}^2$ . Gen., *-om'atos (-atis)*. From *σῦριξ*, a pipe, *κύστις*, a bladder, and *αδών*, a gland. Of Unna, a hydradenoma. [<sup>1</sup> Dtsch. med. Ztg., Nov. 4, 1889, p. 1023 (a, 24).]

**SYRINGOID**, adj.  $\text{Si}^2\text{r}\text{-i}^2\text{n}^2\text{g}\text{-o}^2\text{id}$ . Lat., *syringoides* (from *σῦριξ*, a tube, and *είδος*, resemblance). See **FISTULOUS**.

**SYRINGOMENINGOCELE** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^6$ )  $\text{-me}^2\text{n}(\text{man})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^2$ )  $\text{-se}(\text{ka})\text{'le}(\text{la})$ ; in Eng., *si<sup>2</sup>r-i<sup>2</sup>n<sup>2</sup>g<sup>2</sup>-o-me<sup>2</sup>n-i<sup>2</sup>n<sup>2</sup>g<sup>2</sup>-o-sel*. Gen., *-cel'ea*. From *σῦριξ*, a tube, *μῆνις*, a membrane, and *κύλη*, a tumor. A meningocele presenting the characteristics of a syringo-myelecele. [a, 34.]

**SYRINGOMYELIA** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^6$ )  $\text{-mi}(\text{mu}^6)\text{-el}(\text{e}^2\text{l})\text{'i}^2\text{-a}^2$ . From *σῦριξ*, a fistula, and *μυελός*, marrow. Ger., *Syringomyelie*. See **MYELOSIRINGOMYELITIS**.

**SYRINGOMYELITIS** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^6$ )  $\text{-mi}(\text{mu}^6)\text{-el}(\text{e}^2\text{l})\text{'i}^2\text{-a}^2$ . Gen., *-it'idos (-idis)*. See **Excavating MYELITIS**.

**SYRINGOMYELOCELE** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$  ( $\text{o}^6$ )  $\text{-mi}(\text{mu}^6)\text{-el}(\text{e}^2\text{l})\text{'i}^2\text{-a}^2$  ( $\text{o}^6$ )  $\text{-se}(\text{ka})\text{'le}(\text{la})$ ; in Eng., *si<sup>2</sup>r-i<sup>2</sup>n<sup>2</sup>g<sup>2</sup>-o-mi<sup>2</sup>-el<sup>2</sup>-o-sel*. Gen., *-cel'ea*. From *σῦριξ*, a fistula, *μυελός*, marrow, and *κύλη*, a tumor. See **HYDROMYELOCELE** (1st def.).

**SYRINGOTOME**, n.  $\text{Si}^2\text{r}\text{-i}^2\text{n}^2\text{g}\text{-o}\text{-tom}$ . Gr., *σπριγγότομον*, *σπριγγότομος*. Lat., *syringotomus*, *syringotomum*. Fr., *s. Ger.*, *Syringotom*, *Fistelmesser*. A curved bistoury with a flexible probe point for the operation on fistula in ano. [E.]

**SYRINGOTOMY**, n.  $\text{Si}^2\text{r}\text{-i}^2\text{n}^2\text{g}\text{-o}\text{-t'om-i}^2$ . Gr., *σπριγγότομία* (from *σῦριξ*, a fistula, and *τέμνω*, to cut). Lat., *syringotomia*. Fr., *syringotomie*. Ger., *Syringotomie*, *Fistelschnitt*. A cutting operation for fistula in ano. [E.]

**SYRINX** (Lat.), n. f.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{'i}^2\text{n}^2\text{x}$ . Gen., *-ing'os (-ing'is)*. Gr., *σῦριξ*. 1. A tube. 2. A fistula. 3. The lower larynx of birds, where the voice is formed. It is at the bottom of the trachea, where the bronchi bifurcate. [L, 12, 343.]

**SYRMA** (Lat.), n. n.  $\text{Su}^6\text{r}(\text{m})\text{-a}^2$ . Gen., *sy'r'matos (-atis)*. Gr., *σῦρμα* (from *σῦρνω*, to drag). The faeces in dysentery; so called because they were thought to contain scrapings or particles of the inner coat of the intestines. [L, 50 (a, 14).]

**SYRMAEA** (Lat.), n. f.  $\text{Su}^6\text{r}(\text{m})\text{-e}(\text{a}^2\text{'e}^2)\text{-a}^2$ . Gr., *σπυμαία* (from *σπυμός*, vomiting). 1. The radish. Its juice, mixed with salt water, was used by the Egyptians as a purgative and emetic. 2. A purge. 3. A mixture of honey and suet. [A, 311 (a, 21).]

**SYRMAISMUS** (Lat.), n. m.  $\text{Su}^6\text{r}(\text{m})\text{-a}^2\text{-iz}(\text{i}^2\text{s})\text{-mu}^6\text{s}$  ( $\text{mu}^6\text{s}$ ). Gr., *σπυμαϊσμός*. Fr., *sy'rmaïsme*. Of Hippocrates, catharsis or emesis. [L, 41, 50 (a, 14, 43).]

**SYRO** (Lat.), n. m.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{'o}$ . See **SIRO**.

**SYRUP**, n.  $\text{Si}^2\text{r}\text{-u}^2\text{p}$ . Lat., *syrupus*. Fr., *sirop*. Ger., *S. Sirop*. It., *sirippo*. Sp., *jarabe*. 1. A concentrated solution of cane sugar (saccharose) in water, forming a thick, ropy, transparent liquid of very sweet taste. See, also, **SYRUPUS**. 2. A class of pharmaceutical preparations consisting of ordinary s. containing some medicinal principle in solution. [B.]—**Amussat's laxative s.** See **SIROP laxa-tif d'Amussat**.—**Brauner's s.** (Ger.). See **Syrupus LIQUIRITAE** and **MOLASSES**.—**Eaton's s.** See **Syrupus FERRI, quinae et strychnine phosphatum**.—**Gilbert's s.** See **SIROP Gilbert**.—**Hive's s.** See **Syrupus SCILLAE compositus**.—**Iodo-calcic s.** Fr., *sirop iodo-calcaire*. A s. containing soluble calcium phosphate and calcium iodide; employed in tuberculosis, scrofula, and rickets. [L, 41 (a, 14).]—**Simple s.** See **SYRUPUS** (1st def.).

**SYRUPUS** [U. S. Ph., Br. Ph.] (Lat.), n. m.  $\text{Si}^2\text{r}(\text{su}^6\text{r})\text{'u}^2\text{p}(\text{u}^2\text{p})\text{-u}^2\text{s}(\text{u}^2\text{s})$ . Fr., *sirop de sucre*, et *sirop de sucre à froid* [Fr. Cod.]. Sp., *jarabe simple* [Sp. Ph.]. 1. A concentrated solution of cane sugar in water, containing 10 parts of water and 20 [Br. Ph., Gr. Ph.] (1857 [U. S. Ph.], 1818 [Netherl. Ph.], 18 [Dan. Ph., Russ. Ph., Swed. Ph.], 1778 [Belg. Ph.], 164 [Hung. Ph.], 164 [Swiss Ph.], 16 [Austr. Ph., Roum. Ph.], 15 [Ger. Ph., Norw. Ph., Finn. Ph.]) of sugar. The Fr. Cod. has two syrups: the *sirop de sucre*, prepared with 17 parts of sugar to 10 of water brought to a boil, and the *sirop de sucre à froid*, prepared with 18 parts of sugar to 10 of cold water. The Sp. Ph. also has two syrups, one containing 164 parts of sugar to 10 of hot water, the other 18 of sugar to 10 of cold water. [B, 95 (a, 38).] 2. A medicinal preparation containing enough sugar to give it the consistency of syrup.—**S. aceticus**. See **S. ACIDI ACETICI**.—**S. albus**. See **SYRUP** (1st def.).—**S. alcalinus**. A solution of 11 parts of potassium carbonate in 180 of sugar. [B, 119 (a, 38).]—**S. anodynus**. A syrup made by treating 3 parts of the seeds of *Datura stramonium* with 36 of vinegar, straining, and adding 72 of sugar. [B, 119 (a, 38).]—**S. antiscorbuticus**. Fr., *sirop antiscorbutique de Portal* [Fr. Cod.]. Sp., *jarabe antiscorbutico* [Sp. Ph.]. A syrup made by expressing and filtering the juice of 100 parts each of cochlearia-leaves and cress and 30 of horseradish, adding to 120 parts of this juice 500 of a mixture of 5 of calisaya-bark, 20 of gentian-root, and 10 of the root of *Rubia tinctoria*, macerating for 12 hours with 500 parts of water, expressing, filtering, dissolving in the whole 1,180 of sugar, and straining when cold [Fr. Cod.]; or by macerating 100 parts each of brook-lime, cochlearia, cress, and horseradish, 6 of orange-peel, and 1 part of cinnamon in 300 of stronger white wine, expressing, clarifying, straining, and for each 5 parts adding 8 of sugar [Swiss Ph.]; or by macerating 3 parts of calisaya-bark, 12 of gentian-root, and 6 of the root of *Rubia tinctoria* in 340 of water, expressing, filtering, adding 8 parts of sugar for 5 of filtrate, straining, and adding 168 of compound syrup of cochlearia [Belg. Ph.]; or by dissolving 620 parts of sugar in 345 of succus antiscorbuticus. [B, 95 (a, 38).] See also **S. ARMORACIE compositus**.—**S. antiscorbuticus jodatus** [Swiss Ph.]. Sp., *jarabe de rábano yodado* [Sp. Ph.]. A syrup made by adding to 1,000 parts of s. antiscorbuticus 14 part of iodine and  $\frac{1}{2}$  part of potassium iodide [Swiss Ph.], or  $\frac{1}{2}$  of iodine and 1 of potassium iodide [Sp. Ph.] triturated with [Swiss Ph.] (dissolved in [Sp. Ph.]) a little water. [B, 95 (a, 38).]—**S. aperiens com-**

**positus**. A preparation made by digesting 221 parts each of the purified juice of agrimony, *Cherophyllum sativum*, and *Pimpinella saxifraga* and the roots of iris, parsley, horseradish, and sulphurwort and 83 each of saffrafras and the roots of elecampane and sweet flag in 996 of vinegar of squill, distilling 332 parts, and adding a syrup made of the expressed liquid from the residue with 1,992 of sugar. [B, 119 (a, 38).]—**S. aperiens Pechii**. A preparation made by boiling 28 parts each of the berries of alkekenge and the roots of *Apium graveolens*, asparagus, elecampane, burdock, comfrey, swallowwort, fennel, iris, strawberry, licorice, polypodium, and common eryngo in enough water, and adding 11 parts each of the juice of *Pimpinella saxifraga*, chicory, fennel, fumitory, parsley, and licorice, 496 of vinegar of squill, and 1,328 of sugar. [B, 119 (a, 38).]

—**S. aperitivus**. See **Syrupus de quinque RADICIBUS compositus** (under **RADIX**).—**S. aromaticus**. See **S. ARTEMISIE compositus**.

—**S. balsamicus (de Tolu)**. See **S. toluatanus**.—**S. benzoïnus**. A syrup made by digesting 250 grammes of benzoin with 1,000 of water for twelve hours, filtering, and adding twice as much white sugar. [B, 119 (a, 38).]—**S. cardiaca**. A syrup made of 11 parts of cinnamon, 4 of cloves, 2 of ginger, 75 of rose-water, 240 of strong wine, and 540 of sugar. [B, 199 (a, 38).]—**S. chalybeatus**. A syrup of 664 parts each of vinous tincture of iron and simple syrup and 14 of alcoholic cinnamon-water; or of 15 of aperient tincture of iron and 360 of syrup of chicory. [B, 119 (a, 38).]—**S. communis** [Pruss. Ph., 7th ed., Finn. Ph., Netherl. Ph.]. See **MOLASSES**.—**S. compositus Laffecteur**. See under **Syrupus SASSAPARILLAE compositus**.—**S. copaivicus**. Fr., *sirop de baume de copahu*. Syrup of balsam of copaiba; made by mixing 3 parts of powdered gum arabic with enough water to form a mucilage, incorporating 12 parts of copaiba, and adding gradually 144 of syrup [Lipp. Disp., 1792]; or by stirring 1 part of tincture of copaiba into 24 parts of warm syrup [Frankf. Disp., 1791]. [B, 97 (a, 21).]—**S. cordialis**. A syrup made of 665 parts of Madeira wine, 1,320 of sugar, and 40 of cinnamon-water; or of 120 of sweet almonds, 45 of cinnamon, 900 of sugar, 360 of brandy, 720 of Madeira wine, and  $\frac{1}{2}$  part each of musk and ambergris. [B, 119 (a, 38).] Cf. **HIPPOCRAS**.—**S. Cuisinieri**. See **S. SASSAPARILLAE compositus**.—**S. cum monosulfure sodico**.

See **SiroP de monosulfure de sodium**.—**S. emeticus**. A syrup made by digesting 7 parts of powdered glass of antimony with 360 of white Rhine wine for three days at a gentle heat, adding 960 of white sugar, and boiling. [B, 119 (a, 38).]—**S. emulsivus**. See **SIROP amygdalin** and **S. AMYGDALARUM**.—**S. fuscus**. See **MOLASSES**.—**S. guaiacinosus**. See **S. ACACLE**.—**S. hollandicus**. See **MOLASSES**.—**S. hordeatus**. See **SIROP amygdalin** and **S. AMYGDALARUM**.—**S. iodo-tannicus** [Netherl. Ph.]. A syrup made by dissolving 1 part of iodine in a little alcohol, and 4 parts of extract of rhatany in water, mixing the two, allowing the mixture to stand some days until it no longer turns starch-paste blue, filtering, bringing up to 170 parts by washing with water, and adding 330 of sugar. [B, 95 (a, 38).]—**S. kermesinus**. A syrup made by macerating kermes with three times as much sugar and expressing; or by boiling together equal parts of kermes-juice and sugar; or by macerating  $\frac{1}{16}$  part of purified potassium carbonate, 28 parts of kermes, 166 of rose-water, and 111 each of water of lemon and water of cinnamon, and adding  $\frac{1}{16}$  part of alum and 664 parts of sugar; or by infusing over night 15 parts of cochineal and  $\frac{7}{8}$  part of purified potassium carbonate in 360 parts each of rose-water and cinnamon-water, and adding 960 of sugar and 360 of kermes-juice. [B, 119 (a, 38).]—**S. Lobelii**. See **SIROP érysimum composit**.—**S. longa vitæ**. A syrup made by macerating 61 parts of fresh iris-root, 30 of dried gentian-root, and 367 of white wine, expressing, and adding 1,000 of mercurialis-juice, 345 each of the juice of borage and ox-tongue, and 1,500 of white honey. [B, 119 (a, 38).]—**S. magistralis** [Swiss Ph.]. A syrup consisting of 1 part of extractum ferri pomatum dissolved in 4 parts of alcoholic cinnamon-water, 20 of syrup of orange-peel, 50 of compound syrup of rhubarb, 24 of syrup, and 1 part of tincture of Chinese cinnamon. [B, 95 (a, 38).]—**S. mannatus**. See **Syrupus SENNAE cum manna**.—**S. mastichinus**. A preparation made by infusing 3 parts of mastic in 18 of water of mastic, straining, and adding 24 of sugar. [B, 119 (a, 38).]—**S. mineralis**. See **S. ACIDI SULPHURICI**.—**S. opiatius**. **S. opii** [Belg. Ph.]. Fr., *sirop d'opium* (ou *thébaïque*). Sp., *jarabe de extracto de opio* [Sp. Ph.]. A syrup made of extract of opium [Swiss Ph., Russ. Ph.] (dissolved in water [Fr. Cod., Belg. Ph., Roum. Ph., Sp. Ph.], in strong wine [Ger. Ph., Gr. Ph.]), mixed with syrup and evaporated, so that the preparation contains in 100 grammes about 20 centigrammes of extract of opium (1 gramme of the tincture [Finn. Ph., Norw. Ph., Swed. Ph.], or 2 grains of the wine [Netherl. Ph.]) (1 grain of the extract [Gr. Ph.]) to the oz. [B, 95 (a, 38).]—**S. pectoralis** [Fr. Cod.]. Fr., *sirop d'espèces pectorales* [Fr. Cod.]. A syrup made by infusing 1,000 parts of species florum pectoralium in 12,000 of boiling water, expressing, filtering, adding to 10,000 parts of the product 3 of extract of opium dissolved in 500 of water of orange-flowers and 20,000 of sugar, and straining. [B, 95 (a, 38).]—**S. pectoralis comitis Christiani**. A syrup made by boiling 14 grammes each of sarsaparilla, china-root, *Smilax aspera*, and guaiac, 21 of pearl barley, and  $\frac{3}{4}$  of ivory- filings in 1,992 of water until reduced one half, and adding a handful each of violets, ox-tongue, roses, and borage, and 664 grammes of white sugar. [B, 119 (a, 38).]—**S. sacchari**. See **S. SCILLITICUS**. See **Syrupus SCILLAE**.—**S. simplex**. See **S. (1st def.)**.—**S. spleneticus**. A syrup made by boiling 60 parts each of the roots of *Apium graveolens*, *Pimpinella saxifraga*, chicory, fennel, and parsley, the herbs of scolopendrium, cochlearia, water-cress, *Cherophyllum sativum*, and *Asperula odorata*, and the seeds of nettle and cress, 15 of the seeds of *Apium graveolens*, 22 of juniper, and 11 each of the roots of galangal and sweet flag in water enough to make 1,080, expressing, clarifying, adding 1,280 parts of white sugar, boiling, and adding 720 parts of a mixture made by boiling 90 parts of astacofell, 60 of cream of tartar, and 7 of hydrochloric acid in 720 of white Rhine wine. [B, 119 (a, 38).]—**S. temperans**. A mixture of equal parts of syrup of lemon-juice and syrup of poppy. [A, 447 (a, 38).]—**S. thebaicus**. See **S.**

*opiatu*.—**S. toluatanus**. Fr., *sirop de baume de Tolu*. Sp., *jabe de bálsamo de tolu*. A syrup made by digesting 10 parts of balsam of Tolu in 250 of a solution of 162½ of sugar in 87½ of water at a temperature not higher than 82° C. straining when cold, and washing with water if necessary up to 250 parts [U. S. Ph.]; or by boiling 10 parts of the balsam in 160 of water, filtering when cold, and adding 250 parts of sugar [Br. Ph.]; or by heating to a boil 60 parts of the tincture of balsam of Tolu with water enough to make 400 of filtrate and adding 800 of sugar [Dan. Ph.]. The extraction of the balsam is done by somewhat different methods and the proportion of sugar varies somewhat according to the other ph's. Some of the older ph's ordered dilute alcohol. [B. 95, 119 (a. 38).]—**S. Vanier** [Belg. Ph.]. A syrup made by mixing an emulsion of 50 parts each of cod-liver oil and water, 4 of oil of anise, 25 of powdered gum arabic, 15 of extractum Juglandis, 2½ of potassium iodide, and 50 of water with a solution of 300 parts of honey in 150 of syrup of yellow cinchona-bark and 404 of syrup, and reducing to 1,000 parts. [B. 95 (a. 38).]—**S. vitriolatus**. See **S. ACIDI SULPHURICI**.

**SYSEME** (Fr.), **SYSDOMIEN** (Fr.), n's. Se-zom, -zo-me-a-n². See SYNADELPHUS.

**SYSPASIA** (Lat.), n. f. Si²s(su⁶s)-paz(pa²s)/i²-a². Gr., *συσπασία*. See CONVULSION.

**SYSSARCOSIS** (Lat.), n. f. Si²s(su⁶s)-sa²rk-os/i²s. Gen., -os/eos (-is). Gr., *συσσάρκωσις* (from *συνσάρκομαι*, to be grown over with flesh). Fr., *syssarcose*. Ger., *Syssarkose*, *Fleischbeinfügung*. That variety of articulation in which the bones are connected with each other by means of muscles (e. g., that of the scapula with the ribs).

**SYSTALSIS** (Lat.), n. f. Si²s(su⁶s)-ta²ls(ta²ls)/i²s. Gen., -als/eos (-is). From *συστάλλειν*, to draw together. See SYSTOLE.

**SYSTATIC**, adj. Si²s-ta²lt/i²k. Gr., *συστατικός*. Lat., *systaticus*. Fr., *systaticue*. Ger., *systaticisch*. See SYSTOLIC.

**SYSTASIS** (Lat.), n. f. Si²s(su⁶s)-ta²s(ta²s)/i²s. Gen., -as/eos, *syss/as*. Gr., *συστάσις*. Consistence, density.

**SYSTEM**, n. Si²st-e²m. Gr., *σύστημα* (from *συνιστάειν*, to set together). Lat., *systema*. Fr., *système*. Ger., *S*. 1. A methodical arrangement of organisms, etc., according to their relationships. 2. A group or aggregation of organs or structures having special functions. [a. 35.] 3. The body as a whole. [B. 4.] 4. See METHOD.—**Adipose s.** A general term for all parts resembling adipose tissue and for the organs at first formed of it.—**Arterio-ganglionic s.** Of M. Hall, that part of the sympathetic nervous s. that is distributed along and to the arteries. [a. 18.]—**Association s.** Of Meynert, a s. of association fibres. [a. 34.]—**Asymmetric s.** See *Triclinic s.*—**Axial-fibre s.** Of Spitzka, the bundles of nerve-fibres which belong to the lemniscus. [“Med. Record,” Oct. 18, 1884, p. 421 (I).]—**Balkens' (Ger.)**. See *Trabecular s.*—**Callosal s.** The s. of nerve-fibres in the corpus callosum which, according to Meynert and Arnold, unite symmetrical regions in the two hemispheres. [I, 3 (K).]—**Cellular s.** See *Fundamental s.*—**Central nervous s.** The brain and spinal cord. [L.]—**Commissural s.** See *Trabecular s.*—**Connective s. of the cerebellum.** Of Burdach, the superior peduncles of the cerebellum with the valve of Vieussens, which is included between them. [I, 31 (K).]—**Cortical s.** The bark or cortex of plants. [a. 35.]—**Cubic s.** See *Regular s.*—**Eingeweiidenervens' (Ger.)**. See *Sympathetic nervous s.*—**Epidermal s.** The group of tissues, consisting of the epidermis, hairs, etc., covering the framework and parenchyma of plants. Its cells are compactly arranged and their walls cutinized, thus adapting it to its protective function. [a. 35.]—**Extraspinal ganglionic s.** Of M. Hall, the sympathetic nervous ganglia situated on each side of the spine. [a. 18.]—**Fascicular s., Fibro-vascular s.** The aggregation of fibro-vascular bundles (q. v.); the fibrous framework of a plant; in the leaf, the union of veins; in the stem and root, the tough resistant portion. [a. 35.]—**First association s.** The s. of associated fibres connecting the optic thalamus with the cortex cerebri. [a. 34.]—**First projection s.** Of Meynert, those tracts of nerve-fibres which extend between the great ganglionic masses of the brain and the convolutions. They include a portion or the whole of the corona radiata. [“Jour. of Nerv. and Ment. Dis.,” 1878, p. 405 (K).]—**Fundamental s.** The cellular s.; the group of tissues surrounding the fibro-vascular bundles of plants, forming pith, medullary rays, pulp of fruits and leaves, etc. Its function is assimilative. [a. 35.]—**Ganglionic nervous s.** See *Sympathetic nervous s.*—**Gastrovascular s.** A s. having both digestive and circulatory functions. [L.]—**Gefäss' des Fruchthofes (Ger.)**. The vessels in which the first circulation takes place in the embryo. [Kölliker (H.).]—**Goux s.** A s. of removing excreta by the use of a mixture of some vegetable or animal fibrous substance with a small proportion of iron or calcium sulphate pressed close on the bottom and sides of a tub or pail that is used to receive excreta. [a. 34.]—**Grosshirnrindenbrückens' (Ger.)**. A tract of nerve-fibres extending from the pons Varolii to the cortex cerebri. [I, 27 (K).]—**Haversian s.** A Haversian canal, together with its lamellae, lacunae, and canaliculi.—**Hemmungs' (Ger.)**. An inhibitory s. or group of nerves. [K. 16.]—**Hexagonal s.** A s. of crystallization characterized by the presence of four axes, three (the *secondary axes*) lying in the same plane and the fourth (the *principal axis*) at right angles to this. [B. 3.]—**Intermediary s.** The interolivary layer; of Flechsig, a longitudinal tract of nerve-fibres situated between the olivary bodies. It receives fibres from the termination of the fillet and from the postero-lateral columns, and is also connected with the corpus dentatum olivæ. [I, 1 (K).]—**Intraspinal ganglionic s.** Of M. Hall, the ganglia on the posterior roots of the trifacial and spinal nerves. [a. 18.]—**Intravascular ganglionic s.** Of M. Hall, that portion of the sympathetic nervous s. that is distributed to the tissues composing the viscera. [a. 18.]—**Ligneous s.** See *Fibro-vascular s.*—**Longitudinal associating s.** Of Spitzka, the longitudinal bundles of nerve-fibres in Meynert's classification which connect dissimilar regions in the same hemisphere of the brain. [K.]—**Lymph-canalicular s.** Ger., *Lymphcanälchens'*. Intercommunicating lymph cavities in

the connective tissue of organs continuous with the lymphatic capillaries. [L.]—**Middle s. of the fibræ arcuatae.** The ariform fibres connected with the corpus dentatum olivæ. They form its capsule, and then enter it, being connected, according to Meynert, with its nerve-cells. [I, 31 (K).]—**Monoclinic s., Monosymmetric s.** A s. of crystallization characterized by the presence of three unequal axes, two (the *secondary axes*) being placed at right angles to each other, and one of them (the *orthodiagonal axis*) being also at right angles to the third (or *principal axis*), while the second (or *clinodiagonal axis*) forms an oblique angle with the latter. [B. 3.]—**Nervous s.** The brain, spinal cord, sympathetic nervous s., and nerves. [L.]—**Organic nervous s.** See *Sympathetic nervous s.*—**Projection s.** Of Meynert, the sensory nerve-fibres of the body which originate in the cerebral cortex, pass through the central tubular gray matter after converging to the crura cerebri, and finally again diverge as peripheral sensory nerves; so called because an image of the external world is considered as projected upon the cerebral cortex by the aid of this s. [I, 31 (K).]—**Also First projection s. and Second projection s.**—**Quadratic s.** A s. of crystallization characterized by the presence of three axes at right angles to each other, the two secondary axes being of equal length, while the length of the principal axis is different. [B. 3.]—**Regular s.** A s. of crystallization characterized by the presence of three equal axes at right angles to each other. [B. 3.]—**Rhombic s.** A s. of crystallization characterized by the presence of three axes at right angles to each other, all of unequal length, one (the *principal axis*) being that along which the crystal tends mostly to develop, the others (the *secondary axes*) being denominated respectively *brachydiagonal* and *macrodiagonal*, according to their length. [B. 3.]—**Second projection s.** Of Meynert, those nerve-fibres which unite the cerebral ganglia with the central gray substance of the brain and spinal cord. [“Jour. of Nerv. and Ment. Dis.,” 1878, p. 405 (K).]—**Sexual s.** A botanical s. in which the genera are grouped in classes based on the number or arrangement of the stamens and pistils; especially the Linnæan s. [a. 35.]—**Spinal s. of nerves.** The nerves originating from the spinal cord in distinction with those having a cranial origin. [a. 34.]—**Subependymal mixed s.** Of Spitzka, a s. or column of nuclei (“cells”) which, beginning at the lower portion of the medulla oblongata, is continuous above with the common superior nucleus of the vagus and spinal accessory nerves and the substantia ferruginea, and finally with the superior nucleus of the trigemini. [“Jour. of Nerv. and Ment. Dis.,” Apr., 1880, p. 208 (K).]—**Subependymal s., Subventricular motor s. of nuclei.** Of Spitzka, a chain of nuclei which begins with the hypoglossal nucleus and is prolonged along the side of the third ventricle to the infundibulum. [“Jour. of Nerv. and Ment. Dis.,” 1880, p. 208 (K).]—**Superior s. of the fibræ arcuatae.** The upper bundles of arcuate fibres of the medulla oblongata. [I, 31 (K).]—**Sympathetic (nervous) s.** The sympathetic nerves and ganglia and the plexuses connected with them. [L.]—**Trabecular s. [Meynert], Transverse associating s. [Spitzka].** Ger., *Balkens'*. Those bundles of nerve-fibres (e. g., the corpus callosum and the anterior commissure) which connect similar regions of the opposite hemispheres of the brain. [I, 31 (K).]—**Triclinic s.** A s. of crystallization characterized by the presence of three unequal axes, all obliquely inclined to each other, and denominated respectively *principal axis* and *secondary axes* (*macrodiagonal* and *brachydiagonal*) in the same way as in the rhombic s. [B. 3.]—**Vascular s.** 1. The s. of vessels concerned in the circulation of the blood. [a. 48.] 2. See *Fibro-vascular s.*

**SYSTEMA** (Lat.), n. n. Si²st(su⁶st)-em(am)/a². Gen., -em/atps (-atis). See **SYSTEM**.—**S. nervosum vegetativum.** See *Sympathetic (nervous) SYSTEM*.—**S. pontis Varolii.** See *BRÜCKENSYSTEM*.—**S. vite automaticæ** (senti vegetativæ). See *Sympathetic (nervous) SYSTEM*.

**SYSTEMATIC**, adj. Si²st-e²m-a²t/i²k. Lat., *systematicus*. Fr., *système*. Ger., *systematisch*. Pertaining to system; in accordance with system; methodical. [a. 35.]

**SYSTEMATOLOGY**, n. Si²st-e²m-a²t-i²o-lō-jī². Lat., *systematologia* (from *σύνταγμα*, a system, and *λόγος*, understanding). The science of classification; taxonomy. [a. 48.]

**SYSTÈME** (Fr.), n. Se-ste²m. See **SYSTEM**.—**Petit s. arci-forme.** Bundles of arching nerve-fibres which connect adjacent convolutions of the brain; best seen, according to Huguénin, in sections perpendicular to the axis of a convolution. [I, 28 (K).]

**SYSTEMIC**, adj. Si²st-e²m/i²k. Fr., *système*. Ger., *systemisch*. Pertaining to the organism as a whole. [a. 48.]

**SYSTOLE** (Lat.), n. f. Si²st(su⁶st)/o²-l(-ea). Gen., *syss/oles*. Gr., *συστολή* (from *συστάλλειν*, to draw together). Fr., *systole*. Ger., *S*. 1. Contraction, especially that of the walls of the heart, occurring alternately with their diastole. [K.] 2. See under **DIASTOLE** (3d def.).—**Aborted s., Abortive s.** Fr., *s. avortée*. Of F. Franck, a cardiac s. that does not produce an elevation of pressure in the aortic system. It may be caused by mitral regurgitation, leak of ventricular distention, or deficient energy. [a. 34.]—**Anticipated s.** Fr., *s. anticipée*. Of F. Franck, an aborted s. due to a deficient quantity of blood in the ventricle. [“Compt. rend. de l'Acad. des sci.,” 1877, lxxiv, p. 786 (a. 34).]—**Arterial s.** The retraction of the arterial wall just subsequent to the cardiac s. [a. 34.]—**Auricular s.** Ger., *Vorhofss'*. The contraction of the auricles of the heart. [K.]—**Sphygmo-s.** The expansion of the pulse corresponding to the s. of the heart, as represented graphically by the sphygmograph. [B; K, 3.]—**Ventricular s.** The s. of the ventricles. [a. 34.]

**SYSTOLIC**, adj. Si²st-o²t/i²k. Lat., *systolicus*. Fr., *systolique*, *systolaire*. Ger., *systolisch*. Pertaining to the systole. [K.]

**SYSTOLOMETER**, n. Si²st-o²t-i²o-lō-m(e²t)-u²r. From *συστολή*, systole, and *μέτρον*, a measure. Of W. Whitla, a small saucer-shaped metal disc, ½ inch in diameter, from the concave surface of

which arises a hollow stem that receives a fine silver wire which may be held in place by a thumb-screw. The end of the wire is bent at an angle and tipped with a bead. The warmed convex side of the disc is attached over the region of the apex-beat of the heart by means of a plaster. The wire records the systole, and, tapping against a stethoscope, gives a systolic sound. [*N. Y. Med. Jour.*, Mar. 10, 1888, p. 277 (a, 34).]

**SYSTREMA** (Lat.), n. n.  $Si^2s(su^s)tro^2m^a$ . Gen., *trem-matos (-atis)*. Gr., *σύστημα* (from *σύνθεσις*, to twist up). 1. A glomerule; a convolution. 2. Cramp. [L, 50 (a, 14).]

**SYSTROPHE** (Lat.), n. f.  $Si^2s(su^s)tro^2f-e(a)$ . Gen., *systrôphes*. Gr., *σύστροφῃς*. A sprain; also the resulting inflammation. [L, 50 (a, 14).]

**SYZYGIUM** (Lat.), n. n.  $Si^2z(su^2z)j^2j(u^2g)/i^2-u^2m(u^4m)$ . From *σύνζυγος*, yoked (from *σύν*, with, and *ζεύγναι*, to yoke). Fr., *syzygion*. Ger., *Mützenblume*. 1. A genus of the *Myrtaceæ*, regarded by some as a section of *Eugenia*. [a, 35.] 2. Conjunction of organisms in pairs, without fusion of substance. [L, 121.]—*S. bel-luta*. A Malabar tree with aromatic leaves which are used for diarrhoea and in baths for rheumatism. [a, 35.]—*S. caryophyl-læum*. Ger., *gewürzreiche Mützenblume*. A Ceylon species. The mildly aromatic and astringent bark, East Indian clove-bark, formerly known in Europe as *cassia caryophyllata* seu *cortex cassie caryophyllate*, is used as a spice and as a medicine. [a, 35.]—*S. caryophyllifolium*. Ger., *nelkenbaumblättrige Mützenblume*. An East Indian species. The astringent, bitterish, aromatic bark is used in fevers and in abdominal diseases. The berries are of the shape and taste of olives. [a, 35.]—*S. guineense*. A species used in Senegal for rheumatism. The ripe fruits are edible. [a, 35.]—

**TABAC** (Fr.), n.  $Ta^2b-a^2k$ . 1. The genus *Nicotiana*. [a, 35.] 2. Of the Fr. Cod., see **TABACUM**.—**Acéfolé de t.** See **Acetum NICOTIANÆ**.—**Éléfolé de t.** See **Oleum NICOTIANÆ**.—**Éthérolé de t.** See **Tinctura NICOTIANÆ ætherea**.—**Extrait de t.** See **Ex-tractum NICOTIANÆ**.—**Grand t.** See **NICOTIANA tabacum**.—**Huile de t.** See **Oleum NICOTIANÆ**.—**Hydrolé de t.** See **Infusum de t.** See **Infusum NICOTIANÆ**.—**Lavement de t.** See **Enema TABACI**.—**Enolé de t.** See **Vinum NICOTIANÆ**.—**Oxéolé de t.** See **Acetum NICOTIANÆ**.—**Oxymel de t.** See **Oxymel NICOTIANÆ**.—**Petit t.** See **NICOTIANA rustica**.—**Sirap de t.** See **Syrupus NICOTIANÆ**.—**T. de montagne, T. des Savoyards, T. des Vosges.** The *Arnica montana*. [a, 35.]—**Teinture éthérée de t.** See **Tinc-tura NICOTIANÆ ætherea**.—**Vin de t.** See **Vinum NICOTIANÆ**.

**TABACIC ACID**, n.  $Ta^2b-a^2s/i^2k$ . Fr., *acide tabacique*. Ger., *Tabaksäure*. A substance obtained from tobacco-leaves, formerly considered a dibasic organic acid, but now known to be a mixture of malic and citric acids. [B, 38, 48, 93 (a, 14).]

**TABACOSIS** (Lat.), n. f.  $Ta^2b(ta^2b)-a^2k(a^2k)-os/i^2a$ . Gen., *-os-eos (-is)*. From *tabacum*, tobacco. Infiltration of a part or region with tobacco-dust. [a, 34.]—**T. pulmonis, T. pulmonum**. Pul-monary atrophy caused by the inhalation of tobacco-dust. [a, 34.]

**TABACUM** [U. S. Ph.] (Lat.), n. n.  $Ta^2b(ta^2b)-a^2k(a^2k)-u^2m(u^4m)$ . Fr., *nicotiane, tabac* [Fr. Cod.]. Ger., *Tabak, Tabakblät-ter* [Ger. Ph.]. Sp., *nicotiana* [Sp. Ph.]. The dried leaves of *Nicotiana*. [B, 95 (a, 38).]—**Enema tabaci**. Fr., *lavement de tabac*. Ger., *Tabakklystier*. Sp., *clister de tabaco* [Sp. Ph.]. A preparation made by treating tobacco-leaves with 175 times as much boiling water for  $\frac{1}{2}$  hour [Br. Ph.] (with 64 times as much boiling water for  $\frac{1}{2}$  hour [Finn. Ph.], with 240 times as much boiling water for 1 hour [Sp. Ph.]), and straining. [B, 95 (a, 38).]

**TABAGISME** (Fr.), n.  $Ta^2b-a^2zhez-m$ . Chronic tobacco poi-soning. [R. Longuet, "Union méd.," June 23, 1885, p. 1053.]

**TABAK** (Ger.), n.  $Ta^2b-a^2k$ . 1. The genus *Nicotiana*. 2. To-bacco-leaves. [a, 35.]—**T'lunge**. See **TABACOSIS pulmonum**.—**T'-vergiftung**. See **NICOTINISM**.

**TABANUS** (Lat.), n. m.  $Ta^2b(ta^2b)-an(a^2n)-u^2s(u^4s)$ . A genus of blood-sucking *Diptera*. [a, 48.]—**T. bovinus**. See **CÆSTRUS bovis**.

**TABASHEER**, n.  $Ta^2b-a^2sher$ . Said to be from Sans., *tavak-shiri*, cow's milk. Written also *tabashir, tabaxir, and tabaschir*. Fr., *tabashir*. Ger., *Tabascheer*. A bluish-white substance found in the fruits of various species of the *Bambuseæ*. It consists of silica and small quantities of lime, potash, and vegetable matter. It is reputed astringent and tonic, and is used medicinally. [a, 35.]

**TABATIÈRE** (Fr.), n.  $Ta^2b-a^2t-e^2r$ . A snuff-box. [a, 14.]—**T. anatomique**. See **FOVEOLA radialis**.

**TABEFACTIO** (Lat.), n. f.  $Ta^2b(ta^2b)-e^2-fa^2k(fa^2k)/shi^2(ti^2)-o$ . Gen., *-on/-is*. From *tabefacere*, to melt. See **CHANCE** (1st def.).

**TABELLA** (Lat.), n. f.  $Ta^2b(ta^2b)-e^2-l^2a^2$ . Dim. of *tabula*, a board. See **TABLET**.—**Tabellæ carbonaceæ**. Fr., *tablettes de charbon*. Sp., *tabletas de carbón*. Lozenges of 600 parts of purified charcoal with 2,382 of sugar, 18 of tragacanth, and enough water [Belg. Ph.] (with 600 of sugar and 150 of tragacanth mucilage [Fr. Cod.], with 1,720 of sugar and enough tragacanth mucilage [Sp. Ph.]). The Belg. lozenges contain 20 centigrammes each, the Fr. 50 centigrammes each, and the Sp. 80 centigrammes each of char-coal. [B, 95 (a, 38).]—**Tabellæ manus Christi**. See **CONSERVA ROSARUM sicca**.—**Tabellæ martiales** (seu *restaurantes*). Lozenges consisting of 30 parts of iron-filings with 5 of cinnamon, 180 of sugar, and 120 of water, or with 7½ of cinnamon and about 306 of sugar, each containing 12 centigrammes of iron; or of 28 parts

*S. jambolanum*. Fr., *myrte pédonculé*. Jambolan tree, Java plum; a species identified by some with *S. caryophyllifolium*. The root-bark is used as an astringent, the bark of the stem and branches in aphthæ, and the austere, acidulous berries in gargles and in pre-paring an astringent and stomachic syrup. The bark and the seed (called in India *jambou*, or *jambol*) have been used in diabetes. [a, 35.]—*S. zeylanicum*. An edible-fruited Ceylon tree. The leaves, which have a pleasant, aromatic, somewhat astringent taste, are used in syphilis. [a, 35.] Cf. **MARANDA**.

**SZALATHNYA**, n. A place in Sohl County, Hungary, where there is an alkaline and saline spring. [L, 30, 49 (a, 14).]

**SZCZAWNICA**, n. A place in Austrian Galicia where there are saline springs, with bathing and whey-cure establishments. [L, 30, 37, 49, 57 (a, 14).]

**SZKLENO**, n. A place in Bars County, Hungary, where there are hot sulphurous springs. [L, 30, 49, 57, 135 (a, 14).]

**SZLIACS**, n. A place in Zolyom County, Hungary, where there are warm gaseous, ferruginous, alkaline, and sulphurous springs. [L, 30, 37, 49, 57 (a, 14).]

**SZOBRANCZ**, n. A place in Ungh County, Hungary, where there are saline and sulphurous springs. [L, 30, 49, 57 (a, 14).]

**SZOLYMA**, n. A place in Marmaros County, Hungary, where there are sulphurous springs. [L, 30 (a, 14).]

**SZOLYVA**, n. A place in Bereg County, Hungary, where there is a gaseous and chalybeate spring. [L, 30 (a, 14).]

**SZULIN**, n. A place in Zips County, Hungary, where there is a ferruginous spring. [L, 30, 49 (a, 14).]

## T

of iron-filings with 7 of cinnamon and 332 of sugar, or with 3½ of cinnamon, 133 of sugar, and enough tragacanth mucilage, each containing 9 centigrammes of iron; or of 32 parts each of iron-filings and cinnamon-water, 8 of powdered cinnamon, 4 of tragacanth, and 324 of sugar, each containing 5 centigrammes of iron; or of 19 parts of iron-filings, 6 of cinnamon, 180 of sugar, 30 of sweet almonds, and 2 each of cardamom and orange-peel. [B, 119 (a, 38).]—**Tabellæ rosate**. See **CONSERVA ROSARUM sicca**.

**TABERNÆMONTANA** (Lat.), n. f.  $Ta^2b(ta^2b)-u^2rn(e^2rn)-e(a^2e^2)-mo^2nt-an(a^2n)/a^2$ . From *Tabernæmontanus*, a German botanist. Fr., *taberne, tabernæmontane*. A genus of tropical apocynaceous trees and shrubs. The *Tabernæmontanæ* are a tribe of the *Apocynæ*. [a, 35.]—**T. alba**. Fr., *bois laiteux*. A West Indian species. The bark is used like that of *T. citrifolia*. [a, 35.]—**T. angustifolia**. A plant growing in South Carolina and Georgia. The root and bark are said to be antidiysenteric. [a, 35.]—**T. citrifolia**. Fr., *bois de lait* (ou *laiteux franc*), *taberne à feuilles de citronnier*. 1. Of Linnaeus, a West Indian tree with a caustic, poisonous juice. The bitter bark is used as a tonic, febrifuge, and anthelmintic, and the leaves are reputed vulnerary and febrifuge. [a, 35.] 2. Of Jacquin, see *T. alba*.—**T. coronaria**. Adam's apple, East Indian rose-bay, wax-flower plant. The juice is used in ophthalmia and skin diseases, and the root-bark as an anthelmintic and in odontalgia. [a, 35.]—**T. crispa**. An East Indian species. The acrid juice of the root-bark is used in diarrhoea and as an application to abscesses. [a, 35.]—**T. dichotoma**. Ger., *Evaupfelbaum*. A tree of Ceylon. Its fruit is poisonous. [a, 35.]—**T. mauritiana**. A shrub with a poisonous milky sap. ["Nouv. rem.," May 8, 1889, p. 242.]—**T. orientalis**. See *T. crispa*.—**T. persicariæfolia**. An Isle-of-France species. The juice is considered poisonous. [a, 35.]—**T. semperflorens**. A species found in the Philippine Islands; used in dysentery and for the stings of venomous reptiles. [a, 35.]—**T. utilis**. Fr., *arbre à lait*. Ger., *Milchbaum*. The *hya-hya* (or cow-tree) of British Guiana. The stem yields a sweet, milky juice, highly esteemed as food, though containing some caoutchouc. The bark is used medicinally. [a, 35.]

**TABES** (Lat.), n. f.  $Tab(ta^2b)/ez(as)$ . Gen., *tab'is*. Gr., *φθίσις*. Fr., f. Ger., *Auszehrung*. 1. A wasting away, especially atrophy of the muscles; also t. dorsalis. [D.] 2. In botany, a wasting, a gradual decay of the powers of growth. [a, 35.]—**Painful t.** See **Abortive locomotor ATAXIA**.—**T. anglica**. Of De Garrencières, pulmonary tuberculosis. [a, 34.]—**T. atactica, T. ataxique** (Fr.). See **Locomotor ATAXIA**.—**T. cerebellaris**. Of Remak, posterior spinal sclerosis associated with cerebellar symptoms. [a, 319 (a, 34).]—**T. cerebri**. Of Remak, posterior spinal sclerosis associated with cerebral symptoms. [a, 319 (a, 34).]—**T. cervicalis**. Of Remak, posterior spinal sclerosis affecting the cervical segment of the cord. [a, 319 (a, 34).]—**T. combiné** (Fr.). Syn. f. *atizo-spasmodique, sclérose postéro-latérale de la moëlle*. Sclerosis of the posterior and lateral columns of the spinal cord. [Grasset, "Arch. de neurol.," July, 1886, p. 27.]—**T. coxaria**. Tuberculous coxitis. [a, 34.]—**T. diabetica**. See **DIABETOPHTHISIS**.—**T. dolorosa**. See **Abortive locomotor ATAXIA**.—**T. dorsalis, T. dorsanalis**. Ger., *Rückenmarkszehrung, Darrsucht, Rückendarrre*. Consumption of the spinal cord (see **Locomotor ATAXIA**); so called from the peculiar lesion in the posterior columns. [D.]—**T. dorsalis cervicalis**. See *T. cervicalis*.—**T. dorsalis illusoria**. A condition more or less completely simulating locomotor ataxia; acquired through fear of the disease, but not dependent on an anatomical lesion. [Knowlalewsky, "Ctbl. f. Nervenheilk.," 1885, No. 15; "Ctbl. f. klin. Med.," Jan. 2, 1886, p. 15; "Irrtenfreund," 1886, No. 7, p. 108.]—**T. dorsalis spasmodica**. See **Spasmodic spinal PARALYSIS**.—**T. fruste** (Fr.). A variety of locomotor ataxia which

may remain without change until death, or may develop into the ordinary form of locomotor ataxia. [Rummo, "Union méd.," June 5, 1884, p. 986 (D).]—**T. hæmorrhoidalis.** Neurasthenia with tabetic symptoms caused by hæmorrhoids. [a, 34.]—**T. incipiens.** The first stage of *t. dorsualis*. [L, 57 (a, 50).]—**T. lactea.** An impairment of the general health resulting from an excessive or too prolonged secretion of milk. [L, 1.]—**T. lumbaris.** Of Remak, posterior sclerosis of the lumbar segment of the spinal cord. [A, 319 (a, 34).]—**T. mesenterica.** *T. meseraica.* See *PTHTISIS meseraica*.—**T. moter** (Fr.). Of Dierret, *t.* caused by inflammation of the cerebral motor centres. [Lyon méd., June 12, 1887, p. 208 (a, 34).]—**T. neurasthenica.** See *NEURASTHENIA*.—**T. oculaire** (Fr.). *T. dorsualis* affecting especially the functions of the eye, amblyopia, ptosis, diplopia, lagophthalmia, nystagmus, etc., being developed. [a, 18.]—**T. peripherica.** See *PERIPHERIC NEUROTABES*.—**T. pulmonalis.** See *PULMONARY TUBERCULOSIS*.—**T. purulenta.** See *ARTHROPOYOSIS*.—**T. salivalls.** Marasmus associated with and attributed to salivation. [a, 34.]—**T. saturnina.** The general marasmus caused by saturnism. [a, 34.]—**T. scrofulosa.** See *T. meseraica*.—**T. spasmodica.** See *SPASMODIC SPINAL PARALYSIS*.—**T. ulcerosa.** See *APOTEMATOPHTHISIS*.—**T. urinalis.** See *DIABETES mellitus*.

**TABESCENT**, adj. *Ta²b-e²s's'nt.* Lat., *tabescens* (from *tabescere*, to melt gradually). Ger., *verkümmern*. In botany, wasting; affected with *tabes*. [a, 35.]

**TABETIC**, adj. *Ta²b-e²t'ik.* Lat., *tabeticus*. Fr., *tabétique*. Ger., *tabetisch*, *abzehrnd*. Pertaining to or affected with *tabes dorsualis*; as a n. (Ger., *Tabetiker*, *Tabiker*), a person so affected.

**TABIANO** (It., n. *Ta²b-e-a²n'o.* A place in Parma, Italy, where there are alkaline and sulphurous springs. [L, 49, 57 (a, 14).]

**TABID**, adj. *Ta²b'id.* Lat., *tabidus*. Fr., *tabide*. Pertaining to or affected with *tabes*. [a, 48.]

**TABIFIQUE** (Fr.), adj. *Ta²b-e-fek.* Causing or inducing *tabes*. [L, 41 (a, 14).]

**TABIKER** (Ger.), n. *Ta²b-ek'e²r.* See *TABETIC*.

**TABITUDO** (Lat., n. f. *Ta²b(ta²b)-i²-ud²(ud)'o.* Gen., *-ud'inis*. From *tabidus*, melting. The condition of being *tabetic*. [a, 48.]

**TABLE**, n. *Ta²b'l.* Gr., *τράπεζα*, *trápeza*. Lat., *tabula*. Fr., *t. Ger. Tisch, Tafel.* A flat-topped article of furniture; a structure resembling a *t.* or its flat top. [a, 48.]—**Bed-t.** Of Isaacs, a *t.* fixed to the frame of an ordinary bedstead, so as to be folded away beneath it when necessary. [Lancet, 1872, l. p. 764.]—**Inner t.** (of the cranial wall). The inner solid osseous part of the bones of the cranial wall. [C.]—**Operating t.** A chair or *t.* used in surgical operations. [E.]—**Outer t.** (of the cranial wall). The outer solid osseous portion of the bones of the walls of the cranium. [C.]—**T's of the skull.** The condensed inner and outer layers of the cranial bone which include the diploe. [L.]—**Vitreous t.** of the skull. See *Inner t.* (of the cranial wall).

**TABLET**, n. pl. *Ta²b'le²t.* Lat., *tabella*, *trochiscus*, *tabula*, *pastillus*. Fr., *tablette*. Ger., *Täfelchen*. Sp., *tableta*, *troscico*. A lozenge having for its basis finely powdered sugar brought to the proper consistence with the aid of mucilage. The Ger. Ph., Finn. Ph., and Russ. Ph. sometimes order chocolate as a basis. [B; B, 95 (a, 38).] See also *LOZENGE*, *PASTILLE*, and *TROCHE*.

**TABLETTE** (Fr.), n. *Ta²b'le²t.* See *TABLET*.—**T's antichlorotiques.** See *TABELLE martiales*.—**T's antimonialles.** See *TROCHISCI stibiat*.—**T's antipériodiques.** See *MORSULI chinati*.—**T's chalybées.** See *TABELLE martiales*.—**T's de Kunkel.** See *TROCHISCI stibiat*.—**T's de santoline.** See *Pastilli* (seu *trochisci*) *SANTONINI*.—**T's de tribus.** See *SACCHARUM nitratum*.—**T's de Tronchin** (Swiss Ph.). Lozenges containing each 4 milligrammes of extract of opium and 8 of kermes mineral, and made from a mass consisting of 2 grammes of extract of opium, 4 each of kermes mineral and anise, 8 of licorice-juce, 30 of gum arabic, 10 of tincture of balsam of Tolu, and 125 of sugar. [B, 95 (a, 38).] See also *Tronchin's anticatarrrhal LOZENGES*.—**T's gommoses kermatisées.** See *Tronchin's anticatarrrhal LOZENGES*.—**T's impériales.** See *MORSULI imperatoris*.—**T's pectorales.** See *Tabelle sulphuree*.—**T's vermifuges.** 1. Lozenges consisting of 14 parts of santonium, 7 of myrrh, 166 of sugar, and enough mucilage; or of 15 parts each of santonium and Corsican moss, 11 of aethiops mineral, 7 of cinnamon, 2 of jalap resin, and 210 of sugar. 2. Lozenges consisting of 7 parts of calomel, 4 each of santonium, burned stag's horn, and Caroline thistle, 2 of diacrydium sulphuratum, 30 of sugar, 3 part of cinnamon, and enough gum-arabic mucilage. [B, 119 (a, 38).]

**TABLIER** (Fr.), n. *Ta²b'le-a.* See *APRON*.—**T. des Hottentotes.** See *Pudendal APRON*.—**T. élastique.** See *TUNICA abdominalis*.

**TABLOID**, n. *Ta²b'loid.* A tablet. [B.]

**TABOURET** (Fr.), n. *Ta²-bu-ra.* See *THLAPSI*.

**TABULA** (Lat.), n. f. *Ta²b(ta²b)-u²(u²)-a².* See *TABLE* and *TABLET*. [a, 17.]—**Tabulae cranii.** The tables of the skull.

**TABULAR**, adj. *Ta²b'u²l-a²r.* From *tabula*, a board. Resembling a table. [a, 48.]

**TABULET**, n. *Ta²b'u²l-e²t.* A lozenge or troche. [B, 117.]

**TABUM** (Lat.), n. n. *Ta²b(ta²b)-u²m(u²)m.* From *tabes*, a wasting away. See *ICHOR* (3d def.) and *SANIES*.

**TAC** (Fr.), n. *Ta²k.* An old name for influenza. [Rev. de thérap., Mar., 1892, p. 117 (a, 50).]

**TACAMAHAC**, n. *Ta²k(a²m-a²-ha²k.* Lat., *tacamahaca*, Fr., *tacamahaca*, *tacamahaque*, *tacamahaca*. Ger., *Takamahak*, *Takamahakarz*, *Tak* and *Tak*, *Schwermetallzinn*. 1. Any one of various bitter balsamic resins, especially American *t.* (1st def.) and East Indian *t.*, analogous to the turpentine in properties; formerly much used, but now only as a constituent of plasters and ointments.

[a, 35.] 2. See *North American t.*—*American t.* 1. A product of *Bursera tomentosa* or (according to some) of *Icica heptaphylla* and *Icica tacamahaca*. It occurs in light-yellowish or reddish-brown brittle pieces, irregularly shaped, varying in size from that of a mustard-seed to two inches in diameter, and often covered with powder. It consists of a resin and a small proportion of a volatile oil. [a, 35.] 2. See *West Indian t.* (2d def.). 3. See *North American t.*—*Bourbon t.* A soft, dark-green oleoresin said to be derived from *Calophyllum tacamahaca*; not now known to commerce. [a, 35.]—*East Indian t.* Lat., *tacamahaca orientalis* (seu *ostindica*, seu in *testis*, seu *sublimis*). Ger., *ostindisches Takamahak*, *Takamahak in Schalen*. A rather soft, yellowish or greenish variety, occurring rarely in commerce in gourd-shells covered with rush-leaves. It is ascribed to *Calophyllum inophyllum*. [a, 35.]—*North American t.* Lat., *tacamahaca communis* (seu *vulgaris*), *balsamum Focot* (seu *populi*). Ger., *nordamerikanisches Takamahak*. The balsamic resin obtained from the buds of *Populus balsamifera*. [a, 35.]—*West Indian t.* 1. See *American t.* (1st def.). 2. The resinous balsam of *Calophyllum calaba*. [a, 35.]

**TACAMAHACA** (Lat.), n. f. *Ta²k-a²m-a²-ha²k/a².* 1. Of Spach, a section of the genus *Populus*. 2. See *TACAMAHAC*.—**Emplastrum tacamahace.** Sp., *emplastro de tacamaca* [Sp. Ph.]. A plaster consisting of 2 parts of white wax, 4 of turpentine, and 8 of American *tacamahac* (1st def.). [B, 95 (a, 38).]—**Gummi t.**, **Resina t.** See *TACAMAHAC*.—**T. communis.** See *North American TACAMAHAC* and *AMERICAN TACAMAHAC* (1st def.).—**T. caragana.** See *CARAÑA*.—**T. in testis.** See *East Indian TACAMAHAC*.—**T. occidentalis.** See *West Indian TACAMAHAC*.—**T. orientalis.** See *East Indian TACAMAHAC*.—**T. (résine)** [Fr. Cod.] (Fr.). Sp., *tacamaca*, *tacamaca oficial* 6 *rojiza* [Sp. Ph.]. See *American TACAMAHAC* (1st def.).—**T. vulgaris.** See *North American TACAMAHAC* (1st def.).

**TACAMAHACQUE** (Fr.), **TACAMAQUE** (Fr.), n's. *Ta²-ka²-ma²-ak*, *ma²k.* See *TACAMAHAC*.—**Faux-t.** The *Calophyllum calaba*. [a, 35.]—**T. terreus** [Fr. Cod.]. See *TACAMAHACA (résine)*.

**TACCA** (Lat.), n. f. *Ta²k(ta²k)/ka².* Fr., *t.* A genus of herbs, of the *Taccaceæ*, which are an order of monocotyledons closely related to the *Amaryllidaceæ*. [a, 35.]—**T. oceanica.** A Sandwich-Islands species furnishing Tahiti arrow-root. [a, 35.]—**T. palmata.** A species found in Java and the Moluccas. The tubers furnish a nourishing farina inferior to that of *T. pinnatifida*. [a, 35.]—**T. pinnatifida.** Fr., *t. pinnatifide*. Otaheite salep-plant, pi-plant; a species cultivated in the Oceanic Islands. Its tubers yield a variety of arrow-root especially suitable to cases of diarrhoea and dysentery. [a, 35.]

**TACHE** (Fr.), n. *Ta²sh.* See *MACULA* and *SPOT*.—**Meningeal t's.** See *Cerebral MACULÆ*.—**T. acoustique.** *T. auditive.* See *MACULA acustica*.—**T. aveugle.** See *Optic disc*.—**T's ardoisées.** See *MACULÆ cæruleæ*.—**T's bleuâtres.** See *PELOMA typhosum*.—**T's bleues.** See *MACULÆ caruleæ*.—**T. café au lait.** See *NEVUS*.—**T. brune.** See *LOCUS niger*.—**T. congéniale.** *T. congenitale.* See *NEVUS*.—**T. criblée.** See *MACULA cribrosa*.—**T. de brûlure.** See *Ephelis ab igne*.—**T. de feu.** See *NEVUS flammeus*.—**T's de grossesse.** See *CHLOASMA gravidarum*.—**T. de la cornée.** See *MACULA corneæ*.—**T's de lait.** See *STROPHULUS*.—**T. de Mariotte.** See *Optic disc*.—**T's de mort.** See *MACULA maculosa*.—**T. de naissance.** See *NEVUS*.—**T's de rousseur.** See *LENTIGO*.—**T. embryonnaire.** Of Coste, the embryonic area.—**T. germinative.** See *Germinal spot*.—**T. hémorrhagique.** See *NEVUS*.—**T's hépatiques.** See *MACULÆ hepaticæ*.—**T. jaune.** See *MACULA lutea*.—**T's laitueuses.** 1. See *Lymphangial nodules*. 2. Of Ranvier, the white spots found in the omentum of new-born rabbits, composed of groups of hematopoietic cells. [K, 17.] Cf. *Milk spot*.—**T's lenticulaires.** See *MACULÆ lenticulares* (2d def.).—**T's médico-légales.** See *MACULÆ medicæ forensis*.—**T. mélanienne.** See *NEVUS* and cf. *MACULA nigra*.—**T's méningitiques.** See *Cerebral MACULÆ*.—**T. motrice.** See *Motorial-nerve end-plate*.—**T. noirâtre.** *T. noire.* See *LOCUS niger*.—**T's ombrées.** See *MACULÆ caruleæ*.—**T. pigmentaire.** See *NEVUS pigmentosus*.—**T's polaires.** See *Ectrusion globule*.—**T's rosées (lenticulaires).** *T. rouges.* See *ROSOLIA typhosa*.—**T. rudimentaire.** Of Bizot, a superficial yellow spot symptomatic of a beginning atheromatous arterial degeneration. [L, 57 (a, 50).]—**T. sanguine.** See *NEVUS*.—**T. spermatique.** A spot or stain of semen on clothing, etc. [L, 49 (a, 14).]—**T's syphilitiques.** A pigmentary syphiloderm. [L, 87 (a, 50).]—**T. vasculaire.** *T. vineuse.* See *NEVUS flammeus*.

**TACHETÉ** (Fr.), adj. *Ta²sh-ta.* Spotted, macular.

**TACHIA** (Lat.), n. f. *Ta²k(ta²ch²)/t²-a².* Fr., *tachie*, *tachi*. A genus of the *Gentianaceæ*. [a, 35.]—**T. guianensis.** A shrub of Guiana and the Rio Negro. The root is used as a febrifuge. [a, 35.]

**TACHISTOSCOPE**, n. *Ta²k-i²st'o-skop.* From *τάχιστος*, most swift, and *σκοπεῖν*, to examine. Of Volkman, a sort of stereoscope in which a falling lid or diaphragm opens for a moment one or both of the holes through which the observer looks. [F.]

**TACHOMETER**, n. *Ta²k-o²m'e²t-u²r.* From *τάχος*, swift, and *μέτρον*, a measure. See *HEMOTACHOMETER*.

**TACHYCARDIA** (Lat.), n. f. *Ta²k(ta²ch²)-i²(u²)-ka²rd'i²-a².* From *τάχος*, quick, and *καρδία*, the heart. Fr., *Tachycardie*. Ger., *Tachycardie*. Abnormally rapid action of the heart; especially the over-action of the heart observed during digestion or as the result of dyspepsia, etc. [Ott, "Wien, med. Woch.," Apr. 15, 1882.]—**Essential paroxysmal t.** Fr., *tachycardie essentielle paroxysmale*. Of Bouvet, *t.* due to a functional perturbation of cardiac innervation, and occurring in attacks of longer or shorter duration, the function of the heart becoming normal during the intervals between the attacks. [Rev. de méd., ix, 1889, p. 753 (a, 34).]—**Paroxysmal t.** *T.* occurring at intervals; it may be due to reflex irritation. [a, 34.]—**T. strumosa exophthalmica** [Lebert]. See *Exophthalmic goitre*.

**TACHYCARDIE** (Fr.), n.  $Ta^3$ -ke-ka<sup>3</sup>-r-de. See TACHYCARDIA.  
—**T. atropinique**. Tachycardia due to the action of atropine. [a, 18.]—**T. fébrile**. Tachycardia with fever. [a, 18.]

**TACHYGRAPH**, n.  $Ta^2k/i^2$ -gra<sup>3</sup>f. From  $\tau\alpha\chi\upsilon\varsigma$ , swift, and  $\gamma\rho\alpha\phi\epsilon\upsilon$ , to write. See HEMOTACHOMETER.

**TACHYIATRIA** (Lat.), n. f.  $Ta^2k(ta^2k)-i^2(u^6)-i^2(e)-a^2t(a^2t)-ri-$ (re)<sup>3</sup>-a<sup>3</sup>. From  $\tau\alpha\chi\upsilon\varsigma$ , swift, and  $i\alpha\tau\rho\epsilon\iota\alpha$ , medical treatment. Fr., *tachyiatric*. The art of healing speedily. [L, 50 (a, 14).]

**TACHYPHRASIA** (Lat.), n. f.  $Ta^2k(ta^2ch^2)-i^2(u^6)-fraz(fra^3)s^2$ - $i^2a^3$ . From  $\tau\alpha\chi\upsilon\varsigma$ , rapid, and  $\phi\rho\alpha\varsigma\iota\varsigma$ , speech. Ger., *Poltem* (2d def.), *Brudeln* (2d def.), *Tachyphrasie*. 1. Great rapidity of speech; observed in some forms of mental disease. [a, 34.] Cf. PARAPHRASIA *præceps*. 2. Very rapid, stammering speech. [L, 57 (a, 50).]

**TACHYPNEA** (Lat.), n. f.  $Ta^2k(ta^2ch^2)-i^2p(u^6p)-ne^3$ (no<sup>2</sup>-e<sup>2</sup>)-a<sup>3</sup>. From  $\tau\alpha\chi\upsilon\varsigma$ , swift, and  $\pi\nu\omicron\iota\alpha$ , breath. Fr., *tachypnée*. Ger., *Tachypnoë*. Abnormally rapid respiration.

**TACHYTHANATOUS**, adj.  $Ta^2k-i^2$ -tha<sup>2</sup>n<sup>2</sup>a<sup>2</sup>t-u<sup>3</sup>s. Gr.,  $\tau\alpha\chi\upsilon$ - $\theta\acute{\alpha}\nu\alpha\tau\omicron\varsigma$  from  $\tau\alpha\chi\upsilon\varsigma$ , swift, and  $\theta\acute{\alpha}\nu\alpha\tau\omicron\varsigma$ , death. Lat., *tachythanatus*. Fr., *tachythanate*. 1. Of Hippocrates, killing quickly. 2. Dying suddenly. [L, 50 (a, 14).]

**TACHYTOMY**, n.  $Ta^2k-i^2$ -t<sup>2</sup>om-i<sup>2</sup>. From  $\tau\alpha\chi\upsilon\varsigma$ , swift, and  $\tau\omicron\upsilon\mu\epsilon$ , a cutting. The art of operating quickly. [E, 6.]

**TACON** (Fr.), n.  $Ta^3$ -ko<sup>2</sup>n<sup>2</sup>. A parasitic disease of the *Crocus sativus* in which the bulb is converted into a blackish powder; also a disease of the vine, produced, according to De Bary, by the mycelium of *Sphaeceloma ampelinum* attacking the tissues. [a, 35.]

**TACT** (Fr.), n.  $Ta^3$ kt. See TOUCH.—**T. médicale**. Instinctive ability to judge of the character of a disease and the means of attacking it. [L, 41 (a, 14).]

**TACTILE**, adj.  $Ta^2kt/i^2$ . Gr.,  $\alpha\tau\tau\acute{o}\varsigma$ . Lat., *tactilis* (from *tangere*, to touch). Fr., *t.*, *tangible*. Ger., *fühlbar*, *empfindbar*. Pertaining to the sense of touch. [L, 343.]

**TACTUS** (Lat.), n. m.  $Ta^2kt(ta^2kt)/u^3s$ . Gen., *tactus*. From *tangere*, to touch. See TOUCH.

**TÆDIUM** (Lat.), n. n.  $Ted^3$ ( $ta^3e^2d$ )- $i^2u^3m(u^4m)$ . From *tædet*, it wearies me. Ger., *Ekel*, *Ueberdruß*. Weariness, loathing. [L, 50 (a, 14).]—**T. vitæ**. The condition of being weary of life (a symptom of insanity). [a, 48.]

**TENIA** (Lat.), n. f.  $Ten^3$ ( $ta^3e^2n$ )- $i^2a^3$ . Gr.,  $\tau\epsilon\iota\nu\acute{\alpha}$  (from *τείνειν*, to stretch). Fr., *t.* Ger., *Leisten*, *Leiste* (1st def.), *Bandwurm* (2d def.). 1. A ribbon or bandlet; a bandage; a tape-like structure; in the pl., *teniae*, the ligaments coll. [E; I, 6 (K).] 2. The typical genus of the *Teniada*, or *Teniadæ* (Ger., *Bandwürmer*), which are a family, order, etc., of the *Cestoda*, characterized by a distinct head (or attached extremity) with four suckorial discs with or without a double or single row of hooks, and by a band-like body divided into segments which, when mature, are bisexual. The adults inhabit the intestinal canal of vertebrates, nearly every genus of which has its specific *T.* In their larval state (cysticercus) they are found in both vertebrates and invertebrates. [L.]—**T. à anneaux courts** (Fr.). See BOTHRIOCEPHALUS *latus*.—**T. abietina** [Weinland]. A doubtful species, properly referred to *T. solium* or *T. mediocanellata*. [L, 24.]—**T. acanthotrias**. An unknown species the cysticercus of which has been found in man. [L, 16.] Cf. *Cysticercus acanthotrias*.—**Teniae acusticæ**. See AUDITORY STRIE.—**T. ægyptica**. See *T. nana* (1st def.).—**T. à épines** (Fr.). **T. à longs anneaux** (Fr.). **T. à longues articulations** (Fr.). See *T. solium* (1st def.).—**T. à mamelons ombilicaux** (Fr.). See *T. solium* (1st def.).—**T. semicircularis**. Fr., *bandelette striée* (ou *demi-circulaire*). Ger., *Grenzstreif*, *Hornblatt*. A narrow, semi-transparent, light-colored streak in the lateral ventricle between the nucleus caudatus and the optic thalamus. It is continuous with the white tissue of the roof of the descending cornu. [L, 142, 332.]—**T. serrata**. A species infesting dogs. [B, 82.]—**T. simia**. See *T. marginata*.—**T. sinus rhomboidei**. See ALA *pontis*.—**T. solitaria**. See *T. solium* (1st def.).—**T. solium**. Fr., *vers solitaire*, *t. bandelette*, *t. armé*, *t. à épine*. Ger., *Menschenbandwurm*, *Kettenwurm*, *lang-*

TENIA SOLIUM (WITH DIFFERENT VIEWS OF THE HEAD). [A, 327.]

*gliedriger* (oder *kürbisförmiger*, oder *gezählter*, oder *bewaffneter*) *Bandwurm*. 1. Solitary (or armed, or pork) tapeworm; an entozoon found in the intestines of man. In its mature condition it is said to have attained the length of over sixty yards. It has a globular head of about the size of a pin-head, provided with a double row of hooks and with four sucking discs. The neck is about half an inch long and continuous with the body, which is at first marked with transverse lines that, gradually separating more and more, leave interspaces. These parts finally become distinct segments, which when mature are twice as broad as they are long, and are each provided with complete male and female organs of generation. After impregnation of a segment, embryos are developed in its interior, and it passes out of the intestine, when the embryos are scattered by its rupture. The embryos, still in their

envelopes, are swallowed by a pig, where they rupture their shells and bore in the tissues of their host, causing measles (q. v., 2d def.). There, losing their hooks, they are quiescent, and are known as the *Cysticercus cellulosus*. After being ingested by man, they develop hooks, and, having attached themselves to the intestinal walls, begin to grow, increasing at the free extremity until they assume the above-mentioned form. [L.] 2. Of Bremser, see *T. mediocanellata*.—**T. solum fenestrata** (seu *scalariformis*). A variety of *T. solum* (first observed by Mazars de Cazéles in 1780, and regarded by him as a distinct species) in which some of the segments are completely or partially perforated. The defect of substance is not associated with any demonstrable pathological change in the surrounding tissues, but the genital apparatus is wanting in the completely perforated segments. [M. Notta and Marfan, "Progr. méd.," 1886 ("Ctbl. f. d. med. Wssnschf.," Sept. 18, 1886, p. 616) (B).]—**T. stigmatibus lateralibus**. See *T. solum* (1st def.).—**T. striata**. See *T. semicircularis*.—**T. Tarini**. See *Lamina cornea* (1st def.).—**T. tecta**. See *LIGAMENTUM TECTUM*.—**T. tenella**. 1. A species which, according to Cobbold, develops the *Cysticercus ovis*. According to Stein, it is only a variety of *T. solum*. [B, 82.] 2. Of Pallas, see *BOTHRIOCEPHALUS LATUS*.—**T. terminalis**. **T. thalami optici**. See *T. semicircularis*.—**Tœnie** Valsalve. See *LIGAMENTA COLI*.—**T. ventriculi tertii**. **TÆNIACIDE**, n. Ten<sup>12</sup>-a<sup>3</sup>-sid. From *ravia*, a tapeworm, and *cœdere*, to slay. A medicine destructive to tapeworms. [a, 35.]  
**TÆNIÆFORMIS** (Lat.), adj. Ten(ta<sup>2</sup>-e<sup>2</sup>n)-i<sup>2</sup>-e<sup>2</sup>(a<sup>3</sup>-e<sup>2</sup>)-fo<sup>2</sup>rm'-i<sup>2</sup>s. From *ravia*, a ribbon, and *forma*, form. Fr., *rubané* (1st def.). Ger., *bandförmig* (1st def.), *bandwurmförmig* (2d def.). 1. Resembling a narrow band or ribbon. 2. Flat, long, and constricted at intervals; shaped like a tapeworm. [a, 35.]

**TÆNIAFUGE**, n. Ten<sup>12</sup>-a<sup>3</sup>-fu<sup>2</sup>j. From *ravia*, a tapeworm, and *fugare*, to put to flight. A medicine expelling tapeworms. [a, 35.]

**TÆNIARRHYNCHUS** (Lat.), n. f. Ten(ta<sup>2</sup>-e<sup>2</sup>n)-i<sup>2</sup>-a<sup>3</sup>r-(a<sup>3</sup>r)-ri<sup>2</sup>n<sup>2</sup>k-(rū<sup>2</sup>n<sup>2</sup>k)/u<sup>2</sup>s(u<sup>2</sup>s). From *ravia*, a band, and *ῥύγχος*, a snout. See *TENIA* (2d def.).—**T. mediocanellata**. See *TENIA mediocanellata*.

**TENICIDE**, n. Ten<sup>12</sup>-sid. See *TÆNIACIDE*.

**TENIIFUGE**, n. Ten<sup>12</sup>-fu<sup>2</sup>j. See *TÆNIAFUGE*.

**TENIIN**, n. Ten<sup>12</sup>-i<sup>2</sup>n. Fr., *tœniine*, *téniine*. Ger., *Täniin*. See *KOSIN*.

**TENIOLA** (Lat.), n. f. Te<sup>2</sup>n(ta<sup>2</sup>-e<sup>2</sup>n)-i(i<sup>2</sup>)/o<sup>2</sup>l-a<sup>3</sup>. Dim. of *tœnia* (q. v.). 1. See *FASCIOLA* (1st def.). 2. The peduncle of the pineal gland. [I, 3 (K).] 3. The genus *Tœnia*. 4. The genus *Ornithogalum*. [a, 35.]—**T. cinerea**. Of Wenzel, a projection on the lower lateral boundary of the fourth ventricle. It is continuous with the restiform body just before its entrance into the cerebellum. [I, 6 (K).]—**T. conarii**. The peduncle of the pineal gland. [I, 2 (K).]—**Teniole corporis callosi**. Ger., *Balkenleischen*. The continuations forward of the peduncles of the septum lucidum to the striae longitudinales. [L, 332.]

**TENIOPHOBIA** (Lat.), n. f. Ten(ta<sup>2</sup>-e<sup>2</sup>n)-i<sup>2</sup>-o(o<sup>2</sup>)-fo<sup>2</sup>b(fo<sup>2</sup>b)/i<sup>2</sup>-a<sup>3</sup>. From *ravia*, a tapeworm, and *phobos*, fear. A morbid dread of being the subject of tapeworm. [a, 34.]

**TAFEL** (Ger.), n. Ta<sup>3</sup>f'e<sup>2</sup>l. See *TABLE* and *TABLET*.—**Lister's Schutzt'**. See *LISTERIAN DRESSING*.—**Rückent'**. Of Remak, the upper wall of the protovertebral vesicle (the muscular plate) after its separation from the rest of the protovertebral structure. [A, 8.]

**TÄFELCHEN** (Ger.), n. Taf'e<sup>2</sup>l-ch'e<sup>2</sup>n. See *PASTILLE*, *TABLET*, and *TROCHE*.

**TAFFET** (Ger.), n. Ta<sup>3</sup>f'fe<sup>2</sup>t. See *TAFFETA*.—**Klebert'**, **Klebt'**. See *COURT PLASTER*.—**Schutzt'**. Protective silk. [a, 14.]

**TAFFETA**, n. Ta<sup>3</sup>f'e<sup>2</sup>-a<sup>3</sup>. Lat., *taffetas*. Fr., *t.*, *taffetas*. Ger., *Taffet*, *Taft*. A thin silk fabric. [a, 48.]—**T. d'Angleterre** (Fr.). See *COURT PLASTER*.

**TAFFETAS** (Lat.), n. n. Ta<sup>3</sup>f(ta<sup>3</sup>f'e<sup>2</sup>-a<sup>3</sup>s(a<sup>3</sup>s). Fr., *t.* See *TAFFETA*.—**T. adhesivum**. Ger., *COURT PLASTER*.—**T. épispassique** (Fr.). See *SPARADRAP VESICANS*.—**T. gommé** (Fr.). See *COURT PLASTER*.—**T. vernicéus**. See *SPARADRAP VESICANS*.

**TAFIA**, n. Ta<sup>3</sup>f'i<sup>2</sup>-a<sup>3</sup>. Fr., *t.* An inferior kind of rum. [B, 97 (a, 14).]

**TAFT** (Ger.), n. Ta<sup>3</sup>ft. See *TAFFETA*.—**Gleicht'**. Taffeta covered with a layer of varnish prepared by mixing 1 part of turpentine, 2 parts of resin, 4 of minium, and 12 of litharge with 48 of boiling linseed-oil; used to cover limbs affected with gout. [B, 49 (a, 14).]

**TAGETES** (Lat.), n. f. Ta<sup>2</sup>j(ta<sup>2</sup>g)-et(et)/ez(as). From *Tages*, a Tuscan divinity. Fr., *tagète*. Ger., *Samtblume*. Marigold; a genus of composite herbs. The *Tagetes* (Fr., *tagétées*) are: Of Reichenbach, a division of the *Amphigynanthæ*; of De Candolle, a division of the *Tagetinae* (a division of the *Heliantheae* [Cassini]) or a subtribe [Bentham and Hooker] of the *Helenioideæ*. [a, 35.]—**T. erecta**. Fr., *tagète droite*, *grand œillet* (ou rose) d'Inde. Sp., *flor de muerto*, *zempalrocchitl* [Mex. Ph.]. African marigold; indigenous to Mexico, but now widely cultivated. The capitules are stimulating, emmenagogue, and antelmintic, and are often substituted for calendula. The roots and fruits are purgative. [a, 35.]—**T. glandulifera**, **T. glanduligera**, **T. glandulosa**. The *chunchi* of Peru. It contains a vermifuge oleoresin. The aromatic and bitter leaves are used as a tonic. [a, 35.]—**T. lucida**. Fr., *tagète luisante*. Sp., *periquillo*, *yerba de Santa Maria de tierra dentro* [Mex. Ph.]. Sweet-scented Mexi-

can marigold; used as an antiperiodic and sometimes instead of hypericum. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601; a, 35.]—**T. patula**. Fr., *tagète touffue*, *petit œillet* (ou rose) d'Inde. Ger., *gemeine Samtblume*, *Studentenblume*, *Todtenblume*. French marigold; a native of Mexico, used like *T. erecta*. The flowers were formerly official as *flores africani*. [a, 35.]

**TAGMA** (Lat.), n. n. Ta<sup>2</sup>g(ta<sup>2</sup>g)/ma<sup>3</sup>. Gen., *tag'matos* (-matis). From *τάγμα*, a company. Of Pfeffer, an aggregate of molecules (e. g., a pleon or a micella). [a, 35.]

**TAIE** (Fr.), n. Te<sup>2</sup>. See *LEUCOMA* (4th def.).

**TAIL**, n. Tal. Gr., *σέπος*, *σέπα*. Lat., *cauda*, *ura*. Fr., *queue*. Ger., *Schwanz*. In the human embryo, a conical caudal appendage visible during the fifth and sixth weeks; in other mammals, the vertebra posterior to the sacrum, together with their muscles and integument; in birds, the t. feathers, or rectrices, taken collectively; in serpents, the part of the body posterior to the anal fin; in fishes, (usually) the part of the body posterior to the anal fin; in general, any slender terminal prolongation. [a, 27, 35.]—**T. of a muscle**. The portion near its insertion when considerably attenuated. [L.]—**T. of the epididymis**. See *GLOBUS MINOR* of the *epididymis*.—**T. of the pancreas**. The left and smaller portion of that gland. [C.]

**TAILLADE** (Fr.), n. Ta<sup>2</sup>-el-ya<sup>3</sup>d. A cut; a gash. [a, 34.]

**TAILLE** (Fr.), n. Ta<sup>2</sup>-ely'. See *CYSTOTOMY* and *LAPAROTOMY*.—**T. biliaire**. See *CHOLECYSTOTOMY*.—**T. césarienne**. See *CÆSAREAN OPERATION*.—**T. du rein**. See *NEPHROTOMY*.—**T. hypogastrique**. See *SUPRAPHIC CYSTOTOMY*.—**T. intestinale**. See *COLOMOTOMY*.—**T. latérale**, **T. latéralisée**. See *LATERAL CYSTOTOMY*.—**T. périnéale médiane**. See *MEDIAN CYSTOTOMY*.—**T. postérieure**. See *RECTAL CYSTOTOMY*.—**T. quadrilatérale**. An operation for large vesical calculi which consists in dividing the prostate obliquely. [E, 21.]—**T. rénale**. A variety of nephrotomy in which an opening is made into the pelvis of the kidney for the purpose of establishing a renal fistula. [D. Mollère, "Lyon méd.," Feb. 15, 1885, p. 207.]—**T. stomacale**. The operation of making a temporary opening into the stomach, as for the extraction of a foreign body or in order to dilate the pyloric orifice (as opposed to *gastrostomy*, in which the opening is designed to be permanent). [L. H. Petit, "Union méd.," April 10, 1886, p. 577.]—**T. suspubienne**. See *SUPRAPHIC CYSTOTOMY*.—**T. vésicale**. See *CYSTOTOMY*.

**TAKAMAHAK** (Ger.), n. Ta<sup>2</sup>k-a<sup>3</sup>-ma<sup>3</sup>-ha<sup>2</sup>k'. See *TACAMAHAC*.

**TALA**, n. 1. In Brazil, the *Celtis tala* or a variety of it. 2. In Ceylon, the *Cassia absus*. 3. The genus *Opuntia*. [a, 35.]

**TALALGIA** (Lat.), n. f. Tal<sup>2</sup>(ta<sup>2</sup>l)-a<sup>2</sup>l(j)(a<sup>2</sup>l)g'i<sup>2</sup>-a<sup>3</sup>. From *talus* the heel, and *ἀλγος*, pain. Fr., *talalgie*. A pain in the heel, caused by osteitis or rheumatism. [a, 34.]

**TALAMONACCIO** (It.), n. Ta<sup>2</sup>l-a<sup>3</sup>-mo<sup>2</sup>n-a<sup>3</sup>t-che-o'. A place in Grosseto, Italy, where there is a sulphurous spring. [L, 49 (a, 14).]

**TALAUMA** (Lat.), n. f. Ta<sup>2</sup>l-a<sup>2</sup>m/(a<sup>2</sup>u<sup>2</sup>m)-a<sup>3</sup>. Fr., *t.*, *talaume*. A genus of the *Magnoliæ*. [a, 35.]—**T. Plumieri**. Fr., *bois-cachiman* (ou *pin*). A West Indian tree. The bark and seed are used as tonics; the aromatic buds, shoots, and leaves in scurvy, gout, dropsy, etc.; and the flowers to aromatize liquors. The fruit-cones exude an acrid balsam used in catarrhs. [a, 35.]

**TALC**, n. Ta<sup>2</sup>lk. Lat., *talcus*, *talcum*. Fr., *t.* Ger., *Talk*. A mineral consisting chiefly of tetramagnesian pentasilicate, Mg<sub>3</sub>Si<sub>2</sub>O<sub>10</sub>, and containing traces of iron and alumina. It is a colorless or grayish substance, unctuous to the touch, and insoluble in water and in alcohol. It is used, powdered, as a lubricant, as a polishing material, and as a constituent of dusting powders. [B.]

**TALCIUM** (Lat.), n. n. Ta<sup>2</sup>l(s(ta<sup>2</sup>l)k)/i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Fr., *t.* Ger., *T.* See *MAGNESIUM*.

**TALCUM** (Lat.), n. n. Ta<sup>2</sup>l(k(ta<sup>2</sup>l)k)/u<sup>2</sup>m(u<sup>2</sup>m). See *TALC*.—**Pulvis talci salicylatus**. See *PULVIS SALICYLICUS cum talco*.—**T. nephriticum**. See *NEPHRITE*.—**T. pulveratum**. See *TALC*.

**TALG** (Ger.), n. Ta<sup>2</sup>lg. See *SUET* and *TALLOW*.—**Gallent'**. See *CHOLESTERIN*.—**Ochsentr'**. See *SEBUM BOVINUM*.—**Tartig**. See *SEBACEOUS*.—**T'säure**. Stearic acid. [B.]—**T'seife**. See *SAPON ANIMALIS*.—**T'stein**. See *STEATITE*.

**TALGBAUM** (Ger.), n. Ta<sup>2</sup>lg'ba<sup>2</sup>-u<sup>2</sup>m. 1. See *MYRICA CERIFERA*. 2. Any one of several species of *Stillingia*. [a, 35.]

**TALGDRIÛSE** (Ger.), n. Ta<sup>2</sup>lg'dru<sup>2</sup>-z-e<sup>2</sup>. A sebaceous gland. [L.]—**Meibomische T'n**. See *MEIBOMIAN GLANDS*.

**TALIERA** (Lat.), n. f. Ta<sup>2</sup>l-i<sup>2</sup>-er(ar)/a<sup>3</sup>. See *CORYPHA*.—**T. silvestris**. A sago-yielding palm of the southern Asiatic islands. The juice of the leaves is used as an emetic, and the root-fibres, in combination with those of *Emilia sonchifolia*, are chewed in diarrhœa. [a, 35.]

**TALIPEDIC**, adj. Ta<sup>2</sup>l-i<sup>2</sup>-ped'i<sup>2</sup>pk. Pertaining to or affected with talipes. [a, 48.]

**TALIPES** (Lat.), n. m. Ta<sup>2</sup>l(ta<sup>2</sup>l)/i<sup>2</sup>p-ez(as). Gen., *-ip'edis*. From *talus*, the ankle, and *pes*, the foot. Fr., *piéd bot*. Ger., *Klumpfuß*. A distorted shape of the foot.—**Spasmodic t.** A variety of non-congenital t. due to the spasm or paralysis of certain muscles. [E, 14.]—**T. arenatus**. See *T. cævus*.—**T. calcaneo-valgus**. The condition in which the foot is everted with depression of the heel. [E.]—**T. calcaneo-varus**. A variety in which the foot is inverted with depression of the heel.—**T. calcaneus. See *CALCANEUS*.—**T. cævus**. An exaggerated curvature of the arch of the foot, the anterior part of the foot being drawn backward. [A, 520 (a, 29); "Arch. of Ped.," Nov., 1891, p. 884.]—**T. equino-valgus**. A variety in which the foot is everted as well as extended. [E.]—**T. equino-varus**. A deformity characterized by inversion, torsion, and depression of the forepart of the foot with elevation of the heel. [A, 520 (a, 29).]—**T. equinus**. Fr., *piéd équin*. Depression of the anterior portion of the foot to a**

greater or lesser degree, so that the patient walks without touching the ground with the heel. [a, 29].—**T. planus**, **T. spurio-valgus**. See **FLAT-FOOT**.—**T. valgus**. Splay-foot; a deformity characterized by depression of the arch of the foot, so that the inner side of the sole touches the ground. The sole may be everted. The deformity is an alteration in the positions of the astragalus, the os calcis, and the scaphoid bone. [Reeves (a, 34)].—**T. varus**. Cross-foot; a t. in which the foot is twisted inward. [a, 34.]

**TALIPOMANUS** (Lat.), n. f.  $Ta^1p(ta^1)p^1a^2n(a^2n)u^2s(u^2s)$ . From *talipes*, club-foot, and *manus*, the hand. Club-hand; a more or less permanent deviation of the hand at the wrist in flexion, extension, abduction, adduction, or some intermediate posture. [Reeves (a, 34)].—**Cubital t.** See **Ulnar t.**—**Dorsal t.** See **T. extensa**.—**Dorso-radial t.** T. in which the hand is in a state intermediate between extension and adduction. [a, 34].—**Palmar t.** See **T. flexa**.—**Radial t.** T. in which the hand is in a state of adduction. [a, 34].—**Radio-palmar t.** T. in which the hand is in a state intermediate between adduction and flexion. [a, 34].—**T. extensa**. T. with the hand in a state of extension. [a, 34].—**T. flexa**. T. with the hand in a state of flexion. [a, 34].—**T. pronata**. T. with the hand in a state of pronation. [a, 34].—**T. supinata**. T. with the hand in the state of supination. [a, 34].—**T. vara**. See **T. pronata**.—**Ulnar t.** T. with the hand in the state of abduction. [a, 34.]

**TALKERDE** (Ger.), n.  $Ta^1k'e^2rd-e^2$ . See **MAGNESIA**.—**Kohlensaure T.** Medicinal magnesium carbonate. See under **MAGNESIUM carbonate**.—**Reine T.** See **Calcined MAGNESIA**.

**TALLINE** (Fr.), n.  $Ta^1l-en$ . Thalline.

**TALLOIRES** (Fr.), n.  $Ta^1lwa^2r$ . A place in the department of Haute-Savoie, France, where there is a sulphurous spring. [L, 49 (a, 14).]

**TALLOW**, n.  $Ta^1l'o$ . See **SEBUM** (1st def.).—**Chinese t.** The waxy substance covering the seeds of *Stillingia sebifera*. [a, 35].—**Mafuna t.** See **MAFUNA**.—**T-tree**. The *Stillingia sebifera* (of China) and the *Pentadesma butyracea* (of Sierra Leone). [a, 35].—**Vegetable t.** A t.-like substance extracted from a plant. [a, 35.]

**TALO-CALCANEAL**, adj.  $Tal-o-ka^1-kan'e^2'l$ . From *talus*, the ankle, and *calcaneum* (q. v.). See **ASTRAGALO-CALCANEAL**.

**TALON** (Fr.), n.  $Ta^1l'o^2n^2$ . See **HEEL**.

**TALONNIÈRE** (Fr.), n.  $Ta^1l'o^2n-e^2r$ . A small cushion of hair, used to prevent pressure on the heel in treating fracture of the leg. [E.]

**TALO-SCAPHOID**, adj.  $Tal-o-ska^2f'oid$ . See **ASTRAGALO-SCAPHOID**.

**TALPA** (Lat.), n. f.  $Ta^1p(ta^1)p^1a^2$ . Gr. *σκάλοψ, σπάλαξ*. Fr., *taupe*. Ger., *Maulwurf* (1st def.). A genus of soft-furred burrowing mammals of the *Talpidae*, or moles (a family of the *Insectivora*). [a, 35].—**T. europæa**. The common European mole. Formerly the entire animal carbonized (*talpa combusta*) was used in scrofula, goitre, etc., and the blood (*sanguis talpæ*) in various diseases. [a, 35.]

**TALPAFOLIE** (Fr.), n.  $Ta^1p-a^2fo-lé$ . For deriv., see **TALPA** and **FOLIE**. Of Guislain, a variety of mania in which the patient digs up the earth like a mole. [a, 34.]

**TALUS** (Lat.), n. m.  $Tal(ta^1)u^2s(u^2s)$ . See **ASTRAGALUS** (3d def.).

**TALUSROLLE** (Ger.), n.  $Ta^1l'us-ro^1le^2$ . See **SPRUNGROLLE**.

**TAMARACK**, n.  $Ta^2m'a^2r-a^2k$ . See **LARIX americana**.

**TAMARICACEOUS**, adj.  $Ta^2m'a^2r-i^2k-a^2shu^2s$ . Resembling the genus *Tamarix*, of the *Tamaricaceæ*, *Tamariceæ*, *Tamaricinae*, or *Tamaricineæ*, which are essentially the *Tamarisceæ* of Benthams and Hooker. [a, 35.]

**TAMARIN** (Fr.), n.  $Ta^2m-a^2r-a^2n$ . See **TAMARIND** and **TAMARINDUS**.—**Conserve de t's** [Fr. Cod.]. A preparation made by evaporating 50 parts each of purified pulp of tamarinds and water and 120 of powdered sugar till reduced to 200. [B, 95 (a, 38)].—**Pulpe brute de t's**. See **TAMARINDUS** (2d def.).—**Pulpe de t's**. See **Pulpa TAMARINDORUM depurata**.—**Tisane de t's**. See **Decoctum TAMARINDORUM**.

**TAMARIND**, n.  $Ta^2m'a^2r-i^2nd$ . Lat., *tamarindus*. Fr., *tamarin*. Ger., *Tamarinde*. The genus *Tamarindus*; also the fruit of *Tamarindus indica* or its preserved pulp. The *Tamarindus* are a division of the *Cassiæe*. [a, 35].—**Bastard-t.** See *ACACIA Julibrissin*.—**Black t.** 1. See *DIALIUM guineense*. 2. See *East Indian t.*—**Brown t.** See *West Indian t.*—**East Indian t.** The fruit of *Tamarindus indica* preserved without the use of sugar, thus giving it a strong acid taste. [a, 35].—**Egyptian t's**. Flattened black cakes prepared in Arabia and on the upper Nile from the softer part of t's. [a, 35].—**Guinea t.** The fruit of *Adansonia digitata*. [a, 35].—**Manilla t.** The fruit of *Pithecolobium dulce*. [a, 35].—**Red t.** See *West Indian t.*—**T. pulp.** 1. See **TAMARINDUS** (2d def.). 2. See **Pulpa TAMARINDORUM depurata**.—**T-tree**. See *Tamarindus indica*.—**T. water**. A drink made by infusing *West Indian t.* in cold water; used to allay thirst in fevers.—**Velvet t.** See *DIALIUM guineense*.—**West Indian t.** The form of t. usually occurring in the shops, consisting of the pulpy internal portion of the fruit mixed more or less with syrup. The sugar with which it is preserved tempers the acidity of the pulp. [a, 35.]

**TAMARINDA** (Lat.), n. f.  $Ta^2m(ta^2m)-a^2r(a^2r)-i^2nd/a^2$ . See **TAMARINDUS** (2d def.).

**TAMARINDE** (Ger.), n.  $Ta^2m-a^2r-i^2nd'e^2$ . See **TAMARINDUS**.—**T'mus**. See **TAMARINDUS** (2d def.).

**TAMAR INDIEN** (Fr.), n.  $Ta^2m-a^2r-a^2n^2-de-a^2n^2$ . A proprietary purgative confection consisting apparently of a pasty cake containing senna, inclosed in chocolate and sugared on the outside.

**TAMARINDUS** (Lat.), n. f.  $Ta^2m(ta^2m)-a^2r(a^2r)-i^2nd/u^2s(u^2s)$ . Fr., *tamarin* (1st def.), *tamarinier* (1st def.), *tamarinier (pulpe)*

(2d def.), *pulpe brute de tamarins* (2d def.). Ger., *Tamarinde* (1st def.), *Tamarindenbaum* (1st def.), *Tamarindenmus* (2d def.). Sp., *tamarindo*. 1. A genus of the *Leguminosæ*. 2. The preserved pulp of the fruit of *T. indica*. [B, 95 (a, 38); a, 35].—**Conserve tamarindorum**. See **Pulpa tamarindorum depurata** and **Conserve de TAMARINS**.—**Decoctum tamarindorum**. Fr., *tisane de tamarins*. A decoction made by boiling 1 part of purified tamarind pulp for a quarter of an hour with water enough to make 20 parts [Belg. Ph.]; by digesting 1 part of East Indian tamarinds without the seeds for half an hour with water enough to make 12 parts [Finn. Ph.]; or by letting 1 part of tamarind pulp stand an hour after stirring in 50 parts of boiling water, and straining [Fr. Cod.]. [B, 95 (a, 38)].—**Decoctum tamarindorum compositum** [Belg. Ph.]. A decoction made by boiling 1 part of tamarinds without the seeds and 2 parts of Corinthian raisins with water enough to make 20 parts. [B, 95 (a, 38)].—**Electuarium tamarindorum Fulleri** [Belg. Ph.]. An electuary consisting of 21 parts each of the pulp of tamarinds and cassia, 40 of manna, 2 of cream of tartar, and 8 each of senna-leaves and water. [B, 95 (a, 38)].—**Fructus tamarindi** (seu *tamarindorum*). The fruit of *T. indica* or its pulp. [a, 35].—**Fructus tamarindi crudus**. See *T. (2d def.)*.—**Pulpa (e fructu) tamarindi** (seu *tamarindorum*). See **Pulpa tamarindorum depurata**.—**Pulpa tamarindorum cruda**. See *T. (2d def.)*.—**Pulpa tamarindorum depurata**. Fr., *pulpe de tamarins*. Ger., *gereinigtes Tamarindenmus*. Sp., *pulpa de tamarindos*. The pulp of tamarinds purified by boiling or digesting with water, and evaporating. Most of the ph's add sugar at some stage in the process: 1 part to 3 parts of pulp, evaporating to the consistency of gruel [Austr. Ph., Hung. Ph., Norw. Ph., Roum. Ph.] (of tough pap [Dan. Ph.], of an extract [Swed. Ph.]); 1 part to 4 parts of pulp, evaporating to the consistency of a conserve [Swiss Ph.]; 1 to 5, evaporating to a thick extract [Ger. Ph., Finn. Ph.]; or 1 to 6, evaporating to a thick extract [Russ. Ph., Gr. Ph.] (to a pulp [Netherl. Ph.]). [B, 95 (a, 38)].—**T. amboinensis**. See *INTSIA amboinensis*.—**T. indica**. Fr., *tamarinier (des Indes)*. Ger., *indische Tamarindenbaum*. Tamarind, Indian date; a tree 70 to 80 feet in height, cultivated in tropical Asia and America, and found wild in north-western Australia, but probably indigenous to eastern tropical Africa. The fruit (the tamarind), a broad, compressed, reddish ash-colored pod, from 2 to 6 inches in length, deprived of its brittle epicarp and preserved, constitutes the tamarind pulp of the ph's (see *East Indian TAMARIND* and *West Indian TAMARIND*), which is used as a laxative and refrigerant. It contains tartaric acid, acid potassium tartrate, traces of citric and malic acids, gum, jelly, etc. It weakens the action of the resinous cathartics, while increasing that of cassia and manna. In the Mauritius it is used, mixed with salt, as a liniment in rheumatism. In India the seeds and bark are reputed tonic and antidiysenteric, and the cotyledons (which are sometimes eaten) are made into a paste for poultices. The acid leaves are used as an anthelmintic for jaundice, and for preparing a collyrium and a wash for foul ulcers. In Ceylon a confection prepared from the flowers is used in obstructions of the liver and spleen. [a, 35].—**T. occidentalis**. The West Indian variety of *T. indica*; considered by De Candolle a distinct species. [a, 35].—**T. officinalis**. See *T. indica*.

**TAMARINIER** (Fr.), n.  $Ta^2m-a^2r-re-ne-a$ . 1. See **TAMARINDUS**. 2. Of the Fr. Cod., see **TAMARINDUS indica**.—**T. (pulpe)**. See **TAMARINDUS** (2d def.).—**T. des Indes**. See **TAMARINDUS indica**.

**TAMARISCUS** (Lat.), n. m. and f.  $Ta^2m(ta^2m)-a^2r(a^2r)-i^2sk'u^2s(u^2s)$ . See **TAMARIX**, **Tamarix gallica**, and **MYRICARIA germanica**.—**Cortex tamarisci**. Sp., *tamarisco*, *taray* (corteza del tallo). The bark of *Tamarix gallica*. [B, 95 (a, 38)].—**T. decandrus**. See **MYRICARIA germanica**.—**T. fruticosa**, **T. gallica**, **T. gallicus**. See **TAMARIX gallica**.—**T. germanica**, **T. germanicus**. See **MYRICARIA germanica**.—**T. pentandrus**. See **TAMARIX gallica**.

**TAMARISK**, n.  $Ta^2m'a^2r-i^2sk$ . See **TAMARIX** and **TAMARIX gallica**.—**Common t.**, **French t.** See **TAMARIX gallica**.—**German t.** See **MYRICARIA germanica**.

**TAMARIX** (Lat.), n. f.  $Ta^2m(ta^2m)-a^2r(a^2r)-i^2x$ . Fr., *tamaris*, *tamarisk*. Ger., *Tamariske*. Tamarisk; a genus of shrubs or undershrubs giving name to the *Tamaricineæ* (Fr., *tamariscinées*), which are: (1) *The Tamarisceæ*; (2) an order of dialypetalous dicotyledons (including the *Tamarisceæ*, *Reaumurieæ*, and *Fouquierieæ*) readily distinguished in the cohort *Caryophyllinæ* by the ovary containing three placentas, free in the centre of the cavity, or cohering with the walls or more or less with each other so as to form three imperfect cells, and by the erect seed being comose at the apex or all over the testa, or at the margin in the form of a wing. The *Tamarisceæ* (containing two genera [*T.* and *Myricaria*] with exalbuminous seed comose at the apex) are a distinct order or (Benthams and Hooker) a tribe of the *Tamariscineæ*.—**T. africana**. The *T. gallica*, var. *γ.*, of Willdenow; a shrub of the Mediterranean regions having the same uses as *T. gallica mannifera*. [a, 35].—**T. anglica**. See *T. gallica*.—**T. articulata**. See *T. orientalis*.—**T. decandra**. See **MYRICARIA**

TAMARINDUS INDICA. [A, 327.]

*germanica*.—**T. gallica**. Fr., *tamarisc commun* (ou de Narbonne). Ger., *französische Tamariske*. Common (or French) tamarisk, the *μυρική* (*myrica*) of the ancients; found in southern Europe, northern and tropical Africa, and southern and eastern Asia. The bitter, balsamic, astringent bark and the leafy branches, *cortex et folia tamarisci* (*gallici*, seu *gallice*, seu *fruticosae*), *cortex et folia myricis* (seu *myricae*), were formerly used, especially in obstructions of the spleen. The leaves, together with the galls (see *Tamarisk* GALLS), were used in ophthalmia and hæmorrhages. One variety, *T. gallica*, var. *mannifera*, furnishes tamarisk manna. [a, 35.]—**T. germanica**. See *MYRICARIA germanica*.—**T. germanica caspica**, **T. herbacea**. See *MYRICARIA herbacea*.—**T. hispida**. Ger., *steifhaarige Tamariske*. A shrub growing on the Volga and other streams in Tartary, where the astringent branches are used in rheumatism and gout. [a, 35.]—**T. indica**. See *T. gallica*.—**T. mannifera**. The *T. gallica*, var. *mannifera*. [a, 35.]—**T. orientalis**. Fr., *tamarisk d'Orient*. Ger., *morgenländische Tamariske*. Atlee gall-tree, tamarisk salt-tree, of northern and middle Africa, Persia, etc., extending to the East Indies. It grows in saline soils, and, becoming incrustated with salt, is used to season food. The wood, which emits a fetid odor when burned, is used in syphilis and skin diseases, and the leaves in splenic disorders. The bark is astringent and tonic. Astringent galls are formed on this species. [a, 35.]—**T. pentandra**. See *T. hispida*.

**TAMBANGAN**, n. A place in Java where there is a saline spring. [L, 49 (a, 14).]

**TAMBOR**, n. A Central American species of *Omphalea* yielding a purgative oil. [a, 35.]

**TAMBOUR** (Fr.), n.  $Ta^{2n}n^{2n}$ -bur. Ger., *T.* (2d def.), *Lufttrommel* (2d def.). 1. See DRUM (2d def.). 2. An apparatus devised by Bert to demonstrate the respiratory movements of small animals and other movements of great delicacy. It consists of a capsule-like metal dish covered with sheet rubber. On the centre of the rubber cover is placed a disc of aluminium, which in turn is connected with another disc. This last disc, being applied firmly against the part, communicates the movement to the rubber head and the air within is alternately increased and lessened in density. The interior of the t. being connected by a tube with a registering t., a tracing of the movements is obtained. For some purposes the t. is mounted upon one limb of a caliper-like apparatus. The limbs being adjusted to the diameter of a part, any variation in the diameter is registered by the registering t. [J, 3, 5.]—**Marey's t.**, **Registering t.** Fr., *l. enregistreur*. An instrument for registering on a kymograph various movements (e. g., those of circulation and respiration). It consists essentially of a shallow metal dish covered by thin sheet rubber. On the centre of the rubber rests an aluminium disc connected by a rod to a lever bearing a style for making the tracing. The interior of the t. is connected by a tube with a receiving ampulla.

**TAMIER** (Fr.), n.  $Ta^2$ -me-a. The genus *Tamus*, especially *Tamus communis*. [a, 35.]

**TAMNUS** (Lat.), n. f.  $Ta^2m(ta^2m)/nu^2s(nu^2s)$ . See TAMUS.

**TAMPICIC ACID**, n.  $Ta^2m-pi^2s/i^2k$ . Fr., *acide tampicique*. An acid,  $C_{24}H_{40}O_{17}$ , obtained from tampicin. [B, 93 (a, 14).]

**TAMPICIN**, n.  $Ta^2mp/i^2s/i^2n$ . Fr., *tampicine*. Ger., *T.* A purgative glucoside,  $C_{24}H_{40}O_{17}$ , obtained from the root of *Ipomoea simulans*, similar to convolvulin and jalapin. [B, 93, 270 (a, 14, 38).]

**TAMPON**, n.  $Ta^2mp/o^2n$ . Fr., *t.* Ger., *T.*, *Pfropfen*. A plug of some soft material for closing a wound, a cavity, or an orifice. [E.]—**Kite-tail t.** A t. consisting of a number of pledgets tied at intervals on a string, as in the tail of a kite. [a, 34.]—**Probet** (Ger.). A vaginal t. impregnated with a solution of tannin in glycerin; used to collect the uterine discharge for examination. [L, 37 (a, 14).]—**T. de Garriel** (Fr.). An inflatable vaginal pessary.—**Trendelenburg's tracheal t.** A t. for closing the trachea in operations upon the mouth, consisting of a tracheotomy tube sur-

TRENDELENBURG'S TAMPON.

rounded by a bag of rubber which can be inflated by a bulb at the end of a rubber tube. The tracheotomy tube with its rubber casing is introduced into the tracheal wound, and the rubber casing is then inflated sufficiently to close the trachea completely and prevent the passage of blood by the side of the tube. [E.]

**TAMPON-CANNULA**, n.  $Ta^2mp/o^2n-ka^2n/n^2l-a^2$ . A tracheotomy tube devised by Semon, having a distensible rubber attachment at the inner end of the outer tube, which, being inflated, fills the trachea and tends to prevent erosion. [E.]

**TAMPONING**, n.  $Ta^2mp/o^2n-i^2n^2$ . Gr., *ἐμφορὰς, στήννωσις*. Lat., *obturatio*. Fr., *tamponnement*. Ger., *Tampouren*, *Tampouren*. The process of plugging by the use of a tampon. [a, 48.]

**TAMUS** (Lat.), n. f.  $Tam(ta^2n)/nu^2s(nu^2s)$ . Fr., *tamme*, *tamier*, *tamnier*. Ger., *Schmeerwurz*. A genus of the *Dioscoreaceae*. [a, 35.]—**T. communis**. Fr., *tamier*, *tamnier commun*, *racine vierge*,

*sceau Notre-Dame* (ou de la Vierge), *herbe aux femmes battues*, *vigne noire*. Ger., *gemeine Schmeerwurz*, *schwarze Zaunrube*. The *ἀμπέλος ἄγρια* of Dioscorides, beaten woman's herb, black bryony, murrain-berries, ox-berry; a climbing plant of Europe, northern Africa, and temperate Asia. The acrid tuberous root, *radix tami* (seu *bryoniae nigrae*), is diuretic and purgative and in large doses emetic, and was formerly considered resolvent. The fruits, steeped in gin, are applied to chilblains. The shoots are eaten after being boiled. [a, 35.]

**TANACETIC ACID**, n.  $Ta^2n-a^2s-et/i^2k$ . Fr., *acide tanacétique*. Ger., *Tanacetsäure*. An acid obtained from the flowers of *Tanacetum vulgare*. [B, 48, 93 (a, 14).]

**TANACETIN**, n.  $Ta^2n-a^2s-et/i^2n$ . Fr., *tanacétine*. Ger., *T.* A bitter principle,  $C_{11}H_{16}O_4$ , contained in the leaves and flowers of *Tanacetum vulgare*. [B, 48, 93 (a, 14).]

**TANACETOL**, n.  $Ta^2n-a^2s-et/o^2l$ . A liquid,  $C_{10}H_{16}O$ , obtained from oil of tansy. [B, 3 (a, 38).]

**TANACETUM** (Lat.), n. n.  $Ta^2n(ta^2n)-a^2s(a^2k)-et(at)/u^2m(u^2m)$ . For deriv., see TANSY. Fr., *tanaïsie* [Fr. Cod.], *herbe aux vers* (2d def.). Ger., *Reinfarn*, *Wurmkraut* (2d def.). 1. A genus of plants included by some authors in *Chrysanthemum*. The *Tanacetæ* are a section of the *Compositæ*. The *Tanacetæ* are: Of Cassini, a subdivision of the *Chrysanthemææ*; of Schultz, a division of the *Senecionidææ*. 2. The leaves and tops [U. S. Ph.] (tops [Finn. Ph.], flowering tops [Sp. Ph.], herb [Belg. Ph.], flowering herb [Gr. Ph.], flowering plant [Fr. Cod.]) of *Chrysanthemum vulgare*; an aromatic, bitter, and irritant narcotic. It contains tanacetin, tartaric, citric, malic, and metarabic acids, a variety of tannic acid, traces of oxalic and gallic acids, a wax-like substance, a resin, parabin, and a volatile oil (oil of tansy). [a, 35.]—**Aqua tanacetil**. Fr., *eau (ou hydrolat) de tanaïsie*. A preparation made by distilling 2 parts of a mixture of 1 part of tansy and 4 parts of water. [B, 119 (a, 38).]—**Flores tanacetil**. The flowers of *T. vulgare*. [B, 95 (a, 38).]—**Flores tanacetil pulverati**. The powdered flowering tops of *T. vulgare*. [B, 95 (a, 38).]—**Oleum tanacetil**. See OIL OF TANSY.—**Summitates tanacetil**. The tops of *Chrysanthemum vulgare* and *Chrysanthemum balsamita*.—**T. annum**. See *CHRYSANTHEMUM annum*.—**T. balsamita**, **T. femina**, **T. gentilis**. The *Chrysanthemum balsamita*. [a, 35.]—**T. vulgare**. See *CHRYSANTHEMUM vulgare*.

**TANACETYL ALCOHOL**, n.  $Ta^2n-a^2s-et/i^2l$ . A liquid,  $C_{10}H_{18}O$ , obtained from oil of tansy. [B, 3 (a, 38).]

**TANACETYL HYDRIDE**, n. See TANACETOL.

**TANACIUM** (Lat.), n. n.  $Ta^2n(ta^2n)-es(a^2e^2k)-i^2-u^2m(u^2m)$ . Fr., *taniécie*. A genus of bigoniaceous shrubs. The *Tanaciceæ* are a subtribe of the *Crescentineæ*. [a, 35.]—**T. albiflorum**. A Jamaica species. The fruits are used for poultices. [a, 35.]—**T. jaboroa**. The *jaboroa* of the West Indies and Brazil. The fruits are pectoral. [a, 35.]

**TANAISIE** [Fr. Cod.] (Fr.), n.  $Ta^2-ne^2-ze$ . See TANACETUM.—**Huile volatile de t.** [Fr. Cod.]. See OIL OF TANSY.—**T. commune**. See *CHRYSANTHEMUM vulgare*.—**T. sauvage**. The *Potentilla anserina* and other species of *Potentilla*. [a, 35.]

**TANASIMONOSOPHOBOMANIE** (Fr.), n.  $Ta^2-na^2-ze-mo-no-so-to-bo-ma^2-ne$ . Of Michéa, hypochondriasis. [A, 540 (a, 34).]

**TANG**, n.  $Ta^2n^2$ . Ger., *T.* See *Fucus vesiculosus*.—**Hautt'** (Ger.). See *HALYMENIA*.—**Knorpelt'** (Ger.). See *CHONDROS crispus*.—**Riement'** (Ger.). See *LAMINARIA* (1st def.).—**Schwarzit'e** (Ger.). See *FUCODEE*.—**Tasche** (Ger.). See *KELP*.—**T'soda** (Ger.). See *KELP*.—**Wurmt'** (Ger.). *Helminthochorton*.

**TANGHIN**, n.  $Ta^2n^2-gi^2n$ . Lat., *tanghinia*. Fr., *t.*, *tanguin*. 1. See CERBERA t. 2. Its seed, the ordeal bean of Madagascar. It increases reflex excitability, produces convulsions, and affects the activity both of the heart and of respiration. It has been used in paralysis and visceral atony. [B, 3, a, 35.]

**TANGHINIA** (Lat.), n. f.  $Ta^2n^2-gi^2n/i^2-a^2$ . Fr., *tanghinie* (1st def.). 1. A genus of plants referred by Bentham and Hooker to *Cerbera*. [a, 35.] 2. See TANGHIN. [a, 35.]—**T. madagascariensis**, **T. venenifera**. Fr., *tanghinie venéneuse*. See CERBERA tanghin.

**TANGHININ**, n.  $Ta^2n/gi^2n-i^2n$ . Fr., *tanghinine*, *tanghine*, *tanghinine*. Ger., *T.* The active principle of tanghin (the seed), obtained as bitter colorless scales, efflorescing in air and dissolving in alcohol, in ether, and in acetic acid. It acts as a cardiac and respiratory poison, and destroys the muscular irritability. [B, 5, 93 (a, 14, 35).]

**TANG-KWANG** (Chin.), n. Gamboge. [a, 35.]

**TANGLE**, n.  $Ta^2n^2/g^2l$ . See *LAMINARIA conica*.—**Sweet t.** See *LAMINARIA saccharina*.

**TANGUIN**, n.  $Ta^2n^2-gi^2n$ . See TANGHIN.

**TÄNIE** (Ger.), n.  $Tan/i^2-e^2$ . See TÄNIA.

**TANIN** (Fr.), n.  $Ta^2-na^2n^2$ . See TANNIN.

**TANNAS** (Lat.), n. m.  $Ta^2n(ta^2n)-nu^2s(nu^2s)$ . Ger., *-nat'is*. See TANNATE.—**T. pelletierinus** [Fr. Cod.]. See *PELLETIERINE tannate*.—**T. plumbicus**. See *LEAD tannate*.—**T. quinicus**. See *QUININE tannate*.—**Unguentum tannatis plumbici**. See *Glycerinum tannatis plumbici*.

**TANNASPIDIC ACID**, n.  $Ta^2n-a^2sp-i^2d/i^2k$ . See *FILICITANNIC ACID*.

**TANNATE**, n.  $Ta^2n/at$ . Lat., *tannas*. Fr., *t.* Ger., *Tannat*. A salt of tannic acid. [B.]

**TANNE** (Fr.), n.  $Ta^2n$ . 1. See COMEDO. 2. The oil of *Camellia oleifera*. [a, 35.]

**TANNE** (Ger.), n.  $Ta^2n-ne^2$ . See ABIES.—**T'nstoff**. See DADYL.—**T'napfenöl**. Oil of pine-core. [L, 37 (a, 14).]

**TANNECORTEPINIC ACID**, n.  $\text{Ta}^2\text{n-e}^2\text{-ko}^2\text{rt-e}^2\text{-pin}^1\text{qk}$ . Fr. *acide tannecortépinique*. A variety,  $\text{C}_{28}\text{H}_{26}\text{O}_{12}$ , of tannin obtained from the bark of *Pinus silvestris*. [B, 93 (a, 14).]

**TANNENHARZ** (Ger.), n.  $\text{Ta}^2\text{n-ne}^2\text{n-ha}^2\text{rts}$ . See *Burgundy PITCH*.—**T'säure**. Abietic acid.

**TANNES** (Fr.), n. pl.  $\text{Ta}^2\text{n}$ . See *ACNE punctata*.

**TANNIC**, adj.  $\text{Ta}^2\text{n}^1\text{qk}$ . Lat., *tannicus*. Fr., *tannique*. Ger., *gerbstoffartig*. Derived from tan; containing t. acid.

**TANNIC ACID**, n.  $\text{Ta}^2\text{n}^1\text{qk}$ . Fr., *acide tannique*. Ger., *Gerbsäure*, *Tanninsäure*. Tannin, gallotannic acid; an acid,  $\text{C}_{11}\text{H}_8\text{O}_6 = \text{C}_6\text{H}_2(\text{OH})_2\text{CO}.\text{OC}_5\text{H}_2(\text{OH})_2\text{CO}.\text{OH}$ , obtained from nut-galls and sumach-leaves, and occurring as a colorless amorphous mass, brittle and glassy when evaporated, turning yellow in the light, having a very astringent taste, easily soluble in water, less soluble in alcohol, nearly insoluble in absolute ether, and decomposing at  $215^\circ\text{C}$ . It has been used as a dressing. In a wider sense, the term t. a., or tannin, comprehends a large number of vegetable astringent principles, all of them glucosides, resembling each other in properties, and designated by a prefix indicative of their origin, e. g., caffeotannic acid, quercitannic acid, etc. [B, 3 (a, 38); B, 14.] See also *ACIDUM TANNICUM* and subheadings there.

**TANNICUS** (Lat.), adj.  $\text{Ta}^2\text{n}(\text{ta}^2\text{n})^1\text{n}^1\text{k-u}^2\text{s(u}^4\text{s)}$ . See *TANNIC*; as a n., in the neut., *tannicum*, an astringent that contains tannic acid.—**Tannicum amarum**. An astringent containing tannic acid and bitter principles.—**Tannicum anthelminticum**. An astringent containing tannic acid and having anthelmintic properties.—**Tannicum mucilaginosum**. An astringent containing tannic acid and mucilaginous substances.—**Tannicum purum**. A pure astringent containing tannic acid.

**TANNIN**, n.  $\text{Ta}^2\text{n}^1\text{qk}$ . Lat., *tanninum*. Fr., t. Ger., *T. Tannic acid*; more particularly, crude tannic acid as it occurs in vegetable tissues combined with glucose. [B, 5.]—**Crayons de t.** [Fr. Cod.]. Cylindrical sticks made by mixing t. with  $\frac{1}{10}$  of its weight of powdered gum arabic, adding glycerin and water in equal amounts, and rolling into shape. [B.]—**Glycéré de t.** (Fr.). **Glycérôle de t.** (Fr.). See *Glyceritum ACIDI TANNICI*.—**Pommade de t.** (Fr.). See *Unguentum ACIDI TANNICI*.—**Suppositoires de t.** (Fr.). See *Suppositoria ACIDI TANNICI*.—**T. lozenges**. See *Trochisci ACIDI TANNICI*.—**T. officinal** (Fr.). See *TANNIC ACID*.—**T. oriental** (Fr.). See *BABLAH*.—**T'säure** (Ger.). See *TANNIC ACID*.—**T'stöbchen** (Ger.). See *BACILLI tannico-opiati*.

**TANNINBLEI** (Ger.), n.  $\text{Ta}^2\text{n-nen}^1\text{bli}$ . See *LEAD tannate*.—**T'salbe**. See *Glycerinum tannatis PLUMBI*.

**TANNINGENIC ACID**, **TANNINGIC ACID**, n's.  $\text{Ta}^2\text{n-}^1\text{qk-j}^2\text{en}^1\text{qk}$ ,  $\text{-}^1\text{qk-j}^2\text{qk}$ . Ger., *Tanningensäure*, *Tanningerbssäure*. See *CATECHUTANNIC ACID*.

**TANNINUM** (Lat.), n. n.  $\text{Ta}^2\text{n}(\text{ta}^2\text{n})^1\text{n}(\text{nen})^1\text{u}^2\text{m(u}^4\text{m)}$ . See *TANNIC ACID*.—**Bacilli tannini**. See *Crayons de TANNIN*.—**Glyceritum cum tannino**. See *Glyceritum ACIDI TANNICI*.

**TANSY**, n.  $\text{Ta}^2\text{n}^1\text{qk}$ . From *idavasia*, immortality. The genus *Tanacetum*, especially *Tanacetum vulgare* (*Chrysanthemum vulgare*) and its leaves and tops; also *Potentilla anserina*, *Senecio jacobaea*, *Achillea millefolium*, etc. [a, 35.]—**Common t.** The *Chrysanthemum vulgare*. [a, 35.]—**Dog's t.**, **Goose-t.** See *POTENTILLA anserina*.—**Oil of t.** Lat., *oleum tanacet.* Fr., *huile volatile de tanaïsie*. Ger., *Reinfarnöl*. A volatile oil obtained from *tanacetum* (2d def.). The Fr. Cod. directs the tops to be used, the Russ. Ph. the flowers, the Pruss. Ph. the flowers and herb, and the Gr. Ph. the flowering herb. It consists of 1 per cent. of a terpene ( $\text{C}_{10}\text{H}_{16}$ ), boiling at  $155^\circ$  to  $160^\circ\text{C}$ , 70 per cent. of an aldehyde ( $\text{C}_{10}\text{H}_{16}\text{O}$ ), boiling at  $195^\circ$  to  $198^\circ\text{C}$ , and 26 per cent. of an alcohol ( $\text{C}_{10}\text{H}_{18}\text{O}$ ), boiling at  $205^\circ$  to  $205^\circ\text{C}$ . In large doses it produces violent convulsions, coma, and even death. [B, 95 (a, 38); Bruylants (a, 35).]

**TANTAL** (Ger.), n.  $\text{Ta}^2\text{n}^1\text{a}^2\text{l}$ . See *TANTALUM*.—**T'erde**, **T'säure**. See *TANTALIC ACID*.

**TANTALATE**, n.  $\text{Ta}^2\text{n}^1\text{a}^2\text{l-at}$ . Fr., *colombate*. A salt of tantic acid. [B.]

**TANTALIC ACID**, n.  $\text{Ta}^2\text{n}^1\text{a}^2\text{l}^1\text{qk}$ . Fr., *acide tantalique*. Ger., *Tantalssäure*. A monobasic acid,  $\text{HTaO}_3$  (or  $\text{Ta}_2\text{O}_5 + \text{H}_2\text{O} = 2\text{HTaO}_3$ ), occurring as a crystalline powder. [B.]

**TANTALUM** (Lat.), n. n.  $\text{Ta}^2\text{n}^1\text{a}^2\text{l}(\text{ta}^2\text{n}^1\text{a}^2\text{l})^1\text{u}^2\text{m(u}^4\text{m)}$ . Fr., *tantal*. Ger., *Tantal*. A metallic element discovered by Ekeberg in 1802. It occurs in several minerals, and is almost always associated with niobium. It has not been isolated in a perfectly pure state, but has been obtained approximately free from admixture as a black powder, capable of assuming a metallic lustre, and readily oxidizing on the application of heat. It is not attacked by any acid except hydrofluoric, and to this immunity it owes its name, from the fable of Tantalus being unable to quench his thirst. In composition it acts usually as a pentad radicle, occasionally as a tetrad. Symbol, Ta; atomic weight, 182. [B, 3.]

**TANZ** (Ger.), n.  $\text{Ta}^2\text{n}^1\text{ts}$ . See *DANCE*.—**T'krämpfe**. Choreic spasms. [L, 57 (a, 30).]—**T'sucht**, **T'wuth**. See *EPIDEMIC CHOREA*.

**TAPEINOCEPHALUS** (Lat.), n. m.  $\text{Ta}^2\text{p}(\text{ta}^2\text{p})^1\text{-in(e}^2\text{-i}^2\text{n)-o}(\text{o}^2\text{-se}^2\text{f(ke}^2\text{f/a}^2\text{l(a}^2\text{l)-u}^2\text{s(u}^4\text{s)})}$ . A person characterized by tapeinocephaly.

**TAPEINOCEPHALY**, n.  $\text{Ta}^2\text{p-in-o-se}^2\text{f/a}^2\text{l-i}^2$ . From *ταπεινός*, low, and *κεφαλή*, the head. Fr., *tapeinocephalie*. The condition of having the vault of the skull depressed. [L, 149 (a, 50).]

**TAPETAL**, adj.  $\text{Ta}^2\text{p-e}^2\text{t}^1$ . Pertaining to the tapetum. [a, 35.]

**TAPETE** (Ger.), n.  $\text{Ta}^2\text{p-at}^1$ . See *TAPETUM*.—**Farbent'**. See *LAMINA pigmenti*.—**T. der Seitenhöhlen**. The chorioid plexus of the lateral ventricle. [I, 80 (K).]

**TAPETUM** (Lat.), n. n.  $\text{Ta}^2\text{p}(\text{ta}^2\text{p})^1\text{-et(at)}^1\text{u}^2\text{m(u}^4\text{m)}$ . From *tapete*, a carpet. Fr., *tapis*. Ger., *Tapete*, *T*. 1. A layer or lamina.

[a, 17.] 2. The epithelium lining the pollen sac. [a, 35.] Cf. *Tape-tal CELL*. 3. A layer made up of bundles of nerve-fibres which curve backward from the body of the fornix to the posterior portion of the hemisphere. [I, 6 (K).]—**Augent'** (Ger.). See *LAMINA pigmenti (retinæ)*.—**T. alveoli**. See *Peri-odontal MEMBRANE*.—**T. cerebri**. See *T. (3d def.)* and *T. corporis callosi*.—**T. chorioides (seu nigrum)**. See *LAMINA pigmenti (retinæ)*.—**T. corporis callosi**. Fr., *étui de l'hippocampe*. Of Reil, radiating fibres of the corpus callosum which are prolonged into the posterior cornua of the lateral ventricles. [J, 28 (K).]—**T. der Mittelhöhle** (Ger.). The chorioid plexus of the third ventricle. [I, 30 (K).]—**T. nigrum**. See *LAMINA pigmenti (retinæ)*.—**T. Reilii**. See *T. corporis callosi* and cf. *TAPIS de Reil*.

**TAPEWORM**, n.  $\text{Ta}^2\text{p-wu}^2\text{m}$ . See *TÆNIA* (2d def.).—**Armed t.** See *TÆNIA solium* (1st def.).—**Beef t.** See *TÆNIA mediocanellata*.—**Broad t.** See *BOTRIOCEPHALUS latus*.—**Common t.** See *TÆNIA solium* (1st def.).—**Dwarf t.** See *TÆNIA nano*.—**Hydatid t.** See *TÆNIA echinococcus*.—**Long t.**, **Pork t.**, **Solitary t.** See *TÆNIA solium* (1st def.).—**Swiss t.** See *BOTRIOCEPHALUS latus*.—**T. plant**. See *BRAYERA anthelminthica*.—**Unarmed t.** See *TÆNIA mediocanellata*.

**TAPHIPHOBIA** (Lat.), **TAPHIPHOBIA** (Lat.), n's f.  $\text{Ta}^2\text{f}(\text{ta}^2\text{f)-e}^2\text{fob}(\text{fo}^2\text{b})^1\text{i}^2\text{-a}^2$ ,  $\text{-i}^2\text{fob}(\text{fo}^2\text{b})^1\text{i}^2\text{-a}^2$ . From *τάφος*, burial, and *φῶβος*, fear. Fr., *taphéphobie*. Of Morselli, morbid fear of being buried alive. [a, 34.]

**TAPHRENCHYMA** (Lat.), n. n.  $\text{Ta}^2\text{f}(\text{ta}^2\text{f)-re}^2\text{n}^2\text{ki}^2\text{m}(\text{ch}^2\text{u}^2\text{m})^1\text{-a}^2$ . Gen., *-chym'atos (-atis)*. From *τάφος*, a ditch, and *ἐγχυμα*, an infusion. See *Pitted TISSUE*.

**TAPINOCEPHALY**, n.  $\text{Ta}^2\text{p-i}^2\text{n-o-se}^2\text{f/a}^2\text{l-i}^2$ . See *TAPEINOCEPHALY*.

**TAPHINOCRANIUM** (Lat.), adj.  $\text{Ta}^2\text{p}(\text{ta}^2\text{p})^1\text{-i}^2\text{n(en)-o}(\text{o}^2\text{-a}^2)\text{-kran-}$  ( $\text{kra}^2\text{n}^1\text{i}^2\text{-u}^2\text{s(u}^4\text{s)}$ ). From *ταφινός*, low, and *κρανίον*, the skull. Having the greatest height of the cranial cavity from 74.5 to 82.5 per cent. of its greatest length. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (a, 50).]

**TAPINOPISTHIUS** (Lat.), adj.  $\text{Ta}^2\text{p}(\text{ta}^2\text{p})^1\text{-i}^2\text{n(en)-o}^2\text{p-i}^2\text{sth-}$  ( $\text{i}^2\text{-u}^2\text{s(u}^4\text{s)}$ ). From *ταφινός*, low, and *πίσθη*, behind. Having the radius fixus making an angle of from  $24^\circ 5'$  to  $33^\circ$  with the line connecting the punctum occipitale with the punctum alæ vomeris. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (a, 50).]

**TAPIOCA** (Lat.), n. f.  $\text{Ta}^2\text{p}(\text{ta}^2\text{p})^1\text{-i}^2\text{-ok'a}^2$ . Fr., t., *tapioka* [Fr. Cod.]. Sp., t. [Sp. Ph.]. An easily digested food, occurring in round, hard pellets, prepared from cassava starch. [a, 35.]—**Chocolate of t.** A French preparation containing 3 parts of t. with 100 of chocolate. [B, 10.]—**Gelatina tapiocæ**. Sp., *jalea de t. [Sp. Ph.]. A jelly made by triturating 15 parts of t. with a little cold water, adding 45 of sugar boiled up with 230 of water, and keeping at a boil for a few minutes. [B, 95 (a, 38).]—**Pearl t.** A spurious t. occurring as small round grains, formed probably from potato-starch. [B, 5.]—**T. meal**. Fr., *moussache*. T. dried without heat, forming a fine powder, identical with ordinary t. in microscopic structure, but not soluble in cold water. [B, 5.]*

**TAPIS** (Fr.), n.  $\text{Ta}^2\text{-pe}$ . See *TAPETUM* and *TAPETUM chorioidæ*.—**T. de Reil**. See *INSULA* and cf. *TAPETUM Reilii*.

**TAPOTEMENT** (Fr.), n.  $\text{Ta}^2\text{-pot-ma}^2\text{n}^2$ . Ger., *Fingerklöpfung*. That variety of massage which consists in tapping or percussion of the affected part. [E.]

**TAPPING**, n.  $\text{Ta}^2\text{p-i}^2\text{n}^2$ . See *PARACENTESIS*.

**TAR**, n.  $\text{Ta}^2\text{-r}$ . Lat., *pix liquida* [U. S. Ph., Br. Ph., etc.], *pyro-leum pini* [Dan. Ph., Swed. Ph., Norw. Ph.]. Fr., *goudron (végétal)* [Fr. Cod.], *poix liquide*. Ger., *Theer*, *Holztheer*, *Fichtentheer*. 1. A highly complex material produced by the destructive distillation of various organic substances. 2. As commonly used, wood-tar; a very thick, shining, black liquid, having a peculiar empyreumatic odor and a bitter taste, derived from the wood of conifers by destructive distillation. On distillation it yields oil of t. and an acid liquid (impure pyroligneous acid), the residue being pitch. T. yields a small proportion of its constituents, especially pyrocatechin, to water, imparting to it an acid reaction and a peculiar taste (see *T-water*). It is readily soluble in alcohol, in ether, and in solutions of the caustic alkalis. In medicinal properties it resembles the turpentine, but is much less irritant. [B; a, 35.]—**Archangel t.** See *Stockholm t.*—**Barbadoes t.** See *Barbadoes PETROLEUM*.—**Beech-t.** Ger., *Buchentheer*. A t. made from the wood of *Fagus sylvatica*; official in some ph's as the best source of creasote. [a, 35.]—**Birch-t.** Lat., *pix betule*. The *dagget* of the Russians; a t. containing much pyrocatechin, obtained from *Betula alba*. [a, 35.]—**Coal-t.** Lat., *pix lithanthracis*. Fr., *goudron de houille*. Ger., *Kohlentheer*. A dark, semi-liquid substance obtained in the dry distillation of coal. It is highly complex in composition, yielding by distillation and rectification the following products: Naphthalenes, fluorene, anthracene, carbazol, chrysene, and other solids; benzene, toluene, cymene, and other neutral hydrocarbons; phenol, orthocresol, phlorol, pyrocatechin, and other alcohol-like bodies; ammonia, methylamine, ethylamine, phenylamine, picoline, collidine, and other bases; illuminating gases, such as acetylene, ethylene, etc.; heating gases, hydrogen, marsh-gas, and carbon monoxide; and certain impurities, carbon dioxide, hydrogen sulphide, nitrogen, thiocyanic acid, etc. [B, 5 (a, 35).]—**Coal-t. saponatum**, **Coalt' saponiné** (Fr.), **Coalt' savonneux** (Fr.). Of the veterinarians, a liquid made by mixing 1 part of coal-t. with 2 parts of black soap, and adding (with gentle heat and stirring) 1 part of alcohol and 24 parts of water. [B, 95, 113 (a, 21).]—**Emulsion de coalt'** [Fr. Cod.] (Fr.). A preparation made by mixing one part of the *teinture de bois de Panama coaltarée* with 4 parts of distilled water. It contains 4 per cent. of coal-t. [B.]—**Gas-t.** See *Coal-t.*—**Glycerate of t.** See *Glyceritum PICIS liquidæ* (under *Pix*).—**Infusion of t.** See *Infusum PICIS liquidæ*.—**Juniper t.** See *Oil of CADE*.—**Koalt'** (Ger.). See *Coal-t.*

**Mineral t.** See MALTHA.—**Oil of t.** Lat., *oleum picis liquide* [U. S. Ph.]. Fr., *essence (huile) de goudron*. Ger., *Theeröl, Pechöl*. The volatile oily liquid obtained in the distillation of wood-t.; almost colorless when freshly prepared, but becoming dark on standing, having the odor of t., and dissolving freely in alcohol. In chemical composition it is very complex, containing various hydrocarbons of the paraffin series, hydrocarbons of the aromatic series, and the alcohols of the latter series, including carboic acid and the mixture of phenols constituting creosote. It is less offensive in taste than t., and hence is preferred for medicinal use. [B. 35.]—**Poudre de coal-t.** [Fr. Cod.] (Fr.). Ger., *Coal-t.-Gypspulver*. Of the veterinarians, a mixture of 1 part of coal-t. and 20 parts of gypsum. [B. 113 (a, 21).]—**Rangoon t.** See Rangoon PETROLEUM.—**Saccharated t.** Syrup of t. See SYRUPUS PICIS.—**Stockholm t.** A trade name in Europe for wood-t., most of which is prepared in Finland, central and northern Russia, and Sweden. [a, 35.]—**T. beer.** Lat., *cerevisia picis (liquide)*. A beer made by heating gently with  $\frac{1}{2}$  pint of yeast 2 pints of bran, 1 pint of t.,  $\frac{1}{2}$  pint of honey, and 6 pints of water, and fermenting. [B.]—**T.-oil.** See Oil of t.—**T. ointment.** See Unguentum PICIS LIQUIDE.—**T.-water.** See Infusum PICIS LIQUIDE (under PIX).—**Vegetable t.** Wood-t. See T. (2d def.).

**TARACANA** (Lat.), n. f.  $Ta^2r(ta^2r)a^2k(a^2k)an(a^2n)a^2$ . A kind of cockroach found in Russia.—**Pulvis taracane.** Powdered Russian cockroach (*Blatta lapponica*), used in dropsy (cf. ANTHYDROPIN). [B. 5.]

**TARACHE, TARAGMA** (Lat.), **TARAGMUS** (Lat.), n's f., n., and m.  $Ta^2r(ta^2r)a^2k(a^2k)a^2(a)$ ,  $ta^2r(ta^2r)a^2g(a^2g)ma^2$ ,  $-mu^2s(mu^2s)$ . Gen., *tar'aches, -ag'matos (-atis), -ag'ni*. Gr., *ταράχη, ταραγμία, ταραγμός*. See TARAXIS.

**TARANTISM**, n.  $Ta^2r(a^2n)i^2zm$ . Lat., *tarantismus* (from Taranto [Gr., *Tápas*, Lat., *Tarentum*], a city of Greece). Fr., *tarantisme*. Ger., *Tarantismus*. An epidemic chorea that appeared in Apulia in the fifteenth century and spread through Italy and southern France; supposed to be caused by the bite of *Lycosa tarantula*. [a, 34.]

**TARANTULA** (Lat.), n. f.  $Ta^2r(ta^2r)a^2nt(a^2nt)u^2(u^2)a^2$ . From Taranto (see TARANTISM). Fr., *tarentule*. Ger., *Tarentel*. See LYCOSA t.

**TARASCON** (Fr.), n.  $Ta^2r-ra^2sko^2n^2$ . A place in the department of the Ariège, France, where there is a chalybeate spring.

**TARASP** (Ger.), n.  $Ta^2r-a^2sp'$ . A place in the canton of the Grisons, Switzerland, where there are gaseous springs. [a, 14.]

**TARASSIS** (Lat.), n. f.  $Ta^2r(ta^2r)a^2s(a^2s)si^2s$ . Gen., *-as'seos (-sis)*. From *ταράσσειν*, to trouble. Of Lanoaille de Lachèse, the congeries of symptoms commonly known as hysteria in the male. ["Gaz. des hôp.," 1884, p. 1036 (a, 34).]

**TARAXACERIN**, n.  $Ta^2r-a^2x-a^2ser'i^n$ . A crystalline principle,  $C_8H_{16}O$ , obtained from the milky juice of the root of *Taraxacum officinale*. [B. 5 (a, 38).]

**TARAXACIN**, n.  $Ta^2r-a^2x/a^2s-i^n$ . Fr., *taraxacine*. Ger., *T.* A bitter principle obtained from the juice of the root of *Taraxacum officinale*, as white, bitter crystals. [B. 5, 93, 270 (a, 14, 38).]

**TARAXACUM** (Lat.), n. n.  $Ta^2r(ta^2r)a^2x(a^2x)a^2k(a^2k)u^2m$ . Fr., *pissenlit* (2d and 3d def's), *dent-de-lion* (racine) [Fr. Cod.] (2d def.), *dent-de-lion* [Fr. Cod.] (3d def.). Ger., *Pfaffenröhrchen* (1st def.), *Löwenzahnwurzel* (3d def.), *Löwenzahn*. Sp., *diente de león* [Sp. Ph.] (3d def.). 1. A genus of the *Taraxaceae* (a tribe of the *Cichoriaceae*). 2. Dandelion-root; of the U. S. Ph., the root (in the Br. Ph., the fresh and dried roots) of *T. officinale* gathered in autumn. [a, 35.] 3. Of the Austr. Ph. and Hung. Ph., the leaves of *T. officinale*. [B. 95 (a, 38).]—**Compositum elixir of t.** A preparation made of 6 oz. of t.-root, 4 of wild-cherry bark, 2 of orange-peel, 1 oz. each of gentian-root, cinnamon, coriander, and licorice, 2 drachms each of anise, cardamom, and caraway, 2 pints of syrup, and enough of a mixture of 3 parts of water and 1 part of alcohol to produce 6 pints of elixir by treatment in a percolator; or of 6 fl. oz. of fluid extract of t., 1 fl. oz. of fluid extract of gentian, 100 drops of oil of orange, 12 of oil of cinnamon, 10 of oil of anise, 5 of oil of caraway, 20 of oil of coriander, 1 oz. of extract of licorice, 2 pints of syrup of wild cherry, 1 of alcohol, and 4 of water. [B. 5 (a, 38).]—**Decoctum taraxaci** [Br. Ph., Belg. Ph.]. Fr., *tisane de pissenlit*. Ger., *Löwenzahnwurzelabund*. Sp., *cocimiento de taraxacón* [Sp. Ph.]. A decoction made by boiling 1 oz. of dry t.-root for ten minutes in water enough to make 1 pint after straining and washing [Br. Ph.]; or by macerating 1 part of the root an hour with water enough to make 20 parts after boiling a quarter of an hour and straining [Belg. Ph.]; or by boiling 1 part of dried t.-leaves a quarter of an hour with water enough to make 46 parts when strained [Sp. Ph.]. [B. 95 (a, 38).]—**Decoctum taraxaci compositum.** A preparation made by boiling together 120 parts of dandelion-root, 15 of *Mentha trifoliata*, and 1,440 of water till the liquid is reduced one half, and adding 30 of potassium sulphate and 7 of ether; or by boiling 75 grammes each of dandelion, chicory, and *Triticum repens* with water enough to make 360, and adding 7 of potassium sulphate, 30 of sirop des cinq racines, and 25 drops of Hoffman's solution. [B. 119 (a, 38).]—**Extractum taraxaci.** Fr., *extraît de pissenlit*. Ger., *Löwenzahnextrakt*. Sp., *extracto de taraxacón*. 1. An extract made from the root [U. S. Ph., Br. Ph., Finn. Ph., Swiss Ph.] (from the herb and root) [Ger. Ph., Dan. Ph., Norw. Ph., Swed. Ph., Russ. Ph., Netherl. Ph., Belg. Ph., Gr. Ph.], from the leaves [Fr. Cod., Sp. Ph.] of *T. officinale*. [B.] 2. Of the Austr. Ph. and Hung. Ph. see *Extractum taraxaci liquidum* (2d def.).—**Extractum taraxaci fluidum.** An extract made by exhausting 100 grammes of t.-root in No. 30 powder with a mixture of 2 parts of alcohol and 3 of water, reserving 85 c. c. distilling off the alcohol from the remainder and evaporating it to a soft extract, mixing the two, and bringing up to 100 c. c. with the menstruum [U. S. Ph.]; or by macerating 40 oz. of t.-root in No. 20 powder

with 4 pints of alcohol of sp. gr. 0.920, expressing 20 fl. oz., macerating the residue with water for 48 hours, evaporating to 18 fl. oz., adding the reserved 20, and bringing up to 40 with water [Br. Ph.]. [B. 95 (a, 38).]—**Extractum taraxaci liquidum.** 1. Of the Br. Ph., see *Extractum taraxaci fluidum*. 2. An extract made by dissolving 3 parts of extract of t. in 1 part of water [Dan. Ph., Russ. Ph., Pruss. Ph. (1846).]; or by treating equal weights of the leaves and the root of t. with warm water and evaporating to a thin extract [Austr. Ph., Hung. Ph.]. [B. 95 (a, 38).]—**Infusum taraxaci** [U. S. Ph., 1870]. Infusion of dandelion, made by macerating 2 oz. of t.-root in 1 pint of boiling water and straining. [B. 5 (a, 21).]—**Mellago taraxaci.** See *Extractum taraxaci liquidum* (2d def.).—**Pilule de fulminate de t.** (Fr.). An old name for a placebo.—**Radix taraxaci.** See T. (2d def.).—**Radix taraxaci cum herba** [Ger. Ph., Gr. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (*recens* [Russ. Ph.]). Roum., *taraxacu* [Roum. Ph.]. The *T. officinale* gathered in the spring before blooming. [B. 95 (a, 38).]—**Radix taraxaci pulverata.** A powder of t.-root sifted through a 1,000-mesh sieve [Russ. Ph.]. [B. 95 (a, 38).]—**Succus taraxaci** [Br. Ph.]. Dandelion juice; made by crushing t. (2d def.) in a stone mortar, expressing, adding 1 volume of alcohol for 3 volumes of juice, allowing to stand a week, and filtering. [B. 95 (a, 38).]—**T. dens leonis, T. officinale, T. officinarum.** Fr., *t. commun, chopine, cochet, couronne de moine, dent-de-lion, laitue de chien, liondent, pissenlit, salade de taupe*. Ger., *gemeines Pfaffenröhrchen, Pfaffenstiel, Löwenzahn, Hundelbume, Maiblume, Butterblume, Pfaffenkraut, Bompaulwurzel, Wiesenlattig, Eierblume, Eierkraut*. Dandelion (lion's-tooth), priest's-crown, swine's-snout; a polymorphous herbaceous plant (see cut under LEONTODON t.) found over the whole of Europe, central and northern Asia, and North America. The perennial, tapering, simple or nearly simple, fleshy root (see T. 2d def.) is rich in an inodorous juice which is bitter and neutral when fresh, but soon acquires an acid reaction and coagulates. A number of principles (inulin, laevulin, taraxacin, and taraxacerin) have been obtained from it, but what part they have in its medicinal virtues is not known. The intracellular substance of the root consists, according to Vogel, chiefly of pectose. The juice, if exposed to the air, undergoes a kind of fermentation resulting in the formation of mannite. T. is somewhat tonic, diuretic, and laxative, and is used especially in hepatic disorders. Dried, ground, and roasted, it is sometimes used with or as a substitute for coffee. The fresh leaves or entire herb, *herba taraxaci* (see *dentis leonis*, see *leontodontis* [taraxaci], see *lactuce pratensis*), are less active than the root, though the juice obtained from the flower-stalks is highly recommended by Barton. The young leaves are eaten as a salad and pot-herb. [a, 35.]

**TARAXIS** (Lat.), n. f.  $Ta^2r(ta^2r)a^2x(a^2x)i^2s$ . Gen., *-ax'eos (-is)*. Gr., *τάραξις* (from *ταράσσειν*, to trouble). 1. A disorder of sight arising from a blow or from compression of the eye. 2. A mild ophthalmia. [F.]

**TARCHONANTHUS** (Lat.), n. m.  $Ta^2rk(ta^2rch^2)o^2n-a^2nth(a^2nth)u^2s(u^2s)$ . A genus of the *Compositae*. The *Tarchonanthaceae* (Fr., *tarchonanthées*) are a division of the *Verniceae*. [a, 35.]—**T. camphoratus.** Shrubby fleabane of southern Africa; an aromatic, stimulant species, used like sage. [a, 35.]

**TARCONINE**, n.  $Ta^2r'ko^2n-en$ . Fr., *t.* A derivative,  $C_{11}H_{19}NO_3$ , of cotarnine. [B. 270 (a, 38).]

**TARDIF** (Fr.), adj.  $Ta^2r-def$ . See SEROTINOUS.

**TARENTISM**, n.  $Ta^2r'e^2nt-i^2zm$ . Lat., *tarentismus*. Fr., *tarentisme*. See TARANTISM.

**TARIERE** (Fr.), n.  $Ta^2r-re-e^2r$ . See OVIPOSTOR and DRILL.

**TARIRI** (Lat.), n. n. indecl.  $Ta^2r-re'$ . Fr., *t.* Of Aublet, a genus of the *Quassiceae*; tropical American bitter, tonic, and febrifuge trees or shrubs. [a, 35.]

**TARLATANE** (Fr.), n.  $Ta^2r-la^2-ta^n$ . Fine gauze (used for dressings). [a, 18.]

**TARO**, n. In Hawaii, kalo. [a, 35.]

**TAROLI**, n. An old term for chancre. [G.]

**TARRA**, n. In Lima, dividivi. [a, 35.]

**TARRAGON**, n.  $Ta^2r'a^2go^2n$ . See ARTEMISIA *dracunculus*.—**Oil of t.** An essential oil closely resembling oil of anise.

**TARSAL**, adj.  $Ta^2r's'l$ . Lat., *tarsalis, tarsus* (from *tarsus* [g. v.]). Fr., *t.*, *tarsien*. Ger., *t.* Pertaining to the tarsus.

**TARSALGIA** (Lat.), n. f.  $Ta^2rs-a^2lja^2g'i^2a^2$ . From *ταράω*, the tarsus, and *ἄλγος*, pain. Fr., *tarsalgie*. Ger., *Tarsalgie, Farsenzelschmerz*. 1. Pain in the tarsus. [a, 17.] 2. Painful valgus.

**TARSALIS** (Lat.), adj.  $Ta^2rs-al(a^2l)i^2s$ . Tarsal; as a n., of Cones, the tensor tarsl. [L.]

**TARSECTOMY**, n.  $Ta^2rs-e^2kt'om-i^2$ . From *ταράω*, the tarsus, and *ἐκτομή*, excision. Fr., *tarsectomie*. Excision of the tarsus.

**TARSECTOPIA** (Lat.), n. f.  $Ta^2rs-e^2k-top(top)i^2a^2$ . From *ταράω*, the tarsus, and *ἐκτομή*, out of place. Fr., *tarsectopie*. Displacement of the tarsus. [L. 50 (a, 14).]

**TARSEUS** (Lat.), **TARSIEN** (Fr.), adj's.  $Ta^2rs'e^2u^2s(u^2s)$ ,  $ta^2r-se-a^2n^2$ . See TARSAL.

**TARSITIS** (Lat.), n. f.  $Ta^2rs-i^2(e^2)i^2s$ . Gen., *-itidos (-idis)*. From *tarsus* (q. v.). Fr., *tarsite*. Ger., *T.* Inflammation of the tarsal cartilages. [F.]

**TARSOCACE** (Lat.), n. f.  $Ta^2rs-o^2k/a^2s(a^2k)-e(a)$ . Gen., *-oc'aces*. From *ταράω*, the tarsus, and *κακός*, evil. Fr., *t.* See PODARTHROCAE.

**TARSO-CHEILOPLASTIC**, adj.  $Ta^2rs-o-kil'o-pla^2st-i^2k$ . From *ταράω* (see TARSUS), *χείλος*, a lip, and *πλασσειν*, to mold. Plastic and performed on the border of the eyelid (said of an operation for trichiasis). [a, 34.]

**TARSOCLASIS** (Lat.), n. f.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{2k}}\text{'la}^{\text{2s}}\text{(la}^{\text{2s}}\text{)-i}^{\text{2s}}$ . Gen., *-clas'eos* (*-oc'las'is*). From *ταρσός*, the tarsus, and *κλάσις*, a breaking. The operation of breaking a deformed tarsus by force. [V. P. Gibney, "N. Y. Med. Jour.," Apr. 17, 1886, p. 427 (a, 50).]

**TARSOMALACIA** (Lat.), n. f.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{(o)}}\text{-ma}^{\text{2l}}\text{(ma}^{\text{2l}}\text{)-a}^{\text{(as)}^{\text{k}}}\text{'-i}^{\text{2-a}^{\text{2}}}$ . From *ταρσός* (see TARSUS), and *μαλακία*, softness. Ger., *Lidknorpelverweichung*. Softening of the palpebral cartilages. [a, 34.]

**TARSO-METATARSAL**, adj.  $\text{Ta}^{\text{rs}}\text{-o-met-a}^{\text{2}}\text{-ta}^{\text{rs}}\text{'s'l}$ . Fr., *tarsometatarsien*. Pertaining to the tarsus and the metatarsus.

**TARSO-METATARSUS** (Lat.), n. m.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{(o)}}\text{-me}^{\text{2t-a}^{\text{2}}}\text{-ta}^{\text{rs}}\text{'-u}^{\text{2s}}\text{(u}^{\text{2s}}\text{)}$ . That bone which reaches from the tibia to the toes in a bird; really nearly all metatarsus, but having at its top one of the small tarsal bones confluent with it, so that in itself it comprehends part of the tarsus as well as all the metatarsus. [L, 343.]

**TARSO-MÉTATARSI-PHALANGIEN DU POUCE** (Fr.), n.  $\text{Ta}^{\text{rs}}\text{-so-ma-ta}^{\text{2}}\text{-ta}^{\text{2}}\text{-se-fa}^{\text{2}}\text{-la}^{\text{2n}}\text{-zhe-a}^{\text{2n}}\text{' du}^{\text{2}}\text{ pus}$ . See ADDUCTOR hallucis.

**TARSOPHYMA** (Lat.), n. n.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{(o)}}\text{-fīm(fu}^{\text{2m}}\text{)-a}^{\text{2}}$ . From *ταρσός*, the tarsus, and *φύμα*, a growth. Fr., *tarsophymie*. 1. A swelling of the ankle. 2. A swelling of the tarsal cartilages. [L, 50 (a, 14).]

**TARSO-PRÆPHALANGIUS** (Lat.), n. m.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{(o)}}\text{-pre-(pra}^{\text{2}}\text{-e}^{\text{2}}\text{)-fa}^{\text{2l}}\text{(fa}^{\text{2l}}\text{)-a}^{\text{2n}}\text{(a}^{\text{2n}}\text{)-i}^{\text{2e}}\text{(ge}^{\text{2}}\text{)-u}^{\text{2s}}\text{(u}^{\text{2s}}\text{)}$ . From *ταρσός*, the tarsus, *præ*, before, and *phalanx* (q. v.). A small muscle in solipeds arising from the extensor tendons and attached to the lower end of the os calcis. It aids in extending the digits and keeping the tendons tense. [L, 13.]

**TARSORRHAPHY**, n.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{2r}}\text{'ra}^{\text{2f}}\text{-i}^{\text{2}}$ . From *ταρσός*, the tarsus, and *ρᾶφή*, a seam. Fr., *tarsorrhaphie*. Ger., *Tarsorrhaphie*. Any operation for shortening and narrowing the palpebral fissure. [F.]

**TARSO-SOUS-PHALANGIEN** (Fr.), n.  $\text{Ta}^{\text{rs}}\text{-so-su-fa}^{\text{2}}\text{-la}^{\text{2n}}\text{-zhe-a}^{\text{2n}}\text{'}$ . A flexor muscle extending from the tarsus to the lower surface of the phalanx of a toe. [a, 48].—**T.-s.-p. du gros orteil**. See FLEXOR hallucis brevis.—**T.-s.-p. du petit orteil**. See FLEXOR digiti minimi pedis brevis.

**TARSOTOMY**, n.  $\text{Ta}^{\text{rs}}\text{-o}^{\text{2t}}\text{'om-i}^{\text{2}}$ . From *ταρσός*, the tarsus, and *τομή*, a cutting. Fr., *tarsotomie*. Ger., *Tarsotomie*. 1. A cutting operation on the tarsus of the foot. 2. The removal of a portion or the whole of the tarsal cartilage. [F.]—**Anterior t.** Of Poinset, t. (1st def.) in which the anterior row of tarsal bones is removed. [a, 34].—**Cuneiform t.** Excision of a wedge-shaped piece of bone, which may include portions of any of the tarsal bones. [a, 34].—**Posterior t.** T. in which the posterior row of tarsal bones, including the astragalus, is excised. [a, 34].—**Subcutaneous linear t.** Of Reeves, t. (1st def.) without injury to the tendons, vessels, or nerves by means of a chisel introduced through a small incision on the dorsum of the foot. [a, 34.]

**TARSUS** (Lat.), n. m.  $\text{Ta}^{\text{rs}}\text{'u}^{\text{2s}}\text{(u}^{\text{2s}}\text{)}$ . Gr., *ταρσός* (lit., any broad, flat surface). Fr., *tarse*. Ger., *T.*, *Fusswurzel* (1st def.). 1. The bony structure constituting the greater part of the arch of the foot, consisting of the os calcis, the astragalus, the scaphoid bone, the cuboid bone, and the three cuneiform bones. 2. In birds, see TARSOMETATARSUS. 3. The so-called cartilage of the eyelid (tarsal cartilage), which forms the skeleton or support of the lid. It is properly only dense connective tissue, interspersed with numerous elliptical nuclei. The one in the upper lid is much thicker, broader, and denser than that in the lower lid. Its shape is crescentic, with the ciliary border sharply cut off. The tarsi become thinned toward the orbital margin, and finally merge in a fascia, which is firmly attached to the orbital margin. The tarsus contains the Meibomian glands. [F.]—**T. palpebralis**. See T. (3d def.).

**TARTAR**, n.  $\text{Ta}^{\text{2r}}\text{'tr}$ . Lat., *tartarum*, *tartarus* (connected in some obscure way with *Τάρταρος*, Hades). Fr., *tartre*. Ger., *Weinstein* (1st def.). Sp., *tártaro*, *rasuras del vino* (1st def.). 1. A substance deposited as a whitish or reddish crystalline crust on the sides of wine-casks, consisting of a mixture of acid and normal tartrates, especially those of potassium and calcium. [B, 95 (a, 38).] 2. See SORDES (1st def.).—**Acid of t.** Tartaric acid. [B, (a, 38).]—**Ammoniated soluble t.** Potassium and ammonium tartrate. [B.]—**Cream of t.** Lat., *cremor tartari*. Fr., *crème de tartre*. Ger., *Weinsteinrahm*. Commercial acid tartrate of potassium, usually containing more or less calcium tartrate; so called because when it is mixed with water a fine creamy film of minute crystals floats on the top. [B, 5, 8].—**Crude t.** See T. (1st def.).—**Crystals of t.** Cream of t., especially as obtained in the crystalline form. [B.]—**Emetic t.** See ANTIMONY and potassium tartrate.—**Ointment of t. emetic.** See UNGUENTUM ANTIMONII tartarati.—**Red t.** The reddish t. deposited from red wine. [B, 5].—**Salt of t.** Potassium carbonate obtained by decomposing cream of t. [B.]—**Soluble (cream of t.)**. See TARTARUS boraxatus.—**Stibiated t., T. emetic.** See ANTIMONY and potassium tartrate.—**T. emetic substitute.** See ANTIMONY and potassium oxalate.—**Tartrated t.** See TARTARUS tartarisatus.—**Vitriolated t.** Potassium sulphate. [B, 91].—**White t.** Crude t. deposited from white wine and having a dirty-whitish color. [B, 5.]

**TARTAREOUS**, adj.  $\text{Ta}^{\text{2r}}\text{-ar}^{\text{e2-u}^{\text{2s}}}$ . Lat., *tartareus*. Ger., *weinsteinartig*. Having a rough, tartar-like surface. [a, 35.]

**TARTARIC**, adj.  $\text{Ta}^{\text{2r}}\text{-ta}^{\text{2r}}\text{'i}^{\text{2k}}$ . Lat., *tartaricus*. Fr., *tartrique*. Derived from or contained in tartar. [B.]—**T. acid.** Lat., *acidum tartaricum* (seu *tartricum* [Fr. Cod.]), *sal essentielle tartari*. Fr., *acide tartrique*, *acide du tartre*. Ger., *Weinsäure*, *Weinsteinsäure*. A dibasic acid,  $\text{C}_4\text{H}_6\text{O}_6 = \text{C}_2\text{H}_2(\text{OH})_2\text{CO}_2\text{OH}$ . In chemical structure t. acid is both a dibasic acid and a dihydric alcohol, and so contains four atoms of replaceable hydrogen, all of which are replaceable by metals and two by acid radicles. Four isomeric varieties are known: (1) *dextrotartaric acid*, ordinary t. acid (Lat., *acidum tartaricum* [U. S. Ph.]; Fr., *acide dextroracé-*

*mique*; Ger., *Rechtswinsäure*), a body forming large prismatic crystals of acidulous taste, readily soluble in water, the solution having a specific dextrorotatory power of  $9.6^\circ$ ; (2) *levotartaric acid*, *antitartaric acid* (Fr., *acide antitartrique*; Ger., *Anteinsäure*), a body forming rhombic crystals which have in general the same properties as ordinary t. acid, but in solution have a specific levorotatory power of  $9.6^\circ$ ; (3) *mesotartaric acid*, *optically inactive t. acid* (Ger., *Mesowinsäure*), a body forming crystals resembling those of ordinary tartaric acid, but having in solution no effect upon the plane of polarization; (4) *metatartaric acid* (Ger., *Metaeinsäure*), an amorphous substance produced by heating ordinary t. acid to  $170^\circ\text{C}$ . A mixture of dextrotartaric and levotartaric acids constitutes *racemic acid*, also called *paratartaric acid*. [B, 4, 5.]—**T. anhydride.** Ger., *Weinsäureanhydrid*. A white or yellowish powder,  $\text{C}_4\text{H}_6\text{O}_5$ , isomeric with tartrellic acid. [B, 3 (a, 38).]—**(Test-) solution of t. acid.** A solution of t. acid in 5 parts [U. S. Ph.] (4 parts [Ger. Ph.]) of water or in 8 of water and 2 of alcohol [Br. Ph.]. [B, 81 (a, 38).]

**TARTARICUS** (Lat.), adj.  $\text{Ta}^{\text{2r}}\text{-a}^{\text{2r}}\text{(a}^{\text{2r}}\text{)-i}^{\text{2k-u}^{\text{2s}}}\text{(u}^{\text{2s}}\text{)}$ . Tartaric; with the name of a base, the tartrate of that base. [B.]

**TARTABIMÉTRIE** (Fr.), n.  $\text{Ta}^{\text{2r}}\text{-ta}^{\text{2r}}\text{-e-ma-tre}$ . Analysis by means of potassium carbonate obtained by calcination of cream of tartar. [a, 14.]

**TARTARIZED**, adj.  $\text{Ta}^{\text{2r}}\text{'tr-izd}$ . Lat., *tartaratus*, *tartarisatus*. Containing tartar or tartaric acid.

**TARTAROUS ACID**, n.  $\text{Ta}^{\text{2r}}\text{'tr-u}^{\text{2s}}$ . Tartaric acid. [B.]

**TARTARUM** (Lat.), n. n.  $\text{Ta}^{\text{2r}}\text{'tr-a}^{\text{2r}}\text{(a}^{\text{2r}}\text{)-u}^{\text{2m}}\text{(u}^{\text{2m}}\text{)}$ . A term originally applied to tartar; now supplanted by *tartarus*. [B.]—**T. antimoniale**, **T. antimoniatum**, **T. emeticum**. See ANTIMONY and potassium tartrate.

**TARTARUS** (Lat.), n. m.  $\text{Ta}^{\text{2r}}\text{'tr-a}^{\text{2r}}\text{(a}^{\text{2r}}\text{)-u}^{\text{2s}}\text{(u}^{\text{2s}}\text{)}$ . See TARTAR.—**Alcali tartari**. An old term for potassium tartrate and for purified potassium carbonate. [a, 38].—**Arcanum tartari**. See T. regeneratus.—**Cremor tartari**. See Cream of TARTAR.—**Cremor tartari solubilis**. See T. boraxatus.—**Crystalli tartari**. See Crystals of TARTAR.—**Decoctum crystallorum tartari**, **Decoctum tartari citratum**. See *Solutio tartari depurati*.—**Emplastrum tartari stibiati**. A plaster consisting of 2 parts of antimony and potassium tartrate and 14 of emplastrum resine pini [Russ. Ph.]; or of 14 parts of the tartrate, 6 of olive-oil, and 80 of Burgundy-pitch plaster [Belg. Ph.]. [B, 95 (a, 38).]—**Globuli tartari ferruginosi** (seu *martialis*). See *Martial balls*.—**Liquor salis tartari**. The liquor kali carbonici of the Ger. Ph. [B, 10].—**Liquor tartari empyreumaticus**. See *Liquor pyrotartaricus*.—**Liquor tartari solubilis chalybeati**. Fr., *eau de boue*, *eau martiale*. A preparation made by dissolving 1 part of iron and potassium tartrate in 2 parts of water [Brunsv. Ph., 1777] (in 1,000 parts of water [Fr. Milit. Hosp. Ph., 1839]).—**Liquor tartari stibiati**. See *Liquor ANTIMONII tartarisati*.—**Liquor terre foliatæ tartari**. The liquor kali acetic of the Ger. Ph. [B.]—**Lotio tartari stibiati**. A solution of 4 parts of tartar emetic in 360 of boiling water, with the addition of 15 of camphorated brandy. [B, 119 (a, 38).]—**Oleum tartari per deliquium**. The oily liquid formed by the deliquescence of potassium carbonate in moist air; also a solution of potassium carbonate in 2 parts of water, corresponding to the liquor kali carbonici of the Ger. Ph. [B.]—**Pulvis tartari compositus**. 1. Of the Swed. Ph., see *Pulvis dentifricus ruber*. 2. A mixture of 15 parts of cream of tartar with 7 of potassium sulphate. [B, 95, 119 (a, 38).]—**Sal essentielle tartari**. Tartaric acid. [B.]—**Sal tartari**. Normal potassium carbonate. [B.]—**Sal tartari essentielle** (seu *essentials*). Tartaric acid. [B, 97].—**Solutio tartari depurati**. Fr., *hydrolé tartrique*. Solution of supertartrate of potassium: a preparation consisting of 11 parts of cream of tartar, 960 of warm water, and 60 of raspberry syrup; or of 15 of cream of tartar, 36 of warm water, and 30 of raspberry syrup; or made by boiling 30 parts of cream of tartar with 600 of water till reduced to 450, and adding 15 of lemon-juice. [B, 119 (a, 38).]—**Spiritus tartari**. Pyrotartaric acid obtained by the distillation of tartar. [B, 97].—**Spiritus tartari vitriolatus**. A preparation made by treating 3 parts of cream of tartar with 8 of calcined iron sulphate, and distilling over the sand bath. [B, 119 (a, 38).]—**T. acetosus**. Potassium tartrate. [B, 119 (a, 38).]—**T. acidus lapillatus**. Potassium bitartrate. [L, 53].—**T. ammoniacalis**, **T. ammoniatus**. See POTASSIUM and ammonium tartrate.—**T. antimonialis**. Antimony and potassium tartrate. [B.]—**T. boraxatus**. Fr., *tartrate borico-potassique*. Ger., *Natriumkaliumtartrat*, *Boraxweinstein*. Sp., *tartrato bórico-potásico*. A preparation made by dissolving 2 parts of borax and 4 [Dan. Ph., Swiss Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (5 [Ger. Ph., Finn. Ph., Russ. Ph.], 6 [Gr. Ph.], 8 [Belg. Ph., Fr. Cod., Sp. Ph.]) of acid potassium tartrate in 20 parts of water (16 [Dan. Ph., Russ. Ph.]), filtering, drying or evaporating, and sometimes powdering. [B, 95 (a, 38).]—**T. chalybeatus**. See IRON and potassium tartrate.—**T. crudus**. See TARTAR (1st def.).—**T. depuratus**. Acid potassium tartrate. [B.]—**T. depuratus pulveratus**. Cream of tartar powdered and sifted through a No. 1 hair sieve [Fr. Cod.] (a 1,600-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]—**T. emeticus**. See ANTIMONY and potassium tartrate.—**T. ferratus**. 1. Of the Ger. Ph., 1st ed., crude iron and potassium tartrate. [B, 95 (a, 38).] 2. Of the Swiss Ph., see IRON and potassium tartrate.—**T. ferruginosus**, **T. martialis**, **T. martiatus**. See IRON and potassium tartrate.—**T. mercurialis**. See MERCURY tartrate.—**T. natronatus**. See POTASSIUM and sodium tartrate.—**T. regeneratus**. Potassium acetate; so called because prepared by the ignition of cream of tartar. [B, 3.]—**T. solubilis**. See T. boraxatus.—**T. solubilis ammoniacalis**. See POTASSIUM and ammonium tartrate.—**T. stibiatus**. See ANTIMONY and potassium tartrate.—**T. tartarisatus**. Tartrated tartar; normal potassium tartrate. [B.]—**T. vitriolatus**. Vitriolated tartar, normal potassium sulphate: first prepared by treating tartar, or acid potassium tartrate, with sulphuric (vitriolic) acid. [B.]—**T.**

**vitriolatus depuratus.** Purified potassium sulphate. [B.]—**Tinctura (salis) tartari.** See *Tinctura ANTIMONII aurata*.—**Tinctura tartari composita.** A preparation made by distilling 4,320 parts of tartar, 1,620 of guaiac-wood, and 540 each of sassafras, sarsaparilla, and china-root, separating the liquid from the oil swimming on the surface, digesting in it 180 parts of cream of tartar, 240 of guaiac-wood, 45 each of sassafras-wood, ash-wood, and sarsaparilla, 75 of china-root, 30 of red sandal-wood, and 11 of sulphuric acid, and straining after some days. [B. 119 (a, 38).]—**Unguentum tartari emetici (seu stibiiati).** See *Unguentum ANTIMONII tartarati*.

**TARTAUFE (Fr.), n.**  $\text{Ta}^3\text{r}$ -tof. See *SOLANUM tuberosum (esculentum)*.

**TARTRALIC ACID, n.**  $\text{Ta}^3\text{r}$ -tra<sup>1</sup>/i<sup>2</sup>k. Fr., *acide tartralique*. Ditartronic acid,  $\text{C}_8\text{H}_8\text{O}_{11}$ . [B. 3 (a, 38).]

**TARTRAMIC ACID, n.**  $\text{Ta}^3\text{r}$ -tra<sup>2</sup>m/i<sup>2</sup>k. A monobasic acid,  $\text{C}_4\text{H}_7\text{NO}_5$ . [B. 33 (a, 14).]

**TARTRAMIDE, n.**  $\text{Ta}^3\text{r}$ /tra<sup>2</sup>m-i<sup>2</sup>d(id). Fr., t. Ger., *Tartramid*. A body,  $\text{C}_4\text{H}_5(\text{OH})_2\text{CO.NH}_2 = \text{C}_4\text{H}_5\text{H}_4\text{N}_2$ , forming rhombic crystals. [B. 4, 93.]

**TARTRAS (Lat.), n. f.**  $\text{Ta}^3\text{r}$ /tra<sup>2</sup>s(ra)s. Gen., -rat'is. See *TARTRATE*.—**Pulvis tartaratis stibicopotassici** [Fr. Cod.]. Antimony and potassium tartrate pounded in a porcelain mortar and reduced completely to powder on a hard slab. [B. 113 (a, 38).]—**Solutio tartaratis kalici** [Dan. Ph.]. A filtered solution of 1 part of potassium tartrate in 2 parts of distilled water. [B. 95.]—**Syrupus tartaratis ferri et potassae.** See *Sirope de TARTRATE ferro-potassique*.—**T. antimonico-potassicus.** See *ANTIMONY and potassium tartrate*.—**T. bikalicus, T. bipotassicus.** Normal potassium tartrate. [B.]—**T. borico-potassicus.** See *TARTARUS boraxatus*.—**T. ferrico-ammonicus.** See *IRON and ammonium tartrate*.—**T. ferricokalicus, T. ferro-potassicus.** See *IRON and potassium tartrate*.—**T. ferrosferro-kalicus.** Crude iron and potassium tartrate. [B. 95 (a, 38).]—**T. kalico-ammonicus.** See *POTASSIUM and ammonium tartrate*.—**T. kaliconatrics.** Potassium and sodium tartrate. [B. 95 (a, 38).]—**T. kalico-stibiatibis, T. kalicostibicus.** Antimony and potassium tartrate. [B. 95, 119.]—**T. kalicus.** See *POTASSIUM tartrate*.—**T. kalicus acidus.** Acid potassium tartrate. [a, 38].—**T. natricokalicus.** See *POTASSIUM and sodium tartrate*.—**T. potassicosodius.** Potassium and sodium tartrate. [B.]—**T. potassicosodius.** Potassium and sodium tartrate. [B.]—**T. potassicus.** See *POTASSIUM tartrate*.—**T. sodico-potassicus.** See *POTASSIUM and sodium tartrate*.—**T. stibicokalicus, T. stibicopotassicus.** Antimony and potassium tartrate. [B. 95 (a, 38).]—**Tinctura tartaratis ferropotassici** [Belg. Ph.]. A preparation made by stirring 2 parts of iron filings and 5 of cream of tartar into a pap with water, allowing to digest, boiling for two hours with 15 parts of water, the amount of water which is thus evaporated being replaced, decanting the clear part of the liquid when cold, evaporating to a sp. gr. of 1.26, adding 1 part of 92-per-cent. alcohol, and, after some days, filtering. [B. 95 (a, 38).]—**Unguentum tartaratis kalico-stibii (seu stibicokalic).** See *Unguentum ANTIMONII tartarati*.—**Vinum tartaratis kalicoferri.** Sp., *vino de tartrato ferro-potassico*. A preparation made by stirring 1 part of powdered iron and 4 parts of cream of tartar into a pap with water, evaporating almost to dryness, repeating the operation on the residue with more water until it becomes black, homogeneous, and almost wholly soluble in water, macerating with 40 parts of water, filtering, evaporating to dryness, powdering, adding 10 times as much white wine, and, after some days, filtering [Netherl. Ph.]; or by dissolving 12 parts of purified iron and potassium tartrate in 900 of stronger white wine [Sp. Ph.]. [B. 95 (a, 38).]—**Vinum tartaratis stibicokalic.** See *Vinum ANTIMONII*.

**TARTRATE, n.**  $\text{Ta}^3\text{r}$ /rat. Lat., *tartras*. Fr., t. Ger., *Tartrat. weinsaures Salz*. A salt of tartaric acid. Three classes of t's are known: (1) *neutral t's*, in which both the replaceable hydrogen atoms of the acid constituent are replaced by a metal; (2) *acid t's*, in which one of those atoms is so replaced; and (3) *basic t's*, in which the hydrogen of the alcoholic hydroxyl as well as that of the acid constituent is replaced. Tartaric emetic is a basic t. [B.]—**Potassice antimonyle t.** Antimony and potassium t. [B. 159.]—**Poudre de t. borico-potassique** [Fr. Cod.] (Fr.). Tartarus boraxatus powdered and sifted through a No. 1 hair sieve. [B. 113 (a, 38).]—**Sirope de t. ferro-potassique (Fr.).** Lat., *syrupus tartaratis ferri et potassae*. Sp., *jarabe de tartrato ferro-potassico*. A preparation containing 1 part each of iron and potassium tartrate and water (cinnamon water [Belg. Ph.]) and 38 parts of syrup [Fr. Cod., Belg. Ph.]; or 3 parts of the tartrate dissolved in water and 200 of syrup [Sp. Ph.]. [B. 95 (a, 38).]—**T. antimonico-potassique (Fr.).** Antimony and potassium t. [B. 119.]—**T. borico-potassique (Fr.).** See *TARTARUS boraxatus*.—**T. drolit (Fr.).** A t. derived from dextrotartaric (ordinary tartaric) acid. [B.]—**T. ferrico-ammonique** [Fr. Cod.] (Fr.). Iron and ammonium t. [B.]—**T. ferrico-potassique** [Fr. Cod.] (Fr.). **T. ferrosopotassique (Fr.).** See *IRON and potassium t.*—**T. mercuricus (Fr.).** See *MERCURY t.*—**T. potassico-ammonique (Fr.).** See *POTASSIUM and ammonium t.*—**T. potassico-sodique (Fr.).** See *POTASSIUM and sodium t.*—**Test solution of potassice-cupric t.** [U. S. Ph.]. A preparation made by slowly adding a solution of 6.93 grammes of selected crystals of copper sulphate in 20 c. c. of water to a solution of 36 grammes of potassium t. in 140 c. c. of solution of soda, and bringing up to 300 c. c. with solution of soda. [B. 5 (a, 38).]

**TARTIE (Fr.), n.**  $\text{Ta}^3\text{r}$ tr'. See *TARTAR*.—**Acide du t.** See *TARTARIC ACID*.—**Sel de t.** See *POTASSIUM carbonate*.—**Solution de crème de t.** See *Solutio TARTARI depurati*.—**T. antimonie.** Antimony and potassium tartrate. [B. 119.]—**T. méphitique.** See *POTASSIUM carbonate*.—**T. stygié.** Of Patin, a sarcastic name for tartar emetic. [B.]

**TARTRELIC ACID, n.**  $\text{Ta}^3\text{r}$ -tre<sup>2</sup>/i<sup>2</sup>k. Fr., *acide tartrélique*. Gr., *Tartrelsäure*. A substance,  $\text{C}_8\text{H}_8\text{O}_{10}$ , isomeric with tartaric anhydride, occurring as deliquescent crystals. [B. 3 (a, 38).]

**TARTROMEL, n.**  $\text{Ta}^3\text{r}$ /ro-me<sup>2</sup>l. A solution of tartaric acid in honey slightly diluted with water. [B. 14.]

**TARTROMETHYLIC ACID, n.**  $\text{Ta}^3\text{r}$ -ro-me<sup>2</sup>th-i<sup>2</sup>/i<sup>2</sup>k. See *METHYL tartaric acid*.

**TARTRONIC ACID, n.**  $\text{Ta}^3\text{r}$ -tro<sup>2</sup>n/i<sup>2</sup>k. Fr., *acide tartronique*. Ger., *Tartronsäure*. A dibasic crystalline acid,  $\text{C}_8\text{H}_8\text{O}_8 = \text{CH}(\text{OH})\text{CO.OH}$ , forming large transparent crystals. [B. 4.]

**TARTRONYL, n.**  $\text{Ta}^3\text{r}$ /tro<sup>2</sup>n-i<sup>2</sup>l. The bivalent radicle of tartroic acid,  $\text{CH}(\text{OH})\text{CO}$ . [B.]—**T'urea.** See *DIALURIC ACID*.

**TARTROPHTHALIC ACID, n.**  $\text{Ta}^3\text{r}$ -ro-tha<sup>2</sup>/i<sup>2</sup>k. Fr., *acide tartrorhthalique*. Ger., *Tartrophthalsäure*. An acid,  $\text{C}_8\text{H}_8\text{O}_8 = \text{C}_6\text{H}_5(\text{OH})_2(\text{CO.OH})_2$ , occurring as colorless prismatic crystals containing two molecules of water. [B. 3 (a, 38).]

**TARTROVINIC ACID, n.**  $\text{Ta}^3\text{r}$ -ro-vin<sup>2</sup>/i<sup>2</sup>k. Fr., *acide tartrovinique*. Ger., *Tartroveinsäure*. See *ETHYL tartaric acid*.

**TARTUFLE (Fr.), n.**  $\text{Ta}^3\text{r}$ -tu<sup>2</sup>-fl'. See *SOLANUM tuberosum (esculentum)*.

**TASCHE (Ger.), n.**  $\text{Ta}^3\text{sh}$ /e<sup>2</sup>. 1. A pocket. [a, 14.] 2. See *SINTS*.—**Bauchfell't'n.** See *RECESSUS peritonæi*.—**Duodenalt'.** See *Duodeno-jejunal fossa*.—**Haart'.** See *Hair* rough and *Hair-follicle*.—**Hypophysent'.** 1. The depression in the primitive brain which becomes the vesicle of the hypophysis cerebri. [I, 17 (K).] 2. See *Pituitary DIVERTICULUM*. 3. See *INFUNDIBULUM* (2d def.).—**Kehlkopft'.** **Morgagni'sche t.** See *VENTRICLE of the larynx*.—**T'nförmig.** Purse-like, pouch-like. [L, 31.]

**TÄSCHELKRAUT (Ger.), n.**  $\text{Tash}$ /e<sup>2</sup>l-kra<sup>2</sup>-u<sup>2</sup>t. The genus *Capsella*, especially *Capsella bursa pastoris*. [a, 35.]

**TASIS (Lat.), n. f.**  $\text{Tas}$ (ta)s/i<sup>2</sup>s. Gen., *tas'eos, tas'is*. Gr., *τάσις* (from *τείνειν*, to stretch). See *EXTENSION*.

**TASMANNIA (Lat.), n. f.**  $\text{Ta}^3\text{s}$ -ma<sup>2</sup>n/i<sup>2</sup>a<sup>2</sup>. Fr., *tasmanie*. A genus of the *Magnoliaceæ* included by Bentham and Hooker in *Drimys*. [a, 35.]—**T. aromatica.** The pepper-tree of Tasmania, where the berry-like fruits are used in place of pepper and the leaves as an aromatic. The aromatic bark resembles Winter's bark, and is used like it. [a, 35.]

**TASSENFORMIG (Ger.), adj.**  $\text{Ta}^3\text{s}$ /se<sup>2</sup>n-fu<sup>2</sup>rm-i<sup>2</sup>g. Disc-shaped. [a, 35.]

**TASTBALLEN (Ger.), n. pl.**  $\text{Ta}^3\text{st}$ /ba<sup>2</sup>l-le<sup>2</sup>n. See *PELOTES tactiles*.

**TASTE, n.**  $\text{Tast}$ . Gr., *γεῦσις*. Lat., *gustus*. Fr., *goût*. Ger., *Geschmack*. The sensation of flavor due to the action of certain exciting substances upon special nerve-endings in the tongue. [K.]—**After-t.** Fr., *après-goût*. Ger., *Nachgeschmack*. A t. perceived after the direct action of the sapid substance has ceased. [K, 3.]—**T-beakers, T-buds, T. bulbs, T. cups.** See *T-buds*.—**T-discs.** Ger., *Geschmackscheiben*. Patches of modified epithelia on the tongues of *Amphibia*. They are usually surrounded by a narrow girdle of ciliated cells, and are abundantly supplied with nerves from the glossopharyngeus. The epithelium is of two kinds: supporting cells, called *cup-cells*, and the true sensorial cells (forked-cells), which are supposed to be connected with nerve-fibres. [J, 30, 35.]—**T-pore.** The narrow end or summit of a t-bud seen on a free surface, usually on the side of a fungiform or foliate papilla. [J, 31, 35.]—**T-ridges.** See *PAPILLÆ foliatae*.

**TASTERZIRKEL (Ger.), n.**  $\text{Ta}^3\text{st}$ /e<sup>2</sup>r-tserk-e<sup>2</sup>l. See *CALIPERS*.

**TASTGEFÜHL (Ger.), n.**  $\text{Ta}^3\text{st}$ /ge<sup>2</sup>-fu<sup>2</sup>l. See *TOUCH*.

**TASTMENISKEN (Ger.), n. pl.**  $\text{Ta}^3\text{st}$ /man-esk-e<sup>2</sup>n. See *Tactile MENISCI*.

**TASTPAPILLEN (Ger.), n. pl.**  $\text{Ta}^3\text{st}$ /pa<sup>2</sup>p-el-le<sup>2</sup>n. See *Nerve PAPILLÆ and Tactile CORPUSCLES*.

**TASTSINN (Ger.), n.**  $\text{Ta}^3\text{st}$ /zi<sup>2</sup>n. The sense of touch.

**TASTUNG (Ger.), n.**  $\text{Ta}^3\text{st}$ /un<sup>2</sup>. Examination with the finger.

**TATAEIWEISS (Ger.), n.**  $\text{Ta}^3$ /ta<sup>2</sup>-i-vis. See under *Egg ALBUMIN*.

**TATENHAUSEN (Ger.), n.**  $\text{Ta}^3\text{t}$ /e<sup>2</sup>n-ha<sup>2</sup>-u<sup>2</sup>z-e<sup>2</sup>n. A place in Westphalia where there is a chalybeate spring. [L, 135 (a, 14).]

**TATOOING, TATTOOING, n's.**  $\text{Ta}^3\text{t}$ -u<sup>2</sup>/i<sup>2</sup>n<sup>2</sup>. Fr., *tatouage*. Ger., *Tatowierung*. The process of introducing particles of coloring matter into the skin, by punctures or incisions, so as to produce indelible stains. [G, 30.]—**T. of the cornea.** Artificial pigmentation of the cornea (usually with India-ink) for the removal of the cosmetic defect produced by a dense leucoma: done either with several very fine needles bound together or with a single grooved needle. [E.]

**TATZMANNSDORF (Ger.), n.**  $\text{Ta}^3\text{ts}$ /ma<sup>2</sup>n-z-do<sup>2</sup>rf. A place in Elsenburg County, Hungary, where there is a chalybeate spring.

**TAUBENKROPP (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-e<sup>2</sup>n-kro<sup>2</sup>pf. See *SILENE inflata*.—**Ackert'.** See *SILENE otites*.

**TAUBENNEST (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-e<sup>2</sup>n-ne<sup>2</sup>st. See *NIDUS* (4th def.).

**TAUBENWEIZEN (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-e<sup>2</sup>n-vits-e<sup>2</sup>n. See *SEDEM album*.

**TAUBHEIT (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-hit. See *DEAFNESS*.—**Seeleut'.** See *Psychical DEAFNESS*.

**TAUBSTUMMER (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-stum-me<sup>2</sup>r. See *DEAF-MUTE*.

**TAUBSTUMMHEIT (Ger.), n.**  $\text{Ta}^3$ /u<sup>2</sup>b-stum-hit. See *DEAF-mutism*.

**TAUMEL** (Ger.), n.  $Ta^3u^4m-e^2l$ . See REELING.—T'wahn. See DRUNKENNESS.

**TAUPE** (Fr.), n. Top. Any soft tumor of the scalp.

**TAURINE**, n.  $Ta^4r'en$ . Fr., t. Ger., *Taurin*, *Gallenasparagin*. Amidisethionic acid; a substance,  $C_2H_4(NH_2)SO_3H = C_2H_4.NSO_3$ , found in the bile and in various animal tissues. It crystallizes in transparent monoclinic prisms. [B; B, 3 (a, 38).]

**TAUROCARBAMIC ACID**, n.  $Ta^4r-o-ka^3rb-a^2m'^2k$ . A crystalline acid,  $C_2H_5SN_2O_4 = C_2H_4(NH.CO.NH_2)SO_3H$ , occurring in the urine after the administration of taurine. [B, 3.]

**TAUROCHOLIC ACID**, n.  $Ta^4r-o-kol'^2k$ . Fr., *acide taurocholique*. Ger., *Taurocholsäure*. A monobasic and univalent acid,  $C_{26}H_{45}NO_8$ , occurring in bile, forming fine, silky, brilliant and deliquescent needles. [B; B, 93 (a, 14).]

**TAUROCILLA** (Lat.), n. f.  $Ta^4r(ta^3u^4r)-o(o^2)-ko^2l'a^2$ . From *ταῦρος*, a bull, and *κύλλα*, glue. Fr., *taurocolle*. Animal glue, especially that prepared from the ears, etc., of cattle. [L, 50 (a, 14).]

**TAURUS** (Lat.), n. m.  $Ta^4r(ta^3u^4r)-u^2s(u^4s)$ . Gr., *ταῦρος*. Fr., *taureau* (1st def.). Ger., *Stier* (1st def.). 1. A bull. 2. Of Galen, that part of the penis which extends backward of the scrotum, together with the perinæum. [A, 530].—*Oleum pedum tauri*. See *Neat's-foot oil*.

**TAURYLIC ACID**, n.  $Ta^4r-i^2l'^2k$ . See CRESOL.

**TAÜSCHUNG** (Ger.), n. *Toish'un*<sup>2</sup>. See ILLUSION and DELUSION.

**TAUSENDGÜLDENKRAUT** (Ger.), n.  $Ta^3u^4z-e^2nd-gu^2ld-e^2n-kra^3u^4t$ . See ERYTHRAE and ERYTHRAEA *centaurium*.—*T'ex-tract*. See *Extractum CENTAURI*.

**TAVELÉ** (Fr.), adj.  $Ta^3v-l'$ . Spotted. [L, 41 (a, 14).]

**TAVERNIERA** (Lat.), n. f.  $Ta^3v-e^2rn-e^2r'a^2$ . Fr., *taverni-erie*. A genus of the *Leguminosæ*. [a, 35].—*T. nummularia*. East Indian moneywort. The leaves are applied to sloughing ulcers. [a, 35.]

**TAXACEOUS**, adj.  $Ta^2x-a'shu^2s$ . Resembling the genus *Taxus*; belonging to the *Taxaceæ*, which are an order of gymnosperms (yews, etc.), now made a series or tribe of the *Conifereæ*. The *Taxaceæ* (Fr., *taxées*) are: Of Sprengel, the *Taxaceæ*; of Reichenbach, a family of the *Inconspiciuæ*, consisting of the *Casuarineæ*, *Ephedreæ*, *Taxineæ* (*Taxaceæ*), and *Myricæ*. The *Taxideæ*, the *Taxineæ*, and the *Taxineæ* are the *Taxaceæ*. [a, 35.]

**TAXIDERMY**, n.  $Ta^2x-i^2a-du^2rm-i^2p$ . From *τάξις*, arrangement, and *derma*, the skin. The art of preserving and preserving skins so as to represent the appearance of the living animal. [L, 343.]

**TAXINE**, n.  $Ta^2x'en$ . Ger., *Taxin*. A resinous alkaloid obtained from the leaves and berries of *Taxus baccata*. [B, 93 (a, 14).]

**TAXIS** (Lat.), n. f.  $Ta^2x(ta^2x)^2i^2s$ . Gen., *tax'eos* (-is). Gr., *τάξις* (from *τάσσειν*, to arrange). Fr., t. Ger., t. Lit., arrangement; a reduction, especially a methodical pressure by the hand for the purpose of reducing a hernia or other prolapsed structure. [E].—**Bipolar t.** A form of manipulation employed for reducing a retroverted uterus, in which pressure upward is made upon the body of the organ through the rectum, and the cervix is drawn down through the vagina. [A, 59.]

**TAXODIUM** (Lat.), n. n.  $Ta^2x(ta^2x)-od'^2i^2-u^2m(u^4m)$ . From *τάξος*, yew, and *είδος*, resemblance. Fr., *taxodier*. A genus of the *Taxodiaceæ* (a tribe of the *Conifereæ*). [a, 35].—**T. distichum**. Fr., *cyprès chauve* (ou de la Louisiane). Ger., *virginische Cyprresse*. Bald (or black, or deciduous) cypress of the southern United States, Mexico, etc., recommended for destroying malarial germs. The tree yields an essential oil, also a resin which is used as an external stimulant. The leaves are applied to tumors, inflamed surfaces, etc., and, together with the seed, are used internally in hepatic disorders. The bark is applied to burns and ulcers. [a, 35].—**T. mucronatum**. Montezuma cypress; a Mexican species. The bark is emmenagogue and diuretic; the leaves are used in scabies and as a resolvent. A liquid pitch obtained from the wood is used in skin diseases. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 770 (a, 50); a, 35.]

**TAXOLOGY**, n.  $Ta^2x-o^2l'o-i^2j^2$ . From *τάξις*, arrangement, and *λόγος*, understanding. See TAXONOMY.

**TAXONOMIC**, adj.  $Ta^2x-o^2l'o-m'^2i^2k$ . Classificatory. [L, 343.]

**TAXONOMY**, n.  $Ta^2x-o^2n'om-i^2j^2$ . Lat., *taxonomia* (from *τάξις*, arrangement, and *νόμος*, a law). Fr., *taxonomie*. The science of classification; the arrangement of living organisms in groups according to their degrees of likeness. [L, 11.]

**TAXUS** (Lat.), n. f.  $Ta^2x(ta^2x)^2u^2s(u^4s)$ . Gr., *τάξος*. Fr., if. Ger., *Eibe*, *Eibenbaum*. 1. Yew (tree): the typical genus of the *Taxaceæ* (see under TAXACEOUS). [a, 35.] 2. See *T. baccata*.—**T. baccata**. Fr., if (*commun*, ou d'Europe). Ger., *gemeine Eibe*. The common yew of middle and southern Europe and of Asia. The leaves and green branches, formerly official as *folia* (see *summitates taxii* (*baccatæ*), contain taxine and miossion, and (in sufficient quantity) are a deadly poison; they are still used as an emmenagogue, and in India as an expectorant. The red, succulent cups (*baccæ taxii*) containing the seeds are edible, and were formerly used in the preparation of a pectoral syrup. The seeds, however, are highly poisonous, acting like digitalis. The wood and bark (*licium et cortex taxii*), formerly official, are no longer used. [a, 35].—**T. nucifera**. Fr., if *à amande*. A yew of China and Japan with edible fruits, the stones of which yield a nutritious oil. [a, 35.]

**TAYNIA**, n. In Brazil, a cucurbitaceous plant (probably *Bryonia ficifolia*) used as an evacuant under the name of *abopora do matto*. [a, 35.]

**TAYUYA**, n. In Brazil, the *Bryonia ficifolia* and perhaps other plants; also the drastic fruit and the root (t. root) of *Bryonia ficifolia*. The latter is used as an antisyphilitic. [a, 35.]

**TEA**, n. Te. Chin., *cha*. N. Gr., *τῆ, τράα*. Lat., *thea*. Fr., *thé*. Ger., *Thee*. 1. The dried leaves of *Camellia thea* and its varieties, often further aromatized with the flowers or leaves of the rose, jasmine, sweet-scented olive, etc. T. contains a volatile, citron-yellow oil (from 0.6 to 1 per cent, or more, according to the age of the leaf), tannin, from 0.43 to 5 per cent, of theine (combined, according to Mulder, with tannic acid), boheic acid, quercetin, quercitanic, gallic, and oxalic acids, gum, wax, resin, coloring matter, etc. It is astringent (especially if long infused) and gently exhilarating. Its excessive use produces dyspepsia and nervous derangements. It is sometimes used medicinally in diarrhoea and nervous headache, and in China the leaf is used in fevers. [a, 35]. See *Black t.* and *Green t.* 2. An infusion prepared like that of tea. [a, 48].—**Abyssinian t.** The leaves and leafy twigs of *Catha edulis*. [a, 35].—**African t.-plant** (or -tree). See *LYCIUM afrum*.—**Australian t.-plant** (or -tree). 1. See MELALEUCA. 2. A name for various species of *Leptospermum*. [a, 35].—**Bencoolen t. (-plant)**. See *GLAPHYRIA nitida*.—**Black t.** T. of a dark-brown color; prepared from leaves which have been allowed to remain in heaps for some hours and undergo a kind of fermentation, and afterward slowly dried. It is less pungent and fragrant than green t. [a, 35].—**Blankenheim t.** Ger., *Blankenheimer Thee*. A proprietary remedy sold in Europe, the principal ingredients of which were species of *Galeopsis*. [L, 65 (a, 50)].—**Bohea t.** Ger., *Bohithee*. A variety of black t., so called from the Chinese name (*wu-i*) of the mountains in Fuh-keen, where it is cultivated. [a, 35].—**Bush t.** The leaves of *Cyclopia genistoides* and other species of *Cyclopia*. [a, 35].—**Canadian t.** See under *GAULTHERIA procumbens*.—**Carolina t.-plant**. The *Ilex vomitoria*. [a, 35].—**Cochin-China t.-plant**. The *Teucrium thea*. [a, 35].—**Gout-t.** See *CORDIA globosa*.—**Green t.** T. of a dark-green color; prepared from leaves which have undergone no fermentation, and have been so rapidly dried as not to undergo change in their chlorophyll. Its color, however, is often due to an artificial coloring matter, chiefly a mixture of gypsum and Prussian blue, with which it is glazed. It contains more volatile oil and tannin than black t. [a, 35].—**Jersey t.** The genus *Ceanothus*, especially *Ceanothus americanus*. [a, 35].—**Jesuit's t.** 1. The herb of *Chenopodium ambrosioides*. 2. The *Psoralea glandulosa*. [a, 35].—**Labrador t.** A t. made from the leaves of *Ledum latifolium*. [a, 35].—**Marsh t.** See *LEDUM palustre*.—**Mexican t. (-plant)**. See *Jesuit's t.*—**Mountain t.** See *GAULTHERIA procumbens*.—**New Zealand t.-plant**. The *Leptospermum flavescens* and *Leptospermum scoparium*. [a, 35].—**Oswego t.** See *MONARDA didyma*.—**Paraguay t.** See *Ilex paraguayensis*.—**Pectoral t.** See *SPECIES pectorales*.—**Tberry.** The *Gaultheria procumbens*. [a, 35].—**Teamster's t.** See *EPHEDRA antisyphilitica*.—**T. oil.** A fixed oil obtained from the seeds of *Camellia oleifera* and *Camellia japonica*. [a, 35].—**T.-tree.** See *THEA* (2d def.). *THEA assamica*, and *LYCIUM barbarum*.—**Whorehouse t.** See *EPHEDRA antisyphilitica*.

**TEAK**, n. Tek. The *Tectona grandis*; also (in Africa) the *Oldfieldia africana*, (in New Zealand) the *Vitex littoralis*, and (in New South Wales) the *Endiandra glauca*. [a, 35.]

**TEAR**, n. Ter. Gr., *δάκρυ, δάκρυον*. Lat., *lacrima*. Fr., *larme*. Ger., *Thräne*. A drop of the liquid which is secreted by the lacrymal gland and moistens the eyeball. [a, 48.]

**TEASEL**, n. Te'z'l. A plant of the genus *Dipsacus*, also the *Eupatorium perfoliatum*. [a, 35.]

**TEASING**, n. Tez'l<sup>2</sup>n<sup>3</sup>. In microscopy, the process of tearing a specimen into small pieces with needles.

**TEAT**, n. Ti<sup>2</sup>t. A.-S., *tit*. Gr., *θηλά*. Lat., *papilla*. Fr., *trayon, tétine* (*tétin* being applied to rudimentary teats). Ger., *Euterzitze*. See NIPPLE.

**TEAZEL**, n. Te'z'l. See TEASEL.

**TECHNOCAUSIS** (Lat.), n. f.  $Te^2k(te^2ch^2)-no(n^3)-ka^4s'(ka^3u^4s)^2s$ . Gen., *caus'eos* (-is). From *τέχνη*, art, and *καύσις*, a burning. The actual cautery. [L, 50 (a, 14).]

**TECHNOLOGY**, n.  $Te^2k-no^2l'o-i^2j^2$ . From *τέχνη*, art, and *λόγος*, understanding. The science of the industrial arts. [a, 48.]

**TECNOCTONIA** (Lat.), n. f.  $Te^2k-no^2k-ton(to^2n)^2i^2a^2$ . Gr., *τεκνοκτονία* (from *τεκνοκτορέιν*, to murder children). Fr., *tecnoc-tonie*. Ger., *Teknoktonie*. Infanticide. [L, 50 (a, 14).]

**TECNOGONIA** (Lat.), n. f.  $Te^2k-no(n^3)-gon(go^2n)^2i^2a^2$ . Gr., *τεκνογονία* (from *τεκνογονέιν*, to bear children). Fr., *tecnogonie*. See GENERATION (1st def.).

**TECOLITHUS** (Lat.), n. m.  $Te^2k(tak)-o^2l'i^2th-u^2s(u^4s)$ . From *τίκεν*, to melt, and *λίθος*, a stone. Fr., *técolithe*. Ger., *Judenstein*. A fossil calcareous concretion found in sponges; so called because it was supposed to dissolve urinary calculi. [L, 41, 50 (a, 14).]

**TECOMA** (Lat.), n. f.  $Ta-kom'a^2$ . From the Mex. name *Tecomall*. Fr., *técome*. Trumpet-flower (or -creeper); a genus of the *Tecomeæ* (a tribe of the *Bignoniaceæ*). [a, 35].—**T. impetiginosa**. An astringent species. The bark is used in lotions and baths for debility and inflamed joints. [a, 35].—**T. ipé**. A Brazilian species having properties like those of *T. impetiginosa*. The bark is used as an astringent wash and the leaves in ophthalmia. [a, 35].—**T. leucosylon**. Fr., *cèdre blanc des Antilles*. False ebony, white-wood of the West Indies, white-wood cedar. The flowers and root are said to be alexipharmac and to be used especially against the manchineel poison. The wood yields a green dye. [a, 35].—**T. pentaphylla**. Fr., *poirier des îles (ou des Antilles, ou de la Martinique)*. A species found in the Caribbean Islands. The bark is febrifuge. [a, 35].—**T. radicans**. Fr., *jardin de Virginie*. Virginian trumpet-flower, trumpet-creeper; a North American climber, considered poisonous. The leaves and branches are used as dyes. [a, 35].—**T. stans**. Fr., *bois pissenlit*. Shrubby trumpet-flower, yellow elder of the West Indies. The root is reputed diuretic. [a, 35.]

**TECTICUS** (Lat.), adj.  $Te^2kt(takt)/i^2k-u^2s(u^4s)$ . Gr.,  $\tau\eta\kappa\tau\iota\kappa\acute{o}s$  (from  $\tau\eta\kappa\epsilon\upsilon\sigma$ , to melt). Fr., *tectique*. Ger., *schmelzend*. Colligative. [L. 50 (a, 14).]

**TECTOCEPHALIC**, adj.  $Te^2kt-o\ se^2f-a^2l/i^2k$ . From *tectum*, a roof, and  $\kappa\epsilon\phi\alpha\lambda\acute{\iota}$ , the head. Pertaining to or possessing a roof-shaped skull (*crâne en toit*). [a, 54.]

**TECTONA** (Lat.), n. f.  $Te^2kt-on/a^2$ . Fr., *teck*. Ger., *Tekbaum*. A genus of the *Verbenaceae*. [a, 35.]—**T. grandis**, *T. theka*. Fr., *teck élevé*, *bois de tek*, *chêne des Grandes-Indes*. Ger., *riesiger Tekbaum*. East Indian teak-tree (or oak); a tree valued for its hard and durable wood. The acidulous and bitterish leaves are used as an astrigent. The flowers and seeds are diuretic. An aromatic oil obtained from the wood is used medicinally. [a, 35.]

**TECTORIAL**, adj.  $Te^2kt-or/i^2-a^2l$ . From *tectum*, a roof. Roofing, covering. [a, 48.]

**TECTRIX** (Lat.), n. f.  $Te^2kt(takt)/r^2ix$ . Gen., *tec'tricis*. From *tegere*, to cover. Fr., *couverture*. A covert (feather); one of the smaller feathers of either the wing or the tail. [L. 343.]—**Tectrices alae**. The coverts of the wings.—**Tectrices caudae**. Tail-coverts, the small feathers overlapping the bases of the tectrices. [L. 341 (a, 27).]—**Tectrices inferiores**. Under-coverts, the tectrices alae on the lower surface of the wings; also the tail coverts similarly situated. [L. 221.]—**Tectrices majores**. Greater coverts; the outermost row of small feathers, arising mostly from the forearm, which overlie the bases of nearly all the remiges except the first nine or ten. [L. 221.]—**Tectrices mediae**. A short row of small feathers immediately above the tectrices majores. [L. 221.]—**Tectrices minores**. Lesser coverts, the uppermost of the tectrices alae. They are irregularly disposed. [L. 221.]—**Tectrices perversae**. See *Tectrices mediae*.—**Tectrices superiores**. The coverts on the upper surface of the wing; also the tail coverts similarly situated. [L. 221.]—**Upper primary tectrices**. The coverts of the primaries; the feathers growing upon the plicon, which cover the bases of the outer nine or ten remiges. [L. 221.]

**TECTUM** (Lat.), n. n.  $Te^2kt(takt)/u^2m(u^4m)$ . From *tegere*, to cover. A roof or covering. [a, 48.]—**T. fosse rhomboidalis**. The roof of the fourth ventricle. [L. 73 (K).]—**T. ventriculi quarti**. See *VALVE of Vieussens*.

**TECTUS** (Lat.), adj.  $Te^2kt(takt)/u^2s(u^4s)$ . From *tegere*, to cover. Fr., *couvert*. Ger., *bedeckt*. Covered, concealed by other parts or organs. [a, 35.]

**TEEL**, n. In Abyssinia, the *Sesamum orientale*. [a, 35.]—**T.-oil**. Oil of sesamum. [a, 35.]

**TEETHING**, n.  $Teth^2/i^2n^2$ . See *DENTITION* (2d def.).

**TEGENARIA** (Lat.), n. f.  $Te^2g-e^2n-a^2r/i^2-a^2$ . Fr., *tégénnaire*. Ger., *Hausspinne*. A genus of the *Araneida*; the house-spiders. [a, 35.]—**T. domestica**. The common European house-spider. This and the larger species, *T. scalaria*, and their web are official as *araneae et tela araneorum*, and were formerly used as a febrifuge (see also *Tela araneae*). [a, 35.]—**T. medicinalis**. 1. An American species used like *T. domestica*. [a, 35.] 2. See *CANTHARIS vesicatoria*.

**TEGMEN** (Lat.), n. n.  $Te^2g-me^2n$ . Gen., *teg'minis*. From *tegere*, to cover. Ger., *Decke*. 1. Any covering or integument, especially the inner coat of an ovule or seed; of De Beauvois, the glume of grasses; a perule or bud-scale; an amphigastrium. [a, 35.]—**T. caudicis cerebri**. See *TEGMENTUM*.—**T. mastoideum**. The lower hollow part of the tympani covering the mastoid antrum. [L. 57 (a, 14).]—**T. secundinale**. Of Avernhoes, the pia. [I, 3 (K).]—**T. tympani**. Ger., *Paukendecke*. The superior wall or roof of the tympanic cavity, formed by an osseous plate continuous with the superior surface of the pyramid. This plate extends beyond the boundaries of the tympanic cavity, forming part of the superior lamella of the osseous meatus, of the upper wall of the cells of the mastoid process, of the roof of the canal for the tensor tympani, and of the osseous portion of the Eustachian tube. It is pierced by several apertures, and may be in great part wanting. [F. 32.]—**T. ventriculorum**. See *CENTRUM ovale majus*.

**TEGMENT** [Wilder], n.  $Te^2g-m^2nt$ . See *TEGMENTUM*.

**TEGMENTUM** (Lat.), n. n.  $Te^2g-me^2nt/u^2m(u^4m)$ . From *tegere*, to cover. Fr., *tegument*, *coiffe*, *calotte*. Ger., *Haube*, *Deckplatte*. 1. The dorsal portion of the crus cerebri, made up of longitudinal bundles of white nerve-fibres interlaced with numerous transverse and arching fibres. In the interstices are collections of gray matter containing ganglion-cells (see *NUCLEUS of the t.*). Certain tracts of fibres in the t. have received distinct names (see *Posterior longitudinal fasciculus and Arcuate fibres*). The t. may be regarded as the prolongation upward of the reticular formation. To one side of it lies the lemniscus. [I, 6 (K).] 2. See *TEGMEN*.—**T. auris**. See *MEMBRANA tympani*.—**T. caudicis**, **T. cerebri**, **T. cruris (cerebri)**. See *T. (1st def.)*.—**T. tympani**. See *TEGMEN tympani*.—**T. ventriculi lateralis (seu ventriculorum cerebri)**. See *CENTRUM ovale*.

**TEGMINATE**, adj.  $Te^2g-m^2n-at$ . Lat., *teginatus* (from *tegen*, a cover). Fr., *tepinus*. Having an inner coat (tegen).

**TEGMENT**, n.  $Te^2g-u^2-m^2nt$ . Lat., *tegumentum* (from *tegere*, to cover). Fr., *tegument*. See *INTEGUMENT*.

**TEGUMENT** (Fr.), n.  $Ta-gu^2-ma^2n^2$ . See *INTEGUMENT*.—**T. externe**. The skin. [A, 395.]—**T. interne**. See *MUCOUS MEMBRANE*.

**TEGUMENTAL**, **TEGUMENTARY**, adj's.  $Te^2g-u^2-me^2n^2/u^2l$ ,  $-me^2nt^2-e^2-r^2$ . Pertaining to, connected with, or constituting an integument. [B, 28 (a, 27).]

**TEICHOPSIA** (Lat.), **TEICHOSCOPIA** (Lat.), n's f.  $Tik-(te^2-i^2ch^2)-o^2ps^2-i^2-a^2$ ,  $-o^2sc^2o^2ps^2ko^2p^2-i^2-a^2$ . From  $\tau\epsilon\iota\chi\omicron\varsigma$ , a wall, and  $\psi\alpha\iota\varsigma$ , vision, or  $\sigma\kappa\omicron\pi\epsilon\iota\upsilon$ , to examine. Fr., *teichopsie*. Ger., *Teichopsie*, *Teichoscopia*. See *HEMIANOPIA temporaria*.

**TEIGNE** (Fr.), n.  $Te^2n-y^2$ . 1. See *CUSCUTA europæa*. 2. See *PORRIGO* and *TINEA*.—**T. achromateuse**. See *VITILIGO*.—**T. amiantacée**. See *SEBORRHEGA amianthacea*.—**T. annulaire**. See *MYCOSIS trichophytina*.—**T. aréatée**, **T. décalvante**. See *ALOPECIA areata*.—**T. faveuse**. See *FAVUS*.—**T. faveuse scutiforme**. *Favus* in circumscribed rounded patches. [G.]—**T. faveuse squarreuse**. See *FAVUS granulatus*.—**T. furfuracée**. See *PITYRIASIS* and *PITYRIASIS capitis*.—**T. granulée**. Of Alibert, eczema impetiginosum and eczema papulosum. [G.] See also *PORRIGO granulata*.—**T. jaune**. See *FAVUS*.—**T. lycoperdoïde**. A tinea observed in the rabbit, characterized by crusts seated chiefly about the anus and causing death by obstructing defecation. The disease is very contagious among animals, but does not seem capable of development in man. [Méglin, "Progr. méd.," Apr. 29, 1882, p. 321.]—**T. mucueuse**, **T. muqueuse**. Lat., *porrigo larvalis*. Impetiginous eczema of the head attended with free discharge and crusting. [G.]—**T. nummulaire**. See *MYCOSIS trichophytina*.—**T. pelade**. See *ALOPECIA areata* and cf. *PELADÉ achromateuse* and *PELADÉ décalvante*.—**T. porriginieuse**. See *PITYRIASIS* and *PITYRIASIS capitis*.—**T. sycosique**. See *SYCOSIS parasitaria*.—**T. tondante**. See *TRICHOMYCOSIS circinata*.

**TEIGNEUX** (Fr.), adj.  $Te^2n-yu^2$ . See *FARREUS*.

**TEINACH** (Ger.), n.  $Tin^2/a^2ch^2$ . A place in the Black Forest district, Germany, where there are chalybeate springs. [a, 14.]

**TEINESMUS** (Lat.), n. m.  $Tin(te^2-i^2n)-e^2z(e^2s)/mu^2s(mu^4s)$ . Gr.,  $\tau\epsilon\iota\nu\epsilon\sigma\mu\acute{o}s$  (from *teivest*, to stretch). See *TENESMUS*.

**TEINODYNIA** (Lat.), n. f.  $Tin(te^2-i^2n)-o(o^2)-di^2n^2-du^2n^2/i^2-a^2$ . From *teivest*, to stretch, and  $\delta\acute{o}\nu\eta$ , pain. Fr., *teimodynamie*. Pain in the tendons. [L. 50 (a, 14).]

**TEINOPHLOGOSIS** (Lat.), n. f.  $Tin(te^2-i^2n)-o(o^2)-flog^2-g-os^2is$ . Gen.,  $-os^2eos(-is)$ . From *teivest*, to stretch, and  $\phi\lambda\acute{o}\gamma\omega\varsigma$ , a burning. Fr., *teinophlogose*. Inflammation of a tendon. [E.]

**TEINTURE** (Fr.), n.  $Ta^2n^2-tu^2r$ . See *TINCTURE* and *DYE*.—**T. alcoolique**. A tincture; of the Fr. Cod., an alcoholic solution either of a fixed or of a volatile principle, thus corresponding both to the tincture and the spirit of the U. S. Ph. [B.]—**T. amère**. See *Tinctura GENTIANÆ composita* and *Tinctura amara*.—**T. antigoutteuse de Want**. See *Tinctura COLCICLI*.—**T. antimoniale de Jacobi**. See *Tinctura ANTIMONII saponata*.—**T. antiscorbutique**. See *T. de RAIFFORT composée*.—**T. antivénéérienne**. A preparation made by dissolving 5 parts of corrosive sublimate in 480 of rectified alcohol, mixing with a solution of 120 parts each of Venice turpentine and guaiac resin in 480 of alcohol, and adding 28 of oil of sassafras. Sometimes Canadian turpentine was used, and the amount of alcohol varied. [B, 119 (a, 38).]—**T. aromatique sulfurique**. See *ACIDUM SULPHURICUM aromaticum*.—**T. balsamique**. See *Tinctura BENZOINI composita*.—**T. bleue**. See *COPPER ammoniosulphate*.—**T. de Bestuscheff**. See *Tinctura FERRI chlorati æthere*.—**T. de Panama** [Fr. Cod.]. A preparation made by macerating quillaia-bark with 5 times as much 80-per-cent. alcohol for ten days, expressing, and filtering. [B, 95 (a, 38).]—**T. de Williams**. See *Vinum COLCHICI seminis*.—**T. éthérée**. See *ÉTHÉROLÉ*.—**T. française**. See *DROGUE amère*.—**T. gingivale**. See *Tinctura CATECHU composita* (2d def.).—**T. noire**. See *Black DYE*.—**T. thébale**. See *Tinctura OPII*.—**T. thériacale composée**. See *Aqua SCORDII composita*.—**T. tonique** (de Whitt). See *Tinctura CINCHONÆ composita*.—**T. vulnérinaire**. See *ALCOOLATURE vulnérinaire*.—**T. vulnérinaire de Stahl**. See *BALSAMUM vulnérarium Stahlii*.

**TEISSIÈRES-LES-BOULIES** (Fr.), n.  $Te^2-se^2r^2-la-bu-le$ . A place in the department of Cantal, France, where there is an alkaline and sulphurous spring. [L. 41, 49 (a, 14).]

**TEKBAUM** (Ger.), n.  $Te^2k^2ba^2-u^2m$ . See *TECTONA*.

**TELA** (Lat.), n. f.  $Tel^2(al)^2/a^2$ . Probably from *tegere*, to weave. 1. A web. 2. See *TISSUE*.—**T. aranea**, **T. araneum**. Spider's web, especially that of *Tegenaria domestica* and *Tegenaria medicinalis*; a cobweb. It has been used as a febrifuge and antispasmodic, also as a hæmostatic application. [a, 35.]—**T. cartilaginea**. See *CARTILAGE*.—**T. cellularis**. See *Arcolar TISSUE* and *Cellular TISSUE*.—**T. chorioidea**. Ger., *Gefässwarhang*. See *VELUM interpositum*.—**T. chorioidea cerebelli**. See *T. chorioidea inferior*.—**T. chorioidea cerebri**. See *T. chorioidea superior*.—**T. chorioidea inferior**. Ger., *unterer Gefässwarhang*. The portion of the pia from which the choroid plexus of the fourth ventricle springs. [L. 332.] See *VALVE of Vieussens*.—**T. chorioidea media**. The choroid plexus of the third ventricle. [I, 4 (K).]—**T. chorioidea superior**. The portion of the choroid plexus which enters the cavities of the cerebrum through the transverse fissure. [I, 6 (K).]—**T. chorioidea ventriculi quarti**. See *T. chorioidea inferior*.—**T. conjunctoria**, **T. connectiva**. See *Connective TISSUE*.—**T. contexta**. See *FILZgewebe*.—**T. cornea**. See *CORNEOUS TISSUE*.—**T. flava**. See *Elastic TISSUE*.—**T. fulcrans**. See *Connective TISSUE*.—**T. Gauthieri**. See *Sparadrap diapalme*.—**T. hemalis** [Hæckel]. Ger., *Blutgewebe*. A term for lymph cells and blood-corpuscles, also for the tissue of the spleen and other so-called blood-glands. ["Jena. Zeit.," 1884, p. 206 (J).]—**T. hymenochondroides**, **T. hymenochondroides**. See *CARTILAGE*.—**T. inferior**. See *T. chorioidea inferior*.—**T. medullaris**. See *Medullary TISSUE* and *Medullary SUBSTANCE*.—**T. nervæ**. See *Nervous TISSUE*.—**T. ossæ**. See *Ossæous TISSUE*.—**T. sexualis**. Ger., *Germinalgewebe*. Germinal tissue; ova and spermatozooids. [Hæckel, "Jena. Zeit.," 1884, p. 206 (J).]—**T. subcutanea**. See *Subcutaneous connective TISSUE*.—**T. subserosa**. Subserous connective tissue. [L.]—**T. tegmentalis** [Hæckel]. Ger., *Deckgewebe*. A general term for the epidermis and its appendages (hair, nails, etc.) and the epithelium and endothelium of the body. ["Jena. Zeit.," 1884, p. 206 (J).]—**T. vasculosa**. See *CHOROID PLEXUS*.—**T. vesicatoria** [Swed. Ph., 1879]. See *SPARADRAP vesicans*.

**TELÆSTHESIA** (Lat.), n. f.  $\text{Te}^{21}(\text{tal})\text{-e}^2\text{s}(\text{a}^3\text{-e}^2\text{s})\text{-thez}(\text{thas})^2\text{-i}^2\text{-a}^3$ . From  $\tau\eta\lambda\eta$ , afar, and  $\alpha\iota\sigma\theta\eta\sigma\iota\varsigma$ , sensation. See TELEPATHY.

**TELANGEICTASIA** (Lat.), **TELANGEICTASIS** (Lat.), n's f.  $\text{Te}^{21}\text{-a}^2\text{n}(\text{a}^3\text{n}^2)\text{-ji}(\text{ge}^2\text{-i}^2)\text{-e}^2\text{kt-az}(\text{a}^2\text{s})^2\text{-i}^2\text{-a}^3$ ,  $\text{-e}^2\text{kt/a}^2\text{s}(\text{a}^2\text{s})^2\text{-i}^2\text{-a}^3$ . Gen.,  $\text{-as}^2\text{ie}$ ,  $\text{-as}^2\text{eos}$  ( $\text{-ect}^2\text{asis}$ ). From  $\tau\epsilon\lambda\omicron\varsigma$ , the end,  $\alpha\gamma\gamma\epsilon\iota\omicron\varsigma$ , a vessel, and  $\iota\kappa\tau\alpha\sigma\iota\varsigma$ , extension. Fr., *télangiectasie*. Ger., *Telangiectasie*. A dilatation of the extremities of blood-vessels or of the capillary vessels. [E.] Cf. NÆVUS.

**TELANGEIOSIS** (Lat.), n. f.  $\text{Te}^{21}\text{-a}^2\text{n}(\text{a}^3\text{n}^2)\text{-ji}^2(\text{ge}^2\text{-i}^2)\text{-os}^2\text{/i}^2\text{s}$ . Gen.,  $\text{-os}^2\text{eos}$  ( $\text{-is}$ ). From  $\tau\epsilon\lambda\omicron\varsigma$ , the end, and  $\alpha\gamma\gamma\epsilon\iota\omicron\varsigma$ , a vessel. Fr., *télangiose*. A diseased condition of the capillary blood-vessels. [a, 37.]

**TELANTHERA** (Lat.), n. f.  $\text{Te}^{21}\text{-a}^2\text{nth}(\text{a}^3\text{nth})\text{-er}(\text{ar})\text{/a}^3$ . A genus of the *Amarantaceae*. [a, 35.]—**T. polygonoides**. A plant found in the southern United States; used as a diuretic and in strangury. [a, 35.]

**TELEAMORPHA** (Lat.), n. f.  $\text{Tel}(\text{te}^{21})\text{-e}^2\text{-a}^2\text{-mo}^2\text{r}^2\text{/a}^3$ . From  $\tau\epsilon\lambda\epsilon\omicron\varsigma$ , complete, and  $\alpha\mu\omicron\phi\omicron\varsigma$ , mis-shapen. See ACMEAMORPHA.

**TELEANGEICTASIS** (Lat.), n. f.  $\text{Tel}(\text{te}^{21})\text{-e}^2\text{-a}^2\text{n}(\text{a}^3\text{n}^2)\text{-ji}^2\text{-}(\text{ge}^2\text{-i}^2)\text{-e}^2\text{kt/a}^2\text{s}(\text{a}^2\text{s})^2\text{-i}^2\text{-a}^3$ . Gen.,  $\text{-tas}^2\text{eos}$  ( $\text{-ect}^2\text{asis}$ ). See TELANGEICTASIS.

**TELEGRAPH**, n.  $\text{Te}^{21}\text{-e}^2\text{-gra}^2\text{/f}$ . From  $\tau\eta\lambda\epsilon$ , afar, and  $\gamma\gamma\alpha\phi\epsilon\upsilon$ , to write. Ger., *T.* An apparatus for conveying information to a distance, especially for conveying it very rapidly. [a, 48.]—**Muscle-t.** Of Du Bois-Reymond, an apparatus for recording muscular contractions. The muscle is fixed by one of its ends to a vise, while to the other end is fastened a thread which is passed around a wheel. As the muscle contracts, the wheel revolves and carries around an indicator which is attached to it. [K, 35.]

**TELEIANTHIS** (Lat.), adj.  $\text{Te}^{21}\text{-i}(\text{e}^2\text{-i}^2)\text{-a}^2\text{n}(\text{a}^3\text{n})^2\text{/thi}^2\text{s}$ . From  $\tau\epsilon\lambda\epsilon\omicron\varsigma$ , complete, and  $\alpha\upsilon\delta\omicron\varsigma$ , a flower. Having perfect flowers. [a, 35.]

**TELEOLOGY**, n.  $\text{Te}^{21}\text{-e}^2\text{-o}^2\text{/l}^2\text{-o}^2\text{-ji}^2$ . Lat., *teleologia* (from  $\tau\epsilon\lambda\epsilon\omicron\varsigma$ , the end, and  $\lambda\omicron\gamma\omicron\varsigma$ , understanding). Fr., *téléologie*. Ger., *Teleologie*. The doctrine of design or of adaptation to purpose. [L, 146.] Cf. DYSTELEOLOGY.

**TELEOTHERAPEUTICS**, n.  $\text{Te}^{21}\text{-e}^2\text{-o}^2\text{-the}^2\text{-r}^2\text{-a}^2\text{-p}^2\text{-u}^2\text{/i}^2\text{k}s$ . From  $\tau\eta\lambda\epsilon$ , afar, and  $\theta\epsilon\alpha\pi\epsilon\upsilon\tau\iota\kappa\eta$ , therapeutics. The treatment of disease by bringing near the affected persons stoppered bottles containing the remedies usually employed. A form of suggestive therapeutics. [*"Ther. Gaz."*, 1886, p. 761 (a, 34).]

**TELEOTYPE**, n.  $\text{Te}^{21}\text{-e}^2\text{-o}^2\text{-tip}$ . From  $\tau\epsilon\lambda\epsilon\omicron\varsigma$ , the end, and  $\tau\upsilon\pi\omicron\varsigma$ , a type. Of Coues, a type existing at the present time, its precedent forms being its prototypes, and it itself being the prototype of forms derived from it. [L, 221.]

**TELEPATHY**, n.  $\text{Te}^{21}\text{-e}^2\text{-p}^2\text{/a}^2\text{th}^2\text{-i}^2$ . From  $\tau\eta\lambda\epsilon$ , afar, and  $\pi\acute{\alpha}\theta\omicron\varsigma$ , feeling. A sympathetic sensation felt by one person in fancied connection with an occurrence happening to another at a distance. [A. Carver, "*Boston Med. and Surg. Jour.*," Apr. 2, 1885, p. 329.]

**TELEPHIC**, adj.  $\text{Te}^{21}\text{-e}^2\text{/f}^2\text{/i}^2\text{k}$ . For deriv. see TELEPHUM. Fr., *téléphien*. Ger., *telephisch*, *unheilbar*. See MALIGNANT.

**TELEPHUM** (Lat.), n. n.  $\text{Te}^{21}(\text{tal})\text{-e}^2\text{/f}^2\text{-i}^2\text{-u}^3\text{m}(\text{u}^4\text{m})$ . Gr.,  $\tau\eta\lambda\epsilon\phi\iota\omicron\upsilon\mu$  (3d def.). From the mythical *Telephus*, son of Hercules, said by Homer to have suffered from *t.* (1st def.) after being wounded by Achilles. 1. An old ulcer (cf. *ACHILLEUM* [1st def.]). [E.] 2. A genus of the *Portulacaceae*. 3. An old name for the genus *Sedum*. [a, 35.]

**TELEPHONE**, n.  $\text{Te}^{21}\text{-e}^2\text{-fon}$ . From  $\tau\eta\lambda\epsilon$ , afar, and  $\phi\omega\upsilon\eta$ , a sound. Fr., *téléphone*. Ger., *Telephon*. An apparatus for conveying articulate sounds to a distance, especially by means of electricity. [a, 48.]

**TELESPHORESIS** (Lat.), n. f.  $\text{Te}^{21}\text{-e}^2\text{-s}^2\text{-fo}^2\text{-r}^2\text{-e}(\text{a})^2\text{/si}^2\text{s}$ . Gen.,  $\text{-es}^2\text{-eos}$  ( $\text{-is}$ ). Gr.,  $\tau\epsilon\lambda\epsilon\sigma\phi\omicron\rho\omicron\sigma\iota\varsigma$  (from  $\tau\epsilon\lambda\epsilon\omicron\varsigma$ , the end, and  $\phi\omicron\sigma\epsilon\iota\upsilon$ , to bear). Fr., *téléphorèse*. Complete foetal maturation. [L, 50 (a, 14).]

**TELESTEREOSCOPE**, n.  $\text{Te}^{21}\text{-e}^2\text{-ste}^2\text{-r}^2\text{-e}^2\text{-o}^2\text{-skop}$ . From  $\tau\eta\lambda\epsilon$ , afar,  $\sigma\tau\epsilon\pi\epsilon\delta\epsilon\varsigma$ , solid, and  $\alpha\kappa\omicron\sigma\mu\epsilon\iota\upsilon$ , to examine. Fr., *téléstéréoscope*. Ger., *Telestereoskop*. A stereoscope for viewing very distant objects by the artificial increase of the interocular distance by means of four plane mirrors so fixed in a box as to admit of slight rotation, and thus bring the images into coincidence. [F.]

**TELEUTOSPORES**, n. pl.  $\text{Te}^{21}\text{-u}^2\text{-t}^2\text{-o}^2\text{-spor}^2$ . From  $\tau\epsilon\lambda\epsilon\upsilon\tau\eta$ , a finishing, and  $\sigma\pi\omicron\rho\acute{\alpha}$ , a spore. Ger., *Teleutosporen*. Secondary spores produced by the *Uredineae* late in the season. [a, 35.] See under CORN-MILDEW.

**TELFAIRIA** (Lat.), n. f.  $\text{Te}^{21}\text{-fa}^2\text{/r}^2\text{-i}^2\text{-a}^3$ . Fr., *tefairie*. A genus of climbing shrubs constituting a tribe (*Telfairieae*) of the *Cucurbitaceae*. [a, 35.]—**T. pedata**. Fr., *liane de joliff*. A bitter, tonic species indigenous to eastern tropical Africa, cultivated for the bland edible oil extracted from its seeds. [a, 35.]

**TELLENHYDRIC**, adj.  $\text{Te}^{21}\text{-e}^2\text{-n}^2\text{-hid}^2\text{/r}^2\text{-i}^2\text{k}^2$ . Hydrotelluric. [B.]

**TELLERFLECHTE** (Ger.), n.  $\text{Te}^{21}\text{/le}^2\text{-r}^2\text{-fle}^2\text{-ch}^2\text{-t}^2\text{-e}^2$ . See LECIDEA.

**TELLERFÖRMIG** (Ger.), adj.  $\text{Te}^{21}\text{/le}^2\text{-r}^2\text{-fu}^2\text{-rm}^2\text{-ig}$ . See HYPOCRATERIFORM.

**TELLUR** (Ger.), n.  $\text{Te}^{21}\text{-lur}^2$ . See TELLURIUM.—**T'wasserstoff**. See HYDROTELLURIC ACID.

**TELLURAMYL**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{/a}^2\text{m}^2\text{-i}^2\text{l}$ . See AMYL telluride.

**TELLURATE**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-at}$ . A salt of telluric acid. [B, 3.]

**TELLUR-ETHYL**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2$ . Fr., *telluréthyle*. See ETHYL telluride.

**TELLURETED**, adj.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-e}^2\text{-t}^2\text{-e}^2\text{-d}$ . Containing or combined with tellurium. [B.]

**TELLURIC ACID**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{/i}^2\text{k}$ . Fr., *acide tellurique*. Ger., *Tellursäure*. A dibasic acid,  $\text{H}_2\text{TeO}_4$ . When combined with water it forms the crystalline hydrated acid,  $\text{H}_2\text{TeO}_4 \cdot 2\text{H}_2\text{O}$ . [B, 3.]

**TELLURIDE**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-i}^2\text{-d}(\text{id})$ . Fr., *tellurure*, *tellurure*. Ger., *Tellurid*. A compound of an element or radicle directly with tellurium. [B.]

**TELLURISME** (Fr.), n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-es-m}^2$ . The induction of disease by emanations from the soil. [A, 385 (a, 48).]

**TELLURITE**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-it}$ . A salt of tellurous acid. [B.]

**TELLURIUM** (Lat.), n. n.  $\text{Te}^{21}\text{-lu}^2\text{-r}^2(\text{lur})^2\text{-i}^2\text{-u}^3\text{m}(\text{u}^4\text{m})$ . From *tellus*, the earth. Fr., *tellure*. Ger., *Tellur*. A non-metallic element, first identified as an elementary body toward the close of the last century, but known to mineralogists earlier. Its name was given to it by Klaproth in 1798. T. occurs in nature in the free state, and also combined with the metals. It is a bluish-white, brittle substance, of metallic lustre, which can be obtained in the crystalline form. In combination it acts as a bivalent, quadrivalent, or sexvalent radicle, its compounds bearing a close chemical relation to those of sulphur. It melts at about 500° C. Symbol, Te; atomic weight, 128; sp. gr., 6.24. [B.]

**TELLURO-HUMAIN** (Fr.), adj.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-o}^2\text{-u}^2\text{-m}^2\text{-a}^2\text{n}^2$ . Of tetanic infection, conveyed from the earth or the soil to man. [a, 18.] Cf. INTERHUMAIN.

**TELLUROSEL** (Fr.), n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-o}^2\text{-ze}^2\text{/l}$ . A salt in which the acid element is tellurium. [B, 38 (a, 14).]

**TELLUROUS ACID**, n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-u}^2\text{-s}$ . Fr., *acide tellureux*. Ger., *tellurige Säure*, *Telluroxyd*. A dibasic acid,  $\text{H}_2\text{TeO}_3$ , a white solid, soluble with difficulty in water. [B, 3.]

**TELLURURE** (Fr.), n.  $\text{Te}^{21}\text{-u}^2\text{-r}^2\text{-u}^2\text{-r}$ . See TELLURIDE.

**TELOECITHAL**, adj.  $\text{Te}^{21}\text{-o}^2\text{-le}^2\text{-s}^2\text{/i}^2\text{-th}^2\text{-l}$ . From  $\tau\epsilon\lambda\omicron\varsigma$ , the end, and  $\lambda\epsilon\kappa\iota\theta\omicron\varsigma$ , the yolk of an egg. Having the nutritive yolk concentrated at the vegetative pole of an ovum. [L, 201.]

**TELOSASIS** (Lat.), n. f.  $\text{Tel}(\text{te}^{21})\text{-o}^2\text{-r}^2\text{-a}^2(\text{a}^3)^2\text{/si}^2\text{s}$ . Gen.,  $\text{-as}^2\text{eos}$  ( $\text{-is}$ ). From  $\tau\eta\lambda\epsilon$ , afar, and  $\omicron\pi\alpha\iota\varsigma$ , a seeing. Fr., *télorase*. See PRESBYOPIA.

**TÉMOIN** (Fr.), n.  $\text{Ta}^2\text{-mwa}^2\text{-n}^2$ . Lit., a witness; a person or animal that has been subjected to experiment to test the process; a test-animal; a test-case.

**TEMPE** (Fr.), n.  $\text{Ta}^2\text{-n}^2\text{-p}$ . See TEMPLE.

**TEMPERAMENT**, n.  $\text{Te}^{21}\text{-mp}^2\text{-e}^2\text{-r}^2\text{-a}^2\text{-m}^2\text{-nt}$ . Lat., *temperamentum*. Fr., *tempérament*. Ger., *Beschaffenheit*, *Körperanlage*. Peculiarity of constitution, embracing the humor or frame of mind, the mode of manifestation of the activity of the brain, etc. [D, 3.]—**Atrabiliary t.** See *Melancholic t.*—**Biliosanguine t.** A combination of the bilious and sanguine t's. [a, 48.]—**Bilious t.** Of the humorists, a mental condition ascribed to the influence of bile on the brain's action. [a, 94.]—**Choleric t.** A t. in which there are great activity of the voluntary muscles, a tense, firm habit of body, great irritability, and strong passions. [D, 3.]—**Insane t.** A neurotic condition in which there is a tendency to insanity. [a, 34.]—**Leucoplegmatic t.** A systemic condition characterized by a tendency to and symptoms of leucoplegmasia. [a, 34.]—**Lymphatic t.** See *Plegmatic t.*—**Lymphatico-sanguine t.** **Lymphatic-sanguine t.** A t. that is in part plegmatic and in part sanguine. [a, 48.]—**Melancholic t.** A t. marked by slight irritability united with strong capacity for reacting to sensory excitations, and by great persistence of the frame of mind, especially that of dullness or sullenness. [D, 8.]—**Nervous t.** A t. characterized by marked sensitiveness of the nervous system. [a, 48.]—**Plegmatic t.** **Quiet t.** A t. characterized by flabby muscles (when in repose), want of energy in the involuntary muscles, turgescence of the tissue, a disposition to adipose deposit, small or slow reaction to psychic excitation, slightly developed passions, and little sensibility to bodily suffering. [D, 3.]—**Sanguine t.** A t. characterized by marked irritability, great liability of the nervous system to exhaustion, and sudden changes in the activity of the special senses and in humor. [D, 3.]—**Sentimental t.** See *Melancholic t.*

**TEMPERAMENTUM** (Lat.), n. n.  $\text{Te}^{21}\text{-m}^2\text{-pe}^2\text{-r}^2\text{-a}^2(\text{a}^3)\text{-me}^2\text{-nt}^2\text{-u}^3\text{m}(\text{u}^4\text{m})$ . From *temperare*, to regulate. A proper measure, moderation, temperament. [a, 48.]—**Tortile t.** Of Tertullian, an ancient screw-like instrument for dilating the vagina. [A. R. Simpson, "*Brit. Med. Jour.*," Dec. 13, 1884, p. 1178.] See COCHLEA (4th def.).

**TEMPÉRANT** (Fr.), adj.  $\text{Ta}^2\text{-n}^2\text{-pa}^2\text{-ra}^2\text{-n}^2$ . Tending to modify excessive activity of the circulation. [A, 385 (a, 48).]

**TEMPERATURE**, n.  $\text{Te}^{21}\text{-mp}^2\text{-e}^2\text{-r}^2\text{-a}^2\text{-t}^2\text{-u}^2\text{-r}$ . Gr.,  $\kappa\rho\acute{\alpha}\tau\iota\varsigma$ . Lat., *temperatura*, *temperies* (from *temperare*, to regulate). Fr., *température*. Ger., *Temperatur*. The degree of the heat of a body expressed in terms of some recognized standard. [D]—**Absolute t.** T. measured from the absolute zero (*i. e.*, °C.). [B.]—**Animal t.** Ger., *Körpertwärme*. The normal t. of the healthy adult. It is nearly constant in warm-blooded animals. [B.]—**Body-t.** The t. of the body. It may be external or surface t. (measured, *e. g.*, in the axilla) or internal, the latter being indicated by the t. in one of the cavities of the body (*e. g.*, the mouth or the rectum). [D.]—**Hyperpyretic t.** An axillary t. between 41° C. and 41.5° C. [D, 3.]—**Non-febrile t.** An axillary t. between 38.1° C. and 38.5° C. [D, 3.]—**Normal t.** See *Animal t.*—**Postmortem t.** The temporary production of increased heat in the dead body. It is said to be caused by the solidification of the muscles, by a series of chemical processes, or by diminution of the loss of heat after death. [a, 25.]—**T-regulator**. See *Cold-water coil*.

**TEMPLE**, n.  $\text{Te}^{21}\text{-m}^2\text{/p}^2\text{-l}$ . Gr.,  $\kappa\rho\acute{\alpha}\tau\eta\varsigma$ . Lat., *tempus*. Fr., *tempe*. Ger., *Schläfe*. The flattened or slightly hollowed area on the side of the head just above the zygomatic arch. [C, 1.]

**TEMPLIN-OIL**, n.  $\text{Te}^{21}\text{-mp}^2\text{/li}^2\text{-n}$ . Fr., *huile de templin*. Ger., *Templinöl*. See OLEUM templinum and KRUMMHOLZÖL.

**TEMPORAL**, adj.  $\text{Te}^{21}\text{-mp}^2\text{/o}^2\text{-r}^2\text{-l}$ . Lat., *temporalis*. Fr., *t.* Pertaining to, or in relation with the temples. [C.]

**TEMPORALIS** (Lat.), adj.  $Te^2mp-o^2r-al(a^2l)/i^2s$ . See **TEMPORAL**; as a n., the temporal muscle, a strong, flat, fan-shaped muscle which arises from the inferior temporal line, the larger part of the temporal fossa, and the inner surface of the temporal fascia, and is inserted by a tendon into the internal surface and anterior border of the coronoid process of the inferior maxilla. Its action is to close the jaws. [L, 142, 332.]—**T. minor**. A small anomalous muscle attached to the interarticular fibro-cartilage of the temporo-maxillary joint, and arising from the inferior maxilla or as an offshoot of the masseter or t. [L, 332.]

**TEMPORALKANTE** (Ger.), n.  $Te^2mp-or-a^2l/ka^2nt-e^2$ . The edge of a temporal convolution. [K.]—**Oberer T.** The edge of the superior temporo-sphenoidal convolution. [I, 17 (K).]—**Untere T.** The edge of the inferior temporo-sphenoidal convolution. [I, 17 (K).]

**TEMPORALLAPPEN** (Ger.), n.  $Te^2mp-or-a^2l/la^2p-pe^2n$ . See **Temporo-sphenoidal LOBE**.

**TEMPORO-AURICULAIRE** (Fr.), n.  $Ta^2n^2-po-ro-o-re-ku^2-la^2r$ . See **ATTOLLENS aurem**.

**TEMPORO-AURICULAR**, adj.  $Te^2mp-o^2r-o-a^2r-i^2k-u^2l-a^2r$ . Lat., *temporo-auricularis*. Fr., *temporo-auriculaire*. Pertaining to or connected with the temporal bone or region and the ear. [L.]

**TEMPORO-AURICULARIS** (Lat.), n. m.  $Te^2mp/o^2r-o(o^2)-a^2r(a^2u^2r)-i^2k-u^2l(u^2l)-a^2r(a^2r)/i^2s$ . From *tempus*, the temple, and *auricula*, the external ear. See **TEMPORO-AURICULAR**; as a n. see **ZYGOMATO-AURICULARIS**.—**T. a. externus**. Fr., *abducteur de l'oreille*. Ger., *Einwärtszieher des Ohres*. A muscle of the lower animals, arising from the parietal crest and attached to the scutal and conchiform cartilages of the ear. It adducts the ear. [L.]—**T. a. internus**. Fr., *élevateur moyen de l'oreille*. Ger., *mittlerer Heber des Ohres*, *Vorderhauptsmuskel der Muschel*. A muscle of the lower animals, arising from the sagittal ridge of the parietal bone and attached to the inner side of the concha of the ear. It adducts the ear. [L.]

**TEMPORO-CONCHINIEN** (Fr.), n. m.  $Ta^2n^2-po-ro-ko^2n^2-ke-ne-a^2n^2$ . See **ATTOLLENS aurem**.

**TEMPORO-FACIAL**, adj.  $Te^2mp-o^2r-o-fa^2ci^2l$ . From *tempus*, the temple, and *facies*, the face. Pertaining to the temple and the face. [a, 48.]

**TEMPORO-FRONTAL**, adj.  $Te^2mp-o^2r-o-fru^2n^2t^2l$ . From *tempus*, the temple, and *frons*, the forehead. Pertaining to the temple and the forehead. [a, 48.]

**TEMPORO-GENAL**, **TEMPORO-MALAR**, adj's.  $Te^2mp-o^2r-o-je^2n^2l$ ,  $-mal^2a^2r$ . From *tempus*, the temple, and *gena*, the cheek, or *mala*, the cheek-bone. Pertaining to or connected with the temporal and malar bones or regions. [L; a, 48.]

**TEMPOROMAXILLARY** (Lat.), n. m.  $Te^2mp/o^2r-o(o^2)-ma^2x(i^2l)-lar(la^2r)/i^2s$ . From *tempus*, the temple, and *maxilla* (q. v.). Fr., *temporo-maxillaire*. See **TEMPORALIS**.

**TEMPORO-MAXILLARY**, adj.  $Te^2mp-o^2r-o-ma^2x(i^2l)-ar-l^2a^2r$ . Lat., *temporomaxillaris*. Fr., *temporo-maxillaire*. Pertaining to or connected with the temporal bone or region and the maxilla. [L.]

**TEMPORO-OCCIPITAL**, adj.  $Te^2mp-o^2r-o-o^2k-si^2p(i^2t)-l^2a^2r$ . From *tempus*, the temple, and *occiput*, the occiput. Pertaining to the temporal and occipital bones or regions. [L; a, 48.]

**TEMPORO-PARIETAL**, adj.  $Te^2mp-o^2r-o-pa^2r-i^2e^2t^2l$ . Pertaining to the temporal and parietal bones. [a, 48.]

**TEMPORO-SPHENOIDAL**, adj.  $Te^2mp-o^2r-o-sfe^2n-o-i^2d^2l$ . Pertaining to the temporal and sphenoid bones. [a, 48.]

**TEMPS** (Fr.), n.  $Ta^2n^2$ . Ger., *Akt* (2d def.). 1. Time. 2. A stage or step in a process.—**Cinquième t. d'accouchement**. 1. That step in the process of parturition by which the expulsion of the fetus is completed after the presenting part has been expelled. [A, 24.] 2. The movement of restitution of the presenting part.—**Deuxième t. d'accouchement**. That step in the process of parturition that includes the descent of the presenting part of the fetus to the lower portion of the pelvic canal. [A, 24.]—**Premier t. d'accouchement**. That step in the process of parturition by which the presenting part of the fetus is so compressed and directed as to facilitate its engagement. [A, 15, 24.]—**Quatrième t. d'accouchement**. 1. That step in the process of parturition by which the expulsion of the presenting part of the fetus is accomplished. 2. According to P. Dubois, that step which consists in the extension of the child's head. [A, 24.]—**Sixième t. d'accouchement**. Syn.: *expulsion du tronc*. Of Tarnier, that step in the process of parturition which consists in the expulsion of the trunk. [A, 24.]—**T. d'accouchement**. The several steps in the process of parturition.—**T. d'amolindrissement**. See **Premier t. d'accouchement**.—**T. de déflexion**, **T. de dégagement**. See **Quatrième t. d'accouchement** (2d def.).—**T. de descente**. See **Deuxième t. d'accouchement**.—**T. de flexion**. See **Premier t. d'accouchement**.—**T. de restitution**, **T. de rotation extérieure**. See **Cinquième t. d'accouchement**.—**T. de rotation interne**. See **Troisième t. d'accouchement**.—**T. d'extension**. See **Quatrième t. d'accouchement** (2d def.).—**T. secret**. The premonitory stage of labor. [A, 48.]—**Troisième t. d'accouchement**. The rotation of the fetus in its passage through the pelvic canal. [A, 24.]

**TEMULENCE**, n.  $Te^2m-u^2l-e^2ns$ . Lat., *temulentia* (from *temulentus*, intoxicated). See **DRUNKENNESS**.

**TEMULENTIC ACID**, n.  $Te^2m-u^2l-e^2nt/i^2k$ . Ger., *Temulentinsäure*. A crystalline acid,  $C_{12}H_{22}NO_{19}$ , contained in the alcoholic extract of the seeds of *Lolium temulentum*. It is the agent to which the vertiginous symptoms produced by *Lolium temulentum* are due. In rabbits it causes dyspnea, lowering of the temperature, enfeebled heart's action, and in doses of 4 centigrammes, death. [P. Antze, "Ctribl. f. d. med. Wsensch.," Apr. 20, 1890, p. 317 (B).]

**TEMULENTINE**, n.  $Te^2m-u^2l-e^2nt/en$ . Fr., *t.* Ger., *Temulentin*. A base produced by boiling temulentic acid with alkalies. [P. Antze, "Ctribl. f. d. med. Wsensch.," Apr. 26, 1890, p. 317 (B).]

**TENACULUM** (Lat.), n. n.  $Te^2n-a^2k(a^2k)/u^2l(u^2l)-u^2m(u^2m)$ . From *tenere*, to hold. Fr., *tenaculum*, *crochet* (2d def.), *tenaille* (2d and 3d def's). Ger., *Haltzange* (3d def.). 1. An instrument recommended by Hieronymus Mercurialis for extracting the fetus by the breech. [A, 20.] 2. A sharp-pointed hook with a handle; used for seizing an artery. [E, 6.] 3. A holder, especially one made like a forceps.—**Assailin's t.** An instrument similar to the

TENACULUM.

DOUBLE TENACULUM.

modern artery forceps. [E.]—**Byrne's double-spring t.** A slender t. with four hooks, opening and shutting like the blades of a forceps; generally used in the rectum. [E.]—**Keith's t.** A t. that unscrews at the handle. [a, 34.]—**Knife-blade t.** A t. like instrument having a blade instead of a hook. ["N. Y. Med. Jour.," June 23, 1888, p. 693 (a, 34).]—**T. nervi hypoglossi**. See **LIGAMENTUM nervi**.—**Tenacula tendinum**. See **VINCULA tendinum**.

**TENDILEMMA** (Lat.), n. m.  $Te^2nd-i^2le^2m/ma^2$ . Gen., *tendilematis* (-is). From *tendo*, a tendon, and *lemma* (q. v.). The amorphous elastic covering of the inoblast. [L, 332.]

**TENAILLE** (Fr.), n.  $T^2n-a^2l-y^2$ . See **TENACULUM** (2d and 3d def's).—**T. incisive**. See **BONE FORCEPS**.

**TENALGIA** (Lat.), n. f.  $Te^2n-a^2l(i^2g)/i^2a^2$ . From *τένον*, a tendon, and *άλγος*, pain. Fr., *ténalgie*. Ger., *Tenalgie*. Pain in the tendons. [a, 17.]—**T. crepitans**. See **TENOSYNOVITIS** (2d def.).

**TENASMUS** (Lat.), n. m.  $Te^2n-a^2z(a^2s)/mu^2s(mu^2s)$ . See **TENESMUS**.

**TENAX** (Lat.), n. m.  $Ten^2(ten^2)/a^2x(a^2x)$ . Gen., *-acis*. Oakum a little better carded and slightly more tarred than the ordinary commercial article; used as a dressing for wounds. [E.]

**TENDER**, adj.  $Te^2nd/u^2r$ . Gr., *ἀπαλός*. Lat., *tener*. Fr., *tendre*. Ger., *zart, empfindlich*. 1. Delicate, easily broken. 2. Susceptible to painful impressions; especially, painful to the touch. [D.]

**TENDINOSUS** [Coves] (Lat.), n. m.  $Te^2nd-i^2n-os(u^2s)(u^2s)$ . From *tendo*, a tendon. See **SEMITENDINOSUS**.

**TENDINOUS**, adj.  $Te^2nd/i^2n-u^2s$ . Lat., *tendineus*, *tendinosus* (from *tendo*, a tendon). Fr., *tendineux*. Ger., *sehnig*. Pertaining to, resembling, or constituting a tendon; made up of tendon-like tissue. [C.]

**TENDO** (Lat.), n. m.  $Te^2nd/o$ . Gen., *tend/inis*. See **TENDON**.—**Quintus t. extensoris longi digitorum pedis**. See **PERONEUS quintus**.—**T. Achillis**. Fr., *corde d'Hippocrate*. Ger., *Achillessehne*. The thickest and strongest tendon of the body, made up by the union of the tendons of the gastrocnemius and soleus muscles, and inserted into the middle of the posterior surface of the tuberosity of the os calcis. [C.]—**Tendines coronarii**. Fibrous rings surrounding the openings of the aorta and the pulmonary artery. [L.]—**T. intermedius (diaphragmatis)**. See **Cordiform TENDON**.—**T. oculi**, **T. palpebræ**. See **LIGAMENTUM palpebrale internum**.—**T. valvulæ Eustachii**. A ligamentous band in the valvula Eustachii. [L, 332.]

**TENDON**, n.  $Te^2nd/n$ . Gr., *τένον*. Lat., *tendo*. Fr., *t.*, *nerf*. Ger., *Sehne*. A bundle of fibrous tissue of varying shape, which serves as an origin or attachment for a muscle or is interposed between portions of it. [L.]—**Accessory t's of the extensor communis digitorum**. The offshoots of the t. of the extensor digitorum manus communis which pass to those of the ring and little fingers. [L.]—**Central t. of the diaphragm**, **Cordiform T.** The white aponeurotic centre of the diaphragm, having a posterior concave margin and an anterior convex margin slightly notched on each side so as to give it the shape of a trefoil. [L.]—**Hamstring t.** The t. of the biceps flexor cruris and that of the semimembranosus and the semitendinosus. [L.]—**T. cartilage**. In the embryo, a tissue, resembling true cartilage, by which the junction of t. with bone is effected. ["Jour. of Anat. and Phys.," xvi, p. 178 (a, 32).]—**T. of origin**. A t. by which a muscle arises. [L.]—**T. of Zinn**. See **LIGAMENT of Zinn**.—**T. réfléchi du droit antérieur** (Fr.). The reflected t. of the rectus femoris. [L.]

**TENDOPHONY**, n.  $Te^2nd-o^2f/on-i^2$ . From *tendo*, a tendon, and *φωνή*, a sound. Ger., *Tendophonie*, *Sehnenlöten*. The occurrence of auscultatory sounds ascribed to the chordæ tendinæ.

**TENDOVAGINITIS** (Lat.), n. f.  $Te^2nd-o(a^2)-va^2(i^2wa^2g)-i^2n(-en)-it^2is$ . Gen., *-itidis* (-idis). From *tendo*, a tendon, and *vagina*, a scabbard. See **TENOSYNOVITIS** (1st def.).—**T. crepitans**. T. in which the fibrinous deposit on the tendon and sheath causes crepitation when the tendon is moved. [a, 34.]—**T. hydrotica** (serosa chronica). See **HYDROPS vagina tendinis**.—**T. hypertrophica**. T. with circumscribed hypertrophy of the tendon and its sheath. [a, 34.]—**T. serosa**. T. with serous effusion within the sheath. [a, 34.]—**T. suppurativa**. T. with suppuration. [a, 34.]

**TENDRIL**, n.  $Te^2nd/ril^2$ . A body, usually filiform, by which a plant climbs. It may be a modified branch, as in the grape, or a modified leaf (leaf t.), as in the pea, or a modified stipule, as in *Smilax*. It usually climbs by coiling its tip around the object of support, but sometimes, as in the Virginia creeper, holds fast by means of an adhesive disc into which its tip expands. [a, 35.]

**TENESMUS** (Lat.), n. m.  $Te^{2n}(tan)-e^{2s}mu^{3s}(mu^{4s})$ . Gr.,  $\tau\epsilon\nu\epsilon\sigma\mu\acute{o}\varsigma$  (from  $\tau\epsilon\nu\epsilon\iota\nu$ , to stretch). Fr., *ténésme*, *épreintes*. A persistent inclination to defecate or urinate, accompanied by painful straining efforts, mostly ineffectual. [D; E.]—**Faucial and pharyngeal t.** Of L. Browne, a continual inclination to void or to swallow an imaginary foreign body, accompanied by more or less cough, straining, and pain, either after or independent of functional exercise of the voice. ["Brit. Med. Jour.," 1890, ii, p. 621 (a, 34).]—**Rectal t.** Ger., *Afterschmerz*, *Aftersperré*, *Stuhlwang*. T. in the rectum. [a, 48.]—**T. vesicæ mucosus.** See CYSTORRHOEA.—**Vesical t.** Ger., *Drang zum Uriniren*, *Harn-drang*. T. in urination. [a, 48.]

**TENETTE** (Fr.), n.  $T^{1n}ne^{2t}$ . An old term for a dressing-forceps, especially one for removing vesical calculi. [A, 44 (a, 14).]

**TÉNIA** (Fr.), n.  $Tan-ea^{3s}$ . See TENIA.

**TENNSTÄDT** (Ger.), n.  $Te^{2n}st^{2t}$ . A place in Prussian Saxony where there is a sulphurous spring. [L, 30, 37, 49, 57 (a, 14).]

**TENOGRAPHY, TENOLOGY**, n's.  $Te^{2n}-o^{2g}ra^{2f}i^{2t}$ ,  $-o^{2l}-o^{2j}i^{2t}$ . See TENOLOGY.

**TÉNO-MYOTOMIE** (Fr.), n.  $Ta-no-me-o-to-me$ . Of Abadie, an operation for enfeebling one of the recti muscles of the eye. It consists in incising the lateral parts of its tendon near its sclerotic insertion, and in excising a small portion of the muscle on each side. ["Rev. des sci. méd.," Oct. 15, 1888, p. 622 (a, 18).]

**TENONITIS** (Lat.), n. f.  $Ten(te^{2n})-o^{2n}-i(e)/ti^{2s}$ . Gen., *-it'idis* (-idis). Fr., *ténonite*. Ger., *T.* Inflammation of Tenon's capsule. [F.]

**TENONTAGRA** (Lat.), n. f.  $Te^{2n}-o^{2nt}/a^{2g}(a^{3g})-ra^{2s}$ . Gr.,  $\tau\epsilon\nu\omicron\nu\tau\acute{\alpha}\gamma\rho\alpha$  (from  $\tau\epsilon\nu\omicron\nu$ , a sinew, and  $\acute{\alpha}\gamma\rho\alpha$ , a seizure). Fr., *ténon-tagre*. Rheumatism of the tendons, especially of those in the neck. [L, 50 (a, 14).]

**TENONTODYNE** (Lat.), **TENONTODYNIA** (Lat.), n's f.  $Te^{2n}-o^{2nt}-o^{2d}i^{2n}(u^{2n})-e(a)$ ,  $-o(o^{2s})-di^{2n}(du^{2n})/i^{2t}-a^{2s}$ . From  $\tau\epsilon\nu\omicron\nu$ , a sinew, and  $\delta\acute{o}\nu\eta$ , pain. Fr., *ténonodymie*. Pain in the tendons.

**TENOGRAPHY, TENOLOGY**, n's.  $Te^{2n}-o^{2nt}-o^{2g}ra^{2f}i^{2t}$ ,  $-o^{2l}-o^{2j}i^{2t}$ . Lat., *tenontographia* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\gamma\rho\acute{\alpha}\phi\epsilon\iota\nu$ , to write), *tenontologia* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\lambda\omicron\gamma\omicron\varsigma$ , understanding). Fr., *ténonographie*, *ténonologie*. Ger., *Schnenlehre*. The anatomy, etc., of the tendons. [L, 50 (a, 14).]

**TENONTOMIA** (Lat.), n. f.  $Te^{2n}-o^{2nt}-om(o^{2m})/i^{2t}-a^{2s}$ . Ger., *T.* See TENOTOMY.

**TENONTOPHYMA** (Lat.), n. n.  $Te^{2n}-o^{2nt}-o(o^{2s})-fi(fu^{2s})/ma^{2s}$ . Gen., *-phym'atos* (-atis). From  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\phi\upsilon\mu\alpha$ , a growth. A tumor of a tendon. [L, 50 (a, 48).]

**TENONTOPHYTE**, n.  $Te^{2n}-o^{2nt}/o^{2f}-it$ . Lat., *tenontophyton* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\phi\upsilon\tau\acute{o}\nu$ , a growth). Fr., *ténonophyte*. An abnormal outgrowth on a tendon. [L, 50 (a, 14).]

**TENONTOSTOMA** (Lat.), n. n.  $Te^{2n}-o^{2nt}-o(o^{2s})-stom/a^{2s}$ . From  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\delta\omicron\sigma\tau\epsilon\omicron\nu$ , a bone. Ossification of a tendon. [L, 50 (a, 14).]

**TENOPHONIE** (Ger.), n.  $Tan-o-fon-e'$ . See TENDOPHONY.

**TENOPLASTIK** (Ger.), n.  $Tan-o-pla^{2s}t-ek'$ . See under TENOTOMY.

**TENORRHAPHY**, n.  $Te^{2n}-o^{2r}/a^{2f}-i^{2t}$ . Lat., *tenorrhaphia* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\rho\acute{\alpha}\phi\eta$ , a seam). Fr., *ténorraphie*. Ger., *Schnennaht*, *Tenorrhaphie*. The suture of a divided tendon.

**TENOSITIS** (Lat.), n. f.  $Te^{2n}-o^{2s}-i(e)/ti^{2s}$ . Gen., *-it'idis* (-idis). Fr., *ténosite*. Inflammation of a tendon. [a, 34.]

**TENOSYNITIS** (Lat.), **TENOSYNOVITIS** (Lat.), n's f.  $Te^{2n}-o(o^{2s})-si^{2n}(su^{2n})-i(e)/ti^{2s}$ ,  $-si^{2n}(su^{2n})-o-vi(we)/ti^{2s}$ . Gen., *-it'idis* (-idis). From  $\tau\epsilon\nu\omicron\nu$ , a tendon, and *synovia* (q. v.). Fr., *ténosynite*. Inflammation of the sheath of a tendon and of the contiguous surface of the tendon; "An affection usually occurring in the forearm and characterized by a peculiar creaking of the tendons as they move in their sheaths, depending upon a particular kind of strain to which the muscles belonging to these tendons have been subjected." [Hopkins, "Boston Med. and Surg. Jour.," July 27, 1882, p. 81.]—**Crepitant t.** See **AL.—T. hyperplastica**. A painless swelling of the extensor tendons over the wrist joint; caused by the irritation to which they may be exposed or by trophic disturbances arising from paralysis of the radial nerve. [D, 35.]

**TENOTOMANIA** (Lat.), n. f.  $Te^{2n}-o^{2t}(o^{2t})-o-ma(ma^{2s})/ni^{2t}-a^{2s}$ . From  $\tau\epsilon\nu\omicron\nu$ , a tendon,  $\tau\epsilon\nu\epsilon\iota\nu$ , to cut, and  $\mu\alpha\nu\iota\alpha$ , mania. An inordinate propensity to perform tenotomy, especially on the ocular muscles. ["Med. News," Sept. 16, 1893, p. 323.]

**TENOTOME**, n.  $Te^{2n}-o^{2t}-om$ . Lat., *tenotomus* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\tau\epsilon\nu\epsilon\iota\nu$ , to cut). Fr., *ténotome*. Ger., *Tenotom*. A small, narrow-bladed knife for dividing tendons subcutaneously. [E.] See also **ARONEURORRHOE**.—**Gruber's t.** A t. consisting of a simple blade, slightly curved at the end, inserted in an adjustable handle so that it may be used for either ear. [F.]—**Hartmann's t.** A t. consisting of a small knife, curved on the flat and on the edge; used in dividing the tendon of the tensor tympani. [F, 32.]

**TENOTOMIE** (Fr.), n.  $Tan-o-tom-e$ . See TENOTOMY.—**T. à ciel ouvert**. Open, as opposed to subcutaneous, tenotomy. [Le-vrat, "Prov. méd.," 1888, No. 43, p. 609.]

**TENOTOMY**, n.  $Te^{2n}-o^{2t}/om-i^{2t}$ . Lat., *tenotomia* (from  $\tau\epsilon\nu\omicron\nu$ , a tendon, and  $\rho\acute{\alpha}\phi\eta$ , a cutting). Fr., *ténotomie*. Ger., *Tenotomie*, *Tenoplastik*, *Schnenschnitt*. The operation of dividing a tendon.—**Abadie's partial t. for muscular asthenopia**. An operation in which the conjunctiva is opened in the usual way, the hook introduced beneath the tendon, and the tendon divided from one side by little cuts to near the centre of the tendon. The tendon is then divided in the same way on the other side, and there are left a few median fibres undivided from their attachment to the sclera.

[“Ann. d'ocul.,” May–June, 1880 (F).]—**Graduated t.** A partial t. of one or more of the ocular muscles for the purpose of relieving overaction. [“N. Y. Med. Jour.,” Apr. 21, 1888, p. 440 (a, 34).]—**Kessel's t. of the stapedius**. An operation which consists in making an incision through the membrana tympani, and then dividing the muscle by an incision perpendicular to its length, in order to relieve the shortening produced in the muscle by cicatricial shrinking of the sheath of the tendon. [“Arch. f. Ohrenheilk.,” xi (F).]—**Snellen's t. for strabismus**. An operation which consists in dividing the conjunctiva horizontally between the two margins of the muscle, and then dissecting up the conjunctiva on both sides as far as the caruncle. The tendon sheath is then opened by a small cut and the tendon divided subconjunctivally. [“Klin. Monatsbl.,” Jan., 1870 (F).]—**Tarsal t.** Of the veterinarians, t. of the peroneus tendon for the relief of spavin. [L, 41 (a, 14).]—**T. of the tensor tympani**. An operation for diminishing the excessive tension of the membrana tympani and of the ossicula and the abnormal increase of pressure in the labyrinth connected therewith. The tenotome is introduced through an incision in the posterior segment of the membrana tympani into the tympanic cavity. The knife, having entered for about 3 mm., lies below the tendon of the tensor tympani between the handle of the malleus and the long crus of the incus. By slightly sinking its handle, the sharp joint of the tenotome is forced so far toward the upper part of the tympanic cavity that the tendon is obliquely divided as the knife is withdrawn. [F, 32.]—**Von Graefe's t. for strabismus**. An operation in which the conjunctiva bulbi is divided vertically just in front of the line of insertion of the tendon of the muscle, and the sheath is opened. Then a large blunt hook (strabismus hook) is introduced beneath the conjunctiva and sheath close to the upper border of the tendon, and the hook swept round and downward between the sclera and tendon so as to engage the entire width of the tendon in its grasp. Then the muscle is dissected free from the sclera backward for a considerable distance before being divided close to its insertion. [“Arch. f. Ophth.,” iii, 11 (F).]

**TENSEUR** (Fr.), n.  $Ta^{2n}n^{2t}-su^{2r}$ . See TENSOR.—**T. de la muqueuse alvéolo-labiale**. A small muscle lying beneath the levator labii superioris alaeque nasi, attached to the superior maxilla, and inserted into the alveolo-labial mucous membrane. It forms part of the compressor naris. [L.]

**TENSION**, n.  $Te^{2n}/shu^{2n}$ . Gr.,  $\tau\acute{\alpha}\nu\sigma\iota\varsigma$ . Lat., *tensio* (from *tendere*, to stretch). Fr., t. Ger., *Spannung*, *Spannkraft*, *Straffheit*. 1. The state of being stretched or distended. 2. A feeling of fullness or resistance in the pulse. [K.]—**Elastic t.** The application of traction to a part by means of an elastic material. [Roberts, “Illustr. Quart. of Med. and Surg.,” July, 1882, p. 77.]—**Elastic t. of the lung**. The distention of the lung by gas or fluid due to the elasticity of the organ. [Landois (a, 34).]—**Intra-ocular t.** See **INTRA-OCULAR PRESSURE**.—**Muscular t.** The state of moderate contraction of muscles or groups of muscles which occurs when they are stretched by passive movements or by the voluntary contraction of their antagonizing muscles. [D, 35.]—**Residual t. of the lung**. See **Elastic t. of the lung**.

**TENSOR** (Lat.), n. m.  $Te^{2ns}/o^{2r}$ . Gen., *-or'is*. From *tendere*, to stretch. Fr., *tenseur*. Ger., *Spannmuskel*. A muscle having the function of rendering a part tense.—**Brevis digitorum t.** See **EXTENSOR digitorum pedis brevis**.—**T. aponeuroseos perinealis**. See **ISCHIO-BULBOSUS**.—**T. capsulae (humeralis)**. See under **CORACOCAPSULARIS**.—**T. capsulae tibiotarsalis**. See **TIBIALIS secundus**.—**Tes capsularum articulationum**. Ger., *Kapsel-spanner*. Muscles inserted into the capsules of joints, which they are supposed to render tense. [L, 332.]—**T. chorioideæ** [Brücke]. See **Ciliary muscle**.—**T. digitorum**. See **EXTENSOR digitorum manus communis**.—**T. fasciæ deltoideus**. See under **ACCESSORY DELTOID**.—**T. fasciæ dorsalis pedis**. See **TIBIOFASCIALIS**.—**T. fasciæ et cutis foreæ axillaris**. An anomalous muscle arising from the tendon of the subscapularis and inserted into the skin of the axilla. [L, 31.]—**T. fasciæ late**. A muscle arising from the anterior margin of the crest of the ilium and a portion of the bone extending to the origin of the sartorius, and, after passing down between two folds of the fascia lata, inserted into its upper third. [L, 31, 332.]—**T. fasciæ pelvis**. See **RECTO-COCCYGEUS**.—**T. fasciæ plantaris**. An anomalous muscle arising from the tibia beneath the origin of the soleus, and inserted into the plantar fascia or some of the structures in the sole. [L.]—**T. fasciæ suralis**. An anomalous offshoot of the semimembranosus inserted into the fascia of the leg. [L.]—**T. ligamenti annularis radii anterior**. An anomalous muscle arising from the coronoid process of the ulna and inserted into the annular ligament of the wrist. [L, 332.]—**T. ligamenti annularis radii dorsalis**. See **TIBIALIS secundus**.—**T. ligamenti annularis radii posterior**. See **TIBIALIS secundus**.—**T. ligamenti annularis radii volaris**. See **T. ligamenti annularis radii anterior**.—**T. membrani synovialis tarsi**. See **TIBIALIS secundus**.—**T. of the capsular ligament** [Leyh]. See **SCAPULOHUMERALIS parvus**.—**T. of the capsule of the ankle**. See **TIBIALIS secundus**.—**T. palati (mollis)**. See **ABDUCTOR of the Eustachian tube**.—**T. semivaginé articulationis humeroscapularis**. An anomalous muscle arising from the cartilages of the two or three upper ribs and inserted into the sheath of the biceps flexor cubiti. [L, 31.]—**T. tarsi**. Ger., *Thränsackmuskel*. A small, thin muscle, situated at the inner side of the orbit, behind the tendo oculi. It arises from the crest and adjacent part of the orbital surface of the lacrimal bone, and, passing across the lacrimal sac, divides into two slips, which cover the canaliculi and are inserted into the tarsi near the lacrimal puncta. [F.]—**T. tibiotarsalis**. See **TIBIALIS secundus**.—**T. tympani**. Ger., *Pauken-fellspanner*, *Hammermuskel*. A muscle arising in front of the anterior surface of the canalis pro tensore tympani, on the osseous wall of the pyramid adjacent to the carotid canal, and from the cartilaginous Eustachian tube. The tendon leaves the canal at

the rostrum cochleare, extends across the tympanic cavity, and is inserted on the inner margin of the handle of the malleus, at the anterior edge of the rhomboidal surface, in an oblique direction to the longitudinal axis of the malleus. It acts to increase the tension of the membrana tympani and also the pressure in the labyrinth. [F, 3.]—**T. vagina.** See LIOAPONEUROTICUS.—**T. vaginæ femoris.** See *T. fasciæ latæ*.—**T. veli palati** (seu palatini). See ABDUCTOR of the *Eustachian tube*.

**TENT**, n.  $\text{Te}^2\text{n}^2\text{a}^2\text{k}^2\text{l}^2$ . Lat., *tenta, tentum*. Fr., *tente, mèche*. Ger., *Meissel*. A substance to be introduced into a wound or canal, so as to prevent it from closing or to dilate it slowly by its expansion when moistened. [E.]—**Cornstalk t.** A t. made of the compressed pith of the cornstalk. [A, 24.]—**Laminaria t.** Sea-tangle t. A t. made of the dried stems of *Laminaria conica*. [E.]—**Sponge t.** Fr., *cône d'éponge préparée, tente éponge*. Ger., *Pressschwamm, Presskegel*. A t. made of compressed sponge. [E.]

**TENTACLE**, n.  $\text{Te}^2\text{n}^2\text{a}^2\text{k}^2\text{l}^2$ . Lat., *tentaculum* (from *tentare*, to handle). Fr., *tentacule, barbillon* (1st def.). Ger., *Tentakel, Ankerhüchken* (1st def.), *Fühlfaden* (1st def.), *Randzaser* (3d def.), *Ragfaser* (3d def.). 1. One of the long and slender appendages that certain animals use as feelers or for prehension. [a, 48.] 2. One of the glandular hairs clothing the leaves of certain insectivorous plants. 3. A filiform or hair-like fringe to the border of the thallus of some lichens. [a, 35.]—**Prestomial t.** Fr., *antenne médiane*. One of the smaller anterior pair of t's situated in front of the mouth in crustaceans. [L, 37 (a, 14).]

**TENTACULAR**, adj.  $\text{Te}^2\text{n}^2\text{a}^2\text{k}^2\text{l}^2\text{u}^2\text{a}^2\text{r}$ . Resembling the feelers of a snail. [a, 35.]

**TENTACULUM** (Lat.), n. n.  $\text{Te}^2\text{n}^2\text{a}^2\text{k}^2\text{l}^2\text{u}^2\text{a}^2\text{r}$  ( $\text{u}^2\text{l}^2$ )- $\text{u}^2\text{m}^2$  ( $\text{u}^2\text{m}$ ). See TENTACLE.

**TENTE** (Fr.), n.  $\text{Ta}^2\text{n}^2\text{t}$ . See TENTORIUM.—**T. du cercelet.** See TENTORIUM cerebelli.

**TENTIGO** (Lat.), n. f.  $\text{Te}^2\text{n}^2\text{ig}^2$  ( $\text{eg}^2\text{o}$ ). Gen., *-tig'inis*. From *tendere*, to stretch out. Lecherousness, lust. [A, 312 (a, 21).]—**T. prava**. An old name for lupus. [G.]—**T. venerea**. An old term for nymphomania. [A, 42.]

**TENTORIUM** (Lat.), n. n.  $\text{Te}^2\text{n}^2\text{or}^2\text{i}^2\text{u}^2\text{m}$  ( $\text{u}^2\text{m}$ ). From *tendere*, to stretch out. Fr., *plancher du cerveau*. Lit., a tent; see T. cerebelli.—**T. cerebelli**. Fr., *repli transverse du falx du cervelet*. Ger., *Querfortsatz der harten Hirnhaut*. A fold of dura which separates the cerebrum and cerebellum, supporting the occipital lobes. [K.]

**TENUIFLORUS** (Lat.), adj.  $\text{Te}^2\text{n}^2\text{u}^2\text{f}^2\text{l}^2\text{o}^2\text{r}^2$  ( $\text{u}^2\text{s}$ )- $\text{u}^2\text{s}$  ( $\text{u}^2\text{s}$ ). From *tenuis*, slender, and *flos*, a flower. Fr., *ténuiflore*. Formed of minute flowers. [a, 35.]

**TENUIROSTRAL**, **TENUIROSTRATE**, adj's.  $\text{Te}^2\text{n}^2\text{u}^2\text{i}^2\text{r}^2\text{o}^2\text{s}^2\text{t}^2\text{r}^2\text{a}^2\text{l}$ ,  $\text{Te}^2\text{n}^2\text{u}^2\text{i}^2\text{r}^2\text{o}^2\text{s}^2\text{t}^2\text{r}^2\text{a}^2\text{t}$ . Lat., *tenuirostris* (from *tenuis*, slender, and *rostrum*, the beak). Fr., *ténuirostre*. Having a long slender bill with a short cleft; in botany, having a thin rostellum. [L, 221; a, 35.]

**TENUIS** (Lat.), adj.  $\text{Te}^2\text{n}^2\text{u}^2\text{i}^2\text{s}$ . Thin, delicate; as a n., a slender muscle. [a, 17.]—**T. femoris**. See GRACILIS anterior.

**TEPAL**, n.  $\text{Te}^2\text{p}^2\text{l}$ . A transposition of *petal* (cf. SEPAL). Lat., *tepalum*. Fr., *tepale*. Ger., *Perigonblatt, Blüthenhüllblatt*. A division of the perianth; either a sepal or a petal. [a, 35.]

**TEPHRA** (Lat.), n. f.  $\text{Te}^2\text{p}^2\text{r}^2\text{a}^2$ . Gr., *τέφρα*. Dust, ashes. [L, 50 (a, 14).]

**TEPHROMYELITIS** (Lat.), n. f.  $\text{Te}^2\text{p}^2\text{r}^2\text{o}^2\text{s}^2\text{i}^2\text{m}^2\text{i}^2\text{f}^2\text{e}^2\text{r}^2\text{i}^2\text{s}$  ( $\text{e}^2\text{r}^2\text{i}^2\text{s}$ ). Gen., *-it'idis* (*-idis*). From *τέφρα*, ashes, and *μυελός*, marrow. Fr., *téphromyélie*. See POLIOMYELITIS.—**Acute anterior t.** See ACUTE anterior POLIOMYELITIS.

**TEPHROSIA** (Lat.), n. f.  $\text{Te}^2\text{p}^2\text{r}^2\text{o}^2\text{s}^2\text{i}^2\text{a}^2$ . From *τέφρος*, ash-colored. Fr., *téphrosie*. A genus of the *Leguminosæ*. [a, 35.]—**T. apollinea**. Indigo-plant of Egypt and Nubia. The seed-vessels and the bitter leaves were formerly used to adulterate senna. An ointment prepared from the seeds is used for wounds in camels. The plant yields a variety of indigo. [a, 35.]—**T. cinerea**. Fr., *bois d'indier*. Goat's rue of the West Indies; a species used like *T. toxicaria*. [a, 35.]—**T. emarginata**. An Orinoco species with a purgative root. [a, 35.]—**T. leptostachya**. An African species. The root is purgative. [a, 35.]—**T. purpurea**. An East Indian and Ceylon species. The juice is applied to pustular eruptions of the face. The bitter roots, which are considered alterative, tonic, laxative, antelmintic, febrifuge, and antemetic, are used in diarrhoea, dysentery, dyspepsia, elephantiasis, etc., and in a wash for the mouth. [a, 35.]—**T. spinosa**. An East Indian shrub. Its root is used as a stomachic. [a, 35.]—**T. toxicaria**. Indigo-plant of the Niger, West Indian fish-poison plant, Surinam poison; a native of Africa, naturalized in the West Indies. The roots are used in skin diseases, and the leaves and branches as a fish-poison. [a, 35.]—**T. virginiana**. Turkey pea, catgut, Virginian goat's rue; found in various parts of the United States. The roots, which are said to be anthelmintic, are aperient and tonic, and are recommended in typhoid fever. [a, 35.]

**TEPHROSIS** (Lat.), n. f.  $\text{Te}^2\text{p}^2\text{r}^2\text{o}^2\text{s}^2\text{i}^2\text{s}$ . Gen., *-ros'eos* (*-is*). Gr., *τέφρωσις* (from *τέφρος*, to burn to ashes). Fr., *téphrose*. See INCERATION.

**TEPHYRYLOMETER**, n.  $\text{Te}^2\text{p}^2\text{r}^2\text{i}^2\text{o}^2\text{m}^2\text{e}^2\text{t}^2\text{r}^2$ . From *τέφρα*, ashes, *μᾶτ*, matter, and *μέτρον*, a measure. Of H. C. Major, a graduated thin glass tube, open at both extremities, that is plunged into the cerebral convolutions so as to remove a segment of tissue that will permit of the measurement of the thickness of the gray matter. ["Lancet," 1873, ii, p. 623 (a, 34).]

**TEPIDARIUM** (Lat.), n. n.  $\text{Te}^2\text{p}^2\text{i}^2\text{d}^2\text{a}^2\text{r}^2\text{i}^2\text{u}^2\text{m}$  ( $\text{u}^2\text{m}$ ). Gr., *ἀποθερίδιον*. Fr., *tepidaire, étuve sèche*. See under ROMAN BATH.

**TEPLITZ-SCHÖNAU**, n. A place in Bohemia, famous as a watering resort, where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49, 57 (a, 14).]

**TEPLITZ-WARASDIN**, n. A place in Warasdin County, Croatia, where there is a hot alkaline and sulphurous spring.

**TEQUEZQUITE** (Sp.), n. In Mexico, saline efflorescences found especially in the valley of Mexico, and consisting chiefly of sodium carbonate. [B, 224 (a, 14).]

**TERABDELLA** (Lat.), n. f.  $\text{Te}^2\text{r}^2\text{a}^2\text{b}^2\text{d}^2\text{e}^2\text{l}^2\text{l}^2\text{a}^2$ . Perhaps from *τέρας*, a marvel, and *πέδαι*, a leech. Fr., *terabdelles*. Of Damoiseau, a cupping apparatus. [L, 41, 57 (a, 14).]

**TERACRYLIC ACID**, n.  $\text{Te}^2\text{r}^2\text{a}^2\text{k}^2\text{r}^2\text{i}^2\text{l}^2\text{i}^2\text{c}$ . Fr., *acide téra-crylique*. A homologue,  $\text{C}_7\text{H}_{12}\text{O}_2$  (or  $\text{C}_8\text{H}_{14}\text{O}_2$ ), of acrylic acid, formed by the distillation of terpene acid. [B, 3.]

**TERAMNUS** (Lat.), n. m.  $\text{Te}^2\text{r}^2\text{a}^2\text{m}^2\text{n}^2\text{u}^2\text{s}$  ( $\text{nu}^2\text{s}$ ). Ger., *Hakenhülse*. A genus of leguminous herbs. [a, 35.]—**T. uncinatus**. A West Indian species. The leaves are a mild evacuant and the farina of the seed is used in cataplasms. [a, 35.]

**TERAS** (Lat.), n. n.  $\text{Te}^2\text{r}^2\text{a}^2\text{s}$  ( $\text{a}^2\text{s}$ ). Gen., *ter'atos* (*-atis*). Gr., *τέρας*. See MONSTER.—**T. anacatadidymum**. A double monster in which the two individuals are joined by the trunks, but have separate heads and limbs. [a, 34.]—**T. anadidymum**. A double monster in which the individuals are joined from the buttocks downward and separate above. [a, 34.]—**T. catadidymum**. A double monster in which the individuals are joined from the neck or trunk upward and separate below. [a, 34.]

**TERATOCARDIE** (Ger.), n.  $\text{Ta}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{k}^2\text{a}^2\text{r}^2\text{d}^2\text{e}$ . Any monstrosity of the heart. [L, 57 (a, 14).]

**TERATOGENY**, n.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{g}^2\text{e}^2\text{n}^2\text{i}^2$ . From *τέρας*, a monster, and *γένεσις*, generation. Fr., *téatogénèse, téatogénie*. Ger., *Teratogenie*. The production of monsters. [L, 41, 49 (a, 14).]

**TERATOID**, adj.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{id}$ . Gr., *τερατοειδής* (from *τέρας*, a monster, and *εἶδος*, resemblance). Resembling or of the nature of a monster. [a, 17.]

**TERATOLOGY**, n.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{l}^2\text{o}^2\text{g}^2\text{i}^2$ . From *τέρας*, a monster, and *λόγος*, understanding. Fr., *téatologie*. Ger., *Teratologie*. The science of monstrosities. [a, 35.]

**TERATOMA** (Lat.), n. n.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{m}^2\text{a}^2$ . Gen., *-om'atos* (*-atis*). From *τέρας*, a monster. Fr., *teratome*. Of Virchow, a tumor containing various structures of the body, as if from a malformed foetus. They arise by the abnormal inclusion of a whole embryo or a portion of one. [a, 34.] Cf. *Fœtus inclusus*.

**TERATOPHOBIA** (Lat.), n. f.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{p}^2\text{h}^2\text{o}^2\text{b}^2\text{i}^2\text{a}$ . From *τέρας*, a monster, and *φόβος*, fear. Of Venanzio, morbid fear of monsters, both actual and mythological, of deformed or physically peculiar persons, or of caricatures. ["Gazz. degli ospit.," 1892, No. 12, p. 106 (a, 34).]

**TERATOSIS** (Lat.), n. f.  $\text{Te}^2\text{r}^2\text{a}^2\text{t}^2\text{o}^2\text{s}^2\text{i}^2\text{s}$ . Gen., *-os'eos* (*-is*). From *τέρας*, a monster. Properly, the formation of a monstrosity; a congenital deformity. The *Teratoses* of Fuchs are a family of the *Morphonosis* of the skin, including *Dysmorphoses* and *Heteromorphoses*. [G.]

**TERBASIC**, adj.  $\text{Tu}^2\text{r}^2\text{bas}^2\text{i}^2\text{c}$ . See TRIBASIC.

**TERBIUM** (Lat.), n. n.  $\text{Te}^2\text{r}^2\text{b}^2\text{i}^2\text{u}^2\text{m}$  ( $\text{u}^2\text{m}$ ). From *Ytterby*, a place in Sweden. Fr., *T.* Ger., *T.* A metallic element not yet isolated, acting in compounds as a trivalent radicle. Symbol Tr or Tb. Its existence has been disputed. [B, 3, 8.]

**TERCHLORIDE**, n.  $\text{Tu}^2\text{r}^2\text{klor}^2\text{i}^2\text{d}$  (*id*). A trichloride. [B.]

**TERCINE**, n.  $\text{Tu}^2\text{r}^2\text{s}^2\text{en}$ . From *tertius*, third. Fr., *t.* The outer layer of cells of the nucleus of a vegetable ovule. [a, 35.]

**TERCIS** (Fr.), n.  $\text{Te}^2\text{r}^2\text{s}$ . A place in the department of the Landes, France, where there is a hot alkaline, saline, and sulphurous spring. [L, 41, 49, 57 (a, 14).]

**TEREBELLA** (Lat.), n. f.  $\text{Te}^2\text{r}^2\text{e}^2\text{b}^2\text{e}^2\text{l}^2\text{l}^2\text{a}^2$ . Dim. of *terebrata*, a borer. See TREPHINE.

**TEREBELLUM** (Lat.), n. n.  $\text{Te}^2\text{r}^2\text{e}^2\text{b}^2\text{e}^2\text{l}^2\text{l}^2\text{u}^2\text{m}$  ( $\text{u}^2\text{m}$ ). From *terebrata*, a borer. Fr., *craniolome térébrante*. 1. An instrument invented by Dugès for perforating the vault of the cranium in the operation of craniotomy, or for boring into the base of the skull for the purpose of breaking it up or of making traction. Its end was in the form of a conical screw. [A. R. Simpson, "Brit. Med. Jour.," Dec. 13, 1884, p. 1178.] 2. The working blade of Hubert's transfereur.

**TEREBENE**, n.  $\text{Te}^2\text{r}^2\text{e}^2\text{b}^2\text{e}^2\text{n}$ . Fr., *térébène*. Ger., *Tereben*. A mixture of optically inactive terpenes obtained by distilling oil of turpentine with 5 per cent. of concentrated sulphuric acid, washing with soda solution, drying with calcium chloride, and then distilling the portion which boils between 156° and 160° C. It has an agreeable odor, and is used medicinally instead of oil of turpentine when the odor of the latter is objectionable, also as a surgical dressing and antiseptic. [B, 270 (a, 380).]

**TEREBENTENE**, n.  $\text{Te}^2\text{r}^2\text{e}^2\text{b}^2\text{e}^2\text{n}^2\text{e}^2\text{n}$ . Fr., *térébenthène*. Ger., *Terebenthon*. Lavopinenone; a liquid hydrocarbon,  $\text{C}_{10}\text{H}_{16}$ , being one of the modifications of oil of turpentine, found also in the oils of thyme and anise. [B, 3 (a, 380).]

**TÉRÉBENTHINE** [Fr. Cod.] (Fr.), n. *Tara-ha-n-ten*. Turpentine. [a, 35.]—**Épave de t.** Essence de t., Huile essentielle (ou volatile) de t. See OIL of TURPENTINE. **Onguent de t. camphré**. See BAISAMUM Genuerivæ.—**Pilules de t.** [Fr. Cod.]. Sp., *píldoras de trementina* [Sp. Ph.]. A pill mass consisting of 10 grammes each of Strassburg turpentine and magnesium carbonate [Fr. Cod.] of 5 grammes of common turpentine and 7 of magnesium carbonate [Sp. Ph.], divided into 50 pills. [B, 95 (a, 380).]—**Pilules de t. cuite** [Fr. Cod.]. Thirty-centigramme pills made from terebinthina cocta (2d def.), and either rolled in powdered magnesium carbonate or kept under water. [B, 95 (a, 380).]—**Pilules de t. magnésées**. See *Pilules de t. Savon de t.*, *Savon rétinolique à la t.* See *Sapo stercorarius*.—**Sirap de t. See *Syrupus***

**TEREBINTHINÆ**.—**T. au citron** [Fr. Cod.]. See **Strassburg TURPENTINE**.—**T. commune**. See **TEREBINTHINA** (1st def.).—**T. cuite**. See **TEREBINTHINA cocta** (1st def.).—**T. d'Alsace**. See **Strassburg TURPENTINE**.—**T. de Bordeaux**. See **TEREBINTHINA** (1st def.).—**T. de Boston**. See **American TURPENTINE**.—**T. de Gilead**. **Canadaturpentine**. [a. 35.]—**T. de sapin**. See **Strassburg TURPENTINE**.—**T. de Suisse**, **T. de Venise**. **Larch turpentine**. [a. 35.]—**T. des Vosges**. See **Strassburg TURPENTINE**.—**T. du térébinthe**. **Chian turpentine**. [a. 35.]—**T. officinale**. **Larch turpentine**. [a. 35.]—**T. purifiée** [Fr. Cod.]. **Turpentine purified by being gently heated in a copper vessel until melted, and then pressed through a cloth**. [B, 113 (a, 38).]

**TEREBENZIC**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-e}^2\text{nz}^2/\text{I}^2\text{k}$ . **Paratoluic acid** (see under **TOLUIC ACID**).

**TEREBIC ACID**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-i}^2\text{k}$ . Fr., *acide térébique*. Ger., *Terebinsäure*. A monobasic crystalline acid,  $\text{C}_7\text{H}_6\text{O}_4$ , produced by the action of nitric acid on oil of turpentine. [B, 4.]

**TEREBILENE**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-i}^2\text{en}$ . Fr., *térébène*. Ger., *Terbilen*, *Kienstoff*. An optically inactive liquid obtained by treating the liquid hydrochlorides of oil of turpentine with heated lime. [B, 4 (a, 38).]

**TEREBINIC ACID**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-i}^2\text{n}^2/\text{I}^2\text{k}$ . See **TEREBIC ACID**.

**TEREBINTH**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-bi}^2\text{nth}$ . See **TEREBINTHUS**.

**TEREBINTHACEOUS**, adj.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-bi}^2\text{nth-a}^2/\text{shu}^2\text{s}$ . 1. **Terebinthine**, resembling turpentine in properties. 2. Resembling the genus *Terebinthus* (*Pistacia*); of the *Terebinthaceæ*, or *Terebintheæ*, an order of dicotyledons, including *Rhus*, *Pistacia*, and other genera now referred to the *Anacardiaceæ*. [a. 35.]

**TEREBINTHINA** (Lat.), n. f.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-bi}^2\text{nth-in}^2(\text{en})^2\text{a}^2$ . Fr., *térébenthine de Bordeaux* (ou *commune*) [Fr. Cod.] (1st def.). It., *Sp. trementina* [Sp. Ph. (1st def.)]. 1. Of the U. S. Ph., Ger. Ph., Austr. Ph., and Netherl. Ph., turpentine, a resinous juice obtained from the trunk of *Pinus australis* [U. S. Ph.] (*Pinus pinaster* [Fr. Cod.], *Pinus pinaster* and *Pinus laricina* [Ger. Ph.], *Pinus pinaster* and *Pinus palustris* [Swed. Ph.], *Pinus silvestris* [Sp. Ph., Netherl. Ph., Roum. Ph., Russ. Ph.], this and *Pinus maritima* [Gr. Ph.], *Pinus silvestris*, other varieties of *Pinus*, and various species of *Picea* [Austr. Ph., Hung. Ph.], various species of *Pinus* [Dan. Ph., Finn. Ph., Norw. Ph.]. [B, 95 (a, 38).] See also **Bordeaux TURPENTINE**. 2. Of the Belg. and Netherl. Ph.'s, see **Larch TURPENTINE**.—**Ætheroleum terebinthinæ**. See **Rectified oil of TURPENTINE**.—**Ætheroleum terebinthinæ crudum**. See **Oil of TURPENTINE**.—**Ætheroleum terebinthinæ depuratum** (see **rectificatum**). See **Rectified oil of TURPENTINE**.—**Alcohol terebinthinæ**. See **Oil of TURPENTINE**.—**Balsamum t. communis**, **Balsamum terebinthinæ**. See **T.** (1st def.).—**Balsamum t. laricina**, **Balsamum t. veneta**. See **Larch TURPENTINE**.—**Confectio terebinthinæ** [Br. Ph.]. Fr., *électuaire (ou opiat) térébenthiné*. Ger., *Terpentinölkwaerge*. A preparation made by rubbing together 1 fl. oz. of oil of turpentine and 1 oz. of powdered licorice-root, and adding 2 oz. of clarified honey. [B, 81 (a, 21).]—**Enema terebinthinæ** [Br. Ph.]. Fr., *lavement térébenthiné*. Ger., *Terpentinölklyster*. An enema consisting of 1 fl. oz. of oil of turpentine and 15 fl. oz. of starch mucilage. [B, 95 (a, 38).]—**Essentia terebinthinæ**. 1. Of the Belg. Ph., see **Oil of TURPENTINE**. 2. A solution of larch turpentine in four times as much 35-per-cent. alcohol, filtered after a fortnight. [B, 119 (a, 38).]—**Essentia terebinthinæ rectificata** [Belg. Ph.]. See **Rectified oil of TURPENTINE**.—**Essentia terebinthinæ sulphurata**. See **Oleum terebinthinæ sulfuratum**.—**Linimentum terebinthinæ**. Syn.: **Linimentum terebinthinatum** [Ger. Ph., 2d ed.]. A liniment made by mixing 65 parts of cerate of resin with 35 of oil of turpentine [U. S. Ph.], by mixing 2 oz. of *sapo mollis* with the same amount of water, and adding a solution of 1 oz. of camphor in 16 fl. oz. of oil of turpentine [Br. Ph.]; or by mixing 6 parts of potassium carbonate with 54 of green soap, and adding 40 of oil of turpentine [Ger. Ph.]. [B, 95 (a, 38).]—**Linimentum terebinthinæ acetatum** (see **aceticum**, see **Stockes**). A liniment consisting of 4 fl. oz. each of camphor liniment and oil of turpentine and 1 oz. of glacial acetic acid [Br. Ph.]; of 60 grammes of oil of turpentine, 5 of oil of lemon, 10 of glacial acetic acid, 120 of rose water, and the yolk of 1 egg [Swiss Ph.]; or of 90 grammes of crude oil of turpentine, 15 of acetic acid, the yolk of 1 egg, and water enough to make 200 grammes [Swed. Ph.]. [B, 95 (a, 38).]—**Oleum terebinthinæ (crudum)**. Oil of turpentine. [a. 35.]—**Oleum terebinthinæ depuratum**. See **Rectified oil of TURPENTINE**.—**Oleum terebinthinæ empyreumaticum**. See **TAR**.—**Oleum terebinthinæ rectificatum**. See **Rectified oil of TURPENTINE**.—**Oleum terebinthinæ sulfuratum**. Sp., *aceite de trementina sulfurado* [Sp. Ph.]. A solution of oleum lini sulfuratum in three times as much (purified) [Russ. Ph., Swed. Ph.] oil of turpentine [Ger. Ph. (1st ed.), Gr. Ph., Swiss Ph., Russ. Ph., Swed. Ph.], or of 6 parts of washed sublimed sulphur in 48 of rectified oil of turpentine [Belg. Ph.], or a preparation made by heating 1 part of sublimed sulphur with 4 parts of linseed-oil to 165° C., maintaining the heat until a drop on a glass slab becomes clear and jelly-like when cold, and adding 15 parts of oil of turpentine [Dan. Ph.], or by digesting 6 parts of sublimed sulphur with 23 of oil of turpentine till the oil becomes red and syrupy, clarifying, and decanting [Sp. Ph.]. [B, 95 (a, 38).]—**Pilule cum t.** See **Pilules de Térébenthine**.—**Pilule cum t. cocta**. See **Pilules de Térébenthine cuite**.—**Sapo terebinthinæ liquidus**. A preparation made by mixing 3 parts of sodium carbonate, 4 of Castile soap, 6 of oil of turpentine, and 60 of water, and adding 6 parts each of compound spirit of mastic and compound spirit of juniper. A very similar preparation is the *baume de vie externe spiritueux*, or *liqueur nerve spiritueuse de Pereboom*, of French writers, made up of 3 parts of potassium carbonate and 4 of white soap dissolved in 40 parts of water and mixed with 6 of oil of turpentine, 1 part of oil of cajuput, and 4 parts of spirit of juniper [Hannover Ph., 1835]; or of a solution of 1 part

each of oil of turpentine and soap in 8 parts of alcohol. [B, 119; "Proc. of the Am. Pharm. Assoc.," xxx, p. 106 (B).]—**Spiritus terebinthinæ**. See **Oil of TURPENTINE**.—**Syrupus terebinthinæ**. Fr., *sirop de térébenthine*. Sp., *jarahe de trementina*. A preparation made by digesting 100 parts of syrup with 10 of larch turpentine [Belg. Ph.] (**Strassburg turpentine** [Fr. Cod.]), bringing up with water if necessary to the original weight, and separating the liquid from the undissolved turpentine [Fr. Cod., Belg. Ph.]; by digesting 6 parts of **Strassburg turpentine** with 24 of water for twelve hours over the water-bath, filtering when cold, and adding 45 parts of sugar [Sp. Ph.]; or by digesting 5 parts of larch turpentine with 60 of boiling water for twelve hours and adding, when cold, 9 parts of sugar for each 5 of filtered liquid [Roum. Ph.]. [B, 95 (a, 38).]—**T. abiegna**, **T. abietina**, **T. argentoratensis**. **Strassburg turpentine**. [a. 35.]—**T. cocta**. Fr., *térébenthine cuite* (1st def.), *poix résine jaune* (2d def.). 1. Of the Pruss. Ph., 6th ed., the residue from the distillation of oil of turpentine (beaten up with water). 2. Of the Belg. Ph., larch (**Strassburg** [Fr. Cod., Sp. Ph.]) turpentine boiled with water until it has a stiffly plastic consistence if plunged into cold water. [B, 95 (a, 38).]—**T. communis**. See **T.** (1st def.).—**T. cyprina**, **T. de Chio**, **T. de Cypro**, **T. e Chio**. **Chian turpentine**. [a. 35.]—**T. empyreumatica**. See **TAR**.—**T. gallica**. **Bordeaux turpentine**. [a. 35.]—**T. laricina**, **T. laricis**, **T. larigna**, **T. officinalis**. See **Larch TURPENTINE**.—**T. pistacina**. **Chian turpentine**. [a. 35.]—**T. veneta**. See **Larch TURPENTINE**.—**T. vulgaris**. See **T.** (1st def.).—**Unguentum de t. et adipibus**. See **Unguentum ELEMI compositum**.—**Unguentum de t. camphoratum**. See **Balsamum Genevieve**.—**Unguentum terebinthinæ**. Syn.: **unguentum terebinthinatum** [Dan. Ph., Norw. Ph.]. An ointment consisting of 24 parts each of yellow wax and lard, 6 of colophony, and 48 fluid parts of oil of turpentine [Br. Ph.]; of equal parts of yellow wax, oil of turpentine (rectified [Russ. Ph.]), and larch [Gr. Ph., Russ. Ph.] (common [Ger. Ph.]) turpentine [Ger. Ph., Gr. Ph., Russ. Ph.]; of equal parts of simple ointment and common turpentine [Roum. Ph.]; of 35 parts each of common turpentine and oil of turpentine with 90 of yellow wax [Norw. Ph.]; or of 36 each of oil of turpentine and common turpentine and 27 of yellow wax [Dan. Ph.]. A similar preparation was the old *Balsamum Frahmii*, or *linimentum digestivum*, made by mixing 1 part of molten yellow wax with 1 part of oil of turpentine and 1 part [Batav. Ph., 1811, *Bav. Ph.*, 1822] (2 parts [Schleswig Ph., 1831, *Hamb. Ph.*, 1835]) of larch turpentine. [B, 95 (a, 38); B, 119.]—**Unguentum terebinthinæ compositum**. An ointment consisting of 96 parts of larch turpentine with 3 each of aloes and myrrh, 24 of olive-oil, and enough yolks of eggs [Ger. Ph., Russ. Ph.], or with 96 parts of olive-oil, 8 of red sandal-wood, 64 of yellow wax, and 4 of balsam of Peru [Netherl. Ph.]; or of 35 parts of larch turpentine, 18 of yellow wax, 12 of oil of turpentine, and 3 each of the tinctures of aloes and myrrh [Swiss Ph.]. [B, 95 (a, 38).]—**Unguentum terebinthinæ resinosis**. See **Unguentum basilicum**.

**TEREBINTHINATE**, adj.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-bi}^2\text{nth-i}^2\text{n-at}$ . Lat., *terebinthinatus*. Fr., *térébenthiné*. Composed of or containing turpentine. [a. 35.]

**TEREBINTHINE**, adj.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-bi}^2\text{nth-i}^2\text{n}$ . See **TEREBINTHACEOUS** (1st def.).

**TEREBINTHUS** (Lat.), n. f.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-i}^2\text{nth-u}^2\text{s(u)}^2\text{s}$ . The genus *Pistacia*, especially *Pistacia t.* The *Terebinthinaceæ* are a family of resinous plants (including *Pistacia*, *Juglans*, *Bursera*, *Rhus*, etc.). The *Terebinthina*, or *Terebintheæ*, are a class of gymnosteleous plants consisting of the *Ochnææ*, *Simarubeæ*, *Diosmeæ*, *Eutaceæ*, etc. [a. 35.]—**T. lentiscus**. See *Pistacia lentiscus*.—**T. vulgaris**. See *Pistacia t.*

**TEREBRA** (Lat.), n. f.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-ra}^2$ . From *terere*, to rub. See **TREPINE**.—**T. occulta**. A concealed perforator invented by Sir Fielding Ould.

**TÉRÉBRANT** (Fr.), adj.  $\text{Ta-ra-bra}^2\text{n}^2$ . Boring or penetrating (said of pain). [E.]

**TEREBRATION**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-ra}^2\text{-shu}^2\text{n}$ . Lat., *terebratio* (from *terebrare*, to bore through). Perforation.

**TERECAMPHENE**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-ka}^2\text{mf}^2\text{en}$ . Fr., *térécamphène*. Ger., *Terecamphen*. A terpene,  $\text{C}_{10}\text{H}_{16}$ , occurring as feathery crystals. [B, 4, 270 (a, 38).]

**TERECHRYSIC ACID**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{b}}\text{-kri}^2\text{s/i}^2\text{k}$ . Fr., *acide téréchrysique*. An acid,  $\text{C}_8\text{H}_8\text{O}_8$ , obtained by Cailliot in the oxidation of oil of turpentine by diluted nitric acid. It forms a pasty, orange-yellow, uncrystallizable mass of a sour, afterward astringent and bitter, taste, soluble in all proportions in water, in alcohol, and in ether. [B, 93 (a, 14).]

**TEREDO** (Lat.), n. f.  $\text{Te}^2\text{r}^{\text{e}^2\text{d}}\text{(ad)}^2\text{o}$ . Gen., *-ed/inis*. Gr., *τερεδών*. 1. A wood-worm. [a. 48.] 2. See **CARIES** (1st def.).—**T. ossium**. See **CARIES** (1st def.).

**TEREPHTHALAMIC ACID**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{f}}\text{-tha}^2\text{l-a}^2\text{m-i}^2\text{k}$ . Fr., *acide téraphthalamique*. An acid,  $\text{C}_8\text{H}_4(\text{CO.NH}_2)_2\text{CO.OH}$ , occurring as microscopic crystals. [B, 3 (a, 35).]

**TEREPHTHALIC ACID**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{f}}\text{-tha}^2\text{l-i}^2\text{k}$ . Fr., *acide téraphthalique*. Ger., *Terephthalsäure*. See under **PHTHALIC ACID**.

**TEREPHTHALYL**, n.  $\text{Te}^2\text{r}^{\text{e}^2\text{f}}\text{-tha}^2\text{l-i}^2\text{l}$ . Ger., *Terphthalyl*. A bivalent radicle,  $\text{C}_8\text{H}_4\text{O}_2\text{C}_6(\text{H.H.CO}^2\text{H.H.CO}^2)$ , found in terephthalic acid. [B.]—**T. chloro**. A crystalline mass,  $\text{C}_8\text{H}_4(\text{COCl})_2$ , of rather sharp cinnamon-like smell. [B, 3, 4 (a, 38).]

**TERES** (Lat.), adj.  $\text{Ter}^2(\text{te}^2\text{r})^2\text{ez}^2(\text{as})$ . Terete; as a n., a round, slender muscle. [a. 17.]—**T. antibrachii**. See **Pronator radii t.**—**T. major**. A muscle arising from the posterior surface of the inferior angle of the scapula and its anterior margin and inserted into the lesser tuberosity of the humerus. [L.]—**T. minimus**. An anomalous outshoot from the lower portion of the t. minor, inserted into the humerus below the insertion of the latter. [L. 832.]—**T. minor**. Fr., *petit rond*. Ger., *kleiner runder Armmuskel*. 1. A

muscle arising from the infraspinous fossa of the scapula, its anterior margin, and the overlying fascia, and inserted into the greater tuberosity of the humerus. [L.] 2. Of Percivall, see SCAPULO-HUMERALIS minor.

**TERETE**, adj.  $\text{Te}^2\text{r-et'}$ . Lat., *teres* (from *terere*, to rub). Fr., *terète*. Ger., *stielrund*, *drahtrund*. Cylindrical. [a, 35.]

**TERETINIC ACID**, n.  $\text{Te}^2\text{r-e}^2\text{-i}^2\text{-n'ik}$ . Fr., *acide térébintique*. A crystallizable acid,  $\text{C}_{10}\text{H}_{14}\text{O}_6$ , obtained by gently heating oil of turpentine with lead protoxide. [B, 93 (a, 14).]

**TERETIPRONATOR** [Cous] (Lat.), n. m.  $\text{Te}^2\text{r'e}^2\text{-i}^2\text{-pr}$ -(pro<sup>2</sup>)-nat(na<sup>2</sup>t)o<sup>2</sup>r. Gen., -o<sup>2</sup>i<sup>2</sup>s. See PRONATOR radii teres.

**TERETISCAPULARIS** [Cous] (Lat.), n. m.  $\text{Te}^2\text{r-e}^2\text{-i}^2\text{-ska}^2\text{p}$ -(ska<sup>2</sup>p)-u<sup>2</sup>l(u<sup>2</sup>l)-a(a<sup>2</sup>)ri<sup>2</sup>s. From *teres*, rounded, and *scapula* (q. v.). See TERES major.

**TERETRION** (Lat.), **TERETRIUM** (Lat.), **TERETRON** (Lat.), n's n.  $\text{Te}^2\text{r-e}^2\text{-ri}^2\text{-o}^2\text{n}$ , -u<sup>2</sup>m(u<sup>2</sup>m),  $\text{te}^2\text{r'e}^2\text{-ro}^2\text{n}$ . Gr., *τερετριον*, *τερετριον* (from *τερετριον*, to rub hard). See TREPHINE.

**TERGAL**, adj.  $\text{Tu}^2\text{r-g'}$ l. See DORSAL.

**TERGEMINAL**, **TERGEMINATE**, **TERGEMINOUS**, adj's.  $\text{Tu}^2\text{r-je}^2\text{m'i}^2\text{-n'l}$ , -nat, -nu<sup>2</sup>s. Lat., *tergeminatus*, *tergeminus* (from *ter*, three times, and *geminus*, twin-born). Fr., *tergeminé*. Ger., *dreifach-zweizählig*, *dreimal-gezweit*, *dreifach-gepaart*. Thrice geminate; i. of a compound leaf, having the common petiole terminating in three pairs of leaflets. [a, 35.]

**TERGISPERMUS** (Lat.), adj.  $\text{Tu}^2\text{r-j}^2\text{(te}^2\text{rg)-i}^2\text{-spu}^2\text{rm(spe}^2\text{rm)-u}^2\text{s(u}^2\text{s)}$ . From *tergum*, the back, and *σπέρμα*, a seed. Fr., *tergisperme*. Having the fructification occupying the back of the leaf (frond). [a, 35.]

**TERGUM** (Lat.), n. n.  $\text{Tu}^2\text{r-g}^2\text{(te}^2\text{rg)-u}^2\text{m(u}^2\text{m)}$ . Gr., *ῥῆρον*. The back; the dorsal arc of the somite of an arthropod. [B, 28 (a, 27); L, 196.]

**TERHYDRIDE**, n.  $\text{Tu}^2\text{r-hid'ri}^2\text{d(rid)}$ . A combination of an element or radicle with 3 atoms of hydrogen. [B.]

**TERIODIDE**, n.  $\text{Tu}^2\text{r-i'od-i}^2\text{d(id)}$ . A triiodide. [B.]

**TERM**, n.  $\text{Tu}^2\text{r-m}$ . Lat., *terminus* (from *terminare*, to limit). Fr., *terme*. Ger., *Zeitraum*. 1. A limited or specified time or period. 2. The menstrual period. [a, 48.] 3. The proper time for the cessation of gestation.—**At (full) t**. Fr., *à (bon) terme*. Ger., *rechtzeitig*. At the proper time (said of a birth that takes place at the end of the normal period of gestation). [a, 48.]

**TERMA** [Wilder] (Lat.), n. f.  $\text{Tu}^2\text{r-m(te}^2\text{r-m)-a}^2$ . A lamina of nerve-substance extending between the anterior commissure of the brain and the optic chiasm. [J, 80 (K).]

**TERMATIC**, adj.  $\text{Tu}^2\text{r-m-a}^2\text{t'ik}$ . Supplying the terma. [J.]

**TERMINAISON** (Fr.), n.  $\text{Te}^2\text{r-me-ne}^2\text{-zo}^2\text{n}^2$ . A termination, an extremity. [a, 48.]—**T's hédériformes** [Ranvier]. The sum of the tactile meniscus. [J, 31.]—**T. motrice**. See *Motorial nerve* END-PLATE.—**T's nerveuses**. See NERVE-ENDINGS.

**TERMINAL**, adj.  $\text{Tu}^2\text{r-m'i}^2\text{-n'l}$ . Lat., *terminalis* (from *terminus*, a limit). Fr., *t*. Ger., *gipfelständig*, *endständig*. Pertaining to or situated at the end or apex. [a, 35.]

**TERMINALIA** (Lat.), n. f.  $\text{Tu}^2\text{r-m(te}^2\text{r-m)-i}^2\text{n-al(a}^2\text{l)-i}^2\text{-a}^2$ . From *terminalis*, terminal. Fr., *badamier*, *terminalier*. Ger., *Catapenbaum*. A genus of the *Terminaliaceae* (a family referred by Benthams and Hooker to the genus *T.*). The *Terminalieae*, or *Terminalae*, are a tribe of the *Combretaceae*, corresponding essentially to the suborder *Combretaceae*. [a, 35.]—**T. alata**. Fr., *badamier ailé*. An East Indian species. The bark is febrifuge, and the juice of the leaves is injected into the ear in otitis. [a, 35.]—**T. angustifolia**. Fr., *fauz benjoin*, *bien-joint*, *badamier benjoin*. Ger., *falscher Benzoebaum*, *schmalblättriger Catapenbaum*. A species found in the East Indies and the Mauritius, yielding a resin which contains benzoic acid and is much employed as a cosmetic and as incense. The fruits are used like those of *T. chebula*; and their almond-like seeds, containing a bland oil, are eaten. [a, 35.]—**T. argentea**. A Brazilian species yielding a purgative gum-resin. [a, 35.]—**T. arjuna**. An East Indian species. The astringent bark is used as a cholagogue and vulnerary. The juice of the leaves is used in ophthalmia, and the fruit as a deobstruent and tonic. [a, 35.]—**T. bellerica**, *T. bellirica*. A large Ceylon and East Indian tree. The fruits, belleric myrobalans, are astringent and tonic. Their kernels, which yield an oil used as a hair-tonic, are edible, though narcotic in large quantities; mixed with honey, they are used in ophthalmia. The bark yields by incision an insipid gum. The leaves are astringent. [a, 35.]—**T. benzoin. See *T. angustifolia*.—**T. catappa**. Fr., *badamier de Malabar*, *arbre à huile*, *bois-camels*. Ger., *ächter Catapenbaum*. Country (or Indian, or Malabar) almond-tree; a native of the Moluccas, cultivated in the East and West Indies. The kernels yield a straw-colored oil which has the odor and taste of almond-oil. The astringent bark and leaves yield a black pigment used to color teeth and to prepare Indian ink. The leaves are used in fevers and as an emollient. [a, 35.]—**T. chebula**. Fr., *badamier chebule*, *olivier des nègres*. Ger., *rispiger Myrobalanenbaum*. Negroes' olive-tree; found in the tropics of both hemispheres. The highly astringent fruits, known to old authors as *myrobalani indica* (sen *indica*, sen *indici*, sen *nigres*) when unripe, and as *myrobalani chebula* (sen *chebuli*) when ripe, are used in tanning, as a purgative, and as an application to ulcers and in skin diseases; combined with galls and catechu, they are also used for aphthous affections. The astringent galls produced on the leaves (which have the properties of those of *T. catappa*) are used in infantile diarrhoea. The oily seeds are eaten. [a, 35.]—**T. citrina**. Fr., *badamier citrin*. Ger., *gelber Myrobalanenbaum*. Hara-nut tree; a native of Bengal. The fruits, *myrobalani citrina* (sen *lutei*, sen *flava*), resemble and are used like those of *T. chebula*, but are more bitter. [a, 35.]—**T. latifolia**. A South American and West Indian species. The bark and seed**

are used like those of *T. catappa*. [a, 35.]—**T. macroptera**. Fr., *badamier paniculé*. A Senegambian species furnishing a very astringent gall. The root is purgative. [a, 35.]—**T. tomentosa**. An East Indian tree yielding a gum used as a cosmetic and as an incense. The astringent bark is used for indolent ulcers and in atonic diarrhoea; it contains much calcareous matter, yielding an ash used in place of lime by the chewers of betel-leaf. [a, 35.]

**TERMINALIS** (Lat.), adj.  $\text{Tu}^2\text{r-m(te}^2\text{r-m)-i}^2\text{n-al(a}^2\text{l)-i}^2\text{-a}^2$ . See TERMINAL.

**TERMINATION**, n.  $\text{Tu}^2\text{r-m-i}^2\text{n-a'shu}^2\text{n}$ . Lat., *terminatio* (from *terminare*, to limit). Fr., *termination*. 1. The end or issue. 2. An extremity, an ending. [a, 48.]—**Browne t**. See *Browne body*.—**Nerve t's**. See NERVE-ENDINGS.

**TERMINI** (It.), n.  $\text{Te}^2\text{r-me'ne}$ . A place in the province of Palermo, Sicily, where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49 (a, 14).]

**TERMINTHANTHRAX** (Lat.), n. m.  $\text{Tu}^2\text{r-m(te}^2\text{r-m)-i}^2\text{nth-a}^2\text{nth(a}^2\text{nth)-ra}^2\text{x(ra}^2\text{x)}$ . Gen., -anth'racos (-ia). See TERMINTHUS (2d def.).

**TERMINTHUS** (Lat.), n. f.  $\text{Tu}^2\text{r-m(te}^2\text{r-m)-i}^2\text{nth'u}^2\text{s(u}^2\text{s)}$ . Gr., *τερυνθος* (= *τερεβυνθος*), the turpentine-tree. Ger., *Hundsblatter*, *Ersenblatter* (1st def.), *schwarze Auswüchse* (2d def.). 1. An ancient name for carbuncle or other inflammatory disease of the skin; so called because of a fancied resemblance to the fruit of *Pistacia terebinthus*. 2. Of Plenck, "large, dark-colored inflammatory pustules, observed especially on the legs of women." [G, 11.]—**Terminthi neonatorum**. Of Plenck, a disease of new-born infants characterized by large "pustules" upon the skin containing a dark-colored fluid and surrounded by a red areola, sometimes occurring as an epidemic; pemphigus neonatorum. [G, 11.]

**TERNANT** (Fr.), n.  $\text{Te}^2\text{r-m-a}^2\text{n}^2$ . A place in the department of the Puy-de-Dôme, France, where there is a chalybeate and alkaline spring. [L, 49 (a, 14).]

**TERNATE**, adj.  $\text{Tu}^2\text{r-m'at}$ . Lat., *ternatus*, *ternus* (from *terni*, three each). Fr., *terné*. Ger., *dreizählig* (1st def.), *gedreit* (1st def.), *dreiständig* (2d def.). 1. Consisting of three leaflets inserted upon the petiole at the same point (said of a compound leaf). 2. Of leaves, arranged on a stem or branch in whorls of three. 3. In threes (applied to three similar parts forming any compound organ). [a, 35.]

**TERNSTROEMIA** (Lat.), n. f.  $\text{Te}^2\text{r-n-stru}^2\text{m'i}^2\text{-a}^2$ . From *Ternström*, a Swedish naturalist. A genus of tropical or subtropical evergreen trees or shrubs of the *Ternstroemiaceae* (or *Ternstramiaceae*, or *Ternstroemaceae*), which are an order of the *Guttiferales*. The *Ternstroemiaceae* are also a tribe of that order, comprising *T. Visnea*, *Anacardium*, etc. [a, 35.]—**T. altamirania**, *T. silvatica*. Sp., *yerba del cura* [Mex. Ph.]. A tropical American species. In Mexico the leaves are used in preparing baths for rheumatism and gout. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

**TEROXIDE**, n.  $\text{Tu}^2\text{r-o}^2\text{x'i}^2\text{d(id)}$ . A trioxide. [B.]

**TERPENE**, n.  $\text{Tu}^2\text{r-p'en}$ . Fr., *terpène*. Gr., *Terpen*. Any one of a series of hydrocarbons having the composition  $\text{C}_{10}\text{H}_{16}$ , and occurring very widely in the vegetable kingdom. They are found in all volatile oils except oil of rose, and often form the chief ingredient. They include the *pinenes* (austalene, eucalyptene, and terebentene), the *camphenes* (terecamphene, borneocamphene, and inactive camphene), the *limonene* group (hesperidene, carvone, citrene, isoterpene, inactive limonene, cajeputene, cinene, diisoprene, isoterbentene, and caoutchene), *terpinolene*, *silvestrene*, *terpinene*, and *phellandrene*. [B, 270 (a, 38).]

**TERPENTHIN** (Ger.), n.  $\text{Te}^2\text{r-p-e}^2\text{nt-en'}$ . See TERPENTINE.

**TERPENTIC ACID**, n.  $\text{Tu}^2\text{r-p-e}^2\text{nt'ik}$ . An acid,  $\text{C}_9\text{H}_{14}\text{O}_4$ , formed by the oxidation of oil of turpentine by chromic acid. [B, 3.]

**TERPENTIN** (Ger.), n.  $\text{Te}^2\text{r-p-e}^2\text{nt-en'}$ . See TERPENTINE.—**Deutscher T**. Common European turpentine. [a, 35.]—**El-asser T**. Strassburg turpentine. [a, 35.]—**Französischer T**. Bordeaux turpentine. [a, 35.]—**T'galien**. See *Pistacia GALLI*—**T'öl** [Ger. Ph.]. See OIL OF TERPENTINE.—**T'seife**. See SAPO terebinthinatus.

**TERPILENE**, n.  $\text{Tu}^2\text{r-p'i}^2\text{-en}$ . Fr., *terpilène*. 1. A mixed liquid substance consisting chiefly of terpinene. [B, 270 (a, 38).] 2. See TEREBILENE.

**TERPINE**, n's.  $\text{Tu}^2\text{r-p'en}$ . Lat., *terpina*, *terpinum*. Fr., *t*. Ger., *Terpin*. A substance,  $\text{C}_{10}\text{H}_{16}\text{O}_2$ , probably a dihydroxy-derivative of dipentene. It is optically inactive, and is formed by the action of an alcoholic solution of nitric acid on pinene. [B, 4 (a, 38).]—**T. hydrate**. A substance,  $\text{C}_{10}\text{H}_{16}(\text{OH})_2 + \text{H}_2\text{O}$ , occurring as large, transparent, prismatic crystals. When distilled, it boils at  $258^\circ\text{C}$ . after becoming anhydrous, and cools to a hard mass. It is used as an expectorant, and in hay fever and asthma. [B, 3 (a, 38).]

**TERPINENE**, n.  $\text{Tu}^2\text{r-p'i}^2\text{-en}$ . Fr., *terpinène*. A liquid terpene,  $\text{C}_{10}\text{H}_{16}$ , obtained from the oil of Ceylon cardamom and in other ways, having a lemon-like odor and boiling at about  $180^\circ\text{C}$ . [B, 3, 270 (a, 38).]

**TERPINEOL**, n.  $\text{Tu}^2\text{r-p'i}^2\text{-en-o}^2\text{l}$ . Fr., *terpineol*. Ger., *T*. A substance,  $\text{C}_{10}\text{H}_{18}\text{O}$  (or  $\text{C}_{10}\text{H}_{16}\text{O}$ ), derived from terpene by boiling with dilute mineral acids and in other ways, and occurring as a very thick liquid of pleasant odor, sparingly soluble in water. [Am. Jour. of Pharm., June, 1888, p. 307 (B); B, 3, 93, 270 (a, 38).]

**TERPINOL**, n.  $\text{Tu}^2\text{r-p'i}^2\text{-en-o}^2\text{l}$ . Fr., *t*. Ger., *T*. 1. Of List, an impure variety of terpineol. 2. A mixture of terpineol with terpinene, terpinolene, and dipentene, which has been used in bronchial catarrh. [B, 3, 270 (a, 38).]

**TERPINOLENE**, n.  $\text{Tu}^2\text{rp-i}^2\text{n}^0\text{a}^1\text{-en}$ . A liquid terpene,  $\text{C}_{10}\text{H}_{16}$ . [B, 3, 270 (a, 38).]

**TERPINYLENE**, n.  $\text{Tu}^6\text{rp-i}^2\text{n}^1\text{i}^2\text{-en}$ . See TERPILENE.

**TERRA** (Lat.), n. f.  $\text{Te}^2\text{r}^1\text{ra}^2$ . Fr., *terre*. Ger., *Erde*. See *EARTH*.—**Liquor terræ foliatæ tartari**. See *Liquor POTASSII acetici crudus*.—**Liquor terræ ponderosæ salitæ**. See *Solutio muriatis BARYTÆ*.—**Melia t.** See *CHALK*.—**Oleum terræ**. See *PETROLEUM*.—**T. absorbens**. An alkaline earth. [B.]—**T. alana**. Tripoli. [a, 35.]—**T. alba**. See *Philosopher's stone*.—**Terræ alcalinæ**. See *Alkaline EARTHS*.—**T. argilla alba**. See *White BOLE*.—**T. argillacea pura**. The precipitate (washed and dried) obtained by adding a solution of potash to one of alum. [L, 85.]—**T. bolariis**. See *T. argillacea pura*.—**T. calcarata**. See *CHALK*.—**T. calcarea lactiformis**. See *Mineral AGARIC*.—**T. calcarea pura** (seu *usta*). See *Quick-LIME*.—**T. carioca**. Rotten stone. [B.]—**T. cinolia**. See *Fuller's EARTH*.—**T. damnata**. See *CAPTIV mortuum*.—**T. de Malta**. See *T. sigillata melitensis*.—**T. etretia**. See *ERETRIA*.—**T. foetida**. Of Paracelsus, sublimed sulphur. [H.]—**T. foliata**. See *POTASSIUM acetate*.—**T. foliata mercurialis**. See *MERCURY acetate*.—**T. foliata mineralis**. See *SODIUM acetate*.—**T. foliata tartari**. See *POTASSIUM acetate*.—**T. foliata tartari crystallisabilis** (seu *crystallisata*). See *SODIUM acetate*.—**T. japonica**. See *CATECHU*.—**T. lemmia**. **T. lemmiana**. See *Lemnian BOLE*.—**T. merita**. Fr., *terre mérite*. The *Curcuma longa* or its root (turmeric). [a, 35.]—**T. miraculosa Saxoniæ**. Ger., *Eisensteinmark*. An earth, formerly official, composed of iron and aluminium silicates and water. [L, 30 (a, 14).]—**T. oriana**. **T. orleana**. See *ANNOTTO*.—**T. ponderosa**. Native barium sulphate. [a, 35.]—**T. ponderosa acetata**. See *BARIUM acetate*.—**T. ponderosa aerata** (seu *carbonata*). See *BARIUM carbonate*.—**T. ponderosa muriata**. See *BARIUM chloride*.—**T. ponderosa pura**. See *BARYTA*.—**T. ponderosa salita**. See *BARIUM chloride*.—**T. ponderosa sulphurica** (seu *vitriolata*). Native barium sulphate. [a, 35.]—**T. sancta Rulandi**. See *ANTIMONY ash*.—**T. Sancti Pauli**. See *T. sigillata melitensis*.—**T. selinusia**. A friable earth resembling Chian earth and used like it. [L, 105 (a, 50).]—**T. scicula**. See *BEZOAR mineralæ*.—**T. sigillata**. Fr., *terre sigillée*. See *BOLE*.—**T. sigillata melitensis**. Ger., *malthezer Siegelerde*. A white serpentine bole from Malta and Italy. [a, 35.]—**T. umbria**. UMBER. [B.]

**TERRALINE**, n.  $\text{Te}^2\text{r}^1\text{ra}^2\text{-en}$ . See *VASELINE* and *PETROLATUM*.

**TERRAN** (Fr.), n.  $\text{Te}^2\text{r}^1\text{-ra}^2\text{n}^2$ . A place in the department of Cantal, France, where there is a chalybeate spring. [L, 49 (a, 14).]

**TERRE** (Fr.), n.  $\text{Te}^2\text{r}$ . See *EARTH*.—**T. à foulon**. See *CLAY* and *Fuller's EARTH*.—**T. amère**. See *MAGNESIUM carbonate*.—**T. à porcelaine**. See *KAO-LIN*.—**T. bolaire**. See *Armenian BOLE*.—**T. calcaire**. See *LIME*.—**T. de Lemnos**. 1. See *Lemnian BOLE*. 2. The pulp of the fruit of *Adansonia digitata*. [a, 35.]—**T. de Saint-Paul**. See *TERRA sigillata melitensis*.—**T. de Sedlitz**. See *MAGNESIUM carbonate*.—**T. de Sienne**. See *IRON oxide*.—**T. des os**. Normal calcium phosphate. [L, 105 (a, 50).]—**T. douce de vitriol**. See *COLCOATH*.—**T's feuilletées**, **T's foliées**. A name formerly given to the crystallizable acetates. [L, 105 (a, 50).]—**T. magnésienne**. See *MAGNESIUM carbonate*.—**T. pesante**. See *BARYTA*.—**T. pesante aérée**. See *BARIUM carbonate*.—**T. pesante salée**. See *BARIUM chloride*.—**T. sigillée**. See *BOLE*.—**T. verte**. See *COPPER carbonate*.—**T. verte de Véron**. Iron and aluminium silicate, containing magnesium and sodium. [B, 93 (a, 14).]—**T. vitrifiable**. Pure silica. [B, 93 (a, 14).]

**TERRESTRIAL**, adj.  $\text{Te}^2\text{r}^1\text{-re}^2\text{st}^1\text{ri}^2\text{-l}$ . Lat., *terrestris*. Fr., *terrestre*. Pertaining to the land; living or growing on land. [a, 35.]

**TERREUS** (Lat.), adj.  $\text{Te}^2\text{r}^1\text{-re}^2\text{-us}$  (u<sup>4</sup>s). Fr., *terreux*. See *EARTHEN* and *EARTHY*.

**TERROR**, n.  $\text{Te}^2\text{r}^1\text{-or}^2$ . Lat., *t.* Fr., *terreur*. An intense degree of fear. [a, 48].—**Night t.**, **Night t's**. See *PAVOR nocturnus* (2d def.).

**TERSULPHATE**, n.  $\text{Tu}^2\text{r-sul}^1\text{f-at}$ . Lat., *tersulphas*. A sulphate containing three molecules of the sulphuric acid radicle. [B.]

**TERSULPHIDE**, **TERSULPHURET**, n's.  $\text{Tu}^2\text{r-sul}^1\text{f-i}^2\text{d}$  (id),  $\text{-sul}^1\text{f-u}^2\text{-re}^2\text{t}$ . See *TRISULPHIDE*.

**TERTIAN**, adj.  $\text{Tu}^2\text{r-sh}^1\text{n}$ . Lat., *tertionus* (from *tertius*, third). Recurring on the third day (both days of occurrence being reckoned); occurring at intervals of two days, or characterized by such occurrence. [a, 48.]

**TERTIANA** (Lat.), n. f.  $\text{Tu}^2\text{r}^1(\text{te}^2\text{r})\text{-shi}^2(\text{ti}^2)\text{-an}$  (a<sup>2</sup>n/a<sup>2</sup>). From *tertius*, third. See *Tertian FEVER*, and cf. *FEBRIS t. accidentalis* to *FEBRIS t. verminosa*, inclusive.—**T. continua duplex**. See *Double tertian intermittent FEVER* (1st def.).—**T. duplex**. See *Double tertian intermittent FEVER*.—**T. duplicata**. See *Double tertian intermittent FEVER* (1st def.).—**T. pleuritica**. Of Sauvages, pleuritis periodica. [a, 34].—**T. triplex**. See *Triple tertian FEVER*.

**TERTIANARIA** (Lat.), n. f.  $\text{Tu}^2\text{r}^1(\text{te}^2\text{r})\text{-shi}^2(\text{ti}^2)\text{-a}^2\text{n}$  (a<sup>2</sup>n/a<sup>2</sup>) (a<sup>2</sup>y/r<sup>2</sup>i<sup>2</sup>a<sup>2</sup>). From *tertianus*, tertian. Fr., *tertianaire*. The *Scitellaria galericulata*; so called because it was said to cure intermittent fevers. [B, 300 (a, 35).]

**TERTIARISME** (Fr.), n.  $\text{Te}^2\text{r-se-a}^2\text{-resm}$ . A tertiary condition or stage, such as occurs in syphilis. [Fournier, "Arch. gén. de méd.," Sept., 1889 (B).]

**TERTIARY**, adj.  $\text{Tu}^2\text{r-shi}^2\text{-a}^2\text{-ri}^2$ . Lat., *tertiarius* (from *tertius*, third). Fr., *tertiaire*. 1. Of organic compounds, having a radicle substituted in a hydrocarbon attached to a carbon atom which itself is connected with three other carbon atoms; of amines and amides, phosphines, stibines, and arsines, having all three hydrogen atoms of ammonia, phosphoreted hydrogen, etc., replaced by radicles. [B.] 2. In botany, of the third order (said of a branch of a secondary branch). [a, 35.] 3. Of a disease, in the

third stage (said especially of syphilis in the gummatous stage). 4. As a n., one of the remiges growing on the humerus of birds. Sometimes the feathers from the scapula are included. [L, 221.]

**TER TIPARA** (Lat.), n. f.  $\text{Tu}^2\text{rt}^1(\text{te}^2\text{r})\text{-i}^2\text{p}^2\text{a}^2\text{r}$  (a<sup>2</sup>r/a<sup>2</sup>). From *tertius*, third, and *parere*, to bring forth. Fr., *tertipare*. A female parturient for the third time. [a, 48.]

**TERTIUS** (Lat.), adj.  $\text{Tu}^2\text{r}^1(\text{te}^2\text{r})\text{-shi}^2(\text{ti}^2)\text{-us}$  (u<sup>4</sup>s). From *ter*, three times. Third; as a n., the third in a series of muscles.—**T. compositi**. See *TRACHELOMASTOIDEUS* (1st def.).—**T. laryngis**. See *CRICO-ARYTENOIDEUS lateralis*.—**T. movens caput**, **T. Spigelii**, **T. trigemini**. See *TRACHELOMASTOIDEUS* (1st def.).

**TERVALENCE**, n.  $\text{Tu}^2\text{r}^1\text{-va}^2\text{l-e}^2\text{ns}$ . From *ter*, three times, and *valere*, to be worth. See *TRIVALENCE*.

**TERVALENT**, adj.  $\text{Tu}^2\text{r}^1\text{-va}^2\text{l-e}^2\text{nt}$ . See *TRIVALENT*.

**TESCALAMA** (Sp.), n.  $\text{Tas-ka}^2\text{-la}^2\text{-ma}^2$ . A resinous extract obtained from the bark of *Ficus nymphaefolia*, used in plasters, etc. [a, 35.]

**TESSELLATED**, adj.  $\text{Te}^2\text{s}^2\text{-e}^2\text{l-at-e}^2\text{d}$ . Lat., *tessellatus* (from *tessella*, a small square stone). Fr., *tessellé, en damier*. Ger., *würfelig, gewürfelt, schachbrettartig*. Marked with little squares: checkered. [a, 35.]

**TESSERA** (Lat.), n. f.  $\text{Te}^2\text{s}^2\text{-se}^2\text{r-a}^2$ . Lit., a cube (from *terrapies*, four). See *Cuboid BONE*.

**TESSULAR**, adj.  $\text{Te}^2\text{s}^2\text{-u}^2\text{l-a}^2\text{r}$ . Lat., *tessularis*. Ger., *tessularisch*. Having the length, breadth, and thickness equal or nearly so (said of cells and of tissue composed of such cells). [a, 35.]

**TEST**, n.  $\text{Te}^2\text{st}$ . Gr., *κρίσις* (1st def.). Lat., *testamen, testimonium* (1st def.), *testa* (2d def.). Fr., *épreuve* (1st def.), *preuve* (1st def.), *t.* (2d def.), *têt* (2d def.). Ger., *Probe* (1st def.). 1. A trial or experiment made for ascertaining some particular fact or condition; also the substance employed in such an experiment. [a, 48.] 2. See *TESTA*.—**Bond-Ulitzmann t.** The use of phenylhydrazine hydrochloride as a t. for glucose. ["N. Y. Med. Jour.," Jan. 7, 1893, p. 12 (a, 50).]—**Böttger-Nylander t.** A t. for glucose, consisting of a solution made up of 2 parts of a basic salt of potassic bismuth nitrate, 4 of potassic sodium tartrate, and 100 of an 8-per-cent. solution of caustic soda. Of this solution, 1 part is boiled with 10 parts of urine for from 1 to 2 minutes, when a dark solution will be obtained, on cooling, from the oxidation of the bismuth. ["Therap. Gaz.," Oct. 15, 1890, p. 693 (a, 50).]—**Böttger's t.** A t. by which the presence of glucose in urine is shown by the blackening of the white deposit made when the urine is treated with sodium carbonate and boiled with bismuth subnitrate or hydroxide. [B, 270 (a, 38).]—**Breslau t.** A t., of little value, used in medico-legal examinations to determine, by the floating or sinking of the stomach of a foetus in water on its removal from the body, whether or not it has been born alive. [K.]—**Brücke's bismuth iodide t.** A t. by which the presence of glucose is shown by the brown or black coloration it causes in a solution made by boiling for ten minutes 5½ grammes of freshly precipitated bismuth subnitrate and 30 of potassium iodide with 150 c. c. of water, and adding 5 grammes of a 25-per-cent. solution of hydrochloric acid. [B, 270 (a, 38).]—**Bryce's t.** The repetition of a vaccination after four or five days. If first vaccination has affected the whole system, the second vesicle pursues an accelerated course and disappears as soon as the first; otherwise it follows the usual course.—**Catoptric t.** A t. formerly employed for the detection of cataract, by observing the upright reflections of a candle flame from the surfaces of the cornea and the anterior capsule of the crystalline lens, and noting the absence, in cases of cataract, of the inverted image reflected from the posterior capsule of the lens.—**Crucial t.** A t. which determines the matter in question decisively one way or the other. [a, 48].—**Diazo-benzol t.** See *Ehrlich's t.*—**Differential-density t.** A t. for glycosuria. Two specimens of the urine are kept in a warm place for twenty-four hours in loosely corked bottles, yeast having been added to one of them. The density of the fermented specimen will then be found to be diminished, each 100 l. representing the original presence of a grain of glucose in each fl. oz. of the urine. ["N. Y. Med. Jour.," July 5, 1890, p. 28 (a, 48).]—**Donné's t. for pus.** A t. which consists in adding a strong alkali to the sediment of a suspected urine. If pus is present, a viscid mass is formed. [K, 16.]—**Ehrlich's t.** A t. by which the presence of bilirubin in the urine is shown by the violet color produced when the urine has been treated with dilute acetic acid and some drops of a solution of 1 gramme of sulphuric acid, 10 centigrammes of sodium nitrate, and 15 c. c. of hydrochloric acid in a litre of water have been added. [B, 270 (a, 38).]—**Fehling's t.** See *Fehling's solution*.—**Fleitmann's t.** The same as *Marsh's t.*, with zinc and caustic soda or potash solution substituted for zinc and sulphuric acid. [B, 270 (a, 38).]—**Garrod's t.** A t. for uric acid in the blood. One or two drachms of blood-serum are put into a flat dish and six minims of strong acetic acid are added to each drachm of serum; a fine thread is then introduced into the fluid and the uric acid crystallizes on it within forty-eight hours. [a, 34].—**Gmelin's t.** A t. for bile-pigments by adding a drop of nitroso-nitric acid to a drop of diluted bile. A change of colors will be produced in the following order: green, blue, violet, red, and yellow. [K.]—**Grahé's t.** A t. for distinguishing genuine from false cinchona barks, the vapor of the former being carmine and that of the latter brown when heated in a t-tube. [B, 270 (a, 38).]—**Grandeau's t.** A t. by which the presence of digitalin or digitalin is shown by the rich rose-color produced by introducing a trace of bromine into their solution in concentrated sulphuric acid. [B, 270 (a, 38).]—**Green's t.-objects.** A series of t.-diagrams for the determination of astigmatism. The one probably most frequently used consists of a circle traversed by a set of twelve triple lines, like the spokes of a wheel, the figures being placed at the extremity of the sets of lines. Each line is designed to be distinctly seen at a distance of about 20 feet. The circle is 12½ inches in diameter. [F.]—**Group t.** A t.

by which the presence of some one of a group of substances is shown without indication of particular substance. [B.]—**Guaiaic t. for blood.** A t. made by adding to an alcoholic solution of guaiac a few drops of ozonized oil of turpentine and of the liquid to be examined. If the latter contains hemoglobin, the guaiac solution becomes blue from the oxidation of the guaiac by the ozone liberated by the hemoglobin. [B. 270.]—**Guaiaic t. for hydrocyanic acid.** A t. made by adding a few drops of a solution of copper sulphate to tincture of guaiac and treating this with the substance to be tested. If the latter contains hydrocyanic acid, the guaiac tincture becomes blue. [B. 270.]—**Gunzberg's t.** A t. to estimate approximately the digestive quality of gastric juice. A capsule containing 15 cgrm. of potassium iodide is swallowed an hour after a meal, and at intervals of fifteen minutes the saliva is tested for the iodide. [a. 34.]—**Harmonium t.** A t. for non-perception of tones, arranged by furnishing the casing of the harmonium with an opening for the insertion of an auscultation tube. By inserting its olive-shaped nozzle into the external meatus of the ear to be examined, the tones of the instrument will be conducted immediately to the membrana tympani. [F. 32.]—**Hartmann's t. for hearing.** A t. based upon the length of electric flashes along a wire. It is possible to graduate a sound created in the telephone with great exactitude, as the electric flashes transmitted to the telephone can be altered in a precisely definable manner by the interpolation of different kinds of resistance. [F. 32.]—**Heller's albumin t.** A t. made by introducing concentrated nitric acid into urine, and thus producing a white ring at the point of contact if the urine contains albumin. [B. 270 (a. 38).]—**Heller's blood t.** See *Heller's t. for haematuria*.—**Heller's sugar t.** A t. by which the presence of glucose or sugar in the urine is shown by the yellow or red-brown color produced by heating with caustic-potash solution. [B. 270 (a. 38).]—**Heller's t. for haematuria.** A t. in which a portion of urine is made decidedly alkaline with caustic potash and boiled in a reagent glass. The phosphates are precipitated as very delicate floccules that look like mucus, and are colored brown or red-yellow by the blood-pigment. [Vierordt (a. 34).]—**Holmgren's t's for color-blindness.** Skeins of colored worsted, a large number of which are placed on a white cloth before the patient, who is required to select all the skeins of the same color, or of different tints of the same color. [F.]—**Horsley's t. for sugar.** A t. by which the presence of glucose or sugar in urine is shown by the green color produced by boiling with a mixture of caustic potash and potassium chromate. [B. 270 (a. 38).]—**Hume's t. for arsenic.** A t. made by adding, drop by drop, a weak solution of ammonia to a solution of silver nitrate until the brown precipitate first produced is nearly dissolved, decanting the clear liquid, and adding it to the suspected liquid. If arsenic is present, a bright-yellow precipitate of silver arsenite is produced, that must be collected and heated with a reducing agent so as to form a sublimate of metallic arsenic. [Woodman and Tidy (a. 34).]—**Hydrostatic t.** Ger., *Lungenschwimmprobe*. A t. made by placing the lungs of a dead infant in water; if un-aerated they sink; if the infant has breathed or the lungs have been otherwise inflated they float. [a. 34.] Cf. *Docimasia haematopulmonaris*.—**Indigo-carmin soda t.** See *Mulder's t.*—**Jendrassik's t.** A t. for the patellar reflex. The patient locks his fingers together and endeavors to pull the hands apart. This tension of the muscles of the upper extremities prevents voluntary innervation of the muscles of the lower extremities while the usual t. for the reflex is applied. [a. 34.]—**Knapp's t.** A t. for glucose depending on the fact that the latter, heated with mercuric cyanide and caustic soda, reduces the former and precipitates metallic mercury. [B.]—**Lieben's t. for acetoneuria.** A t. made by adding iodine dissolved in a solution of potassium iodide and a few drops of caustic potash to distilled urine, when the presence of acetone is shown by the formation of iodoform. [B. 270 (a. 38).]—**Love's t. for glucose.** A solution of 16 grammes of copper sulphate, 8 of glycerin, and 80 c. c. of caustic-soda solution in 64 grammes of water. [B. 270 (a. 38).]—**Magpie t.** A t. by which the presence of mercury is shown by the formation of a white precipitate of calomel and its rapid reduction to a grayish mass of metallic mercury when tin dichloride is introduced into a solution containing that metal. [B. 8 (a. 38).]—**Marsh's t.** A t. for arsenic, made by generating hydrogen in a wide-mouthed bottle by the action of sulphuric acid on zinc and water, igniting the hydrogen which escapes in a jet through a delivery tube, dropping the solution to be tested into the bottle, and immediately applying a piece of cold porcelain to the flame at the mouth of the tube. If arsenic is present it combines with the hydrogen, forming arseniureted hydrogen, which is again decomposed by the flame, and is deposited on the porcelain as a brown spot of metallic arsenic. [B. 8.]—**Maumene's t. for glucose.** A t. by which glucose is shown by the brown color it gives to a piece of white woolen cloth (previously soaked in a 33-per-cent. solution of zinc chloride and dried) when heated to 130° C. after having been soaked in the solution to be tested. [B. 270 (a. 38).]—**Méhu's t.** A t. by which the presence of albumin in urine is shown by the precipitate formed when the urine has been treated with nitric acid or sodium sulphate, and a mixture of 1 part each of carbolic acid and acetic acid and 2 parts of alcohol has been added. [B. 270 (a. 38).]—**Millon's t. (for salicylic acid).** A solution of mercury in nitric acid, used to show aromatic compounds which contain one hydroxyl group (or a methoxyl group derived from one) united with a benzene or naphthalene nucleus with which no nitrogen group is connected. Such compounds are colored red by 1 or 2 drops of the reagent to a c. c. of the solution containing the compound. [B. 270 (a. 38).] See also *Millon's REAGENT*.—**Moore's t.** A t. by which the presence of sugar is shown by the changing of color of the liquid to be tested through yellow, red-brown, and deep brown to black, caused by boiling with enough caustic-soda or potash solution to give a strong alkaline reaction. The value of the t. is lessened by the fact that other substances produce a like result. [B. 270 (a. 38).]—**Mulder's t.** A t. by which the presence of sugar is shown by mixing with the liquid to be tested a

few drops of indigo carmin solution, made alkaline with sodium carbonate, and heating, when the color changes through green, red-purple, and violet to bright yellow. [B. 270 (a. 38).]—**Murexide t. for uric acid.** A t. which consists in adding moderately concentrated nitric acid to the suspected body and evaporating to dryness. Any uric acid present is converted into alloxan, urea, and volatile constituents. If now the residue is moistened with ammonia solution the alloxan is converted into murexide, and a purple color is developed. [B.]—**Musculus's t. for urea.** A t. by which the presence of urea is shown by the brown color its neutral solution produces upon paper prepared by filtering through it urine of a sufferer from catarrh of the bladder, washing, drying, coloring with alcoholic tincture of turmeric, and drying again. [B. 270 (a. 38).]—**Nessler's t.** See *Nessler's REAGENT*.—**Oliver-Mulder t.** See *Mulder's t.*—**Oliver's t.** A t. by which the presence of bile in the urine is said to be shown by a cloudiness produced by an aqueous solution of peptone, salicylic acid, and acetic acid. [B. 270 (a. 38).]—**Ozone t.** See *Guaiaic t. for blood*.—**Pettenkofer's t.** A t. for bile-acids, especially cholic acid, by the deep reddish-purple color obtained by adding sugar to a solution of the bile-salts and then dropping sulphuric acid into it. [Bischoff (K).]—**Picric-acid t.** 1. A t. for glycosuria in which 3 parts of a saturated solution of picric acid and 2 of potassium hydrate are added to 5 of urine, and the whole is boiled for a minute. If glucose is present, a dark mahogany-red color will result. [“N. Y. Med. Jour.” Jan. 7, 1893, p. 12 (a. 50).] 2. A t. for albumin, performed by heating the suspected liquid with picric acid, when if albumin is present, the latter is precipitated. [B.]—**Pray's t.-letters for astigmatism.** T.-letters composed of stripes running at different angles. [F.]—**Purdy's t. for glycosuria.** A solution is made of 4.15 grammes of copper sulphate, 10 grammes of pure mannite, and 50 c. c. of glycerin in 250 c. c. of distilled water, and added to 250 c. c. of distilled water containing 20.4 grammes of caustic potash; when the mixture is cold 300 c. c. of strong ammonia are added, together with enough water to make a litre, and the solution is carefully filtered; 25 c. c. of this solution is heated with 50 c. c. of distilled water, and the urine is added drop by drop until the solution is colorless. The number of minims of urine necessary to decolorize the solution contain just a quarter of a grain of sugar. [“N. Y. Med. Jour.” 1890, p. 261 (a. 34).]—**Rinne's t.** A t. for acuteness of hearing, made by estimating how long a tuning-fork is heard when brought near the external auditory meatus after its vibration has ceased to be perceived when it touches the cranium. [a. 34.]—**Schmidt's t.** A t. for glucose by the red-brown color its presence produces in a liquid boiled with a solution of sugar of lead in ammonia. [B. 270 (a. 38).]—**Schönbein's t.** A t. for hydrocyanic acid by the blue color its presence gives to a strip of filtering paper when dipped into a 1-per-cent. solution of copper sulphate after having been soaked in a 1-per-cent. solution of tincture of guaiac-resin and dried. [B. 270 (a. 38).]—**Shadow-t.** See *SKIASCOPY*.—**Snellen's t.-lines for astigmatism.** Lines arranged in the form of rays or spokes of a wheel. Their deviation from the vertical is expressed in degrees. [F.]—**T.-letters, T.-types.** See *T.-TYPES*.—**Trommer's t.** A t. for glycosuria in which the presence of glucose is shown by its redissolving the precipitate formed when 1 or 2 drops of copper-sulphate solution and afterward 4 or 5 c. c. of caustic-soda solution are added to the urine. If the solution is heated, copper hemioxide is precipitated. [B. 270 (a. 38).]—**Weber's t.** A t. for the hearing power. A vibrating tuning-fork is placed on the vertex, and the patient observes whether the sound appears more or less loud by the ear under examination when it is stopped by the finger. [a. 34.]—**Worm-Müller t. for glycosuria.** A filtered solution of 2.5 grammes of cupric sulphate in 100 c. c. of distilled water and a filtered solution of 10 grammes of potassium-sodic tartrate and 4 grammes of sodic hydrate in 100 c. c. of distilled water are used. Five c. c. of clear urine is mixed with 2.5 c. c. of the second and 1.5 to 3 c. c. of the first solution, and boiled. If sugar is present, cuprous hydrate is formed. [a. 34.]—**Zaleski's t.** A t. for determining whether a dead child has breathed or not, depending on the larger quantity of blood, and therefore of iron, in the lungs, if it has. [“Lancet,” May 12, 1888, p. 938 (a. 50).]

**TESTA** (Lat.), n. f. *Te'stā*. Fr., *têt.* 1. Of *De Candolle* and others, a seed-shell; the outer coat of the two integuments covering the seed. 2. Of some authors, see *SPERMOPHYTES* (1st def.). [a. 25.] 3. Any hard covering; a shell. [a. 48.]—**T. ovi, T. ovorum.** See *Egg-shell*.—**T. preparata.** A very fine, tasteless powder made from oyster shells by boiling with water, freeing from foreign substances, washing, drying, finely powdering, rinsing with water, and drying again. [B. 95 (a. 38).]

**TESTACEOUS**, adj. *Te'stā-shūs*. Lat., *testaceus* (from *testa*, a shell). Fr., *testacé*. Ger., *hartschalig* (1st def.), *schalenhart* (2d def.), *scherbengeßig* (3d def.). 1. Having or consisting of a hard shell. 2. Hard and firm like the shell of a mussel. 3. Having the color of unglazed pottery; pale brownish-yellow. [a. 35.]

**TESTES** (Lat.), n. m., pl. of *testis* (q. v.). *Te'stēzēz* (e's). 1. The testicles. 2. The posterior pair of the corpora quadrigemina. [I. 6 (K.).]

**TESTIBRACHIUM** (Lat.), n. n. *Te'st-ib'ra-k' (bra)ch'z (i'z, u'm'm)*. From *testis*, the testicle, and *brachium*, the forearm. Of *Spitzka*, the anterior brachium of the corpora quadrigemina. [K.]

**TESTICLE**, n. *Te'st (i'z)k'.* Lat., *testis*. Fr., *testicule*. Ger., *Hoden*. 1. The sexual gland of the male, the office of which is to produce spermatozooids; an ovoid glandular body (one on each side) measuring about 1½ inch vertically, 1 inch transversely, and 1½ inch antero-posteriorly, suspended in the scrotum by its posterior border by the spermatic cord. It is contained within the tunica vaginalis and intimately invested with a fibrous capsule (the tunica albuginea) which divides into numerous compartments containing the seminiferous tubules. Up to about the eighth month of fetal life it is in the abdominal cavity, but then passes down through the

inguinal canal into the scrotum. 2. Any structure furnishing spermatozooids. [L.]—**Displaced t.** Fr., *testicule rematé*. A t. abnormally situated, as within the pelvis or in the inguinal canal. [a, 34.]—**Inverted t.** A condition in which the attitude of the t. in the scrotum is reversed, so that the free surface presents posteriorly, and the epididymis is attached to the anterior instead of the posterior part of the gland. [E, 16.]—**Irritable t.** Neuralgia of the t. [L, 87 (a, 50).]—**Pulpy t.** [Baillie]. Medullary sarcoma of the t. [A, 42.]—**Scrofulous t.** See *Tubercular ORCHITIS*.—**Swelled t.** See *EPIDIDYMITIS*.—**Syphilitic t.** See *Syphilitic ORCHITIS*.—**Undescended t.** A congenital malformation in which one or both t's remain in the abdominal cavity or in the inguinal canal. [E.] Cf. *MONORCHIS* and *CRYPTORCHIS*.

**TESTICONDUS** (Lat.), n. m.  $Te^{2st-i2}ko^{2nd}u^{2s}(u^{4s})$ . From *testis*, the testicle, and *condere*, to conceal. See *CREMASTER* and *CRYPTORCHIS*.

**TESTICULAR**, adj.  $Te^{2st-i2}k'u^{2l}a^{2r}$ . From *testiculus*, a testicle. Pertaining to or derived from the testicle. [a, 48.]

**TESTICULATE**, adj.  $Te^{2st-i2}k'u^{2l}a^{2r}$ . Lat., *testiculatus* (from *testiculus*, the testicle). Fr., *testiculé*. Ger., *hodenförmig*. Consisting of two nearly spherical or ellipsoid bodies in close proximity. The roots of many orchids are examples. [a, 35.]

**TESTICULE** (Fr.), n.  $Te^{2s}teku^{4l}$ . 1. The testicle. 2. Formally, also, the ovary. [A, 44.]—**T. de chien**. See *ORCHIS MAScula*.—**T. femelle**. See *OVARY* (1st def.).—**T. ourlien**. See *PAROTITIC ORCHITIS*.—**T. tuberculeux**. See *Tubercular ORCHITIS*.

**TESTICULUS** (Lat.), n. m.  $Te^{2st-i2}k'u^{2l}(u^{4l})-u^{2s}(u^{4s})$ . Dim. of *testis*, the testicle. 1. See *TESTICLE*. 2. In the pl., *testiculi*, see *TESTES* (2d def.).—**Testiculi caballinorum in cibano siccatis** [Edinb. Ph., 1699]. Horses' testicles dried in an oven. [A, 69.]—**T. caninus**. See *ORCHIS MAScula*.—**T. odoratus**.—**T. GUSpiranthes**. [a, 35.]—**T. venereus**. See *EPIDIDYMITIS* and *ORCHITIS urethralis*.

**TESTIS** (Lat.), n. m.  $Te^{2st-i2}s$ . Gen., *testis*. See *TESTICLE*.—**Caput t.** See *EPIDIDYMITIS*.—**Female testes**. An old term for the ovaries.—**Testes minores** [Variolus]. See *PROSTATE*.—**Testes muliebres**. See *Female testes*.

**TESTITIS** (Lat.), n. f.  $Te^{2st-i2}(e)ti^{2s}$ . Gen., *-it'idis* (*-idis*). From *testis*, the testicle. See *ORCHITIS*.

**TEST-TYPES**, n. pl.  $Te^{2st}tips$ . Fr., *lettres d'essai*. Ger., *Probuchstaben*. Letters of various sizes for trying the acuteness of vision. The most suitable objects are black letters of the block character on a white background, of sizes so arranged that they are seen plainly by the normal eye under an angle of 5'. The thickness of the lines is exactly one-fifth of the height of the letters, so that the different parts of the letter are included in an angle of 1', while the whole letter is included in an angle of 5'. [F.]—**Burchard's t.-t.** A series of figures formed by groups of circles, which are reproduced by photographs in diminishing sizes until they become dots of extreme minuteness. [F.]—**Green's t.-t.** Types of different sizes forming an arithmetical series, the simplest form of Roman letters being used instead of the ordinary block letters. For testing the vision, the number of the smallest size of letters on the test-card should be less than the number of feet in the available distance. [F.]—**Jaeger's t.-t.** A series of letters and words of varying size, from No. 1, the equivalent of English brilliant, to No. 20, the equivalent of English 8-line. For the use of the illiterate, a cross (+) and an asterisk (\*) of corresponding size were printed with each of the twenty varieties of type. [F.]—**Snellen's t.-t.** Letters and figures of various shapes and sizes. The formula usually employed is  $S = d + D$ , where  $S$  denotes sight or vision;  $d$ , the distance at which a given type is seen under an angle of 5'; and  $D$  the size of type seen at that distance.  $S = 1$  was assumed by Snellen as normal vision. The principles of Snellen's types are: (1) detached, separate letters, black on a white ground, in irregular sequence; (2) the letter large Roman, square, the vertical strokes being  $\frac{1}{2}$ , the horizontal  $\frac{1}{4}$  of the breadth of the letter; (3) exclusion of some letters which are much more difficult to distinguish than others; (4) ascending magnitudes from I to C C, the magnitude being proportional to the number; (5) the several magnitudes distinguishable by a sharp eye, in good light, at the distance of as many feet as the number amounts to. [F.]

**TESTUDINATIO CRANII** (Lat.), n. f.  $Te^{2st}u^{2d}(ud)-i^{2n}a-(a^{2l})shi^{2l}(ti^{2l})-o$ . See *CAMAROSIS*.

**TESTUDO** (Lat.), n. f.  $Te^{2st}u^{2d}(ud)u^{2o}$ . Gen., *-ud'inis*. From *testa*, a shell. Lit., a tortoise. 1. Of Paracelsus, an atheromatous tumor. [H.] 2. See *FORNIX cerebri*.—**T. cerebri**. See *T.* (2d def.).—**T. scapulae**. See *DORSUM* of the *scapula*.

**TET** (Fr.), n.  $Te^2$ . See *TEST* and *TESTA*.

**TETANIC**, adj.  $Te^{2st}a^{2n}i^{2k}$ . Gr., *τετανικός*. Lat., *tetanicus*. Fr., *tétanique*. Ger., *tetanisch*, *starrkrampfähnlich*. Pertaining to, due to, or resembling tetanus; as a n., an agent capable of causing a tetanus-like state.

**TÉTANIE** (Fr.), n.  $Ta-ta^{2s}ne$ . See *TETANY*.—**T. essentielle**. Tetany without observable cause; non-symptomatic tetany; thought by some to be a manifestation of hysteria. [Zaldivar (a, 18).]

**TETANIE** (Ger.), n.  $Tat-a^{2n}e'$ . See *TETANUS* and *TETANY*.

**TETANIFORM**, adj.  $Te^{2st}a^{2n}i^{2k}fo^{2rm}$ . From *tétanos*, tetanus, and *forma*, form. Fr., *tétaniforme*. See *TETANOID*.

**TETANILLA** (Lat.), n. f.  $Te^{2st}a^{2n}(a^{2n})-i^{2l}la^{2s}$ . Dim. of *tetanus* (q. v.). Of Trousseau, tetany. [a, 34.]

**TETANINE**, n.  $Te^{2st}a^{2n}en$ . Fr., *tétanine*. Ger., *Tetanin*. A yellow, poisonous alkaloid,  $C_{14}H_{14}N_2O_4$ , found in cultivations made to isolate the poison of tetanus and in limbs which have been amputated for tetanus. [Brieger, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cxv, p. 483 (B).]

**TETANIUM** (Lat.), n. n.  $Te^{2st}a^{2n}(a^{2n})i^{2k}u^{2m}(u^{4m})$ . Of Magendie, strychnine. [B, 48, 78 (a, 14).]

**TETANIZATION**, n.  $Te^{2st}a^{2n}i^{2k}u^{2s}a^{2hu}n$ . The production of tetanus. [a, 48.]

**TETANOCANNABINE**, n.  $Te^{2st}a^{2n}o-ka^{2n}a^{2b}en$ . An alkaloid, resembling strychnine in its physiological properties, derived from *Cannabis indica*. [B, 81.]

**TETANOID**, adj.  $Te^{2st}a^{2n}-old$ . Gr., *τετανώδης* (from *tétanos*, tetanus, and *eidōs*, resemblance). Resembling tetanus. [D.]

**TETANOMOTOR**, n.  $Te^{2st}a^{2n}o-mot'o'r$ . From *tetanus* (q. v.), and *movere*, to move. Of Heidenhain, a small ivory hammer attached to an induction machine, and arranged so as to deliver a rapid series of blows on a nerve to induce tetanus. [Landois (K).]

**TÉTANOS** (Fr.), n.  $Ta-ta^{2s}no$ . See *TETANUS*.—**T. alternant**. See *TETANY*.—**T. avec prodromes**. See *Clinic TETANUS*.—**T. des nouveau-nés**. See *TRISMUS neonatorum*.—**T. intermittent**. See *TETANY*.—**T. opératoire**. See *Surgical TETANUS*.—**T. utérin**. See *TETANUS uteri*.

**TETANOTOXINE**, n.  $Te^{2st}a^{2n}o-to^{2x}en$ . Fr., *tétanotoxine*. Ger., *Tetanotoxin*. A poisonous ptomaine,  $C_8H_{11}N$ , found in cultures of *Bacillus tetani*. It is less active than tetanin. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," 1886; "Ann. di chim. e di farmacol.," Sept., 1890, p. 144 (B).]

**TETANUS** (Lat.), n. m.  $Te^{2st}a^{2n}(a^{2n})-u^{2s}(u^{4s})$ . Gr., *τετανος*. Fr., *tétanos*. Ger., *T. Starrkrampf*, *Todtenkrampf*, *Tetanie*. 1. An infectious disease characterized by tonic spasm of the muscles with marked exacerbations. It is caused by the *Bacillus tetani*. It may occur either idiopathically or traumatically. It is more common in hot than in temperate climates, and in the colored than in the white race. It begins within fifteen days after an injury, with chills accompanied by stiffness of the neck and jaws that gradually develops into a tonic spasm. Eventually all the muscles are affected. Death may occur from heart failure, asphyxia, or exhaustion. [Osler (a, 34).] 2. A tonically contracted state of a muscle (e. g., when induced experimentally).—**Aporetic t.**, **Benign t.** See *TETANY*.—**Breaking t.** A t. (2d def.) occurring at the moment of breaking the circuit in a muscle through which a galvanic current is passing. [B, 12.]—**Cathodal-closure t.** A t. (2d def.) occurring at the cathode on closure of a galvanic circuit. Symbol,  $CaTe$ ,  $KaCite$ , or, in German works,  $KaSte$ . [B, 24.]—**Cathodal-duration t.** See *GALVANOTONUS* (2d def.).—**Cathodal-opening t.** A t. (2d def.) taking place at the cathode at the opening of a galvanic circuit. Symbol,  $CaTe$ , or, in German works,  $KaOte$ . [B.]—**Centric t.** Of M. Hall, t. in which the irritating cause was supposed to act directly upon the spinal cord. [a, 34.]—**Cephalic t.** Ger., *Kopft*. Hydrophobic t.; so called because it only occurs in connection with injuries situated in the distribution of the cranial nerves. [a, 34.]—**Clinic t.** Of Juon, t. initiated by spasm of the tissues about the wound. [a, 34.]—**Closing t.** See *Making t.*—**Dysphagic t.** Hydrophobic t.; so called because of the dysphagia. [a, 34.]—**Eccentric t.** Of M. Hall, t. in which the irritating cause is in some part of the body distant from the spinal cord. [a, 34.]—**Electric t.** Tetanoid spasm produced by strong electrization of all the muscles of the body. [a, 34.]—**Expiratory t.** A permanent expiratory effort, the inspiratory impulses being inhibited. It may be produced by stimulating the superior laryngeal nerve. [J.]—**Extensor t.** A general tetanic spasm; so called because in it the extensors act more powerfully than the flexors. [Landois (K).]—**Faradaic t.** Electric t. produced by the faradaic current. [a, 34.]—**Head-t.** See *Cephalic t.*—**Heat t.** Tetanoid spasm caused by heat. ["Jour. of Phys.," xlii, p. 122 (a, 34).]—**Holotonic t.** See *HOLOTETANUS*.—**Hydrophobic t.** Of Ross, a variety of t., characterized by violent spasm of the pharynx and oesophagus. [a, 34.]—**Hyperalgic t.** Of Frastour, t. in which the pain is very acute. [L, 87 (a, 50).]—**Hysterical t.**, **Imitative t.** A variety of hysteria which simulates t. and is distinguished from it by the age and sex of the individual, absence of pain, occasional clonic spasms, and the occasional intermission of all muscular rigidity. [D, 47.]—**Idiopathic t.** See *RHEUMATIC t.*—**Infantile t.** See *T. neonatorum*.—**Infectious t.** See *T.* (1st def.).—**Inspiratory t.** See *Inspiratory STANDSTILL*.—**Intermittent t.** See *TETANY*.—**Kochsoltz' t.** (Ger.). T. (2d def.) due to irritation with a solution of common salt. [a, 32.]—**Kopft' t.** (Ger.). See *Cephalic t.*—**Localized t.** Tetanoid spasm affecting a part or region. [a, 34.]—**Making t.** 1. A t. (2d def.) occurring at the moment of making the circuit in a muscle through which a galvanic current is passing. [B, 12.] 2. See *GALVANOTONUS* (2d def.).—**Malignant t.** T. that rapidly terminates fatally. [a, 34.]—**Obstetrical t.** See *Puerperal t.* and *T. neonatorum*.—**Opening t.** See *Breaking t.*—**Partial t.** See *Localized t.*—**Physiological t.** Of Marey, the contraction of a stimulated muscle that persists as a result of a number of fused contractions. [L, 89 (a, 34).]—**Puerperal t.** See *Uterine t.*—**Pyretic t.** See *T.* (1st def.).—**Remittent t.** [Moxon]. See *TETANY*.—**Respiratory t.** See *Respiratory STANDSTILL*.—**Rheumatic t.** A rare form of t. usually due to exposure to cold. [D.]—**Ritter's t.** See *Breaking t.*—**Secondary t.** The t. induced in a muscle when its nerve is brought in contact with a tetanized muscle. [Landois (K).]—**Spontaneous t.** See *RHEUMATIC t.*—**Strychnin' t.** (Ger.). See *T. toxicus*.—**Surgical t.** See *Traumatic t.*—**Symptomatic t.** An affection due to spinal disease in which there are tetanoid spasms. [D, 47.]—**T. anticus**. T. in which there are emprosthotonos. [a, 34.]—**T. aponeuroticum**. See *LARYNGISMUS stridulus*.—**T. completus**. See *T.* (1st def.).—**T. dorsalis**. See *OPISTHOTONUS*.—**T. emprosthotonos**. See *T. anticus*.—**T. endemicus**. T. apparently endemic in certain localities. [A, 319 (a, 34).]—**T. febriculosus**. See *FEBRIS tertiana ashmatica*.—**T. hystericus**. See *Hysterical t.*—**T. idiopathicus**. See *RHEUMATIC t.*—**T. intermittens**. See *TETANY*.—**T. lateralis**. T. with pleurothotonos. [a, 34.]—**T. nascentium**, **T. neonatorum**. T. or trismus occurring in newborn children.—**T. of the head**. See *Cephalic t.*—**T. posticus**,

**T. postterganeus.** See OPISTHOTONUS.—**T. rheumatica.** See *Rheumatic t.*—**T. toxicus.** T. induced by overdoses of nux vomica or its preparations. [D. 70.]—**T. trismus.** T. in which trismus is a prominent or only symptom. [a. 34.]—**T. universalis.** See T. (1st def.).—**T. uteri.** An abnormally strong, steady, and uninterrupted contraction of the uterus on its contents without inflammatory phenomena. [A. 20.] Cf. *CONTRICTIO uteri spastico-inflammatoria*.—**Traumatic t.** T. supervening upon some bodily injury. [a. 34.]—**Tumultuary t.** Of Heidenhain, tetanoid spasm of a muscle caused by electricity. [“*Jour. of Phys.*,” xlii, p. 122 (a. 34).]—**Uraemic t.** Uraemia with tetanoid spasms. [L. 87 (a. 31).]—**Uterine t.** 1. T. occurring during and in consequence of the puerperium; often observed in hot climates. [a. 34.] 2. See T. *uteri*.—**Voluntary t.** See *Physiological t.*

**TETANY, n.** Te<sup>2</sup>t-a<sup>2</sup>n-i<sup>2</sup>. Lat., *tetanilla* (from *tétravos*, tetanus). Fr., *tétanie*. Ger., *Tetanie*. A neurosis affecting especially children and young persons, characterized by attacks of tonic spasm of certain groups of muscles, generally of the limbs, with excessive sensitiveness of the peripheral motor nerves to electrical and mechanical stimuli. [Eulenburg (A. 319).]—**Acute relapsing t., Epidemic t.** Of von Jaksch, an acute infectious t., lasting only a few weeks and occurring among the working classes in Germany. [a. 34.]—**Gutturo-t.** A variety of stammering caused by a tetanoid spasm of the glottis. [a. 34.]—**Rheumatic t.** See *Epidemic t.*

**TETARTHEUS (Lat.), adj.** Te<sup>2</sup>t-a<sup>2</sup>rt(a<sup>2</sup>rt)-e-(a<sup>2</sup>e<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *tetartaios*. Quarten; as a n. f., *tetartaea* (Gr., *tetartaios* [superos]), a quartan fever. [a. 48]

**TETARTOPHYIA (Lat.), n. f.** Te<sup>2</sup>t-a<sup>2</sup>rt-o<sup>2</sup>f-i(u<sup>2</sup>)/i<sup>2</sup>-a<sup>2</sup>. From *tétrartos*, fourth, and *φύειν*, to produce. Of Sauvages, a quartan fever having short or imperfect intermissions. [a. 34.]

**TÊTE (Fr.), n. Te<sup>2</sup>t.** See HEAD.—**T. de la corne postérieure.** See *CAPUT cornu posterioris*.—**T. de l'épididyme.** See *GLOBUS major of the epididymis*.—**T. dernière.** See *After-coming head*.—**T. du corps strié.** See *CORPUS colliculi striati*.—**T. glénodale.** See *Basilhyal bone* (1st def.).—**T. restée (ou retenue) la dernière.** See *After-coming head*.

**TÉTÉE (Fr.), n. Ta-ta.** The act of taking the breast, also the amount of milk taken by the infant at each draught. [A. 385.]

**TÉTRELLE (Fr.), n. Ta-tre<sup>2</sup>l.** A nursing-bottle or its nipple; also a sort of breast-pump devised by Tier. [A. 96; L. 41 (a. 14).]—**T. biapiratrice.** A glass cup to fit over the nipple, having near the apex two caoutchouc tubes, one of which the mother can suck, the other the child; used to facilitate feeding for weak infants. [a. 34.]

**TETILLA (Lat.), n. f.** Te<sup>2</sup>t-i<sup>2</sup>l-la<sup>2</sup>. Fr., *tétille*. Of De Candolle, a genus of the *Saxifragaceae*, consisting of a Chilean annual herb (*culantrillo*) the leaves of which are used as an astringent. [a. 35.]

**TETIN (Fr.), n. T'-ta-n<sup>2</sup>.** A nipple or teat. [L. 41 (a. 14).]

**TETINE (Fr.), n. T'-ten.** The udder. [a. 48.]

**TETON (Fr.), n. T'-to-n<sup>2</sup>.** A woman's breast or nipple. [A. 385 (a. 48).]

**TETRABASIC, adj.** Te<sup>2</sup>t-ra<sup>3</sup>-bas-i<sup>2</sup>k. Fr., *tétrabasique*. Having a basicity of four; of an acid or acid salt, containing four atoms of replaceable hydrogen. [B.] Cf. *TETRAHYDRIC*.

**TETRABENZOPINITE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-be-nz-o-pin-i<sup>2</sup>t. A compound, C<sub>6</sub>H<sub>8</sub>(OC<sub>7</sub>H<sub>7</sub>O)<sub>4</sub>, of benzoic acid and pinite. [B. 158 (a. 38).]

**TETRABRACHIUS (Lat.), n. m.** Te<sup>2</sup>t-ra<sup>3</sup>-bra<sup>2</sup>k(bra<sup>2</sup>ch<sup>2</sup>)/i<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *tetrapa*, four, and *ῥαχίς*, the arm. A monster having four arms. [a. 34.]

**TETRABROMAMIDOBENZENE, TETRABROMANILINE, n's.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-a<sup>2</sup>m-i<sup>2</sup>d-o-be-nz'en, -a<sup>2</sup>n/i<sup>2</sup>-en. Fr., *tétrabromaniline*. Ger., *Tetrabromanilin*. A substitution compound of aniline, C<sub>6</sub>HBr<sub>4</sub>NH<sub>2</sub> = C<sub>6</sub>(H, Br, Br, Br, NH<sub>2</sub>, Br). [B. 4.]

**TETRABROMBENZENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-be-nz'en. Ger., *Tetrabrombenzol*. A four-atom bromine substitution product of benzene, C<sub>6</sub>H<sub>2</sub>Br<sub>4</sub>. [B. 3 (a. 38); B. 4.]

**TETRABROMMETHANE, TETRABROMMETHYLENE, n's.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-e<sup>2</sup>th'en, -e<sup>2</sup>th/i<sup>2</sup>-en. A substance, C<sub>2</sub>Br<sub>4</sub>, crystallizing from alcohol as laminae of aromatic odor and burning taste. [B. 3 (a. 38).]

**TETRABROMHYDROQUINONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-hid-ro-kw-i<sup>2</sup>n'on. Ger., *Tetrabromhydrochinon*. A substitution product, C<sub>6</sub>Br<sub>4</sub>(OH)<sub>2</sub>, of hydroquinone. [B. 4.]

**TETRABROMIDE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom/i<sup>2</sup>d(i<sup>2</sup>d). Fr., *tétrabromure*. A bromine compound analogous to a tetrachloride. [B.]

**TETRABROMMETAXYLENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-me<sup>2</sup>t-a<sup>2</sup>z-i<sup>2</sup>en. Ger., *Tetrabrommetaxylol*. A substance, C<sub>8</sub>H<sub>6</sub>Br<sub>4</sub> = C<sub>6</sub>(Br, CH<sub>3</sub>, Br, CH<sub>3</sub>, Br, Br), melting at 241° C. [B. 4.]

**TETRABROMMETHANE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-me<sup>2</sup>th'an. Ger., *Tetrabrommethan*. The compound CBr<sub>4</sub>. [B. 4.]

**TETRABROMPHTHALIC ACID, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-tha<sup>2</sup>i/-i<sup>2</sup>k. An acid, C<sub>8</sub>Br<sub>4</sub>(CO<sub>2</sub>H)<sub>2</sub>, crystallizing from boiling water as acicular crystals, from benzene as prismatic crystals. [B. 3 (a. 38).]

**TETRABROMPYROCATECHIN, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-pir-o-ka<sup>2</sup>t-e<sup>2</sup>k-i<sup>2</sup>n. Fr., *acide tétrabromo-pyrocatechinique*. Ger., *Tetrabrombrenzcatechin*. A substance, C<sub>8</sub>Br<sub>4</sub>(OH)<sub>2</sub> = C<sub>6</sub>(Br, OH, OH, Br, Br, Br), prepared by the action of an excess of bromine on pyrocatechin. [B. 4.]

**TETRABROMQUINONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-kw-i<sup>2</sup>n'on. Ger., *Tetrabromchinon*. A four-atom bromine substitution product, C<sub>6</sub>Br<sub>4</sub>O<sub>2</sub>, of quinone. [B. 4.]

**TETRABROMSTEARIC ACID, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-ste-a<sup>2</sup>r-i<sup>2</sup>k. Fr., *acide tétrabromo-stéarique*. An acid, C<sub>18</sub>H<sub>32</sub>Br<sub>4</sub>O<sub>2</sub>, occurring as large tabular crystals. [B. 3 (a. 38).]

**TETRABROMTHIOPHENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-brom-thi/o-fen. A four-atom bromine substitution compound, C<sub>4</sub>Br<sub>4</sub>S, of thiophene. [B. 3.]

**TETRACARBON, n.** Te<sup>2</sup>t-ra<sup>3</sup>-ka<sup>2</sup>rb'o<sup>2</sup>n. A radicle containing four atoms of carbon. [B.]

**TETRACARPELLARY, adj.** Te<sup>2</sup>t-ra<sup>3</sup>-ka<sup>2</sup>rp'e<sup>2</sup>l-a-ri<sup>2</sup>. Lat., *tetracarpellaris* (from *tetrapa*, four, and *carpellum*, a carpel). Composed of four carpels. [a. 35.]

**TETRACERA (Lat.), n. f.** Te<sup>2</sup>t-ra<sup>3</sup>(ra<sup>2</sup>k)/e<sup>2</sup>r-a<sup>2</sup>. From *tetrapa*, four, and *κέρας*, a horn. Fr., *tétracère*. Ger., *Raspelstrauch*. A genus of tropical climbing plants, of the *Dilleniaceae*. [a. 35.]—**T. breyniana.** A Brazilian shrub used like *T. oblongata*. [a. 35.]—**T. oblongata.** A Brazilian species having the properties of *Davilla brasiliensis*. Baths and fumigations of the plant are used in swellings of the limbs and testicles. [a. 35.]—**T. Rheedii.** A Malabar and East Indian species, used as an astringent, especially in aphthae. [a. 35.]—**T. tigarea.** Fr., *tétracère rude*. Red creeper (*liane rouge*) of Guiana and the Antilles. Used as a sudorific and diuretic and in syphilis, intermittent fever, chlorosis, and scurvy. [a. 35.]

**TETRACETATE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-e<sup>2</sup>t-at. Ger., *Tetracetat*. An acetate containing four molecules of the acetic acid radicle. [B.]

**TETRACETOSALICIN, n.** Te<sup>2</sup>t-ra<sup>3</sup>-e<sup>2</sup>t-o-sa<sup>2</sup>i/i<sup>2</sup>s-i<sup>2</sup>n. Ger., *Tetracetatsalicin*. A crystalline body, C<sub>12</sub>H<sub>14</sub>(C<sub>2</sub>H<sub>3</sub>O)<sub>4</sub>.O<sub>7</sub>. [B. 4.]

**TETRACETYLENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-e<sup>2</sup>t/i<sup>2</sup>l-en. See under *ACETYLENE*.

**TETRACETYLMORPHINE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-e<sup>2</sup>t-i<sup>2</sup>l-mo<sup>2</sup>rr'en. A substitution compound, C<sub>24</sub>H<sub>24</sub>(C<sub>2</sub>H<sub>3</sub>O)<sub>4</sub>N<sub>2</sub>O<sub>4</sub>, of morphine, formed by the action of acetic anhydride in excess. [B. 2.]

**TETRACHÆNIUM (Lat.), n. n.** Te<sup>2</sup>t-ra<sup>3</sup>k(rach<sup>2</sup>e)/e-(a<sup>2</sup>e/o)-ni<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). For deriv., see *Tetra-\** and *ACHÆNIUM*. Fr., *tétrakène*. A fruit formed by four united achenes. [a. 35.]

**TETRACHEIRUS (Lat.), n. m.** Te<sup>2</sup>t-ra<sup>3</sup>-kír(ch<sup>2</sup>e<sup>2</sup>i<sup>2</sup>r)/u<sup>2</sup>s(u<sup>2</sup>s). From *tetrapa*, four, and *χείρ*, the hand. A monster having four hands. [a. 34.]

**TETRACHLORACETAMIDE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-a<sup>2</sup>s-e<sup>2</sup>t/a<sup>2</sup>m-i<sup>2</sup>d(i<sup>2</sup>d). A four-atom chlorine substitution compound, C<sub>3</sub>HCl<sub>4</sub>NO = C<sub>2</sub>Cl<sub>3</sub>O.NHCl, of acetamide. [B. 2.]

**TETRACHLORACETONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-a<sup>2</sup>s-e<sup>2</sup>t-on. See under *CHLORACETONE*.

**TETRACHLORANILINE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-a<sup>2</sup>n/i<sup>2</sup>l-en. A substance, C<sub>6</sub>H<sub>2</sub>NCl<sub>4</sub>, found in three isomeric forms, all occurring as acicular crystals: *asymmetric t.*, C<sub>6</sub>(H, Cl, Cl, Cl, NH<sub>2</sub>, Cl); *symmetric t.*, C<sub>6</sub>(H, Cl, Cl, NH<sub>2</sub>, Cl, Cl); and *adjacent t.*, C<sub>6</sub>(H, Cl, Cl, Cl, Cl, NH<sub>2</sub>). [B. 3 (a. 38).]

**TETRACHLORBENZENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-be-nz'en. Ger., *Tetrachlorbenzol*. A four-atom chlorine substitution compound, C<sub>6</sub>H<sub>2</sub>Cl<sub>4</sub>, of benzene. [B. 4.]

**TETRACHLORETHANE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-e<sup>2</sup>th'an. Fr., *tétrachloréthane*. Ger., *Tetrachloräthan*. A colorless, oily liquid, C<sub>2</sub>H<sub>2</sub>Cl<sub>4</sub> = CH<sub>2</sub>Cl.CCl<sub>2</sub>. [B. 4.]

**TETRACHLORETHYR, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-eth'u<sup>2</sup>r. Ger., *Tetrachloräther*. A thick liquid, C<sub>2</sub>H<sub>2</sub>Cl<sub>4</sub>O = CCl<sub>3</sub>.CHCl.O.C<sub>2</sub>H<sub>5</sub>, having a fennel-like odor. [B. 4 (a. 38).]

**TETRACHLORETHYL, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-e<sup>2</sup>th/i<sup>2</sup>l. A radicle, C<sub>2</sub>HCl<sub>4</sub>. [a. 38.]

**TETRACHLORETHYLENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-e<sup>2</sup>th/i<sup>2</sup>l-en. A mobile liquid, C<sub>2</sub>Cl<sub>4</sub>. [B. 3 (a. 38).]

**TETRACHLORHYDROQUINONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-hid-ro-kw-i<sup>2</sup>n'on. A derivative of tetrachlorquinone, C<sub>6</sub>Cl<sub>4</sub>(OH)<sub>2</sub>. [B. 4.]

**TETRACHLORIDE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor/i<sup>2</sup>d(i<sup>2</sup>d). Fr., *tétrachlorure*. A compound consisting of an element or radicle united with chlorine in the proportion of four atoms of the latter to a certain definite quantity of the former assumed as the unit of comparison. [B.]

**TETRACHLORMETHANE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-me<sup>2</sup>th'an. Ger., *Tetrachlormethan*. An oily liquid, CCl<sub>4</sub>, of ethereal odor. [B. 4.]

**TETRACHLORNAPHTHALENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-na<sup>2</sup>p-tha<sup>2</sup>i-en. A crystalline substance, C<sub>10</sub>H<sub>6</sub>Cl<sub>4</sub>, known in five isomeric forms. [B. 4 (a. 38).]

**TETRACHLOROXETHYL, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-o<sup>2</sup>x-e<sup>2</sup>th/i<sup>2</sup>l. A univalent radicle, C<sub>2</sub>HCl<sub>4</sub>O. [B.]

**TETRACHLORPHTHALIC ACID, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-tha<sup>2</sup>i/-i<sup>2</sup>k. The compound C<sub>6</sub>Cl<sub>4</sub>(CO<sub>2</sub>H)<sub>2</sub>. [B. 3 (a. 38).]

**TETRACHLORQUINHYDRONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-kw-i<sup>2</sup>n-hid'ron. The compound C<sub>12</sub>H<sub>4</sub>Cl<sub>4</sub>O<sub>4</sub> + 2H<sub>2</sub>O. [B. 3 (a. 38).]

**TETRACHLORQUINOL, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-kw-i<sup>2</sup>n'o<sup>2</sup>l. The compound C<sub>6</sub>Cl<sub>4</sub>(OH)<sub>2</sub>. [B. 3.]

**TETRACHLORQUINONE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-kw-i<sup>2</sup>n'on. A four-atom chlorine substitution compound, C<sub>6</sub>Cl<sub>4</sub>O<sub>2</sub>, of quinone. [B. 3 (a. 38).]

**TETRACHLORTOLUENE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-klor-to<sup>2</sup>l-i<sup>2</sup>n'en. Ger., *Tetrachlortoluol*. A substitution product, C<sub>6</sub>HCl<sub>4</sub>.CH<sub>3</sub>, of toluene. [B. 3 (a. 38); B. 4.]

**TETRACHOTOMOUS, adj.** Te<sup>2</sup>t-ra<sup>3</sup>-ko<sup>2</sup>t'o<sup>2</sup>m-u<sup>2</sup>s. Lat., *tetrachotomus* (from *tetrapaya*, in four parts, and *τέμνω*, to cut). Dividing into four parts or branches. [a. 35.]

**TETRACHROMATE, n.** Te<sup>2</sup>t-ra<sup>3</sup>-krom'at A compound of a basic oxide with four molecules of chromium trioxide. Such compounds may also be regarded as salts of a dibasic tetrachromic acid. [B.]

**TETRACHROMIC ACID**, n.  $\text{Te}^2\text{-ra}^3\text{-krom}^{\text{i}2}\text{k}$ . Fr. *acide tétrachromique*. A hypothetical dibasic acid,  $\text{H}_2\text{Cr}_4\text{O}_{13} = 4\text{CrO}_3 + \text{H}_2\text{O}$ . [B.]

**TETRAOCOCCUS** (Lat.), n. m.  $\text{Te}^2\text{-ra}^3\text{-ko}^2\text{k}^{\text{i}2}\text{k}^{\text{i}2}\text{s}$  (ku's). From *terpa-*, four, and *kokkos* (see Coccus). A micrococcus occurring in clusters divided in two directions, forming groups of four. [a, 34.] —**T. variolæ**. Of Klebs, the *Streptococcus variolæ*. [a, 34.]

**TETRACODEINE**, n.  $\text{Te}^2\text{-ra}^3\text{-kod}^{\text{i}2}\text{e}^{\text{i}2}\text{n}$ . A base,  $\text{C}_{144}\text{H}_{168}\text{N}_8\text{O}_{24} = 4(\text{C}_{36}\text{H}_{42}\text{N}_2\text{O}_6)$ , polymeric with codeine, and formed from the latter by the action of phosphoric or sulphuric acid. Administered to animals, it produces vomiting, diarrhoea, and salivation, with great vital depression. [B, 2.]

**TETRACRYLIC ACID**, n.  $\text{Te}^2\text{-ra}^3\text{-kri}^2\text{i}^2\text{k}$ . 1. An oily liquid,  $\text{C}_7\text{H}_{12}\text{O}_2$ , smelling somewhat like caproic and valeric acids. 2. Monobasic crotonic acid. [B, 3 (a, 38); B, 93 (a, 14).]

**TETRAD**, n.  $\text{Te}^2\text{-ra}^3\text{-d}$ . 1. An element having an atomicity of four; a quadrivalent element. [B.] 2. See TETRAOCOCCUS.

**TETRADYNAMOUS**, adj.  $\text{Te}^2\text{-ra}^3\text{-di}^2\text{n}^2\text{a}^2\text{m}^2\text{u}^2\text{s}$ . Lat., *tetradynamus* (from *terpa-*, four, and *dynamis*, power). Fr., *tétradyname*. Ger., *vierrmächtig*. Of an androecium, having four long and two short stamens, as in the *Tetradynamæ* (a family of the *Crucifloræ*) and the *Tetradynamia* (the 15th class in the Linnean System). [a, 35.]

**TETRAEDRAL**, adj.  $\text{Te}^2\text{-ra}^3\text{-ed}^{\text{i}2}\text{r}^{\text{i}2}\text{l}$ . Lat., *tetraedrus* (from *terpa-*, four, and *ēdpa*, a seat). Fr., *tétraèdre*. Ger., *tetraedrisch*, *vierflächig*. Having four triangular sides. [a, 35.]

**TETRAETHYL**, n.  $\text{Te}^2\text{-ra}^3\text{-eth}^{\text{i}2}\text{l}$ . See TETRETHYL.—**T'tetrazone**. A hydrazine derivative,  $(\text{C}_2\text{H}_5)_4\text{N}_4 = (\text{C}_2\text{H}_5)_2\text{N} = \text{N} = \text{N} = (\text{C}_2\text{H}_5)_2$ ; an oily liquid having a garlicky odor, acting as a base, and forming unstable salts. [B.]

**TETRAETHYLAMMONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-eth}^{\text{i}2}\text{(ath)-i}^2\text{l(u}^1\text{)-a}^2\text{m}^2\text{(a}^2\text{m)-mon}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . Fr., *tétréthylammonium*. Ger., *Tetradéthylammonium*. A univalent radicle,  $\text{C}_8\text{H}_{20}\text{N}^+ = (\text{C}_2\text{H}_5)_4$ ; N—N—, obtained by Hoffmann in 1851 by decomposing its iodide; very deliquescent hair-like crystals. It absorbs carbon dioxide from the air, is strongly alkaline, and saponifies fats. Concentrated, it burns the tongue. It is as bitter as quinine, but odorless. It has a caustic action upon the epidermis, and an unctuous alkaline feel between the fingers. It is not decomposed by galvanism. It forms numerous salts, including a sulphate, nitrate, phosphate, carbonate, hydrochloride, hydrobromide, iodide, and bromide, and beautiful double salts with platinum, gold, mercury, etc. It was discovered by T. A. Edison and F. Peterson in 1891 to be a remarkably good solvent of uric acid and its salts, and was first employed in medicine ("N. Y. Med. Jour.," 1893) in rheumatic and gouty affections, both internally and by cataphoresis. [B; a, 31.]

**TETRAFLUORIDE**, n.  $\text{Te}^2\text{-ra}^3\text{-flu}^2\text{-o}^2\text{-i}^2\text{d(id)}$ . A fluorine compound analogous to a tetrachloride (q. v.). [B.]

**TETRAGONANTHUS** (Lat.), n. m.  $\text{Te}^2\text{-ra}^3\text{-gon}^2\text{n(gon)-a}^2\text{nth-(a}^2\text{nth)-u}^2\text{s(u}^2\text{s)}$ . From *terpáywos*, four-cornered, and *ānthos*, a flower. A genus of the *Gentianeæ*. [a, 35.] —**T. elatior**. A bitter North Siberian herb used as a domestic remedy. [a, 35.]

**TETRAGONIA** (Lat.), n. f.  $\text{Te}^2\text{-ra}^3\text{-gon}^2\text{i}^2\text{-a}^2$ . From *terpa-*, four, and *γωρία*, an angle. Fr., *tétragone*, *téragonie*. A genus of the *Ficoideæ*. The *Tetragoniceæ* are the *Ficoideæ*; the *Tetragoniceæ*, a division of that order. [a, 35.] —**T. cornuta**, **T. expansa**, **T. halimifolia**. Fr., *téragonie* (ou *téragone*) *étalée*, *épinard* de la Nouvelle-Zélande. Ger., *neuseeländischer Spinat*. New Zealand ice-plant (or spinach), found also in Australia, Tasmania, China, Japan, etc.; a culinary herb used as an antiscorbutic and pectoral. [a, 35.] —**T. implexicoma**. Tasmanian ice-plant, Australian (or New Zealand) spinach, Victorian bower spinach; a frutescent species having the same properties as *T. expansa*. [a, 35.]

**TETRAGONUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-gon}^2\text{u}^2\text{m(u}^2\text{m)}$ . A four-sided figure. [a, 48.]

**TETRAGONUS** (Lat.), adj.  $\text{Te}^2\text{-ra}^3\text{-gon}^2\text{u}^2\text{s(u}^2\text{s)}$ . Gr., *τετράγωνος* (from *terpa-*, four, and *γωρία*, an angle). Four-cornered: as a n. m., a quadrilateral structure. —**T. febris flavæ**. See Micrococcus *versatilis*. —**T. genæ** [Cowper]. See *PLATYSMA myoides*.

**TETRAGYNIAL**, **TETRAGYNOUS**, adj's.  $\text{Te}^2\text{-ra}^3\text{-ji}^2\text{n}^2\text{i}^2\text{-a}^2\text{n}$ ,  $\text{-ra}^3\text{-ji}^2\text{n-u}^2\text{s}$ . Lat., *tetragnynus* (from *terpa-*, four, and *γυνή*, a woman). Fr., *tétragynie*. Ger., *vierweibig*. Having four carpels or styles, belonging to *Tetragynia* (Fr., *tétragynie*), a Linnean class of plants with a gynoecium thus characterized. [a, 35.]

**TETRAHIT** (Lat.), n. n. indecl.  $\text{Te}^2\text{-ra}^3\text{-hi}^2\text{t}$ . Fr., *tétrahit*. The genus *Galeopsis*. [a, 35.]

**TETRAHYDRATE**, n.  $\text{Te}^2\text{-ra}^3\text{-hid}^{\text{i}2}\text{r}^{\text{i}2}\text{at}$ . See TETRAHYDROXIDE.

**TETRAHYDRIC**, adj.  $\text{Te}^2\text{-ra}^3\text{-hid}^{\text{i}2}\text{r}^{\text{i}2}\text{k}$ . Lat., *tetrahydricus*. Fr., *tétrahydrique*. Ger., *tetrahydricch*. Of acids or acid salts, containing four replaceable atoms of hydrogen. [B.]

**TETRAHYDRIDE**, n.  $\text{Te}^2\text{-ra}^3\text{-hid}^{\text{i}2}\text{r}^{\text{i}2}\text{d(rid)}$ . A compound of an element or radicle with four atoms of hydrogen. [B.]

**TETRAHYDROCINCHONINE**, n.  $\text{Te}^2\text{-ra}^3\text{-hid-ro-si}^2\text{n}^2\text{-kon-en}$ . Ger., *Tetrahydrocinchonin*. An amorphous substance,  $\text{C}_{20}\text{H}_{28}\text{N}_2\text{O}_4$ . [B, 4 (a, 38).]

**TETRAHYDROMETAXYLENEDICARBONIC ACID**, n.  $\text{Te}^2\text{-ra}^3\text{-hid-ro-me}^2\text{-a}^2\text{-zil-en-di-kar}^2\text{-b-o}^2\text{-n}^2\text{i}^2\text{k}$ . See CAMPHORIC ACID.

**TETRAHYDROPARAMETHYLOXYQUINOLINE**, **TETRAHYDROPARAQUINANTISOL**, n's.  $\text{Te}^2\text{-ra}^3\text{-hid-ro-pa}^2\text{-ra}^3\text{-me}^2\text{-th-i}^2\text{l-o}^2\text{x-i}^2\text{-kw}^2\text{i}^2\text{n}^2\text{-o}^2\text{l-en}$ ,  $\text{-kw}^2\text{i}^2\text{n-a}^2\text{n}^2\text{i}^2\text{s-o}^2\text{l}$ . See THALLINE.

**TETRAHYDROPAROXYQUINOLINE**, n.  $\text{Te}^2\text{-ra}^3\text{-hid-ro-pa}^2\text{-r-o}^2\text{x-i}^2\text{-kw}^2\text{i}^2\text{n}^2\text{-o}^2\text{l-en}$ . A poisonous and antipyretic artificial alkaloid,  $\text{C}_9\text{H}_{11}\text{NO}$ , in the form of a very soluble, somewhat sweetish powder. [Huchard, "Union méd.," Jan. 3, 1886, p. 13.]

**TETRAHYDROPHTHALIC ACID**, n.  $\text{Te}^2\text{-ra-hid-ro}^2\text{-th-i}^2\text{-a}^2\text{i}^2\text{k}$ . The compound  $\text{C}_8\text{H}_8(\text{CO.OH})_2$ . [B, 3 (a, 38).]

**TETRAHYDROPYROMELLITIC ACID**, n.  $\text{Te}^2\text{-ra}^3\text{-hid-ro-pir-o-me}^2\text{-i}^2\text{-t-i}^2\text{k}$ . The compound  $\text{C}_{10}\text{H}_{10}\text{O}_6$ . [B, 4 (a, 38).]

**TETRAHYDROXIDE**, n.  $\text{Te}^2\text{-ra}^3\text{-hid-ro}^2\text{-x-i}^2\text{d(id)}$ . A compound of an element or radicle with four molecules of hydroxyl. [B.]

**TETRAIODIDE**, n.  $\text{Te}^2\text{-ra}^3\text{-i}^2\text{od-i}^2\text{d(id)}$ . An iodine compound analogous to a tetrachloride (q. v.). [B.]

**TETRAISOPROPYLPHOSPHONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-i}^2\text{s-o}^2\text{(o}^2\text{-i}^2\text{-s)-pro}^2\text{(p}^2\text{-o}^2\text{-i}^2\text{-s)-pi}^2\text{(pu}^2\text{l)-fo}^2\text{s(fos)-fon}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . A radicle,  $\text{P}(\text{C}_3\text{H}_7)^4$ . [B.]

**TETRAALKYL**, n.  $\text{Te}^2\text{-ra}^3\text{-i}^2\text{k}^2\text{l}$ . Ger., *T*. A compound consisting of 4 alkyl molecules. [B, 4.] —**T' ammonium**. A univalent radicle, consisting of ammonium in which all 4 hydrogen atoms are replaced by alkyls. [B, 4.]

**TETRALYLARSONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-i}^2\text{(ra}^3\text{)-li}^2\text{-i}^2\text{l-(u}^1\text{l)-a}^2\text{rs-on}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . A univalent radicle,  $\text{As}(\text{C}_2\text{H}_5)_4$ . [B.]

**TETRAMASTHOUS**, adj.  $\text{Te}^2\text{-ra}^3\text{-ma}^2\text{sth-u}^2\text{s}$ . Lat., *tetramasthus* (from *terpa-*, four, and *μασθός*, the breast). Fr., *tétramaste*. Ger., *vierbrüstig*. Having four mammae. [a, 34.]

**TETRAMERA** (Lat.), n. n. pl.  $\text{Te}^2\text{-ra}^3\text{-m(r}^2\text{a}^3\text{)-e}^2\text{r-a}^2$ . From *terpa-*, four, and *μέρος*, a part. Fr., *tétramère*. A division of the *Coleoptera* in which the tarsi are made up of four joints. [a, 48.]

**TETRAMEROUS**, adj.  $\text{Te}^2\text{-ra}^3\text{-m(e}^2\text{-r-u}^2\text{s)}$ . Of a flower, having four members in a circle. [a, 35.]

**TETRAMETAPHOSPHATE**, n.  $\text{Te}^2\text{-ra}^3\text{-me}^2\text{-t-a}^2\text{-fo}^2\text{s'f-at}$ . A polymeric derivative of a metaphosphate. [B.]

**TETRAMETHYL**, n.  $\text{Te}^2\text{-ra}^3\text{-me}^2\text{th-i}^2\text{l}$ . A chemical group,  $(\text{CH}_3)_4$ . [a, 38.] —**T'alloxantin**. See *AMALIC acid*. —**T' ammonium**, **T' arsonium**. See the major list. —**T' benzene**. A hydrocarbon,  $\text{C}_{10}\text{H}_{14}$ , isomeric with ethylxylene, diethylbenzene, butylbenzene, and cymene. It is itself known in three isomeric forms: *symmetrical*, or *αurene*,  $\text{C}_6(\text{CH}_3)_2\text{H}_2\text{CH}_2\text{CH}_2\text{H}_2$ , a crystalline solid of camphor-like odor; *asymmetrical*, or *isodurene*,  $\text{C}_6(\text{CH}_3)_2\text{H}_2\text{CH}_2\text{CH}_2\text{H}_2$ , a slightly aromatic liquid; and *adjacent*, or *prehnitene*,  $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{CH}_2\text{CH}_2\text{H}_2$ , also a liquid. [B, 4; B, 3 (a, 38).] —**T' benzole acid**. An acid,  $\text{C}_{11}\text{H}_8\text{O}_2$ , of which two isomeric varieties are known: *adjacent t. acid*,  $(\text{CH}_3)_2\text{C}_6\text{H}_4\text{CO.OH}$ , an oily liquid; and *symmetrical t. acid*, tabular crystals having a silvery lustre. [B, 3 (a, 38).] —**T' benediamine**. See *PUTRESCINE*. —**T' ethylene glycol**. See *FINACON* (1st def.). —**T' isallylene**. See *HEPTINE* (2d def.). —**T' leucoethionine**. See *METHYLENE white*. —**T' murexide**. See *MUREXON*. —**T' paraphenylenediamine**. A substance,  $\text{C}_{10}\text{H}_{12}\text{N}_2 = \text{C}_6\text{H}_4\text{-N}(\text{CH}_3)_2\text{-N}(\text{CH}_3)_2$ , occurring as foliate crystals. It has been used by Wurster to prepare a test paper, *Tetrapapier*, by the deep violet coloring of which the presence of ozone, hydrogen peroxide, or various other substances can be shown. [B, 270 (a, 38).] —**T' phosphonium**. A radicle,  $\text{P}(\text{CH}_3)_4$ . [B.] —**T' putrescine**. A very poisonous base,  $\text{C}_8\text{H}_{16}\text{N}_2 = \text{C}_2\text{H}_5\text{-}(\text{CH}_2)_4\text{N}_2$ , obtained by the substitution of methyl in putrescine. [Briegleb, Arch. f. path. Anat. u. Phys. u. f. klin. Med., cv, p. 483 (B).] —**T' pyridine**. See *PARVOLINE*. —**T' stibonium**. See the major list. —**T' succinic acid**. A dibasic crystalline acid,  $\text{C}_4\text{H}_4\text{O}_4 = (\text{CH}_2)_2\text{COOH}$ , isomeric with suberic acid. [B, 4.] —**T' thionine**. See *METHYLENE white*. —**T' thionine chloride**. See *METHYLENE blue*.

**TETRAMETHYLAMMONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-me}^2\text{th-i}^2\text{l(u}^1\text{)-a}^2\text{m}^2\text{(a}^2\text{m)-mon}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . Fr., *tétraméthylammonium*, *triméthylamine*. Ger., *T*. A univalent radicle,  $\text{-N} \equiv (\text{CH}_3)_3 = \text{NC}_2\text{H}_5$ . [B.] —**T. hydrate**, **T. hydroxide**. Ger., *T'hydrat*. A crystalline body,  $\text{N}(\text{CH}_3)_3\text{OH}$ , acting as a powerful caustic. [B.] —**T. iodide**. A body,  $\text{N}(\text{CH}_3)_3\text{I}$ , forming white acicular crystals. [B.]

**TETRAMETHYLARSONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-me}^2\text{th-i}^2\text{l(u}^1\text{)-a}^2\text{rs-on}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . A univalent radicle,  $\text{As}(\text{CH}_3)_4$ . [B.] —**T. hydrate**. A substance,  $\text{As}(\text{CH}_3)_3\text{OH}$ , occurring as tabular crystals. [B.] —**T. iodide**. A substance,  $\text{As}(\text{CH}_3)_3\text{I}$ , occurring as colorless prismatic or laminar crystals. It combines with iodine to form t. periodide,  $\text{As}(\text{CH}_3)_3\text{I}_3$ . [B, 4.]

**TETRAMETHYLSTIBONIUM** (Lat.), n. n.  $\text{Te}^2\text{-ra}^3\text{-me}^2\text{th-i}^2\text{l(u}^1\text{)-sti}^2\text{b-on}^{\text{i}2}\text{-u}^2\text{m(u}^2\text{m)}$ . A univalent radicle,  $\text{Sb}(\text{CH}_3)_4$ , analogous to tetramethylammonium. [B.] —**T. hydrate**, **T. hydroxide**. A mass of white, deliquescent crystals,  $\text{Sb}(\text{CH}_3)_3\text{OH}$ , acting as a powerful base. [B, 3.] —**T. iodide**. Ger., *T'jodür*. A crystalline body,  $\text{Sb}(\text{CH}_3)_3\text{I}$ . [B, 3.]

**TETRAMINE**, n.  $\text{Te}^2\text{-ra}^3\text{-m-en}$ . See under AMINE.

**TETRAMOLYBDATE**, n.  $\text{Te}^2\text{-ra}^3\text{-mo}^2\text{l-i}^2\text{b'dat}$ . A molybdate containing four atoms of molybdenum. [B.]

**TETRAMORPHINE**, n.  $\text{Te}^2\text{-ra}^3\text{-mo}^2\text{r'f-en}$ . A base,  $\text{C}_{158}\text{H}_{152}\text{N}_8\text{O}_{24}$ , polymeric with morphine. [B, 2.]

**TETRAMYLENE**, n.  $\text{Te}^2\text{-ra}^3\text{-m-i}^2\text{l-en}$ . A polymeric modification,  $\text{C}_{20}\text{H}_{40} = 4\text{C}_5\text{H}_{10}$ , of amylen, a brownish oily liquid. [B, 2.]

**TETRANDROUS**, adj.  $\text{Te}^2\text{-ra}^3\text{-nd'ru-s}$ . Lat., *tetrandrus* (from *terpa-*, four, and *ἀνδρ*, a man). Fr., *tétrandre*. Ger., *tetrandrisch*, *vierrännig*. Having four stamens. The *Tetrandria* of Linneus are a class of plants having the flowers perfect and t. [a, 35.]

**TETRANE**, n.  $\text{Te}^2\text{-ra}^3\text{-n}$ . Ger., *Tetran*. Butane; so called because it contains four carbon atoms. [B.]

**TETRANEURA** (Lat.), n. f.  $\text{Te}^2\text{-ra}^3\text{-nu}^2\text{r-a}^2$ . From *terpa-*, four, and *νεῦρον*, a nerve. A genus of the *Hemiptera* having wings marked with four nervures. [a, 48.] —**T. ulmi**. An insect that produces nut-galls on the elm. [a, 48.]

**TETRANITROARBUTIN**, n.  $\text{Te}^2\text{-ra}^3\text{-nit-ro-a}^2\text{rb-u}^2\text{-i}^2\text{n}$ . Ger., *T*. The compound  $\text{C}_{26}\text{H}_{20}(\text{NO}_2)_4\text{O}_{14}$ . [B, 4.]

**TETRANITROMETHANE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{nit}-\text{ro}-\text{me}^2\text{th}^2\text{an}$ . A colorless oily liquid,  $\text{C}(\text{NO}_2)_4$ . [B. 4.]

**TETRANTOXIDE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{nt}-\text{o}^2\text{x}^2\text{i}^2\text{d}(\text{id})$ . A combination consisting of several atoms of one radicle united with one fourth of the same number of atoms of oxygen. [B. 3.]

**TETRAOPHTHALMUS** (Lat.), n. m.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{o}^2\text{f}-\text{tha}^2\text{t}^2(\text{tha}^2\text{t})^2\text{mu}^2\text{s}(\text{mu}^2\text{s})$ . From *tetrap-*, four, and *ὀφθαλμός*, the eye. A monster having four eyes. [a. 34.]

**TETRAOXYANTHRAQUINONE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{o}^2\text{x}-\text{i}^2\text{a}-\text{j}^2\text{a}^2\text{nth}-\text{ra}^2\text{t}-\text{kw}^2\text{i}^2\text{n}^2\text{on}$ . A variety of oxyanthraquinone,  $\text{C}_{14}\text{H}_4(\text{OH})_4\text{O}_2$ , of which two isomeric varieties are known, anthrachrysone and rufopin. [B. 2.]

**TETRAPAPIER** (Ger.), n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{pa}^2\text{p}-\text{er}$ . See under *TETRAMETHYL paraphenylenediamine*.

**TETRAPETALOUS**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{pe}^2\text{t}^2\text{a}^2\text{l}-\text{u}^2\text{s}$ . Lat., *tetrapetalus* from *tetrap-*, four, and *πέταλον*, a leaf. Fr., *tétrapétale*. Ger., *vierblättrig*, *vierblumenblättrig*. Of a corolla, having four petals. The *Tetrapetalae*, *tetrapetalae incomplete*, and *Tetrapetalae irregulares* are (Hill) each a class of *Herbæ* having as types respectively the genera *Eriotheca*, *Clematis*, and *Lupinus*. The *Tetrapetalae uniformes* are the *Cruciferae* of Adanson. [a. 35.]

**TETRAPHARMACON** (Lat.), **TETRAPHARMACUM** (Lat.), n's n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fa}^2\text{r}^2\text{m}-\text{a}^2\text{k}^2(\text{a}^2\text{k})-\text{o}^2\text{n}$ ,  $-\text{u}^2\text{m}(\text{u}^2\text{m})$ . From *tetrap-*, four, and *φάρμακον*, a drug. Of the old ph's, a remedy, especially an ointment, composed of four ingredients. [B. 38, 78 (a. 14).]

**TETRAPHENOL**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fe}^2\text{n}^2\text{o}^2\text{l}$ . See *TETROL*.

**TETRAPHENYL**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fe}^2\text{n}^2\text{o}^2\text{l}$ . The chemical group  $(\text{C}_6\text{H}_5)_4$ . [a. 38.]—**T'ethane**. The compound  $(\text{C}_6\text{H}_5)_4\text{CH}_2\text{CH}_2$ .  $\text{C}_{26}\text{H}_{22}$ . [B. 3, 4, 93 (a. 38).]—**T'ethylene**. A hydrocarbon,  $\text{C}_{26}\text{H}_{20}$ . [B. 4, 93 (a. 38).]—**T'guanidine**. Fr., *tétraphénylguanidine*. Ger., *T'guanidin*. A monacid base,  $\text{C}_8\text{H}_{21}\text{N}_3 = \text{H}:\text{N}:\text{C}:\text{N}(\text{C}_6\text{H}_5)_2$ . [B. 3 (a. 38); B. 4.]—**T'methane**. The compound  $\text{C}_{26}\text{H}_{20} = \text{C}(\text{C}_6\text{H}_5)_4$ . [B. 4 (a. 38).]—**T'tetrazene**. A colorless crystalline substance,  $(\text{C}_6\text{H}_5)_2\text{N}:\text{N}:\text{N}(\text{C}_6\text{H}_5)_2 = \text{C}_{24}\text{H}_{20}\text{N}_4$ . [B. 3 (a. 38); B. 4.]

**TETRAPHOSPHIDE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fo}^2\text{s}^2\text{i}^2\text{d}(\text{id})$ . A phosphorus compound analogous to a tetrachloride (q. v.). [B.]

**TETRAPHOSPHORDIMETHYL**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fo}^2\text{s}^2\text{i}^2\text{d}-\text{di}-\text{me}^2\text{th}^2\text{i}^2\text{l}$ . See under *METHYL phosphide*.

**TETRAPHOSPHORIC ACID**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fo}^2\text{s}^2\text{i}^2\text{d}-\text{p}^2\text{i}^2\text{c}$ . A hexabasic acid,  $\text{H}_4\text{P}_4\text{O}_{13}$ , known only through its salts, the tetraphosphates. [B. 3.]

**TETRAPHYLLOUS**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{fi}^2\text{l}^2\text{o}^2\text{u}^2\text{s}$ . Lat., *tetraphyllus* (from *tetrap-*, four, and *φύλλον*, a leaf). Fr., *tétraphylle*. Ger., *vierblättrig*. Having four leaves (sepals or petals). [a. 35.]

**TETRAPLEURA** (Lat.), n. f.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{plu}^2\text{r}^2\text{a}^2$ . From *tetrap-*, four, and *πλευρά*, a rib. Fr., *tétrapleure*. 1. Of Bentham, a genus of the *Leguminosae*, formerly referred to *Adenanthera*. 2. Of Parlatore, the genus *Tornabuena*. [a. 35.]—**T. heteropleura**. The only species of *T.* (1st def.); a West African tree. The seed pulp is used as a detergent. [a. 35.]

**TETRARGENTIC**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{e}^2\text{nt}^2\text{i}^2\text{c}$ . For deriv., see *Tetra-* and *ARGENTUM*. Containing four atoms of silver in the molecule. [B.]

**TETRASCCLUS** (Lat.), n. n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{ra}^2\text{s}^2(\text{ra}^2\text{s})/\text{se}^2\text{l}^2(\text{ke}^2\text{l})-\text{u}^2\text{s}(\text{u}^2\text{s})$ . From *tetrap-*, four, and *σκέλος*, the leg. A monster having four lower extremities. [a. 34.]

**TETRASEPALOUS**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{se}^2\text{p}^2\text{a}^2\text{l}-\text{u}^2\text{s}$ . From *tetrap-*, four, and *sepalum*, a sepal. Having four sepals. [a. 35.]

**TETRASPORE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{spo}^2\text{r}$ . From *tetrap-*, four, and *σπορά*, a spore. Fr., *tétraspore*. A spore belonging to one of the groups that contain four spores each. [a. 35.]

**TETRASTER** (Lat.), n. m.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{ra}^2\text{st}^2(\text{ra}^2\text{st})/\text{u}^2\text{s}(\text{ar})$ . Fr., *tétraster*. From *tetrap-*, four, and *ἀστήρ*, a star. A cross-shaped figure formed in the ovum by the junction of a portion of the rays of four adjacent astra. [A. 15.] See also *Auerbach's vacuole*.

**TETRASTICHIS** (Lat.), n. f.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{sti}^2\text{k}^2(\text{sti}^2\text{ch})^2\text{i}^2\text{s}$ . Gen., *-as'is* (*-as'is*). From *τετράστιχος*, in four rows. That form of congenital anomaly of the eyelids in which the lashes are arranged in four rows. [F.]

**TETRASTICHOUS**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{sti}^2\text{k}-\text{u}^2\text{s}$ . From *tetrap-*, four, and *στιχος*, a row. In phyllotaxy, arranged in four vertical ranks. [a. 35.]

**TETRASTOMA** (Lat.), n. n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{ra}^2\text{st}^2(\text{ra}^2\text{st})/\text{o}^2\text{m}-\text{a}^2$ . Gen., *-stomat'os* (*-at'is*). From *tetrap-*, four, and *στόμα*, the mouth. An entozoon of the order *Trematoda*. [L. 16.]—**T. renale**. A species found rarely in the urine. It is ovoid, about 4 inch long, and provided with four suckers at the caudal extremity. [L. 16.]

**TETRASULPHIDE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{su}^2\text{l}^2\text{i}^2\text{d}(\text{id})$ . A sulphur compound analogous to a tetrachloride (q. v.). [B.]

**TETRAPELLURITE**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{te}^2\text{l}^2\text{u}^2\text{r}-\text{i}^2\text{t}$ . A compound of a normal tellurite with tellurium dioxide, containing four atoms of tellurium. [B. 3.]

**TETRATHIONIC ACID**, n.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{thi}-\text{o}^2\text{n}^2\text{i}^2\text{c}$ . A dibasic acid,  $\text{H}_2\text{S}_4\text{O}_6$ . [B. 3.]

**TETRATOMIC**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{o}^2\text{m}^2\text{i}^2\text{c}$ . Lat., *tetra-atomicus* (from *tetrap-*, four, and *άτομος*, uncut). Fr., *tétratomique*. Ger., *vieratomig*. Containing four atoms: of a compound, containing four atoms of replaceable hydrogen; of a radicle, having its combining capacity saturated by union with four hydrogen atoms. [B.]

**TETRAVALENT**, adj.  $\text{Te}^2\text{t}-\text{ra}^2\text{t}-\text{va}^2\text{l}-\text{e}^2\text{nt}$ . See *QUADRIVALENT*.

**TETRETHYL**, n.  $\text{Te}^2\text{t}-\text{re}^2\text{th}^2\text{i}^2\text{l}$ . Fr., *tétréthyle*. Ger., *Teträthyl*. The chemical group  $(\text{C}_2\text{H}_5)_4$ . [a. 38.]—**T. benzene**. A

liquid,  $\text{C}_8\text{H}_{18}(\text{C}_2\text{H}_5)_4$ , of slight aromatic odor. [B. 3 (a. 38).]—**T'-ethylenediamine**. The compound  $\text{C}_2\text{H}_4:\text{N}_2(\text{C}_2\text{H}_5)_4$ . [B. 4.]—**T'phosphonium**. A radicle,  $\text{P}(\text{C}_2\text{H}_5)_4$ . [B.]—**T'urea**. See under *ETHYLUREA*.

**TETRETHYLARSONIUM** (Lat.), n. n.  $\text{Te}^2\text{t}-\text{re}^2\text{th}-\text{i}^2\text{l}^2(\text{u}^2\text{l})-\text{a}^2\text{rs}-\text{on}^2\text{i}^2\text{u}^2\text{m}(\text{u}^2\text{m})$ . A univalent radicle,  $\text{As}(\text{C}_2\text{H}_5)_4$ . [B.]—**T. chloride**. A substance,  $\text{As}(\text{C}_2\text{H}_5)_4\text{Cl} + 4\text{H}_2\text{O}$ , occurring as deliquescent crystals. [B.]—**T. hydrate**. A deliquescent white mass,  $\text{As}(\text{C}_2\text{H}_5)_4\text{OH}$ . [B.]—**T. iodide**. The compound  $\text{As}(\text{C}_2\text{H}_5)_4\text{I}$ . [B.]

**TETRETHYLENE**, n.  $\text{Te}^2\text{t}-\text{re}^2\text{th}-\text{i}^2\text{l}-\text{e}^2\text{n}$ . A radicle,  $(\text{C}_2\text{H}_5)_4 = \text{C}_8\text{H}_{16}$ . [B.]—**T. alcohol**, **T. trioxydhydrate**. A liquid,  $(\text{C}_2\text{H}_5)_4\text{O}_3(\text{OH})_2$ . [B. 2.]

**TETRETHYLIC**, adj.  $\text{Te}^2\text{t}-\text{re}^2\text{th}-\text{i}^2\text{l}^2\text{i}^2\text{c}$ . Containing four molecules of ethyl. [B.]

**TETRETHYLSTIBONIUM** (Lat.), n. n.  $\text{Te}^2\text{t}-\text{re}^2\text{th}-\text{i}^2\text{l}^2(\text{u}^2\text{l})-\text{sti}^2\text{b}-\text{on}^2\text{i}^2\text{u}^2\text{m}(\text{u}^2\text{m})$ . A univalent radicle,  $\text{Sb}(\text{C}_2\text{H}_5)_4$ . [B.]—**T. iodide**. The compound  $\text{Sb}(\text{C}_2\text{H}_5)_4\text{I}$ . [B. 4.]

**TETRINIC ACID**, n.  $\text{Te}^2\text{t}-\text{ri}^2\text{n}^2\text{i}^2\text{c}$ . A monobasic crystalline acid, according to Demogay,  $\text{C}_8\text{H}_7\text{O}_5$  or  $(\text{C}_8\text{H}_7\text{O}_5)_2\text{H}_2\text{O}$ ; according to more recent observations,  $\text{C}_8\text{H}_6\text{O}_5 = \text{C}_8\text{H}_7\text{O}_5\text{COOH}$ . [B. 3.]

**TETROL**, n.  $\text{Te}^2\text{t}-\text{ro}^2\text{l}$ . Fr., *tétrol*. Ger., *T.* A colorless liquid,  $\text{C}_8\text{H}_8\text{O}$ , of peculiar odor, obtained by the distillation of the salts of pyromucic acid, and also found in the distillate from pine-wood. [B. 3, 4.]

**TETROLIC ACID**, n.  $\text{Te}^2\text{t}-\text{ro}^2\text{l}^2\text{i}^2\text{c}$ . A monobasic acid,  $\text{C}_8\text{H}_7\text{O}_5 = \text{CH}_3\text{C} \equiv \text{C.CO.OH}$ . [B. 3 (a. 38); B. 4.]

**TETRONAL**, n.  $\text{Te}^2\text{t}-\text{ro}^2\text{n}-\text{a}^2\text{l}$ . A substance,  $\text{C}_2\text{H}_5\text{C}(\text{SO}_2\text{C}_2\text{H}_5)_2$ , occurring as shining tabular crystals. It acts as a hypnotic. [B. 270 (a. 38).]

**TETROXIDE**, n.  $\text{Te}^2\text{t}-\text{ro}^2\text{x}^2\text{i}^2\text{d}(\text{id})$ . Fr., *tétoxyde*. An oxygen compound analogous to a tetrachloride (q. v.). [B.]

**TETROXYBENZOIC**, adj.  $\text{Te}^2\text{t}-\text{ro}^2\text{x}-\text{i}^2\text{a}-\text{be}^2\text{nz}-\text{o}^2\text{i}^2\text{c}$ . Benzoic with the addition of four atoms of oxygen. [B.]

**TETROXYCHLORIC ACID**, n.  $\text{Te}^2\text{t}-\text{ro}^2\text{x}-\text{i}^2\text{a}-\text{klor}^2\text{i}^2\text{c}$ . See *PERCHLORIC acid*.

**TETURET**, n.  $\text{Te}^2\text{t}-\text{ru}^2\text{r}^2\text{et}$ . A substance,  $\text{C}_8\text{H}_7\text{N}_3\text{O}_4 = \text{H}_2\text{N}-\text{CO}-(\text{NH})-\text{CO}-(\text{NH})-\text{CO}-(\text{NH})-\text{CO}-\text{NH}_2$ , formed from biuret by decomposition in hydrochloric acid gas. [B.]

**TETRYL**, n.  $\text{Te}^2\text{t}-\text{ri}^2\text{l}$ . See *BUTYL*.—**Hydrated t. oxide**, **T. alcohol**, **T. hydrate**. See *BUTYL alcohol*.

**TETRYLENE**, n.  $\text{Te}^2\text{t}-\text{ri}^2\text{l}-\text{e}^2\text{n}$ . Fr., *tétrylène*. See *BUTYLENE*.—**T'dicarbonyl** (or **T'dicarboxylic**) **acid**. The compound  $\text{C}_8\text{H}_6(\text{CO.OH})_2$ . [B. 3 (a. 38).]

**TETRYLIC**, adj.  $\text{Te}^2\text{t}-\text{ri}^2\text{l}^2\text{i}^2\text{c}$ . Fr., *tétryligue*. Containing or derived from tetryl. [B.]—**T. alcohol**. See *BUTYL alcohol*.

**TETTER**, n.  $\text{Te}^2\text{t}-\text{u}^2\text{r}$ . Gr., *ἔττης*. A.-S., *teter*, *tetr*. Lat., *serpigo*, *herpes*. Fr., *dartre*. Ger., *Zitter*, *Zittermal*, *Flechte*. A popular term for various common skin eruptions, especially the different forms of eczema. [G.]—**Brawny t.** See *SEBORRHEA capitis*.—**Crusted t.** See *ECZEMA impetiginodes*.—**Dry t.** Dry or scaly eczema; eczema siccum, eczema squamosum. [G.]—**Eating t.** See *LUPUS* (2d def.).—**Honeycomb t.** See *ECZEMA impetiginodes*.—**Humid t.** See *ECZEMA*.—**Milky t.** See *CRUSTA lactea*.—**Moist t.** See *ECZEMA*.—**Pustular t.** See *IMPETIGO* (5th def.).—**Running t.** Eczema, especially eczema impetiginodes.—**Scaly t.** See *ECZEMA squamosum* and *PSORIASIS* (1st def.).

**TETER**, v. tr.  $\text{Te}^2\text{t}-\text{u}^2\text{r}$ . To affect with tetter.

**TETERWORT**, n.  $\text{Te}^2\text{t}-\text{u}^2\text{r}-\text{wu}^2\text{rt}$ . See *CHELIDONIUM majus* (1st def.) and *SANGUINARIA canadensis*.

**TETY**, n. A pustulo-crustaceous affection of the skin, chiefly about the nostrils and the mouth, among the natives of Madagascar, all of whom are said to have it sooner or later, but no one more than once. [Lacaze, "Jour. de méd. de Paris," June 17, 1882, p. 725.]

**TETURIN**, n.  $\text{Tu}^2\text{k}^2\text{ri}^2\text{n}$ . 1. A non-nitrogenous substance obtained from *Teucrium fruticans*. ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 128 (a. 50).] 2. Of Mosetig, an aqueous extract prepared from *Teucrium scordium*. Injected subcutaneously, it produces a sudden rise of temperature. T. injections have been used for cold tuberculous abscesses, fungous adenitis, actinomycosis, and lupus. ["Med. Record," March 4, 1893, p. 274 (a. 50).]

**TEUCRIUM** (Lat.), n. n.  $\text{Tu}^2\text{k}^2\text{ri}^2\text{i}^2\text{u}^2\text{m}(\text{u}^2\text{m})$ . Gr., *τεύκριον* (from *Τεύκος*, Teucer, king of Troy). Fr., *germandrée*. Ger., *Gamander*. Germanander: a genus of the *Ajaceae*. [a. 35.]—**T. aureum**. Ger., *goldgelber Gamander*. Golden germander (or poly) of southern Europe. It and the related species *T. flavescens* were formerly official as *herba polii lutei*. [a. 35.]—**T. botrys**. Fr., *botrys*, *germandrée femelle*. Ger., *Trasbergamander*. Jerusalem oak, the jagged germander of middle and southern Europe: a balsamic, aromatic species (formerly official as *herba botrys chamedryoides*), used as a tonic, stimulant, and febrifuge. [a. 35.]—**T. campanulatum**. Bell-shaped germander: a procumbent, smooth, square-stemmed herb sometimes confounded with other species of the genus. It is found in moist places in the Levant, Balearic Islands, Spain, Sicily, etc. [B. 35.]—**T. canadense**. American germander, wood-sage. It has a garlic-like odor, and is used like *T. scordium*. [a. 35.]—**T. capitatum**. Fr., *germandrée en tête*. Ger., *köpfiger Gamander*. A European and Siberian shrub. The herb, *herba polii montani* (*Anglorum*), is used like that of *T. polium*, of which Koch regards this as a variety. [a. 35.]—**T. chamedrys**. Fr., *calamendrier*, *chêneau*, *chénelle*, *germandrée officinale*, *herbe des fièvres*, *petit chéna*, *sauge amère*, *thériaque d'Angleterre*. Ger., *gemeiner oder ichter*, *oder edler Gamander*, *Erdbeertrauchkraut*, *Frauenbiss*, *Bergskordienkraut*. Wall (or

wild) germander, the *χαμαίδρυς* of Dioscorides; an undershrub with a bitter, aromatic, slightly astringent taste, growing in southern and central Europe. The leaves and tops (*herba chamædrys*, seu *teucrii chamædrys*) were formerly used in uterine diseases, and as an alternative and febrifuge, etc. [a. 35].—**T. creticum**. Ger., *cretischer Gamander*. A shrub of Candia, Egypt, and the Orient; perhaps the *ῥόλιον ἔρεπον* of Dioscorides. The leafy flowering tops, *summitates polii cretici* (seu *polii angustifolii*, seu *rosmarini stœchadis facie*), were formerly used like those of *T. polium*. [a. 35].—**T. flavesceus**. Ger., *gelblicher Gamander*. A species growing in southern Europe, especially southern France, used like *T. aureum*. [a. 35].—**T. flavum**. Fr., *germandrée* (ou *poliott*) *jaune*. Ger., *gelber Gamander*. A fragrant, balsamic, bitter shrub found in southern Europe. The herb, *herba teucrii flavi*, was formerly used like that of *T. chamædrys*. [a. 35].—**T. fruticans**. Ger., *strauchiger Gamander*. Tree-germander of northern Africa and parts of southern Europe. The Neapolitans, who call it *erba di Santo Lorenzo*, use it as a vulnerary. [a. 35].—**T. inflatum**. Fr., *germandrée renflée*. A species found in the Antilles, having the properties of *T. capitatum*. [a. 35].—**T. iwa**. See *Asuga iwa* and *Asuga chamæpitys*.—**T. lucidum**. 1. Shining germander; a very smooth herbaceous species with tall, erect, square stems, crimson flowers in whorls, and shining leaves. It is closely allied to, but distinct from, *T. chamædrys*. 2. Of Sibthorp. *T. flavum*. [a. 35].—**T. maritimum**, **T. marum**. Fr., *germandrée maritime*, *marum vrai*, *herbe au chat*. Ger., *Katzengamander*, *Katzenkraut*, *Moschuskraut*, *Mastichkraut*, *Mastickkraut*. Catthyme, Syrian herb-mastic; a plant of southern and middle Europe, Egypt, and Asia Minor, containing a peculiar stearoptene and having bitter, aromatic, stimulant properties. The flowering tops, *herba (seu summitates) mari veri* (seu *mari syriaci*), *herba Cyriaci* (seu *Syriaci*, seu *costusi*, seu *masticinæ*), *fruticulus teucrii mari floridi*, were formerly used in hysteria, amenorrhœa, nervous prostration, etc., and more recently, in the form of syrup and confection, in spasmodic cough. It was formerly substituted for lavender flowers in the preparation of pulvis asari compositus. It acts as an antispasmodic and errhine. [a. 35].—**T. massiliense**. Sweet-scented (or apple-scented) germander of Mediterranean regions. All parts are clothed with a soft, velvet-like pubescence, and exhale, if touched, a peculiar spicy odor compared to that of mallow apples. [a. 35].—**T. montanum**. Fr., *germandrée de montagne*, *thym blanc*. Ger., *Berggamander*, *Bergpolei*. An undershrub of middle and southern Europe. The leaves and tops, *herba (seu summitates) polii montani* (*Germanorum*), were formerly used like those of *T. polium*. [a. 35].—**T. officinale**. See *T. chamædrys*.—**T. pa-lustre**. See *T. scordium*.—**T. polium**. Ger., *Polei-Gamander*, *Bergpolei*. The *cade* of the Arabs, probably the *ῥόλιον* of Dioscorides, cat-thyme, hultwort, poly germander; a Mediterranean species. The aromatic leaves and flowering tops, *herba (vel summitates) polii montani* (seu *montani Gallorum*, seu *monselpici*, seu *maritimi*, seu *erecti*), were formerly used in catarrh and asthma and in aromatic fomentations, and more recently, it is said, successfully, in cholera. [a. 35].—**T. pyreneicum**. Pyrenean germander; a creeping or diffusely branched species with orbicular, crenate, hairy leaves, and with flowers in dense tufts variegated with pale-yellow and purple. [a. 35].—**T. scordioides**. A species growing in southern Europe, having the properties of *T. scordium*. [a. 35].—**T. scordium**. Fr., *germandrée scordium*, *chamarras*, *germandrée aquatique* (ou *d'eau*). Ger., *Knoblauchgamander*, *Lachenknoblauch*, *Wasserlauch*, *Wasser-butengel*, *Skordien-Gamander*, *Skordienkraut*. Garlic (or water-) germander of Europe; a species with a garlic-like smell and a bitter, somewhat pungent taste. It is not now used, but the entire plant (excluding the root), was formerly employed as a tonic, diaphoretic, and anthelmintic, as an antidote, and as an application to foul ulcers, under the names *herba scordii* (*vulgaris*, seu *nostratis*), *herba chamædrys aquatica* (seu *palustris*), etc. [a. 35].—**T. scorodonia**, **T. silvestre**. Fr., *germandrée des bois*, *baume* (ou *sauge*, ou *germandrée*) *sauvage*, *sauge sauvage des bois*, *fausse chamarras* (ou *scordium*). Ger., *gemeine Skordonia*, *wilde Salbei*, *Ackersalbei*, *Ackersalbekraut*. Hind-heal, mountain- (or garlic-, or wood-) sage, wood-germander of western and southern Europe; formerly official as *herba scorodonia* (seu *salvia agrestis*, seu *salvia silvestris*), and used like *T. chamædrys*, though less active. [a. 35].—**T. thea**. Fr., *germandrée théa*, *thé commun des Cochinchinois*. Cochinchina tea; used as a digestive. [a. 35].—**T. tomentosum**. A variety of *T. montanum*. [a. 35].—**T. verum**. See *T. fruticans*.

**TEUFELSBRUT-KIELKOPF** (Ger.), n. *Toif'e's-brut-kelk'opf*. The translation of an ancient term for the fleshy or blood mole.

**TEVETOSIN**, n. *Te2v-e2t-os'i2n*. See *THEVETOSIN*.

**TEXTURAL**, adj. *Te2xt'u2-r1*. From *textura*, texture. Fr., *t. Ger., geweblich*. Pertaining to the structure or texture of a tissue or part. [J.]

**TEXTURE**, n. *Te2xt'u2-r*. Gr., *ἵστρος*. Lat., *textura* (from *texere*, to weave). Fr., *t. Ger., Textur*, *Bau*. 1. See *TISSUE*. 2. The arrangement and connection of the structural elements forming tissues and organs. The *t.* is also dependent on the character of the structural elements. [J. 16, 21, 23.] 3. Of mineral waters, the quality which causes them to impart a sensation of smoothness or roughness to the skin on its contact with them. [B. 5].—**Alimentary** *t.* That portion of a body which is affected by the process of digestion; the digestible portion of a substance. [K.]

**TEXTUS** (Lat.), n. m. *Te2xt'u2s(u4s)*. Gen., *text'us*. From *texere*, to weave. See *TISSUE*.—**T. cellularis intermedius** (seu *laxus*). The part of the areolar tissue which does not penetrate the various organs. [J. 16].—**T. cellularis parenchymalis** (seu *stipitatus*). That part of the areolar tissue which penetrates the various organs and gives the proper tissue-elements support and connection. [J. 16].—**T. cellularis strictus**. Connective tissue

which forms envelopes for various organs. [J. 16].—**T. fibrosi**. See *STROMA* (1st and 2d def.).—**T. organicus**. See *T. cellularis parenchymalis*.—**T. papillaris**. See *CORPUS papillare*.

**THERIA** (Lat.), n. f. *Ther'* (tha2'e2r)-i2-a2. See *RADESYGE*.

**THAL** (Ger.), n. *Tha1*. See *VALLECULA Reilii*.

**THALAMENCEPHALON**, n. *Tha2l-a2m-e2n-se2f'a2l-o2n*. From *θάλαμος*, an inner room, and *ἐγκεφαλος*, the brain. Ger., *Zwischenhirn*. That portion of the embryonic brain which includes the region of the third ventricle, the primary ocular vesicles, and the infundibulum. [A. 5.]

**THALAMIFLORAL**, **THALAMIFLOROUS**, adj's. *Tha2l-a2m-i2-fl'o2r'l*, *-fl'o2r'u2s*. Lat., *thalamiflorus* (from *θάλαμος*, an inner chamber, and *flos*, a flower). Fr., *thalamiflore*. Ger., *bodenblüthig*, *fruchtbodenblüthig*. Having the petals and stamens inserted upon the receptacle, as in the *Thalamiflora* (Fr., *thalamiflores*), which are De Candolle's first subclass of dicotyledons. The *Thalamifloria* (of Dumortier, an order of the *Bilegmia*) comprise the *Nymphaeaceæ*, *Hydrophellidæ*, etc. [a. 35.]

**THALAMUS** (Lat.), n. n. *Tha2l'(tha2l)-a2m(a2m)-u2s(u4s)*. Gr., *θάλαμος*. Fr., *thalam*. Ger., *Thalamion*. Fr., *Fruchtkörper* (1st def.). In lichens, (1) the thecium; (2) an organ of the apothecium, consisting of erect colorless threads, arising from the hypothecium and containing protoplasm; they press upon the theca and thus assist in expelling the spores. [a. 35.]

**THALAMUS** (Lat.), n. m. *Tha2l'(tha2l)-a2m(a2m)-u2s(u4s)*. Gr., *θάλαμος*. Fr., *thalam*. Ger., *T. 1*. See *Optic t. 2*. In botany, a receptacle; of some authors, a calyx. [a. 35].—**Optic t.** Fr., *couche optique*. Ger., *Schhügel*. An oval, grayish mass seen on the floor of the lateral ventricle, after removing the fornix and velum interpositum. It is bounded anteriorly and externally by the corresponding corpus striatum, from which it is separated by the tænia semicircularis. To its inner side lies the third ventricle, of which it forms the lateral wall. Its lower surface forms the covering of the descending cornu of the lateral ventricle. Posteriorly it ends in two rounded masses, the geniculate bodies. The optic t. consists essentially of gray matter, with a thin external covering of white. In its interior are several distinct ganglionic masses or nuclei. [I. 15 (K).] Cf. *Median centre of Luys*.—**T. corporum cavernosorum**. See *CRUS penis*.—**T. fasern der Haube**. Certain nerve-fibres of the tegmentum which enter the optic thalamus. [I. 17 (K).]—**T. fructificationis**. Ger., *Befruchtungsstühl*. 1. The torus of a flower. 2. The hymenium of *Fungi*. 3. The hypothecium of lichens. [a. 35].—**T. nervi optici** (seu *optico-rum*), **T. opticus**. See *Optic t.*—**T. regalli**. See *PERICARDIUM*.—**T. wurzel des Tractus opticus** (Ger.). Those fibres of the optic tract which may be traced directly to the optic t. [I. 6 (K).]

**THALAMUSSTIEL** (Ger.), n. *Tha2l'a2m-us-stel*. The reflected portion of the anterior pillar of the fornix, which turns upward from the corpora albicantia to enter the corresponding optic thalamus. [I. 17 (K).]—**Unterer T.** The inferior peduncle of the optic thalamus. [I. 10 (K).]—**Vorderer T.** The anterior peduncle of the optic thalamus. [I. 10 (K).]

**THALASSOPHYTES**, n. pl. *Tha2l'a2s'i2-o-flt2*. Lat., *thalassophyta*, *thalassophyta* (from *θαλάσσιος*, marine, and *φύτον*, a plant). Fr., *t. Marine Algæ*. [a. 35.]

**THALASSOPHOBIA** (Lat.), n. f. *Tha2l'(tha2l)-la2s(la2s)-(o)-a2-fob(fo2b)'i2-a2*. From *θαλάσσα*, the sea, and *φόβος*, panic fear. A morbid dread of the sea. [A. 34.]

**THALASSOTHERAPIE** (Fr.), **THALASSOTHERAPIE** (Ger.), n's. *Tha2l'a2s-o-tar-a2-p-e*, *-pe'*. From *θαλάσσα*, the sea, and *θεραπεία*, treatment. Treatment by means of residence near the sea, sea-bathing, or a sea-voyage. [A. 319 (a. 21).]

**THALGUT** (Ger.), n. *Tha1'gut*. A place in the canton of Berne, Switzerland, where there are saline, chalybeate, and gaseous springs. [L. 30, 41, 49 (a. 14).]

**THALICTRINE**, n. *Tha2l'i2-kt'ren*. An alkaloid found in *Thalictrum macrocarpum*, giving that plant its toxic properties. It acts as a cerebro-spinal poison. [Doassans (B).]

**THALICTRUM** (Lat.), n. n. *Tha2l'(tha2l)-i2-kt'ru2m(ru4m)*. Gr., *θάλκτρον*, *θαλκτρον*. Fr., *pigamon*. Ger., *Wiesenraute*. Meadow-rue; a genus of ranunculaceous herbs. [a. 35].—**T. anemonides**. See *ANEMONE thalictroides*.—**T. angustifolium**, **T. angustissimum**. A diuretic European species. [a. 34].—**T. aquilegifolium**, **T. aquilegium**, **T. atro-purpureum**. Fr., *pigamon à feuilles d'ancolie*, *colombine plumeuse* (ou *phmacée*). Feathered (or tufted) columbine, Spanish-tuft, columbine meadow-rue; an Alpine species having the properties of *T. angustifolium*. [a. 35].—**T. confertum**, **T. Cornuti**. Fr., *pigamon du Canada*. Canadian tall meadow-rue; a North American species, regarded as a powerful alexipharmac. [a. 35].—**T. flavum**. Fr., *pigamon (des prés)*, *fausse rhubarbe*, *piéd de Milan*, *rhubarbe des pauvres* (ou *des paysans*), *thalictro commun*. Ger., *gelbe Wiesenraute*, *Wasserraute*, *Feldrhubarber*, *Feldraute*. False (or poor man's) rhubarb, yellow-flowered (or maiden-hair, or small) meadow-rue of Europe and northern Asia. The root and herb, *radix et herba thalictri* (seu *rhubarbari pauperum*, seu *rhei pauperum*, seu *pseudo-rhubarbari*, seu *rutæ pratensis*), are diuretic and purgative, and color the secretions yellow. The root is used in jaundice and as a febrifuge, and together with the herb, as an application in coxalgia and backache. [a. 35].—**T. foliolosum**. An East Indian species. The root is tonic and aperient, and is used for atonic dyspepsia and as a febrifuge: it is sometimes substituted for coptis-root. [a. 35].—**T. macrocarpum**. A species found in the Pyrenees. The root contains a neutral principle (macrocarpin) and a poisonous principle (thalictrine). [a. 35].—**T. mexicanum**. 1. Of Hernandez, a species the root of which is used in ophthalmia and as a diuretic. Cf. *T. revolutum*. 2. Of De Candolle, an imperfectly known Mexican species, used like the preceding. [a. 35].—**T. revolutum**. Ger., *umgerollte*

**Wiesenraute.** A species growing in the southern United States and in Mexico; probably identical with *T. mexicanum* (1st def.). [a, 35.]—**T. sinense.** Fr., *pigamon* de Chine. A Chinese species with laxative and aperient roots. [a, 35.]

**THALLEINE**, n.  $\text{Tha}^2\text{I}^0\text{-en}$ . A compound of thalline with an alcoholic radicle or compound ether. [B.]

**THALLEIOQUINE**, n.  $\text{Tha}^2\text{I}^0\text{-o-kwen}$ . Fr., *thalléiochine*. Ger., *Thalleiochin*. A substance formed by treating a quinine salt with chlorine or a concentrated solution of calcium chloride. It is a green, resinous mass. [B, 93 (a, 14).]

**THALLIC**, adj.  $\text{Tha}^2\text{I}^1\text{I}^2\text{k}$ . Fr., *thallique*. Containing thallium as a trivalent radicle. [B.]

**THALLINE**, adj.  $\text{Tha}^2\text{I}^1\text{I}^2\text{n}$ . Pertaining to the thallus; consisting of the thallus; resembling a thallus. [a, 35.]

**THALLINE**, n.  $\text{Tha}^2\text{I}^1\text{en}$ . From  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a green twig. Lat., *thallinum*. Fr., t. Ger., *Thallin*. Syn.: *tetrahydroparquinanisol*. An artificial alkaloid of the quinoline group,  $\text{C}_{10}\text{H}_{10}\text{OCH}_2\text{N}=\text{C}_{10}\text{H}_9\text{NO}$ , forming white prismatic crystals. It is employed, together with several of its salts, as an antipyretic and in gonorrhœa. [Huchard, "Union méd.," Jan. 3, 1885, p. 13; "Annal. de chim. médic. Farm. e di farmacol.," Mar., 1885, p. 209; "Proc. of the Am. Pharm. Assoc.," xxxvi, p. 468 (a, 50).]—**T. hydrochlorate**, **T. hydrochloride**. A compound of t. with hydrochloric acid. It forms hygroscopic crystals. [B.]—**T. sulphate**. A white crystalline powder having an odor resembling that of anisol and a saline taste; used in gonorrhœa. [B.]—**T. tartrate**. A white crystalline powder having an odor resembling that of coumarine and a bitter, saline taste. [B.]

**THALLIOUS**, adj.  $\text{Tha}^2\text{I}^2\text{u}^3\text{s}$ . Fr., *thallieux*. Containing thallium as a univalent radicle. [B.]

**THALLIUM** (Lat.), n. n.  $\text{Tha}^2\text{I}^1(\text{tha}^2\text{I}^1)\text{I}^2\text{u}^3\text{m}(\text{u}^4\text{m})$ . From  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a green twig. Fr., t. Ger., *T*. A metallic element discovered by Crookes in 1861; soft, malleable, bluish-white, of leaden lustre and crystalline structure, melting at  $200^\circ\text{C}$ . In compounds it acts partly as a univalent, partly as a trivalent radicle. Sp. gr., 11.8; atomic weight, 203.6; symbol,  $\text{TI}$ . It is an energetic irritant poison. [B, 3, 5.]—**T. bromide**. A compound of t. with bromine. T. monobromide,  $\text{TIBr}$ , a pale-yellow substance, is known. [B, 3.]—**T. chloride**. See *T. monochloride* and *T. trichloride*.—**T. cyanide**. A body,  $\text{TCN}$ , forming laminar crystals. [B, 3.]—**T. hydroxide**. A strongly alkaline substance,  $\text{TI.OH} + \text{H}_2\text{O}$ , forming yellow acicular crystals. [B, 3.]—**T. iodide**. A compound of t. with iodine. The moniodide,  $\text{TII}$ , a crystalline salt, is known. [B, 3.]—**T. monochloride**. A body,  $\text{TICl}$ , forming cubical crystals. [B, 3.]—**T. monoxide**. A black powder,  $\text{TI}_2\text{O}$ , readily soluble in water. [B, 3.]—**T. oxide**. See *T. monoxide* and *T. trioxide*.—**T. sulphide**. A compound of t. with sulphur. The monosulphide,  $\text{TI}_2\text{S}$ , is a black crystalline substance. [B, 3.] See also *T. trisulphide*.—**T. trichloride**. A crystalline substance,  $\text{TICl}_3$ . [B, 3.]—**T. trioxide**. A dark, red powder,  $\text{TI}_2\text{O}_3$ . [B, 3.]—**T. trisulphide**. A black, amorphous substance,  $\text{TI}_2\text{S}_3$ , which is brittle when cold, but becomes soft like pitch when warmed. [B, 3.]

**THALLOCHLOR**, n.  $\text{Tha}^2\text{I}^0\text{-cl}^0\text{r}$ . Fr., *thallochlor*. Ger., *T. Flechtengrün*. A green coloring matter, distinct from chlorophyll, found by Berzelius in Iceland moss. [B, 270.]

**THALLOGENOUS**, adj.  $\text{Tha}^2\text{I}^1\text{-o}^2\text{I}^2\text{n}^3\text{u}^3\text{s}$ . Fr., *thallogène*. From  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a young shoot, and  $\gamma\epsilon\gamma\acute{\nu}\alpha\iota\text{v}$ , to engender. Producing a thallus, pertaining to the thallogenes (Lat., *Thallogenes*; Fr., *thallogènes*), which are the thallophytes. [a, 35.]

**THALLOID**, adj.  $\text{Tha}^2\text{I}^0\text{I}^0\text{d}$ . From  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a young shoot, and  $\epsilon\acute{\iota}\delta\omicron\varsigma$ , resemblance. Ger., *lagerartig*. See **THALLINE**, adj.

**THALLOME**, n.  $\text{Tha}^2\text{I}^0\text{m}$ . A structure having the characters partly of a leaf and partly of a stem. [a, 35.]

**THALLOPHYTES**, n. pl.  $\text{Tha}^2\text{I}^0\text{-o}^2\text{I}^2\text{ts}$ . Lat., *thallophyta* (from  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a young shoot, and  $\phi\acute{\upsilon}\tau\eta\nu$ , a plant). Fr., *thallophytes*. Ger., *Lagerpflanzen*. *Thallophyten*. *Thalluspflanzen*. The thallophytes, a section of cryptogams: so called because there is no clear differentiation of the plant-body into root, stem and leaf. They comprise the lichens, the *Fungi* (including the *Mycomycetes* and *Schizomycetes*), and the *Algæ* (including the *Cyanophyceæ*). [a, 35.]

**THALLOPSORE** (Lat.), n. f. pl.  $\text{Tha}^2\text{I}^1(\text{tha}^2\text{I}^1)\text{-lo}^2\text{ps}^0\text{-or}^0\text{e}(\text{a}^2\text{-e}^2)$ . From  $\theta\alpha\lambda\lambda\acute{o}\varsigma$ , a green shoot, and  $\psi\omega\text{ra}$ , the itch. Of Reichenbach, the *Dermatopsoreæ*. [a, 35.]

**THALLUS** (Lat.), n. m.  $\text{Tha}^2\text{I}^1(\text{tha}^2\text{I}^1)\text{I}^2\text{u}^3\text{s}(\text{I}^4\text{u}^4\text{s})$ . Gr.,  $\theta\alpha\lambda\lambda\acute{o}\varsigma$  (from  $\theta\alpha\lambda\lambda\epsilon\iota\nu$ , to abound). Fr., *thalle*. Ger., *Lager*, *T*. A plant-body not differentiated into leaf and stem, especially the frond of *Algæ* or the vegetative system of lichens. [a, 35.]

**THALPSIS** (Lat.), n. f.  $\text{Tha}^2\text{I}^1\text{ps}(\text{tha}^2\text{I}^1\text{ps})^1\text{I}^2\text{s}$ . Gen., *thalp'seos* (-is). Gr.,  $\theta\alpha\lambda\psi\text{is}$  (from  $\theta\alpha\lambda\psi\epsilon\iota\nu$ , to heat). See **FOMENTATION**.

**THANASIMOUS**, adj.  $\text{Tha}^2\text{n}^2\text{-a}^2\text{s}^1\text{I}^2\text{m}^2\text{-u}^3\text{s}$ . Gr.,  $\theta\alpha\lambda\alpha\sigma\acute{\iota}\mu\omicron\varsigma$  (from  $\theta\acute{\alpha}\nu\alpha\sigma\iota\mu\omicron\varsigma$ , to die). Lat., *thanasimus*. Fr., *thanasime*. Deadly, mortal. [L, 50 (a, 14).]

**THANATERETHISIS** (Lat.), n. f.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-e}^2\text{r}^2\text{I}^2\text{s}$ . From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\epsilon\text{r}\epsilon\theta\acute{\iota}\zeta\epsilon\iota\nu$ , to irritate. Fr., *thanateréthisie*. Of C. H. Schultz, fatal irritation. [L, 50 (a, 14).]

**THANATODOCIMASTER** (Lat.), n. m.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-o}^2\text{I}^2\text{s}^2\text{-o}^2\text{I}^2\text{s}^2\text{-d}^2\text{o}^2\text{I}^2\text{s}^2\text{-d}^2\text{o}^2\text{I}^2\text{s}^2\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-u}^3\text{r}^2\text{I}^2\text{ar}$ . Gen., *-er'os* (-is). From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\delta\omicron\kappa\iota\mu\alpha\sigma\tau\acute{\iota}\rho$ , an examiner. Ger., *Todesanzeiger*. A sign or evidence of death. [L, 50 (a, 48).]

**THANATOID**, adj.  $\text{Tha}^2\text{n}^2\text{-a}^2\text{t}^2\text{-o}^2\text{I}^2\text{d}$ . Gr.,  $\theta\alpha\lambda\alpha\tau\acute{o}\iota\delta\eta\varsigma$  (from  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\epsilon\acute{\iota}\delta\omicron\varsigma$ , resemblance). Lat., *thanatodes*. Fr., *thana-teux*. Deadly, causing death. [L, 50.]

**THANATOLOGY**, n.  $\text{Tha}^2\text{n}^2\text{-a}^2\text{t}^2\text{-o}^2\text{I}^2\text{-o}^2\text{I}^2\text{-j}^2\text{I}^2$ . Lat., *thanatologia* (from  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\lambda\omicron\gamma\omicron\varsigma$ , understanding). Fr., *thanatologie*. Ger., *Todeslehre*. The science of the causes, etc., of death. [D, 3.]

**THANATOMANIA** (Lat.), n. f.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-o}^2(\text{a}^2)\text{-man}(\text{ma}^2\text{n})^1\text{I}^2\text{-a}^2\text{I}^2$ . From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\mu\alpha\upsilon\iota\alpha$ , mania. Suicidal mania. [a, 34.]

**THANATOMETER**, n.  $\text{Tha}^2\text{n}^2\text{-a}^2\text{t}^2\text{-o}^2\text{m}^2\text{-e}^2\text{t}^2\text{-u}^3\text{r}$ . From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\mu\epsilon\tau\epsilon\omicron\upsilon$ , a measure. A thermometer introduced into the stomach or rectum in order to determine the fact of death by the fall of the internal temperature. [L, 41, 50 (a, 14).]

**THANATOPHOBIA** (Lat.), n. f.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-o}^2(\text{a}^2)\text{-fob}(\text{fo}^2\text{b})^1\text{I}^2\text{-a}^2\text{I}^2$ . From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\phi\acute{o}\beta\omicron\varsigma$ , fear. Fr., *thanatophobie*. Ger., *Todesfurcht*. Morbid fear of death. [a, 34.]

**THANATOSIS** (Lat.), n. f.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-os}^1\text{I}^2\text{s}$ . Gen., *-os'eos* (-is). Gr.,  $\theta\alpha\lambda\alpha\tau\omega\sigma\iota\varsigma$  (from  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death). Fr., *thanatose*. See **MORTIFICATION**.

**THANATOTYPHUS** (Lat.), n. m.  $\text{Tha}^2\text{n}^2(\text{tha}^2\text{n}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t}^2)\text{-o}^2(\text{a}^2)\text{-tif}(\text{tu}^4\text{f})^1\text{u}^3\text{s}(\text{u}^4\text{s})$ . From  $\theta\alpha\lambda\alpha\sigma\iota\mu\omicron\varsigma$ , death, and  $\tau\acute{\upsilon}\phi\omicron\varsigma$  (see **TYPHUS**). Malignant typhus. [L, 50 (a, 14).]

**THAPSIA** (Lat.), n. f.  $\text{Tha}^2\text{ps}(\text{tha}^2\text{ps})^1\text{I}^2\text{-a}^2\text{I}^2$ . Gr.,  $\theta\alpha\psi\iota\alpha$  (2d def.). Fr., *thapsie* (1st and 3d def's). Ger., *Böskraut*. 1. Deadly carrot; a genus of herbs typical of a tribe (*Thapsiæ* of Endlicher, *Thapsiæ* of Lindley, *Thapsiæ* of Koch) of the *Umbelliferae*. 2. Of the ancients, see *T. asclepium*. 3. In pharmacy, *T. gargarica*. [a, 35.]—**Emplastrum thapsiæ extensum**. See *Sparadrap thapsiæ*.—**Oleum thapsiæ compositum**. Sp., *aceite de tapsia compuesto* [Sp. Ph.]. A preparation made by digesting 1 part each of t.-root, rosemary-leaves, and red wine and 4 parts of olive-oil for four days, heating until the wine is evaporated, straining, and filtering. [B, 95 (a, 38).]—**Radix thapsiæ**. Fr., *thapsie (racine)*. Sp., *tapsia (raiz)*. The root of *T. gargarica*. [B, 95 (a, 38).]—**Resin of t. Lat., resina thapsiæ**. Fr., *résine de t.* Sp., *resina de tapsia*. A resinous substance obtained from the root-bark of *T. gargarica* by extracting with 90-per-cent. alcohol (92 per cent. [Belg. Ph.]), distilling off the alcohol, washing, and evaporating to the consistency of a (soft [Sp. Ph.]) extract [Fr. Cod.] (of honey [Belg. Ph.]). [B, 95 (a, 38).]—**Sparadrap thapsiæ**. Fr., *sparadrap de t.* Sp., *espadrapo de tapsia*. A plaster consisting of 420 parts of yellow wax, 150 each of colophony, white pitch, and terebinthina cocta, 50 each of larch turpentine and glycerin, and 75 of resin of t. [Fr. Cod.]; of 35 of yellow wax, 137 each of colophony, terebinthina cocta, and Burgundy pitch, 46 each of larch turpentine, glycerin, and honey, and 69 of resin of t. [Belg. Ph.]; or of 560 of yellow wax, 300 of colophony, 250 of elemi, 80 of resin of t., and 50 of turpentine [Sp. Ph.]. [B, 95 (a, 38).]—**T. apulia**, **T. asclepium**. Fr., *laser d'Esculape* (ou d'Hercule). Ger., *schmalblättriges Böskraut*. Ethiopian cummin, the  $\theta\alpha\psi\iota\alpha$  of Dioscorides. The root contains an acrid, irritant juice, and was formerly used as a purgative and in eruptive diseases. It is still used as an embrocation in rheumatism. [a, 35.]—**T. fetida**. Ger., *stinkendes Böskraut*. Stinking carrot of Spain and the southern European islands. The root has the properties of *T. gargarica*. [a, 35.]—**T. fœnicula**, **T. gargarica**. Fr., *thapsie lisse*, *panacée d'Esculape*, *faux fenouil*. Ger., *garganisches Böskraut*, *falscher Turpith*. A native of southern Europe and northern Africa: the *drius* of Algeria, where it is considered analgesic. The root-bark yields resina thapsiæ, and is saturated with a purgative, emetic, emmenagogue, vesicant juice. [a, 35.] Cf. *T. silphium*.—**T. plaster**. See *Sparadrap thapsiæ*.—**T. silphium**, **T. silphium**, **T. sylphium**. A species (by De Candolle regarded as a variety of *T. gargarica*) found in northern Africa, believed to have been the source of the *silphium* ( $\sigma\iota\lambda\phi\iota\omicron\nu$ ), or *cynnaicum*, of the ancients. Its resin is said to be more active than that of *T. gargarica*. [a, 35.]—**T. villosa**. Fr., *thapsie velue*, *malherbe*. Ger., *zottiges Böskraut*. Deadly carrot of the Mediterranean regions; a purgative species. Its resin is said to be slower and milder as a vesicant than that of *T. gargarica*. [a, 35.]

**THAPSUS** (Lat.), n. m. and f.  $\text{Tha}^2\text{ps}(\text{tha}^2\text{ps})^1\text{I}^2\text{-u}^3\text{s}(\text{u}^4\text{s})$ . Gr.,  $\theta\alpha\psi\omicron\varsigma$ . 1. A section of the genus *Verbascum*. 2. The *Verbascum* f.

**THARANDT** (Ger.), n.  $\text{Ta}^2\text{-r}^2\text{-a}^2\text{ndt}^2$ . A place in Saxony where there are two mineral springs, one saline and chalybeate and the other sulphurous. [L, 30, 37, 49 (a, 14).]

**THÄTIG** (Ger.), adj.  $\text{Tat}^1\text{I}^2\text{g}$ . See **ACTIVE**.

**THATKRAFT** (Ger.), n.  $\text{Ta}^2\text{t}^1\text{'kra}^2\text{ft}$ . See **ENERGY**.

**THAU** (Ger.), n.  $\text{Ta}^2\text{u}^4$ . See **DEW** and **ROS**.

**THAUMATROPE**, n.  $\text{Tha}^4\text{m}^2\text{-a}^2\text{-trop}$ . From  $\theta\alpha\upsilon\mu\alpha$ , a wonder, and  $\tau\acute{\rho}\epsilon\pi\epsilon\iota\nu$ , to turn. A rectangular board which may be rotated about an axis running through the centre of the longer side. By rapid rotation objects on the opposite sides of the board are made to appear in combination (e. g., a bird in a cage). [F.]

**THAUMATURGICAL**, adj.  $\text{Tha}^4\text{m}^2\text{-a}^2\text{-u}^3\text{r}^2\text{I}^2\text{-k}^1$ . From  $\theta\alpha\upsilon\mu\alpha\tau\omicron\upsilon\text{r}\gamma\epsilon\iota\nu$ , to work wonders. Fr., *thaumaturgique*. Wonder-working, magical. [a, 48.]

**THÉ** (Fr.), n.  $\text{Ta}$ . 1. See **TEA**. 2. Of the Fr. Cod., see **THEA** (3d def.).—**Faux té**. See *Sida rhombifolia*.—**T. américain**. See *Ceanothus americanus* and *Capriaria biflora*.—**T. de Blanckenheim**. See *Galeopsis ocheracea*.—**T. de France**. See *Melissa occidentalis*.—**T. de Grèce**. See *Salvia officinalis*.—**T. de Jersey**. See *Ceanothus americanus*.—**T. de la Martinique**. See *Capriaria biflora*.—**T. de l'Amazone**. See *Aya-pana*.—**T. de la mer du sud**. See *Ilex vomitoria*.—**T. de la Nouvelle Jersey**. See *Ceanothus americanus*.—**T. de montagne**. See *Lithospermum officinale* and *Gaultheria procumbens*.—**T. de Paraguay**. See *Ilex paraguayensis*.—**T. de Pennsylvanie**. See *Monarda didyma*.—**T. de Saint-Germain**. See *Species larcantes*.—**T. des Antilles**. See *Capriaria biflora*.—**T. des Jésuites**. See *Ceanothus ambrosioides* and *Ilex paraguayensis*.—**T. des Norvégiens**. See *Rubus arcticus*.—**T. du Canada**. See *Gaultheria procumbens*.—**T. du ciel**. See *Hydrangea Thunbergii*.—**T. du Labrador**. See *Ledum latifolium*.—**T. du Mexique**. See *Ceanothus ambrosioides*.—**T. du Paraguay**. See *Ilex paraguayensis*.—**T. du Pérou**. See *Erythroxylon coca*.

—**T. de la Terre-Neuve, T. rouge.** See *GAULTHERIA procumbens*. —**T. suisse.** 1. See *FALTRANE* (2d def.). 2. Of the Fr. Cod., see *SPECIES VULNERARIAE*. —**Tisane de T.** [Fr. Cod.]. An infusion of 10 parts of tea-leaves in 1,000 of boiling water, strained after half an hour. [B, 95 (a, 38).]

**THEA** (Lat.), n. f. *Thea* (the<sup>2</sup>/a<sup>3</sup>). Fr., *thé*. Ger., *Theestrauch* (2d def.). 1. See *TEA*. 2. The tea-tree (or -shrub); a genus of the *Ternstroemiaceae*, included by Bentham and Hooker in the genus *Camellia*. The *Theaceae* (of De Candolle, an order of plants including *T.*, *Ternstroemia*, and *Gordonia*) are included by Bentham and Hooker in the tribe *Gordoniaceae*. [a, 35.] 3. The dried leaves of *T. viridis* [Aust. Ph., 1st ed., Hung. Ph.], of *T. chinensis* [Fr. Cod., Sp. Ph.]. [B, 95 (a, 38).] —**Flos theae.** Ger., *Blumenthee*, *Kaiserthee*. The choicest variety of green tea. [a, 35.] —**T. assamica.** *T. assamica*. Assam tea-tree, a form of *Camellia t.*, considered the parent species of all the cultivated varieties of the tea-plant. [a, 35.] —**T. chinensis.** See *CAMELLIA t.* —**T. helvetica.** See *SPECIES VULNERARIAE*. —**T. hungarica.** *T. mexicana*. See *CHENOPodium ambrosioides*. —**T. nigra.** Black tea. [a, 35.] —**T. romana.** *T. silesiaca*. See *CHENOPodium ambrosioides*. —**T. sinensis.** See *CAMELLIA t.* —**T. viridis.** 1. A form of *Camellia t.* [a, 35.] 2. See *Green TEA*.

**THEAL**, adj. Theal. Resembling *Thea*; belonging to the *Theales*, which are Lindley's t. alliance (Lat., *nixus thealis*) of the *Calycosae*, consisting of the *Ternstroemiaceae*. [a, 35.]

**THEATRE**, n. The<sup>2</sup>/a<sup>2</sup>-tr'. Gr., *θεατρον* (from *θεᾶσθαι*, to look on). Lat., *theatrum*. Fr., *théâtre*. Ger., *Theater*. See *AMPHITHEATRE*.

**THEBAIC**, adj. Theb<sup>2</sup>/a<sup>2</sup>-ic. Lat., *thebaicus* (from *Θήβαι*, Thebes, a city of Egypt). Fr., *thébaïque*. Pertaining to, composed of, or containing opium. [a, 17.]

**THEBAINE**, n. Theb<sup>2</sup>/a<sup>2</sup>-en. Lat., *thebaina*, *thebainum* [Russ. Ph.]. Fr., *thébaïne*. Ger., *Thebain*. A very poisonous alkaloid, C<sub>15</sub>H<sub>17</sub>NO<sub>3</sub>, found in opium, forming colorless, shining, foliate or prismatic crystals or a white crystalline powder, having no taste. The symbol Tb is sometimes used for it. [B, 93, 95, 118, 270 (a, 14, 38).]

**THEBAÏSME** (Fr.), n. Ta-ba<sup>2</sup>-es-m'. Opium poisoning. [B, 93 (a, 14).]

**THERBENNE**, n. Theb<sup>2</sup>/c<sup>2</sup>-en. Fr., *thébénine*. Ger., *Thebenin*. An amorphous base isomeric with and obtained from thebaine. [B, 93 (a, 14).]

**THEROLACTIC ACID**, n. The<sup>2</sup>b-o-la<sup>2</sup>-k'ti<sup>2</sup>k. Fr., *acide thérolactique*. A variety of lactic acid found in opium; identical with ethylenelactic acid. [B, 3.]

**THECA** (Lat.), n. f. *Thek* (thak<sup>2</sup>/a<sup>3</sup>). Gr., *θήκη* (from *τιθέναι*, to place). Fr., *thèque*. Ger., *T.*, *Theka*. 1. A sheath, envelope, receptacle, case, or capsule. 2. The cup-like part of a goblet-cell. [J.] 3. See *CELL-membrane*. 4. In botany, a case; especially an anther-sac (of Grew, the anther itself), a capsule of *Musci*, or one of the oblong, cylindrical, or ovoid vesicles containing the spores in lichens. [a, 35.] —**T. cerebri.** See *CRANIUM*. —**T. cordis.** See *PERICARDIUM*. —**T. folliculi.** Of von Baer, an envelope formed around a Graafian vesicle by the fibrillation of a layer of young connective tissue following the heightened vascularity that accompanies the process of maturation. The internal layer (*tunica propria*) is vascular, and the external (*tunica fibrosa*) fibrillated. [A, 22.] —**T. medullaris spinalis.** *T. vertebralis*. See *SPINAL DURA*.

**THECAPHORE**, n. Thek<sup>2</sup>/a<sup>2</sup>-for. Lat., *thecaphorum* (from *θήκη*, a chest, and *φορέω*, bearing). Fr., *thécapore*. See *GYNOPHORE* (1st def.).

**THECAPODIUM** (Lat.), n. n. *Thek* (thak<sup>2</sup>)-a<sup>3</sup>-pod (po<sup>2</sup>d)/i<sup>2</sup>-u<sup>3</sup>m (u<sup>3</sup>m). From *θήκη*, a chest, and *πούς*, the foot. Fr., *thécapode*. The support of the fruit in caryophyllaceous plants. [a, 35.]

**THECASPORES**, n. pl. *Thek* (a<sup>3</sup>-sporz. From *θήκη*, a chest, and *σπορά*, a spore. Spores (sporidia) produced in *Asci*. [a, 35.]

**THECEITIS** (Lat.), **THECITIS** (Lat.), n's f. *Thec* (thak<sup>2</sup>)-e<sup>2</sup>-i(e)/ti<sup>2</sup>s, *thes* (thak<sup>2</sup>)-i(e)/ti<sup>2</sup>s. Gen., -i'ti<sup>2</sup>dos (-idis). From *θήκη*, a case. See *TENOSYNOVITIS* (1st def.).

**THECIDIUM** (Lat.), n. n. *Thec* (thak<sup>2</sup>)-i<sup>2</sup>d/i<sup>2</sup>-u<sup>3</sup>m (u<sup>3</sup>m). Dim. of *θήκη*, a case. Fr., *thécidion*. A one-seeded fruit with an adherent pericarp; now included under the term achenium. [a, 35.]

**THECIUM** (Lat.), n. n. *Thes* (thak<sup>2</sup>)/i<sup>2</sup>-u<sup>3</sup>m (u<sup>3</sup>m). From *θήκη*, a case. The portion of an apothecium (of lichens) containing the thecae and thalamium. [a, 35.]

**THECODONT**, adj. *Thek* (o<sup>2</sup>-do<sup>2</sup>nt. From *θήκη*, a case, and *δόντις*, a tooth. Having the teeth lodged in alveoli. [L, 12.]

**THECOSTEGNOSIS** (Lat.), n. f. *Thek* (thak<sup>2</sup>)-o(o<sup>2</sup>)-ste<sup>2</sup>g-nos'i<sup>2</sup>s. Gen., -nos'eos (-is). From *θήκη*, a case, and *στεγνυσις*, contraction. Fr., *thécostegnose*. Contraction of the sheath of a tendon.

**THEE** (Ger.), n. Ta. See *TEA*. —**Abführender T.** [Ger. Ph.]. See *SPECIES LAXANTES* (3d def.). —**Bittert.** See *SPECIES AMARICANTES*. —**Europäischer T.** The *Veronica officinalis*. [a, 35.] —**Kaisert.** See *Flos THEAE*. —**Südsceet.** Maté. [B.] —**T'geniesche.** See *SPECIES* (2d def.). —**T'strauch.** See *THEA* (2d def.) and *CAMELLIA thea*.

**THER** (Ger.), n. Tar. See *TAR*. —**Holz.** See *TAR* (2d def.). —**Norwegischer T.** Norway tar. [a, 38.] —**Rangoon.** See *Rangoon PETROLEUM*. —**T'bäder.** Baths in which tar soap is used. [B, 108 (a, 14).] —**T'farbstoff.** See *ANILINE dye*. —**T'glycerin.** A mixture of 3 parts of glycerin and 1 part of tar; used for dressing ulcers. [B, 108 (a, 14).] —**T'krätze.** Scabies occurring in laborers in tar-works. [B, 108 (a, 14).] —**T'krebs.** See *Chimney-sweep's CANCER*. —**T'mittel.** A medicine containing tar. [B, 108 (a, 14).]

—**T'pflaster.** See *Emplastrum PICIS liquidæ* (under *Pix*). —**T'pulver.** A mixture of 2 parts of coarsely powdered coal with 1 part of tar. [B, 108 (a, 14).] —**T'salbe.** See *Unguentum PICIS liquidæ* (under *Pix*). —**T'seife.** See *SAPo piceus*. —**T'syrup.** See *Syrupus PICIS*. —**T'tinctur.** A solution of 1 part of tar in 12 parts of alcohol. [B, 8, 10 (a, 14).] —**T'werg.** Tarred oakum. [a, 14.]

**THEIL** (Ger.), n. Til. See *PART*. —**Felsen.** See *Petrous PORTION of the temporal bone*. —**Gaument.** The horizontal plate of the palate bone. —**Gelenkt.** See the major list. —**Infundibular T. des Vorderhirns.** The portion of the primitive prosencephalon from which the infundibulum springs. [I, 10 (K).] —**Medialer T. der Schleifenschicht** [Forel]. The medial fibres of the lemniscus area. [I, 17 (K).] —**Occipital' des Gehirns.** See *Occipital LOBE*. —**Orbitalt.** The orbital surface of the frontal lobe. [I, 17 (K).] —**T'wandel.** See *MEROTROPE* (1st def.). —**Unterer T. der Hirnstiele.** See *TEGMENTUM* (1st def.). —**Vorderer lateraler T. des Abducens.** The antero-lateral portion of the nucleus of the abducens nerve. [K.] —**Vorderer T. der Seisüre des Hippocampus** [Gratiolet]. See *Hippocampal FISSURE*. —**Zitent.** See *Mastoid PROCESS*.

**THEILBLATT** (Ger.), n. Til'bla<sup>2</sup>t. See *FOLIOLE*.

**THEILFRUCHT** (Ger.), n. Til'frucht<sup>2</sup>t. See *MERICARP*. —**T'chen.** See *CARPEL*.

**THEILFURCHEND** (Ger.), adj. Til'furch<sup>2</sup>-e<sup>2</sup>nd. See *MEROBLASTIC*.

**THEILUNG** (Ger.), n. Til'un<sup>2</sup>. See *CLEAVAGE, DIVISION* (1st def.), and *SEGMENTATION*. —**T'swandel.** See *MEROTROPE* (1st def.).

**THEINE**, n. The'en. Lat., *theina*, *theinum*. Fr., *théine*. Ger., *Thein*. The active principle of tea (*Camellia thea*); an alkaloid isomeric (by chemists considered identical) with caffeine but differing in its action, having but half the toxic power and producing more wakefulness and convulsive disturbance and less cardiac stimulation. It has been used subcutaneously in neuralgia. [Castle, "Cincinnati Lancet and Clinic," Feb. 6, 1886; "N. Y. Med. Jour.," July 10, 1886, p. 56 (a, 50); "Proc. of the Am. Pharm. Assoc.," xv, p. 176 (a, 50); a, 17.]

**THEION** (Lat.), n. n. Thi<sup>2</sup>(the<sup>2</sup>/i<sup>2</sup>)-o<sup>2</sup>n. Gr., *θειον*. See *SULPHUR*.

**THEIOTHERMA** (Lat.), n. n. Thi<sup>2</sup>(the<sup>2</sup>/i<sup>2</sup>)-o(o<sup>2</sup>)-thu<sup>2</sup>rm-(the<sup>2</sup>rm)/a<sup>2</sup>. Gen., -therm'atos (-atis). From *θεῖον*, sulphur, and *θερμα*, a hot spring. Fr., *théiotherme*. Ger., *Theiotherme*. A hot sulphurous spring. [L, 50 (a, 14).]

**THEIOTHERMIN**, n. Thi-o-thu<sup>2</sup>rm/i<sup>2</sup>n. See *BAREGIN*.

**THEISM**, n. The'i<sup>2</sup>zm. From *thea*, tea. Fr., *théisme*. Chronic poisoning by tea; characterized by insomnia, cephalalgia, nervous trembling, irritable weakness of the heart, dyspepsia, and cachexia. [C. Éloy, "Union méd.," June 5, 1886, p. 917 (a, 50).]

**THELALGIE** (Fr.), n. Tal-a<sup>2</sup>-zhe. From *θηλή*, the nipple, and *ἄλγος*, pain. Pain in the nipple. [L, 41 (a, 14).]

**THELASIS** (Lat.), **THELASMUS** (Lat.), n's f. and m. The<sup>2</sup>l-(thal)/a<sup>2</sup>s(a<sup>2</sup>s)-i<sup>2</sup>s, the<sup>2</sup>l(thal)-a<sup>2</sup>z(a<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). Gen., -as'eos (thel'asis), -as'mi. Gr., *θηλάσιος* (from *θηλάζειν*, to give suck). Fr., *thélasme*. Ger., *Säugen*. The act of suckling. [L, 50 (a, 14).]

**THELASTRIA** (Lat.), n. f. The<sup>2</sup>l(thal)-a<sup>2</sup>st(a<sup>2</sup>st)/ri<sup>2</sup>-a<sup>2</sup>. Gr., *θηλάστρια* (from *θηλάζειν*, to give suck). Fr., *thélastrie*. Ger., *Amme*. A wet-nurse. [L, 50 (a, 14).]

**THELE** (Lat.), n. The<sup>2</sup>l(thal)/e(a). Gen., the<sup>2</sup>l'es. Gr., *θηλή*. See *MAMMA* and *NIPPLE*.

**THELEPHORA** (Lat.), n. f. The<sup>2</sup>l(thal)-e<sup>2</sup>f(af)/o<sup>2</sup>r-a<sup>2</sup>. From *θηλή*, the nipple, and *φορέω*, bearing. Fr., *théléphore*. Ger., *Warzeipilz* (2d def.). 1. See *PALMELLA*. 2. A genus of *Fungi* typical of a group (the *Thelophorales*, Fr., *théléphorées*, or *Thelophorei* [Fr., *théléphorées*]), comprising the simplest forms of the *Hymenomycetes*. [a, 35.] —**T. puteana.** A species causing dry-rot, especially in pine-wood. [a, 35.] —**T. sanguinea.** See *HYPOCHNUS rubrocinctus*.

**THELIGONUM** (Lat.), n. n. The<sup>2</sup>l(thal)-i<sup>2</sup>g/o<sup>2</sup>n-u<sup>3</sup>m(u<sup>3</sup>m). Gr., *θηλιγόνον* (from *θήλυς*, female, and *γίγνσθαι*, to come into being). Written also, preferably, *Thelygonum*. A genus of the *Theligenaceae* (a tribe of the *Urticaceae*). [a, 35.] —**T. alsinoidesum.** *T. cynocrambe*. Fr., *chou de chien*. The *κνυονράμβη* of Dioscorides, dog's cabbage; an aperient potherb of Mediterranean regions. [a, 35.]

**THELITIS** (Lat.), n. f. The<sup>2</sup>l(thal)-i(e)/ti<sup>2</sup>s. Gen., -i'ti<sup>2</sup>dos (-idis). From *θηλή*, the nipple. Fr., *thélite*. Ger., *Brustwarzenentzündung*. Inflammation of the nipple.

**THELONCUS** (Lat.), n. m. The<sup>2</sup>l(thal)-o<sup>2</sup>n<sup>2</sup>k/u<sup>3</sup>s(u<sup>3</sup>s). From *θηλή*, the nipple, and *δγκος*, a tumor. Fr., *théloncus*. Swelling of the nipple or breast.

**THELOPHLEBOSTEMMA** (Lat.), n. n. The<sup>2</sup>l(thal)-o(o<sup>2</sup>)-fle<sup>2</sup>b-o(o<sup>2</sup>)-ste<sup>2</sup>m/ma<sup>2</sup>. Gen., -stem'matos (-atis). From *θηλή*, the nipple, *φλέψ*, a vein, and *στέμμα*, a wreath. Fr., *thélophlébostemme*. See *CIRCULUS venosus mammae*.

**THELORRHAGIA** (Lat.), n. f. The<sup>2</sup>l(thal)-o<sup>2</sup>r-raj(ra<sup>2</sup>g)/i<sup>2</sup>-a<sup>2</sup>. From *θηλή*, the nipple, and *ῥήγνυσθαι*, to burst forth. Fr., *thélorrhagie*. Hemorrhage from the nipple. [L, 41 (a, 14).]

**THELOSPASMUS** (Lat.), n. m. The<sup>2</sup>l(thal)-o(o<sup>2</sup>)-spa<sup>2</sup>z(spaz<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>2</sup>s). From *θηλή*, the nipple, and *σπασμός*, a spasm. Fr., *thélospasme*. Spasm in the nipple. [L, 50 (a, 14).]

**THELOSTEOPHYTE**, n. The<sup>2</sup>l-o<sup>2</sup>st'e<sup>2</sup>-o-ft. Lat., *thelostoeophyllum* (from *θηλή*, the nipple, *ὀστέον*, a bone, and *φύον*, a growth). Fr., *thélostéophyte*. Ger., *Thelostoeophyte*. Of Lobstein, a nipple-shaped exostosis. [L, 50 (a, 14).]

**THELOTHISME** (Fr.), **THELOTISME** (Fr.), n's. Tal-ot-es-m'. From *θηλή*, the nipple, and *ὠθισμός*, a thrusting forward. Erection of the nipple. See under *ERECTION*.

**THELOTREMA** (Lat.), n. n. *Thel*(thal)-o(o<sup>3</sup>)-trem(tram)/a<sup>3</sup>. Gen., *-trem/atos* (-atis). Fr., *thélotrème*. Ger., *Brustflechte*. A genus of lichens typical of the *Thelotrema* (a tribe of the *Placodei*). [a, 35.]—**T. cinchonarum**. A species occurring on yellow cinchona-bark. [a, 35.]—**T. myriocarpum**. A species found on red cinchona-bark. [a, 35.]—**T. urceolare**. A species found on the bark of *Cinchona lancifolia*. [a, 35.]

**THELYBLAST**, n. *Thel*(th)-i<sup>2</sup>-blast. Of Minot, the ovum after the extrusion of the polar globules. The oospore of Balfour. [G.]

**THELYCUS** (Lat.), adj. *The*<sup>2</sup>l(thal)/i<sup>2</sup>k(u<sup>3</sup>k)-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *θηλυκός*. Fr., *thélyque*. See FEMALE (1st def.).

**THELYGONIA** (Lat.), n. f. *Thel*(thal)-i<sup>2</sup>(u<sup>4</sup>)-gon(go<sup>2</sup>n)/i<sup>2</sup>-a<sup>3</sup>. Gr., *θηλυγονία* (from *θηλυς*, female, and *γίγνεσθαι*, to come into being). 1. The procreation of female children. 2. Nymphomania. [A, 540 (a, 34).]

**THELYGONUM** (Lat.), n. n. *The*<sup>2</sup>l(thal)-i<sup>2</sup>g(u<sup>4</sup>g)/o<sup>2</sup>n-u<sup>3</sup>m-(u<sup>4</sup>m). See THELIGONUM.

**THELYTOCIA** (Lat.), n. f. *Thel*(thal)-i<sup>2</sup>(u<sup>4</sup>)-tos(to<sup>2</sup>k)/i<sup>2</sup>-a<sup>3</sup>. Gr., *θηλυτοκία* (from *θηλυτοκεῖν*, to bear females). Parthenogenesis (1st def.) with the production of females only. [a, 32.]

**THENAL**, adj. *The*<sup>2</sup>n'l. From *thēap*, the palm of the hand. Pertaining to the anterior surface of the arm. [L.]

**THENAR** (Lat.), n. n. *Then*(the<sup>2</sup>n)/a<sup>3</sup>r. Gen., *then'aros* (-avis). Gr., *thēap*. Fr., *thénar*. The palm of the hand; improperly used as an Eng. adj. for palmar and plantar.—**T. pollicis**. See T. EMNENCE.

**THEOBROMA** (Lat.), n. f. and n. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-brom/a<sup>3</sup>. Gen., *-brom/æ*, *-brom/atos* (-is). From *θεός*, a god, and *βρώμα*, food. Fr., *théobrome*. Ger., *Kakaobaum*. A genus of tropical American trees of the *Sterculiaceæ*. All the species apparently furnish some variety of cacao. [a, 35.]—**Oil of t.** Lat., *oleum theobromæ* (seu *theobromatis*, seu *cacao*), *oleum concretum e semine theobromæ cacao*. Fr., *beurre de cacao*. Sp., *aceite de cacao* [Sp. Ph.]. Ger., *Cacaobutter*. Cacao-butter; a yellowish-white, solid fat obtained from cacao. It melts between 30° and 35° C. It is used in pomades, etc., for coating pills and making suppositories, and, smeared on the skin, as a protective and to reduce fever. [B; a, 35.]—**Semen theobromatis**, *Semina theobromæ*. See CACAO (1st def.).—**T. angusta**. See *ABROMA angusta*.—**T. bicolor**. Fr., *théobrome de deux couleurs*. Ger., *zweifarbiger Kakaobaum*. A tree of Colombia, Brazil, and especially the warmer parts of New Granada. The seeds constitute Caracas cacao. [a, 35.]—**T. cacao**. Fr., *théobrome cultivé*, *cacaoyer*, *cabasse*. Ger., *ächter Kakaobaum*. Cacao (or cocoa) tree, chocolate-nut tree; a species found wild in tropical America and cultivated in most tropical countries, especially Venezuela, for its seeds (see CACAO, 1st def.), which yield oil of t. and are a stimulating, nutritive article of diet. The seed-shells are tonic, and a gum exuding from the stem of the tree is employed in diarrhoea and dysentery. [a, 35.]—**T. guazuma**. See *GUAZUMA ulmifolia*.—**T. guianense**. A Guiana species, probably the source of Cayenne cacao. The fruit yields a vinous beverage and, by distillation, a spirit. [a, 35.]

**THEOBROMIC ACID**, n. *The*-o-brom/i<sup>2</sup>k. A monobasic crystalline acid, C<sub>24</sub>H<sub>12</sub>O<sub>2</sub>, of the fatty-acid series, occurring in cacao-butter. It is not certainly known to exist. [B, 3.]

**THEOBROMINE**, n. *The*-o-brom/en. Lat., *theobrominum*, *theobromina*. Fr., *théobromine*. Ger., *Theobromin*. An alkaloid, C<sub>7</sub>H<sub>8</sub>N<sub>4</sub>O<sub>4</sub>, obtained from the fruit and rind of *Theobroma cacao*, found also in small amount in the young leaves of Himalaya tea. [B, 3 (a, 38); B.]

**THEODORETUS** (Lat.), n. m. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-dor-et(at)/u<sup>3</sup>s-(u<sup>4</sup>s). Gr., *θεοδωρῆτος* (from *θεός*, a god, and *δωρῆτος*, freely given). An old antiepileptic remedy. [L, 50 (a, 14).]

**THEOMANIA** (Lat.), n. f. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-man(ma<sup>2</sup>n)/i<sup>2</sup>-a<sup>3</sup>. From *θεός*, a god, and *μανία*, madness. Fr., *théomanie*, *théomanié*. Ger., *religiöser Wahnsinn*. Religious monomania, often accompanied by hallucinations of sight, hearing, and touch. The patient believes himself to be under direct and immediate divine influence or inspiration, or even to be God himself. [Ball, "Bull. méd.," June 17, 1889, p. 795 (a, 18).]

**THEOPHILIUM** (Lat.), n. n. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-fi<sup>2</sup>/i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). From *θεός*, a god, and *φίλος*, loved. Of Trallianus, a certain collyrium containing saffron, etc. [B, 78 (a, 14).]

**THEOPHRASTA** (Lat.), n. f. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-fra-st(fra<sup>2</sup>st)/a<sup>3</sup>. From *θεοφράστος*, a Greek philosopher. Of Jussieu, a genus of the *Theophrasteæ* (a tribe of the *Myrsinæ*). The *T.* of Linnaeus is referred to *Clavija*. [a, 35.]—**T. americana**. Fr., *coquimbolier*, *arbre de Théophraste*. A tree of the Antilles (referred to the genus *Clavija*). The leaves are used in foul ulcers and in farcy. [a, 35.]

**THEOPHYLLA** (Lat.), n. f. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-fi<sup>2</sup>/i<sup>2</sup>(fu<sup>4</sup>l)/la<sup>3</sup>. For deriv., see THEA and PHYLLON. Of Rafinesque, the genus *Thea*. [a, 35.]

**THEOPHYLLINE**, n. *The*-o-fi<sup>2</sup>/en. A substance, C<sub>7</sub>H<sub>8</sub>N<sub>4</sub>O<sub>2</sub>, isomeric with theobromine and paraxanthine, obtained from an alcoholic extract of tea. It forms thin, narrow, colorless crystals. ["N. Y. Med. Jour.," Feb. 8, 1890, p. 148 (a, 50).]

**THEOPLEGIA** (Lat.), **THEOPLESTIA** (Lat.), n's. *The*(the<sup>2</sup>)-o(o<sup>3</sup>)-pleg/ia<sup>2</sup> (a<sup>3</sup>), *pleg/plas*/i<sup>2</sup>-a<sup>3</sup>. From *θεός*, a god, and *πλεῖστος*, to strike. See APOPLEXY.

**THEORIA** (Lat.), n. f. *The*<sup>2</sup>-or/i<sup>2</sup>-a<sup>3</sup>. Gr., *θεωρία* (from *θεωρεῖν*, to look at). See THEORY.

**THEORIE** (Ger.), n. *Ta*-er-e'. See THEORY.—**Kratzt'**. See PSYCHOTHEORIA.—**Wirbelt' des Schädels**. The theory that the skull is made up of modified vertebrae. [L, 115 (a, 50).]

**THEORY**, n. *The*-or-i<sup>2</sup>. Gr., *θεωρία* (from *θεωρεῖν*, to look at). Lat., *theoria*. Fr., *théorie*. Ger., *Theorie*. An idea or hypothesis

sufficient to serve as a basis for an explanation or for action. [a, 48.]—**Apposition t.** The t. of the growth of a tissue by the deposit of cells from without. [a, 34.]—**Atomic t.** 1. Of the ancients, the t. that all matter consists of very minute, hard, absolutely indestructible bodies called atoms. 2. Of Dalton and succeeding chemists, the t. that molecules of substances are built up of one or more atoms, each of which represents a certain definite amount of a chemical element, which amount always remains constant, going into and out of combination without suffering increase or decrease. [B, 2.]—**Binary t.** In chemistry, that t. of the composition of salts which regards them as made up of two constituents, acid and basic. [B, 2.]—**Cell t.** See CELL t.—**Darwinian t.** See EVOLUTION (2d def.).—**Diblastic t.** Of Nägeli, the t. that the presence, successively or simultaneously, of two different kinds of microbes is requisite to explain the nature and progress of great epidemics. [L, 164 (a, 27).]—**Difference t.** A t. proposed by Hermann to explain the presence of electrical currents in muscles and nerves. The normal, intact muscle or nerve is said to be electro-positive, and a dying muscle or nerve electro-negative, [Landois (K).]—**Dualistic t.** See BINARY t.—**Erysipelatous t.** Ger., *erysipelatöse* (oder *rosige*) *Theorie*. Of Eisenmann, Pouteau's modification of the phlogistic t., according to which puerperal fever was due to any erysipelatous inflammation within the abdomen or the pelvis. [A, 57.]—**Gastrobilious t.** Tricavellus's t. of the causation of disease by the accumulation of biliary and mucous materials in the primæ viæ. [A, 57.]—**Genetic t.** The t. of the psychical perception of distance, form, etc. [a, 34.]—**Germ t.** 1. See BIOGENESIS. 2. The t. of the production of certain diseases by living micro-organisms or their products.—**Goltz's statical t.** A t. with reference to the function of the semicircular canals according to which, in every position of the head, pressure is exerted by the endolymph on some portion of the canals, the ampullar nerve-terminations being thus excited and sensations of position transmitted to the cerebrum. [Landois (K).]—**Graft t.** A t. that disease is caused by means of organic particles from diseased persons becoming ingrafted in healthy individuals. [a, 34.]—**Hæmantic t.** Ger., *Hämatotheorie*. A t. of the origin of fevers in a primary specific alteration of the blood. [A, 57.]—**Kinetic t.** Of Brown, a t. of the functions of the semicircular canals which assumes that the corresponding canals on both sides are symmetrical organs which are together concerned with the movement of the head in a certain direction. [Landois (K).]—**Kirchhoff's t.** The t., now generally accepted, that the black lines of the spectrum are caused by the passage of light through the vapors of bodies which by themselves would give bright lines in the same position when incandescent. [a, 49.]—**Mechanical t. of medicine.** See IATROMATHEMATICS.—**Monoblastic t. of disease.** Of Nägeli, a t. that disease is due to microphytes that must pass through a developmental stage in some medium after leaving the body of those affected in order to infect. [a, 34.]—**Neuro-muscle t.** A t. that a central ganglionic cell, its nerve-fibre, and the muscle connected therewith are developed from a single cell. [a, 34.]—**Neuropathic t. of glaucoma.** Of Donders, a t. that irritation of the chorioid nerves caused a neurosis of secretion that resulted in glaucoma. [a, 34.]—**Phlogistic t.** A t. of febrile diseases which accounted the local inflammations as the cause of the general disturbance. [A, 57.] See also Erysipelatous t.—**Physiological t.** Of Autenrieth, a t. of the causation of certain diseases; really a t. of metastasis, as of the lochia or the milk. It was held that during pregnancy there was an internal accumulation of the juices, especially affecting the uterus, but that after delivery they had a tendency to pass outward by the sweat, the lochia, and the milk; in case the latter secretions were impeded, the stream took some other direction, as to the head, the chest, or, most frequently, the abdomen. [A, 57.]—**Pre-existence t.** Of Du Bois-Reymond, the t. that electric currents are normally present in muscles and nerves before they are divided. [K, 3.] Cf. *Difference t.*—**Telluric t.** Of Pettenkofer and Nägeli, the t. that epidemic diseases are due to microbes of the soil penetrating into the lungs and digestive organs, and thence into the blood. [L, 164 (a, 27).]—**Transmutation t.** The t. of the change of one species or element into another species or element. [a, 34.]

**THÈQUE** (Fr.), n. *Tē*q. See THECA.

**THERANTHROPISMUS** (Lat.), n. m. *The*<sup>2</sup>r(thar)-a<sup>3</sup>nth-(a<sup>3</sup>nth)-ro<sup>2</sup>p(ro<sup>2</sup>)-i<sup>2</sup>z(i<sup>2</sup>z)/mu<sup>4</sup>s(mu<sup>4</sup>s). From *θηρ*, a wild beast, and *άνθρωπος*, a man. See ZOANTHROPY.—**T. fictus**. Of Krause, lycanthropy. [a, 34.]

**THERAPEIOLOGY**, n. *The*<sup>2</sup>r-a<sup>3</sup>p-i<sup>2</sup>-o<sup>2</sup>/i<sup>2</sup>-o<sup>2</sup>-ji<sup>2</sup>. From *θεραπεία*, medical treatment, and *λόγος*, understanding. Of M'Lachlan, therapeutics. [a, 34.]

**THERAPEUTIC**, adj. *The*<sup>2</sup>r-a<sup>3</sup>p-u<sup>2</sup>t/i<sup>2</sup>k. Gr., *θεραπευτικός* (from *θεραπεύειν*, to do service). Pertaining to therapeutics. [D.]

**THERAPEUTICS**, n. sing. *The*<sup>2</sup>r-a<sup>3</sup>p-u<sup>2</sup>t/i<sup>2</sup>ks. Gr., *θεραπευτική* (from *θεραπεύειν*, to do service). Fr., *thérapeutique*. Ger., *Therapie*, *Therapeutik*. It., *terapeutica*. Sp., *terapéutica*. The science and practice of the application of remedies for disease. [a, 48.]—**Mediate t.** The medication of an infant through the medium of its mother's milk.—**Suggestive t.** Fr., *thérapeutique suggestive*. The treatment of disease by hypnotic suggestion. [a, 34.]

**THERAPEUTIQUE** (Fr.), n. *Tā*-a<sup>3</sup>p-u<sup>2</sup>t-ek. See THERAPEUTICS.—**T. paradoxale**. Paradoxical therapeutics; a collective term for unusual and unexpected effects of drugs. ["Rev. méd.," Oct. 17, 1895, p. 616.]—**T. thermale**. The treatment of disease by the use of hot mineral waters internally and externally. [a, 34.]

**THERAPEUTIST**, n. *The*<sup>2</sup>r-a<sup>3</sup>p-u<sup>2</sup>t/i<sup>2</sup>st. Fr., *thérapeutiste*. Ger., *Therapeutiker*, *Therapeutiker*. A practitioner of therapeutics.

**THERAPIE** (Ger.), n. *Tā*-a<sup>3</sup>p-e'. See THERAPEUTICS.—**Kinesit'**. See MEDICAL GYMNASTICS.—**Pneumatische t.** See PNEUMATIC TREATMENT.

**THERAPY**, n. *The*<sup>2</sup>r-a<sup>3</sup>p-i<sup>2</sup>. Gr., *θεραπεία*. See THERAPEUTICS.

**THERENCEPHALUS** (Lat.), adj. The<sup>2</sup>r(thar)-e<sup>2</sup>n(e<sup>2</sup>n<sup>2</sup>)-se<sup>2</sup>f-(ke<sup>2</sup>f/a<sup>2</sup>l(a<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). From *θηρ*, a wild beast, and *ἐνκεφαλος*, the brain. Having the radius fixus making an angle of from 116° to 129° with the line uniting the punctum nasofrontale and the punctum alae vomeris. [Lissauer, "Arch. f. Anthropol.," xv, Supp. (a, 50).]

**THERENIABIN**, n. The<sup>2</sup>r-e<sup>2</sup>n-i<sup>2</sup>-a<sup>2</sup>b/i<sup>2</sup>n. Oriental manna.

**THEREOBROMA** (Lat.), n. n. The<sup>2</sup>r-e(a)-o(o<sup>2</sup>)-brom/a<sup>2</sup>. Gen., -brom/atos (-atis). From *θηρεος*, of summer, and *βρώμα*, food. Fr., *théréobrome*. Ger., *Sommerkost*. Summer-diet, a variety of chocolate. [L, 50 (a, 14).]

**THEREOCATARRHUS** (Lat.), n. m. The<sup>2</sup>r-e(a)-o(o<sup>2</sup>)-ka<sup>2</sup>t-(ka<sup>2</sup>t)-a<sup>2</sup>r(ru<sup>2</sup>s/ru<sup>2</sup>s). From *θηρεος*, of summer, and *κατάρρως*, catarrh. Fr., *thériocatarrhe*. Ger., *Sommerkatarrh*. See *Hay Fever*.

**THERIACA** (Lat.), n. f. The<sup>2</sup>r(thar)-i(i<sup>2</sup>)/a<sup>2</sup>k(a<sup>2</sup>k)-a<sup>2</sup>. From *θηριακή* (*ánthōros*), an antidote against animals' bites. Fr., *thériaque*. Ger., *Theriak*. 1. An old name for opium flavored with nutmeg, cardamom, and mace, or with saffron and ambergris; afterward for other confections of opium (see *Confectio opii*). 2. See *ÉLECTUAIRE thériacal*. 3. Of the Br. Ph., see *MOLASSES*. 4. Of the Austr. and Hung. Ph's, a mixture of powdered opium with 120 times as much electuarium aromaticum. [B, 81 (a, 35); B, 95 (a, 38).]—**Radix theriace**. The root of *Valeriana phu*. [A, 35.]—**T. Andromachi**. See *ÉLECTUAIRE thériacal*.—**T. caelestis**. See *LAUDANUM*.—**T. electuarium**. See *Confectio opii*.—**T. londinensis**. See *Cataplasma cuminum*.

**THERIAQUE** (Fr.), n. Ta-re-a<sup>2</sup>k. See *THERIACA* and *Confectio opii*.—**T. des pauvres**, **T. des paysans**. See *ALLIUM SATIVUM*.—**T. diatessaron**. See *DIATESSARON*.—**T. du foie**. Rhubarb. [A, 35.]

**THERIODECTUS** (Lat.), adj. Ther(thar)-i<sup>2</sup>-o(o<sup>2</sup>)-de<sup>2</sup>kt(dakt)/-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *θηριοδεκτος* (from *θηρίον*, a wild beast, and *δάκνειν*, to bite). Fr., *thériodecte*. Bitten by a venomous animal, especially a snake. [L, 50 (a, 14).]

**THERIODIC**, adj. Ther-i<sup>2</sup>-od/i<sup>2</sup>k. Gr., *θηριώδης* (from *θηρ*, a wild beast, and *είδος*, resemblance). Malignant. [D.]

**THERIOMA** (Lat.), n. n. Ther(thar)-i<sup>2</sup>-om/a<sup>2</sup>. Gen., -om/atos (-atis). Gr., *θηριωμα* (from *θηρίον*, a wild beast). A chronic and malignant or semi-malignant ulcer. [E.]

**THERIOMORPHIA** (Lat.), n. f. Ther(thar)-i<sup>2</sup>-o(o<sup>2</sup>)-mo<sup>2</sup>rf/-i<sup>2</sup>-a<sup>2</sup>. See *THERIOMORPHIA*.

**THERIOTOMY**, n. Ther-i<sup>2</sup>-o<sup>2</sup>t/om-i<sup>2</sup>. Lat., *theriotomia* (from *θηρίον*, a wild beast, and *τομή*, a cutting). Fr., *thériotomie*. See *ZOOTOMY*.

**THERMA** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-a<sup>2</sup>. Gr., *θερμη* (from *θερμός*, hot). 1. See *HEAT* (1st def.). 2. A warm spring. [L, 50 (a, 14).]

**THERMACOGENESIS** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-a<sup>2</sup>k(a<sup>2</sup>k)-o(o<sup>2</sup>)-je<sup>2</sup>n(ge<sup>2</sup>n)/e<sup>2</sup>s-i<sup>2</sup>s. Gen., -genes/eos (-gen/esis). From *θερμὸν*, heat, ákos, remedy, and *γένεσις*, creation. Of Alvarenga, the action of a remedy on the temperature. [A, 319 (a, 34).]

**THERMÆMUS** (Lat.), adj. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-em/(a<sup>2</sup>/e<sup>2</sup>m)-u<sup>2</sup>s(-u<sup>2</sup>s). From *θερμός*, hot, and *αἷμα*, blood. Fr., *thermème*. Ger., *warmblütig*. Warm-blooded.

**THERMÆSTHESIMETER**, n. Thu<sup>2</sup>rm-e<sup>2</sup>s-thez-i<sup>2</sup>-o<sup>2</sup>m/-e<sup>2</sup>t-u<sup>2</sup>r. From *θερμὸν*, heat, *αἰσθάνειν*, feeling, and *μέτρον*, a measure. Ger., *Thermæsthesiometer*. An instrument for testing the power of an individual to appreciate differences in temperature. [D, 35.]

**THERMAL**, adj. Thu<sup>2</sup>rm/m<sup>2</sup>l. Lat., *thermalis*. Fr., *t*. Ger., *t*. Pertaining to heat or to hot springs. [a, 48.]

**THERMAL ACID SPRINGS**, n. Thu<sup>2</sup>rm/m<sup>2</sup>l. A place in Inyo County, California, where there are hot springs flowing between banks of crystallized sulphur. [Anderson (a, 14).]

**THERMALBRUNNEN** (Ger.), **THERMALQUELLE** (Ger.), n's. Te<sup>2</sup>rm-a<sup>2</sup>l/brun-ne<sup>2</sup>n, -lwe<sup>2</sup>l-le<sup>2</sup>. A hot spring.

**THERMALWASSER** (Ger.), n. Te<sup>2</sup>rm-a<sup>2</sup>l/va<sup>2</sup>s-se<sup>2</sup>r. The water of a hot spring.

**THERMANTERION** (Lat.), n. n. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-a<sup>2</sup>nt(a<sup>2</sup>nt)-er(ar)/i<sup>2</sup>-o<sup>2</sup>n. Gr., *θερμαντήριον*. Fr., *thermantérion*. A vessel for heating a liquid. [L, 50 (a, 14).]

**THERMANTIC**, adj. Thu<sup>2</sup>rm-a<sup>2</sup>nt/i<sup>2</sup>k. Gr., *θερμαντικός* (from *θερμαίνω*, to heat). Lat., *thermanticus*. Fr., *thermantique*. Ger., *erwärmend*. Promoting warmth. [L, 50 (a, 14).]

**THERMANTIDOTUM** (Lat.), n. n. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-a<sup>2</sup>nt-(a<sup>2</sup>nt)-i<sup>2</sup>d(o<sup>2</sup>t)-u<sup>2</sup>m(u<sup>2</sup>m). From *θερμὸν*, heat, and *ἀντίδοτος*, an antidote. Ger., *Thermantidot*. A remedy against heat, or against fever-heat. [L, 50 (a, 14).]

**THERMASIA** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-az(a<sup>2</sup>s)/i<sup>2</sup>-a<sup>2</sup>. Gr., *θερμασία*. Warmth, heat. [A, 311 (a, 21).]

**THERMASMA** (Lat.), n. n. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-a<sup>2</sup>z(a<sup>2</sup>s)/ma<sup>2</sup>. Gen., -as/matos (-atis). Gr., *θερμασμα*. A warm fomentation. [A, 311 (a, 21).]

**THERMESTHÉSIE** (Fr.), n. Te<sup>2</sup>rm-e<sup>2</sup>st-az-e. Capability of feeling heat.

**THERMIC**, adj. Thu<sup>2</sup>rm/i<sup>2</sup>k. From *θερμὸν*, heat. Fr., *thermique*. Pertaining to or due to heat. [L, 41 (a, 14).]

**THERMO-ANÆSTHESIA** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)/-o(o<sup>2</sup>)-a<sup>2</sup>n(a<sup>2</sup>n)-e<sup>2</sup>s(a<sup>2</sup>-e<sup>2</sup>s)-thez(thas)/i<sup>2</sup>-a<sup>2</sup>. From *θερμὸν*, heat, and *ἀναίσθησία*, want of feeling. Fr., *thermoanesthésie*. Insensibility to heat or cold or to variations of temperature. [D, 35.]

**THERMO-CAUTERY**, n. Thu<sup>2</sup>rm-o-ka<sup>2</sup>t/e<sup>2</sup>r-i<sup>2</sup>. From *θερμὸν*, heat, and *καυτήριον*, a branding iron. Fr., *thermo-cautère*. Ger., *Thermokauter*. See *THERMO-CAUTERY*.

**THERMOCHEMISTRY**, n. Thu<sup>2</sup>rm-o-ke<sup>2</sup>m/i<sup>2</sup>st-ri<sup>2</sup>. From *θερμὸν*, heat, and *χημεία*, chemistry. Fr., *thermochimie*. The science of heat in its chemical relations. [B, 38, 93 (a, 14).]

**THERMOCHORTON** (Lat.), n. n. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o(o<sup>2</sup>)-ko<sup>2</sup>rt-(ch<sup>2</sup>o<sup>2</sup>rt)/o<sup>2</sup>n. From *θερμὸν*, heat, and *χόρτος*, grass. In the time of Hippocrates, the *Erythraea centaurium*, which is still employed in the chronic fevers of Oriental countries. [X. Landerer, "Am. Jour. of Pharm.," xlviii, p. 193 (a, 21).]

**THERMOCHROSIS** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o(o<sup>2</sup>)-kros-(ch<sup>2</sup>ros)/i<sup>2</sup>s. Gen., -chros/eos (-is). From *θερμὸν*, heat, and *χρῶσις*, a coloring. Fr., *thermochrose*. Ger., *Thermochose*, *Wärmefärbung*. The property of absorbing heat-rays of a certain degree of refrangibility and allowing others to pass through. [B.]

**THERMO-DIFFUSION**, n. Thu<sup>2</sup>rm-o-di<sup>2</sup>f-fu<sup>2</sup>zhu<sup>2</sup>n. From *θερμὸν*, heat, and *diffusio*, a spreading out. Gaseous diffusion as the result of the unequal heating of a gaseous mass. [B, 2.]

**THERMODYNAMICS**, n. sing. Thu<sup>2</sup>rm-o-di<sup>2</sup>n-a<sup>2</sup>m/i<sup>2</sup>ks. From *θερμὸν*, heat, and *δυναμικός*, powerful. Fr., *thermodynamique*. The science of the relations of heat to mechanical work. [a, 48.]

**THERMO-ELECTRICITY**, n. Thu<sup>2</sup>rm-o-e-le<sup>2</sup>kt-ri<sup>2</sup>s/i<sup>2</sup>t-i<sup>2</sup>. From *θερμὸν*, heat, and *ἤλεκτρον*, amber. Fr., *thermo-électricité*. Ger., *Thermoëlektrizität*. Electricity produced by an increase or decrease of temperature. [a, 48.]

**THERMOGENESIS** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o(o<sup>2</sup>)-je<sup>2</sup>n-(ge<sup>2</sup>n)/e<sup>2</sup>s-i<sup>2</sup>s. Gen., -es/eos (-gen/esis). From *θερμὸν*, heat, and *γένεσις*, production. The production of heat, especially in the animal organism. [a, 34.]

**THERMOGENIC, THERMOGENOUS**, adj's. Thu<sup>2</sup>rm-o-je<sup>2</sup>n/i<sup>2</sup>k, -o<sup>2</sup>j/e<sup>2</sup>n-u<sup>2</sup>s. Lat., *thermogen* (from *θερμὸν*, heat, and *γεννᾶν*, to engender). Heat-producing. [L, 41 (a, 14).]

**THERMO-INHIBITORY**, adj. Thu<sup>2</sup>rm-o-i<sup>2</sup>n-hi<sup>2</sup>b/i<sup>2</sup>t-or-i<sup>2</sup>. From *θερμὸν*, heat, and *inhibere*, to keep back. Preventing or retarding thermogenesis. [a, 34.]

**THERMOLE** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o<sup>2</sup>le(la). Gen., -ol/es. Gr., *θερμολή*. Of Hippocrates, feverish heat. [A, 311 (a, 21).]

**THERMOLUSIA** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o(o<sup>2</sup>)-lu<sup>2</sup>z(lus)/-i<sup>2</sup>-a<sup>2</sup>. From *θερμός*, hot, and *λουέω*, to wash. A hot bath. [a, 14.]

**THERMOLYSIS** (Lat.), n. f. Thu<sup>2</sup>rm(the<sup>2</sup>rm)-o<sup>2</sup>l/i<sup>2</sup>(u<sup>2</sup>)/-si<sup>2</sup>s. Gen., -ys/eos (-ol/ysis). From *θερμὸν*, heat, and *λύσις*, a loosening. 1. The decomposition of a body under the influence of a high temperature, with a subsequent recombination on cooling. [B, 6.] 2. The dissipating of animal heat. [a, 34.]

**THERMOLYTIC**, adj. Thu<sup>2</sup>rm-o-li<sup>2</sup>t/i<sup>2</sup>k. Pertaining to thermolysis. [a, 34.]

**THERMOMAGNETISM**, n. Thu<sup>2</sup>rm-o-ma<sup>2</sup>g/ne<sup>2</sup>t-i<sup>2</sup>zm. From *θερμὸν*, heat, and *μάγνης*, a magnet. Fr., *thermomagnétisme*. Magnetism produced by heat. [L, 41 (a, 14).]

**THERMOMETER**, n. Thu<sup>2</sup>rm-o<sup>2</sup>m/e<sup>2</sup>t-u<sup>2</sup>r. From *θερμὸν*, heat, and *μέτρον*, a measure. Fr., *thermomètre*. Ger., *T*. An instrument or apparatus for measuring degrees or variations of sensible heat. Its construction is based on the property possessed by certain substances of expanding or contracting regularly as the temperature is increased or diminished. The ordinary t. consists of a bulb communicating with a tube of very small bore, the bulb and adjacent part of the tube containing mercury, while the distant part of the tube is empty. With a rise of temperature the mercury expands so as to fill more and more of the tube. The temperature is indicated by a scale attached to the tube. The scale is graduated by marking off equal intervals as degrees, the unvarying distance between the marks that indicate the freezing point and boiling point of water being divided into 180 of these degrees in the *Fahrenheit* t., 100 degrees in the *centigrade* t. or *Celsius*'s t., and 80 in *Réaumur*'s t. The freezing point of water is the zero in the *centigrade* t. and *Réaumur*'s t., but *Fahrenheit* put his zero 32° below that point, and the boiling points of water in the three are thus 100°, 80°, and 212°. The *Fahrenheit* scale (symbol, Fahr. or F.) is that in general use, especially for meteorological and clinical observations; but in some countries the *centigrade* (symbol C.), which is that now chiefly employed in scientific research, takes its place; they are connected by the formula F =  $\frac{9}{5}$  C + 32°. For very low temperatures alcohol is used instead of mercury, and very high temperatures are measured by the pyrometer. [a, 48].—**Air t.** Ger., *Luft t.* A t. in which the temperature is measured by the expansion of air. [a, 48].—**Bréguet's t.** A t. for measuring small differences of temperature by the expansion of a metallic spiral. [B.].—**Celsius's t.** As commonly used, the *centigrade* t., but *Celsius* made the boiling point of water 0° and the freezing point 100°.

CLINICAL THERMOMETER.

[a, 48].—**Centigrade t.** See under *T.—Cerebral t.* An instrument for taking the temperature of the surface of the head. [D.] Cf. *Cerebral thermometry*.—**Clinical t.** A t. for ascertaining the temperature of the body. It has a thin bulb and is usually self-registering. Cf. *Surface t.*—**De Lisle's t.** A t. formerly used in Russia, having the boiling point of water marked zero and the freezing point placed at 150°. [a, 35].—**Fahrenheit t.** Ger.,

**Fahrenheitsches T.** See under **T.—Fever t.** See *Clinical t.*—**Hermann and Pfister's t.** A t. for simultaneously registering maximum and minimum temperatures measured by the expansion of a spiral strip made up of steel and brass. [B.]—**Immiel's metallic t.** An exceedingly sensitive t. of small size, the action of which depends on the expansion or contraction of a metallic tube filled with a highly expansive liquid. The instrument is practically self-registering, as several seconds elapse before the indicator moves backward after a temperature has been taken. No shaking down is necessary, for it accommodates itself readily to an altered temperature. [“N. Y. Med. Jour.” Apr. 24, 1886, p. 480 (a, 50).]—**Maximum t.** A t. that registers the highest temperature reached. [a, 48.]—**Metastatic t.** A t. invented by Walferdin, used in noting the temperature of the blood. It consists of a capillary tube of such length and delicacy that it is possible to read off hundredths of a degree. [A, 30.]—**Minimum t.** A t. that registers the lowest temperature reached. [a, 48.]—**Réaumur's t.** See under **T.—Recording t.** A t. which makes automatically a tracing indicative of the variations of temperature to which it has been subjected. [B.]—**Registering t.**—**Self-registering t.** An automatic maximum or minimum t. The maximum or minimum is shown by some indicator remaining in position after the mercury falls or rises. [a, 48.]—**Surface t.** A t. for taking the temperature of the surface of the body. [D.]

**THERMOMETRIC**, adj.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{me}^{\text{t}}/\text{ri}^{\text{k}}$ . Pertaining to the thermometer or its use. [D.]

**THERMOMETROGRAPH**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{m}}-\text{e}^{\text{t}}/\text{ro-gra}^{\text{f}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat,  $\mu\epsilon\tau\rho\omega$ , a measure, and  $\gamma\rho\acute{\alpha}\phi\epsilon\iota\nu$ , to write. A recording thermometer. [B.]

**THERMOMETRY**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{m}}-\text{e}^{\text{t}}/\text{ri}^{\text{z}}$ . Fr., *thermométrie*. Ger., *Thermometrie*. The use of the thermometer; also the body of facts and theories connected with its use. [D.]—**Cerebral t.** Of Broca, a method of diagnosing certain diseases of the brain by taking the surface temperature upon certain parts of the head. [D.]

**THERMONEUROSIS** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{nu}^{\text{r}}-\text{os}^{\text{t}}/\text{is}$ . Gen., *-os'eos (-ia)*. Fr., *thermonévrose*. From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\nu\epsilon\upsilon\rho\omega$ , a nerve. An old term for fever due to disturbance of the nervous centres. [a, 34.]

**THERMO-NEUTRALITY**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{nu}^{\text{t}}-\text{ra}^{\text{t}}/\text{t}^{\text{t}}-\text{i}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *neutralis*, neuter. Fr., *thermoneutralité*. Of certain salts, the property of neither losing nor gaining heat by being dissolved. [L, 41 (a, 14).]

**THERMONÉVROSE** (Fr.), n.  $\text{Te}^{\text{r}}\text{r}-\text{mo}-\text{na}-\text{vroz}$ . See **THERMONEUROSIS**.

**THERMONOSUS** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}^{\text{n}}\text{n}^{\text{s}}-\text{o}^{\text{s}}-\text{u}^{\text{s}}/\text{us}$ . Ger., From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *νόσος*, disease. Fr., *thermonose*. Ger., *Wärmekrankheit*. A disease due to heat. [L, 50 (a, 14).]

**THERMOPALPATION**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{pa}^{\text{t}}/\text{p}-\text{a}^{\text{s}}/\text{shu}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *palpation*, a stroking. The determination of the bodily temperature by palpation. [a, 34.]

**THERMOPATHOGENIE** (Ger.), n.  $\text{Te}^{\text{r}}\text{r}-\text{m}-\text{o}-\text{pa}^{\text{t}}-\text{o}-\text{gan-e}^{\text{t}}$ . Of Alvarenga, the generation of abnormal bodily heat. [L, 57 (a, 14).]

**THERMOPHAGY**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{p}}/\text{a}^{\text{t}}/\text{i}^{\text{z}}$ . Lat., *thermophagia* (from  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\phi\alpha\gamma\acute{\epsilon}\iota\nu$ , to eat). Ger., *Heissen*. The habit of swallowing excessively hot food. [L, 50 (a, 14).]

**THERMOPHEUGOSCOPE**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{feug}^{\text{t}}/\text{o}-\text{skop}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat,  $\phi\epsilon\upsilon\gamma\acute{\epsilon}\iota\nu$ , to flee, and  $\sigma\acute{\kappa\omicron}\pi\epsilon\iota\nu$ , to observe. Ger., *Thermopheugoskop*. A pocket apparatus for the determination of the loss of heat from the surface of the skin. [a, 18.]

**THERMOPILE**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{pil}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *pila*, a ball. Fr., *t.* Ger., *Thermosäule*. See **THERMO-ELECTRIC PILE**.

**THERMOPOSIA** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{poz}(\text{po}^{\text{s}})/\text{i}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *ποσις*, a drinking. Fr., *thermoposie*. Ger., *Heistinken*. The habit or practice of swallowing very hot drinks. [L, 50 (a, 14).]

**THERMOPYLÆ** (Lat.), n. f. pl.  $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{p}}/\text{i}^{\text{z}}-\text{e}(\text{a}^{\text{s}})-\text{e}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and *πύλη* a gate. A place in Greece where there are hot sulphurous springs. [L, 49 (a, 14).]

**THERMOSCOPE**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{skop}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\sigma\acute{\kappa\omicron}\pi\epsilon\iota\nu$ , to observe. Fr., *t.* Ger., *Thermoskop*. An instrument for registering changes of temperature without indicating the degree or amount of heat. [D, 25.]

**THERMOSEMILOGIE** (Ger.), n. *Term-o-zam-e-ol-og-e*. Of Alvarenga, the science of the significance of changes of bodily temperature in symptomatology. [L, 57 (a, 14).]

**THERMOSTAT**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{sta}^{\text{t}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\sigma\tau\acute{\alpha}\nu\alpha\iota$ , to set. Ger., *T.* An apparatus for the automatic regulation of temperature. [a, 48.]

**THERMOSTERESIS** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{ste}^{\text{r}}-\text{er}^{\text{is}}/\text{is}$ . Gen., *-er'eos (-ia)*. From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\sigma\tau\acute{\epsilon}\rho\sigma\iota\varsigma$ , deprivation. Fr., *thermostérèse*. Deprivation of heat; lowering of temperature. [L, 50 (a, 14).]

**THERMOSYSTALTIC**, adj.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{si}^{\text{st}}-\text{a}^{\text{t}}/\text{i}^{\text{z}}$ . Contracting under the action of heat (said of a muscle). [K.]

**THERMOSYSTALTISM**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{si}^{\text{st}}-\text{a}^{\text{t}}/\text{i}^{\text{z}}-\text{zm}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\sigma\upsilon\sigma\tau\acute{\alpha}\lambda\epsilon\iota\nu$ , to contract. The contractility of muscular tissue due to sudden changes of temperature. [L, 49 (a, 14).]

**THERMOTAXIS**, adj.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{ta}^{\text{x}}/\text{i}^{\text{z}}$ . Pertaining to thermotaxis. [a, 34.]

**THERMOTAXIS** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{ta}^{\text{x}}(-\text{ta}^{\text{x}})/\text{i}^{\text{z}}$ . Gen., *-tax'eos (-ia)*. From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\tau\acute{\alpha}\xi\iota\varsigma$ , arrangement. The adjustment of the production of animal heat. [a, 34.]

**THERMOTERION** (Lat.), n. n.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{te}(\text{ta}^{\text{r}})/\text{i}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat. An apparatus consisting of a glass

vessel surrounded by a hot-water chamber outside of which is an air-space that retards the loss of heat. Used to keep food warm. [“Lancet,” 1867, i, p. 104 (a, 34).]

**THERMOTHERAPEIA** (Lat.), n. f.  $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{the}^{\text{r}}-\text{a}^{\text{p}}(\text{a}^{\text{p}})-\text{i}(\text{e}^{\text{t}})/\text{i}^{\text{z}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\theta\epsilon\rho\alpha\pi\epsilon\iota\alpha$ , medical treatment. Fr., *thermothérapie*. Ger., *Thermotherapie*. The therapeutic use of heat, especially of hot baths. [L, 57 (a, 14).]

**THERMOTONOMETER**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{to}^{\text{n}}-\text{o}^{\text{m}}-\text{e}^{\text{t}}/\text{u}^{\text{r}}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, *τόνος*, a stretching, and  $\mu\epsilon\tau\rho\omega$ , a measure. An instrument devised by Gruenhagen for measuring the amount of muscular contraction induced by various thermic stimuli. [K.]

**THERMO-TRACHEOTOMY**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{tra}^{\text{c}}-\text{k}-\text{e}^{\text{a}}-\text{o}^{\text{t}}/\text{om}-\text{i}^{\text{z}}$ . Tracheotomy with the actual cautery.

**THERMOTROPISM**, n.  $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{t}}/\text{ro}^{\text{p}}-\text{i}^{\text{z}}-\text{zm}$ . From  $\theta\epsilon\rho\mu\acute{o}\nu$ , heat, and  $\τροπή$ , a turning. Ger., *Thermotropismus*. The phenomenon observed in some plant-organs of bending toward or away from a source of heat, as in curvatures produced by the ultra-red or dark heat rays of the spectrum. [a, 35.]

**THERMORPHIA** (Lat.), n. f.  $\text{The}^{\text{r}}(\text{thar})-\text{o}(\text{o}^{\text{s}})-\text{mo}^{\text{r}}/\text{f}^{\text{t}}/\text{i}^{\text{z}}$ . From  $\theta\eta\rho$ , a wild beast, and  $\mu\omicron\rho\theta\eta$ , form. A monstrosity characterized by resemblance to a lower animal. [A, 319 (a, 34).]

**THEROTYPIA** (Lat.), n. f.  $\text{The}^{\text{r}}(\text{thar})-\text{o}(\text{o}^{\text{s}})-\text{ti}^{\text{p}}(\text{tu}^{\text{p}})/\text{i}^{\text{z}}-\text{a}^{\text{s}}$ . From  $\theta\eta\rho$ , a wild animal, and *τύπος*, an impression. Fr., *thérotypie*. See **THERMORPHIA**.

**THESAURUS** (Lat.), n. m.  $\text{The}^{\text{s}}(\text{thas})-\text{a}^{\text{r}}(\text{a}^{\text{s}})/\text{u}^{\text{r}}-\text{u}^{\text{s}}(\text{u}^{\text{s}})$ . Gr., *θησαυρός*, treasure, also a storehouse. [a, 48.]—**T. medicamentorum**. Ger., *Arzneischatz*. The drugs collectively that are used in medicines and found in shops (nearly identical with *materia medica*). [B, 270.]

**THESPESIA** (Lat.), n. f.  $\text{The}^{\text{s}}-\text{pez}(\text{pe}^{\text{s}})/\text{i}^{\text{z}}-\text{a}^{\text{s}}$ . From  $\theta\epsilon\sigma\pi\epsilon\iota\sigma\iota\varsigma$ , divinely sounding. Fr., *thésépée*. A genus of malvaceous trees or herbs of the *Thespieae* (a division of the *Hibisceae*). [a, 35.]—**T. macrophylla**. A tree found in the islands of the Indian Ocean; used like *T. populnea*. [a, 35.]—**T. populnea**. Mahoe of Demerara, portia-nut-oil plant, umbrella-tree; found in India, western Africa, the West Indies, etc. The unripe capsules and the flower buds yield a viscid yellow dye-juice, which is used, as is also a decoction of the bark, as a wash in skin diseases. The seeds furnish a thick oil. The root is used in low fevers, pleurisy, etc., and the inner bark as an oxytocic. [a, 35.]

**THETISMUS** (Lat.), n. m.  $\text{The}^{\text{t}}-\text{i}^{\text{z}}/\text{i}^{\text{z}}(\text{i}^{\text{s}})/\text{mu}^{\text{s}}(\text{mu}^{\text{s}})$ . Lising.

**THEVERESIN**, n.  $\text{Te}^{\text{v}}\text{e}^{\text{r}}-\text{e}^{\text{s}}/\text{i}^{\text{z}}-\text{zn}$ . Fr., *thévéresine*. Ger., *T.* A poisonous substance,  $\text{C}_{14}\text{H}_{17}\text{O}_{17} + 2\text{H}_2\text{O}$ , found in *Thevetia nerifolia*, and also obtained by decomposing thevetin with dilute mineral acids; a rather cohesive white powder. [B, 270 (a, 38).]

**THEVETIA** (Lat.), n. f.  $\text{T}^{\text{e}}-\text{ve}^{\text{t}}/\text{i}^{\text{z}}-\text{a}^{\text{s}}$ . From *Thevet*, a French monk and traveler. Fr., *thévetie*. 1. The genus *Genipa*. 2. A genus of American apocynaceous shrubs. The *Thevetia* of De Candolle are a subtribe of the *Carisseae*. [a, 35.]—**T. ahoval**, **T. ahoval**. Ger., *Ahovaibaum*. Serpent's-bane; a Brazilian tree having acrid and narcotic properties. The kernels are used as an emetic, an extract of the plant as a febrifuge, and the wood to stupefy fish. [a, 35.]—**T. iccolli**. The *yoyote* or *narciso amarillo*, a large tree of the valleys of the Mexican Cordilleras. The seeds, known as *huesos de fraile*, contain thevetosin, which is said to be stimulant to the circulation and respiration in moderate doses, but in large quantities to be emetic and to cause paralysis of the heart and some part of the respiratory apparatus. In Mexico the seeds are used for rattlesnake-bites and hæmorrhoids, but their use is said to be dangerous. The poisonous milky juice of the plant has been used in deafness and skin diseases. [J. M. Maisch, “Am. Jour. of Pharm.” Apr., 1886, p. 168; “Proc. of the Am. Pharm. Assoc.,” xxv (a, 14); a, 35.]—**T. nerifolia**. A native of South America, naturalized in the East Indies, where it is known as *exile tree* (or oil-plant). It is closely allied to *T. iccolli*, and, like that, contains a highly poisonous juice. The seeds, used in snake-bites, contain thevetin and theveresin, and in toxic doses produce vomiting, a feeble pulse, delirium, and coma. A clear yellow oil extracted from them is a powerful acro-narcotic poison. The bitter, purgative bark is considered febrifuge. [“Proc. of the Am. Pharm. Assoc.,” xxx (a, 50); a, 35.]

**THEVETIN**, n.  $\text{Te}^{\text{v}}\text{e}^{\text{t}}-\text{i}^{\text{z}}-\text{zn}$ . Fr., *thévetine*. 1. A poisonous glucoside,  $\text{C}_{14}\text{H}_{14}\text{O}_{24} + 3\text{H}_2\text{O}$ , obtained from the seeds of *Thevetia nerifolia*, and occurring as a white crystalline powder. [B, 5, 68, 270 (a, 14, 38).] 2. Of Herrera, see **THEVETOSIN**.

**THEVETOSIN**, n.  $\text{Te}^{\text{v}}\text{e}^{\text{t}}/\text{os}-\text{i}^{\text{z}}-\text{zn}$ . A crystalline poisonous glucoside, perhaps identical with thevetin, obtained from the seeds of *Thevetia iccolli*. [B, 270.]

**THIACETIC**, adj.  $\text{Thi}-\text{a}^{\text{s}}-\text{et}(\text{e}^{\text{t}})/\text{i}^{\text{z}}$ . From  $\theta\epsilon\iota\omega\text{v}$ , sulphur, and *acetus* (q. v.). Fr., *thiacétique*. Containing acetyl with sulphur replacing oxygen.—**T. acid**. Fr., *acide thiacétique*. Ger., *Thiacetäure*, *Thioessigsäure*. An acid,  $\text{C}_2\text{H}_3\text{SO} = \text{CH}_3\text{CO.SH}$ . It is a colorless liquid, having an odor of both acetic acid and sulphureted hydrogen. [B, 3, 4.]—**T. aldehyde**. Fr., *aldéhyde thiacétique*. Ger., *Thiacetaldehyd*. Ethylidene sulphide,  $\text{C}_2\text{H}_4\text{S}$ ; not yet perfectly isolated. Thioparaldehyde is a polymeric form. [B.]—**T. anhydride**. Diacetoxy sulphide; a colorless oily liquid,  $(\text{C}_2\text{H}_3\text{O})_2\text{S}$ . [B, 3, 4.]

**THIACETONE**, n.  $\text{Thi}-\text{a}^{\text{s}}-\text{e}^{\text{t}}/\text{on}$ . Ger., *Thiaceton*. A yellowish oily liquid,  $\text{C}_2\text{H}_4\text{S}_2$ , having a very disagreeable odor. [B, 4.]

**THIACETYLENIC ACID**, n.  $\text{Thi}-\text{a}^{\text{s}}-\text{e}^{\text{t}}/\text{i}^{\text{z}}-\text{e}^{\text{n}}/\text{i}^{\text{z}}$ . See **THIACETIC ACID**.

**THIALDINE**, n.  $\text{Thi}-\text{a}^{\text{t}}/\text{den}$ . Fr., *t.* Ger., *Thialdin*. A body of the formula  $(\text{C}_2\text{H}_5)_2\text{NH.S}_2$ ; when used without qualification, ethylidene  $\text{C}_2\text{H}_4\text{S}_2$ .  $\text{C}_2\text{H}_4\text{S}_2 = \text{C}_2\text{H}_4\text{S}_2$ . [B, 3 (a, 38); B, 4.]

**THIALÖL** (Ger.), n.  $\text{Te}^{\text{a}}/\text{u}^{\text{r}}$ . Ethyl persulphide. [B.]

**THIANILINE**, n. Thi-a<sup>2</sup>n<sup>1</sup>/i<sup>2</sup>-en. Fr., *t.* A colorless, very stable, crystalline substance, C<sub>12</sub>H<sub>12</sub>N<sub>2</sub>S, obtained by the direct action of sulphur on aniline. [B, 38 (a, 14).]

**THIER** (Ger.), n. Ter. See ANIMAL.—**Sament'**. See SPERMATOZOID.—**Tarzneikunst, T'heilkunde**. See VETERINARY MEDICINE.—**Tarzt**. See VETERINARY SURGEON.—**T'keim**. See EMBRYO (1st def.).—**T'lymphe**. Vaccine taken from an animal. [L, 57 (a, 14).]—**T'pocken**. See COX-POX.—**T'seuche**. See EPIZOOTY.—**T'wahn**. See ZOANTHROPY.

**THIERCHEN** (Ger.), n. Ter/ch<sup>2</sup>e<sup>2</sup>n. An animalcule.

**THIERS** (Fr.), n. Te-é<sup>2</sup>r. A place in the department of the Puy-de-Dôme, France, where there is a chalybeate spring. [a, 14.]

**THIGH**, n. Thi. Gr., *μῦψ*. Lat., *femur, meros*. Ger., *Oberschenkel*. The upper portion of the lower limb between the knee and the hip. [L.]

**THIMBLE**, n. Thi<sup>2</sup>m<sup>2</sup>b<sup>1</sup>. A cap used to protect the finger which pushes the needle in sewing. [a, 48].—**Burr t.** A dental drill which rests upon a socket connected with an open ring worn around the index finger. [E.]

**THIOACETIC**, adj. Thi-o-a<sup>2</sup>s-et(e<sup>2</sup>t)/i<sup>2</sup>k. See THIACETIC.

**THIOALCOHOL**, n. Thi-o-a<sup>2</sup>l/ko-ho<sup>2</sup>l. See MERCAPTAN.

**THIOALDEHYDE**, n. Thi-o-a<sup>2</sup>l/de<sup>2</sup>-hid. An aldehyde in which sulphur replaces the oxygen. The formula of the t's is C<sub>2</sub>H<sub>2</sub>aS. [B, 5.]

**THIOANHYDRIDE**, n. Thi-o-a<sup>2</sup>n-hi<sup>2</sup>dri<sup>2</sup>d(drid). An anhydride in which sulphur replaces oxygen. [B, 4.]

**THIOANTIMONIC ACID**, n. Thi-o-a<sup>2</sup>n-ti<sup>2</sup>-mo<sup>2</sup>n/i<sup>2</sup>k. 1. Antimony pentasulphide. 2. A hypothetical acid, SbH<sub>3</sub>S<sub>4</sub>. [B, 270 (a, 38).]

**THIOANTIMONIOUS ACID**, n. Thi-o-a<sup>2</sup>n-ti<sup>2</sup>-mon/i<sup>2</sup>-u<sup>2</sup>s. A hypothetical acid, SbH<sub>3</sub>S<sub>3</sub>. [B, 270 (a, 38).]

**THIOANTIMONITE**, n. Thi-o-a<sup>2</sup>n-ti<sup>2</sup>m<sup>2</sup>/o<sup>2</sup>n-it. A salt formed by the combination of antimony trisulphide with a basic metallic sulphide. When the latter is the protosulphide of an alkali metal, the compound salt is termed *liver of antimony*.

**THIOARSENATE**, n. Thi-o-a<sup>2</sup>rs/e<sup>2</sup>n-at. Also called *sulpharsenate*. A salt of thioarsenic acid, or an arsenate in which sulphur replaces the oxygen. [B.]

**THIOARSENIC ACID**, n. Thi-o-a<sup>2</sup>rs-e<sup>2</sup>n/i<sup>2</sup>k. Also called *sulpharsenic acid*. Arsenic acid in which sulphur takes the place of oxygen, H<sub>3</sub>AsS<sub>4</sub>, known through its salts, the thioarsenates. [B.]

**THIOARSENIUS ACID**, n. Thi-o-a<sup>2</sup>rs-e<sup>2</sup>n/i<sup>2</sup>-u<sup>2</sup>s. Arsenious acid in which sulphur replaces oxygen, H<sub>3</sub>AsS<sub>3</sub>; known through its salts, the thioarsenites. [B.]

**THIOARSENITE**, n. Thi-o-a<sup>2</sup>rs/e<sup>2</sup>n-it. A salt of thioarsenious acid, or an arsenite in which sulphur replaces the oxygen (*i. e.*, a compound sulphide of arsenic and another element). [B.]

**THIOBENZAMIDE**, n. Thi-o-be<sup>2</sup>nz/a<sup>2</sup>m-i<sup>2</sup>d(id). The compound C<sub>6</sub>H<sub>5</sub>.CS.NH<sub>2</sub>. [B, 3 (a, 38).]

**THIOBENZOIC ACID**, n. Thi-o-be<sup>2</sup>nz-o/i<sup>2</sup>k. A crystalline acid, C<sub>6</sub>H<sub>5</sub>.CO.SH. [B, 3 (a, 38).]

**THIOBROMIDE**, n. Thi-o-brom/i<sup>2</sup>d(id). A compound of bromine and sulphur with the same element or radicle. [B.]

**THIOCAMF**, n. Thi<sup>2</sup>-o-ka<sup>2</sup>m<sup>2</sup>f. A liquid disinfectant consisting apparently of a mixture of camphor and sulphur dioxide. [B, 270 (a, 38).]

**THIOCARBAMIC ACID**, n. Thi-o-ka<sup>2</sup>rb-a<sup>2</sup>m/i<sup>2</sup>k. An acid, CS<sub>2</sub>.NH<sub>2</sub>, occurring as colorless acicular crystals. [B, 270 (a, 38).]

**THIOCARBANILIDE**, n. Thi-o-ka<sup>2</sup>rb-a<sup>2</sup>n/i<sup>2</sup>-i<sup>2</sup>d(id). See DR-PHENYLTHIOUREA.

**THIOCARBIMIDE**, n. Thi-o-ka<sup>2</sup>rb/i<sup>2</sup>m-i<sup>2</sup>d(id). See ISOTHIO-CYANATE.

**THIOCARBONATE**, n. Thi-o-ka<sup>2</sup>rb/o<sup>2</sup>n-at. A salt of thio-carbonic acid. Such salts have the formulae of the carbonates with sulphur replacing the oxygen. [B.]

**THIOCARBONIC ACID**, n. Thi-o-ka<sup>2</sup>rb-o<sup>2</sup>n/i<sup>2</sup>k. Ger., *Kohlenschwefelwasserstoffsaure*. An unstable substance, H<sub>2</sub>CS<sub>2</sub>; a deep-yellow, oily liquid of exceedingly disagreeable odor. [B, 3.]

**THIOCARBONYL**, n. Thi-o-ka<sup>2</sup>rb/o<sup>2</sup>n-i<sup>2</sup>l. A radicle, CS'', found in thiocarbonic acid. [B.]

**THIOCHLORIDE**, n. Thi-o-klor/i<sup>2</sup>d(id). A compound of chlorine and sulphur with the same element or radicle. [B.]

**THIOCRESOL**, n. Thi-o-kre<sup>2</sup>s/o<sup>2</sup>l. Fr., *thiocrésol*. A substance, C<sub>6</sub>H<sub>4</sub>(CH<sub>3</sub>)SH, known in three isomeric forms: *ortho*<sup>2</sup>, small tabular crystals; *meta*<sup>2</sup>, a liquid; and *para*<sup>2</sup>, large tabular crystals. [B, 3 (a, 38).]

**THIOCYANACETIC ACID**, n. Thi-o-si-a<sup>2</sup>n-a<sup>2</sup>s-et(e<sup>2</sup>t)/i<sup>2</sup>k. A monobasic acid, CH<sub>2</sub>(SCN).COOH = C<sub>3</sub>H<sub>3</sub>SN<sub>2</sub>O<sub>4</sub>. [B, 3.]

**THIOCYANIC ACID**, n. Thi-o-si-a<sup>2</sup>n/i<sup>2</sup>k. Fr., *acide thiocyanique*. An acid, SCN.H, occurring as an unstable colorless liquid of persistent odor. [B, 270 (a, 38).]

**THIOCYANURIC ACID**, n. Thi-o-si-a<sup>2</sup>n-u<sup>2</sup>r/i<sup>2</sup>k. An acid, (N≡C-SH)<sub>2</sub> = C<sub>2</sub>S<sub>2</sub>N<sub>3</sub>H<sub>2</sub>, derived from cyanuric acid by substituting sulphur for oxygen; a yellow granular powder. [Am. Jour. of Sci., Dec., 1885 (B).]

**THIOCYMENE, THIOCYMOL, THIOCYMOPHENOL**, n's. Thi-o-si<sup>2</sup>m<sup>2</sup>en, -si<sup>2</sup>mo<sup>2</sup>l, -si<sup>2</sup>m-o<sup>2</sup>fe<sup>2</sup>n/o<sup>2</sup>l. Cymophenol in which sulphur replaces oxygen; a liquid, C<sub>6</sub>H<sub>3</sub>(CH<sub>3</sub>)(C<sub>6</sub>H<sub>7</sub>).SH. [B; B, 3 (a, 38).]

**THIODIGLYCOLLIC ACID**, n. Thi-o-di-gli<sup>2</sup>k-o<sup>2</sup>l/i<sup>2</sup>k. A dibasic acid, S(CH<sub>2</sub>CO.OH)<sub>2</sub>. [B.]

**THIOETHER**, n. Thi-o-eth/u<sup>2</sup>r. An ether in which an atom of sulphur replaces an atom of oxygen; a sulphide of a double hydrocarbon molecule. The general formula of the thioethers is C<sub>2</sub>H<sub>2</sub>n+1.CmH<sub>2</sub>m+1S. [B.]

**THIOETHYLATE**, n. Thi-o-e<sup>2</sup>th/i<sup>2</sup>l-at. A compound of a metal with ethyl thioalcohol (ethyl mercaptan); a mercaptide of ethyl. [B.]

**THIOFORMIC ALDEHYDE**, n. Thi-o-fo<sup>2</sup>rm/i<sup>2</sup>k a<sup>2</sup>l/de<sup>2</sup>-hid. See METHYLENE SULPHIDE.

**THIOGLYCERIN**, n. Thi-o-gli<sup>2</sup>s/e<sup>2</sup>r-i<sup>2</sup>n. Trisulphhydrin. [B.] See SULPHYDRIN.

**THIOGLYCOL**, n. Thi-o-gli<sup>2</sup>k/o<sup>2</sup>l. A compound of a bivalent hydrocarbon with two molecules of the univalent radicle (SH)', and hence regarded as a glycol (diatomic alcohol) in which oxygen atoms in both of the molecules of hydroxyl are replaced by sulphur. General formula: C<sub>2</sub>H<sub>2</sub>n(SH)<sub>2</sub>. [B, 4.]

**THIOGLYCOLLIC ACID**, n. Thi-o-gli<sup>2</sup>k-o<sup>2</sup>l/i<sup>2</sup>k. See MERCAPTOACETIC ACID.

**THIOHYDANTOIN**, n. Thi-o-hid-a<sup>2</sup>n/to-i<sup>2</sup>n. A crystalline body, C<sub>3</sub>H<sub>4</sub>N<sub>2</sub>OS = CH<sub>2</sub>CO : N<sub>2</sub>H<sub>2</sub>.CS. [B, 4.]

**THIOL**, n. Thi/o<sup>2</sup>l. An artificial mixture of sulphureted hydrocarbons closely resembling ichthyol in chemical character and medicinal action. It occurs in commerce in liquid form (a 40-per-cent. solution) and in powder or thin layers. [B, 270 (a, 38).]

**THIOLACTIC ACID**, n. Thi-o-la<sup>2</sup>kt/i<sup>2</sup>k. A monobasic acid, C<sub>3</sub>H<sub>5</sub>SO<sub>2</sub> = CH<sub>3</sub>.CH(SH).COOH. [B, 3.]

**THIOMETHYLATE**, n. Thi-o-me<sup>2</sup>th/i<sup>2</sup>l-at. A compound of methyl mercaptan with a metal; a methylic mercaptide. [B.]

**THIOMOLYBDATE**, n. Thi-o-mo<sup>2</sup>l-i<sup>2</sup>pb-dat. A compound of a basic sulphide with molybdenum trisulphide, or a molybdate in which sulphur replaces oxygen. [B, 3.]

**THION** (Lat.), n. n. Thi(the)<sup>2</sup>o<sup>2</sup>n. Gr., *θειον*. See SULPHUR.

**THIONINE**, n. Thi/o<sup>2</sup>n-en. An alkaloid, C<sub>12</sub>H<sub>9</sub>N<sub>3</sub>S, obtainable as a black crystalline powder or as small acicular crystals of a slight green lustre. [B, 3 (a, 38).]—**T. hydrochloride**. Lauth's violet, C<sub>12</sub>H<sub>9</sub>N<sub>3</sub>S.HCl, occurring as small acicular or prismatic crystals having a metallic green lustre. [B, 3 (a, 38).]

**THIONOL**, n. Thi/o<sup>2</sup>n-o<sup>2</sup>l. Dioxithiodiphenylimide, C<sub>12</sub>H<sub>7</sub>NSO<sub>2</sub>. [B, 3 (a, 38).]

**THIONOLINE**, n. Thi-o<sup>2</sup>n/o<sup>2</sup>l-en. The compound C<sub>12</sub>H<sub>8</sub>N<sub>2</sub>SO. [B, 3 (a, 38).]

**THIONURIC ACID**, n. Thi-o<sup>2</sup>n-u<sup>2</sup>r/i<sup>2</sup>k. Fr., *acide thionurique*. Ger., *Thionursäure, Thioharnsäure*. A dibasic crystalline acid, C<sub>4</sub>H<sub>4</sub>N<sub>2</sub>SO<sub>6</sub>. [B, 3.]

**THIONYL**, n. Thi/o<sup>2</sup>n-i<sup>2</sup>l. Fr., *thionyle*. Ger., *T.* A bivalent radicle, (SH'O)'. [B.]—**Diamyl t.** See AMYL SULPHOXIDE.—**T. chloride**. A colorless fuming liquid, SOCl<sub>2</sub>. [B, 3.]

**THIOOXAMIDE**, n. Thi-o-o<sup>2</sup>x/a<sup>2</sup>m-i<sup>2</sup>d(id). An acid, (CS)<sub>2</sub>(NH<sub>2</sub>)<sub>2</sub>, occurring as reddish-yellow crystals. [B, 3 (a, 38).]

**THIOOXYCARBONATE**, n. Thi-o-o<sup>2</sup>x-i<sup>2</sup>-ka<sup>2</sup>rb/o<sup>2</sup>n-at. A salt of the general constitution O : C<sup>O</sup>/R' S<sup>R'</sup>. [B.]

**THIOXYDIPHENYLAMINE**, n. Thi-o-o<sup>2</sup>x-i<sup>2</sup>-di-fe<sup>2</sup>n-i<sup>2</sup>l/-a<sup>2</sup>m-en. See SULPHAMINOL.

**THIOPARALDEHYDE**, n. Thi-o-pa<sup>2</sup>r-a<sup>2</sup>ld/e<sup>2</sup>-hid. A substance, C<sub>6</sub>H<sub>12</sub>S<sub>2</sub>, known in two isomeric forms. *α-t.*, white prismatic or tabular crystals, and *β-t.*, shining acicular crystals. [B, 3 (a, 38).]

**THIOPHENE**, n. Thi/o<sup>2</sup>-fen. Fr., *thiophène*. Ger., *Thiophen*. A colorless, strongly-refracting, oily liquid, C<sub>4</sub>H<sub>4</sub>S, found in benzene obtained from coal-tar. [B, 3.]—**T. diiodide**. An aromatic, non-toxic, and non-irritant body, used as an antiseptic. [Brit. Med. Jour., March 19, 1892 (a, 50).]

**THIOPHENIC ACID**, n. Thi-o-fe<sup>2</sup>n/i<sup>2</sup>k. A crystalline acid, C<sub>6</sub>H<sub>5</sub>S.COOH = C<sub>6</sub>H<sub>5</sub>SO<sub>3</sub>, analogous in structure and properties to benzoic acid. [B, 3.]

**THIOPHENITRILE**, n. Thi-o-fe<sup>2</sup>n-it/ri<sup>2</sup>l. A liquid, C<sub>6</sub>H<sub>5</sub>S-CN = C<sub>6</sub>H<sub>5</sub>NS, resembling closely benzonitrile. [B.]

**THIOPHENOL**, n. Thi-o-fe<sup>2</sup>n/o<sup>2</sup>l. See PHENYL MERCAPTAN.

**THIOPHOSPHATE**, n. Thi-o-fo<sup>2</sup>s/fat. A salt of thiophosphoric acid; a phosphate that has one atom of its oxygen replaced by sulphur. [B.]

**THIOPHOSPHORIC ACID**, n. Thi-o-fo<sup>2</sup>s-fo<sup>2</sup>r/i<sup>2</sup>k. An acid, H<sub>3</sub>PSO<sub>3</sub>, known only through its salts, the thiophosphates. [B.]

**THIOPHOSPHORYL**, n. Thi-o-fo<sup>2</sup>s/fo<sup>2</sup>r-i<sup>2</sup>l. The trivalent radicle of thiophosphoric acid, S≡P≡. [B.]

**THIOPICRIC ACID**, n. Thi-o-pi<sup>2</sup>kt/i<sup>2</sup>k. Fr., *acide thiopicrique*. *α*-trinitrothiophenol; an acid, C<sub>6</sub>H<sub>3</sub>(NO<sub>2</sub>)<sub>3</sub>SH, occurring as yellowish acicular crystals of bitter taste. [B, 3 (a, 38).]

**THIOSINAMINE**, n. Thi-o-si<sup>2</sup>n/a<sup>2</sup>m-en. Fr., *thiosinamine*. Ger., *Thiosinamin*. See ALLYLTHIOUREA.

**THIOSTANNIC ACID**, n. Thi-o-sta<sup>2</sup>n/i<sup>2</sup>k. A dark powder, H<sub>2</sub>SnS<sub>3</sub>, of waxy appearance. [B, 3.]

**THIOSULPHATE**, n. Thi-o-su<sup>2</sup>lf/at. Syn.: *sulphosulphate, hyposulphite*. A salt of thiosulphuric acid. The t's include the normal t's, R<sub>2</sub>(S<sub>2</sub>O<sub>3</sub>), or R''(S<sub>2</sub>O<sub>3</sub>), and the acid t's, Rm(HS<sub>2</sub>O<sub>3</sub>)<sub>2</sub>, where Rm is a radicle whose combining power is n. [B.]

**THIOSULPHURIC ACID**, n. Thi-o-su<sup>2</sup>lf-u<sup>2</sup>r/i<sup>2</sup>k. An acid, S<sub>2</sub>O<sub>3</sub>H<sub>2</sub>, known only in its salts, the thiosulphates. [B, 46 (a, 39).]

**THIO-THIO**, n. Thi-o-thi/o. Palm-oil (from *Elæis guineensis*). [B, 121 (a, 35).]

**THIOUREA**, n. Thi-o-u<sup>2</sup>-re/a<sup>2</sup>. A crystalline solid, CSNH<sub>2</sub>, or urea in which sulphur replaces oxygen. [B, 4.]

**THIOURIC ACID**, n. Thi-o-u<sup>r</sup>i<sup>2</sup>k. See THIONURIC ACID.

**THIOXYDIPHENYLAMINE**, n. Thi-o<sup>2</sup>x-i<sup>2</sup>-di-fe<sup>2</sup>n-i<sup>2</sup>l'a<sup>2</sup>m-i<sup>2</sup>n. See SULPHAMINOL.

**THIRST**, n. Thu<sup>r</sup>st. Gr., δίψα. Lat., sitis. Fr., soif. Ger., Durst. A desire to drink; an uneasy sensation of craving for drink. [K.]

**THISTLE**, n. Thi<sup>s</sup>l. A prickly composite plant, especially one belonging to any of the genera *Carduus*, *Cnicus*, or *Onopordium*. [a. 35.]—**Blessed t.** 1. See *CENTAUREA benedicta* and *SILYBUM marianum*.—Canada t. See *CNICUS arvensis*.—**Carlina t.**, Carolina t., Caroline t. The genus *Carlina*. [a. 35.]—**Corn-t.** See *CNICUS arvensis*.—**Cotton-t.** See *ONOPORDIUM acanthium*.—**Friar's t.** See *CNICUS eriophorus*.—**Fuller's t.** See *DIPSACUS fullonum*.—**Globe-t.** See the major list.—**Gum-t.** One of various species of *Euphorbia*. [a. 35.]—**Melon-t.** The genus *Melocactus*. [a. 35.]—**Milk-t.** See *SILYBUM marianum* and *SONCHUS oleraceus*.—**Plumed t.** The genus *Cnicus*, especially *Cnicus lanceolatus*. [a. 35.]—**Sow-t.** The genus *Sonchus*, also the genus *Agathurus* and species of *Mulgedium*. [a. 35.]

**THLASIS** (Lat.), n. Thlas(thla<sup>s</sup>)i<sup>2</sup>s. Gen., thlas'eos (-is). Gr., θλάσις (from θλάω, to bruise). A contusion; of Vogel, a depression of the calvaria near a fracture of the skull. [a. 34.]

**THLASMA** (Lat.), n. n. Thla<sup>s</sup>z(thla<sup>s</sup>)i<sup>2</sup>ma<sup>s</sup>. Gen., thlas'matos (-is). Gr., θλάσμα. A contusion; of Galen, an injury, such as a concussion or contusion, in which there is no solution of tissue continuity. [a. 34.]—**T. stremma**. See SPRAIN.

**THLASPI** (Lat.), n. n. Thla<sup>s</sup>sp(thla<sup>s</sup>)i<sup>2</sup>i<sup>2</sup>. Gr., θλάσπι. Gen., thlas'peos or thlas'pi (indecl.). Fr., t. tabouret (1st def.). Ger., Tüschelkraut (1st def.). 1. Bastard-cress, besom-weed; a genus of cruciferous herbs. 2. Of Adanson, a section of the *Cruciferae*. The *Thlaspidæ*, *Thlaspidæ* (Fr., thlaspidées), or *Thlaspidææ* are a tribe of cruciferous plants, containing T. (1st def.), *Capsella*, etc. [a. 35.]—**Herba thlaspeos** (seu t.). The herb of *Capsella bursa pastoris*. [a. 35.]—**Semen thlaspeos**. The seed of *T. arvense* and *Lepidium campestre*. [a. 35.]—**T. alliaceum**. Fr., tabouret à odeur d'ail. Ger., lauchduftiges Tüschelkraut. A European species closely allied to *T. arvense*; formerly official as *herba scorodithlaspeos*. [a. 35.]—**T. alpestre**, **T. alpinum**. Fr., tabouret des Alpes. Ger., Alpentasche. A European species. The leaves are used as a salad. [a. 35.]—**T. arvense**. Fr., t. (ou tabouret), tabouret à grandes (ou siliques des champs), monnoyère. Ger., Ackertüschelkraut, Bauernkresse. Boor's mustard, dish-mustard, penny- (or wild) cress; found throughout Europe. The seeds, formerly official as *semen t.* (seu *thlaspeos*, seu *thlaspeos arvensis*), are stimulant, diuretic, and alterative, but are not now used. The leaves are astringent and antiscorbutic. [a. 35.]—**T. bursa pastoris**. See *CAPSILLA bursa pastoris*.—**T. campestre**. See *LEPIDIUM campestre*.—**T. maritimum**. See *LOBULARIA maritima*.—**T. perfoliatum**. Fr., tabouret perfolié, moucelte, piloselle siliculuse. A European salad species. The seeds were formerly official, like those of *T. arvense*, as *semen thlaspeos*, etc. [a. 35.]—**T. rudérale**. See *LEPIDIUM rudérale*.—**T. sativum**. See *LEPIDIUM sativum*.

**THLIBODEODERMIS** (Lat.), n. f. Thli<sup>b</sup>(thlib)<sup>2</sup>-od-e<sup>2</sup>-o(-o<sup>2</sup>)-du<sup>2</sup>rm(de<sup>2</sup>rm)-i(-e)<sup>2</sup>i<sup>2</sup>s. Gen., -it'idos (-idis). Fr., θλίβειν, to press, ελδος, resemblance, and δάμα, the skin. Fr., thlibodermite. A cutaneous inflammation resembling a bruise. [L, 50 (a, 14).]

**THLIPENCEPHALUS** (Lat.), n. m. Thli<sup>2</sup>ps(thlips)<sup>2</sup>-e<sup>2</sup>n(-e<sup>2</sup>n<sup>2</sup>)-se<sup>2</sup>(ke<sup>2</sup>f)(a<sup>2</sup>l)(a<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). Fr., θλίψις, pressure, and ἐγκεφαλος, the brain. Fr., thlipsencephale. Of G. St.-Hilaire, a monster in which the brain has remained undeveloped in consequence of intra-uterine compression of the foetal head. [a. 34.]

**THLIPSIS** (Lat.), n. f. Thli<sup>2</sup>ps(thlips)<sup>2</sup>i<sup>2</sup>s. Gen., thlips'eos (-is). Gr., θλίψις. Fr., thlipsie. Ger., Zusammendrückung. Compression. [L, 41, 50, 56 (a, 14).]

**THNÉTOBLASTE** (Fr.), n. Tnat-o-bla<sup>2</sup>st. See *Cancer CELL*.

**THOMSENEAN**, adj. To<sup>2</sup>ms-en'e<sup>2</sup>n. Pertaining to Thomson's disease (q. v.). [C. H. Hughes, "N. Y. Med. Jour.," July 17, 1886, p. 70.]

**THOMSONIAN**, adj. To<sup>2</sup>ms-on'i<sup>2</sup>n. Pertaining to Thomsonianism; as a n., a believer in or practitioner of it. [D.]

**THOMSONIANISM, THOMSONISM**, n's. Tho<sup>2</sup>ms-on'i<sup>2</sup>-n-i<sup>2</sup>zm, to<sup>2</sup>ms'u<sup>2</sup>n-i<sup>2</sup>zm. From *Thomson* (see below). A system of medicine devised by Samuel Thomson, of Massachusetts. It maintains that the human body is composed of four elements—earth, air, fire, and water; also that, since metals and minerals are heavy and are obtained from the earth, their employment for therapeutic purposes will tend to draw those who use them downward toward the earth, whereas, as vegetables develop upward, the use of them tends to develop and benefit those who employ them. [D. 20.]

**THON** (Ger.), n. Ton. See ARGIL and CLAY.—**T'ähnlich**, **T'artig**. See ARGILLACEOUS.

**THONERDE** (Ger.), n. Ton'e<sup>2</sup>rd-e<sup>2</sup>. See ALUMINA and CLAY.—**Arseusaur T.** See ALUMINUM arsenate.—**Essigsaur T.** See ALUMINUM acetate.—**Gerb-saur T.** See ALUMINUM tannate.—**Salzsaur T.** See ALUMINUM chloride.—**Thydral**. See ALUMINUM trihydrate.—**T'olent**. An oleate of aluminum, used for mucopurulent cutaneous exudations and as dressing for foetid ulcers. [B. 108 (a, 14).]—**Weinsaur T.** See ALUMINUM tartrate.

**THOKA** (Lat.), n. f. Tho<sup>r</sup>a<sup>2</sup>. 1. An old term for *Aconitum napellus*. 2. See *RANUNCULUS t.*

**THORACENTESIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-se<sup>2</sup>nt(ke<sup>2</sup>nt)-e(a)<sup>2</sup>i<sup>2</sup>s. Gen., -es'eos (-is). See THORACOCENTESIS.

**THORACHYPERTROMUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>k(a<sup>2</sup>ch<sup>2</sup>)-i<sup>2</sup>p(-u<sup>2</sup>p)-u<sup>2</sup>re<sup>2</sup>tr(i<sup>2</sup>o<sup>2</sup>m-u<sup>2</sup>s(u<sup>2</sup>s)). Fr., θώραξ, the chest, ύπερ, in excess, and τρώω, a trembling. Fr., thorachypertrome. Abnormally increased vocal fremitus. [L, 50 (a, 14).]

**THORACIC**, adj. Tho<sup>r</sup>-a<sup>2</sup>s'i<sup>2</sup>2k. Gr., θωρακικός. Lat., thoracicus. Fr., thoracique. Ger., thoracisch. Pertaining to the chest. [L, 343.]

**THORACICO-ABDOMINAL**, adj. Tho<sup>r</sup>-a<sup>2</sup>s'i<sup>2</sup>2k-o-a<sup>2</sup>b-do<sup>2</sup>m'i<sup>2</sup>-n'l. Fr., t.-a. Pertaining to the thorax and the abdomen.

**THORACICO-LUMBAR**, adj. Tho<sup>r</sup>-a<sup>2</sup>s'i<sup>2</sup>2k-o-lu<sup>2</sup>mb'a<sup>2</sup>r. Fr., thorax, the chest, and lumbus, the loin. Thoracic and lumbar. [L, 153.]

**THORACICUS** (Lat.), adj. Tho<sup>r</sup>(thor)-a<sup>2</sup>s(a<sup>2</sup>k)'i<sup>2</sup>2k-u<sup>2</sup>s(u<sup>2</sup>s). See THORACIC; as a n. m., see *STERNALIS brutorum*.

**THORACI-SPINAL**, adj. Tho<sup>r</sup>-a<sup>2</sup>s-i<sup>2</sup>2-sp'i<sup>2</sup>n'l. From *thorax*, the chest, and *spina*, the spine. Pertaining to the thoracic region and the spinal cord. [E. Coues, "Med. Record," July 30, 1887 (L).]

**THORACOCENTESIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-se<sup>2</sup>nt(ke<sup>2</sup>nt)-e(a)<sup>2</sup>i<sup>2</sup>s. Gen., -es'eos (-is). From *θώραξ*, the chest, and *κέντρος*, a pricking. Fr., thoracocentèse. Ger., Brusthöhlentisch. Perforation of the chest to evacuate fluid from the pleura. [E.]

**THORACOCYLLOSIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-si<sup>2</sup>l(-ku<sup>2</sup>i<sup>2</sup>)-los'i<sup>2</sup>s. Gen., -los'eos (-is). From *θώραξ*, the thorax, and *κύλωσις*, a crippling. Fr., thoracocyllose. Deformity of the thorax.

**THORACOCYMECHOS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-si<sup>2</sup>gm(ku<sup>2</sup>m)-ek(ach<sup>2</sup>)'o<sup>2</sup>s. From *θώραξ*, the chest, κύμα, a wave, and ἦχος, a sound. Ger., Brustschülden. An undulating sound in the chest heard on succussion. [L, 50 (a, 34).]

**THORACOCYRTOMA** (Lat.), **THORACOCYRTOSIS** (Lat.), n's n. and f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-su<sup>2</sup>rt(ku<sup>2</sup>rt)-om'a<sup>2</sup>, -os'i<sup>2</sup>s. Gen., -om'atos (-atis), -os'eos (-is). From *θώραξ*, the chest, and *κύρτωσις*, a curve, or *κύρτωσις*, cyrtosis. Fr., thoracocymtome. Ger., Brustbuckel. Gibbosity of the thorax or sternum. [L, 50 (a, 14).]

**THORACOCYSTIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-si<sup>2</sup>st(-ku<sup>2</sup>st)'i<sup>2</sup>s. Gen., -cyst'eos, -cyst'ios (-is). From *θώραξ*, the chest, and *κύστις*, a bladder. Fr., thoracocyste. 1. See HYDROTHORAX. 2. A hydatis of the thorax. [L, 50 (a, 14).]

**THORACODIDYMYUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-di<sup>2</sup>d'i<sup>2</sup>zm(u<sup>2</sup>m)-u<sup>2</sup>s(u<sup>2</sup>s). From *θώραξ*, the chest, and *δίδυμος*, twin. Fr., thoracodidymie. See THORACOPAGUS.

**THORACODYNIA** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-di<sup>2</sup>n(-du<sup>2</sup>n)'i<sup>2</sup>a<sup>2</sup>. From *θώραξ*, the chest, and *δύνη*, pain. Fr., thoracodynie. Ger., Brustschmerz. Pain in the thorax. [L, 41, 50 (a, 14).]

**THORACO-FACIAL** (Fr.), n. Tho<sup>r</sup>-a<sup>2</sup>-ko-fa<sup>2</sup>-se-a<sup>2</sup>l. See *PLATYSMA myoides*.

**THORACOGASTROCHISIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-ga<sup>2</sup>st(ga<sup>2</sup>st)-ro<sup>2</sup>sch(ro<sup>2</sup>sch<sup>2</sup>)'i<sup>2</sup>s-i<sup>2</sup>s. Gen., -schis'eos (-osch'isis). From *θώραξ*, the thorax, γαστήρ, the belly, and *σχίζω*, a cleaving. Congenital fissure of the thorax and abdomen. [a. 34.]

**THORACOGRAPHE** (Fr.), n. Tho<sup>r</sup>-a<sup>2</sup>-ko-gra<sup>2</sup>ph. An instrument for making an outline of the body, especially of the vertebral column in cases of deformity. ["Rev. mens. des mal. de l'enfance," Dec., 1885, p. 574 (D).]

**THORACOMETER**, n. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>2</sup>r. From *θώραξ*, the chest, and *μέτρον*, a measure. Of Sibson, an apparatus, consisting of a spring connected with an index, for indicating variations in the volume of the thorax. [J.] See also STETHOMETER.

**THORACOMONODIDYMYUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-mo<sup>2</sup>n-o(-o<sup>2</sup>)-di<sup>2</sup>d'i<sup>2</sup>zm(u<sup>2</sup>m)-u<sup>2</sup>s(u<sup>2</sup>s). From *θώραξ*, the chest, *μόνος*, alone, and *δίδυμος*, double. See THORACOPAGUS parasiticus.

**THORACOMYODYNIA** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-mi(-mu<sup>2</sup>)-o(-o<sup>2</sup>)-di<sup>2</sup>zm(du<sup>2</sup>n)'i<sup>2</sup>a<sup>2</sup>. From *θώραξ*, the chest, *μύς*, a muscle, and *δύνη*, pain. Fr., thoracomodynée. Pain in the pectoral muscles. [L, 50 (a, 14).]

**THORACOPAGIA** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-pa<sup>2</sup>j(pa<sup>2</sup>j)'i<sup>2</sup>a<sup>2</sup>. The condition of a thoracopagus. [a. 48.]

**THORACOPAGUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o<sup>2</sup>p'a<sup>2</sup>g(a<sup>2</sup>g)-u<sup>2</sup>s(u<sup>2</sup>s). From *θώραξ*, the chest, and *πάγος*, anything fixed. Fr., thoracopage. That form of double monster in which the individuals are joined by the thorax, having two heads and four upper limbs. [Veit, "Samml. klin. Vortr.," gynäk., No. 48 (a, 50).]—**T. parasiticus**. A t. in which one of the individuals is not fully developed, or is only rudimentary. [L, 57 (a, 14).]

**THORACOPATHIA** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-pa<sup>2</sup>th(-pa<sup>2</sup>th-ic)'i<sup>2</sup>a<sup>2</sup>. From *θώραξ*, the chest, and *πάθος*, disease. Ger., Brustkastenleiden. Any disease of the thorax. [L, 50 (a, 14).]

**THORACOPLASTY**, n. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k-o<sup>2</sup>-pla<sup>2</sup>st-i<sup>2</sup>s. From *θώραξ*, the chest, and *πλάσσειν*, to mold. Ger., Rippenresection, Thoracoplastik. See *Estlander's RESECTION*.

**THORACOSCHISIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o<sup>2</sup>sch<sup>2</sup>(o<sup>2</sup>sch<sup>2</sup>)'i<sup>2</sup>s-i<sup>2</sup>s. Gen., -is'eos (-osch'isis). From *θώραξ*, the chest, and *σχίζω*, a cleaving. Fr., thoracoschisie. See FISSURE of the thorax.

**THORACOSCOPY**, n. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k-o<sup>2</sup>sc'op-i<sup>2</sup>s. From *θώραξ*, the chest, and *σκοπεῖν*, to examine. Fr., thoracoscopie. Exploration of the thoracic cavity, especially by means of the stethoscope.

**THORACOSPHYGMUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-sf<sup>2</sup>g(su<sup>2</sup>g)'mu<sup>2</sup>sem'u<sup>2</sup>s. From *θώραξ*, the chest, and *σφύγμως*, the pulse. Fr., thoracosphygme. See BRUSTPULS.

**THORACOSTENOSIS** (Lat.), n. f. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o(-o<sup>2</sup>)-ate<sup>2</sup>n-o<sup>2</sup>s'i<sup>2</sup>s. Gen., -os'eos (-is). From *θώραξ*, the chest, and *στενωσις*, stenosis. Fr., thoracosténose. Stenosis of the thorax. [L, 50 (a, 14).]

**THORACOTOMY**, n. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k-o<sup>2</sup>t'om-i<sup>2</sup>s. From *θώραξ*, the chest, and *τομή*, a cutting. Fr., thoracotomie. See THORACOCENTESIS.

**THORACOTROMUS** (Lat.), n. m. Tho<sup>r</sup>-a<sup>2</sup>-a<sup>2</sup>k(a<sup>2</sup>k)-o<sup>2</sup>t'ro<sup>2</sup>m-u<sup>2</sup>a<sup>2</sup>(u<sup>2</sup>s). From *θώραξ*, the chest, and *τρώω*, a trembling. See *Pectoral FREMITUS*.

**THORACULUM** (Lat.), n. n. Tho<sup>2</sup>r(thor)-a<sup>2</sup>k(a<sup>2</sup>k)'u<sup>2</sup>(u<sup>2</sup>l)-u<sup>2</sup>m-(u<sup>2</sup>m). From *θώραξ*, the chest. Ger., *Schnürbrust*. See CORSET.

**THORADELPHUS** (Lat.), n. m. Thor-a<sup>2</sup>d(a<sup>2</sup>d)-e<sup>2</sup>l(f'u<sup>2</sup>s(u<sup>2</sup>s)). From *θώραξ*, the chest, and *ἀδελφός*, a brother. Fr., *thoradelphie*. A double monster, divided below the umbilicus but united above so as to have but a single thoracic cavity and head and two arms. [L. 41, 49 (a, 14).] Cf. *SYNADELPHUS*.

**THORAX** (Lat.), n. m. Thor'a<sup>2</sup>x(a<sup>2</sup>x). Gen., -ac'os (-is). Gr., *θώραξ* (lit., a breastplate). Fr., t. Ger., *T. Brustkasten*. It., *torace*. Sp., *tórax*. 1. The cavity bounded by the diaphragm below, the ribs and sternum in front, and the ribs and vertebral column behind, and closed in above by the structures in the lower part of the neck. It contains the heart and lungs and the vessels connected with them, the œsophagus, the sympathetic and the pneumogastric nerves and their ganglia and plexuses, and a portion of the thoracic duct. 2. In arthropods, that portion of the body to which the appendages concerned in motion are almost exclusively, if not wholly, attached. [L.]—**T. paralyticus**. A t. that is deformed in consequence of paralysis of some of the thoracic muscles. [a, 34.]

**THOREXIS** (Lat.), n. f. Tho<sup>2</sup>r(thor)-e<sup>2</sup>x(ax)'i<sup>2</sup>s. Gen., -e<sup>2</sup>'eos (-is). Gr., *θώραξις* (from *θωρίσσω*, to intoxicate). Ger., *Beraus-schung*. See INTOXICATION.

**THORIA** (Lat.), **THORINA** (Lat.), n's f. Thor'i<sup>2</sup>-a<sup>2</sup>, tho<sup>2</sup>r-(thor)-in(en)'a<sup>2</sup>. Fr., *thorine*. Thorium oxide. [B.]

**THORIUM** (Lat.), n. n. Thor'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). Fr., t. Ger., *T.* Also written *thoriumum*. A metallic element discovered by Berzelius in 1828. It occurs in certain rare minerals. It has been prepared in the pure state as a gray, lustrous powder of sp. gr. 7.66 to 7.95. In composition it acts as a tetrad. Symbol, Th; atomic weight, 231.5. [B.]

**THORN**, n. Tho<sup>2</sup>rn. A spine; also the genus *Crataegus* and other spiny plants. [a, 35.]—**Leaf t.** A leaf which is contracted into a spine or a petiole which is hardened into a spine after the fall of the blade of the leaf. [a, 35.]—**Purging t.**, **Rhineberry t.** See *RHAMNUS catharticus*.

**THORNAPPLE**, n. Tho<sup>2</sup>rn'a<sup>2</sup>p-l. See *DATURA* and *DATURA stramonium*.

**THOROFLOURIDE**, n. Thor-o-flu<sup>2</sup>'o<sup>2</sup>r-i<sup>2</sup>d(id). A compound of thorium fluoride with the fluoride of another element or radicle. [B, 3.]

**THOROUGHPIN**, n. Thu<sup>2</sup>'ro-pi<sup>2</sup>n. In solipeds, a synovial effusion into a bursa. [L.]

**THOROUGHWORT**, n. Thu<sup>2</sup>'ro-wu<sup>2</sup>rt. See *EUPATORIUM perfoliatum*.

**THORUS** (Lat.), n. m. Thor(tho<sup>2</sup>r)'u<sup>2</sup>s(u<sup>2</sup>s). Gr., *θωρός*. See SEMEN.

**THRÆNINE** (Fr.), n. Tra-nen. See *DACRYOLIN*.

**THRÄNCHEN** (Ger.), n. Tran'ch<sup>2</sup>e<sup>2</sup>n. See *DACRYDIUM* (1st def.).

**THRÄNE** (Ger.), n. Tran'e<sup>2</sup>. See *DACRYON* (1st and 2d def's) and *TEAR*.—**T'nbuch**. See *LACUS lacrimalis*.—**T'neiterfluss**. See *DACRYOPYORRHEA*.—**T'nfstel**. See *LACRYMAL FISTULA*.—**T'n-furche**. 1. See *Lacrymal groove*. 2. The lacrymal furrow of the embryo, subsequently developed into the lacrymal canal.—**T'ngang**. See *Lacrymal CANAL* and *Nasal duct*.—**T'ngeschwulst**. *Dacryoma*. [a, 34.]—**T'ngeschwür**. See *DACRYLOECOSIS*.—**T'n-hügel**. See *Lacrymal CARUNCLE*.—**T'nkanälchen**. See *CANALICULI lacrimales*.—**T'nlicher**. See *PUNCTA lacrimalia*.—**T'n-muskel**. See *Tensor tarsi*.—**T'nrinne**. See *Lacrymal groove*.—**T'n-röhren**. See *CANALICULI lacrimales*.—**T'n-schlauch**. The lacrymal sac.—**T'n-schlauchentzündung**. See *DACRYOCYSTITIS*.—**T'n-schleimfluss**. See *DACRYOLOENORRHEA*.—**T'n-schwamm**. See *MERULIUS lacrimans*.—**T'nsee**. See *LACUS lacrimalis*.—**T'n-stein**. See *Lacrymal CALCULUS*.—**T'nwärrchen**. See *Lacrymal CARUNCLE* and *Lacrymal PAPILLE*.

**THRÄNENDRÜSE** (Ger.), n. Tran'e<sup>2</sup>n-dru<sup>2</sup>s-e<sup>2</sup>. See *Lacry-mal GLAND*.—**T'ngeschwulst**. See *DACRYOPS* and *ENCANTHIS*.—**T'ngrube**. See *Lacrymal FOSSA*.

**THRÄNENSACK** (Ger.), n. Tran'e<sup>2</sup>n-za<sup>2</sup>sk. See *Lacrymal SAC*.—**T'bruch**. See *Lacrymal HERNIA*.—**T'grube**. See *Lacrymal FOSSA*.

**THRASYDEILUS** (Lat.), n. m. Thra<sup>2</sup>s(thra<sup>2</sup>s)-i(u<sup>2</sup>)-dil'(de<sup>2</sup>'i<sup>2</sup>l)-u<sup>2</sup>s(u<sup>2</sup>s). From *θρασύς*, bold, and *δαίλος*, cowardly. Of Aristotle, a physician who employs very energetic drugs, but with very great caution. [A, 322 (a, 48).]

**THREAD**, n. Thre<sup>2</sup>d. Lat., *filum*. Fr., *fil*. Ger., *Faden*. A very slender cord, a filament. [a, 48.]—**Achromatic t's**, **Cell-t's**. See *ACHROMATIC FIBRILS*.—**Central apendymal t.** See *SUBSTANTIA gelatinosa centralis*.—**Chromatic t's**. See *Nuclear FIBRILS*.—**Daughter t's**. See *Daughter NUCLEI*.—**Mycellal t's**. The hyphae of the mycelium. [a, 35.]—**Nucleus-communication-t.** Of Mayer, the t.-like band connecting the two nuclei of a sympathetic-nerve cell whenever there are two. [J, 35.]—**Primary (chromatic, or chromatin) t's**. See *Primary FIBRES*.—**Protoplasma-t's**. Delicate t's or strings of protoplasm, such as those passing from the follicular epithelium through the vitelline membrane in the ova of some fishes. [J, 35.]—**Secondary (chromatic, chromatin, or nuclear) t's**. See *Secondary chromatic FIBRES*.—**T-indicator**. See under *AUXANOMETER*.

**THREPSIS** (Lat.), n. f. Thre<sup>2</sup>ps'i<sup>2</sup>s. Gen., *threps'eos* (-is). Gr., *θρέψις* (from *τρέφω*, to nourish). Nutrition. [L, 50 (a, 14).]

**THREPSOLOGY**, n. Thre<sup>2</sup>ps-o<sup>2</sup>l'o<sup>2</sup>-ji<sup>2</sup>. Lat., *threpsologia* (from *θρέψις*, nutrition, and *λόγος*, understanding). Fr., *threpsologie*. The physiology, etc., of nutrition. [L, 50 (a, 14).]

**THRESHOLD**, n. Thresh'old. See *LIMEN*.

**THRIDACE** (Fr.), n. Tred-a<sup>2</sup>s. See *Extractum LACTUÆ* (2d def.) and *LACTUCARIUM*.—**Sirap de t.** See *Syrupus LACTUCARII*.

**THRIDACIUM** (Lat.), n. n. Thri<sup>2</sup>d-as(a<sup>2</sup>k)'i<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *θρίδαξ*, lettuce. Fr., *thridace*. See *LACTUCARIUM*.

**THRIDAX** (Lat.), n. f. Thri<sup>2</sup>d(thri<sup>2</sup>d)a<sup>2</sup>x(a<sup>2</sup>x). Gen., *thri<sup>2</sup>d'acos* (-acis). Gr., *θρίδαξ*. 1. Of the ancients, lettuce. [a, 35.] 2. See *Extractum LACTUÆ* and *LACTUCARIUM*.—**Syrupus thridacis**. See *Syrupus LACTUCARII*.

**THRIFT**, n. Thri<sup>2</sup>ft. See *ARMERIA vulgaris*.

**THRILL**, n. Thri<sup>2</sup>l. Lat., *fremitus*. Fr., *frémissement*. Ger., *Schwirren*, *Zittern*. A tremor discerned by palpation or auscultation. [a, 34.]—**Aortic t.** A t. heard over the aortic aperture in lesions of the orifice or valves. [a, 34.]—**Arterial t.** A t. perceived over an artery. [a, 34.]—**Hydatid t.** The t. felt by palpation over a hydatid cyst. [a, 34.]—**Mitral t.** A t. discerned over the mitral orifice. [a, 34.]—**Presystolic t.** A t. which can sometimes be felt before the systole when the hand is placed over the position of the apex beat. [a, 34.]—**Purring t.** Ger., *Katzenschnurren*. A rough cardiac t. resembling the purring of a cat; often heard in mitral stenosis. [a, 34.]

**THRIX** (Lat.), n. f. Thri<sup>2</sup>x. Gen., *trich'os*, *trich'is*. Gr., *θρίξ*. See *HAIR*.

**THROAT**, n. Thro<sup>2</sup>t. Gr., *φάρυγξ*. Lat., *gula*, *guttur*, *jugulum*. Fr., *gorge*. Ger., *Schlund*, *Kehle*. 1. The cavity extending from the arch of the palate to the glottis and the superior opening of the œsophagus; also popularly the front of the neck. 2. The gorge or orifice in a gamophyllous corolla or calyx, including any portion between the limb and the proper tube. [a, 35.]—**Sore t.** See the major list.

**THROATWORT**, n. Thro<sup>2</sup>t'wu<sup>2</sup>rt. The genera *Trachelium* and *Liabris*; also species of *Campanula*, the *Digitalis purpurea*, and the *Scrophularia nodosa*. [a, 35.]

**THROBBING**, n. Thro<sup>2</sup>b'i<sup>2</sup>n<sup>2</sup>. Gr., *θρῦγγμός*. A rhythmical beating movement, such as that of an inflamed part. [a, 48.]

**THROMBOARTERITIS** (Lat.), n. f. Thro<sup>2</sup>mb-o(o<sup>2</sup>)-a<sup>2</sup>rt-e<sup>2</sup>r-(ar)'le'y'ti<sup>2</sup>s. Gen., -it'id<sup>2</sup>os (-idis). From *θρόμβος*, a clot, and *ἀρτηρία*, an artery. Arteritis with thrombosis. [a, 34.]

**THROMBOLYMPHANGITIS** (Lat.), n. f. Thro<sup>2</sup>mb-o(o<sup>2</sup>)-li<sup>2</sup>mf(lu<sup>2</sup>mf)-a<sup>2</sup>n(a<sup>2</sup>n<sup>2</sup>)-ji(je<sup>2</sup>'i<sup>2</sup>)-ti<sup>2</sup>s. Gen., -it'id<sup>2</sup>os (-idis). From *θρόμβος*, a clot, *lymphā*, lymph, and *ἀγγεῖον*, a cell. Lymphangitis with thrombosis. [a, 34.]

**THROMBOPHLEBITIS** (Lat.), n. f. Thro<sup>2</sup>mb-o(o<sup>2</sup>)-fle<sup>2</sup>b-i-(e)'ti<sup>2</sup>s. Gen., -it'id<sup>2</sup>os (-idis). From *θρόμβος*, a vein. Phlebitis with thrombosis. [a, 34.]—**T. purulenta**. Suppurative phlebitis with thrombosis. [a, 34.]

**THROMBOSIS** (Lat.), n. f. Thro<sup>2</sup>mb-os'i<sup>2</sup>s. Gen., -os'eos (-is). Gr., *θρόμβωσις* (from *θρομβώσθαι*, to become clotted). Fr., *thrombose*. Ger., *Thrombose*, *Propfbildung*. Clogging of blood-vessels by coagulation of the blood within them.—**Atrophic t.** See *Marasmic t.*—**Cerebral arterial t.** A narrowing of the calibre of an artery in the brain caused by a deposit of fibrin from the blood. [D, 34.]—**Coagulated t.** T. produced by fibrinous coagulation in a vessel. [a, 34.]—**Compression-t.** Ger., *Compressionsthrumbose*. T. due to dilatation of the affected vein as the result of compression between it and the heart. [A, 57.]—**Conglutination t.** Of Eberth and Schimmelbusch, t. in which the clot is formed by the accumulation and fusion of the blood-plates. [a, 34.]—**Dilatation t.** T. due to pouches or dilations in the vessels, from the fact that the peripheral or lateral layers of a flowing current move more slowly, meet with more obstruction, and hence are more favorable to coagulation than the central ones. [D, 3.]—**Embolitic t.** T. following obstruction of a vessel by an embolus. [D, 3.]—**Hæmorrhagic t.** T. which follows hæmorrhages, the coagulum of extravasated blood continuing through the opening into the injured vessel. [D, 3.]—**Lymphatic t.** See *THROMBOLYMPHANGITIS*.—**Marantic t.**, **Marasmic t.** Fr., *thrombose marasmique*. T. due to a very feeble circulation. It commonly affects the crural and iliac veins, the venous plexuses of the pelvis, the cranial sinuses, etc. [D, 3, 4.]—**Placental t.** T. of the uterine veins due to an extension of the physiological t. from the placental site into the substance of the uterus. [A, 57.]—**Plate-t.** Of Eberth and Schimmelbusch, t. produced by a conglutination of blood-plates pre-existing in the blood. ["N. Y. Med. Jour." Aug. 4, 1888, p. 126 (a, 34).]—**Puerperal venous t.** Ger., *puerperale Venenthrombose*, *Metrophlebothrombose*, *Gebärmuttervenenthrombose*. Puerperal t. of the uterine veins.—**Sinus t.** T. of one or more of the sinuses in the petrous portion of the temporal bone. [F.]—**Traumatic t.** 1. T. secondary to concussion or contusion of a part. [a, 17.] 2. See *Placental t.*—**Venous t.** T. of a vein. [a, 34.]

**THROMBOTIC**, adj. Thro<sup>2</sup>mb-o<sup>2</sup>t'i<sup>2</sup>sk. Pertaining to or due to thrombosis. [a, 48.]

**THROMBUS** (Lat.), n. m. Thro<sup>2</sup>mb'u<sup>2</sup>s(u<sup>2</sup>s). Gr., *θρόμβος*. Fr., *thrombe*. Ger., *Thrombe*, *Blutpfropf*. The clot formed in thrombosis. [D, 3.]—**Autochthonous t.**, **Blood-plate t.** See *PLATE THROMBOSIS*.—**Laminated t.** A t. formed in strata or laminae by slow and continuous coagulation, with an intermitting force of condensation.—**Primitive t.** A t. which remains at the place of its formation.—**Progressive t.** A t., usually stratified, which grows continuously into the lumen of the vessel. [D, 3.]—**Pudendal t.** See *T. vulvæ*.—**Red t.** A t. formed by the coagulation of blood which is at rest. It is dark-red or brown in color, and contains few white corpuscles. A t. which is formed from blood in motion contains a larger number of white corpuscles, and may be white, gray, pale-red, or mottled. [D, 48.]—**Secondary t.** 1. A t. following inflammation of the vessels or of the tissues immediately surrounding them. 2. A t. which is continuous between vessels of different kinds (e. g., from capillaries into veins or arteries). [D, 3.]—**T. neonatorum**. See *CEPHALÆMATOMA*.—**T. vaginalis**. Hæma-

toma beneath the mucous membrane of the vagina. [a, 34].—**T. vulvæ.** Hæmatoma of the labium pudendi majus. [a, 34].—**White t.** See under *Red t.*

**THROTTLING**, n.  $\text{Thro}^2\text{t}/\text{li}^2\text{n}^2$ . Choking, strangulation.

**THRUMWORT**, n.  $\text{Thru}^2\text{m}/\text{wu}^2\text{rt}$ . The genus *Actinocarpus*, also the genus *Alisma* and *Amarantus caudatus*. [a, 35.]

**THRUSH**, n.  $\text{Thru}^2\text{sh}$ . 1. See *APHTHE*. 2. In solipeds, a disease of the frog, characterized by a foul-smelling secretion. [L.]—**Milk t.** See *APHTHA infantum*.

**THRYPSIS** (Lat.), n. f.  $\text{Thri}^2\text{ps}/(\text{thru}^2\text{ps})/\text{i}^2\text{s}$ . Gen., *thryps/eos* (-is). Gr.,  $\theta\rho\upsilon\psi\text{is}$ . See *COMMUNION*.

**THRYPTICUS** (Lat.), adj.  $\text{Thri}^2\text{pt}/(\text{thru}^2\text{pt})/\text{i}^2\text{k-n}^2\text{s}(u^2\text{s})$ . Gr.,  $\theta\rho\upsilon\tau\tau\text{ic}\acute{o}\varsigma$ . Fr., *thryptique*. 1. Able to break or crush, especially lithontriptic. 2. Easily broken, fragile. [A, 311, 322 (a, 48).]

**THUIA** (Lat.), n. f.  $\text{Thu}^2(\text{thu}^2)/\text{i}^2\text{a}^2$ . See *THUJA*.

**THUINE** (Fr.), n.  $\text{Tu}^2\text{-e-en}$ . See *THUJIN*.

**THUJA** (Lat.), n. f.  $\text{Thu}^2(\text{thu}^2)/\text{ja}^2(\text{ya}^2)$ . Gr.,  $\theta\upsilon\text{ia}$  (1st def.),  $\theta\upsilon\text{ia}$  (1st def.). Fr., *t. Ger. Lebensbaum* (2d def.). Written also *thia* and, preferably, *thuya*. 1. Of the ancients, an African tree with fragrant wood; according to Schousboe, the *Callitris quadrivalvis*; of the very late Latin authors, probably the *Citrus medica*. 2. Arbor-vitæ; a genus of evergreen trees and shrubs of the *Cupressaceæ*. 3. Of the U. S. and Hung. Ph's, the fresh tops of *T. occidentalis*. [a, 35.]—**Oleum thujæ.** A yellowish-green volatile oil, of camphoraceous odor, obtained from the leaves and twigs of *T. occidentalis*; a mixture of thujol and terpene. [a, 35.]—**Resina thujæ articulata.** Sandarac. [B.]

—**T. articulata.** See *CALLITRIS quadrivalvis*.—**T. gigantea.** California (or British Columbia) cedar, the yellow cypress of northwestern America. [a, 35.]—**T. obtusa, T. occidentalis.** Fr., *t. d'occident, arbre de vie* (ou de *Paradis*), *cèdre américain*. Ger., *gemeiner* (oder *abendländischer*) *Lebensbaum*. American arbor-vitæ, white cedar. The fresh tops (leaves and twigs), the t. of the U. S. Ph., are used in coughs, rheumatism, intermittent fever, etc., as an application to venereal warts, cancerous ulcers, etc., and as an embrocation for rheumatic pains. A saturated tincture is recommended as an emmenagogue and in small-pox, and a distilled water in dropsy. The oil (see *Oleum thujæ*) is anthelmintic. The resinous wood, *lignum arboris vitæ* (see *thujæ*), was formerly used like the tops. [a, 35.]—**T. orientalis.** Chinese or Japanese arbor-vitæ; a species having a pungent aromatic odor.

THUJA OCCIDENTALIS.  
[A, 327.]

The oily seeds are used as a stimulating tonic and purgative, and the young branches furnish a yellow dye. The leaves are used in small-pox like those of *T. occidentalis*. [a, 35.]—**Tinctura thujæ.** A tincture made by macerating 5 parts of t. with 6 of alcohol for eight days [Ger. Ph.]; by digesting 5 parts of t. with 15 of alcohol or three days [Hung. Ph.]; for by macerating 5 parts of dried t. with 50 of dilute alcohol for a week [T. A.]. [B, 95 (a, 38).]

**THUJENE**, n.  $\text{Thuj}^2\text{en}$ . Fr., *thuiène, thujène*. A colorless, acrid fluid,  $\text{C}_{10}\text{H}_{16}$ , obtained by treating oleum thujæ with iodine. [B, 93 (a, 14).]

**THUJETIC ACID**, n.  $\text{Thuj}^2\text{et}/\text{i}^2\text{k}$ . A substance,  $\text{C}_{28}\text{H}_{42}\text{O}_{19}$ , obtained by boiling thujetin with barium water. [B, 93 (a, 14).]

**THUJETIN**, n.  $\text{Thuj}^2\text{et}/\text{i}^2\text{n}$ . Fr., *thuiétine*. Ger., *T.* A decomposition product,  $\text{C}_{14}\text{H}_{14}\text{O}_8$ , of thujin. [B, 270 (a, 38).]

**THUJIGENIN**, n.  $\text{Thuj}^2\text{i}^2\text{g}^2\text{e}^2\text{n}/\text{i}^2\text{n}$ . Fr., *thuigénine*. Ger., *T.* A substance,  $\text{C}_{14}\text{H}_{12}\text{O}_7$ , obtained from the green parts of *Thuja occidentalis* as microscopic acicular crystals. [B, 270 (a, 38).]

**THUJIN**, n.  $\text{Thuj}^2\text{i}^2\text{n}$ . Fr., *thuijine, thujine*. Ger., *T.* A substance,  $\text{C}_{20}\text{H}_{22}\text{O}_{12}$ , obtained from the green parts of *Thuja occidentalis*, and occurring as lemon-yellow microscopic tabular crystals. [B, 270 (a, 38).]

**THUJOL**, n.  $\text{Thuj}^2\text{o}^2\text{l}$ . Fr., *thuiol*. A substance,  $\text{C}_{10}\text{H}_{16}\text{O}$ , forming the chief constituent of the oil of *Thuja occidentalis*, and known in two forms, one a levorotary and the other a dextrorotary liquid. In warm-blooded animals it acts so as to quicken the respiration, raise the blood-pressure, and lower the temperature. [B, 270 (a, 38); "Therap. Gaz.," 1885, p. 827 (a, 50).]

**THUMB**, n.  $\text{Thu}^2\text{m}$ . Gr.,  $\theta\upsilon\text{rv}\acute{\epsilon}\text{p}$ . Lat., *poller*. Fr., *pouce*. Ger., *Daumen*. The digit on the radial side of the hand. It differs from the others in being broader and shorter, in having only two phalanges, and in its metacarpal bone being separately movable. [L.]

**THUMP**, n.  $\text{Thu}^2\text{mp}$ . Palpitation of the heart, especially in horses. [L.]

**THUNBERGIA** (Lat.), n. f.  $\text{Tun-be}^2\text{rg}/\text{i}^2\text{a}^2$ . From *Thunberg*, a Swedish botanist. 1. The genus *Gardenia*. 2. A genus of the *Thunbergia*, or *Thunbergia* (a tribe of the *Acanthaceæ*). [a, 35.]—**T. fragrans.** A native of the East Indies. In the West Indies, where it is cultivated, it is used as an aromatic tonic. [a, 35.]

**THURANGEL** (Ger.), n.  $\text{Tu}^2\text{r}^2\text{a}^2\text{n}^2\text{-e}^2\text{l}$ . See *GINGLYMUS*.

**THÜRE** (Ger.), n.  $\text{Tu}^2\text{r}^2\text{e}^2$ . A door. [L, 46 (a, 21).]—**Flügel't'n.** The valves of a vein.

**THURIFEROUS**, adj.  $\text{Thu}^2\text{r}^2\text{-i}^2\text{f}^2\text{e}^2\text{r-u}^2\text{s}$ . From *thus*, incense, and *ferre*, to bear. Fr., *thurifère*. Producing incense. [a, 48].

**THURM** (Ger.), n. *Turm*. A tower, a spire. [L, 46 (a, 21).]—**T'kopf, T'schädel.** See *OXYCEPHALIA*.

**THUS** (Lat.), n. n.  $\text{Thu}^2\text{s}(\text{thus})$ . Gen., *thur'is*. Gr.,  $\theta\upsilon\text{os}$ . 1. Incense, common frankincense; of the Russ. Ph., *olibanum*. 2. Of the Netherl. Ph., a white, yellow, or reddish resin exuding from the branches of *Pinus silvestris* and *Abies excelsa*. [B, 95 (a, 38); a, 35.]

—**Confectio de thure.** Fr., *confection de l'encens*. Confection of frankincense; a preparation containing 4 parts of prepared coarander-seeds, 3 parts each of white frankincense and nutmegs, 2 parts each of licorice and mastic, 1 part each of cubeb and prepared hartshorn, 8 parts of conserve of red roses, and enough white sugar, made into little balls or lozenges. [L, 94 (a, 21).]—**Cortex thuris.** See *CASCARILLA-bark* and *STORAX-bark*.—**Resina thuris.** See *OLIBANUM*.—**T. americanum.** See *COMMON FRANKINCENSE*.—**T. arabicum.** *Olibanum*. [a, 35.]—**T. libycum.** Gum-ammoniac. [a, 35.]—**T. vulgare.** 1. Common frankincense. [a, 35.] 2. See *OLIBANUM silvestre* (1st def.).

**THUYA** (Lat.), n. f.  $\text{Thu}^2(\text{thu}^2)/\text{ya}^2$ . See *THUJA*.

**THYLACIITIS** (Lat.), n. f.  $\text{Thil}^2(\text{thu}^2\text{i})/\text{-a}^2\text{s}(\text{a}^2\text{k})/\text{i}^2\text{-e}^2(\text{i}^2\text{s})/\text{ti}^2\text{s}$ . Gen., *-it'idis* (-idis). From  $\theta\upsilon\lambda\acute{\alpha}\text{ci}\text{o}\nu$ , a little bag. See *ACNE* (1st def.).

**THYLLE** (Ger.), n.  $\text{Tu}^2\text{l}/\text{le}^2$ . See *TYLOSIS*.

**THYM** (Fr.), n.  $\text{Ta}^2\text{n}^2$ . 1. See *THYMUS*. 2. Of the Fr. Cod., see *THYMUS vulgaris*.—**Eau distillée de t.** [Fr. Cod.] A preparation made by distilling the fresh flowering tops of thyme with water. [B, 95 (a, 38).]—**Essence de t., Huile volatile de t.** See *Oil of THYME*.—**T. de Candie, T. de Dioscoride, T. des anciens.** See *THYMUS creticus*.

**THYMA** (Lat.), n. n.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{a}^2$ . Gen., *thym'atos* (-atis). A corruption of *ecthyma* (q. v.) and of *thymion* (q. v.).

**THYMASTHMA** (Lat.), n. n.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{-a}^2\text{sth}^2(\text{a}^2\text{sth})/\text{ma}^2$ . Gen., *-asth'matos* (-atis). From  $\theta\upsilon\mu\text{o}\varsigma$ , the thymus gland, and  $\acute{\alpha}\sigma\theta\mu\alpha$ , asthma. See *THYMIC ASTHMA*.

**THYMATE**, n.  $\text{Tim}^2/\text{at}$ . A derivative of thymol in which a metallic base replaces the hydrogen in its molecule of hydroxyl. [B.]

**THYME**, n. *Tim*. 1. The genus *Thymus*, especially *Thymus vulgaris*. [a, 35.] 2. See *THYMUS* (4th def.).—**Camphor of t.** *Thymol*. [a, 35.]—**Essence of t.** See *Oil of t.*—**Ground-t.** See *THYMUS serpyllum*.—**Lemon-t.** See *THYMUS citriodorus*.—**Oil of t.** Lat., *atheroleum* (see *oleum* [U. S. Ph., Ger. Ph., Netherl. Ph., Russ. Ph., Swiss Ph.], seu *essentia* [Belg. Ph.]) *thymi* [Dan. Ph., Norw. Ph., Swed. Ph.]. Fr., *huile volatile de thym* [Fr. Cod.]. Ger., *Thymianöl*. Sp., *esencia de tomillo* [Sp. Ph.]. An essential oil, of sp. gr. about 0.880, readily soluble in alcohol, obtained from *Thymus vulgaris*. It is deep-redish brown after one distillation (red oil of t.), but becomes colorless (white oil of t.) if re-distilled. It consists of thymol and a mixture of cymene and thymene. It is antiseptic and stimulating, and is recommended in depression or collapse. Its chief use is as an external stimulant in veterinary medicine. [a, 35.]—**Water-t.** See *ANACHARIS alinastrum* and *FONTALIS antipyretica*.—**Wild t.** See *THYMUS serpyllum*.

**THYMELEA** (Lat.), n. f.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{-e}^2\text{l-e}^2(\text{a}^2\text{e}^2\text{-a}^2)$ . From  $\theta\upsilon\mu\text{o}\varsigma$ , thyme, and  $\acute{\epsilon}\lambda\alpha\iota\alpha$ , the olive-tree. Fr., *thymélée*. 1. The *Daphne t.* 2. A genus of plants of the *Thymelacææ*, or *Thymelacææ*, which are an order of dicotyledons including *Daphne*, *Dicra*, *Aquilaria*, etc. The *Thymelacææ* of Reichenbach are a family of the *Ambigua*, including the *Darwinia*, *Daphnea*, and *Aquilaria*. The *Thymelacææ* are: Of Adanson, a family including genera (*Eriocaulon*, *Conocarpus*, *Sanamunda*, etc.) now referred to various orders; of Jussieu, the *Thymelacææ*; of Endlicher, a class of apetalous *Acrampthibrya* consisting of the *Monimiaceæ*, *Laurineæ*, *Gyrocarpeæ*, *Santalacææ*, *Daphnoideæ*, etc. The *Thymelacææ* are the *Thymelacææ*. The *Thymelacææ* are: Of Link, the *Daphnoideæ*; of Endlicher, a tribe of the *Daphnoideæ* consisting of the *Passerineæ* and *Daphneæ*. The *Thymelacææ* are the *Thymelacææ*. [a, 35.]—**Cortex thymelacæ.** The bark of *Daphne mezereum* and *Daphne gnidium*. [a, 35.]—**Semen thymelacæ.** The dried fruits of *Daphne gnidium*. [a, 35.]—**T. cneorum.** See *DAPHNE cneorum*.—**T. mezereum.** See *DAPHNE mezereum*.

**THYMELCOSIS** (Lat.), n. f.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{-e}^2\text{l-k-os}^2/\text{i}^2\text{s}$ . From  $\theta\upsilon\mu\text{o}\varsigma$ , the thymus gland, and  $\acute{\epsilon}\lambda\alpha\kappa\text{u}\text{o}\varsigma$ , ulceration. Ulceration of the thymus gland. [L, 50 (a, 48).]

**THYMÉLÉE** (Fr.), n. *Te-ma-la*. See *THYMELEA* and *MEZEREUM* (3d def.).

**THYMENE**, n.  $\text{Tim}^2/\text{en}$ . Fr., *thymène*. Ger., *Thymen*. A levorotary liquid,  $\text{C}_{10}\text{H}_{16}$ , found in oil of thyme. [B, 93 (a, 14).]

**THYMHYDROQUINONE**, n.  $\text{Thim-hid-ro-kw}^2\text{i}^2\text{on}^2$ . Fr., *thymhydroquinone*. Ger., *Thymhydrochinon*. A substance,  $\text{C}_{14}\text{H}_{12}(\text{H}_2\text{C}_2\text{H}_4)_2(\text{OH})_2$ , obtained by the reduction of thymoquinone and bearing the same relation to that body that hydroquinone bears to quinone. [B, 93 (a, 14).]—**Dimethylether of t.** See *DMETHYLTHYMHYDROQUINONE*.

**THYMIAMA** (Lat.), n. n.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{-i}^2\text{-a}^2\text{m}^2(\text{a}^2\text{m})/\text{a}^2$ . Gen., *-am'atos* (-atis). Gr.,  $\theta\upsilon\mu\acute{\alpha}\mu\alpha$  (from  $\theta\upsilon\mu\acute{\alpha}\nu$ , to burn incense). Anything burned as incense or for fumigation. [A, 311 (a, 48).]—**Cortex thymiatis.** See *STORAX bark*.

**THYMIAN** (Ger.), n.  $\text{Tu}^2\text{m-e-a}^2\text{n}^2$ . See *THYMUS* and *THYMUS vulgaris*.—**T'öl.** See *Oil of THYME*.

**THYMIASIS** (Lat.), n. f.  $\text{Thim}^2(\text{thu}^2\text{m})/\text{-i}^2\text{-a}^2(\text{a}^2\text{s})/\text{si}^2\text{s}$ . Gen., *-as'eos* (-is). Gr.,  $\theta\upsilon\mu\acute{\alpha}\text{i}\text{o}\varsigma$  (from  $\theta\upsilon\mu\acute{\alpha}\nu$ , to burn incense). Fr., *thymiasie*. Fumigation. [L, 50 (a, 14).]

**THYMIC**, adj.  $\text{Thim}^2/\text{i}^2\text{k}$ . Lat., *thymicus* (from  $\theta\upsilon\mu\text{o}\varsigma$ , the thymus gland). Fr., *thymique*. Pertaining to the thymus or dependent on disease of the thymus (e. g., *t. asthma*).

**THYMIC ACID**, n. Tim<sup>12</sup>k. See THYMOL.

**THYMOCYANOTICUS** (Lat.), adj. Thi<sup>2m</sup>(thu<sup>6m</sup>)<sup>12</sup>k-o(o<sup>3</sup>)-si(ku<sup>6</sup>)-a<sup>2n</sup>(a<sup>2n</sup>)-o<sup>2</sup>(ot)<sup>12</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). From *thymos*, the thymus gland, and *cyanosis*, cyanosis. Dependent on disease of the thymus gland and accompanied by cyanosis. See *ASTHMA thymico-cyanoticum*.

**THYMINE**, n. Thim<sup>1en</sup>. See LEUCINE.

**THYMION**, n. Thi<sup>2m</sup>(thu<sup>6m</sup>)<sup>12</sup>-o<sup>2n</sup>. Gr., *θύμιον* (from *θύμος*, thyme). 1. A large wart. 2. Of Celsus, a little wart (*condyloma* or *verruca*) that projects considerably above the skin, has a slender base, and is colored at the top like the blossom of thyme (cf. MYMECLA, 2d def.). It splits up easily, is raw, and readily bleeds. The worst forms occur about the genitals. [G, 8, 13.]

**THYMIOSIS** (Lat.), n. f. Thim(thu<sup>6m</sup>)<sup>12</sup>-os<sup>12</sup>i<sup>2</sup>s. Gen., -os<sup>12</sup>eos (-is). From *thymos*, a warty excrescence. 1. Of Swediaur, see FRAMBESIA (2d def.). 2. Any fungiform or warty growth. The *Thymioses* of Fuchs are a family of the specific *Dermatopostases*, including frambosia, radesyge, and contagious anthrax. [G, 5.]—**T. fungoides**. See FRAMBESIA (2d def.).—**T. morus**. See *CONDYLOMA latum*.—**T. rubroides**. See FRAMBESIA (2d def.).—**T. scotica**. See SIBBENS.

**THYMITIS** (Lat.), n. f. Thim(thu<sup>6m</sup>)<sup>12</sup>-i(e)<sup>12</sup>i<sup>2</sup>s. Gen., -it<sup>12</sup>idos (-idis). Ger., *Thymusentzündung*. Inflammation of the thymus gland. [L, 50 (a, 14).]

**THYMIUM** (Lat.), n. n. Thi<sup>2m</sup>(thu<sup>6m</sup>)<sup>12</sup>-u<sup>3</sup>m(u<sup>4</sup>m). See THYMION.

**THYMOILE** (Fr.), n. Te-mo-el. Of Lallemand, thymoquinone. [B, 3 (a, 38).]

**THYMOILOL** (Fr.), n. Te-mo-e-lol. 1. Of Lallemand, thymoquinol. [B, 3 (a, 38).] 2. Of Dechambre, thymhydroquinone. [B, 93 (a, 14).]

**THYMOL**, n. Tim<sup>1o2l</sup>. Lat., *thymolum*, *acidum thymicum*. Fr., t. Ger., T. Propylmethylphenol. C<sub>10</sub>H<sub>14</sub>O = C<sub>6</sub>H<sub>5</sub>(C<sub>3</sub>H<sub>7</sub>)(CH<sub>3</sub>)-OH, structurally probably C<sub>6</sub>(H<sub>5</sub>)(H<sub>3</sub>C)(H<sub>3</sub>C)(OH)(CH<sub>3</sub>)(CH<sub>3</sub>). It is isomeric with carvacrol, and is derived from oil of thyme, though most of the t. of commerce is said to be obtained from the fruit of *Carum ajowan*. It forms colorless hexagonal crystals of aromatic odor and pungent taste, soluble with great difficulty in water (in from 1,200 to 900 parts), readily soluble in alcohol, in ether, and in chloroform. It melts at 50° C. and after fusion frequently remains liquid even when cooled considerably below this point. Like carboic acid, it forms compounds with metallic bases, called *thymates*. It possesses marked antiseptic properties, and is used in medicine both internally and locally. [B, 3 (a, 38); B, 4, 5.]—**T. quacksilber** (Ger.). An unstable substance, C<sub>10</sub>H<sub>12</sub>HgOH, occurring as a blue-green precipitate. Recommended by Neisser in syphilis. [B, 270 (a, 38).] See MERCURY thymolate.

**THYMOPTHY**, n. Thim-o<sup>2</sup>p<sup>2</sup>a<sup>2</sup>th-i<sup>2</sup>. Lat., *thymopathia* (from *thymos*, the spirit, and *πάθος*, a disease). Fr., *thymopathie*. Any mental affection or derangement. [a, 34.]

**THYMOQUINHYDRONE**, n. Thim-o-kwi<sup>12n</sup>-hid<sup>12</sup>ron. Fr., t., *thyméide*. A substance, C<sub>20</sub>H<sub>24</sub>O<sub>4</sub> = C<sub>5</sub>H<sub>7</sub>.C<sub>5</sub>H<sub>7</sub>(OH)<sub>2</sub>.CH<sub>3</sub> + C<sub>5</sub>H<sub>7</sub>.C<sub>5</sub>H<sub>7</sub>(OH)<sub>2</sub>.CH<sub>3</sub>, occurring as shining black or dark-violet acicular crystals. [B, 3, 93 (a, 14, 38).]

**THYMOQUINOL**, n. Thim-o-kwi<sup>12n</sup>-o<sup>2l</sup>. A substance, C<sub>5</sub>H<sub>7</sub>.C<sub>5</sub>H<sub>7</sub>(OH)<sub>2</sub>.CH<sub>3</sub> = C<sub>10</sub>H<sub>14</sub>O<sub>4</sub>, occurring as colorless prismatic crystals. [B, 3 (a, 38).]

**THYMOQUINONE**, n. Thim-o-kwi<sup>12n</sup>-on. Fr., t., *thyméole*. Ger., *Thymochinon*. A substance bearing the same relation to thymol that quinone bears to phenol; a yellow crystalline body, C<sub>10</sub>H<sub>12</sub>O<sub>2</sub>, of pungent odor. [B, 4.]

**THYMOIC ACID**, n. Thim-o<sup>2</sup>t<sup>12</sup>k. Ger., *Thymotinsäure*. An acid, C<sub>6</sub>H<sub>5</sub>(OH)(C<sub>3</sub>H<sub>7</sub>)(CH<sub>3</sub>)(CO.OH) = C<sub>6</sub>(C<sub>3</sub>H<sub>7</sub>)(OH)(CO.OH)(CH<sub>3</sub>)(H<sub>3</sub>), occurring as silky crystals. [B, 3 (a, 38).]

**THYMOXYCUMINIC ACID**, n. Thim-o<sup>2</sup>x-i<sup>2</sup>-ku<sup>2</sup>-mi<sup>12n</sup>-i<sup>2</sup>k. Of Barth, metahydroxycuminic acid. See HYDROXYCUMINIC ACID.

**THYMU** (Lat.), n. n. Thim(thu<sup>6m</sup>)<sup>12</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Gr., *θύμος*. The *Thymus vulgaris*; of the ancients, *Thymus creticus*. [a, 35.]

**THYMUS** (Lat.), n. m. Thim(thu<sup>6m</sup>)<sup>12</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *θύμος*, *θύμων*. Fr., *thym*. Ger., *Thymian*. 1. Of the ancients, *T. creticus*. 2. Thyme, a genus of the *Labiatae*; also *T. vulgaris*. [a, 35.] 3. See T. GLAND. 4. *Condyloma acuminatum*; so called because of a fancied resemblance to the flower of thyme (cf. THYMION). [G.]—**Accessory t.** Ger., *Nebent*. One of the lobules frequently met with belonging to the t. gland, but isolated from the mass of the organ. [L, 87 (a, 50).]—**Aetheroleum thymi**. See OIL OF THYME.—**Alcohol thymi**. See *Spiritus thymi* (2d def.).—**Essentia thymi**. See OIL OF THYME.—**Herba thymi**. Fr., *thym*. Sp., *tomillo*. See under *T. vulgaris*.—**Oleum thymi**. See OIL OF THYME.—**Spiritus thymi**. A preparation made by dissolving 1 part of oil of thyme in 99 parts of 80-per-cent. alcohol (Belg. Ph.), or by distilling 1 part of thyme with 3 parts each of water and alcohol so as to obtain 4 parts (Swiss Ph.). [B, 95 (a, 38).]—**T. albus**. See *T. creticus*.—**T. alpinus**. Ger., *Alpen-Quendel* (1st def.), *Thymian* (1st def.). 1. Alpine thyme of Europe; an aromatic undershrub. The leafy twigs (*herba clinopodii montani*) are used like those of *T. serpyllum*. 2. The *Calamintha acinos*. [a, 35.]—**T. citriodorus**. Lemon-thyme; an aromatic lemon-scented variety of *T. serpyllum*; used as a condiment and stimulant. [a, 35.]—**T. creticus**. Fr., *thyme de Candie* (ou de Crête, ou des anciens, ou de Dioscoride [all 1st def.]). Ger., *Königlicher Thymian* (1st def.). 1. The *θύμος* and *θύμων* of the ancients; a pungent, fragrant shrub of Mediterranean regions, formerly official as *herba thymi cretica*, seu *albi*, seu *capiti*, seu *veri*, and still used in southern Europe as an aromatic. 2. The *Satureia thymbra*. [a, 35.]—**T. mastichina**. Ger., *Mastir-Thymian*. Herb-mastic; a shrub of southern Europe and northern Africa, having an odor like that of mastic; still used like garden thyme under the name of *herba mastichina* (seu *mastichina*

*Gallorum*, seu *mari*, seu *mari vulgaris*). [a, 35.]—**T. pannonicus**. Ger., *ungarischer Thymian*. An undershrub of southern and central Europe, considered by Koch a variety of *T. serpyllum*, like which it is used. [a, 35.]—**T. serpyllum**, *T. serpyllum*. Fr., *thym serpolet* (ou sauvage), *pillolet*. Ger., *Feld-Thymian*, *Quendel*, *Hühnerklee*, *Kundelkraut*, *Feldkümmel*, *Kümmelkraut*. Mother-of-thyme, hill-wort, pellamountain, serpolet-oil plant, wild thyme of Europe and northern Asia. The flowering leafy branches,

THYMUS SERPYLLUM. [A, 327.]

*herba serpylli* (minoris, seu silvestris, seu vulgaris), *herba satorejæ agrestis*, contain an essential oil, bitter extractive, tannin, etc., and are used as an external stimulant, and internally in whooping-cough. They also form a part of the *species aromatica*, species *ad fomentum*, and *syrupus ipecacuanhæ compositus*. [a, 35.]—**T. tragoriganum**. Ger., *wohlriechender Thymian*. The *τραγορίανος* of Dioscorides, goat's-morjoram; an aromatic shrub of Greece and the Grecian islands. [a, 35.]—**T. verus**. See *T. creticus*.—**T. vulgaris**. Fr., *thym* (commun), *mignotise des Genevois*, *tin*, *pouilleux*. Ger., *dichter* (oder *Garten*-) *Thymian*, *römischer* (oder *welscher*) *Quendel*, *Bienenkraut*, *Immenkraut*, *Demuthkraut*. Sp., *tomillo* [Mex. Ph.]. Common thyme; a highly aromatic undershrub indigenous to southern Europe, often cultivated as a condiment. The leafy and flowering branches, *herba thymi* (seu *vulgaris*, seu *hortensis*), *herba serpylli romani*, are used like those of *T. serpyllum*, and furnish oil of thyme. [a, 35.]

**THYREADENOSCIRRHUS** (Lat.), n. m. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-a<sup>2d</sup>(a<sup>2d</sup>)-e<sup>2n</sup>-o(o<sup>3</sup>)-si<sup>2r</sup>(ski<sup>2r</sup>)<sup>2r</sup>/ru<sup>3</sup>s(ru<sup>3</sup>s). For deriv., see THYREOID, ADEX, and SCIRRHUS. Fr., *thyreadenosquirrhe*. Scirrhus of the thyroid gland. [L, 50 (a, 14).]

**THYRÉAL** (Fr.), n. Te-ra-a<sup>2l</sup>. Of G. St.-Hilaire, the hypobranchial bone in fishes. [L, 14.]

**THYREARYTENODES** (Lat.), adj. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-a<sup>2r</sup>(a<sup>2r</sup>)<sup>12</sup>-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2n</sup>(ta<sup>3</sup>-e<sup>2n</sup>)-od<sup>12</sup>e<sup>2</sup>(as). Pertaining to the arytenoid and thyroid cartilages. [L, 50 (a, 14).]

**THYREICHTHYOSIS** (Lat.), n. f. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-i<sup>2</sup>k(i<sup>2</sup>ch<sup>2</sup>)-thi<sup>2</sup>(thu<sup>6</sup>)-os<sup>12</sup>i<sup>2</sup>s. Gen., -os<sup>12</sup>eos (-is). From *θύρεξ*, an oblong shield, and *ἰχθύωσις*, ichthyosis. See ICHTHYOSIS *scutellata*.

**THYREMPHRAXIS** (Lat.), n. f. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-m-fra<sup>2x</sup>-(fra<sup>2x</sup>)<sup>12</sup>i<sup>2</sup>s. Gen., -phrax<sup>2</sup>eos (-is). For deriv., see THYREOID and EMPHRAXIS. See GOITRE.

**THYREOADEN** (Lat.), n. m. and f. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-o(o<sup>2</sup>)<sup>12</sup>-a<sup>2d</sup>-(a<sup>2d</sup>)-e<sup>2n</sup>(an). Gen., -ad<sup>12</sup>anos (-is). From *θύρεαδής*, thyroid, and *αδών*, gland. See THYREOID GLAND.

**THYREOADENITIS** (Lat.), n. f. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-o(o<sup>2</sup>)<sup>12</sup>-a<sup>2d</sup>-(a<sup>2d</sup>)-e<sup>2n</sup>-i(e)<sup>12</sup>i<sup>2</sup>s. Gen., -it<sup>12</sup>idos (-idis). See THYREITIS.

**THYREO-ADENOIDEUS** (Lat.), n. m. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-o(o<sup>2</sup>)<sup>12</sup>-a<sup>2d</sup>-(a<sup>2d</sup>)-e<sup>2n</sup>-o(o<sup>2</sup>)<sup>12</sup>-i<sup>2</sup>d(ed)-e<sup>2</sup>(a<sup>2</sup>)<sup>12</sup>-u<sup>3</sup>s(u<sup>3</sup>s). For deriv., see THYREOID and ADENOID. Fr., *thyreo-adoïdien*. A fasciculus of the inferior constrictor of the pharynx inserted on the side of the thyroid gland. [Winslow (L).]

**THYREO-ARY-EPIGLOTTICUS** (Lat.), **THYREO-ARY-TENO-EPIGLOTTICUS** (Lat.), **THYREO-ARY-TENO-EPIGLOTTIDEUS** (Lat.), n. m. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-o(o<sup>2</sup>)<sup>12</sup>-a<sup>2r</sup>(a<sup>2r</sup>)<sup>12</sup>-i<sup>2</sup>(u<sup>6</sup>)-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glot)/i<sup>2</sup>2k-u<sup>3</sup>s(u<sup>3</sup>s), -a<sup>2r</sup>(a<sup>2r</sup>)<sup>12</sup>-i<sup>2</sup>(u<sup>6</sup>)-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glot)/i<sup>2</sup>2k-u<sup>3</sup>s(u<sup>3</sup>s), -ten<sup>12</sup>((ta<sup>3</sup>-e<sup>2n</sup>)-o(o<sup>2</sup>)-e<sup>2</sup>p-i<sup>2</sup>-glo<sup>2</sup>t(glot)-i<sup>2</sup>d(ed)-e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s)). Ger., *Schildgiessbeckenkehldackelmuskel*. The thyreo-epiglottideus and the aryteno-epiglottideus regarded as one muscle. [L, 31.]

**THYREO-ARYTÆNOID**, adj. Thi<sup>2r</sup>-e<sup>2</sup>-o-a<sup>2r</sup>-i<sup>2</sup>-ten<sup>12</sup>-oid. Pertaining to the thyreoid and arytenoid cartilages. [C.]

**THYREO-ARYTÆNOIDEUS** (Lat.), n. m. Thi<sup>2r</sup>(thu<sup>6r</sup>)<sup>12</sup>-e<sup>2</sup>-o(o<sup>2</sup>)<sup>12</sup>-a<sup>2r</sup>(a<sup>2r</sup>)<sup>12</sup>-i<sup>2</sup>(u<sup>6</sup>)-te<sup>2n</sup>(ta<sup>3</sup>-e<sup>2n</sup>)-o(o<sup>2</sup>)<sup>12</sup>-i<sup>2</sup>d(ed)-e<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *thyreo-aryténoidien*. Ger., *Schildgiessbeckenmuskel*. The t.-a. internus and the t.-a. externus regarded as one muscle. [L.]—**T.-a. ascendens**. See *T.-a. inferior*.—**T.-a. descendens**. See *T.-a. superior*.—**T.-a. externus**. A muscle arising from the inner surface of the thyreoid cartilage close to the t.-a. internus and the cricothyreoid membrane and inserted into the border of the arytenoid cartilage, its muscular process, the aryteno-epiglottidean fold, and the false vocal band, some fibres passing up toward the epiglottis. [L, 31, 142, 332.]—**T.-a. inferior**. 1. The oblique fibres of the t.-a. 2. See *T.-a. internus*. Ger., *Stimmbandmuskel*. A muscle which arises from the inner surface of the ala of the thyreoid cartilage and the interior of the false vocal cord and is inserted into the false vocal cord and the vocal process of the arytenoid cartilage. [L, 31, 142, 332.]—**T.-a. major**. See *T.-a. minor*.—**T.-a. superior**.—**T.-a. obliquus**. The portion of the thyreo-aryteno-epiglottideus inserted into the posterior portion of the muscular process of the arytenoid cartilage. [L, 31.]—**T.-a. superior**. Ger., *oberer Schildgiessbeckenmuskel*. The portion of the t.-a. externus inserted into the muscular process of the arytenoid cartilage. [L, 31.]—**T.-a. superior lateralis**. See *T.-a. superior*.—**T.-a. superior medialis**. Ger., *Taschenbandmuskel*. The portion of the t.-a. externus extending between the border of the arytenoid cartilage and the false vocal band. [L, 332.]

**THYROCCELE** (Lat.), n. f. *Thi²r(thu⁴r)-e²-o(o³)-se(ka)⁴le(la)⁴*; in Eng., *thy²r-e²-o-sel*. Gen., *-cel⁴es*. From *thyroceid⁴s*, thyreoid, and *κῆλη*, a tumor. Fr., *thyrocecle*. Ger., *Kehlbuch*. A tumor of the thyreoid gland, especially a goitre. [E.]

**THYROCORNICULATUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-ko²rn-i²k-u²l(u⁴l)-at(a³t)/u²s(u⁴s)*. An anomalous insertion of fibres of the thyreoid-arytænoideus into the cartilage of Santorini. [L, 332.]

**THYROCICRIPHARYNGEUS** (Lat.), n. m. *Thi²r(thu⁴r)/-e²-o(o³)-kri(kri²)-ko(ko³)-fa²r(fa²r)-i²n(u⁴n²)/je²(ge²)-u²s(u⁴s)*. See *CRICOPHARYNGEUS*.

**THYROCUNEIFORMIS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-ku²n(ku⁴n)-e²-i²-fo²rm(i⁴s)*. An anomalous insertion of the fibres of the thyreoid-arytænoideus into the cartilage of Wrisberg. [L, 332.]

**THYREODEOCYNANCHE** (Lat.), **THYREODITIS** (Lat.), n's f. *Thi²r(thu⁴r)-e²-od⁴(e²-o(o³)-si²n(ku⁴n)-a²n²k(a³n²ch²)/e(a), -o³d(iod)-o(i)/ti²s*. Gen., *-anch⁴es*, *-idi⁴dos (-idis)*. From *thyroceid⁴s*, thyreoid, and *κυνάχη*, cynanche. See *THYREODITIS*.

**THYREO-EPIGLOTTIC**, adj. *Thi²r-e²-o-e³p-i²-glo²t(i⁴k)*. Pertaining to the epiglottis and the thyreoid gland or cartilage.

**THYREO-EPIGLOTTICUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-e³p-i²-glo²t(glot)/ti²k-u²s(u⁴s)*. Ger., *Schildkehldeckelmuskel*. See *THYREO-EPIGLOTTIDEUS*.—**T.-e. longus**. An anomalous muscle arising from the inner surface of the thyreoid cartilage near its inferior cornu and blending with the t.-e. [L, 332.]

**THYREO-EPIGLOTTIDEUS** (Lat.), n. m. *Thi²r(thu⁴r)/-e²-o(o³)-e³p-i²-glo²t(glot)-ti²d⁴(e²-u²s(u⁴s))*. A few fibres on the upper edge of the thyreoid-arytænoideus which are spread out upon the membrane between the epiglottis and the arytenoid cartilage. [Douglas (L).]—**T.-e. inferior**, **T.-e. major**. See *T.-e.*—**T.-e. minor**, **T.-e. superior**. An anomalous muscle arising from the thyreoid cartilage and passing along the thyreoid-epiglottic ligament to the epiglottis. [L, 31.]

**THYREO-GLOTTIDEUS** [Couses] (Lat.), n. m. *Thi²r(thu⁴r)/-e²-o(o³)-glo²t(glot)-ti²d⁴(e²-u²s(u⁴s))*. See *THYREO-EPIGLOTTIDEUS*.

**THYREO-HYAL**, n. *Thi²r-e²-o-hi⁴al*. Pertaining to the hyoid bone and the thyreoid cartilage; as a n., see *T.-h. bone*.

**THYREO-HYOIDEUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-hi(hu⁴)-o(o³)-i²d⁴(e²)-u²s(u⁴s)*. Fr., *thyro-hyoïdien*. Ger., *Schildzungenmuskel*. A flat quadrangular muscle arising from the outer surface of the thyreoid cartilage and inserted into the lower margin of the body and the cornu majus of the hyoid bone. [L, 332.]—**T.-h. accessorius**. An anomalous muscle extending between the superior cornu of the thyreoid cartilage and the greater cornu of the hyoid bone. [L, 332.]—**T.-h. azygos**, **T.-h. minor**, **T.-h. superior**. An anomalous offshoot of the t.-h. extending between the greater cornu of the hyoid bone and the upper margin of the thyreoid cartilage. [L, 332.]

**THYREOID**, adj. *Thi²r-e²-oid*. Gr., *thyroceid⁴s* (from *thyro⁴s*, an oblong [door-shaped or doorstone-shaped] shield, and *είδος*, resemblance). Fr., *thyroïde*, *thyroïdien*. Ger., *thyreoidisch*. Pertaining to, connected with, or derived from the t. gland; as a n. (Lat., *thyreoides*), the gland itself. [a, 17.]

**THYREODECTOMY**, n. *Thi²r-e²-oid-e²kt⁴om-i²*. Lat., *thyreoidectomia* (from *thyroceid⁴s*, thyreoid, and *ἐκτομή*, a cutting out). Fr., *thyroïdectomie*. Ger., *Thyreoidektomie*. Removal of the thyreoid gland. [E.]

**THYREOIDEA** (Lat.), n. f. *Thi²r(thu⁴r)-e²-o(o³)-i²d⁴(ed)/e²-a²*. See *THYREOID GLAND*.

**THYREOIDEUS** (Lat.), adj. *Thi²r(thu⁴r)-e²-o(o³)-i²d⁴(ed)/e²-u²s(u⁴s)*. See *THYREOID*; as a n. m., a muscle connected with the thyreoid cartilage. [L.]—**T. incisura cartilaginis thyroideae mediae transversae**. See *T. transversus*.—**T. incisura mediae obliquae**. See *T. transversus impar* (1st def.).—**T. internus**. See *SCNTHYREOIDEUS*.—**T. proprius**. A muscle extending near the middle line between the upper and lower margins of the thyreoid cartilage. [L, 332.]—**T. transversus (anomalus)**. An anomalous muscle extending between the two cricoid processes of the thyreoid cartilage. [L, 332.]—**T. transversus impar**. 1. An aberrant bundle of the cricothyroideus attached to the cricoid process of the thyreoid cartilage. [L, 332.] 2. See *T. transversus*.

**THYREODITIS** (Lat.), n. f. *Thi²r(thu⁴r)-e²-o(o³)-i²d⁴(ed)-i(e⁴)-ti²s*. Gen., *-idi⁴dos (-idis)*. See *THYREODITIS*.

**THYREODOPRIVUS** (Lat.), adj. *Thi²r(thu⁴r)-e²-o(o³)-i²d⁴(ed)-o(o³)-pri⁴pre/vu²s(wu⁴s)*. From *thyroideus*, thyreoid, and *privus*, deprived of. See *STRUMPRIVUS*.

**THYREODOTOMY**, n. *Thi²r-e²-oid-o²t⁴om-i²*. See *THYREODOTOMY*.

**THYREODITIS** (Lat.), n. f. *Thi²r(thu⁴r)-e²-o(o³)-i(e⁴)/ti²s*. Gen., *-idi⁴dos (-idis)*. From *thyroceid⁴s*, thyreoid. Fr., *thyroïdite*. Ger., *Schilddrüsenentzündung*. Inflammation of the thyreoid gland.

**THYREOMEMBRANOSUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-me²m-bran⁴a(n⁴)-o²s(u⁴s)*. The portion of the thyreoid-epiglottic inserted into the aryteno-epiglottic fold. [L, 31.]

**THYREONCUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o²n²k(u⁴s)*. From *thyroceid⁴s*, thyreoid, and *ὄγκος*, a tumor. Fr., *thyroncne*. See *GOITRE*.

**THYREO-ŒSOPHAGEUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-e²s(o²)-e²s(o²)-a²j(u⁴j)-a²g⁴(e²-u²s(u⁴s))*. Muscular fibres between the œsophagus and the thyreoid cartilage. [L, 332.]

**THYREOPALATINUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-pa²l-(pa²l)-a²tu²n(u⁴n)-u²s(u⁴s)*. From *thyroideus*, thyreoid, and *palatum*, the palate. See *CONSTRUCTOR isthmi faucium posterior*.

**THYREOPHARYNGEUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-fa²r(fa²r)-i²n(u⁴n²)/je²(ge²)-u²s(u⁴s)*. From *thyroceid⁴s*, thyreoid, and *φάρυγξ*, the pharynx. Fr., *thyro-pharyngien*. Ger., *Schlundschleisser*. 1. Of Douglas, that portion of the inferior constrictor

of the pharynx that arises from the thyreoid cartilage. [L.] 2. Of Winslow and Valsalva, see *Inferior constrictor of the pharynx*. 3. See *Middle constrictor of the pharynx*.

**THYREOPHARYNGOPALATINUS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-fa²r(fa²r)-i²n(u⁴n²)/je²(ge²)-o(o³)-pal(pal²)-a²t(a³t)-in(en⁴)-u²s(u⁴s)*. From *thyroceid⁴s*, thyreoid, *φάρυγξ*, the pharynx, and *palatum*, the palate. See *PALATO-PHARYNGEUS*.

**THYREOPHRAXIA** (Lat.), n. f. *Thi²r(thu⁴r)-e²-o(o³)-fra²x-(fra²x)/i²-a²*. From *thyroceid⁴s*, thyreoid, and *φράσσειν*, to fence in. Fr., *thyrophraxie*. Of Alibert, see *GOITRE*.

**THYREOPHYMA** (Lat.), n. n. *Thi²r(thu⁴r)-e²-o(o³)-fim-(fu⁴m)/a²*. Gen., *-phym⁴atos (-atis)*. From *thyroceid⁴s*, thyreoid, and *φύμα*, a growth. A tumor of the thyreoid gland. [L, 50 (a, 14).]—**T. fugax**, **T. sanguineum**, **T. spurium**. Of P. Frank, see *Inflammatory goitre*.

**THYREOPRIVUS** (Lat.), adj. *Thi²r(thu⁴r)-e²-o(o³)-pri⁴(pre)/vu²s(wu⁴s)*. See *STRUMPRIVUS*.

**THYREOPROTEIN**, n. *Thi²r-e²-o-prot⁴e²-i²n*. Of Bubnoff, an albumin isolated from the thyreoid gland. [L, 50 (a, 14).]

**THYREOTOMY**, n. *Thi²r-e²-o²t⁴om-i²*. From *thyroceid⁴s*, thyreoid, and *τομή*, a cutting. Ger., *Thyreotomie*. Fr., *thyrotomie*. The operation of splitting the thyreoid cartilage (generally used for the removal of tumors). [E.]

**THYREOTRACHEALIS** (Lat.), n. m. *Thi²r(thu⁴r)-e²-o(o³)-tra²k(trach²)-e²-al(a³l)/i²s*. For deriv., see *THYREOID* and *TRACHEA*. A muscle extending between the trachea and the thyreoid cartilage or region. [L.]—**T. profundus**. An anomalous offshoot of the crico-arytænoideus lateralis to the trachea. [L, 332.]—**T. superficialis**. An anomalous offshoot of the sternothyroideus to the trachea. [L, 332.]

**THYROID**, adj. *Thi²r-oid*. A less correct form of *thyreoid*. For other words in *Thyro-*, see the corresponding words in *Thyreoid*.

**THYRS**, n. *Thu²rs*. Lat., *thyrsus* (from *θύρσος*, a stem). Fr., *t. Ger., Strauss, Blütenstrauss*. A compact panicle, such as the inflorescence of the grape. [a, 35.]

**THYRSIFLOROUS**, adj. *Thi²rs-i²-flor⁴u²s*. From *thyrsus*, a thyrsus, and *flos*, a flower. Fr., *thyrsiflore*. Having the inflorescence in contracted or ovate panicles. [a, 35.]

**THYSSELINUM** (Lat.), n. n. *Thi²s(thu⁴s)-se²l-in(en⁴)/u²m(u⁴m)*. Fr., *thysélin*. Ger., *Sumpfsilge*. 1. Of Adanson, the genus *Selinum*. 2. Of Hoffmann, a genus of the *Umbelliferae* closely resembling *Peucedanum*. [a, 35.]—**T. palustre**. Ger., *Milchpeterling*, *Oelsenich*, *wilder Bertram*, *gemeine Sumpfsilge*. A species found in Europe and Asia. The root, which has a strong, somewhat turpentine-like odor and a pungent, aromatic, bitterish taste, has been used in epilepsy and various spasmodic affections. In northern Asia it is used as a condiment in place of ginger. [a, 35.]

**TIBIA** (Lat.), n. f. *Ti²b(teb)/i²-a²*. Gr., *κνήμη*, *προκνήμιον*. Fr., *t. Ger., T.* A long bone, the larger of the two of the leg, on the anterior and inner side of which it is placed. Its upper extremity bears two concave surfaces covered with cartilage, separated by the crucial spine, for articulation with the femur, and bears on each side two prominences, the external and internal tuberosities. The shaft is three-sided, smaller in the middle than at either end, its inner surface being subcutaneous. The lower extremity is enlarged transversely and projects downward on the inner side as the internal malleolus, presenting a concave surface for articulation with the astragalus; externally is a surface covered with cartilage for articulation with the fibula, and posteriorly are grooves for the tendons of the tibialis posticus and flexores digitorum pedis and pollicis longi. [L, 31, 142, 332.]—**T. minima**. See *FIBULA* (1st def.).

**TIBIAD**, adv. *Ti²b/i²-a²d*. Toward the tibial aspect. [L, 141.]

**TIBIÆUS** (Lat.), n. m. *Ti²b(teb)-i²-e⁴(n³-e²)-u²s(u⁴s)*. See *TIBIALIS*.

**TIBIAL**, adj. *Ti²b/i²-l*. Lat., *tibialis*. Fr., *t. Ger., t.* Pertaining to or situated near or toward the tibia. [L, 343.]

**TIBIAL** (Fr.), adj. and n. *Te-be-a²l*. See *TIBIALIS*.—**T. antérieur**. See *TIBIALIS anticus*.—**T. postérieur**. See *TIBIALIS posticus*.

**TIBIALIS** (Lat.), adj. *Ti²b(teb)-i²-al(a³l)/i²s*. From *tibia* (q. v.). Tibial; as a n. m. (Fr., *tibial*, *jambier*; Ger., *Schienbeinmuskel*), a muscle connected with the tibia. [a, 48.]—**T. anticus**. Fr., *jambier antérieur*. Ger., *Schienbeinmuskel*. A muscle which arises from the lower part of the external tuberosity of the tibia and the upper half of the exterior surface of the bone from the interosseous membrane and the strong fascia of the leg; also from the intermuscular septum. It is inserted into a rounded area on the inner and inferior part of the internal cuneiform and the first metatarsal bones. [C.]—**T. anticus accessorius**, **T. anticus profundus**. See *THYOPARACALIS anticus*.—**T. gracilis**. See *PLANTARIUS*.—**T. nauticus**,

THE TIBIA.

1, posterior aspect; 2, anterior aspect.

**T. posticus.** A muscle which arises from the interosseous membrane; the outer part of the posterior surface of the tibia, the inner surface of the fibula and the aponeurosis covering it. It is inserted into the tubercle of the scaphoid bone and also into the three cuneiform bones, the cuboid, and the bases of the second, third, and fourth metatarsal bones, and also the sustentaculum tali. [C.]—**T. profundus.** See TIBIOFASCIALIS.—**T. secundus.** A muscle accessory to the *t. posticus*, arising from the lower part of the tibia and inserted into some of the ligaments near the ankle. [L, 332.]

**TIBIO-APONÉVROTIQUE** (Fr.), n. *Teb-e-o-a<sup>3</sup>p-o-nav-ro-ték.* See TIBIOFASCIALIS.

**TIBIO-CALCANÉEN** (Fr.), n. *Te-be-o-ka<sup>3</sup>l-ka<sup>3</sup>-ne-a<sup>3</sup>n<sup>2</sup>.* See SOLÉUS (1st def.).

**TIBIOFASCIALIS** (Lat.), adj. *Ti<sup>2</sup>b(teb)-i<sup>2</sup>-o(o<sup>3</sup>)-fa<sup>2</sup>s(fa<sup>2</sup>s)-si<sup>2</sup>-(ki<sup>2</sup>)-al(a<sup>3</sup>)/i<sup>2</sup>s.* From *tibia*, the tibia, and *fascia*, a band. Fr., *tibio-aponévrotique*. Connected with the tibia and the fascia of the leg or foot; as a n., a muscle so connected. [L.]—**T. anticus.** An anomalous muscle which arises from the lower third of the anterior edge of the tibia and is inserted into the annular ligament and deep fascia. It is sometimes a part of the tibialis anticus. [C.]

**TIBIO-FEMORAL**, adj. *Ti<sup>2</sup>b-i<sup>2</sup>-o-fe<sup>2</sup>m'o<sup>2</sup>-r'l.* Pertaining to the tibia and the femur. [a, 48.]

**TIBIO-FIBULAR**, adj. *Ti<sup>2</sup>b-i<sup>2</sup>-o-fi<sup>2</sup>b'u<sup>2</sup>-a<sup>3</sup>r.* Lat., *peroneo-tibialis*. Fr., *peronéo-tibial*. Pertaining to the tibia and the fibula.

**TIBIO-MALLÉOLAIRE** (Fr.), n. *Te-be-o-ma<sup>3</sup>-le<sup>2</sup>-o-la<sup>2</sup>r.* See Internal saphenous vein.

**TIBIO-NAVICULAR**, adj. *Ti<sup>2</sup>b-i<sup>2</sup>-o-na<sup>2</sup>v-i<sup>2</sup>k'u<sup>2</sup>-a<sup>3</sup>r.* From *tibia*, the tibia, and *navicula*, a boat. Pertaining to the tibia and the scaphoid bone. [a, 48.]

**TIBIO-PÉRONÉO-CALCANIEN** (Fr.), n. *Te-be-o-pa-ro-na-o-ka<sup>3</sup>l-ka<sup>3</sup>-ne-a<sup>3</sup>n<sup>2</sup>.* See SOLÉUS (1st def.).

**TIBIO-PÉRONÉO-TARSIEN** (Fr.), n. *Te-be-o-pa-ro-na-o-ta<sup>3</sup>r-se-a<sup>3</sup>n<sup>2</sup>.* See PERONEUS longus.

**TIBIO-PERONEAL**, adj. *Ti<sup>2</sup>b-i<sup>2</sup>-o-pe<sup>2</sup>r-o<sup>2</sup>n-e'l.* From *tibia*, the tibia, and *peroná*, the fibula. Fr., *tibio-péronier*. See TIBIO-FIBULAR.

**TIBIO-PHALANGETTIEN** (Fr.), n. *Te-be-o-fa<sup>2</sup>-la<sup>2</sup>n<sup>2</sup>-zhe<sup>2</sup>-te-a<sup>3</sup>n<sup>2</sup>.* See FLEXOR digitorum pedis longus.

**TIBIOPHALANGÉUS** (Lat.), n. m. *Ti<sup>2</sup>b(teb)-i<sup>2</sup>-o(o<sup>3</sup>)-fa<sup>2</sup>l-(fa<sup>2</sup>l)-a<sup>3</sup>n(a<sup>3</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s).* Fr., *tibio-phalangien*. Ger., *langer (oder dicker) Hufbeinbeuger, hinterer Unterschenkelmuskel*. The analogue of the flexor hallucis longus and flexor peronae of man found in the lower animals. [L, 13.]—**T. magnus.** See *T. parvus*. See PERONEOPHALANGÉUS.

**TIBIOPRÆMETATARSEUS** (Lat.), **TIBIOPRÆMETATARSUS** (Lat.), n's m. *Ti<sup>2</sup>b(teb)/i<sup>2</sup>-o(o<sup>3</sup>)-præ(pra<sup>2</sup>-e<sup>2</sup>)-me<sup>2</sup>-ta<sup>2</sup>-ta<sup>2</sup>rs-e<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s), -ta<sup>2</sup>rs(u<sup>2</sup>s).* From *tibia* (q. v.), *præ*, before, and *metatarsus* (q. v.). Fr., *tibio-pré-métatarsien*. Ger., *Schienbeinbeuger, Wadenmuskel*. A muscle of solipeds, divided into two portions—the muscular, representing the tibialis anticus of man, and the tendinous, representing, according to Meckel, the peroneus tertius of man. [L, 13.]

**TIBIOPRÆPHALANGÉUS** (Lat.), n. m. *Ti<sup>2</sup>b(teb)/i<sup>2</sup>-o(o<sup>3</sup>)-præ(pra<sup>2</sup>-e<sup>2</sup>)-fa<sup>2</sup>l-(fa<sup>2</sup>l)-a<sup>3</sup>n(a<sup>3</sup>n<sup>2</sup>)/je<sup>2</sup>(ge<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s).* From *tibia* (q. v.), *præ*, before, and *phalanx* (q. v.). See PERONEOPRÆPHALANGÉUS.

**TIBIO-SOUS-PHALANGETTIEN COMMUN** (Fr.), n. *Te-be-o-su-fa<sup>2</sup>-la<sup>2</sup>n<sup>2</sup>-zhe<sup>2</sup>-te-a<sup>3</sup>n<sup>2</sup> ko<sup>2</sup>m-u<sup>2</sup>n<sup>2</sup>.* Of Chaussier, see FLEXOR digitorum pedis longus.

**TIBIO-SOUS-TARSIEN** (Fr.), n. *Te-be-o-su-ta<sup>3</sup>r-se-a<sup>3</sup>n<sup>2</sup>.* See TIBIALIS posticus.

**TIBIO-SUS-TARSIEN** (Fr.), n. *Te-be-o-su<sup>2</sup>-ta<sup>3</sup>r-se-a<sup>3</sup>n<sup>2</sup>.* See TIBIALIS anticus.

**TIBIO-TARSAL**, adj. *Ti<sup>2</sup>b-i<sup>2</sup>-o-ta<sup>3</sup>r's'l.* Fr., *tibio-tarsien*. Pertaining to the tibia and the tarsus. [a, 48.]

**TIBOUCHINA** (Lat.), n. *Teb-ush-en'a<sup>3</sup>.* Fr., *tibouchine*. A genus of the Melastomaceæ. [a, 35.]—**T. aspera.** A Guiana shrub. The aromatic leaves and flowers are used as a pectoral. [a, 35.]

**TIC**, n. *Ti<sup>2</sup>k.* Fr., *t.* A convulsive motion or fit, especially of certain muscles of the face. [D, 20.]—**Convulsive t.**, **Facial t.**, *t. convulsif.* Ger., *Gesichtskrampf*. See Gilles de la Tourette's disease.—**Salaamst'** (Ger.). See SALAAM CONVULSIONS.—**Spasmodic t.** Paralysis of the muscles of one or both sides of the face, associated with tonic contraction of the same. [D, 1.] Cf. *Facial paralysis*.—**T. de salaam** (Fr.). See CHOREA nutans and SALAAM CONVULSIONS.—**T. douloureux** (Fr.). Facial neuralgia accompanied by an involuntary contraction of some of the facial muscles. [a, 34.]—**T. giratoire** (Fr.). Clonic spasm of the obliquus capitis inferior. [a, 34.]—**T. non-douloureux** (Fr.). Of Trousseau, myoclonus. [a, 34.]—**T. rotatoire** (Fr.). See *T. giratoire*.

**TICK**, n. *Ti<sup>2</sup>k.* Gr., *ἰξόδης*. Lat., *ixodes*. Fr., *tique*. Ger., *Zecke*. A name common to certain small parasitical Arachnida constituting the section *Ixodes* (called also *Suctorii*) of the family *Acarides*. [G, 60.] See IXODES and its subheadings.—**Itch t.** See ACARUS scabiei.

**TICKLING**, n. *Ti<sup>2</sup>k/i<sup>2</sup>n<sup>2</sup>.* Fr., *chatouillement*. Ger., *Kitzeln*, *Kitzel*. A sensation of slight irritation of the peripheral ends of sensitive nerves, sometimes purely subjective. [D.]

**TICKSEED**, n. *Ti<sup>2</sup>k'sed.* The genus *Coreopsis*, also any one of several species of *Desmodium*. [a, 35.]

**TICKWEED**, n. *Ti<sup>2</sup>k/wed.* See HEDEOMA pulegioides.

**TICOREA** (Lat.), n. f. *Ti<sup>2</sup>k-or'e-a<sup>3</sup>.* Fr., *ticorée*. A genus of rutaceous trees and shrubs. [a, 35.]—**T. febrifuga.** A Brazilian and Guiana tree. The astringent bark is used as a febrifuge. [a, 35.]

**TIEFENBACH** (Ger.), n. *Tef'e<sup>2</sup>n-ba<sup>2</sup>ch<sup>2</sup>.* A climatic health resort, with a sulphurous spring, in Bavaria, near the Lake of Constance. [L, 57 (a, 14).]

**TIEFSTAND** (Ger.), n. *Tef/sta<sup>2</sup>nd.* See DESCENT (1st def.).

**TIEFSTECHEN** (Ger.), n. *Tef/stech<sup>2</sup>e<sup>2</sup>n.* See ACUPUNCTURE.

**TIERCE** (Fr.), adj. *Te-e<sup>2</sup>rs.* See TERTIAN.

**TIERMAS** (Sp.), n. *Te-e<sup>2</sup>rm'a<sup>3</sup>s.* A place in Saragossa, Spain, where there is a hot saline and sulphurous spring. [L, 49, 57 (a, 14).]

**TIERS-ARGENT** (Fr.), n. *Te-e<sup>2</sup>rz-a<sup>3</sup>r-zha<sup>2</sup>n<sup>2</sup>.* An alloy of 3 parts of silver and 2 of aluminium; used in France as a substitute for silver. [Bloxam (B).]

**TIEUTE** (Jav.), n. See STRYCHNOS t.

**TIFLIS**, n. A place in the Caucasus, Russia, where there are hot sulphurous springs. [L, 30, 49 (a, 14).]

**TIGE** (Fr.), n. *Tezh.* 1. See STEM (1st def.). 2. See CRURA cerebri.—**T. de l'encéphale** (Huguenin). The base of the brain. [I, 28 (K).]—**T. du calamus scriptorius.** The median furrow of the fourth ventricle. [I, 36 (K).]—**T. fœtale.** The long axis of the foetus; its trunk. [A, 54.]—**T. pituitaire.** See INFUNDIBULUM (2d def.).—**T's souterraines** [Fr. Cod.]. See RHIZOMA (2d def.).—**T. sus-sphénoïdale.** See HYPOPHYSIS cerebri.

**TIGELLARY**, adj. *Ti<sup>2</sup>g'e<sup>2</sup>l-ar-i<sup>2</sup>.* Pertaining to the stem or to a tigella; of the sheath of a leaf, incorporated with the stem. [a, 35.]

**TIGELLE**, n. *Ti<sup>2</sup>g'e<sup>2</sup>l.* Lat., *tigella*, *tigellula*. Fr., *t.*, *tigellule*. An initial or miniature stem; of some botanists, the stem of mosses and other cryptogams; also the plumule and the caulicle, and, of Richard, the part of the plumule connecting the radicle with the cotyledons. [a, 35.]

**TIGLI** (Fr.), n. *Tel-yé.* Ger., *T'baum*. See CROTON tiglium.—*Huile de t.* See CROTON-oil.

**TIGLIC**, adj. *Ti<sup>2</sup>g'li<sup>2</sup>k.* Derived from *Tiglium*. [B.]—**T. acid.** See METHYLCROTIC acid.—**T. aldehyde.** See GUAIACENE.

**TIGLINIC ACID**, n. *Ti<sup>2</sup>g-li<sup>2</sup>n'ik.* See METHYLCROTIC acid.

**TIGLIUM** (Lat.), n. n. *Ti<sup>2</sup>g'li<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m).* See CROTON t.—*Grana tiglii.* The seeds of *Croton t.* [a, 35.]—**Oleum tiglii** [U. S. Ph.]. See CROTON-oil.—**T. officinale.** See CROTON t.

**TIGNASSE** (Fr.), n. *Ten-yas.* See PLICA polonica.

**TIGRETIER** (Fr.), n. *Teg-r'te-a.* A convulsive affection resembling chorea, observed in Abyssinia. [L, 41 (a, 14).]

**TIGRIDIA** (Lat.), n. f. *Ti<sup>2</sup>g-r'id-i<sup>2</sup>-a<sup>3</sup>.* From *tigris*, a tiger. A genus of the Iridaceæ. [a, 35.]—**T. pavonia.** Sp., *flor de la maravilla* [Mex. Ph.]. The tiger-flower of central Mexico. The edible, starchy bulbs are reputed febrifuge. [A, 447 (a, 21).]

**TIKMEHL** (Ger.), n. *Ti<sup>2</sup>k'mal.* See CURCUMA ARROW-ROOT.

**TIL** (Hind.), n. *Sans.*, *tila*. The Sesamum orientale. [a, 35.]—**T.-oil.** See OIL of SESAMUM.

**TILGUNG** (Ger.), n. *Ti<sup>2</sup>g'un<sup>2</sup>.* See ABOLITIO and EXTIRPATIO.

**TILIA** (Lat.), n. f. *Ti<sup>2</sup>l'i<sup>2</sup>-a<sup>3</sup>.* Fr., *tilleul*. Ger., *Linde*. 1. A genus of trees (the limes or lindens), of the *Tiliaceæ*, which are an order of the *Malvales*. The *Tiliæ* are a tribe of the *Tiliaceæ*. [a, 35.] 2. See *Flores tiliæ*.—**Aqua tiliæ.** Fr., *eau distillée de tilleul*. Sp., *agua de flor de tilo*. A preparation made by distilling *flores tiliæ* with water or [Russ. Ph.] by diluting *aqua tiliæ* concentrated with seven times as much water. [B, 95 (a, 38).]—**Aqua tiliæ concentrata.** A preparation made by mixing 100 parts of *aqua tiliæ* with 2 of alcohol and distilling 10 parts [Ger. Ph. (1st ed.)]. Swiss Ph.; or by distilling 12 parts of *flores tiliæ* and 2 of alcohol with water enough to make 15 parts [Russ. Ph.]. [B, 95 (a, 38).]—**Cortex tiliæ.** The bark of *T. silvestris*. [B, 95 (a, 38).]—**Flores tiliæ.** Fr., *tilleul*. Ger., *Lindenblüthen*. Sp., *tilo*. The flowers of *T. mollis* [Austr. Ph., Hung. Ph., Ger. Ph., Swiss Ph.], of this and *T. vulgaris* [Russ. Ph., Swed. Ph.] (*T. intermedia* [Dan. Ph.], of *T. argentea* [Roum. Ph.], of *T. europæa* [Gr. Ph., Netherl. Ph.], of *T. silvestris* [Sp. Ph.], or of *T. silvestris* and *T. mollis* [Fr. Cod.]. [B, 95 (a, 38).]—**Hydrolatum tiliæ.** See *Aqua tiliæ*.—**T. alba.** 1. See *T. argentea*. 2. See *T. heterophylla*.—**T. americana.** Fr., *tilleul d'Amérique*. Ger., *kahle Linde*. American bass-wood (or linden, or white-wood). The flowers are used like those of *T. intermedia*. The inner bark is used for cataplasms. [a, 35.]—**T. argentea.** Ger., *silberweisse Linde*. Silver lime-tree of Hungary and southeastern Europe, identified by some authors with the *φύλας* of the ancients. The fragrant flowers are more mucilaginous than those of *T. intermedia*, and yield a valuable essential oil. [a, 35.]—**T. canadensis**, **T. caroliniana.** See *T. americana*.—**T. europæa.** The European lime-tree. *T. intermedia* is the common variety. *T. mollis* and *T. silvestris* are also considered by some authors as varieties of it. [a, 35.]—**T. heterophylla.** Fr., *tilleul blanc*. American white bass-wood. The flowers are used like those of *T. intermedia*. [a, 35.]—**T. intermedia.** Fr., *tilleul d'Europe* (ou de Hollande). Ger., *gemeine Linde*. Common European lime-tree, Russian bass-tree; a tree of Europe and northern Asia, by some authors considered a hybrid between *T. mollis* and *T. silvestris*. The flowers, *flores tiliæ* (*europææ*, seu *fœminæ*), are mildly stimulant, antispasmodic, and diaphoretic. A charcoal, *carbo tiliæ*, is prepared from the wood. The leaves and mucilaginous inner bark, *folia et cortex interior tiliæ*, were also formerly official. The sap of the tree yields sugar. The fruit contains a principle analogous to chocolate. [a, 35.]—**T. laxiflora.** Ger., *schlaffblüthige Linde*. A North American tree (by Wood considered a variety of *T. americana*), used like *T. intermedia*. [a, 35.]—**T. macrophylla.** See *T. heterophylla* and *T. intermedia*.—**T. mollis.** Ger., *weichhaarige (oder grossblättrige) Linde*, *Sommerlinde*, *Frühlinde*, *Wasserlinde*, *holländische Linde*. Broad-leaved lime-tree of southern and central Europe; according to some authors, a variety of *T. intermedia*. The flowers are used like those of *T. intermedia*. [a, 35.]—**T. silvestris.** Ger., *wilde (oder kleinblät-*

rige) Linde, Steinlinde, Berglinde, Winterlinde. Small-leaved lime-tree of Europe; used like *T. intermedia*, but the flowers of some of the varieties are much less fragrant. [a, 35.]—*T. vulgaris*. See *T. intermedia*.

**TILIACORA** (Lat.), n. f.  $Ti^{12}I^2a^2k(a^2k)^2o^2r-a^2$ . Fr., *tiliacore*. A genus of the *Menispermaceae*. [a, 35.]—*T. abnormalis*, *T. acuminata*, *T. cuspidiformis*, *T. fraternaria*, *T. racemosa*. An East Indian species used in elephantiasis and snake-bites. The leaves are used for ulcers and pustular eruptions. [a, 35.]

**TILLANDSIA** (Lat.), n. f.  $Ti^{12}I^2a^2nds^2i^2a^2$ . From Tillands, a Swedish botanist. Fr., *tillandsie*. A genus of epiphytic or saxicolous plants of the *Tillandsiaceae* (a division of the *Bromeliaceae*).

[a, 35.]—*T. recurva*. Fr., *caragate recurvée*. A species found in the southern United States and tropical America, growing on old trees; used externally in hæmorrhoids. [a, 35.]—*T. usneoides*. Fr., *caragate musciforme, cheveux de roi, crin végétal*. Ger., *Greisenbart*. Sp., *heno*. Black (or Spanish, or long) moss of the southern United States, West Indies, Central America, Uruguay, etc.; used as an ointment in hæmorrhoids and as a surgical dressing. [a, 35.]

TILLANDSIA USNEOIDES. [A, 327.]

**TILLETIA** (Lat.), n. f.  $Ti^{12}I^2le^2t^2i^2a^2$ . A genus of *Fungi*, of the *Ectoclini*; of Tulasne, a division (the *Tilletiaceae*) of the *Ustilaginaceae*. [a, 35.]—*T. caries*. A species infesting the grain of wheat, its spores constituting the disease known as bunt. [a, 35.]—*T. scarlatinosa*. A species the micrococcus form of which, according to Haller, occurs in the blood in scarlet fever. [“Jahrb. f. Kinderheilk.” N. F., ii, p. 169 (1869); “Ctbl. f. Bact. u. Parasit.” i, 1887, p. 281 (B).]—*T. secalis*. A species growing on the grains of rye. [B, 108 (a, 14).]

**TILLEUL** (Fr.), n. Te-yu<sup>1</sup>. 1. See *TILIA*. 2. Of the Fr. Cod., see *Flores TILLÆ*.—*Eau distillée de t.* See *Aqua TILLÆ*.—*T. de Hollande*, *T. d'Europe*. See *TILIA intermedia*.—*Tisane de t.* Sp., *infusión de flor de tilo*. A preparation made by infusing 5 parts of flores tillæ with 345 of boiling water [Sp. Ph.] (with 500 of boiling water for half an hour [Fr. Cod.]) and straining. [B, 95 (a, 38).]

**TILLI, TILLY** (Fr.), n. Tel-ye. See *TIGLI*.

**TILMA** (Lat.), n. n.  $Ti^{12}I^2ma^2$ . Gen., *til'matos (-atis)*. Gr., *τῖλμα*. See *LINT* (2d def.).

**TILMOS** (Lat.), **TILMUS** (Lat.), n's n.  $Ti^{12}I^2mo^2s$ , -mu's (mu's). Gr., *τῖλμός*. See *CARPHOLOGY*.

**TILTON** (Lat.), n. n.  $Ti^{12}I^2to^2n$ . Gr., *τῖλτόν*. See *CHARPIE*.

**TIL-TREE**, n.  $Ti^{12}I^2tre$ . See *TILIA europæa*.

**TIMBÓ**, n. The root-bark of *Paullinia pinnata*. [a, 35.]

**TIMBONINE**, n.  $Ti^{12}m^2bo^2n-en$ . See under *PAULLINIA pinnata*.

**TIMBRE** (Fr.), n. Ta<sup>2</sup>n<sup>2</sup>-br<sup>1</sup>. Fr., *t.* Ger., *Klangfarbe*. The distinctive quality or character which belongs to a sound in virtue of its being produced by the voice or by a particular instrument; the clang-tint. [a, 48.]

**TIME**, n. Tim. Gr., *χρόνος*. Lat., *tempus*. Fr., *temps*. Ger., *Zeit*. Extent of duration. [a, 48.]—**Physiological t.** The t. elapsing between the impression received by an organ of sense and its perception by the individual affected. [K, 35.]—**Reaction t.** Reflex t. The t. occupied in the transfer of an impulse along a sensory nerve to the spinal cord and brain and back along a motor nerve. [K, 35.]

**TIMIDUS** (Lat.), n. m.  $Ti^{12}m^2i^2d-u^2s(u^2s)$ . From *timere*, to fear. An old term for the rectus oculi inferior muscle. [F.]

**TIMOTHY**, n.  $Ti^{12}m^2o^2th-i^2$ . Fr., *thimothée*. See *PHLEUM pratense*.

**TIN**, n.  $Ti^{12}n$ . Gr., *κασσίτερος*. Lat., *stannum*. Fr., *étain*. Ger., *Zinn*. A metallic element known since the beginning of the Christian era, although confounded at that time with lead. It is found occasionally uncombined in nature, but usually occurs in the form of an oxide or other compound. It is a white, lustrous metal, emitting a peculiar crackling sound when bent, malleable at ordinary temperatures and ductile at 100° C., but becoming brittle when heated to 200° C., and also when cooled to -40° C. It melts at 235° C. It can be obtained in the crystalline form and as a micro-crystalline powder. *T.* forms a number of alloys with copper (see *BRONZE*, *Gum METAL*, *Spectrum METAL*, and *Bell METAL*). It also forms an amalgam with mercury, which is used for plating mirrors. In composition t. acts partly as a bivalent radicle, form-

ing stannous compounds, partly as a quadrivalent radicle, forming stannic compounds. Symbol, Sn (from stannum); atomic weight, 117.8; sp. gr., 7.293. [B, 3.]—**Acid of t.** An acid formed by the action of nitric acid on t.; probably metastannic acid. [B, 3, 80.]—**Basic t. chloride**. A substance,  $2Sn(OH)Cl + H_2O$ , precipitated from an aqueous solution of t. dichloride when the latter is exposed to the air or diluted with an excess of water. [B, 3.]—**Block t.** Ger., *Weissblech* (2d def.). 1. In metallurgy, the more impure of the varieties of t. obtained in refining the metal. [B, 7.] 2. As ordinarily used, a thin plate of iron coated with t. [B, 7.]—**Butter of t.** Lat., *butyrum stanni*. See under *T. tetrachloride*.—**False t'foil**. Lead coated with t. and rolled into thin sheets. [B, 5 (a, 38).]—**Grain t.** Fr., *étain en poudre* [Fr. Cod.]. Ger., *Körnerzinn*. *T.* heated until it becomes brittle and broken up into small fragments. [B, 3.]—**Granulated t.** *T.* obtained in the granular form by pouring the hot metal into water. [B.]—**Solution of chloride of t.** [Br. Ph.]. A preparation made by heating 2 parts of granulated t. with 2 of water and 7 of hydrochloric acid until no more gas is obtained, adding water enough to make 12 parts, and bottling with the undissolved t. [B, 81 (a, 38).]—**T. amalgam**. A silvery-white alloy of 3 parts of t. and 1 part of mercury; used to plate mirrors, for filling teeth, and as a vermifuge. [B, 3; D, 90.]—**T. and ammonium chloride**. See *AMMONIUM chlorostannate*.—**T. and ammonium fluoride**. See *AMMONIUM stannofluoride*.—**T. arsenate**. A compound of tin and arsenic acid. A stannous arsenate is known, also a stannic arsenate,  $Sn_2As_2O_7$ , forming a transparent, gelatinous mass. [B, 2.]—**T. arsenite**. A compound of tin and arsenious acid. Stannous and stannic arsenites are known. [B, 2.]—**T. bichloride**. *T. tetrachloride*; so called because it contains twice as much chlorine in proportion to the t. as the t. protochloride or stannous chloride.—**T. bromide**. See *T. dibromide* and *T. tetrabromide*.—**T. chloride**. See *T. dichloride*, *T. tetrachloride*, and *Basic t. chloride*.—**T. deutchloride**. See *T. bichloride*.—**T. dibromide**. Stannous bromide,  $SnBr_2$ ; a grayish-white crystalline substance. It combines with the bromides of the alkaline metals to form double salts. [B, 3.]—**T. dichloride**. Stannous chloride; a transparent substance, of fat-like lustre,  $SnCl_2$ , also occurring in transparent prismatic crystals (*t.-salt*), of peculiar odor,  $SnCl_2 + 2H_2O$ . It is very soluble in water, but its solution is decomposed by dilution or by exposure to the air. It has a strong affinity for oxygen, and is thus a powerful reducing agent. The salt is used topically in medicine. *T. dichloride* combines with the chlorides of the alkaline metals to form double salts. [B, 3, 10.]—**T. diethyl**. See *STANDIETHYL*.—**T. difluoride**. Stannous fluoride,  $SnF_2$ . It combines with the fluorides of the alkaline metals to form double salts. [B, 3.]—**T. diiodide**. Stannous iodide,  $SnI_2$ . [B, 3.]—**T. dioxide**. Stannic oxide,  $SnO_2$ , occurring in nature as the mineral cassiterite or t'stone, and obtainable artificially either by the calcination of the metal (see *FLORES Jovis*) or by treating t. with nitric acid. It forms an amorphous white or straw-colored powder, and is also crystallizable. [B, 3.]—**T. dipropyl**. See *STANDIPROPYL*.—**T. disulphide**. Stannic sulphide,  $SnS_2$ ; a substance forming tabular crystals or golden-colored scales (see *Mosaic GOLD*). It has been used in medicine and was formerly official in the Fr. Cod. [B.]—**T. ethide**. A compound of t. with ethyl. The t. ethides are: (1) stannous ethide or standiethyl (*q. v.*); (2) stannoso-stannic ethide, or stantriethyl (*q. v.*); and (3) stannic ethide, or stantriethyl,  $Sn(C_2H_5)_4$ . [B, 3.]—**T. fluoride**. See *T. difluoride*, *T. tetrafluoride*, and *STANNOFLUORIDE*.—**T'foil**. Metallic t. spread out in a thin lamina. [B.]—**T. hydroxide**. A compound of hydroxyl and t. Stannous hydroxide (Fr., *hydrate stanneux*; Ger., *Zinnoxydhydrat*),  $2SnO + H_2O = H_2SnO_3$ , is a white precipitate deposited from a solution of t. dichloride by the addition of potassium carbonate. Stannic hydroxide (Fr., *hydrate stannique*; Ger., *Zinnoxydhydrat*),  $SnO(OH)_2$ , constitutes stannic and metastannic acids (*q. v.*). [B.]—**T. iodide**. See *T. diiodide* and *T. triiodide*.—**T. monosulphide**. Stannous sulphide,  $SnS$ ; a substance obtainable either as an amorphous black powder, as lustrous crystalline scales, or as a lead-colored crystalline mass. [B, 3.]—**T. monoxide**. Stannous oxide,  $SnO$ ; a substance obtained either as a black powder or as minute cubical crystals. [B, 3.]—**T. nitrate**. A compound of t. and nitric acid. Stannous nitrate (Fr., *azotate stanneux*; Ger., *salpêtresures Zinnoxydul*),  $Sn(NO_3)_2$ , is known only in the form of a yellow aqueous solution. Stannic nitrate (Fr., *azotate stannique*; Ger., *salpêtresures Zinnoxydul*) is a substance forming tabular crystals. [B, 3.]—**T. nitromuriate**. See *T. tetrachloride*.—**T. oxide**. See *T. monoxide* and *T. dioxide*.—**T. oxymuriate**. The commercial name of a hydrated t. tetrachloride,  $SnCl_4 + 5H_2O$ . [B, 3.]—**T. persulphide**. See *T. disulphide*.—**T. phosphate**. A compound of t. and phosphoric acid. Stannic phosphate is a substance obtained by the action of phosphoric acid on hydroxide of t. It is insoluble in nitric acid, and its formation is hence used as a means of separating phosphoric acid from other bodies. [B, 3.]—**T. phosphide**. A compound of t. and phosphorus. Several phosphides of t. are known:  $SnP$ ,  $Sn_3P_2$ , and  $Sn_4P$ . The first is a very brittle silvery-white substance; the second is a silvery-white body, sufficiently soft to be cut with a knife; and the last is a crystalline mass, looking like cast-zinc, and used in the manufacture of phosphor-bronze. [B.]—**T. protochloride**. See *T. dichloride*.—**T. protoxide**. See *T. monoxide*.—**T. salt**. See under *T. dichloride*. It is used as a pigment.—**T. stone**. Native t. dioxide. [B.]—**T. sulphate**. A compound of t. and sulphuric acid. Stannous sulphate,  $SnSO_4$ , is a granular substance made up of microscopic crystals. Stannic sulphate is a white body, whose properties are not well known. [B, 3.]—**T. sulphide**. See *T. monosulphide* and *T. disulphide*.—**T. tetrabromide**. Stannic bromide,  $SnBr_4$ ; a white fuming crystalline mass, dissolving readily in water. [B, 3.]—**T. tetrachloride**. Stannic chloride, fuming liquor of Libavius; a compound,  $SnCl_4$ , discovered by Libavius in 1605. It is a colorless, fuming, and very caustic liquid, boiling at 120° C. It dissolves sulphur, phosphorus, and iodine. Mixed with one third its weight of water, it forms a solid crystalline mass called *butter of t.* Com-

bined with water of crystallization, it forms a series of crystalline products,  $\text{SnCl}_4 + 3\text{H}_2\text{O}$ ,  $\text{SnCl}_4 + 5\text{H}_2\text{O}$ , and  $\text{SnCl}_4 + 8\text{H}_2\text{O}$ . T. tetrachloride combines with a number of other chlorides to form double salts (sometimes called *chlorostannates*). It is used as a mordant in dyeing, and was formerly called "composition," "physic," or "dyer's spirits," and commercially was known as "nitromuriate" of t. The compound  $\text{SnCl}_4 + 5\text{H}_2\text{O}$  is commercially designated the "oxymuriate" of t. T. tetrachloride was official in the Sardinian Ph. of 1853. [B. 3, 10.]—**T. tetrafluoride.** Stannic fluoride,  $\text{SnF}_4$ ; known only in solution. It forms with the fluorides of other metals compounds called *stannofluorides*. [B. 3.]—**T. tetraiodide.** Stannic iodide,  $\text{SnI}_4$ . [B. 3.]—**T. tetramethyl.** A liquid,  $\text{Sn}(\text{CH}_3)_4$ , of ethereal odor. [B. 3.]—**T. tetrethyl.** Stannic ethide (see under *T. ethide*). [B.]—**T. tree.** See *ARBOR JOVIS*.—**T. triethyl.** See *STANTRIETHYL*.

**TINAGMUS** (Lat.), n. m.  $\text{Ti}^2\text{n}^2\text{g}(\text{a}^2\text{g})/\text{mu}^2\text{s}(\text{mu}^4\text{s})$ . Gr., *τιναγμός*. 1. See *CONCUSSION*. 2. Rectal tenesmus. [E.]

**TINCA** (Lat.), n. f.  $\text{Ti}^2\text{n}^2\text{ka}^3$ . A genus of fresh-water fishes, of the *Cyprinidae*; the tenches. [a. 48.] Cf. *Os tinca*.

**TINCAL**, n.  $\text{Ti}^2\text{n}^2\text{k}^1$ . Lat., *tincaleum*. Crude borax. [a. 35.]

**TINCTORIAL**, adj.  $\text{Ti}^2\text{n}^2\text{kt}^0/\text{a}^2$ . Lat., *tinctorius* (from *tingere*, to dye). Used for dyeing. [a. 35.]

**TINCTUR** (Ger.), n.  $\text{Ti}^2\text{n}^2\text{kt}^0\text{-ur}$ . See *TINCTURE*.—**Saure aromatische T.** See *MIXTURA SULFURICA ACIDA*.

**TINCTURA** (Lat.), n. f.  $\text{Ti}^2\text{n}^2\text{kt}(\text{ten}^2\text{kt})\text{-u}^2\text{r}(\text{ur})/\text{a}^2$ . See *TINCTURE* and *DYE*.—**T. acida aromatica.** See *MIXTURA SULFURICA ACIDA*.—**T. aetherea.** 1. Impure ether mixed with alcohol. [B. 97.] 2. See *ETHEREAL TINCTURE*.—**T. aetherea camphorata.** See *SOLUTIO CAMPHORÆ AETHERA*.—**T. alexipharmaca Huxhami.** See *TINCTURA CINCHONÆ COMPOSITA*.—**T. alkalica acris.** See under *T. ANTIMONII AURATA*.—**T. aloetica alkalina.** See *ELIXIR PROPRIETATIS PARACELSI SINE ACIDO*.—**T. amara.** 1. Of the Ger. Ph., Austr. Ph., Dan. Ph., Hung. Ph. (2d ed.), Norw. Ph., Russ. Ph., a tincture consisting of 60 parts each of gentian-root and the herb of lesser centaury, 40 of bitter-orange peel, and 20 each of unripe oranges and rhizome of zedoary, macerated with 1,000 of dilute alcohol for a week (Ger. Ph.). The Austr. and Hung. Ph.'s order with the gentian-root and lesser centaury 60 parts each of bitter-orange peel and the leaves of *Menyanthes trifoliata*, and 30 of sodium carbonate crystals (Austr. Ph.) (18 of dried sodium carbonate (Hung. Ph.)), to be digested in 3,000 of alcoholic water of cinnamon for 3 days (6 (Hung. Ph.)). The Russ. Ph. orders with the gentian-root and lesser centaury 60 parts of unripe oranges and 30 of zedoary, with maceration in 1,050 of 70-per-cent. alcohol for five days. The Dan. and Norw. Ph.'s omit the lesser centaury and direct the use of 60 parts each of blessed thistle and unripe oranges, with 15 of anise and 240 of wormwood, digesting for three days in 2,175 of dilute alcohol (Dan. Ph.) (with 20 of anise and 200 of wormwood, digesting in 2,000 of dilute alcohol for half an hour and boiling (Norw. Ph.)). [B. 95 (a, 38).] See also *T. GENTIANÆ COMPOSITA*, *T. ABSINTHI COMPOSITA*, and *Tincture d'absinthe composée*. 2. See *ELIXIR AURANTIORUM COMPOSITUM*.—**T. amara ex Baumé.** See *GUTTÆ AMARÆ BAUMÉ*.—**T. ammoniata aromatica.** See *SPIRITUS AMMONIÆ AROMATICUS*.—**T. antifebrilis Warburgi.** See *WARBURG'S TINCTURE*.—**T. antihysterica** (Norw. Ph.). A tincture made by mixing 20 parts of tincture of asafoetida with 2 each of tincture of castor and spiritus ethereus camphoratus. [B. 95 (a, 38).]—**T. antiphthisica.** A solution of lead acetate and iron sulphate described in the Augsburg Ph., used in the treatment of phthisis, hæmoptysis, and dysentery. [B. 70.]—**T. antiscorbutica** (Fr. Cod.). See *Tincture de RAUFORT composée*.—**T. aromatica.** Fr., *alcoolé de cannelle et de cardamom composé*. A tincture made with 25 parts each of cloves, galangal, cardamom, and ginger (50 of ginger (Ger. Ph.)), 100 (125 (Ger. Ph.)) of cinnamon, and 1,000 (1,250 (Ger. Ph.)), 1,200 (Gr. Ph.) of dilute alcohol (1,200 of 70-per-cent. alcohol (Russ. Ph.)), 1,190 (4 of 80-per-cent. alcohol (Belg. Ph.)). [B. 95 (a, 38).]—**T. aromatica acida.** See *MIXTURA SULFURICA ACIDA*.—**T. aurea nervino-tonica** (seu *tonico-nervina*). See *Tinctura FERRI chlorati aetherea*.—**T. balsamica.** See *T. BENZOINI COMPOSITA* and *T. TOLUTANA*.—**T. balsamica aromatica.** See *MIXTURA OLEOSO-BALSAMICA*.—**T. bezoardica.** See *MIXTURA PYROTARTARICA*.—**T. Bonvicini.** See *T. GENTIANÆ COMPOSITA*.—**T. burgundica.** A preparation made by macerating for two days 22 parts of cinchona, 4 each of sweet flag and cinnamon, 7 of orange-peel, and 2 of cochineal in 900 of Portuguese white wine. [B. 119 (a, 38).]—**T. colombo** (Russ. Ph.). See *Tinctura CALUMBÆ*.—**T. composita Whytli** (Netherl. Ph.). A tincture closely resembling the *t. chinæ composita* of the Ger. Ph., but without the cinnamon (see *T. CINCHONÆ COMPOSITA*). [B. 95 (a, 38).]—**T. Dahlbergii.** A mixture of 2 parts of star-anise with 16 of colocynt and 192 of alcohol, or with 12 of colocynt and 160 of alcohol, or with 24 of colocynt and 320 of brandy; filtered after three days. [B. 119 (a, 38).]—**T. Dorelli.** Fr., *vin de rhubarbe et d'année*. A tincture made with 60 parts of rhubarb and 720 of Malaga or Spanish wine, with 7 of cardamom, 90 of sugar, and either 15 each of orange-peel and extract of elecampane or 15 each of lemon-peel, licorice, and extract of elecampane with 30 of Corinthian raisins; or with 20 each of cardamom and extract of elecampane, 160 of sugar, 120 of raisins, 2½ of mace, and 5½ of potassium carbonate. [B. 119 (a, 38).] See also *Vinum RHEI*.—**T. diatrion.** See *MIXTURA PYROTARTARICA*.—**T. digestiva** (Norw. Ph.). A preparation made by mixing equal parts of spiritus ethereus camphoratus, compound tincture of rhubarb, and a 20-per-cent. solution of potassium carbonate. [B. 95 (a, 38).]—**T. febrifuga acida.** See *MIXTURA PYROTARTARICA*.—**T. gingivalis.** See *T. CATECHU COMPOSITA* (2d def.).—**T. hieræ.** See *Vinum ALOES*.—**T. Huxhami** (Belg. Ph.). A tincture made with 100 parts of pale cinchona-bark, 75 of bitter-orange peel, 4 of cochineal, 8 of saffron, and 20 of Virginia snake-root, macerated for six days in 1,000 of 60-per-cent. alcohol. [B. 95 (a, 38).] See also *T. CINCHONÆ COMPOSITA*.—**T. japonica.** See *Tinctura CATECHU COMPOSITA*

(2d def.).—**T. kalina.** A tincture made by treating fused caustic potash for two days with 6 times as much alcohol of the sp. gr. of 0.840 (Gr. Ph.), or by dissolving the potash in 10 times as much 95-per-cent. alcohol (Russ. Ph.), and separating the liquid from the residue. [B. 95 (a, 38).]—**T. laxativa.** See *Tincture d'ALOES et de réglisse*.—**Tinctura narcotica pharmacopœia gallicæ** (Swiss Ph.). Tinctures made by treating 1 part of some freshly dried and powdered narcotic herb by displacement with dilute alcohol enough to make 5 parts. [B. 95 (a, 38).]—**Tinctura narcotica pharmacopœia germanicæ** (Swiss Ph.). Tinctures made by crushing 5 parts of some fresh narcotic herb in a stone mortar and macerating with 6 of alcohol. [B. 95 (a, 38).]—**T. nervina Bestuschefii.** See *Tinctura FERRI chlorati aetherea*.—**T. odontalgica** (Norw. Ph.). A preparation consisting of 46 parts each of acetic ether and chloroform, 2 of oil of cassia, 34 of oil of cloves, and 72 of strong alcohol. [B. 95 (a, 38).]—**T. odontalgica Botot** (Swiss Ph.). A preparation made by pouring 1,000 parts of alcohol and 500 of rose-water over a mixture of 10 parts each of cloves, cinnamon, and star-anise and 5 of peppermint-oil, adding 5 each of purified cream of tartar and cochineal rubbed up with water, allowing to stand eight days with frequent shaking up, and filtering. [B. 95 (a, 38).]—**T. purgans.** See *T. JALAPÆ COMPOSITA*.—**T. pyrotartarica.** See *MIXTURA PYROTARTARICA*.—**T. sacra.** See *Vinum ALOES* and *Tinctura RHEI et aloes*.—**T. stomachica.** See *ELIXIR AURANTIORUM COMPOSITUM*.—**T. thebaica.** See *Tinctura OPII*.—**T. thebaica benzoica.** See *T. OPII camphorata*.—**T. tolutana.** Fr., *tincture de baume de Tolu*. Sp., *tinctura alcohólica de bálsamo de Tolú*. A tincture made by dissolving balsam of Tolu in nine times as much alcohol (U. S. Ph.), or by macerating 2½ oz. of balsam of Tolu in 15 fl. oz. of alcohol (Br. Ph.), or by macerating (digesting (Dan. Ph.)) the balsam with 5 times as much strong (80-per-cent. (Fr. Cod.), 90-per-cent. (Sp. Ph.)) alcohol for 3 days (Dan. Ph.) (5 (Swed. Ph.), 8 (Sp. Ph.), 10 (Fr. Cod.)). [B. 95, 119 (a, 38).]—**T. tonica martialis lutea.** See *Tinctura MARTIS adstringens*.—**T. tonico-nervina Bestuschefii.** See *T. FERRI chlorati aetherea*.—**T. vulneraria rubra** (Swiss Ph.). 1. A preparation made by digesting 2 parts each of chamomile flowers, lavender flowers, fennel seeds, wormwood, melissa, crisped mint, rosemary, rue, *Thymus serpyllum*, and red sandal-wood with 50 each of strong alcohol and water for 8 days, expressing, and filtering. [B. 95 (a, 38).] 2. Of the Fr. Cod., see *ALCOOLATURE VULNERAIRE*.—**T. Whytli** (Belg. Ph.). A tincture closely resembling the *t. chinæ composita* of the Ger. Ph. (see *T. CINCHONÆ COMPOSITA*). [B. 95 (a, 38).]

**TINCTURE**, n.  $\text{Ti}^2\text{n}^2\text{kt}^0\text{u}^2\text{r}$ . Lat., *tinctura* (from *tingere*, to wet), *aer* [Paracelsus]. Fr., *teinture*, *t.* Ger., *Tinctur*, *Tinktur*. A pharmaceutical preparation made by dissolving a drug in alcohol, especially by subjecting vegetable substances to the action of alcohol.—**Ammoniated t.** A solution of a medicinal substance in spirit of ammonia. [B.]—**Antiperiodic t.** See *Warburg's t.*—**Cordial solar t.** See under *Tinctura AURI*.—**Ethereal t.** A t. in the preparation of which an appreciable quantity of ether is used. [B. 95 (a, 38).]—**Huxham's t.** See *Tinctura CINCHONÆ COMPOSITA*.—**Stomachic t.** See *ESSENTIA STOMACHICA polycresta Gundelsheimeri* and *ELIXIR AURANTIORUM COMPOSITUM*.—**Theriacal t.** See *ESSENTIA THERIACALIS*.—**Warburg's t.** A preparation made by digesting 1 lb. of Socotrine aloes, 4 oz. each of rhubarb, angelica fruit, and confection of Damocates, 2 each of elecampane, saffron, fennel, and prepared chalk, 1 oz. each of gentian, zedoary, cubeb, myrrh, camphor, and agaric, and 500 oz. of proof spirit for twelve hours, expressing, adding 10 oz. of quinine sulphate, and filtering when this is dissolved by aid of the water bath and the mixture cooled; used in obstinate cases of malarial poisoning. [B. 5 (a, 38).]

**TINDER**, n.  $\text{Ti}^2\text{nd}^0\text{u}^2\text{r}$ . See *AMADOU*.

**TINEA** (Lat.), n. f.  $\text{Ti}^2\text{n}^2\text{e}^2\text{a}^3$ . Fr., *teigne*. Ger., *Schorf*, *Grind*. A word used by the translators of Arabian writings as the equivalent of *al tin*, *al thin*, and *althin*, to designate various eruptions of the hairy scalp. It has been applied to many chronic, pustular, contagious skin diseases, but is now generally restricted to those depending on the presence of a vegetable parasite, and especially to those that affect the scalp. [G.]—**T. amiantacea.** See *SEBORRHOEA SICCÆ*.—**T. asbestina.** *Seborrhoea capillitii* in which the crusts resemble asbestos. [G.]—**T. axillaris.** T. affecting the axilla.—**T. barbe.** See *SYCOISIS PARASITARIA*.—**T. benigna.** See *SCABIES CAPITIS simplex*.—**T. capitis.** See *PITYRIASIS CAPITIS*.—**T. ciliaris.** See *LIPPITUDO*.—**T. circinata.** See *MYCOSIS TRICHO-PHYTINA* and *DERMATOMYCOISIS maculo-vesiculosa*.—**T. circinata tropica.** See *T. imbricata*.—**T. crustacea.** *Porrigo larvalis*. See *FAVUS*.—**T. furfuracea.** See *SEBORRHOEA SICCÆ*.—**T. granulata.** See *ACHOR GRANULATUS*.—**T. imbricata** (Manson). Chinese ringworm; a cutaneous disease occurring about the Straits of Malacca and the islands of the Malayan Archipelago, characterized by desquamation of the cuticle in the form of concentric flakes which present free edges toward the centre of the patch, while toward the circumference they are firmly attached. The disease is regarded by most authorities as a form of ringworm. [Med. Rep. of the Imp. Chinese Maritime Customs, 1879 (G.).] Cf. *TOKELOU RINGWORM*.—**T. kerion.** See *KERION*.—**T. lactea.** See *CRUSTA LACTEA*.—**T. lupina.** *T. lupinosa*. **T. vera.** See **FAVUS**.—**T. versicolor.** See **DERMATOMYCOSIS furfuracea**.

**TINEARIA** (Lat.), n. f.  $Ti^2n-e^2-a(a^3)/ri^2-a^3$ . From *tinea*, a moth. The *Helicrysum arenarium*. [a, 35.]

**TINESMUS** (Lat.), n. m.  $Ti^2n(ten)-e^2-z(e^3s)/mu^2s(mu^4s)$ . See **TENESMUS**.

**TINGUARRA** (Lat.), n. f.  $Ti^2n^2-gwa^3r/ra^3$ . A genus of umbelliferous herbs. [a, 35.]—**T. cervariæfolia**, **T. montana**. Two species found in the Canary Islands; the second is closely related to *T. sicula*. [a, 35.]—**T. sicula**. A species indigenous to Mediterranean regions. The root is edible and celery-like. [a, 35.]

**TINKAL, TINKAR**, n's.  $Ti^2n^2-k^1l, -ka^3r$ . See **TINCAL**.

**TINKLING**, n.  $Ti^2n^2k/li^2n^2$ . Fr., *tintement, cliquetis*. Ger., *Klingen*. A sharp, clear sound like that produced by one piece of metal striking lightly against another. [a, 34.]—**Auriculo-metallic t.** A t. heard over the cardiac apex, produced by a jarring of the chest-wall that is set in vibration by the impulse. [L, 20 (a, 34).]—**Metallic t.** A t. pulmonary sound produced in a large cavity having solid walls. [a, 34.]

**TINKTUR** (Ger.), n.  $Ti^2n^2kt-ur^1$ . See **TINCTURE**.

**TINNITUS** (Lat.), n. m.  $Ti^2n-nit(net)/u^3s(u^4s)$ . Gen., -it/us. From *tinnire*, to ring. Fr., *tintement*. Ger., *Gebräuse*. A ringing or tinkling sound. [A, 312 (a, 17).]—**Nervous t.** Fr., *tintement (ou bourdonnement) nerveux*. Ger., *nervöses Ohrensausen (oder Ohrenbrausen)*. A true neurosis, characterized by the subjective sensation of a humming or buzzing sound, varying considerably in character, and occurring mostly in excitable, nervous persons, during mental strain, or in states of exhaustion, anæmia, or shock. It is also known as *t. without deafness*, and proves obstinate to every kind of treatment. [F, 3.]—**T. aurium**. Fr., *tintement (ou bourdonnement) d'oreille*. Ger., *Gellen der Ohren, Ohrensausen, Ohrensummen, Ohrenbrausen*. A subjective sound, varying in character, duration, and intensity, heard by patients suffering from various forms of ear disease, and also following the administration of large doses of certain drugs, notably quinine. It also occurs in certain febrile disorders and in marked anæmia. [F.]

**TINOSPORA** (Lat.), n. f.  $Ti^2(te)-no^2sp/o^2r-a^2$ . From *tinus*, the laurustinus, and *σπορά*, a seed. A genus of the *Tinosporeæ*, which are a tribe of the *Menispermaceæ*. [a, 35.]—**T. bakis**. See *Cocculus bakis*.—**T. cordifolia**. A shrub growing in tropical India. Its stem, together with portions of the root, *caulis et radix tinospore*, is official in the Ph. of India. For the medicinal properties, see *Cocculus cordifolius*. [a, 35.]—**T. crispa**. An East Indian species allied to *T. cordifolia* and possessing the same bitterness and probably the same tonic properties. [a, 35.] See also *Cocculus crispus*.—**T. malabarica**. See *Cocculus malabaricus*.

**TINTE** (Ger.), n.  $Ti^2nt/e^2$ . See **INK**.

**TINTEMENT** (Fr.), n.  $Ta^2n^2-t^1-ma^2n^2$ . See **TINNITUS** and **TINKLING**.—**T. des oreilles**. See **TINNITUS aurium**.

**TINTENFISCH** (Ger.), n.  $Ti^2nt/e^2n-f^2sh$ . See **SEPIA** (1st def.).—**T-bein**. See **OS SEPIE**.

**TIQUE** (Fr.), n. *Tek*. See **IXODES ricinus**.

**TIQUETÉ** (Fr.), adj. *Te-k'-ta*. Marked with small spots. [L, 41 (a, 14).]

**TIRAGE** (Fr.), n. *Ter-a^2zh*. The movement of forced or spasmodic inspiration observed in dyspnoea. [L, 49 (a, 14).]

**TIRAILLEMENT** (Fr.), n. *Ter-a^2-el-y'-ma^2n^2*. A dragging sensation.

**TIRAILLEUR** (Fr.), n. *Ter-a^2-el-yu^2r*. See **BRACHINUS crepitans**.

**TIRE-BALLE** (Fr.), n. *Ter-ba^2l*. See **BULLET FORCEPS**.

**TIRE-DENT** (Fr.), n. *Ter-da^2n^2*. See **DENTAL FORCEPS**.

**TIRE-FOND** (Fr.), n. *Ter-fa^2n^2*. A gimlet for screwing into and drawing up pieces of bone, such as the button of bone cut by the trephine. [E.]

THE TIRE-FOND.

**TIRE-RACINE** (Fr.), n. *Ter-ra^2-sen*. A forceps for removing the roots of teeth. [L, 41 (a, 14).]

**TIRE-TÊTE** (Fr.), n. *Ter-te^2t*. A term applied to a number of contrivances for making traction on the fetal head in artificial delivery. It seems to have been first employed by Mauriceau to designate a complicated instrument of his invention, consisting essentially of a disc of metal hinged at its centre to the end of a shaft. The disc being turned so that its plane was coincident with the shaft, it was plunged into the head, and a like disc, attached to a cannula, was then screwed down upon the exterior of the cranium, the bony wall of which, on either side of the wound, was thus held between the two discs. Traction was then made with the shaft. [A, 4.]—**T.-t. à bascule**. An instrument devised by Levret for extracting the head of the fetus after its separation from the trunk.

**TIRETOIRE** (Fr.), n. *Ter-twa^2r*. A dental forceps for removing the lower incisors. [L, 41 (a, 14).]

**-TISANE** (Fr.), n. *Te-zn^2n*. See **PITISAN**. Of the Fr. Cod., an infusion or decoction to be used as a regular drink by a sick person, prepared for immediate use by dissolving the medicinal substance or substances in water (or sometimes boiling or macerating

and boiling in water) and sweetening if necessary with a medicinal syrup or with sugar, honey, or licorice. [B, 95 (a, 38).]—**T. astrigente**. See **LIMONADE sulfurique**.—**T. carminative**. A preparation made by boiling gently 20 parts each of juniper, anise, and ammoniac, 57 of chamomile, and 780 of water, straining, and adding 345 of brandy. [B, 119 (a, 38).]—**T. de Feltz** [Fr. Cod.]. See **DECOCTUM Feltz**.—**T. de Pollini**. See **DECOCTUM JUGLANDIS**.—**T. impériale**. See *Aqua imperialis*.—**T. pectorale** [Fr. Cod., 1837]. Syn.: *hydromel composé*. A preparation made by infusing 8 parts of elecampane rhizome and 3 of licorice-root in 256 of boiling water. [B, 119.] Cf. *T. d'Aunée*.—**T. royale**. See **APÔZÈME (arati)**.—**T. sudorifique**. See **DECOCTUM GUAIACI compositum** and **DECOCTUM SARSAPARILLÆ compositum**.

**TISCH** (Ger.), n. *Ti^2sh*. See **TABLE** (1st def.).—**Krankent'**. See **Bed-table**.—**Leichent'**, **Sectionst'**. A table for post-mortem examinations.

**TISSU** (Fr.), n. *Te-su^6*. See **TISSUE**.—**T. albuginé**. 1. Fibrous tissue. [J, 2.] In the pl., *t's albuginés*, the aponeuroses.—**T. allantoidien**, **T. annexiel**. The tissue intervening between the allantois and the chorion in a placental cotyledon. [A, 15.]—**T. blanc**. Fibrous tissue. [J, 1.]—**T. chondroïde** [Broca]. A variety of connective tissue closely resembling epiphyseal cartilage, immediately beneath which it is found. [L.]—**T. chondrigène**. See **CARTILAGE**.—**T. coalescent**. See **AREOLAR TISSUE** and **FIBROUS TISSUE**.—**T. colloïde**. See **MUCOUS TISSUE**.—**T. conjonctif**. See **CONNECTIVE TISSUE**.—**T. conjonctif adipeux**. See **ADIPOSE TISSUE**.—**T. conjonctif élastique**. See **ELASTIC TISSUE**.—**T. conjonctif embryonnaire**. See **MUCOUS TISSUE**.—**T. conjonctif interstitiel**. See *T. allantoidien*.—**T. conjonctif intrascléculaire**. See **ENDONEURIUM**.—**T. conjonctif lâche**. See **AREOLAR TISSUE**.—**T. conjonctif tendineux et ligamenteux**. See *White fibrous tissue*.—**T. corné**. See **CORNEOUS TISSUE**.—**T. cribléux**. See **AREOLAR TISSUE** and **FIBROUS TISSUE** and cf. *Cribrose tissue*.—**T. dentinaire**. See **DENTIN**.—**T. fongueux**. Fungous granulation tissue. [a, 34.]—**T. inter-annexiel**. See *T. muqueux inter-annexiel*.—**T. kératinien**. See **CORNEOUS TISSUE**.—**T. lacunaire**. A connective tissue that is reticulated. [a, 34.]—**T. muco-derméux**. The corium of a mucous membrane. [J, 33.]—**T. muqueux**. 1. Mucoid connective tissue. 2. The tissue of a mucous membrane. [J, 33.]—**T. muqueux inter-annexiel**. Of Dastre, the tissue interposed between the allantois, the amnion, and the chorion, together with the mucoid tissue of the umbilical cord, the two being continuous. [A, 15.]—**T. musculo-élastique**. A tissue consisting of muscular and elastic elements. [L.]—**T. périfasciculaire**. See **EPINEURIUM**.—**T. pigmentaire**. Pigment tissue. [J, 1.]—**T. réticulé des os**. See **CANCELLOUS TISSUE**.—**T. scléreux**. Embryonic tissue which develops into fibrous, cartilaginous, or osseous tissue. [J, 33.]—**T. unissant**. See **CONNECTIVE TISSUE** and **AREOLAR TISSUE**.—**T. unitif**. See **CONNECTIVE TISSUE**.

**TISSUE**, n. *Ti^2sh/u^2*. Gr., *ἵσος*. Lat., *tertus, tertura, tela*. Fr., *tissu*. Ger., *Gewebe*. A collection of cells or structural elements so modified in form, size, and arrangement as to have a constant and recognizable structure, wherever it may occur (being modified in different situations only so far as local connections and uses render necessary), and to be adapted to the performance of a special and definite function. All of one kind of t. in the body forms a system, such as the nervous or the muscular system, while the t.'s combined form organs. While the general idea of what constitutes a t. is quite definite, it has not been possible up to the present time to give a universally satisfactory classification of them. Two systems are used, the oldest and most common being based upon the appearance in the adult, and the other upon the origin from the different germ layers of the ovum. According to the first method, one of the most satisfactory classifications is the division into four groups—epithelium, connective t., muscular t., and nervous t.; according to the second, t.'s are ectodermic, endodermic, or mesodermic. [J, 12, 21, 30, 31.]—**Adenoid t.** Of His, the reticular framework of the lymphatic glands, alimentary mucosa, etc., the meshes of the reticulum being filled with lymphoid cells. This framework is described by many authors as made up of anastomosing branched cells, which mostly retain their nuclei; by others as composed of connective-t. fibres united into a network, the appearance of nuclei being given by the presence of endothelial cells. Adenoid t. may occur with indefinite boundaries, as in the mucosa of the alimentary canal. It is then sometimes called diffuse adenoid t. In other situations, as in the spleen, pleura, and omentum, it may form cords, cylinders, or patches. In the tonsils, the spleen, and the alimentary mucosa it often occurs in well defined masses, the lymph-follicles. [J, 21, 24, 30, 31, 32, 42.]—**Adipose t.** 1. Areolar t. in which the areolæ are more or less filled with fat-cells, a condition which may occur in any part of the body except the eyelids and parts of the male sexual apparatus. This accumulation of fat-cells is usually abundant in well fed individuals, especially in the subcutaneous areolar t., which is then often called the *panniculus adiposus* (q. v.). Adipose t. is abundantly supplied with blood-vessels and lymphatics, but has no nerves. 2. The fat-cells exclusive of the areolar t. in which they are found. [J, 21, 30, 31, 33, 35, 42.]—**Alveolar t.** The t. forming the framework of the pulmonary alveoli. It consists of areolar t. in which the elastic fibres are numerous, and there are also a considerable number of muscular fibre-cells. [J, 35.]—**Amorphous connective t.** [Hensle]. See **AREOLAR t.**—**Animal t.** The t. of an animal in contradistinction to that of a plant. [J.]—**Aqueous t.** Water (or water-starch) t.; t., such as that of most succulent plants, containing parenchyma cells stored with sap and more or less mucilage. [a, 35.]—**Areolar t.** **Areolated connective t.** That part of the connective t. of the body in which white and yellow connective-t. fibres and bundles cross at all angles and continually unite to form larger bundles or divide to form smaller ones, thus making a kind of network. Except in the immature condition, the ground substance has partly disappeared, leaving irregular cleft-like spaces, the so-called cells or areolæ, which are often filled with fat-cells. Areolar

t. in its most typical form is found just beneath the skin. It is also found beneath serous and mucous membranes, between muscles and blood-vessels, and connecting the various layers forming hollow viscera and the lobes and lobules of glands. [J. 21, 30, 32.] Cf. **Connective t.**—**Basement t. (of nerves).** See **NEUROGLIA**.—**Basis t.** See **STROMA**.—**Bone t.** See **OSSEOUS t.**—**Botryoidal t.** A dark-brown t. consisting of hollow tubes composed of cells containing fine brown pigment. It is found in the leech, and has been shown by Leydig and Lankester to belong to the vascular system. [Quart. Jour. of Micr. Sci., 1880, p. 307 (J).]—**Boundary t.** Epidermal t. [a. 35.]—**Cancellous t.** Fr. *tissu réticulé des os*. The porous, spongy t. of the bones.—**Cartilaginous t.** See **CARTILAGE**.—**Cavernous t.** Ger. *Schwellnetz*. Fibrous and elastic t. containing in the areolæ a freely communicating plexus of veins or venous sinuses, all included in an elastic envelope and capable of great increase in bulk when the veins are distended with blood. [L.]—**Cellular t.** 1. Areolar t. 2. A t. composed of cells, such as epithelium. [J. 36, 37.]—**Compact osseous t.** See **Compact osseous SUBSTANCE**.—**Complex t's, Composite t's, Compound t's.** T's composed of two or more simple t's in nearly equal proportions, as in blood-vessels, lymph-vessels, lymphatic glands, etc. [J. 30.]—**Conducting t., Conductive t.** Fr. *tissu conducteur*. 1. Any t., such as laticiferous t., serving to convey fluids from one part of a plant to another. 2. A special name for the cellular t. through which the pollen tube descends into the cavity of the ovary.—**Conjunctive t., Connective t.** Lat. *tela connectiva* (seu *falcratis*, seu *maltharis*). Ger. *Bindegewebe*, *Bindesubstanz*, *Füllgewebe*, *Stützgewebe*. Syn.: *skeletal t.*, *sustentacular t.* T. serving for the support or connection of other t's. It consists of soft masses, as in areolar t., in tendons, and in ligaments, or of more or less hard and rigid masses, as in cartilage, bone, and dentin. All these forms agree (1) in being derived from the mesoderm, (2) in gradually merging into one another in the adult, (3) in taking one another's place in the course of development, (4) in forming homologous parts in different animals, and (5) in yielding gelatin or a gelatinous substance when boiled. There are also always present a considerable number of protoplasmic cells. The term connective t. is sometimes limited to the soft connective substances in the body, excluding bone and cartilage. It has then been aptly termed the soft skeleton, for every part is supported and connected by its fibres. In the soft connective substances the fibres and connective t. corpuscles are imbedded in a homogeneous jelly-like ground-substance which stains brown like cell-cement when treated with silver nitrate. [J.] See **White fibres of connective t.**, **Areolar t.**, **White fibrous t.**, **Elastic t.**, **Osseous t.**, and **CARTILAGE**.—**Constituent areolar t.** Syn.: *penetrating t.*, *parenchymal t.* Areolar t. which binds together the lobes and lobules of glands, etc., and accompanies the vessels and nerves into those organs, giving them support and protection. [J. 30.]—**Corneous t.** Compact masses of cells which are soft near their vascular bases, but near their free surface hard, flat, and often devoid of a nucleus; found in the hair, nails, hoofs, horns, and epidermis. [J. 24, 33.]—**Cribose t.** See **Sieve t.**—**Cytogenous t.** See **Adenoid t.**—**Dental t., Dentine t.** See **DENTIN**.—**Elastic t.** That part of the connective t. of the body consisting of branched and anastomosing elastic fibres or of elastic membranes. It is unaffected by acetic acid and caustic potash, and is present in parts which are liable to sudden variations in size (e. g., the arteries and lungs). The ligamentum nuchæ of the ox and the ligamenta subflava of man are composed almost entirely of elastic t. [J. 30, 31, 142.]—**Elementary t's.** See **Simple t's**.—**Embryonal connective t.** See **Mucoid connective t.**—**Embryoplastic t.** Fr. *tissu embryoplastique*. Embryonic connective t. before the fibres are developed. [J. 27, 33.]—**Endothelial t.** The t. formed by the endothelia of the body. [J.]—**Epidermic t.** Of Kölliker, the epidermis and its appendages, with the epithelium of mucous membranes. [J. 24.]—**Epithelial t.** The t. formed by the epithelia of the body. [J.]—**Erectile t.** See **Cavernous t.**—**Fat-t., Fatty t.** See **Adipose t.**—**Fibrillar connective t.** See **White fibrous t.**—**Fibrillated t.** See **Fibrous t.**—**Fibro-cartilaginous t.** See **FIBRO-CARTILAGE**.—**Fibrous cellular t., Fibrous connective t.** See **White fibrous t.**—**Fibrous t.** Ger. *fibröses Gewebe*. 1. Connective t. composed of elastic or white fibres and bundles of fibres which extend in nearly parallel directions, as in tendons and the ligamentum nuchæ. 2. Connective t. composed of fibres without regard to their nature or direction. [J. 30, 43.] 3. In botany, elongated, thick-walled and taper-pointed cells found in the fibro-vascular bundles, including bast-cells, wood-cells, and tracheids. [a. 24.]—**Follicular t.** See **Adenoid t.**—**Formative t.** Ger. *Bildungsgewebe*. A collection of cells which give rise, by becoming more or less modified, to a permanent or adult t. [J.]—**Formed connective t.** See **Solid connective t.**—**Formless connective t.** See **Areolar t.**—**Fundamental t.** One of the t's forming a fundamental system (q. v.). [a. 35.]—**Gelatinous (connective) t.** See **Mucoid connective t.**—**Gelatinous nervous t.** Nervous t. composed of non-medullated nerve-fibres, as in the sympathetic nerve. [J. 43.]—**Generating t.** See **MERISTEM**.—**Germinal t.** T. giving rise to ova or spermatozooids. [J.] See **GERMINAL EPITHELIUM** and **GERM PLASMA**.—**Glandular t.** See **Punctated t.**—**Granular connective t.** See **NEUROGLIA**.—**Granulation t.** A mass of indifferent cells cemented by a scanty amount of ground substance and traversed by capillary blood-vessels. [E. 25.]—**Gray nervous t.** Nervous t. containing nerve-cells. [J. 43.] See also **GRAY MATTER of the brain**.—**Ground t.** See **STROMA**.—**Hepatic t.** See **Botryoidal t.**—**His's t.** Spindle-t.—**Homogeneous connective t.** Membranes, such as the coats of the Malpighian corpuscles of the spleen, which agree in chemical character with connective t., but do not contain bundles of fibres. [J. 24.]—**Horny t.** See **Corneous t.**—**Indifferent connective t.** See **Mucoid connective t.**—**Inflammatory t.** Neoplastic t. formed during inflammation. [a. 34.]—**Interlobular connective t. of the liver.** Connective t. between the acini of the liver, containing branches of the bile ducts, the hepatic artery, and the portal vein. [L.]—**Intermediate areo-**

**lar t.** Connective t. lying between the muscles, blood-vessels, and other deep-seated parts. [J. 30.] See **Areolar t.**—**Intermediate t.** The active t. immediately surrounding the pith of monocotyledonous plants. [a. 35.]—**Intermuscular t.** See **Areolar t.**—**Interstitial connective t.** See **Areolar t.** and **Tissu annexiel.**—**Investing areolar t.** A kind of sheath formed around the muscles, blood-vessels, nerves, etc., by the areolar t. [J. 30.]—**Jelly-like t.** See **Mucoid connective t.**—**Lamellar t., Laminar t., Laminated t.** See **Areolar t.** and **Fibrous t.**—**Lardiform t.** T. that has undergone amyloid degeneration. [a. 34.]—**Laticiferous t.** Cienchyma. [a. 35.] See **Latex-cell.**—**Ligamentous t.** See **White fibrous t.**—**Lymphatic t., Lymphoid t., Lymph-t.** See **Adenoid t.**—**Mechanical t.** See **Supporting t.**—**Medullary t.** See **Medullary SUBSTANCE**.—**Mesothelial t's.** T's formed from the mesothelium. [a. 34.]—**Metabolic t.** Organic t. that is concerned in metabolism. [a. 34.]—**Mucinous t., Mucoid (connective) t., Mucous t.** Ger. *Gallertgewebe*, *Schleimgewebe*, *Nabelstranggewebe*. Connective t., such as that in the umbilical cord of the foetus, consisting of an abundant jelly-like, albuminous ground-substance (see **Mucoid basis-SUBSTANCE**) in which are imbedded numerous round and branched, anastomosing cells and comparatively few white and elastic connective-t. fibres. [J. 30, 31.]—**Muscular t.** T. composed of striated muscular fibres, of cardiac muscular fibre-cells, or of muscular fibre-cells. Its distinguishing characteristic is its power to contract in one direction, viz., along the long axis of the fibres composing it. [J. 17, 26, 28, 31.]—**Nerve-t.** See **Nervous t.**—**Nervous cineritious t.** See **Gray nervous t.**—**Nervous t.** T. composed of nerve-fibres and nerve-cells. [J.]—**Osseous t.** Ger. *Knochengewebe*. The combined structure consisting of the matrix of animal matter and the osseous granules deposited in it that constitutes bone. See also **Osseous basis-SUBSTANCE**, **Compact osseous SUBSTANCE**, and **Spongy osseous SUBSTANCE**.—**Osteogenic t.** See **OSTEOGEN**.—**Palisade t.** See **Palisade PARENCHYMA**.—**Parenchymal areolar t., Penetrating areolar t.** See **Constituent areolar t.**—**Permanent t.** Cell t. not capable of multiplication and division. [a. 35.]—**Phanerogenous t., Phanerophorous t.** A structure which may be said to bear some evident part, such as the papilla of a hair, which seems to bear the hair. [J. 16, 33.]—**Pitted t.** In botany, bothrenchyma, taphrenchyma; t. in which pits or perforations occur on the cell-walls or upon the septa between superposed cells. [a. 35.]—**Porous connective t.** See **NEUROGLIA**.—**Porous t.** See **Areolar t.**—**Primary t., Primordial t.** A cell-t. of a plant from which its parts are developed, e. g., meristem. [a. 35.]—**Pulp t.** T. forming the pulp of a gland or organ, such as the t. of the tooth-pulp. [J. 26.]—**Punctated t.** See **Pitted t.**—**Reichert's connective t.** See **Homogeneous connective t.**—**Reticular t.** See **Adenoid t.**—**Reticulated connective t.** See **Areolar t.** and **Adenoid t.**—**Reticiform (connective) t.** See **Adenoid t.**—**Sarcous t.** See **Muscular t.**—**Sclerous t.** A general term including osseous, cartilaginous, and fibrous t. [J. 16.]—**Sieve-t.** A cellular t. made up of thin-walled cells having areas of sieve-like markings. It is characteristic of the phloem. [E. 91 (a. 35).]—**Simple t's.** T's composed of but one structural element, or with but a slight admixture of others, as in blood, lymph, epithelium, the connective t., cartilage, bone, and muscular and nervous t's. [J. 21, 30.]—**Skeletal t.** A general term for fibrous, adenoid, adipose, osseous, and cartilaginous t. [Lankester, "Quart. Jour. of Micr. Sci.," 1880, p. 307 (J).]—**Skeletotrophic t.** A general term for connective t., capillaries, embryonic blood-vessels, and the hemoglobinous and colorless elements of the blood. [Lankester, l. c. (J).]—**Solid connective t.** Of Kölliker, a general term for tendons, ligaments, fibro-cartilage, and fibrous membranes. [J.]—**Spindle t.** Of His, the spindle-shaped elements in the ovary, which he supposed to be stunted muscular fibre-cells. [J. 35.]—**Spongy t. (of bone).** See **Spongy bone SUBSTANCE**.—**Subarachnoid t.** Trabecule of fibrous t. between the arachnoid and pia, the surfaces of which have a covering of endothelia. [L.]—**Subcutaneous adipose t.** The adipose t. inclosed in subcutaneous t. (q. v.). [a. 45.]—**Subcutaneous (cellular, or connective) t., Subdermic t.** Ger. *Unterhautgewebe*, *Unterhautzellgewebe*. The areolar t. just beneath the corium and merging insensibly into it. It is made up of fasciculi or loosely joined fibrous bundles that pass obliquely from the underlying muscular fascia or periosteum to unite with the t. of the corium and inclose more or less adipose t. in their meshes, together with the sweat-glands. In this layer are also found the follicles of the coarser hairs, also blood-vessels, lymphatics, and nerves. [G. J.] Cf. **Fat COLUMNS**.—**Submucous (areolar) t.** Ger. *Unterschleimhautgewebe*. Areolar t. beneath a mucous membrane and serving to connect it with other parts. [J.]—**Subperiosteal t.** See **Osteogenetic LAYER**.—**Subserous areolar t.** The areolar t. serving to attach serous membranes to the parts they invest. [J. 30.]—**Supporting t.** T., such as woody t., serving to strengthen a part or organ; mechanical t. [a. 35.]—**Sustentacular t.** See **Connective t.**—**Trabecular t.** Ger. *Balkengewebe*. T., especially connective t., arranged in trabeculae, which often form a network. [J. 35.]—**Tubular nervous t.** Nervous t. composed of medullated nerve-fibres. [J. 43.]—**Tubuliferous t.** Ger. *Segmentalstränge*. Of Balfour, the branched masses of epithelium forming cords or tubes in the vascular zone of the ovary in embryos and young animals. It is derived from the Wolffian bodies. [Quart. Jour. of Micr. Sci., 1878, p. 383 (J).]—**Ungual t.** See **Corneous t.**—**Utricular t.** See **PSEUDOPARENCHYMA**.—**Vascular t.** Fr. *tissu vasculaire*. In botany, t. composed of united tubes or vessels formed by the obliteration of septa between superposed cells. [a. 35.]—**Vasifactive t.** T. giving rise to blood-vessels. [J.] See also **Vasoformative CELL**.—**Vasiform t.** Trachenchyma. [a. 35.]—**Vaso-fibrous t.** See **Botryoidal t.**—**Vesicular nervous t.** Nervous t. containing nerve-cells, as in the ganglia and the cerebral cortex. [J. 43.]—**Water (storing) t.** See **Aqueous t.**—**White fibrous t.** Ger. *fibrilläres Bindegewebe*. 1. Connective t. composed of white inelastic fibres and bundles of fibres extending in nearly parallel directions. It is exceedingly strong, and

forms tendons, ligaments, and resistant membranes (e. g., pericosteum, perichondrium, and the dura). In its purest form it contains very few elastic fibres. It merges insensibly into areolar t., as in the fascia. 2. Connective t. composed of white, inelastic, and glue-yielding fibres without regard to the direction of the fibres. [J. 35.]—**White nervous t.** Nervous t. composed of medullated nerve-fibres. [J. 43.]—**Woody t.** T. forming the woody fibre of plants. [a. 35.] See **WOOD-CELL**.—**Yellow elastic t.** Yellow fibrous t. See **Elastic t.**

**TISSULAIRE** (Fr.), adj. Te-su<sup>2</sup>-la<sup>2</sup>r. Pertaining to the tissues. [J. 33.]

**TISWIN**, n. Ti<sup>2</sup>s/wi<sup>2</sup>n. Among the Apaches of Arizona, a kind of liquor manufactured from wheat, barley, or maize, which produces intoxication of the worst type when used in considerable quantities. The grain is buried in the ground until it sprouts, then dried and ground, and then, after boiling in water, put aside to ferment. ["Med. Record," Sept. 24, 1892, p. 358 (a, 50).]

**TITA**, n. Written also *teeta*. The *Coptis teeta* or its root. The roots of *Picrorrhiza kurroa* and some other plants are also known under this name in the Bengal bazaars. [a. 35.]

**TITANATE**, n. Ti<sup>2</sup>t/a<sup>2</sup>n-at. A salt of titanic acid. [B.]
